2 **Andreesen, George Soros, Mario Rosatti, Martin LaGod, Michael Moritz, Viktor Vekselberg,**  
3 **Larry Summers, Pierre Omidyar, Tom Steyer, Steve Jurvetson, Steve Rattner and their**  
4 **CARTEL! They have "command and control and exclusive beneficiary positions in ongoing,**  
5 **coordinated, criminal and anti-trust activities involving government and stock market funds..."**

6  
7 They hire these dirty law firms, investment bankers, lobbyists, fake charity fronts and character  
8 assassination services to do their dirty work. Their contractors and employees pay the bribes, relay  
9 the orders, buy the 'reporters', implement their black-lists, source the hookers and do the day-to-day  
10 illicit deeds.

11 These are the people funding and promoting riots across the US and Europe.

12 [LinkedIn Co-Founder Reid Hoffman](#), who [notoriously backed](#) a group that “spread  
13 disinformation during the 2017 Alabama special election for U.S. Senate,” is now being joined by  
14 other Big Tech billionaires in a plot to boost presumptive Democratic nominee for president Joe  
15 Biden in 2020.

16 ( <https://www.forbes.com/profile/reid-hoffman/#3e47244a1849> )

17 ( [https://www.newsbusters.org/blogs/techwatch/corinne-weaver/2019/04/23/lefty-](https://www.newsbusters.org/blogs/techwatch/corinne-weaver/2019/04/23/lefty-billionaires-election-plot-bought-56x-more-ads)  
18 [billionaires-election-plot-bought-56x-more-ads](#) )

19 Democrats are “scrambling to patch [Biden’s] digital deficits,” according to [Vox Recode](#).  
20 “[B]ehind the scenes, Silicon Valley’s billionaire Democrats **are spending tens of millions of**  
21 **dollars on their own sweeping plans** to catch up to President Donald Trump’s lead on digital  
22 campaigning.” [Emphasis added.] Recode said these “sweeping plans” are “poised to make [these  
23 billionaires] some of the country’s most influential people when it comes to shaping the November  
24 results.”

25 These billionaires in particular are funding everything from “nerdy political science  
26 ePlaintiff 42eriments to divisive partisan news sites to rivalrous attempts to overhaul the party’s  
27 beleaguered data file.”

28 As Recode tells it, “Joe Biden has a problem. Silicon Valley billionaires think they have a

1 solution.”

2 Recode identified four major players from Big Tech that have the “most ambitious plans”:  
3 Reid Hoffman, Facebook co-founder [Dustin Moskovitz](#), philanthropist [Laurene Powell Jobs](#), and  
4 former Google CEO [Eric Schmidt](#).

5 ( <https://www.forbes.com/profile/dustin-moskovitz/#7ca9684d1dd3> )

6 ( <https://www.forbes.com/profile/laurene-powell-jobs/#436a3ff5704f> )

7 ( <https://www.forbes.com/profile/eric-schmidt/#569af27c138e> )

8 Hoffman, in particular, stands out from the rest. [OpenSecrets](#) revealed that “political  
9 operations are pouring millions of ‘dark money’ dollars into ads and digital content masquerading  
10 as news coverage to influence the 2020 election.”

11 ( <https://www.opensecrets.org/news/2020/05/dark-money-networks-fake-news-sites/> )

12 One of those progressive [operations](#) is dubbed Courier Newsroom, which “has faced  
13 scrutiny for ePlaintiff 42loiting the collapse of local journalism to spread ‘[hyperlocal partisan](#)  
14 [propaganda](#).’” Courier Newsroom is owned by the leftist nonprofit ACRONYM.

15 ( [https://www.newsbusters.org/blogs/business/joseph-vazquez/2020/05/26/lefty-dark-](https://www.newsbusters.org/blogs/business/joseph-vazquez/2020/05/26/lefty-dark-money-group-acronym-behind-liberal-fake-news)  
16 [money-group-acronym-behind-liberal-fake-news](https://www.newsbusters.org/blogs/business/joseph-vazquez/2020/05/26/lefty-dark-money-group-acronym-behind-liberal-fake-news) )

17 ( [https://www.washingtonpost.com/opinions/2020/02/06/is-it-local-journalism-or-just-local-](https://www.washingtonpost.com/opinions/2020/02/06/is-it-local-journalism-or-just-local-propaganda/)  
18 [propaganda/](https://www.washingtonpost.com/opinions/2020/02/06/is-it-local-journalism-or-just-local-propaganda/) )

19 OpenSecrets reported that ACRONYM had “received [financial backing](#) from [Investing in](#)  
20 [US](#), an investment vehicle funded by Silicon Valley donor and billionaire LinkedIn founder Reid  
21 Hoffman.” Recode said that Hoffman’s “aides have indicated that setting up partisan news sites that  
22 masquerade as journalism is one of the priorities of its group of allied donors.” According to  
23 Recode, Hoffman has put around \$10 million into ACRONYM.

24 ( [https://www.politico.com/news/2020/02/05/angry-democrats-unload-operative-over-iowa-](https://www.politico.com/news/2020/02/05/angry-democrats-unload-operative-over-iowa-caucus-results-110807)  
25 [caucus-results-110807](https://www.politico.com/news/2020/02/05/angry-democrats-unload-operative-over-iowa-caucus-results-110807) )

26 ( [https://mronline.org/2020/02/07/acronym-group-that-sabotaged-iowa-caucus-birthed-by-](https://mronline.org/2020/02/07/acronym-group-that-sabotaged-iowa-caucus-birthed-by-billionaire-who-funded-alabama-disinformation-campaign/)  
27 [billionaire-who-funded-alabama-disinformation-campaign/](https://mronline.org/2020/02/07/acronym-group-that-sabotaged-iowa-caucus-birthed-by-billionaire-who-funded-alabama-disinformation-campaign/) )

28 But that isn’t all Hoffman has been up to. Recode reported that Hoffman invested “\$18

1 million, his single-biggest bet this cycle,” in a political startup called Alloy.

2 Recode reported that “[t]he startup is attempting to build a warehouse to store the data that  
3 various progressive groups collect on voters and use it to try to get them to the polls.” Recode  
4 continued: “As part of its data acquisition, Alloy has bought some lists of voters’ cellphone  
5 numbers, a data source that people say Hoffman’s team, like other donors, sees as key this year due  
6 to the new need for digital campaigning.”

7 The former [Google CEO Eric Schmidt](https://ericsschmidt.com/bio/) is also getting heavily involved this cycle. Recode  
8 said Schmidt “has sunk money into the Democratic Data Exchange, a modest, competing effort by  
9 the Democratic National Committee to encourage data sharing by state parties to improve the  
10 party’s beleaguered digital backbone.” Recode interestingly assessed that Schmidt “may be working  
11 more closely with the party than Hoffman.”

12 ( <https://ericsschmidt.com/bio/> )

13 Schmidt also had [reportedly](#) given a \$4.7 million gift to the taPlaintiff 42ayer-funded liberal  
14 outlet National Public Radio with his wife Wendy.

15 ( [https://www.newsbusters.org/blogs/business/joseph-vazquez/2020/05/20/npr-editor-lauds-  
16 npr-landing-47m-contribution-dem-donor](https://www.newsbusters.org/blogs/business/joseph-vazquez/2020/05/20/npr-editor-lauds-npr-landing-47m-contribution-dem-donor) )

17 “This focus on ‘information distribution’ has also led many Silicon Valley donors, directly  
18 or indirectly, to fund projects like [Pulso](#) and [PushBlack](#), which are quasi-journalistic plays focused  
19 on the Hispanic and African American communities, respectively,” Recode said. “Two things both  
20 Pulso and PushBlack also do? Register voters who are likely to be Democrats.”

21 ( <https://projectpulso.org/> )

22 ( <https://pushblack.org/> )

23 Tech billionaires, “particularly Moskovitz and Powell Jobs,” are unleashing “millions into  
24 some of the country’s most ambitious voter-registration programs — **almost all of it behind the**  
25 **scenes** — hoping to emulate what worked for Democrats in 2018,” according to Recode. [Emphasis  
26 added.]

27 About a dozen voter-registration groups, which included failed Democratic Georgia  
28 gubernatorial candidate Stacey Abrams’s leftist group [Fair Fight](#), gathered at Powell Jobs’s

1 “Emerson Collective headquarters in mid-March to raise money for their 2020 plans, sources told  
2 Recode.”

3 ( <https://fairfight.com/about-fair-fight/> )

4 For Moskovitz, his “North Star is a desire to nail the lowest ‘cost-per-net-Democratic-  
5 vote.’” Recode said “[t]hat’s largely led his team toward the funding of mail and voter-registration  
6 work.”

7 As [Big Tech platform Twitter](#) dips into editorializing Trump’s tweets, it appears that other  
8 billionaire liberals from Silicon Valley are not going to be sitting idly by for a repeat of the 2016  
9 election outcome.

10 ( [https://www.newsbusters.org/blogs/techwatch/alexander-hall/2020/05/27/liberal-media-  
11 back-twitter-fact-checking-trump-voter-fraud](https://www.newsbusters.org/blogs/techwatch/alexander-hall/2020/05/27/liberal-media-back-twitter-fact-checking-trump-voter-fraud) )

12 These people operate like a private Mafia that use Plaintiffs government as their plaything!

13 **Recap:**

14 *The Silicon Valley tech Cartel (AKA: "Paypal Mafia", "Deep State") is evil because these racist,*  
15 *ageist, sex-trafficking, money-laundering, elitist, politician bribing, tax evaders: steal any*  
16 *technology they desire; They manufactured the CLEANTECH CRASH as shown in the 60*  
17 *MINUTES episode of the same name; they run a prostitution ring and sexually extort young women*  
18 *and interns in Silicon Valley; they are 'rape culture' take-what-they-want misogynists, ageists and*  
19 *racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type*  
20 *collusion and stock market insider trading schemes that harm independent business and the public;*  
21 *their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech*  
22 *workers; 90% of their divorce court files reveal horrific abuses and sex trafficking;*  
23

24  
25  
26 *They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S.*  
27 *Senators; They can even evade FBI & SEC investigations; They hire women to act as 'trophy wives'*  
28 *and 'beards'; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights*

1 *because they are using stolen technologies; they have been caught on video and recordings beating,*  
2 *kicking and harming women hundreds of times;*

3  
4 *They have bought up all of the Tier-One tech law firms and order them to black-list, and never help,*  
5 *those who seek equal tech rights; they collude to abuse your privacy and make databases on the*  
6 *public for political control; they have to cheat to compete because they are only good with spread*  
7 *sheets instead of innovation; They run black-lists, character assassination attacks, collusion and*  
8 *other anti-trust violating acts in violation of RICO laws. Silicon Valley has become the largest*  
9 *assemblage of douche-bags and yuppie frat boy criminals in human history.*

10  
11 *Theranos is not the exception, it is the standard. Tesla, Google, Theranos, Wework, Facebook are*  
12 *lies backed by famous political insiders to protect their insider trading and covered-up by fake news*  
13 *operators. They are also fronts to fund political campaigns via the ill-gotten profits from their*  
14 *endeavors. When the bad guys, and their lap-dog politicians, attack you because your products are*  
15 *better than theirs they are proving that they are frat boy scumbags, from Stanford and Yale, that*  
16 *operate in a little pack, like dogs!*

17  
18  
19 *Their Sandhill Road operation should be raided by the FBI! The best thing that could come from the*  
20 *COVID pandemic is that they all are forced into bankruptcy! When your Senator holds stock market*  
21 *shares in companies that exist to profit on the backs of consumers, via corruption, then it is*  
22 *impossible for that Senator to ever do anything but be corrupt! We have reported this in writing to*  
23 *winklerm@sec.gov, sanfrancisco@sec.gov and 30+ other federal officers but have yet to see*  
24 *Plaintiffs whistle-blower rewards...or any action!*

25  
26  
27 *Do you wonder how big politician insider stock trading is? Take a look at how many TRILLIONS of*  
28 *dollars pass through the stock markets annually and then look at the reported, AND*

1 *UNREPORTED, securities holdings of famous U.S. Senators and government agency staff. That is*  
2 *what Seth Rich and the people in the "In Memory Of" section, below, were disclosing. These are*  
3 *massive crimes! The perpetrators operate a massive and abusive national sex cult. The perverts in*  
4 *the SandHill Road Venture Capital offices, located between Highway 280 down to to Santa Cruz*  
5 *Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global*  
6 *cartel. Their executives at Google, Facebook, Netflix, Linkedin, Twitter, and their related holdings,*  
7 *comprise the rest. The Harvey Weinstein and Ed Buck sex scandals are well known.*  
8

9  
10 *These men's sex cult actions have been widely covered in the news individually in the Joe Lonsdale*  
11 *rape case, The Kleiner Perkins Ellen Pao sex abuse lawsuit, The Eric Schmidt sex penthouse*  
12 *stories, The Jeffrey Epstein case, The Google Forrest Hayes hooker murder case, The Andy Rubin*  
13 *sex slave case, The Sergy Brin 3-way sex romp scandal, The British Hydrant investigation, The*  
14 *Elon Musk Steve Jurvetson billionaire sex parties scandals,The NXIVM sexual slave cases, The*  
15 *Michael Goguen anal sex slave trial, The Tom Perkins Hooker Parties and thousands of other cases*  
16 *and federal divorce court filings. This group of people have proven themselves, over and over, to be*  
17 *sociopath control freaks not fit for participation in public commerce, public policy or media*  
18 *control. The Four Seasons Hotel and Rosewood Hotels in Silicon Valley are estimated to engage in*  
19 *over \$30,000.00 of high-end escort sex trafficking per day, a portion of it managed by Eastern Bloc*  
20 *Mafia operators. The Elon Musk sex perversions are the tip of the iceberg.*  
21

22  
23  
24 *At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel*  
25 *members. Google boss David Drummond engaged in horrible philandering sexual violations of his*  
26 *wife yet Google covers up every story about it on the web. Google's Eric Schmidt is under massive*  
27 *investigation. You hear about the female victims of this sex cult but you rarely hear about the young*  
28 *male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are*

1 paid "not just for sex but for the oligarch's endless need to feel that they can control anyone for any  
2 reason...". Multiple attorney general's controlled by their cartel, ie: Eric Schneiderman and Eliot  
3 Spitzer, are involved this these sex rings.

4  
5 These are the main influencers of a national political party and they are all involved in horrific sex  
6 perversions and abuses! All Silicon Valley tech cartel media companies work together to censor all  
7 news and information in order to hide coverage of their dirty deeds and to only put politicians in  
8 office that will give the Cartel political payola, kick-backs and insider stock pumps.  
9

10  
11 The Smedley Butler "Business Plot" from the past is not unlike the coup that Google and clan tried.  
12 See details in Emily Chang's book: BROTOPIA; Roan Farrow's book: CATCH & KILL; Edward  
13 Snowden's Book: PERMANENT RECORD; Peter Schwetzer's book: THROW THEM ALL OUT;  
14 Dave Eggers book: THE CIRCLE; Franklin Foer's book: WORLD WITHOUT MIND; Corey Pein's  
15 book: JOURNEY INTO THE SAVAGE HEART OF SILICON VALLEY; Dan Lyon's book:  
16 DISRUPTED; Antonio Martinez book: CHAOS MONKEYS. The Angelgate, Epstein, No-Poaching  
17 DOJ Class Action, and hundreds of other cases, prove that they meet, conspire, collude and  
18 blacklist in felony violation of anti-trust and RICO Racketeering laws. -  
19

20  
21 90% of these guys came from 100% of the fraternity houses involved in the recent college rape  
22 cases.  
23  
24  
25  
26  
27  
28

1 **EXHIBIT 41- The Quid Pro Quo Process**

2  
3 **How California Politicians And Silicon Valley Tech Company Quid-Pro-Quo Works**  
4 **To Hide The Criminality of Corruption**

5  
6 *Christine Lakatos* massive investigations of Jerry Brown, Dianne Feinstein, Nancy Pelosi,  
7 Kamala Harris and other famous California politicians owning parts of Tesla Motors, Facebook,  
8 Google, Netflix and Cleantech is jaw dropping. All of those politicians competing constituents have  
9 suffered for it, or been put out of business by exclusive deals that only Tesla Motors, Facebook,  
10 Google, Netflix and YouTube got. That is a crime!

11 A large volume of forensic research proves that Silicon Valley Cartel tech firms receive  
12 benefits from politicians and politicians, at the same time, benefit from these firms.

13 This evidence on the exchange of benefits between politicians and firms implies some sort  
14 of agreement between these two parties. This agreement, however, cannot be in the form of a  
15 written contract as writing direct fee-for-service contracts between a politician and a firm is  
16 considered bribery (Krozner and Stratmann 1998; 2000). In addition, either party to this agreement  
17 might renege on its promise and the other party cannot resort to the courts.

18 Procon.org, for example, reports: “Less than two months after ascending to the United States  
19 Senate, Barack Obama bought more than \$50,000 worth of stock in two speculative companies  
20 whose major investors included some of his biggest political donors. One of the companies was a  
21 biotech concern that was starting to develop a drug to treat avian flu. In March 2005, two weeks  
22 after buying about \$5,000 of its shares, Mr. Obama took the lead in a legislative push for more  
23 federal spending to battle the disease. The most recent financial disclosure form for Mr. Obama . . .  
24 shows that he bought more than \$50,000 in stock in a satellite communications business whose  
25 principal backers . . . had raised more than \$150,000 for his political committees.” (   
26 <http://insidertrading.procon.org/viewresource.asp?resourceID=1580#obamaa>. See more examples  
27 from the Citizens for Responsibility and Ethics in Washington (CREW) report (2009).)  
28

1 The literature and Plaintiffs eye-witness experience proves that politically-connected Silicon Valley  
2 tech firms monthly obtain economic favors, such as securing favorable legislation, special tax  
3 exemptions, having preferential access to finance, receiving government contracts, or help in  
4 dealing with regulatory agencies. The evidence proves that Google's support, for example, can help  
5 in winning elections. For example, firms can vary the number of people they employ, coordinate the  
6 opening and closing of plants, and increase their lending activity in election years in order to help  
7 incumbent politicians get re-elected. (See Roberts 1990; Snyder 1990; Langbein and Lotwis 1990;  
8 Durden, Shorgen, and Silberman 1991; Stratmann 1991, 1995, and 1998; Fisman 2001; Johnson and  
9 Mitton 2003; Ansolabehere, Snyder, and Ueda 2004; Sapienza 2004, Dinç 2005; Khwaja and Mian  
10 2005; Bertrand, Kramarz, Schoar, and Thesmar 2006; Faccio 2006; Faccio, Masulis, and  
11 McConnell 2006; Jayachandran 2006; Leuz and Oberholzer-Gee 2006; Claessens, Feijen, Laeven  
12 2008; Desai and  
13 Olofgard 2008; Ramanna 2008; Goldman, Rocholl, and So 2008, 2009; Cole 2009; Cooper, Gulen,  
14 and Ovtchinnikov 2009; Correia 2009; Ramanna and Roychowdhury 2010; Benmelech and  
15 Moskowitz 2010.)

16 The share ownership of politicians serves as a mechanism to quid-pro-quo their relationships  
17 with big tech firms, is as follows: The ownership of politicians plays multiple distinct (but not  
18 necessarily independent) roles; one that relies upon the amount of ownership and one that does not.  
19 First, as investors in firms, politicians tie their own interests to those of the firm. Thus, harming  
20 (benefiting) the firm means harming (benefiting) the politician and vice versa. By owning a firm's  
21 stock, politicians commit their personal wealth to the firm and reduce a firm's uncertainty with  
22 regard to their actions toward the firm. This will, in turn, enhance the firm's incentive to support the  
23 politician-owner during both current and future elections in order to prolong the incumbency period  
24 for as long as possible. Firms have their lobbyists push to be able to know the amount of ownership  
25 likely to be material to politicians. This knowledge, in turn, enables them to judge whether the  
26 politician's interest is aligned with the firm's interest and optimize quid-pro-quo.

27 Per [Christine Lakatos](#) 2014 began with a bang: "[Obama's Second Term Is All About](#)  
28 [Climate Change](#)." *New York Magazine*, in their reporting, claimed that the evidence of this has to do

1 with President Obama’s appointment of John Kerry (“longtime climate obsessive”) as Secretary of  
2 State, as well as other key green appointees.

3 ( [https://nymag.com/daily/intelligencer/2014/01/obamas-second-term-is-all-about-climate-  
4 change.html](https://nymag.com/daily/intelligencer/2014/01/obamas-second-term-is-all-about-climate-change.html) )

5 Kerry, by the way, while recently in Indonesia, blasted climate change deniers, warning,  
6 “Climate change may be the world’s ‘most fearsome’ weapon of mass destruction and urgent action  
7 is needed to combat it,” [wrote](#) CBC News Canada.

8 ( [https://www.cbc.ca/news/canada/toronto/john-kerry-blasts-climate-change-deniers-shoddy-  
9 scientists-1.2539163](https://www.cbc.ca/news/canada/toronto/john-kerry-blasts-climate-change-deniers-shoddy-scientists-1.2539163) )

10 This scare tactic — now adding to the long list of liberal crap, which includes ludicrous  
11 allegations that climate change [will lead to](#) “an orgy of killing, looting, rape and burglary” (just ask  
12 James Delingpole) — surfaced just weeks after President Obama’s State of the Union address  
13 (January 28, 2014) where he emphatically [declared](#) that the climate change debate is over.

14 ( [https://www.breitbart.com/Breitbart-London/2014/02/28/Rape-Muder-Chocolate-  
15 Shortages-Is-There-Anything-Climate-Change-doesn-t-Cause](https://www.breitbart.com/Breitbart-London/2014/02/28/Rape-Muder-Chocolate-Shortages-Is-There-Anything-Climate-Change-doesn-t-Cause) )

16 ( [https://www.politico.com/blogs/politico-live/2014/01/obama-climate-change-is-a-fact-  
17 182145.html](https://www.politico.com/blogs/politico-live/2014/01/obama-climate-change-is-a-fact-182145.html) )

18 But the debate is settled. Climate change is a fact. And when Plaintiffs children’s children  
19 look us in the eye and ask if we did all we could to leave them a safer, more stable world, with new  
20 sources of energy, I want us to be able to say yes, we did.

21 A claim that many Americans, including *Washington Post* columnist Charles Krauthammer,  
22 find “[absurd](#)” — with [even](#) co-founder of Greenpeace Patrick Moore, last month, [stating](#) to  
23 members of the Senate Environment and Public Works Committee that there is no scientific proof  
24 of man-made climate change.

25 ( [https://dailycaller.com/2014/02/17/krauthammer-the-president-pretends-that-this-is-all-  
26 settled-science/](https://dailycaller.com/2014/02/17/krauthammer-the-president-pretends-that-this-is-all-settled-science/) )

27 ( [https://www.thenewamerican.com/tech/environment/item/17736-no-proof-of-man-made-  
28 climate-change-says-greenpeace-co-founder](https://www.thenewamerican.com/tech/environment/item/17736-no-proof-of-man-made-climate-change-says-greenpeace-co-founder) )

1 ( [https://www.epw.senate.gov/public/index.cfm?](https://www.epw.senate.gov/public/index.cfm?FuseAction=Files.View&FileStore_id=415b9cde-e664-4628-8fb5-ae3951197d03)  
2 [FuseAction=Files.View&FileStore\\_id=415b9cde-e664-4628-8fb5-ae3951197d03](https://www.epw.senate.gov/public/index.cfm?FuseAction=Files.View&FileStore_id=415b9cde-e664-4628-8fb5-ae3951197d03) )

3 The president, during his speech, which was a “[call to action](#)” with or without Congress,  
4 also [pumped up](#) his “all the above” energy strategy, asserting that it was working: “America is  
5 closer to energy independence.” Later, Mr. Obama claimed that his energy policy “was creating  
6 jobs and leading to a cleaner, safer planet.”

7 ( <https://www.cnn.com/2014/01/28/politics/2014-state-of-the-union/index.html> )  
8 ( [https://www.washingtonpost.com/politics/full-text-of-obamas-2014-state-of-the-union-](https://www.washingtonpost.com/politics/full-text-of-obamas-2014-state-of-the-union-address/2014/01/28/e0c93358-887f-11e3-a5bd-844629433ba3_story.html)  
9 [address/2014/01/28/e0c93358-887f-11e3-a5bd-844629433ba3\\_story.html](https://www.washingtonpost.com/politics/full-text-of-obamas-2014-state-of-the-union-address/2014/01/28/e0c93358-887f-11e3-a5bd-844629433ba3_story.html) )

10 While Marita Noon (energy expert and Towhall.com [columnist](#)) has continually tackled the  
11 president’s so-called “energy independence” assertion, together we have debunked the green jobs  
12 hype and deception many times, including in my recent study on the [Obama-backed green energy](#)  
13 [failures](#).

14 ( <https://greencorruption.blogspot.com/2014/01/cleantech-crash-cbs-lesley-stahl.html> )

15 Moreover, a year ago, we blew the lid off of [Climate Hawk Kerry](#) and his part in green  
16 corruption. What’s most disingenuous is that while Kerry preaches “global warming doom and  
17 gloom,” his “government carbon footprint” is [enormous](#) — with no end in sight. (And who’s  
18 tracking his personal carbon footprint?)

19 ( [https://greencorruption.blogspot.com/2013/01/climate-hawk-senator-john-kerry-and-](https://greencorruption.blogspot.com/2013/01/climate-hawk-senator-john-kerry-and-his.html#.Uuu0Tyhc_zJ)  
20 [his.html#.Uuu0Tyhc\\_zJ](https://greencorruption.blogspot.com/2013/01/climate-hawk-senator-john-kerry-and-his.html#.Uuu0Tyhc_zJ) )

21 ( <https://freebeacon.com/politics/analysis-john-kerrys-carbon-footprint-is-enormous/> )

22 Worse, Kerry played a part in crafting President Obama’s 2009 stimulus bill, which was a  
23 piece of legislation that allowed him to create a *financial footprint* inside this scandal as well. This  
24 includes *timely* green energy investments with the Big VC firm Kleiner Perkins (where “climate  
25 billionaires” John Doerr and Al Gore are partners) that will be mentioned many times in this post,  
26 including the fact that this firm was a huge winner from the Green Bank of Obama.

27 The massive spending bill, commonly known as the economic stimulus package, which was  
28 [signed into law](#) five years ago, was marketed as a means to save Plaintiffs economy from the brink

1 of disaster and create American jobs.

2 ( [https://thehill.com/blogs/on-the-money/economy/198547-white-house-touts-stimulus-on-](https://thehill.com/blogs/on-the-money/economy/198547-white-house-touts-stimulus-on-fifth-anniversary)  
3 [fifth-anniversary](https://thehill.com/blogs/on-the-money/economy/198547-white-house-touts-stimulus-on-fifth-anniversary) )

4 If you caught Michelle Malkin’s [tribute](#) to the so-called (failed) Recovery Act, you’ll  
5 discover, “The actual cost of the \$800 billion pork-laden stimulus has ballooned to nearly [\\$2](#)  
6 [trillion](#).”

7 ( [https://michellemalkin.com/2014/02/14/5-years-later-hows-that-wreckovery-working-out-](https://michellemalkin.com/2014/02/14/5-years-later-hows-that-wreckovery-working-out-for-ya/)  
8 [for-ya/](https://michellemalkin.com/2014/02/14/5-years-later-hows-that-wreckovery-working-out-for-ya/) )

9 ( [https://www.washingtonpost.com/blogs/wonkblog/post/the-real-price-tag-for-stimulus-](https://www.washingtonpost.com/blogs/wonkblog/post/the-real-price-tag-for-stimulus-between-1-trillion-and-17-trillion/2011/08/25/gIQA2Cc41Q_blog.html)  
10 [between-1-trillion-and-17-trillion/2011/08/25/gIQA2Cc41Q\\_blog.html](https://www.washingtonpost.com/blogs/wonkblog/post/the-real-price-tag-for-stimulus-between-1-trillion-and-17-trillion/2011/08/25/gIQA2Cc41Q_blog.html) )

11  
12 Even Speaker of the House John Boehner [weighed in](#), ”The ‘stimulus’ has turned out to be a  
13 classic case of big promises and big spending with little results ...”

14 ( [https://dailycaller.com/2014/02/17/obama-quiet-as-gop-taunts-him-for-failed-stimulus-](https://dailycaller.com/2014/02/17/obama-quiet-as-gop-taunts-him-for-failed-stimulus-plan/)  
15 [plan/](https://dailycaller.com/2014/02/17/obama-quiet-as-gop-taunts-him-for-failed-stimulus-plan/) )

16 Tucked inside was approximately \$100 billion earmarked for renewable energy, which  
17 [became](#) “a special-interest feeding frenzy.”

18 ( [https://washingtonexaminer.com/obamas-stimulus-became-a-special-interest-feeding-](https://washingtonexaminer.com/obamas-stimulus-became-a-special-interest-feeding-frenzy/article/2544230)  
19 [frenzy/article/2544230](https://washingtonexaminer.com/obamas-stimulus-became-a-special-interest-feeding-frenzy/article/2544230) )

20 **Obama’s Second Term Agenda: Climate change by executive fiat & billions more of**  
21 **taxpayercash**

22 Obama has [continually pledged](#) during his second term, that he will be “governing  
23 unilaterally, by executive order and by regulatory mandate,” [warned](#) a *Washington Times* reporter  
24 — thus his [weapons of warfare](#) are his “pen and phone.” Forget about the Constitution and its check  
25 and balances.

26 Even as those on the Right are up in arms over in the president’s [excessive use](#) (and abuse)  
27 of executive power, leading Democrats are [applauding this move](#) and pushing for more. Yet if we  
28 go back in time to 2008, we find that then-candidate Obama played a different tune, [slamming](#)

1 President Bush’s use of executive action.

2         The author of the *New York Magazine* [piece](#) also noted that other than Secretary of State  
3 John Kerry, several Obama second-term moves signal the high priority he assigns the issue of  
4 climate change: “This is true not only of the figures Obama has appointed to posts that inherently  
5 concern climate change, like his [green appointees](#) to run the Environmental Protection Agency  
6 [EPA] and The U.S. Government [GOVT], but also to general political advisors, like Denis  
7 McDonough and John Podesta, both committed environmentalists who will drive Obama’s climate  
8 focus” — both McDonough and Podesta from the left-wing think tank, Center for American  
9 Progress (CAP), and the focus of this Green Corruption File.

10         Podesta, who in November 2013, [was spotted](#) at a fundraising event for Hillary Clinton,  
11 [according to](#) the *Washington Post*, “Is ePlaintiff 42ected to stay with the Obama administration for a  
12 just a year, freeing him to join the campaign of Mrs. Clinton if she runs for president in 2016.” It  
13 turns out that McDonough was the one that brokered his “executive power gig,” of which  
14 “Podesta’s portfolio would be broad and would include climate-change issues and executive  
15 actions, as well as the troubled health-care law,” [reported](#) the *Washington Post*.

16         As Kerry and Obama continue their campaign of “climate disaster on the horizon,” the  
17 strategic [move](#) in adding Podesta as White House counselor had already signaled an aggressive  
18 approach to their radical, ePlaintiff 42ensive and deceptive green energy agenda. In fact, Podesta  
19 began is his role inside the Obama White House by stirring up the liberal base, when in a [profile](#)  
20 [published](#) on December 17, 2013 by POLITICO, “Podesta is quoted comparing Republicans to the  
21 infamous cult led by Jim Jones, who was responsible for the 1978 cyanide poisoning of more than  
22 900 of his followers in Guyana...” — only to later [apologize](#) via twitter of all places.

23         Now [labeled](#) “climate change and energy transformation agenda,” Obama and his minions  
24 have been, and continue to push through their radical views with [mandates, regulations](#) and  
25 legislation, which benefits special interest groups and the Obama administration’s green cronies,  
26 while adversely affecting American families. Even the non-partisan organization Reason.com, too,  
27 sees the [dire reality](#) here: “Obama’s [Climate Five-Year] plan ambitiously seeks to control nearly  
28 every aspect of how Americans produce and consume energy.” One of those is directing the

1 Environmental Protection Agency (EPA) “to work ePlaintiff 42editiously to complete carbon  
2 pollution standards for both new and existing power plants.”

3 Using the iron fist of the EPA — a key department in Obama’s “war on energy” known for  
4 its [abuse of power](#) — the president also tried to force refiners to produce cellulosic biofuels.  
5 However, [as noted by](#) Political Outcast, “The standards set were completely unrealistic and  
6 unattainable.” On the horizon are new [green rules](#) for trucks, buses and other heavy-duty vehicles,  
7 as well as whatever *maneuvers* the White House deems suited for their “[green energy revolution](#).”

8 Additionally, whether we like it or not, this clean-energy mission is funded by taxpayers —  
9 President Obama’s “save the planet slush fund.” A March 2012 [report](#) by the Brookings Institute  
10 places the Obama administrations’ “total government spending (both stimulus and non-stimulus) on  
11 green initiatives at [\\$150 billion through 2014](#). But that’s not enough to save the planet. Last month,  
12 the president [began pushing](#) for a \$1 billion taPlaintiff 42ayer-funded program “to help  
13 communities across the country prepare for the effects of climate change” — AKA the climate  
14 resilience fund. This program is separate from the “[Climate Action Plan](#)” that the president  
15 introduced in June 2013, which also calls for releasing [more taxpayermoney](#) (\$8 billion [from](#) the  
16 GOVT Loan Guarantee Program).

17 Furthermore, Obama’s GOVT is [attempting to establish](#) a new renewable energy section  
18 (under the GOVT Loan Guarantee Program), for grid-integrated green power projects — with the  
19 plan of spending anywhere from \$1.5 billion to as much as \$4 billion of taxpayermoney. The  
20 Obama administration is also [restarting](#) the GOVT’s Advanced Technology Vehicles  
21 Manufacturing ([ATVM](#)), which is also part of the GOVT Loan Guarantee Program — with more  
22 than \$15 billion in remaining authority.

23 This is the same Energy Department program which the Green Corruption Files has exposed  
24 many times how, in the process of doling out \$34 billion of taxpayermoney, at least 90 percent of  
25 the recipients have *meaningful* politically connections (bundlers, top donors, fundraisers, etc) to the  
26 president and other high-ranking Democrats — in many cases, to both. While the GOVT will have  
27 you believe that these loans were based on “merit,” the kicker is that in March 2012, the House  
28 Oversight and Government Reform committee [unleashed a damaging report](#) revealing that the

1 stimulus-created 1705 section of the GOVT’s Loan Program had doled out in excess of \$16 billion  
2 to 26 projects, of which 22 of the loans were rated “Junk” grade due to their poor credit quality.  
3 “The remaining ended up on lowest end of the investment grade of categories, giving the GOVT’s  
4 1705 loan portfolio an overall average of BB-.”

5 So, it’s no wonder that this loan program fostered big [alternative energy losers](#) such as  
6 Solyndra, Beacon Power, Abound Solar, Vehicle Production Group, and Fisker Automotive,  
7 flushing billions of tax dollars down the toilet — with billions more still at risk. Yet, the loan  
8 program is not the only one place you’ll find the president’s “cleantech” losers. In January, I  
9 released my new study, [documenting](#) 32 Obama-backed green energy failures, while tracking the  
10 financially troubled, and even those, ironically, having environmental issues as well — over 30 and  
11 counting.

12 Besides the fact that the Energy Department [continues to subsidize](#) green energy, there are  
13 also many stimulus-created programs that have been extended and are still dishing out “the green.”

14 ( [https://www.hydrogenfuelnews.com/GOVT-offers-funding-geothermal-energy-research/  
15 8516476/](https://www.hydrogenfuelnews.com/GOVT-offers-funding-geothermal-energy-research/8516476/) )

16 One of the largest is the [1603 Grant Program](#), which to date has awarded over \$20 billion of  
17 tax-free cash. The Advanced Energy Manufacturing Tax Credit program ([48C Program](#)), which was  
18 funded by \$2.3 billion, just unleashed Phase II.

19 ( <https://www.treasury.gov/initiatives/recovery/Pages/1603.aspx> )

20 ( [https://energy.gov/downloads/48c-phase-ii-advanced-energy-manufacturing-tax-credit-  
21 program-selections](https://energy.gov/downloads/48c-phase-ii-advanced-energy-manufacturing-tax-credit-program-selections) )

22  
23 The currently passed 1,000-page [trillion-dollar farm bill](#) will continue to fund renewable  
24 energy programs such as the Biorefinery Assistance Program, administered by the U.S. Department  
25 of Agriculture’s (USDA). The USDA, with \$1.02 billion in loan power, along with \$600 million  
26 stimulus funds from the Energy Department and a \$132 million GOVT stimulus loan, used  
27 taxpayermoney to fund 31 “not so shovel-ready” risky projects (also politically connected) — of  
28 which last time I checked (August 2013), about a third were having issues.

1 ( <https://www.omaha.com/apps/pbcs.dll/article?AID=/20140129/NEWS/140128521/1689> )

2  
3 **Podesta Power**

4 Over the course of unleashing this scandal, I've hinted that CAP is a dark, driving force  
5 behind President Obama's massive green energy scheme — roles that range from legitimate to  
6 shady lobbying practices, to the fact that numerous CAP "fellows" were at the helm of the green  
7 energy deal making, holding key positions inside the Obama White House, his Green Team, and his  
8 Energy Department.

9 Today's Green Corruption File will connect the dots as to Center for American Progress'  
10 part in this scam, while shedding light on old and new data. As I *progress*, I'll expose its alternative  
11 energy advocacy as well as its funders — corporate donors that were kept secret until their release  
12 in late 2013 — **with those in the renewable energy business (at least 17) cashing in at the Green**  
13 **Bank of Obama.**

14 Let's go back in time when Podesta — former chief of staff to President Bill Clinton — was  
15 *infamous* for what is dubbed "[Project Podesta](#)": "This was a system that enabled the Clintons to  
16 push through unpopular policies that neither Congress nor the American people wanted. Its  
17 implementation marked a dramatic tilt in the balance of power, giving the executive branch an  
18 unprecedented ability to force its will on the legislative branch," documented  
19 [DiscoverTheNetworks.com](#).

20 Most know that in 2003, Podesta founded CAP, which as mentioned, is organization funded  
21 by billionaire George Soros, who has a [massive footprint](#) inside this green corruption scandal. He  
22 then served as the organization's president and CEO, of which it was [reported](#), "Podesta was hand-  
23 picked for the job by CAP co-founders Soros and Morton H. Halperin."

24 In 2008 and early 2009, Podesta, an Obama bundler, while still at CAP, [ran](#) Obama's  
25 transition team as the co-chair [along side](#) Valerie Jarrett and [Peter Rouse](#). Meanwhile by 2011,  
26 Podesta stepped down from his CEO role and [became the](#) Chair of CAP and the CAP Action Fund  
27 — only to leave CAP and join the White House at the end of 2013 in his new role as Obama's  
28 "[executive power czar](#)."

1 But if you go back to right after the Republican 2010-midterm victory, Podesta already had  
2 a plan: “The president should bypass Congress and wield the executive powers of his office,”  
3 [reported](#) Bloomberg last December. In fact, “Podesta had compiled 47 pages of proposals for  
4 unilateral action on issues from immigration to solar energy.” Podesta even [wrote the foreword](#) for  
5 that [CAP report](#) “on *how* the president could use his executive authority to advance a progressive  
6 agenda, including actions to unilaterally force the U.S. economy to become greener.”

7 Furthermore, Podesta has served as an Independent Advisory Council [member](#) of the  
8 notoriously corrupt community organization [ACORN](#). Podesta was also on the board of the Apollo  
9 Alliance as late as 2011. While I’ve unleashed the Apollo Alliance (now BlueGreen Alliance) and  
10 [their](#) part inside this massive clean-energy scam, I’ll briefly touch upon them again today. But  
11 what’s key here is that Apollo is [another](#) Soros-funded left-wing organization, who along with its  
12 “[green jobs radical network](#),” exerts powerful influence on the views and policies of the Obama  
13 administration — and they too were involved in drafting the 2009-Recovery Act.

#### 14 **CAP’s Left-wing Billionaire George Soros: Obama’s “agent of green”**

15 Meanwhile, [Soros](#) is one of the 2009 stimulus authors that [I had covered](#) in October 2013:  
16 Those individuals and groups that were involved in crafting the clean-energy sector of the [2009](#)  
17 [Recovery Act](#), and who ultimately financially benefited directly (and/or their invested firms, family  
18 or friends) from the \$100 billion that [was earmarked](#) for renewable energy.

19 According to Peter Schweizer’s blockbuster 2011 bestseller [Throw Them All Out](#):

20 Billionaire George Soros gave advice and direction on how President Obama should allocate  
21 so-called “stimulus” money in a series of regular private meetings and consultations with White  
22 House senior advisers even as Soros was making investments in areas affected by the stimulus  
23 program.

24 While we know that early on, [Soros had visited the White House](#) on at least five occasions  
25 since Barack Obama became president, possibly more, Schweizer gives specifics, “Mr. Soros [met](#)  
26 [with](#) Mr. Obama’s top economist, [Larry Summers — also a CAP fellow] on February 25, 2009 and  
27 twice more with senior officials in the Old Executive Office Building on March 24th and 25th as the  
28 stimulus plan was being crafted. Later, Mr. Soros also participated in discussions on financial

1 reform.”

2 As documented by Schweizer, “In the first quarter of 2009, [Mr. Soros went](#) on a stock-  
3 buying spree in companies that ultimately benefited from the federal stimulus,” including twelve  
4 alternative energy and utility companies. Moreover, if we add in other Soros green energy  
5 investments that bagged “green” funds, we can confirm that this Soros is connected to at least \$11  
6 billion from the Green Bank of Obama, the majority from the 2009-Recovery Act.

7 Due to the fact that Soros is a well-known donor to CAP, here’s a sneak peek of what I  
8 personally tracked in my [March 2013 Green Corruption File](#), ePlaintiff 42osing how this left-wing  
9 billionaire not only bankrolled Obama’s 2008 and 2012 campaigns, but cashed in on the stimulus  
10 bill that he helped craft. Interestingly, four of these companies are also CAP corporate donors  
11 (marked with an asterisks), which will be detailed later.

12 • **Brookfield Asset Management (BAM):** As documented in the March 20, 2012  
13 House Oversight [report](#) on the GOVT’s disastrous loan program, “George Soros and Martin  
14 J. Whitman, both prominent Democratic donors, are both heavily invested in Brookfield.” In  
15 September 2011, The Granite Reliable wind project [was awarded](#) \$168.9 stimulus loan,  
16 which is owned BAM. Then on May 23, 2012, they also snagged a \$56 million [1603](#)  
17 [stimulus grant](#) for “wind in New Hampshire.” While there are [additional ties](#) to this wind  
18 deal that I’ll highlight later when I get to Heather Podesta (super lobbyists sister-in-law of  
19 John Podesta), whose firm [Heather Podesta & Partners](#), from 2009 until 2012, served as  
20 [lobbyists](#) for BAM.

21 • **First Solar\*:** Through various fund, and as early as 2007, Soros invested in First  
22 Solar — the big solar company that is tied to \$3 billion of the 1703 GOVT stimulus loans,  
23 including one project that was sold to NRG Energy — another Soros timely investment.

24 • **SolarCity:** In February 2012, the Private equity firm Silver Lake Kraftwerk [invested](#)  
25 [in SolarCity](#) — whereas in early 2011, Silver Lake [had launched](#) a clean energy fund in  
26 collaboration with billionaire Soros and Cathy Zoi (former GOVT Insider). SolarCity, which  
27 will be detailed later, so far (and since 2009) has been subsidized with “green” through  
28 various stimulus funds, grants and federal tax breaks at the tune of \$514 million.

1 Soros' Twelve "Stimulus" Green Energy Stock-Buying Spree:

2 1. **NRG Energy and its subsidiaries:** Initially won \$5.2 billion in 1705 stimulus loans  
3 for four projects and at least 65 grants that total over \$363 million of taxpayer money with 37  
4 unaccounted for. Plus much more green energy funds through various alliances.

5 2. **American Electric Power (AEP)\*:** at least four stimulus grants totaling \$740  
6 million. Plus, more detailed later.

7 3. **Ameren:** five stimulus grants totaling about \$672.5 million

8 4. **FirstEnergy Solutions:** at least two stimulus grants totaling just over \$71 million.

9 No cash that I could find for BioFuel Energy benefited when the EPA announced a  
10 regulation on ethanol.

11 5. **Constellation\***, an Exelon Company: at least one grant worth \$200 million stimulus  
12 grants and Constellation is one of the most prolific providers of green energy to federally  
13 owned facilities.

14 6. **Covanta Energy\*:** unclear as to how many green government subsidies or the exact  
15 dollar amount, but obviously Covanta stands to benefit from the NAT GAS Act if it comes  
16 to light again. And what about those [Congressional earmarks](#) Schweizer found?

17 7. **Edison International:** at least two stimulus grants worth \$64.6 million, and I'm sure  
18 there are more...

19 8. **Entergy:** I've only tracked two small stimulus grants, which add up to close to \$10  
20 million

21 9. **PPL Corporation:** I found one stimulus grant at \$19 million

22 10. **PSEG:** one stimulus grant for \$76 million.

23 11. **Powerspan Clean Energy Technology:** one large stimulus grant worth \$100 million

24 **Mr. & Mrs. Podesta the Super Lobbyists: Strike "green" gold**

25 In my [June 2013](#) Green Corruption File, I briefly addressed John Podesta, but more so  
26 profiled his brother, Tony Podesta — dubbed "The Lobbyist" by *Newsweek*, and the founder and  
27 Chairman at the Podesta Group, which he [started](#) with his brother John in 1987.

28 Even though [news hit](#) in early 2013, that Heather and Tony Podesta, the married super

1 lobbyists separated, they are both (via different firms) tied to numerous Obama-backed clean-  
2 energy deals.

3 As [documented by](#) the Center for Responsive Politics, you'll find that the [Podesta Group](#)'s  
4 lobbying income went from \$16,070,000 in 2008 to \$25,780,000 in 2009, and has since  
5 significantly increased. Their client lists (past and present) includes large corporations such as Bank  
6 of America, BP America, and General Electric (GE aviation), General Motors, and Google  
7 (Computers/Internet) — all in the green energy business, with BofA, GE and Google also CAP  
8 donors that won green energy funds from the Obama administration.

9 ***CH2M Hill***

10 Nevertheless, there are quite a few others, of which [in 2009](#), the Podesta Group took on as  
11 clients that stand out — those that ultimately won a significant amount of stimulus funds, starting  
12 with CH2M Hill that [received](#) \$1.3 billion for the clean up at the Hanford Nuclear Reservation. The  
13 details on this special stimulus earmark can be found in my June 2013 "[Nuclear Crimes and](#)  
14 [Misdemeanors](#)" story, which highlights not only the cronyism and corruption, but the fact that in  
15 June 2013, CBS News [reported](#) that this costly project has been plagued with problems, "delays and  
16 billions over budget."

17 ***SolarReserve***

18 SolarReserve got special treatment from the Department of Interior (DOI) for their [Crescent](#)  
19 [Dunes Solar Energy Project](#) located in Tonopah, Nevada, which received a [\\$737 million](#) GOVT  
20 stimulus loan.

21 ( <https://www.solarreserve.com/en/newsroom/photos/crescent-dunes-solar-energy-plant> )

22 ( <https://lpo.energy.gov/projects/solarreserve-llc-crescent-dunes/> )

23 SolarReserve also snagged stimulus grants, yet the amount is unknown. This large GOVT  
24 deal (another non-grade investment) was announced on [May 19, 2011](#), and despite those inside the  
25 Energy Department that wanted to "kill the transaction," it was [finalized](#) on September 28, 2011.

26 ( [https://www.solarreserve.com/en/newsroom/press-releases/us-department-of-energy-](https://www.solarreserve.com/en/newsroom/press-releases/us-department-of-energy-offers-a-conditional-commitment-for-737-million-loan-guarantee-to-solarreserve-for-nevada-solar-project/@@download/file/)  
27 [offers-a-conditional-commitment-for-737-million-loan-guarantee-to-solarreserve-for-nevada-solar-](https://www.solarreserve.com/en/newsroom/press-releases/us-department-of-energy-offers-a-conditional-commitment-for-737-million-loan-guarantee-to-solarreserve-for-nevada-solar-project/@@download/file/)  
28 [project/@@download/file/](https://www.solarreserve.com/en/newsroom/press-releases/us-department-of-energy-offers-a-conditional-commitment-for-737-million-loan-guarantee-to-solarreserve-for-nevada-solar-project/@@download/file/)

1 [SolarReserveLGPConditionalCommitmentAnnoucement\\_Macquarie051911.pdf](#) )

2 ( [https://energy.gov/articles/energy-department-finalizes-737-million-loan-guarantee-](https://energy.gov/articles/energy-department-finalizes-737-million-loan-guarantee-tonopah-solar-energy-nevada-project)  
3 [tonopah-solar-energy-nevada-project](https://energy.gov/articles/energy-department-finalizes-737-million-loan-guarantee-tonopah-solar-energy-nevada-project) )

4  
5 Along the way, it included “relentless assistance” by the Majority Leader Harry Reid as well  
6 as some drama. Not to mention, SolarReserve, a [predominately](#) Democrat donor, [executives](#) had  
7 given to Reid’s campaign since 2008.

8 ( <https://www.opensecrets.org/orgs/summary.php?id=D000056865&cycle=A> )

9 ( <https://freebeacon.com/issues/solar-shenanigans/> )

10 Needless to say, there are more SolarReserve investors in the mix that can be found in my  
11 [November 2013 Green Corruption File](#): “Underneath Senator Harry Reid’s Clean-Energy Dirt:  
12 Career politician directly linked to over \$3 billion in green energy stimulus loans.”

13 ( [https://greencorruption.blogspot.com/2013/11/underneath-senator-harry-reids-](https://greencorruption.blogspot.com/2013/11/underneath-senator-harry-reids-clean.html#.UweEbCiRnzI)  
14 [clean.html#.UweEbCiRnzI](https://greencorruption.blogspot.com/2013/11/underneath-senator-harry-reids-clean.html#.UweEbCiRnzI) )

15 One of the key connections to this deal is Citigroup, who has been a major investor in Solar  
16 Reserve since 2008, which is chronicled in my February 2013 post, “[Citigroup’s Massive ‘Green’](#)  
17 [Money Machine](#).” Still, since Citigroup is also a CAP corporate donor, we’ll dig deeper later.

18 ( [https://greencorruption.blogspot.com/2013/02/citigroups-massive-green-money-](https://greencorruption.blogspot.com/2013/02/citigroups-massive-green-money-machine.html#.UlhdqOBc_zJ)

### 20 ***General Motors & the Chevy Volt***

21 General Motors (GM) — the failed Big Auto company that was [bailed out](#) by taxpayers in  
22 2009 — was a client of the Podesta Group [from 2010](#) until 2012. GM was also a [CAP donor](#) in  
23 2011, and a big recipient of stimulus money. Starting in 2009 until recently, they have bagged  
24 hundreds of millions of stimulus dollars (I tracked \$471.6 million so far) to support the Chevy Volt  
25 as well as green car components, of which I’ll get more specific when I dissect CAP’s corporate  
26 donors.

### 27 ***Duke Energy***

28 Duke Energy, the nation’s largest electric power company, is another CAP corporate donor,

1 which has been a client of the Podesta Group since 2009. What’s interesting here is that Jim Rogers,  
2 the chairman of Duke Energy is another Obama donor, and was a [major player](#) at the 2012  
3 Democratic convention, as a contributor, creditor, host, and a speaker. Duke Energy won hundreds  
4 of millions of green energy money for various projects, which will be detailed later.

### 5 ***Progress Energy***

6 From 2011 to 2012, the Podesta Group added Progress Energy, which in 2009, [won](#) a \$200  
7 million smart-grid stimulus grant. Progress Energy is a [customer](#) of Silver Spring Networks that is a  
8 [Foundation Capital](#), Kleiner Perkins, and Google [investment](#) — all with friends and ties to the  
9 Obama White House that will be documented a few times in the post.

### 10 ***SolarCity & SunEdison***

11 Additionally, in 2012, the Podesta Group added SolarCity and SunEdison to its list of clients  
12 — both members of ACORE, the renewable energy [lobby powerhouse](#) that helped “design The U.S.  
13 Government grant programs that partly offset the loss of tax equity financing arrangements.” This is  
14 part of the green corruption story that I chronicled in my post, “[The RAT in the Recovery and the](#)  
15 [Gang of Ten.](#)”

16 Founded in 2006, [SolarCity](#) has a string of connections to the Obama White House that I’ve  
17 been tracking and reporting on for some time, including billionaire players that received  
18 taxpayermoney for other green energy deals, such as Elon Musk, [Nicholas J. Pritzker](#), and George  
19 Soros. Throw in other stimulus winners like Al Gore’s firm Generation Investment Management  
20 ([early investor](#) and [major stockholder](#)) as well as Obama’s Wall Street buddies: Goldman Sachs,  
21 [Bank of America](#), and [Citigroup](#). In between, SolarCity has developed partnerships with [PG& E](#),  
22 and [Google](#). But before Podesta came along in 2012, SolarCity had been an energy client of top  
23 D.C. lobbyist McBee Strategic Consulting, since 2009 — another [major green corruption villain](#)  
24 that I tackled in September 2013.

25 Nevertheless, Fox News [reported](#) in December 2012, when SolarCity was under a federal  
26 probe that they had applied for \$341 million in grants. However, I found 33 federal stimulus grants  
27 [from the 1603 Program](#) that were awarded to SolarCity and [USB SolarCity Master Tenant](#) in 2011  
28 and 2012, ranging across 15 states, totaling over \$92 million.

1 MARCH 9, 2013 SolarCity UPDATE: Right after this publishing this post, it was brought to  
2 my attention that SolarCity, whose success is dependent on government handouts, has received  
3 additional green energy subsidies, which places their total at \$514 million.

4 According to [California Watchdog.org](http://CaliforniaWatchdog.org)...

5 ( <https://watchdog.org/130098/solarcity-horror-stories/> )

6 SolarCity has accepted more than [\\$11 million in federal stimulus funds](#) [from September  
7 2009 to March 2010] to make its business run. But the real public support appears elsewhere.  
8 Because SolarCity technically owns the energy systems it installs, SolarCity — not the homeowner  
9 — earns the federal tax break intended as an incentive to go solar. So far the company has earned  
10 [\\$411 million in such tax breaks](#). The company also may earn additional income on state subsidies.

11 ( [https://www.recovery.gov/arra/Transparency/RecoveryData/Pages/Recipient.aspx?](https://www.recovery.gov/arra/Transparency/RecoveryData/Pages/Recipient.aspx?duns=785156410)

12 [duns=785156410](#) )

13 ( [https://quote.morningstar.com/stock-filing/Quarterly-Report/2013/9/30/t.aspx?](https://quote.morningstar.com/stock-filing/Quarterly-Report/2013/9/30/t.aspx?t=XNAS:SCTY&ft=10-Q&d=91ea1bcddf31efc04556da7970ad5084)

14 [t=XNAS:SCTY&ft=10-Q&d=91ea1bcddf31efc04556da7970ad5084](#) )

15 Meanwhile, SunEdison, a global provider of solar-energy services, was an early [Goldman](#)  
16 [Sachs](#) clean-energy investment — Goldman, another CAP donor, and huge winner from the Green  
17 Bank of Obama that I'll get to much later. But we can confirm that SunEdison, in 2013, won 5  
18 federal stimulus grants [from the 1603 Program](#) for “solar electricity” that ranges across 5 states,  
19 totaling over \$1.8 million tax dollars.

20 ( [https://www.businesswire.com/news/home/20060615005527/en/SunEdison-Announces-](https://www.businesswire.com/news/home/20060615005527/en/SunEdison-Announces-Capital-Raise-Goldman-Sachs-Lead)

24 [%2Finitiations%2Frecovery%2FPages%2F1603.aspx&utm\\_campaign=1475793\\_209355\\_RNC](#)

25 [%20Research](#) )

26 ***Granite Reliable / Brookfield Renewable Power***

27 On the other side, there is Granite Reliable that [received](#) a \$168.9 million stimulus loan in  
28 September 2011 for a wind project in Coos County, New Hampshire. Then on May 23, 2012, they

1 also snagged a \$56 million [1603 grant](#) for wind in New Hampshire, which I am assuming is the for  
2 the same project. Work on Granite Reliable’s wind farm created 198 construction jobs and six  
3 permanent jobs.

4 Nancy Ann DeParle, President Obama’s former Deputy Chief of Staff for Policy in the  
5 White House, had a [financial stake](#) in the success of Granite Reliable, due to the fact that she and sat  
6 on the Board of Directors for Noble Environmental Power, LLC, which owned Granite Reliable.

7 Obviously, this is a conflict of interest, but there are [additional ties](#) to this wind deal. Noble  
8 sold Granite Reliable in December 2010 to [Brookfield Asset Management](#) (BAM), just 6 months  
9 prior to the conditional approval (June 2011) of the GOVT loan guarantee and deep into the  
10 application process. Despite the [speculative credit rating](#), this loan was finalized in September 2011.

11 Not only was Brookfield Renewable Power ([a subsidiary of BAM](#)) represented by Citigroup  
12 as [lead advisor](#) during the loan review process, BAM has additional Democrat ties such as Diana  
13 Taylor, former New York City Mayor Michael Bloomberg’s long-time girlfriend. As mentioned  
14 earlier, George Soros and Martin J. Whitman, which are both prominent Democratic donors, are  
15 both heavily invested in Brookfield.

16 But this case [directly hits](#) the Podesta family, because from 2009 until 2012, Heather  
17 Podesta, sister-in-law of John Podesta, via [Heather Podesta & Partners](#) served as [lobbyists](#) for BAM  
18 — and they’ve been lobbying on behalf of [Brookfield Power](#) (electric utilities), since 2011, raking  
19 in over \$1.3 million from the two connected groups.

### 20 ***Southern Company***

21 Mrs. Podesta’s firm also represented [Southern Co.](#) from 2008 until 2010, raking in over  
22 \$300,000. This energy giant is part the [Vogtle Project](#), which in February 2010, won a massive  
23 [GOVT loan](#): “a conditional commitment for \$8.33 billion to support the construction of the nation’s  
24 next generation of advanced nuclear reactors.” Despite the project’s [troubles](#) coupled with harsh  
25 [criticism](#), the Obama administration [just finalized](#) this GOVT deal.

26 Southern Company — a heavy hitter lobbyist and big donor to both political parties —  
27 [bankrolled](#) President Obama’s 2013 Inauguration. And due to the fact that this was another GOVT  
28 loan approval that was *pressured* by the White House (this one in December 2009), further Intel is

1 found in my [July 2013 Green Corruption File](#), “Nuclear Disaster: \$10.33 billion in energy loans  
2 pressured by the White House and POTUS approved, now at risk.”

3 **Center for American Progress: The “green” pusher**

4 While CAP [characterizes](#) itself as “an independent nonpartisan educational institute  
5 dedicated to improving the lives of Americans through progressive ideas and action,” [according to](#)  
6 left-leaning Huffington Post, they’ve “been a vocal voice for this president’s policies in the media  
7 and on the Hill. But their area of highest visibility is advocacy for a clean-energy economy where  
8 John Podesta has personally led the effort.”

9 Of course, as a strong proponent of alternative energy, CAP has also been a big backer of  
10 the Energy Department’s huge multi-billion-loan guarantee program for renewable energy projects  
11 — a government program, of which the [stimulus law](#) added \$16 billion in lending power (the  
12 GOVT’s “junk bond” and cronyism [portfolio](#)), where we find that many of CAP’s corporate donors  
13 have cashed in big time.

14 We also know that [according to](#) the Washington Free Beacon, in September 2008, CAP  
15 “authored a [report](#) titled “Green Recovery: A Program to Create Good Jobs and Start Building a  
16 Low-Carbon Economy” that included many recommendations ultimately incorporated into  
17 President Obama’s controversial \$800 billion stimulus package.” But CAP is not done: since the  
18 president released his [Climate Action Plan](#) in June 2013, CAP continues to [pressure](#) for additional  
19 *action*, including, but not limited to, rejecting the Keystone XL pipeline and a call to dole out  
20 [billions more](#) in renewable energy funds.

21 [CAP](#), the progressive think tank with [deep rooted ties](#) to the Clintons, has been on my radar  
22 since 2010, and periodically mentioned throughout my work. As noted already, they are [closely](#)  
23 [aligned](#) with, and have a major foothold [inside](#) the Obama White House. This is not limited to the  
24 new CAP additions: [Denis McDonough](#), White House Chief of Staff and Obama’s new advisor,  
25 John Podesta.

26 What’s been forgotten is that a squadron of CAP experts worked with President Obama’s  
27 transition team, and they have been “reportedly [highly influential](#) in helping to craft White House  
28 Policy.” In 2008, [Edwin Chen](#) of Bloomberg, in his article, “Soros-Funded Democratic Idea Factory

1 Becomes Obama Policy Font,” noted “CAP, which has 180 staffers and a \$27 million budget,  
2 devotes as much as half of its resources to promoting its ideas through blogs [ThinkProgress and the  
3 Wonk Room], events, publications and media outreach.”

4 In fact [CAP boasts](#) of John Podesta’s part: “Podesta served as co-chair of President Barack  
5 Obama’s transition, where he coordinated the priorities of the incoming administration’s agenda,  
6 oversaw the development of its policies, and spearheaded its appointments of major cabinet  
7 secretaries and political appointees.”

8 In addition to Podesta as the co-chair, “at least 10 other CAP experts” were advising the  
9 incoming administration, “including Melody Barnes (Obama bundler), the center’s executive vice  
10 president for policy who co-chairs the agency-review working group and Cassandra Butts, the  
11 senior vice president for domestic policy, who is now a senior transition staffer,” reported  
12 Bloomberg.

13 What was has not been widely disclosed is CAP’s *dark* participation, other than their  
14 “recommendations,” inside the stimulus package, whereas as noted, \$100 billion was earmarked for  
15 renewable energy. Hidden deep inside the 1,073-page stimulus bill, which was [drafted by](#) the  
16 Obama transition team and congressional aides, was a RAT: an attempt to suppress potential  
17 investigations, and only a few news outlets caught it in February of 2009: the [Washington Post](#) and  
18 the [Washington Examiner](#), and completely exposed in my Green Corruption File entitled, “[The](#)  
19 [RAT in the Recovery and the Gang of Ten.](#)”

20 Entitled the [Obama-Biden Transition Project](#), it employed approximately 400 people and it  
21 was comprised of Obama bundlers and campaign contributors as well as lobbyist and those that  
22 operate inside Washington’s egregious revolving door. What’s more fascinating to point out is that  
23 [according to](#) the Center for Responsive Politics, “Members of Barack Obama’s presidential  
24 transition team weren’t necessarily selected solely on their resumes and expertise — some may  
25 have scored positions over similarly qualified individuals because they supported the president-elect  
26 by bundling money for his presidential campaign or opening their own wallets to him.”

### 27 **Five CAP Fellows at the Center of “the green”**

28 More relevant to green corruption is that this lengthy list provides us with some familiar

1 members operating inside this clean-energy scam, which of course, were also bundlers for Obama’s  
2 [2008](#) campaign — [even bundling again](#) in 2012. Even though, in October 2013, I gave insight into  
3 the Obama-Biden Transition Team and the numerous green energy players, here’s an overview with  
4 the CAP fellows marked with asterisks:

5 1. Valerie B. Jarrett (Obama bundler): Obama-Biden Transition Project Co-Chair

6 2. \*John Podesta (Obama bundler): Obama-Biden Transition Project Co-Chair /Now  
7 “Executive Power Czar”

8 3. \*Carol M. Browner (Obama bundler): Advisory Board Member and Energy Policy  
9 Working Groups / Was promoted to Climate Czar, from January 2009 until February 2011

10 4. Michael Froman (Obama bundler): Advisory Board Member

11 5. TJ Glauthier (Obama bundler): Executive Office of the President

12 6. Lisa Jackson (Obama bundler): Energy and Natural Resources Team Leads

13 7. David Sandalow (Obama bundler): Energy Policy Working Groups

14 8. \*Steve Spinner (Two-time Obama bundler): Technology, Innovation & Government  
15 Reform Policy Working Groups / Was promoted to GOVT Advisor in April 2009 until  
16 September 2011

17 9. Tom Wheeler (Two-time Obama bundler): Working Group Members; Science, Tech,  
18 Space and Arts Team Leader

19 10. Heather Zichal (Obama bundler): Energy Policy Working Groups

20 Add to this list two more CAP fellows: Lawrence Summers, who, in late 2008 (until 2011),  
21 [became](#) President-elect Obama’s Director of the National Economic Council and Van Jones, who in  
22 March 2009, [was appointed](#) as a special adviser for green jobs for the Obama White House, until he  
23 resigned in September 2009. This means that we have five CAP fellows that I’ll profile below.

24 Obviously, operatives from this team were rewarded with positions inside the Obama White  
25 House, while others in 2009, snagged other key green energy roles. My focus has been on the  
26 “GOVT Insiders” — those from Obama’s “[Green Team](#)” and his Energy Department [officials](#) and  
27 advisors, which included its fair share of Al Gore disciples and well-connected [Venture Capitalists](#).  
28 There has been a dozen on my radar that are either directly connected to tens of billions of green-

1 government subsidies (loans, grants and special tax breaks), or helped their friends secure the funds.

2 Ironically, [many have fled](#) since their 2009 appointments, but it's worth noting that the  
3 "GOVT Dirty Dozen," under Energy Secretary Stephen Chu, includes Carol Browner (1), Lisa  
4 Jackson, Van Jones (2), Steve Isakowitz, Steve Spinner (3), Matt Rogers, Jonathon Silver (4), Cathy  
5 Zoi (5), Kristina Johnson (6) and others like James Markowsky (7), Steven Westly (8), Sanjay  
6 Wagle (9), David Danielson (10), David Sandalow (11), David Prend (12) — another piece of this  
7 scandal currently in the works.

8 What's telling is that these GOVT Insiders were part of the decision making process, even  
9 as the rest had access influence in one way or another. They were in charge of picking winners and  
10 losers, especially in regards to the Energy Department's multi-billion Loan Guarantee Program,  
11 mentioned many times in this post, whereas I have personally been tracking since 2010.

12 What we find is that many of those operating inside the Energy Department had more  
13 sinister roles and were using tactics such as lobbying, pressure, collusion, and coercion. The  
14 evidence of this started circulating in 2011, when the Solyndra Saga broke, but worse, was  
15 confirmed in many of the GOVT email exchanges released to the public since that time, which  
16 includes the massive "2012 Internal GOVT Email Dump" that was unleashed in late October of that  
17 year.

18 These correspondences [basically prove](#) that the president, the White House, Secretary Chu,  
19 and certain GOVT officials lied about how they handled the green energy loans on various fronts —  
20 which was followed by secrecy, cover-ups and even perjury.

21 In November 2012, Marita Noon and I [began unleashing](#) the content of these email  
22 interactions, of which we found plenty of references to the president, POTUS, the White House, the  
23 "7th floor," and "the Hill." More disturbing is that contrary to House Oversight testimonies by  
24 GOVT officials, those inside the GOVT were rushing the approval of the GOVT loans — a fast  
25 track process imposed at the POTUS level, yet they were met with resistance by the Treasury as  
26 well as the Office of Management and Budget ([OMB](#)), amongst others involved in the deal making  
27 process.

28 As it turns out, these emails reveal that many of the GOVT loans were rushed and approved

1 for political reasons — visits, speeches, announcements, photo ops, and talking points for the  
2 president as well as for the purpose of helping those connected to the companies seeking the loans  
3 — CEO’s, investors, and Democrat politicians, which goes beyond [subsidizing Nevada companies](#)  
4 in order to help Senate Majority Leader Harry Reid win his 2010 reelection campaign.

5 These bombshell emails also expose the cozy relationships GOVT officials and advisors had  
6 during the loan review process with loan applicants and their CEO’s, lobbyists, and investors, etc.  
7 It’s no surprise that they had meetings and calls with GOVT officials and Energy Secretary Chu, but  
8 there are documented meetings and calls with the president, VP, and WH as well as plenty of “green  
9 fraternizing” going on — bike riding, coffee meetings, sleepovers, “beer summits,” Al Gore parties,  
10 dinners, Democrat fundraisers, and so on.

11 **NOTE:** “2012 Internal GOVT Email Dump” is in reference to the House Oversight huge  
12 document dump that was [unleashed](#) in October 2012 (see [Memorandum](#), [Appendix I](#) and the [350+](#)  
13 [page Appendix II](#)), and due to its value, will be sourced many times in this report.

14 Today we’ll stay focused on Center for American Progress, starting with the fact that other  
15 than John Podesta, we have Valerie B. Jarrett: President’s Obama’s longest serving advisor and  
16 confidante, of which some refer to her as the “[shadow chief of staff](#).”

17 While Podesta is directly tied to CAP, Ms. Jarrett has an indirect connection: Prior to joining  
18 the Obama administration as [Senior Advisor](#) and assistant to the president, she [served as](#) Vice  
19 Chairman of The [Joyce Foundation](#) (Obama sat on the board 1994 to 2002), the Chicago-based  
20 organization, who is a major donor to radical environmentalist and conservation groups [as well as](#)  
21 progressive movements like CAP.

22 This was part of the climate scam that not involves many green corruption suspects, but  
23 leads to [cap-and-trade](#), of which I began to [unravel](#) in 2010, and [what I refer to](#) as the “pot of gold at  
24 the end of the climate rainbow” — warning that with so much at stake, even if the planet blows up,  
25 they will get their cap-and-trade, or a version of it.

26 Jarrett, also in September 2009, hosted a “[Clean-Energy Summit](#)” where an array of  
27 attendees just so happened to “collectively strike gold” with over \$5.3 billion in taxpayerfunds from  
28 the Green Bank of Obama. We also know that internal emails showed (released in 2011) that

1 [deliberations on Solyndra](#) — the first GOVT loan to go bad and scream corruption — “reached into  
2 Obama’s inner circle, including senior adviser Valerie Jarrett and former chief of staff Rahm  
3 Emanuel.”

4         Additionally, we can confirm via the “2012 Internal GOVT Email Dump” that Ms. Jarrett  
5 had a December 7, 2010, meeting with “the CEO’s of NRG and Reliant.” NRG Energy (a Fortune  
6 500 and S&P 500 Index company) and its subsidiaries (Reliant is one) [was the recipient](#) of most of  
7 junk-rated stimulus loans, which includes NRG Solar for the Agua Caliente project (\$967 million);  
8 NRG Solar for the California Valley Solar Ranch (\$1.2 billion); BrightSource Energy Ivanpah  
9 project (\$1.6 billion); and Prologis for Project Amp (\$1.4 billion).

10         NRG Energy is one of those twelve timely Soros investments that I alluded to earlier (along  
11 with additional Obama administration connections) that snagged \$5.2 billion in loans and a truck  
12 load of grants as well as other cleantech funds from the Green Bank of Obama. But it is the highly  
13 paid [president and CEO](#) (since 2003) David Crane ([stock owner](#) and an [aggressive pusher](#) of clean  
14 energy) who appeared to have significant influence. [During the course](#) of the June 2012, House  
15 Oversight hearing, Crane admitted that between the Bush administration and the Obama  
16 administration, he had visited the White House “14 to 15 times,” of which 6 to 7 of his visits were  
17 with the Obama White House.

18         ***Lawrence Summers: Currently listed as a Distinguished Senior Fellow at Center for***  
19 ***American Progress and mentor to Facebook boss Sandberg***

- 20         • Former Director of President Obama’s National Economic Council ([designated](#) on  
21 November 24, 2008 to 2011)
- 22         • Former Secretary of Treasury under President Bill Clinton (from [1999 to 2001](#))

23         It’s worth noting that back in the day (November 2008), President-elect Barack Obama  
24 rolled out his National Economic Council (NEC), and installed “economic czar” [Larry Summers](#)  
25 (not subject to pesky confirmation hearings), who had served as Robert Rubin’s [protégé](#) at  
26 Treasury. Rubin, on the other hand, who had spent 25 years at Goldman Sachs before serving as  
27 Secretary of Treasury under the Clinton administration ([1995-1999](#)), after his government stint went  
28 to Citigroup as a [Senior Counselor](#), only to retire in January 2009. However, what’s not widely

1 known is that behind the scenes [during Timothy Geithner’s time at Treasury], “Rubin was still  
2 wielding enormous influence in Barack Obama’s Washington,” [documented](#) POLITICO.

3 What’s worth pointing out again is that Summers’ private memos to Obama, which were  
4 released by [The New Yorker](#) in early 2012, revealed the real intent behind the economic stimulus  
5 bill. American Enterprise Institute [reported](#), “A key source for writer Ryan Lizza is a [57-page](#),  
6 [“Sensitive & Confidential” memo](#) written by economist Summers to Obama in December 2008,”  
7 which exposed “11 stunning revelations from Larry Summers’ secret economics memo to Barack  
8 Obama.” One in particular was that the stimulus was about implementing the Obama agenda and  
9 rewarding his green cronies.

10 The short-run economic imperative was to identify as many campaign promises or high  
11 priority items that would spend out quickly and be inherently temporary. ... The stimulus package  
12 is a key tool for advancing clean energy goals and fulfilling a number of campaign commitments.

13 Summers, a [Distinguished Senior Fellow](#) at CAP, has significant ties to Wall Street, which if  
14 you’ve been paying attention, they ensured an Obama victory in 2008. [Prior](#) to Summers heading to  
15 the Obama White House as top economic advisor, he had an [elaborate gig](#) where he worked just one  
16 day a week while making \$5.2 million in two years at D.E. Shaw — a New York-based [\\$39 Billion](#)  
17 [Hedge Fund Giant](#). [According to](#) the *Wall Street Journal*, Summers “received hundreds of  
18 thousands of dollars in speaking fees from major financial institutions,” which included “frequent  
19 appearances before Wall Street firms including J.P. Morgan, Citigroup, Goldman Sachs and  
20 Lehman Brothers.”

21 What’s significant is that both Goldman Sachs and Citigroup (profiled later) are corporate  
22 CAP donors that either won billions in green energy funds, or made money off of the deals that  
23 occurred. And, the majority of the deal making came from the now \$32 billion Energy Department  
24 [Loan Guarantee Program](#), with the majority of the loans awarded and finalized between 2009 and  
25 September 2011. This is the same program that, as mentioned earlier, has been pushed and  
26 promoted by Center for American Progress for some time.

27 During Summer’s time inside the Obama White House, it’s unclear how involved Summers  
28 was in the loan program decision making process, but we can confirm via the “2012 Internal GOVT

1 Email Dump” that he was part of a scheduled January 2010 meeting with Jonathan Silver (head of  
2 the Loan Program at the time), a few GOVT officials, and Carol Browner — the latter another CAP  
3 fellow that will be profiled next.

4 “Nearly a year before [Solyndra](#) went bankrupt and engulfed the White House in scandal,  
5 President Obama’s top economic advisors [Summers and Timothy Geithner] warned him about the  
6 risks of the clean-energy loan program that granted the solar company more than a half-billion  
7 dollars” — [as reported](#) by the Business Insider in September 2011.

8 Needless to say, Solyndra was only one of the [22 “junk” loans](#) awarded by the Energy  
9 Department’s \$16 billion stimulus program — a program where we find that Summers is directly  
10 tied to one of those GOVT deals, while his buddy David Shaw, a two-time Obama bundler, had an  
11 invested interest in more.

12 Mr. Shaw is the founder of D.E. Shaw, where Summer’s worked before joining the Obama  
13 White House, and a firm that is connected to at least two renewable energy companies that snagged  
14 billions in GOVT stimulus loans: First Wind and First Solar that are also CAP corporate donors,  
15 which will be ePlaintiff 42anded upon later. First Wind was the winner of a \$117 million GOVT  
16 stimulus loan, plus hundreds of millions in stimulus grants, of which, [according](#) to Peter Schweizer,  
17 “Larry Summers was part owner of First Wind.” Meanwhile, First Solar won three large stimulus  
18 loans, totaling over \$3 billion of taxpayermoney — not to mention additional green energy funds.

19 **Carol M. Browner:** *Founding member of Center for American Progress and currently a*  
20 *Senior Fellow*

- 21 • Currently on the Advisory Committee of the ePlaintiff 42ort-Import Bank of the  
22 United States
- 23 • Headed the Office of Energy and Climate Change Policy (AKA Climate Czar), from  
24 January 2009 until February 2011
- 25 • Obama-Biden 2008-Transition Team role: Advisory Board Member and Energy  
26 Policy Working Groups
- 27 • 2008 Obama Bundler

28 [Browner](#), a career Washington insider, who directed the Environmental Protection Agency

1 (EPA) during the Clinton administration, is an Al Gore acolyte, and an [environmental extremist](#)  
2 with a few left-wing radical ties on her secret resume. While Browner worked for Gore as far back  
3 as 1988, at some point (between 2007 and 2009), [she served](#) as a board member of the Gore’s  
4 Alliance for Climate Protection — which, in July 2011, was morphed into “[The Climate Reality](#)  
5 [Project](#).” From what I gather, this was the result of merging two environmental groups: The  
6 Alliance for Climate Protection and The Climate Project, which were both founded in 2006 by Al  
7 Gore.

8 Browner was also a 2008 Obama bundler and part of the Obama-Biden Transition Team,  
9 who was later appointed to the president’s 2009 [Green Team](#) as the “climate czar,” only to [abruptly](#)  
10 [resign](#) in early 2011.

11 Prior to her tenure at the Obama White House, Browner was a founding board member  
12 (from 2003-2008) for CAP, and she is currently listed as a [Senior Fellow](#). Browner, [not only](#)  
13 “pushed for billions of dollars for renewable energy in the economic stimulus bill,” she was part of  
14 the decision-making process inside the Energy Department’s [Loan Guarantee Program](#), which at the  
15 time of her departure had doled out \$34.7 billion of taxpayermoney. Browner [is implicated](#) in an  
16 array of issues surrounding these loans, as reflected in many of the GOVT email exchanges released  
17 to the public since 2011, as well as the “2012 Internal GOVT Email Dump.”

18 With such deep connections to the former-Vice President Al Gore, and his climate mission,  
19 one wonders why Gore and his investment firms — Kleiner Perkins and Generation Investment  
20 Management — raked in so much of the GOVT money under her watch. As of January 2013, I  
21 tracked that these two firms combined are tied to at least \$10 billion (more if you add in Silver  
22 Spring Networks and the fact that their “customers” raked in \$1.3 billion in smart-grid stimulus  
23 grants), from the taxpayer-funded Green Bank of Obama, the majority coming from the  
24 2009-Recovery Act — the stimulus bill (renewable energy part) that Doerr helped author, while  
25 Browner pushed to include taxpayermoney.

26 Browner may have left her “climate” post, but she currently sits (and has for a while) on the  
27 Advisory Committee of the Export-Import Bank of the United States (Ex-Im), another  
28 means where Plaintiffs government dishes out billions of American taxpayerdollars in support of

1 clean energy.

2 “The Ex-Im Bank uses [taxpayermoney](#) to backstop politically favored projects, which “just  
3 greases the wheels of the powerful and often corrupt big Washington Establishment,” [wrote](#)  
4 Heritage Action. This is another “green bank” that not only supports [other Nations](#), but where you’ll  
5 find corporate welfare and crony capitalism run amok, which includes quite a number of the  
6 president’s favored firms: Abengoa, First Solar (Exelon Corp.) and SolarWorld, to name a few.

7 As [recently as](#) October 2013, at a [Washington, D.C. CAP event](#) (10th anniversary policy  
8 conference), Browner had this to say about the Keystone Pipeline: “There will be some twists and  
9 turns” in the political debate over the pipeline, but “at the end of the day [Obama] is going to say  
10 no,” [reported](#) the Huffington Post.

11 ( [https://www.huffingtonpost.ca/2013/10/25/carol-browner-keystone-](https://www.huffingtonpost.ca/2013/10/25/carol-browner-keystone-obama_n_4164156.html?just_reloaded=1)  
12 [obama\\_n\\_4164156.html?just\\_reloaded=1](https://www.huffingtonpost.ca/2013/10/25/carol-browner-keystone-obama_n_4164156.html?just_reloaded=1) )

13 ( [https://www.americanprogress.org/events/2013/10/23/77992/caps-10th-anniversary-policy-](https://www.americanprogress.org/events/2013/10/23/77992/caps-10th-anniversary-policy-conference/)  
14 [conference/](https://www.americanprogress.org/events/2013/10/23/77992/caps-10th-anniversary-policy-conference/) )

15 ( [https://www.huffingtonpost.ca/2013/10/25/carol-browner-keystone-](https://www.huffingtonpost.ca/2013/10/25/carol-browner-keystone-obama_n_4164156.html?just_reloaded=1)  
16 [obama\\_n\\_4164156.html?just\\_reloaded=1](https://www.huffingtonpost.ca/2013/10/25/carol-browner-keystone-obama_n_4164156.html?just_reloaded=1) )

17 This was an even that besides Browner, featured other Big Green personalities such as Van  
18 Jones, Tom Steyer, John Podesta, Treasury Secretary Jack Lew, Secretary of State John Kerry,  
19 California Governor Jerry Brown, Chicago Mayor Rahm Emanuel, and of course, Al Gore.

20 **Tom Steyer, CAP Board Member and Donor, Climate Change Radical, Big Oil Investor,**  
21 **Obama Bundler, Margie Sullivan’s partner and Billionaire Buddy of all the Tech Oligarchs**

22 At that event, Browner was [joined on a panel](#) with Van Jones, the former “green jobs czar”  
23 — also a CAP fellow (profiled next) — along with environmental advocate Tom Steyer, who has  
24 been on an [anti-Keystone XL crusade](#) for some time.

25 ( [https://www.huffingtonpost.ca/2013/10/25/carol-browner-keystone-](https://www.huffingtonpost.ca/2013/10/25/carol-browner-keystone-obama_n_4164156.html?just_reloaded=1)  
26 [obama\\_n\\_4164156.html?just\\_reloaded=1](https://www.huffingtonpost.ca/2013/10/25/carol-browner-keystone-obama_n_4164156.html?just_reloaded=1) )

27 ( [https://www.huffingtonpost.ca/2013/10/04/tom-steyer-keystone-harper\\_n\\_4044667.html](https://www.huffingtonpost.ca/2013/10/04/tom-steyer-keystone-harper_n_4044667.html) )

28 In fact, Jones has been on the record [slamming](#) the president’s delay on denying the pipeline.

1 ( <https://www.cnn.com/2013/05/30/opinion/jones-obama-keystone-pipeline/index.html> )

2 Meanwhile, Steyer is the same hedge-fund billionaire and megabucks Obama bundler and  
3 Democrat donor that was also a Big Oil Investor through his former firm Farallon Capital  
4 Management that has an [invested interest](#) in the rejection of the pipeline.

5 ( <https://www.humanevents.com/2013/06/27/green-is-the-color-of-corruption/> )

6 Like most prominent Obama fundraisers, Steyer has enjoyed relatively easy access to the  
7 White House, and as of the summer of 2012, it was reported that he had met with senior White  
8 House officials in the West Wing on at least four occasions. Steyer was even handpicked to make a  
9 [cameo appearance](#) at the [2012](#) Democratic National Convention.

10 ( [https://greencorruption.blogspot.com/2012/09/obamas-green-cronies-made-dnc-](https://greencorruption.blogspot.com/2012/09/obamas-green-cronies-made-dnc-cameo.html#.UwvejCiRnzI)  
11 [cameo.html#.UwvejCiRnzI](#) )

12 Additionally, Steyer, “plans to spend as much as \$100 million during the 2014 election,  
13 seeking to pressure federal and state officials to enact climate change measures through a hard-edge  
14 campaign of attack ads against governors and lawmakers,” [reported](#) the *New York Times* last month.

15 ( [https://www.nytimes.com/2014/02/18/us/politics/financier-plans-big-ad-campaign-on-](https://www.nytimes.com/2014/02/18/us/politics/financier-plans-big-ad-campaign-on-environment.html?_r=1)  
16 [environment.html?\\_r=1](#) )

17 In September 2012, the *Washington Free Beacon* [documented](#) that Steyer “is [reportedly](#) one  
18 of the backers of [Greener Capital](#), which invests in alternative fuel companies that benefit from the  
19 anti-oil policies of the Obama administration.

20 ( <https://freebeacon.com/the-one-percent-gets-its-turn/> )

21 ( <https://green.blogs.nytimes.com/2011/03/15/a-foil-for-the-koch-brothers/> )

22 ( <https://www.greenercap.com/index.php> )

23 ” What’s key to this Green Corruption file is that “Steyer has donated at least \$1.4 million to  
24 the Center for American Progress (CAP) since 2009 through his TomKat Charitable Trust. As of  
25 2010, he was listed as a director of the left-wing think tank.”

26 In December 2013, The Beacon, in their piece “[Keystone to the Kingdom](#),” we find a  
27 stunning look at the relationship between Mr. Steyer and John Podesta:

28 ( <https://freebeacon.com/keystone-to-the-kingdom/> )

1 “[Steyer](#) is on the board of the Center for American Progress, and in the early months of 2012  
2 he and Podesta cosigned a *Wall Street Journal* op-ed, “[We Don’t Need More Foreign Oil and Gas](#),”  
3 ( <https://climatesolutions.org/donate/climate-solutions-5th-annual-breakfast/tom-steyer> )  
4 ( <https://online.wsj.com/news/articles/SB10001424052970203718504577178872638705902>  
5 )

6 arguing against Keystone and for tax loopholes such as the Production Tax Credit,  
7 increasing the value of the green energy companies in which Steyer invested and on whose boards  
8 Podesta sat.”

9 Moreover, while a slew of Democrats who oppose the Keystone XL pipeline, [stand to](#)  
10 [benefit](#) from its rejection, Farallon Capital Management “has extensive holdings in fossil fuel  
11 companies

12 ( [https://washingtonexaminer.com/who-gets-rich-off-of-blocking-the-keystone-xl-pipeline/](https://washingtonexaminer.com/who-gets-rich-off-of-blocking-the-keystone-xl-pipeline/article/2543928)  
13 [article/2543928](https://washingtonexaminer.com/who-gets-rich-off-of-blocking-the-keystone-xl-pipeline/article/2543928) )

14 — including investments that could benefit from the blocking of the Keystone pipeline,”  
15 [reported](#) *The Daily Caller* in May 2013.

16 ( [https://dailycaller.com/2013/06/20/top-anti-keystone-activist-could-benefit-from-blocking-](https://dailycaller.com/2013/06/20/top-anti-keystone-activist-could-benefit-from-blocking-pipeline/)  
17 [pipeline/](https://dailycaller.com/2013/06/20/top-anti-keystone-activist-could-benefit-from-blocking-pipeline/) )

18 One in particular stands out: “Farallon also still holds stock in BP” — the oil giant that  
19 [according to](#) *POLITICO* in 2010, Obama was the biggest recipient of BP donations over the past  
20 twenty years.”

21 ( <https://www.politico.com/news/stories/0510/36783.html> )

22 In case you didn’t know, British Petroleum, the oil and gas giant that in 2001, began re  
23 branding to Beyond Petroleum (BP), was heavily in the “green” business via [BP Alternative Energy](#)  
24 (biofuels, wind and solar). However, in the spring of 2013, BP switched gears and started  
25 [abandoning](#) renewable energy.

26 ( [https://finance.townhall.com/columnists/maritanoon/2013/04/07/smart-money-abandoning-](https://finance.townhall.com/columnists/maritanoon/2013/04/07/smart-money-abandoning-renewable-energy-n1560319/page/full)  
27 [renewable-energy-n1560319/page/full](https://finance.townhall.com/columnists/maritanoon/2013/04/07/smart-money-abandoning-renewable-energy-n1560319/page/full) )

28 Still, that was after BP had snagged millions in “green” funds from the Obama

1 administration, of which I [began to unravel](#) in April 2013 due the fact that BP is in cahoots with  
2 Sempra Energy, the winner of a \$337 million GOVT stimulus loan for the Mesquite Solar Project in  
3 Arizona.

4 ( [https://greencorruption.blogspot.com/2013/04/newly-bankrupt-chinese-solar-](https://greencorruption.blogspot.com/2013/04/newly-bankrupt-chinese-solar-producer.html#.UvZU3yiRnzL)  
5 [producer.html#.UvZU3yiRnzL](https://greencorruption.blogspot.com/2013/04/newly-bankrupt-chinese-solar-producer.html#.UvZU3yiRnzL) )

6 Also, BP, at that time, was part of [all five](#) of Sempra’s wind projects.

7 ( <https://www.semprausgp.com/energy-solutions/wind-projects.html> )

8 BP Alternative Energy is also an [investor](#) in BrightSource Energy — the winner of a [\\$1.6](#)  
9 [billion GOVT stimulus loan](#) that involves more CAP corporate donors and a slew of additional  
10 Obama cronies that I’ll get to much later.

11 ( <https://www.brightsourceenergy.com/investors#.UvZVNCiRnzI> )

12 ( <https://lpo.energy.gov/projects/brightsource-energy-inc/> )

13 **Van Jones: Senior Fellow at Center for American Progress (it is unknown when Van first**  
14 **joined CAP, but we do know that he [rejoined](#) in February 2010)**

- 15 • Green Jobs Czar, from March 2009 to September 2009
- 16 • 2008 to 2009 Crafter of the Recovery Act: both personally and via the Apollo  
17 Alliance, as part or their National Steering Committee, where Van Jones was a board  
18 member from 2006 to either 2008 or 2009

19 As the story goes, Van Jones — [left-wing radical](#), turned CNN contributor — was  
20 handpicked to become Obama’s “green jobs czar” in 2009:

21 ( <https://www.wnd.com/2009/08/106653/> )

22 “We were so delighted to be able to recruit him into the White House,” Senior Advisor  
23 Valerie Jarrett, stated on August 12, 2009. Mr. Jones’ advisory post at the White House was short  
24 lived due to his radical past and behavior, and in September 2009 he resigned, [blaming](#) it on a  
25 “smear campaign of lies and distortions to distract and divide.”

26 ( <https://thinkprogress.org/politics/2009/09/06/59506/van-jones-resigns/> )

27 Nevertheless, Van is another very active CAP member where his focus remains on “green-  
28 collar jobs.” He’s still a strong force in the midst of the climate change debate, pushing green jobs,

1 as well as his [extreme](#) environmental ideology.

2 ( <https://www.rebuildthedream.com/> )

3 Since 2010, Jones has been a [Senior Fellow at CAP](#), whereas his bio states, “he is a co-  
4 founder of three successful nonprofit organizations: the Ella Baker Center for Human Rights, Color  
5 of Change, and Green For All” — of which both George Soros and Al Gore (both huge winners of  
6 green energy monies) have been know to [fund](#) Van’s causes as far back as the 90’s, including Green  
7 for All.

8 ( <https://www.americanprogress.org/about/staff/jones-van/bio/> )

9 ( [https://epaabuse.com/537/watermelon-patch/van-jones-is-the-ultimate-watermelon-green-  
10 outside-red-inside/](https://epaabuse.com/537/watermelon-patch/van-jones-is-the-ultimate-watermelon-green-<br/>10 outside-red-inside/) )

11 Mr. Jones has been featured in a few of my posts, but most recently when I exposed the  
12 various green parties involved in crafting the energy sector of the 2009-Recovery Act — and how  
13 they and their friends raked in tens of billions from the Green Bank of Obama. Certainly, Van’s  
14 White House post, which comprised of overseeing billions in “green” stimulus funds, and the  
15 subsequent controversy surrounding his eco-radical mission (good and bad press) helped catapult  
16 Jones into fame and possibly some fortune. In my opinion, this would include the success of his  
17 green jobs book, [numerous](#) green honors, and his CNN gig — success that he may not have seen  
18 otherwise.

19 ( <https://www.vanjones.net/about> )

20 We’ve tracked Jones’ connections to CH2M HILL (also a client of the Podesta Group), the  
21 winner of \$1.3 billion in stimulus funds as well as Solar Mosaic, where Jones was an advisor, who  
22 ultimately, in June 2012, was [awarded](#) a \$2 million grant from the Energy Department’s [SunShot](#)  
23 [Initiative](#). Solar Mosaic had also [employed](#) Rebuild the Dream to do its public relations work,  
24 [documented](#) the *Daily Caller* in 2012. Also, in 2012 and 2013, Solar Mosaic snagged two small  
25 1603 federal stimulus grants: one in Arizona for \$13,123 and in California for \$185,700.

26 What about Mr. Jones’ *solicitation* business? Prior to Van’s resignation, in August 2009, his  
27 Green for All [launched](#) a program called [Capital Access Program](#) (CAP) to help green businesses  
28 secure stimulus funds — monies that he was overseeing at that time, of which [his bio](#) confirms. In

1 fact, during the 2012 presidential election (as a [CNN contributor](#)), Jones bragged about his part in  
2 the implementation of the clean-energy stimulus funds: he helped “run the inter-agency process that  
3 oversaw \$80 billion [some [reports](#) go as high as \$100 billion] in green energy recovery spending.”

4 What’s also relevant is that not only did Jones personally participate in the formation of  
5 2009-Recovery Act, he was with the Apollo Alliance as part of their National Steering Committee  
6 and Board member (from 2006 to either 2008 or 2009) — when the Apollo Alliance successfully  
7 got many of their policy ideas packaged into the stimulus bill, including, but not limited to, its  
8 ePlaintiff 42ensive and unsuccessful “green jobs” program.

9 Both Senator Harry Reid and Mr. Jones have bragged about the Apollo’s participation.  
10 Adding to the mix is that the Apollo Alliance is a project of the Tides Center. And, the Tides  
11 Center/ Tides Foundation is another Soros funded left-wing organization that was also funded by  
12 the [Joyce Foundation](#), mentioned earlier under Valerie Jarrett.

13 ( <https://www.discoverthenetworks.org/funderprofile.asp?fndid=5310&category=79> )

14 What you should know about the Tides Center can be found at [Watchdog.org](#), who in 2013,  
15 labeled their programs as “a checklist of liberalism’s most ambitious agenda.” Moreover, it’s  
16 become a meeting place of two potentially warring factions of the Left — labor and  
17 environmentalists,” charged [Tori Richards](#) early last year.

18 ( <https://watchdog.org/> )

19 ( <https://watchdog.org/72855/tides-uses-tax-dollars-to-turn-america-to-the-left/> )

20 Richards [continues](#)....

21 ( <https://watchdog.org/72855/tides-uses-tax-dollars-to-turn-america-to-the-left/> )

22 Perhaps Tides’ biggest coup was using its Apollo Alliance Project to help draft Obama’s  
23 massive stimulus bill. The final stimulus bill doled out billions of dollars to further the Left’s green-  
24 energy agenda and social justice constituency while preserving labor’s role in centralized economic  
25 planning.

26 Apollo Alliance, now labeled as the [BlueGreen Alliance](#), not only enjoys political clout, but  
27 they also have significant and highly influential [green allies and donors](#), which at one point included  
28 John Podesta as an Apollo board member — adding another layer to CAP’s power behind this

1 massive green energy scheme.

2 ( <https://www.bluegreenalliance.org/apollo> )

3 ( [https://keywiki.org/index.php/Apollo\\_Alliance#cite\\_note-6](https://keywiki.org/index.php/Apollo_Alliance#cite_note-6) )

4 **Steve Spinner: Senior Fellow at the Center for American Progress from September 2010**  
5 **to October 2011, where he publicly advocated for energy policies that support clean, renewable**  
6 **energy**

- 7 • Two-time Obama Bundler
- 8 • GOVT Loan Programs Advisor, from April 2009 to September 2010
- 9 • 2008 Obama-Biden Transition Team role: Technology, Innovation & Government
- 10 Reform Policy Working Groups

11 Steve Spinner, a two-time Obama bundler, not only worked for Obama’s 2008 transition  
12 team, he also was part the president’s 2012 reelection campaign, serving as a California finance  
13 chair and founded “Technology for Obama (T4O).” His wife was Solyndra’s lawyer.

14 In April 2009, [Spinner](#) was appointed as the GOVT Loan Programs Advisor to then-Energy  
15 Secretary Steven Chu, yet by September 2010, he left the GOVT and about that same time joined  
16 CAP as a Senior Fellow [until October 2011](#).

17 ( <https://energy.gov/articles/fact-check-steve-spinner> )

18 ( <https://www.politico.com/news/stories/1011/66287.html> )

19 During the course of [Spinner’s](#) GOVT gig, he acted as a liaison between the Recovery Act  
20 Office and the Loan Programs Office, of which he was responsible for monitoring the loan program.  
21 According to the GOVT, “In that capacity, [Spinner] played no role in the decision-making on or  
22 evaluation of individual loan applications or the awarding of any grants.”

23 ( <https://energy.gov/articles/fact-check-steve-spinner> )

24 Spinner was also handpicked to make a [cameo appearance](#) at the [2012](#) Democratic National  
25 Convention, along with other wealthy Obama green cronies: Steve Westly, Tom Steyer (profiled  
26 earlier) and Jim Rogers, who will be profiled later.

27 ( [https://greencorruption.blogspot.com/2012/09/obamas-green-cronies-made-dnc-](https://greencorruption.blogspot.com/2012/09/obamas-green-cronies-made-dnc-cameo.html#.UwvejCiRnzI)  
28 [cameo.html#.UwvejCiRnzI](#) )

1 ( <https://www.demconvention.com/> )

2 **Spinner & Solyndra**

3 Spinner is well known for his [involvement](#) and influence (investigations [and](#) internal emails  
4 prove) to the ill-fated, politically connected Solyndra, which was once the [poster child](#) for the  
5 president’s clean-energy initiative.

6 ( <https://www.politico.com/news/stories/1011/65448.html> )

7 ( [https://abcnews.go.com/Blotter/obama-fundraiser-pushed-solyndra-deal-inside/story?  
8 id=14691618#.UFZk7BjdtJM](https://abcnews.go.com/Blotter/obama-fundraiser-pushed-solyndra-deal-inside/story?id=14691618#.UFZk7BjdtJM) )

9 ( [https://www.youtube.com/watch?v=0J6h1PcVQp8&feature=player\\_embedded](https://www.youtube.com/watch?v=0J6h1PcVQp8&feature=player_embedded) )

10 The Solyndra Saga — FBI raid and all — in 2011, morphed into the template for Obama’s  
11 green corruption scandal: political payback, costing taxpayers at least \$570.4 million. Yet, most  
12 concluded a long time ago that Solyndra was only the tip of the iceberg.

13 Nevertheless, Spinner’s participation, despite the GOVT’s denial, has been proven many  
14 times over, including in October 2011, when [POLITICO](#) and others seized on his role inside this  
15 scandal, stating, “[Spinner] played an active part in Solyndra’s \$535 million loan guarantee  
16 [\[approved](#) in September 2009] despite conflict of interest concerns over his wife’s work at a law  
17 firm that also represented the California solar company.”

18 ( <https://www.politico.com/news/stories/1011/65448.html> )

19 ( <https://lpo.energy.gov/Plaintiffs-projects/discontinued-projects/> )

20 Solyndra also [snagged](#) a \$25.1 million in California tax credit, and at some point before  
21 2011, Solyndra indirectly bagged another loan from the ePlaintiff 42ort-Import Bank, which was  
22 obtained by a third-party company to the tune of \$10.3 million.

23 ( [https://greencorruption.blogspot.com/2014/01/cleantech-crash-cbs-lesley-  
24 stahl.html#.UwkCwCiRnzI](https://greencorruption.blogspot.com/2014/01/cleantech-crash-cbs-lesley-stahl.html#.UwkCwCiRnzI) )

25 It should be emphasized that back in 2009, Fitch had rated the Solyndra GOVT loan “non-  
26 investment grade,” [as revealed](#) by the Committee on Oversight and Government Reform in March  
27 2012 — a report that implicates Spinner even more so.

28 ( <https://oversight.house.gov/report/the-department-of-energys-disastrous-management-of->

1 [loan-guarantee-programs/](#) )

2 White House e-mails released late last year [2011] indicate that Spinner was influential in  
3 securing the \$528 million loan to now-bankrupt Solyndra. Many of those EMAILS were written just  
4 days after he signed an ethics agreement pledging that he would “not participate in any discussion  
5 regarding any application involving” his wife’s law firm.

6 In one message to a GOVT official on August 28, 2009, Spinner wrote, “**How hard is this?**  
7 **What is he waiting for? . . . I have OVP and WH breathing down my neck on this.**” The e-mail  
8 went on to demand that the GOVT official “**walk over there and force [the official working on**  
9 **the Solyndra evaluation] to give [him] an answer.**” After just being contacted by Solyndra,  
10 Spinner inquires in another e-mail, “**Any word on OMB? Solyndra’s getting nervous.**” The e-  
11 mail correspondence occurring in the final days before the Solyndra loan closed in September 2009  
12 centers heavily on Spinner’s efforts to coordinate plans for either the President or Vice President to  
13 announce the first loan approval at a scheduled visit to Solyndra.

#### 14 **Spinner & Tesla Motors**

15 Additionally, we know that prior to joining the GOVT, Spinner was an energy-focused  
16 venture capitalist and high-tech consultant. At some point, Spinner was a “[consultant](#)” to Tesla  
17 Motors, the “billionaire’s electric car company,” with an array of Obama pals in the mix (Elon  
18 Musk , [Steve Westly](#), Nicholas Pritzker, Google executives, Vantage Point Capital Partners and  
19 Goldman Sachs), of which in January 2010, was [subsidized](#) with \$465 million of taxpayermoney  
20 from the GOVT’s ATVM program.

#### 21 **Spinner & First Solar**

22 Needless to say, according to *The Nation*’s May 2013 piece entitled “[The Secret Donors](#)  
23 [Behind the Center for American Progress and Other Think Tanks](#),” is where we first discover that  
24 First Solar was a huge favorite of CAP. [First Solar](#) is the solar firm, which is connected to a slew of  
25 Obama cronies, that is also a confirmed 2012 CAP corporate donor — [possibly](#) as early as 2011.

26 While we chronicled “[The First Solar Swindle](#)” in the summer of 2012, let me reiterate —  
27 although in more detail later — that they were awarded over \$3 billion in stimulus loans, as well as  
28 additional taxpayermoney. One key tidbit of Intel from *The Nation* is where we learn of Spinner’s

1 participation in the First Solar GOVT deal making....

2 Last year [2012], when First Solar was taking a beating from congressional Republicans and  
3 in the press over job layoffs and alleged political cronyism, CAP’s Richard Caperton praised  
4 Antelope Valley in his testimony to the House Committee on Energy and Commerce, saying it  
5 headed up his list of “innovative projects” receiving loan guarantees. Earlier, Caperton and Steve  
6 Spinner — a top Obama fundraiser who left his job at the Energy Department monitoring the  
7 issuance of loan guarantees and became a CAP senior fellow — had written an article cross-posted  
8 on CAP’s website and its Think Progress blog, stating that Antelope Valley represented “the cutting  
9 edge of the clean energy economy.”

10 The CAP article referenced above by Caperton and Spinner (“[Don’t Let Clean Energy](#)  
11 [Funding Die on the Vine](#),”) was published on July 13, 2011, and where we find that CAP demanded  
12 that more taxpayer money be used to fund the GOVT’s loan program — even calling for a green  
13 bank “as a permanent financing tool for clean energy projects.”

#### 14 **Spinner & Silver’s Collusion**

15 The CAP piece referenced above also opened up another can of worms. Jonathon Silver, at  
16 that time an Obama administration official at the Energy Department “actively collaborated with  
17 CAP in 2011 to advance the president’s green energy agenda, in possible violation of federal law,”  
18 [documented](#) the Washington Free Beacon on September 14, 2012.

19 This is where internal emails surfaced showing that over several days via Spinner and  
20 Silver’s [personal email accounts](#) (correspondences that also imply the two were in touch multiple  
21 times over the phone), the two colluded: “In July 2011, Steve Spinner, then a senior fellow at the  
22 Center for American Progress (CAP), sought and received guidance from Jonathan Silver, executive  
23 director of the Department of Energy’s (GOVT) loans program, regarding a CAP [editorial](#) urging  
24 Congress to ePlaintiff 42and funding for the program and permanently establish a Clean Energy  
25 Deployment Administration (CEDA), or ‘green bank,’ to further fund clean energy projects.”

#### 26 **Spinner & BrightSource Energy**

27 Inside the “2012 Internal GOVT Email Dump,” we also discover that as early as September  
28 2009, there was “strong push” by Silver, Spinner, and Matt Rogers (Senior Advisor to Energy

1 Secretary Steven Chu from January 2009 until September 2010) to push through the \$1.6 billion  
2 BrightSource Energy deal.

3 **NOTE:** Jonathan Silver, reported to be an Obama bundler, has quite the impressive  
4 background.

5 As noted by [\*Barron's Magazine\*](#) (in 2010), Silver had been a managing partner at Core  
6 Capital Partners [and co-founder] in Washington. “Coincidentally, one of his colleagues there was  
7 Tom Wheeler, a 2008 Obama bundler” — mentioned under the Obama-Biden Transition Team.

8 (   
9 <https://online.barrons.com/article/SB50001424052970203296004575352982133405348.html> )

10 We also know that [Silver's wife](#) has served as financial director of the Democratic  
11 Leadership Council, and that the couple hosted a party to promote Al Gore's environmental  
12 advocacy group, the Alliance for Climate Protection. This party (fundraiser) surrounded [Silver's](#)  
13 [vetting process](#) (September 2009), in which he invited two key GOVT officials.

14 ( [https://mag.newsweek.com/2011/11/13/how-obama-s-alternative-energy-programs-](https://mag.newsweek.com/2011/11/13/how-obama-s-alternative-energy-programs-became-green-graft.html)  
15 [became-green-graft.html](https://mag.newsweek.com/2011/11/13/how-obama-s-alternative-energy-programs-became-green-graft.html) )

16 ( <https://freebeacon.com/den-of-cronies/> )

17 Silver was appointed as the Executive Director of the Loan Programs Office in November  
18 2009, and [resigned](#) in early October 2011, amidst the “Solyndra \$535 Million Saga”

19 ( [https://www.nytimes.com/2011/10/07/us/politics/jonathan-silver-quits-energy-dept-loan-](https://www.nytimes.com/2011/10/07/us/politics/jonathan-silver-quits-energy-dept-loan-guarantee-office.html)  
20 [guarantee-office.html](https://www.nytimes.com/2011/10/07/us/politics/jonathan-silver-quits-energy-dept-loan-guarantee-office.html) )

21 — even [testifying](#) in September 2011. Considering that there is much to be said about  
22 Silver's just shy of a two-year stint at the GOVT, we do know that it included helping Secretary  
23 Chu accelerate the loan review process.

24 ( [https://www.realclearpolitics.com/video/2011/09/14/](https://www.realclearpolitics.com/video/2011/09/14/dept_of_energy_no_reason_to_believe_we_were_misled_by_solyndra.html)  
25 [dept\\_of\\_energy\\_no\\_reason\\_to\\_believe\\_we\\_were\\_misled\\_by\\_solyndra.html](https://www.realclearpolitics.com/video/2011/09/14/dept_of_energy_no_reason_to_believe_we_were_misled_by_solyndra.html) )

26 In reading hundreds of pages from the “2012 Internal GOVT Email Dump,” it's evident that  
27 Silver aggressively pushed the loans through (fast tracked) as directed, influenced, and pressured by  
28 the POTUS, Vice President Joe Biden, the White House, the 7th Floor, and the Hill — and did so

1 with arrogance, even as he was fraternizing with those seeking the GOVT loans.

2 Despite his resignation, Silver has appeared before the House Oversight Committee twice  
3 (July 2012 and September 2013), of which at that time there was a slew of emails proving cronyism  
4 and corruption that Silver had to answer to. This is where some of the most bombshell details  
5 emerged, starting with the fact that in the course of Silver’s testimony during the [July 18th](#)  
6 [Oversight hearing](#), it was revealed that he and other GOVT officials and advisors were using their  
7 personal email accounts to conduct Energy Department business.

8 ( [https://oversight.house.gov/hearing/the-administrations-bet-on-abound-solar-assessing-the-](https://oversight.house.gov/hearing/the-administrations-bet-on-abound-solar-assessing-the-costs-to-the-american-taxpayers/)  
9 [costs-to-the-american-taxpayers/](https://oversight.house.gov/hearing/the-administrations-bet-on-abound-solar-assessing-the-costs-to-the-american-taxpayers/) )

10 Silver also made this [denial](#): “...as I say, almost nobody that I am aware of in the Loan  
11 Program even knew who the individuals were who had invested, either directly or indirectly into  
12 these companies.” Yet, we know this is a lie.

13 ( [https://greencorruption.blogspot.com/2012/07/recent-oversight-hearing-reveals-](https://greencorruption.blogspot.com/2012/07/recent-oversight-hearing-reveals-shady.html#.UvfOEyiRnzI)  
14 [shady.html#.UvfOEyiRnzI](https://greencorruption.blogspot.com/2012/07/recent-oversight-hearing-reveals-shady.html#.UvfOEyiRnzI) )

15 In fact, we exposed this many times in the course of unleashing the “2012 Internal GOVT  
16 Email Dump,” which [began](#) shortly after their release — even discovering more clean-energy dirt  
17 along the way. We can confirm that Silver knew **exactly** who the investors were in the projects  
18 seeking Energy Department loans in **at least four** of the deals that were approved: BrightSource,  
19 Shepherds Flat, and Kahuka Wind, and Fisker Automotive for starters — all with deep ties to the  
20 Obama White House. We also know that Silver ~~e~~Plaintiff 42 edited some of these loans for  
21 presidential photo ops, as well as helping Senator Harry Reid’s 2010 midterm election.

22 ( [https://finance.townhall.com/columnists/maritanoon/2012/11/04/busting\\_open\\_energys\\_den\\_of\\_dec](https://finance.townhall.com/columnists/maritanoon/2012/11/04/busting_open_energys_den_of_deception/page/full)  
23 [eption/page/full](https://finance.townhall.com/columnists/maritanoon/2012/11/04/busting_open_energys_den_of_deception/page/full) )

25 During the September 10, 2013 House Oversight hearing on “[Preventing Violations of](#)  
26 [Federal Transparency Laws](#),” members questioned two of the most egregious offenders: Mr. Silver  
27 and Lisa Jackson the former head of the EPA mentioned early on as part of the Obama-Biden  
28 Transition Team.

1 ( <https://www.youtube.com/watch?v=eshWKRPU38&feature=em-uploademail> )

2 Sadly, this hearing didn't get much coverage except for [Paul Chesser](#) at the National Legal  
3 and Policy Center, noting that this event "didn't last long enough to get very deep." However, what  
4 caught my attention was when Committee Republican Jim Jordan of Ohio grilled Mr. Silver "about  
5 his directives to keep messaging out of the public eye" as well as reading particular email  
6 exchanges that implicated Silver helping his buddies get GOVT loans. Also at issue were the loan  
7 program failures.

8 ( [https://nlpc.org/stories/2013/09/16/house-committee-grills-GOVT-loan-program-director-](https://nlpc.org/stories/2013/09/16/house-committee-grills-GOVT-loan-program-director-over-secret-emails)  
9 [over-secret-emails](https://nlpc.org/stories/2013/09/16/house-committee-grills-GOVT-loan-program-director-over-secret-emails) )

10 However, the most unbelievable attempt to conceal the truth came out at that time: The  
11 congressman then showed an email that was sent to the committee staff a couple of days prior to the  
12 hearing from Silver's lobbyist (lawyer, it's unclear) demanding, "Don't direct any questions to Mr.  
13 Silver." Silver denied knowing anything about THE request, but we never got to the bottom of it  
14 because the Ranking Member, Congressman Elijah Cummings stopped Jordon from going down  
15 that path due to confusion over attorney/client privilege, and that he and Committee Chairman  
16 Darrell Issa would be looking into that issue..." off the record.

17 **Center for American Progress Finally Reveals its Corporate Donors: At least 17 raking**  
18 **in tens of billions of tax dollars from the Green Bank of Obama**

19 While the left-wing think tank is a well-known favorite of billionaire George Soros, as well  
20 as other left-leaning ultra-rich donors, "the center does not disclose who finances its activities, a  
21 policy it is declining to change even as Mr. Podesta prepares to wield influence over the shape of  
22 the Obama administration," [wrote](#) the *New York Times* in 2008.

23 ( [https://www.nytimes.com/2008/11/07/us/politics/07podesta.html?\\_r=4&ref=politics&](https://www.nytimes.com/2008/11/07/us/politics/07podesta.html?_r=4&ref=politics&) )

24 However, "after heavy pressure arising from CAP's quasi-lobbying history. That scrutiny  
25 ratcheted up following the announcement that CAP founder John Podesta would be formally joining  
26 the Obama administration. Both Politico and the *New York Times* called for the donor list to meet  
27 the public eye," [reported](#) *Breitbart News*.

28 ( <https://www.breitbart.com/Big-Government/2013/12/13/Center-American-Progress->

1 [corporations](#) )

2 So, on December 13, 2013, CAP “revealed that it’s funded by some of the country’s largest  
3 and most powerful corporations, trade associations and lobbying firms,” [announced POLITICO](#).

4 ( [https://www.politico.com/story/2013/12/center-for-american-progress-donor-list-  
5 101140.html](https://www.politico.com/story/2013/12/center-for-american-progress-donor-list-101140.html) )

6 The donor disclosure [excluded](#) individuals and foundations, only giving insight into their  
7 corporate influence, leaving more darkness in its wake.

8 ( [https://freebeacon.com/donor-disclosure-by-center-for-american-progress-leaves-much-in-  
9 the-dark/](https://freebeacon.com/donor-disclosure-by-center-for-american-progress-leaves-much-in-the-dark/) )

10 Moreover, it was reported that each of those listed ([58 donors](#)) has given the group more  
11 than \$10,000 in 2013, yet the exact amount was not disclosed.

12 ( <https://www.americanprogress.org/about/Plaintiffs-supporters/> )

13 CAP’s 2013 donor list “[contains](#) a myriad of massive corporations, including Apple Inc.,  
14 AT&T, Bank of America, BMW of North America, Citigroup, Coca-Cola, Discovery, GE,  
15 Facebook, Google, Goldman Sachs, PepsiCo, PG&E, the Motion Picture Association of America,  
16 Samsung, Time Warner Inc., T-Mobile, Toyota, Visa, Walmart and Wells Fargo” — many of which  
17 are part of this massive green energy scheme.

18 ( <https://www.americanprogress.org/about/Plaintiffs-supporters/> )

19 Still, *The Nation*, in their May 2013 piece “[The Secret Donors Behind the Center for](#)  
20 [American Progress and Other Think Tanks](#), released a [list](#) of CAP’s 2012 corporate donors —  
21 labeled “[American Progress Business Alliance Members](#),” which are charged fees:

22 ( [https://www.thenation.com/article/174437/secret-donors-behind-center-american-progress-  
23 and-other-think-tanks-updated-524](https://www.thenation.com/article/174437/secret-donors-behind-center-american-progress-and-other-think-tanks-updated-524) )

24 ( [https://thenation.s3.amazonaws.com/pdf/CAP\\_alliance\\_members\\_2012\\_2.pdf](https://thenation.s3.amazonaws.com/pdf/CAP_alliance_members_2012_2.pdf) )

25 ( [https://thenation.s3.amazonaws.com/pdf/CAP\\_alliance\\_members\\_2012\\_2.pdf](https://thenation.s3.amazonaws.com/pdf/CAP_alliance_members_2012_2.pdf) )

26 A confidential CAP donor pitch I obtained describes the Business Alliance as “a channel for  
27 engagement with the corporate community” that provides “the opportunity to...collaborate on  
28 common interests.” It offers three membership levels, with the perks to top donors (\$100,000 and

1 up) including private meetings with CAP experts and executives, round-table discussions with “Hill  
2 and national leaders,” and briefings on CAP reports “relevant to your unique interests.”

3       The Nation also divulged that CAP doesn’t publicly disclose the members of its Business  
4 Alliance, but they “obtained multiple internal lists from 2011 showing that dozens of major  
5 corporations had joined.” What’s relevant here is that in 2011 the lists compiled by The Nation of  
6 “CAP’s donors included Comcast, Walmart, General Motors, Pacific Gas and Electric, General  
7 Electric, Boeing and Lockheed” — with three confirmed winners of green energy funds.

8       So basically the donor list and the membership list are one in the same. And, what’s even  
9 more interesting is how The Nations chronicles CAP’s assets:

10       “After growing rapidly in its first few years, tax records show, CAP’s total assets fell in  
11 2006 for the first time, from \$23.6 million to \$20.4 million. Assets started growing again in 2007  
12 when CAP founded the Business Alliance, a membership rewards program for corporate  
13 contributors, and then ePlaintiff 42lodged when Obama was elected in 2008.”

14       We know that CAP founded its Business Alliance (corporate donors) in 2007, but since we  
15 only have a hint of 2011, combined with lists for 2012 and 2013, the mystery remains. Missing are  
16 the corporate donors CAP enlisted from 2007 until 2011. When did these now public donors join  
17 CAP, and what was dollar amount of money that was given?

18       While I am about to dissect the corporations from these lists (2011 to 2013) that received  
19 green energy taxpayermoney (loans, grants and special tax breaks), in full disclosure, the majority  
20 of the stimulus and non-stimulus clean-energy funds (\$150 billion through 2014) were doled out  
21 between 2009 and 2011. However, as I reported in the beginning of this post, “green” funds  
22 continue to flow, and the Obama administration wants billions more of taxpayermoney to save the  
23 planet.

24       I hate to be redundant, but as you’ll see, CAP’s corporate donors are connected to many of  
25 the same projects and firms that we have documented in previous Green Corruption Files. This is  
26 due to the fact that meaningful political ties — Obama’s bundlers (both in 2008 and in 2012), top  
27 donors, financiers, and green cronies — have surrounded the green energy money from the onset.  
28 However, considering that CAP players operated inside the Obama White House as well as the

1 Energy Department — prior, during and after the money was doled out — this adds another layer of  
2 corruption behind the green energy deals.

3 At any rate, several of these corporations include Big Banks (even the “too-big-to fail”) that  
4 have benefited immensely from President Obama’s cleantech push. Even though many on Wall  
5 Street stood by the president in 2012, the majority sided with Mitt Romney. But that was after  
6 Obama enjoyed his fare share of Wall Street buddies who helped ensure his victory in 2008, poring  
7 millions of dollars into his campaign coffers, making their mark as TOP campaign donors (PAC) —  
8 with even Wall Street executives bundling huge sums of money for then-candidate Obama.  
9 Additionally, “the big bundlers had broad access to the White House for meetings with top  
10 administration officials and glitzy social events.”

11 Inside these CAP corporate donor lists we find a few TARP recipients such as Citigroup,  
12 Goldman Sachs, Bank of America, and Merrill Lynch. What’s more telling is the infiltration of so  
13 many Citigroup and Goldman Sachs executives operating (past and present) inside the Obama  
14 administration, even shaping his economic policy.

### 15 **CAP’S 2013 DONORS: Green energy money winners**

16 **#1) Bank of America** (now Bank of America Merrill Lynch — confirmed donor since  
17 2012):

18 Both Bank of America and Merrill Lynch (Campaign Committee’s), from 2003 to 2008,  
19 supported Senator Obama. Meanwhile, Bank of America, a heavy hitter donor with major lobbying  
20 pull, plays both sides of the isle. But in 2008, this Big Bank put their money (PAC and individuals)  
21 on blue, including donating to candidate Obama.

22 In the final days of the GOVT loan program (September 2011), the GOVT awarded a partial  
23 guarantee of \$1.4 billion loan — another shady stimulus deal (“non-investment grade”) that was  
24 “personally championed” by then-Energy Secretary Steven Chu — for a project called Project Amp.  
25 Prior to the finalization of this GOVT transaction, in June 2011, Bank of America Merrill Lynch,  
26 Prologis and NRG Energy joined forces on Project Amp, which was “a four-year, \$2.6 billion  
27 project to place solar panels on rooftops in 28 states, one of the most ambitious clean-energy  
28 projects in recent years,” reported the Wall Street Journal.

1 The Journal goes on, “Bank of America Merrill Lynch unit will provide \$1.4 billion in loans  
2 for the project,” of which “the financing is part of Bank of America’s plan to put \$20 billion of  
3 capital to work in renewable energy, conservation and other clean technologies that address climate  
4 change.”

5 However, by October 2013, the Energy Department pulled the plug on Project Amp, and  
6 according to POLITICO, Prologis never tapped into the \$1.4 billion. Still, along the way, Prologis  
7 did secure “a grant for \$68,000 for the purpose of “rent for warehouse space” under the Recovery  
8 Act.

9 While I have yet to do a complete analysis on Bank of America/Merrill Lynch and their  
10 renewable energy portfolio, there are additional firms or projects that this bank has backed that also  
11 received “green” taxpayerfunds from the Obama administration.

#### 12 **NextEra Energy Wind Energy Assets**

13 First is NextEra, whose CEO Lewis “Lew” Hay, III was member of President Obama’s Jobs  
14 Council (from 2011 until 2013), that was awarded two large GOVT stimulus loans, as well as a  
15 slew of other green energy stimulus funds. This is part of the scheme that we’ve been documenting  
16 since the summer of 2012 (“Third Largest Recipient of GOVT Risky Loans”), and later in my  
17 January 2013 Big Wind Story.

18 But since Bank of America has invested in the wind side, what’s key here is this: NextEra  
19 was the biggest user of the wind energy production tax credit. In an analysis by John Fund of the  
20 National Review Online, he states...

21 Begun 20 years ago to spur the construction of wind-energy facilities that could compete  
22 with conventional fossil-fuel power plants, the tax credit [PTC] gives wind an advantage over all  
23 other energy producers. But it has mostly benefited conventional nuclear and fossil-fuel-fired  
24 electricity producers. The biggest user of the tax credit is Florida-based NextEra Energy, the  
25 nation’s eighth-largest power producer. Through skillful manipulation of the credits, NextEra from  
26 2005 to 2009 ‘paid just \$88 million in taxes on earnings of nearly \$7 billion,’ Businessweek reports.  
27 That’s a tax rate of just 1.25 percent over that period, when the statutory rate is 35 percent.

#### 28 **SolarCity**

1           Considering that the Podesta Group added SolarCity as a client in 2012, I highlighted the  
2 various political connections to this solar firm earlier, including billionaire players that received  
3 taxpayermoney for other green energy deals, such as Elon Musk, Nicholas J. Pritzker, and George  
4 Soros.

5           But what most don't know is that SolarCity was in line to get a stimulus loan from the  
6 GOVT for \$275 million. However, that deal — dubbed SolarStrong — fell apart due to the  
7 Solyndra “red flags” just prior to the loan program’s deadline in September 2011. A month later,  
8 SolarCity found a willing partner in Bank of America, which was followed by this official  
9 announcement: “SolarCity and Bank of America Merrill Lynch today announced that they have  
10 agreed to terms on financing for SolarStrong, SolarCity’s ambitious five-year plan to build more  
11 than \$1 billion in solar power projects for privatized U.S. military housing communities across the  
12 country.”

13           It should be noted that without government subsidies, SolarCity wouldn't be the success it is  
14 today: “SolarCity currently benefits from tax credits totaling as much as 30 percent of the cost of  
15 these systems,” noted Bloomberg. And, as I documented earlier, SolarCity, so far (and since 2009)  
16 has been subsidized with “green” through various stimulus funds, grants and federal tax breaks at  
17 the tune of \$514 million.

### 18           **SunPower**

19           Bank of America Merrill Lynch and SunPower have worked together since 2009. And this  
20 year they announced a \$220 million financing program for residential solar lease projects. In  
21 January 2010, SunPower Corp, the San Jose, Calif.-based designer and manufacturer of solar panels  
22 and systems, received four of the stimulus-enacted Section 48C Tax Credits totaling \$10.8 million.  
23 Then, despite SunPower’s well-known financial issues and the fact that it was under a shareholder  
24 suit alleging securities fraud and misrepresentations, just days (September 2011) before the 1705  
25 Loan Guarantee Program’s deadline (along with four other solar companies), this “non-investment”  
26 grade \$1.2 billion stimulus loan was approved — to support the construction of the California  
27 Valley Solar Ranch (CVSR) in San Luis Obispo County.

28           The conditional loan to SunPower was announced on April 12, 2011, and shortly thereafter

1 (April 30, 2011), the French oil conglomerate Total committed to buying a \$1.37 billion controlling  
2 stake (60%) in SunPower Corp — a bailout that was confirmed in June 2011. Now, SunPower  
3 never directly got the cash, because on the final closing of the GOVT loan guarantee, they sold the  
4 California Valley Solar Ranch to NRG Energy. However, SunPower continued on as the developer  
5 and Bechtel as the primary contractor building the project.

6 Also, to date, SunPower Residential, in 2013 and 2014, snagged 34 federal stimulus grants  
7 from the 1603 Program for “solar electricity” that ranges across 12 states, totaling over \$86 million  
8 tax dollars.

9 Other than Bank of America, both SunPower and NRG Energy have additional meaningful  
10 political connections to President Obama and other high-ranking Democrats, of which we’ve  
11 documented a few times: First in my October 2012 report (troubled green energy projects) and then  
12 in my February 2013 analysis on Citigroup, another CAP donor that is up next, which is a huge  
13 player inside this “climate” scam. Lastly, due to the fact that NRG Energy, a Fortune 500 and S&P  
14 500 Index company, of which they and their subsidiaries, initially, were the recipient of most of  
15 1705 stimulus loans: at least \$5.2 billion of taxpayermoney (now minus the \$1.4 billion for Project  
16 Amp). NRG Energy was one of George Soros’ timely investments that I mentioned at the beginning  
17 of this post, yet more Intel can be found in my March 2013 Green Corruption File.

18 #2) Citigroup (confirmed donor since 2012):

19 Since 2007, Citigroup has been heavily involved in “climate change activities.” We also can  
20 confirm that this “too-big-to-fail” bank has made a massive footprint inside President’s Obama’s  
21 clean-energy dirt — the candidate that Citigroup helped get elected in 2008 as the number seven top  
22 donor (PAC) with many executives and friends of Obama bundling for both his campaigns.  
23 Meanwhile, in 2012, Citi contributed to both President Obama and Mitt Romney.

24 By 2011 — prior to the presidential reelection — through their “50 Billion Climate Change  
25 Investment Initiative,” Citigroup had “directed \$36.35 billion into such initiatives so far...” — of  
26 which they brag: “In the U.S., Citi has the largest market share (28 percent) of U.S. Department of  
27 energy section 1703/1705 Loan Guarantee program financings for alternative energy, and we are  
28 the leader in such bond transactions.”

1           Considering that in February 2013, I dedicated an entire post to Cit and their Massive  
2 ‘Green’ Money Machine,” which included a careful analysis of their “2012 alternative energy  
3 portfolio” that lists about 37 transactions (plus SolarReserve) — both foreign and here in the United  
4 States, here I’ll just give some highlights.

5           What I found is that 58 percent (22) of Citi’s clients had received government subsidies,  
6 totaling approximately \$16 billion from the Plaintiff 42ayer-funded Green Bank of Obama, the  
7 majority from stimulus package. Furthermore, my research not only “followed the green money,”  
8 but profiled the Citi executives that operate (d) inside the White House, some with key positions,  
9 which included President Obama’s 2013 choice to replace Timothy Geithner for Treasury Secretary  
10 with Jack Lew (former Chief of Staff), Michael Froman, Richard Parsons, Louis Susman, and  
11 Michael Eckhart — to name a few.

12           Many of the alternative energy projects that Citi was involved are mentioned in today’s  
13 study, starting with the Energy Department’s junk bond portfolio, which were doled out between  
14 2009 and 2011:

- 15           • BrightSource Energy was awarded \$1.6 billion GOVT loan for the Ivanpah solar  
16 facility in California
- 17           • Brookfield Renewable Power, whereas Granite Reliable received a \$168.9 million  
18 loan for a wind project in New Hampshire.
- 19           • Caithness/General Electric received a \$1.3 billion GOVT loan for the Shepherds Flat  
20 wind project in Oregon
- 21           • NextEra Energy /First Solar got a \$1.46 billion loan for the Desert Sunlight project in  
22 California;
- 23           • SolarReserve was awarded \$737 million GOVT stimulus loan for the Crescent Dunes  
24 project in Nevada.

25           According to their renewable energy portfolio, Citi, in February 2011, became a major  
26 investor in SolarCity. And, as I documented earlier, SolarCity, so far (and since 2009) has been  
27 subsidized with “green” through various stimulus funds, grants and federal tax breaks at the tune of  
28 \$514 million.

1 Citigroup, as of 2010 was listed as SunPower’s bookrunner. Then in August 2011 SunPower  
2 and Citi set up a \$105 million fund for residential solar leasing projects, which states, “SunPower  
3 will use the fund to extend its SunPower Lease programme to customers in 8 US states, expanding  
4 the financing options available to homeowners interested in SunPower solar energy systems. The  
5 SunPower Lease is now available in Arizona, California, Colorado, Hawaii, Massachusetts, New  
6 Jersey, New York and Pennsylvania. Citi is contributing \$80m to the fund.” Again, I covered  
7 SunPower under Bank of America, showing that this solar firm was given plenty of green  
8 government subsidies:

9 In January 2010, SunPower Corp received four of the stimulus-enacted Section 48C Tax  
10 Credits totaling \$10.8 million.

11 In September 2011, SunPower is part of the \$1.2 billion stimulus loan to support the  
12 construction of the California Valley Solar Ranch (CVSR) in San Luis Obispo County.  
13 SunPower Residential, in 2013 and 2014, snagged 34 federal stimulus grants from the 1603  
14 Program for “solar electricity” that ranges across 12 states, totaling over \$86 million tax dollars.

15 #3) Goldman Sachs (possibly a donor since 2012):

16 Goldman Sachs was a top Obama donor in 2008, but we also know that two Goldman  
17 executives sat on Obama’s 2008 Finance Committee and a slew of partners, executives and board  
18 members bundled for, and donated to Obama’s 2008 campaign. Meanwhile, his administration has  
19 been infested with Goldmanites — even as early as 2008 when a Goldman board member, James A.  
20 Johnson (also an Obama bundler that I profiled many times due to his former firm Perseus), was  
21 chosen as head of Barack Obama’s vice presidential search team. Known as Jim Johnson and “a  
22 fixture of establishment Washington, with ties to Wall Street and “a major presence in Democratic  
23 politics for more than two decades,” Mr. Johnson resigned his VP vetting role amidst criticism over  
24 his part in the Countrywide Financial scandal as well as controversy surrounding his role as Fannie  
25 Mae’s chief executive from 1991 to 1999.

26 Even though in 2012, Goldman Sachs turned their back on Mr. Obama in 2012, there were  
27 many executives and board members that helped him get reelected.

28 Like Bank of America, I haven’t had the opportunity to examine Goldman Sachs’

1 Alternative Energy Group and its Environmental Markets financing and advisory; however, we do  
2 know that Goldman has been investing in renewable energy since at least 2005.

3 By 2014, Goldman Sachs “declared that the renewable sector is one of the most compelling”  
4 — even as they backed “green” in 2012, having committed \$40 billion to renewable energy (made  
5 and planned investments). According to Renew Economy, “Stuart Bernstein, who heads the bank’s  
6 clean-technology and renewables investment banking group, told Recharge in a recent interview in  
7 a story titled Goldman goes Green, ”It is at a transformational moment in time.”

8 As Goldman promotes President Obama’s Climate Action Plan along with other winners of  
9 clean-energy funds, they also brag about their climate change roles: “In 2012, we financed nearly \$2  
10 billion and co-invested more than \$430 million in the sector. We also served as financial advisor on  
11 clean-energy transactions valued at more than \$1.1 billion.”

12 Needless to say, since 2010, I’ve been following Goldman and tracking how this Big Bank  
13 has been cashing in on the stimulus funds. As my research developed, I found their DNA all over  
14 this green energy scheme, of which to date we can confirm that Goldman Sachs has an invested  
15 interest — via various roles, and having entered the scene at different junctures (before, during and  
16 after taxpayersubsidies were awarded), in many projects and firms that received loans, grants and  
17 special tax breaks. So far I’ve tracked at least 14 firms connecting Goldman to over \$8.5 billion  
18 from the Green Bank of Obama, the majority from the 2009-Recovery Act.

19 Keep in mind too, that Goldman is associated (former executives and investments) with the  
20 Big VC firm Kleiner Perkins as well as Generation Investment Management (GIM) — mentioned a  
21 few times already. As a reminder, Kleiner Perkins is where we find the “climate duo,” whose  
22 combined carbon footprint is larger than my entire city: Billionaires John Doerr and Al Gore  
23 (partners at the firm), where Doerr, “a very big-ticket Obama donor,” in January 2009, persuasions  
24 were reflected in the 2009-Recovery Act via his “meetings with Obama’s transition team and  
25 leaders in Congress” as well as the fact that he made “five recommendations to Congress and  
26 President-elect Barack Obama to jumpstart a green-tech revolution and fight global warming.”

27 Shortly thereafter (around February 6, 2009) and just days prior to signing the stimulus bill  
28 (February 18, 2009), Obama appointed Doerr as a member of his Economic Recovery Advisory

1 Board (PERAB), which later morphed into the president’s jobs council — only to close down in  
2 February 2013.

3           Meanwhile, back in 2004 Gore started GIM with former CEO of Goldman Sachs Asset  
4 Management David Blood, who is another Obama bundler. Apparently, Blood is the “wizard  
5 behind” GIM, and behind this “sustainable firm” are several former Goldman executives and  
6 partners — even as Doerr, in 2007, joined the GIM advisory board.

7           This and more insight were profiled in my January 8, 2013 file on Doerr and Gore, whose  
8 “Greentech Portfolio” (at least 50%) and GIM’s “Sustainable Investing” secured billions in loans,  
9 grants and special tax breaks — the two firms combined are tied to at least \$10 billion from the  
10 taPlaintiff 42ayer-funded Green Bank of Obama, the majority coming from the 2009-Recovery Act,  
11 of which Doerr had helped author.

12           As far as Goldman: first off they made big money from the sale of Horizon Wind Energy to  
13 Portugal’s EDP for \$2.5 billion in 2007, of which ironically, starting in 2009 until the end of 2012,  
14 EDP Renewables North America LLC (formerly Horizon Wind Energy LLC), received over \$700  
15 million of free taxpayermoney from the Obama stimulus bill (\$722,468,855 in Section 1603 Grants)  
16 for eleven wind projects, placing them at the number two spot of foreign firms that were winners of  
17 US grants. This was a shocking report released in early 2013 by the Energy and Commerce  
18 Committee, ePlaintiff 42osing the extent to which foreign corporations are benefiting from green  
19 energy stimulus funding.

### 20           **Goldman’s Green Losers, Winners, Biofuels, & Smart Grids**

21           Nevertheless, Goldman is credited as the “exclusive financial adviser” for the now bankrupt  
22 Solyndra (\$570.4 million loss), and in 2010, handled the IPO of what most deem a government  
23 winner, Tesla Motors that was awarded \$465 million from the GOVT ATVM program. Also,  
24 according to Goldman, “In May 2013, [they] helped raise over \$1 billion in new financing for Tesla  
25 Motors.”

26           There are more bankrupt ones as well: SpectraWatt (\$20.5 million), Nordic WindPower  
27 (\$8.6 million), and Suntech Power Holdings Co. (\$2.1 million) — all taking millions of  
28 taxpayermoney down with them, while Goldman remains unscathed.

1 Goldman is also active in advanced biofuels and feedstock companies, handling the IPOs of  
2 biofuel companies, of which at least two won money and contracts from the Obama administration:  
3 Amyris (\$25 million stimulus grant), Kior (seeking \$1 billion GOVT loan) and Solazyme (\$21.7  
4 million GOVT stimulus grant; plus part of the \$12 million biofuel contract with the U.S. Navy) —  
5 the latter company has its very own direct connection to CAP: Jonathan Wolfson, Solazyme co-  
6 founder and Chief Executive Officer, “is an active participant in many advisory groups, including  
7 sitting on the board of the Center for American Progress (CAP) Clean Tech Council.

8 Meanwhile, Goldman hooked up with another huge winner of stimulus funds: “In March  
9 2013, [they] served as lead-left bookrunner on the \$93 million initial public offering for Silver  
10 Spring Networks” — a Foundation Capital, Kleiner Perkins, and Google (all with friends in the  
11 White House) green investment, which in 2009, cashed in big time when the GOVT starting  
12 handing the smart-grid grants as part of the 2009-Recovery Act. During the course of my January  
13 2013 analysis on Silver Spring, I found that 30 percent of the \$4.5 billion stimulus smart-grid grants  
14 went to their “customers” — that’s over \$1.3 billion. Then in my May 2013 report, “Smart Grid,  
15 Dirty Devices”, I documented additional ties and an interesting analysis of its IPO: “Silver Spring  
16 IPO has more red flags than a Communist Party military parade,” PrivCo CEO Sam Hamadeh.

### 17 **Goldman’s Green GOVT Stimulus Loans**

18 Considering that First Solar is also a CAP Business Alliance Member (donor), we’ll  
19 ePlaintiff 42and on that solar firm later, but what is key here is that Goldman was an early investor  
20 in First Solar that snagged three large GOVT stimulus loans (over \$3 billion) — a story we’ve  
21 featured many times, starting with “The First Solar Three Billion Dollar Swindle.”

22 Still, Goldman was (is) also an investor in U.S. Geothermal that in February 2011, landed a  
23 \$97 million GOVT stimulus loan slated to build a 22-megawatt power plant in the eastern Oregon  
24 desert. This was — one of the first geothermal projects funded by the GOVT, despite the fact that in  
25 December 2010, S&P had rated this loan as non-investment grade. Yet, the “2012 Internal GOVT  
26 Email Dump” prove that this deal was rushed and approved in time for a POTUS photo op.  
27 Moreover, U.S. Geothermal had other projects that snagged millions in green energy subsidies.

28 Then in September 2011, Cogentrix of Alamosa, LLC (Cogentrix Energy a subsidiary of

1 Goldman Sachs), was awarded a \$90.6 million GOVT stimulus loan for the Alamosa Solar  
2 Generating Project in Colorado. Cogentrix, on July 16, 2012 bagged a \$34.6 million stimulus grant  
3 (free taxpayermoney) from the 1603 Grant Program — I’m assuming this is for the same project.

4 But that’s not all....

5 **BrightSource Energy Just Got Darker**

6 According to Renew Economy (January 2014), “[Goldman] has also a substantial  
7 investment in BrightSource Energy,” which actually brought its Ivanpah solar power facility into  
8 full production last month — and if not for a federal loan guarantee, the \$2.2-billion project would  
9 have never seen the light of day. Now this massive solar power plant (struggling to produce power)  
10 has become the “\$2.2 Billion Bird-Scorching Solar Project” — with even the left-leaning Los  
11 Angeles Times, chronicling their grand opening like this:

12 After nearly four years of construction that killed desert tortoises, burned the feathers off  
13 passing birds and mowed down thousands of acres of native flora, Ivanpah officially opened last  
14 month with a gala that included a rock band and a horde of dignitaries — Energy Secretary Ernest  
15 Moniz among them.

16 We’ve been uncovering BrightSource Energy’s \$1.6 billion shady GOVT deal since July 6,  
17 2012, and as new information became available we’ve revisited this huge solar transaction several  
18 times. In short, the Ivanpah Solar Electric Generating System (SEGS) in California was subsidized  
19 with a  
20 \$1.6 billion GOVT stimulus loan, which was announced on February 22, 2010 and finalized April  
21 11, 2011 — a project that also received special treatment by the Department of Interior, which was  
22 documented in Plaintiffs “2012 Special Seven Series.”

23 Still, BrightSource investors not only include Goldman Sachs, but additional 2008 Obama  
24 donors such as Google, Morgan Stanley, and BP Alternative Energy. Meanwhile the Ivanpah  
25 project incorporates a slew of ties to President Obama as well as Vice President Joe Biden and  
26 Senator Harry Reid. This story comprises of big donors, political cronies and connections such as  
27 BrightSource, VantagePoint, Google, NRG Energy, PG&E, Goldman Sachs, Citigroup, George  
28 Soros, the former Commerce Secretary John Bryson, McBee Strategic Consulting, lobbyists Bernie

1 Toon, and others — with GOVT officials, Obama’s Green Team, and several in Congress from the  
2 Democrat side involved.

3 While I briefly addressed Citigroup’s part in this billion-dollar deal in February 23, 2013  
4 (Ongoing — \$250mm IPO / Joint Bookrunner), it should be noted that just days after the  
5 finalization of the \$1.6 billion government loan, BrightSource had filed for and IPO, of which  
6 Goldman Sachs Group Inc., Citigroup Inc. and Deutsche Bank AG were leading the proposed  
7 offering. However, a year later, they canceled their IPO, and BrightSource CEO John Woolard  
8 (now former) told Gigaom.com that it was “because of the weak public markets, particularly for  
9 solar and greentech companies...” — of which, to date the IPO is still pending. Yet, we do know  
10 that Goldman has made equity investments in the solar developer BrightSource.

11 We also can confirm that additional political heavyweights have been hovering over this  
12 deal, starting with Bechtel (another big corporation with their hand in the stimulus) that constructed  
13 BrightSource’s Ivanpah project as well as the fact that sometime in October 2010, during the time  
14 of their GOVT loan review process, “NRG became the lead investor (\$300m) in Ivanpah solar  
15 project. In fact, as mentioned, this was one of the four (now three) large taPlaintiff 42ayer-funded  
16 stimulus projects that NRG Energy is part of.

17 **Side Note:** My March 22, 2013 file covers The Soros connection, its CEO David Crane, and  
18 more. My September 2013 post on BrightSource’s Top DC lobbyist (since 2009) gives more insight  
19 into other players inside this \$1.6 billion GOVT deal, such as VantagePoint, Google Inc, and  
20 PG&E, which included ongoing interaction and pressure from the heavyweight K Street firm  
21 McBee Strategic Consulting — another huge player inside this green energy scam. What’s key is  
22 that Steve McBee “reportedly wrote key provisions in the stimulus bill to open the spigot of green  
23 corporate welfare” — thus over 60 percent of his energy client list cashed in under the Obama  
24 administration.

25 Lastly, in November 2013, we unleashed BrightSource’s connection to Senator Harry Reid  
26 as well as the incriminating “2012 Internal GOVT Email Dump” relevant to this particular GOVT  
27 transaction.

28 What’s key here is that BrightSource Energy has never been solid. In fact, the “Oakland-

1 based BrightSource Energy Inc. had emerged from the bankruptcy of its parent company.” Now I’m  
2 assuming this was out of the ashes of BrightSource Industries (Israel) Ltd. that was formerly known  
3 as LUZ II Ltd., and changed its name in December 2008.

4 Nevertheless, according to Schweizer in Throw Them All Out, as he described the financial  
5 issues they were having, “BrightSource badly needed this infusion of taxpayercash.” So in essence  
6 this \$1.6 billion stimulus GOVT deal was a bailout, which is a clear violation of the American  
7 Recovery and Reinvestment Act of 2009 — a fact that we elaborated on many times.

8 **Goldman: SolarCity, SunEdison & SunRun**

9 According to Renew Economy (January 2014), “Goldman Sachs also provided \$500 million  
10 of finance to SolarCity, to allow the biggest solar installer in the US to ePlaintiff 42and its solar  
11 leasing business. Goldman is one of a number of banks to do that — the latest was Bank of  
12 America/Merrill Lynch.”

13 Goldman, in 2012, also handled the IPO for SolarCity — the solar firm I first highlighted  
14 under the Podesta Group (became a 2012 client) and ePlaintiff 42anded upon under Bank of  
15 America, noting that SolarCity was not only in line to receive a loan from the Energy Department,  
16 but as documented earlier, SolarCity, so far (and since 2009) has been subsidized with “green”  
17 through various stimulus funds, grants and federal tax breaks at the tune of \$514 million. We’ll  
18 keep watching...

19 There is also SunEdison LLC — a global provider of solar-energy services — which was  
20 also an early Goldman Sachs investment. Due to the fact that this solar firm also became a client the  
21 Podesta Group in 2012, I covered the fact that in 2013, SunEdison won 5 federal stimulus grants  
22 from the 1603 Program for “solar electricity” that ranges across 5 states, totaling over \$1.8 million  
23 tax dollars.

24 Furthermore, SunEdison is in cahoots with JPMorgan, GE Capital as well as Southern  
25 Company and a few other familiar green energy players and CAP donors such as Bank of America,  
26 Duke Energy, and First Solar.

27 Just last month, the Wall Street Journal reported, “Sunrun Inc., a company that finances and  
28 installs home solar projects, has retained Goldman Sachs to raise a growth equity round of more

1 than \$100 million, according to a person familiar with the situation.”

2 SunRun can be found in my May 2012 research on Foundation Capital — another friend of  
3 the Obama White House and big VC winner of taxpayer money from the Green Bank of Obama,  
4 adding to my long list of Big VC’s that have had made out like bandits. As of October 2013 , I  
5 found that SunRun, between 2011 and 2013, snagged 23 federal stimulus grants from the 1603  
6 Program for “solar electricity” that ranges across 10 states, totaling over \$141 million tax dollars,  
7 thus far.

8 Plus in 2010, SunRun announced a \$100 million joint program with major utility Pacific Gas  
9 & Electric, which according to Venture Beat, “PG&E will be funding the rooftop systems in  
10 question via its subsidiary, Pacific Energy Capital II, a tax equity fund,” of which “In lieu of  
11 traditional returns, the investor — PG&E in this case — gets tax benefits in addition to some cash  
12 returns.”

13 **#4) Covanta Energy (confirmed donor since 2012):**

14 This was one of those Soros timely investments (twelve alternative energy and utility  
15 companies) that I had alluded to in the beginning of this post and exposed in my March 2013 Green  
16 Corruption File. I found that Covanta, a clean-energy company and the recipient of federal stimulus  
17 grants, also received millions in 2010 through Congressional earmarks, yet it is unclear as to how  
18 many green government subsidies or the exact stimulus dollar amount that Covanta Energy  
19 snagged. Also, Covanta Energy stands to benefit from the NAT GAS Act if it comes to light again.

20 **#5) General Electric (confirmed donor since 2011):**

21 General Electric (GE) is a heavy donor to both Republicans and Democrats, and its CEO  
22 Jeffrey Immelt “plays the role of typical corporate donor who hedges his bets on both sides of the  
23 fence.” However in 2008, GE gave the Obama campaign \$529,855, marking them as a top Obama  
24 donor.

25 Meanwhile, in early 2009, Immelt was first appointed as a member of Obama’s Economic  
26 Recovery Advisory Board (PERAB), which later morphed into the president’s jobs council, where  
27 Immelt served as the Jobs Czar, until it closed down in February 2013.

28 Nevertheless, GE is a major player on the clean-energy scene as well as in this green energy

1 scheme, starting with the fact that they were also part of the GOVT’s Electricity Advisory  
2 Committee that had influence into the 2009-Recovery Act. In 2009, the New York Times  
3 recognized GE’s green power, noting, “GE lobbied Congress to help ePlaintiff 42 and the clean-  
4 energy subsidy programs, and it now profits from every aspect of the boom in renewable-power  
5 plant construction, including hundreds of millions in contracts to sell its turbines to wind plants  
6 built with public subsidies.”

7 I’ve been keeping track of GE’s “green tab” since 2012, which at that time exceeded \$3  
8 billion in direct (some indirect) taxpayer cash. This tally includes three large stimulus loans from  
9 Energy Department’s junk bond portfolio that were doled out between late 2010 until September  
10 2011.

11 Considering the treasure trove of Intel found in the “2012 Internal GOVT Email Dump,” I  
12 revisited GE in my December 2012 post. Long story short, in October 2010, the Caithness  
13 Shepherds Flat wind project located in eastern Oregon was awarded a \$1.3 billion GOVT stimulus  
14 loan — a \$2 billion project sponsored by GE, who also supplied the project with 338 wind-turbines.  
15 These internal emails show that this transaction was approved with White House pressure. For  
16 example:

17 September 9, 2010 EMAIL: James McCrea (subject line: Shepherds Flat — Draft Responses  
18 to OMB Questions), “As you all know, the pressure to make decisions on this transaction are high  
19 so speed of the essence.” Then later that day, McCrea writes (Email #4 from Appendix I) he says,  
20 “Pressure is on real heavy on SF [Shepherds Flat] due to interest from VP.”

21 Shepherds Flat’s developers also received “a \$500 million federal grant, state tax credits  
22 totaling \$18 million, accelerated depreciation on federal and state taxes worth \$200 million, and a  
23 premium for its power from the state worth \$220 million.” At some point, the Shepherds Flat wind  
24 farm received three separate tax credits totaling \$30 million from the state of Oregon.

25 But there’s more...

26 In September 2011, the poorly rated 1366 Technologies, sponsored in part by GE, received a  
27 direct \$150 million stimulus loan from the GOVT for its solar manufacturing plant.

28 GE is also part of the \$1.2 billion GOVT stimulus loan for the Desert Sunlight project,

1 which was finalized in September 2011. This is part of the First Solar Swindle that has been  
2 mentioned a few times in this post, and will be detailed later.

3 Federal Railroad Administration (FRA) loaned \$54.6 million to Kansas City Southern  
4 Railway Company (KCSR) “to purchase thirty new General Electric ES44AC diesel-electric  
5 locomotives” — a loan that raised red flags in the March 2012 House Oversight investigation.

6 Also, you’ll be “blown away” by the billions of “wind energy grants” that flew out of the  
7 stimulus package back in February 2010, of which at that time, GE was contracted to at least 26%  
8 of them as the “Turbine Manufacturer.”

9 In late 2009, it was reported by Gigaaom, “GE is one of the newer smart meter players, but  
10 the conglomerate has been working with utility Oklahoma Gas & Electric on a 6,600 smart meter  
11 trial, and has a contract with PHI, which received \$104.80 million for a smart meter deployment in  
12 Washington, DC. GE also has a big contract with Florida Power and Light” that also the recipient of  
13 a \$200 million stimulus grant.

14 Other than bagging direct green energy stimulus money, GE has also joined forces with  
15 others that have benefited from Obama’s alternative-energy taxpayerfunds. Two in particular — the  
16 Advanced Metering Partners, another John Doerr “venture” via Silver Spring Networks, as well as  
17 Energy Technology Ventures formed in 2011 with NRG Energy and ConocoPhillips. And, I’m sure  
18 if were to visit GE again, we’d find much more than \$3 billion in green energy funds.

19 **#6) Google (confirmed donor since 2012):**

20 Google, like Wall Street and Big Energy, plays the political game well: it’s all about access  
21 and influence, starting with campaign contributions. Google’s \$814,540 contribution to then-  
22 Senator Obama’s campaign made it the fifth largest donor in 2008, and in 2012 moved up to the  
23 number three spot with a whopping \$805,119. Furthermore, Google’s CEO at the time, Eric  
24 Schmidt, served as an informal advisor to President Obama. Schmidt, Google Executive Chairman,  
25 was also an Obama donor in 2008, and since April 2009, is (was) a member of the president’s  
26 Science and Technology Advisory Council (PCAST).

27 Another Google political connection is Dan Reicher, director of climate and energy  
28 initiatives at Google, who was one of the founders of Cleantech and Green Business Leaders for

1 Obama. There are other interesting folks behind the Google scenes such as John Doerr and Al Gore  
2 — the dynamic climate duo mentioned periodically in this post — who has served as a member of  
3 Google’s board of directors since May 1999, with Gore as a (past) senior advisor.

4 And according to Michelle Malkin, “Google cofounder Sergey Brin, Chief Legal Officer  
5 and Senior Vice President David Drummond, and Google Vice President and Chief Internet  
6 Evangelist Vint Cerf are all vocal Obama supporters and top donors.” Meanwhile, Google co-  
7 founders Sergey Brin & Larry Page, invested in Tesla Motors, while Google, in 2011, partnered  
8 with SolarCity (mentioned a few times now) to create a \$280 million fund for residential solar  
9 projects — both BIG winners of “green” taxpayermoney.

10 Like many of these Big VC’s that won a significant amount of green money from the  
11 Obama administration — Kleiner Perkins, Khosla Ventures, The Westly Group, VantagePoint  
12 Capital Partners, Google Ventures, Foundation Capital, and others — their “cleantech investments”  
13 overlap, and I briefly touched on Google in my January 2012 post about Doerr and Gore.

14 Later, I documented Google as energy client of McBee Strategic Consulting (in my  
15 September 2013 Green Corruption File), discovering and ePlaintiff 42osing the fact that Google  
16 Ventures — via their “Energy Investments” and other “green deals” that I tracked down at that time  
17 — has ten verified stimulus and other green energy money winners, which places their investment  
18 score at close to \$5 billion of taxpayercash, which includes three GOVT loans: BrightSource  
19 Energy (\$1.6 billion); GE’s Caithness Shepherds Flat wind project (presented under GE for \$1.3  
20 billion); and Tesla Motors that won \$465 million ATVM loan. If you add in Silver Spring  
21 Networks’ customers that won \$1.3 billion in smart-grid stimulus grants, which I divulged here a  
22 few times, that figure rises to \$6.3 billion and counting.

23 **#7. PG&E (confirmed donor since 2011):**

24 This utility giant is a strong Obama and Democrat donor that happens to be all over this  
25 “green” scam. Not only did they have direct influence over the GOVT loans, they are jam-packed  
26 with Washington “green cronies,” including Cathy Zoi, who is the “most controversial former  
27 PG&E employee to hold an influential government.” Zoi, an Al Gore acolyte was a GOVT Insider  
28 from 2009 until 2011, and she is not only tied to PG&E but other stimulus winners.

1 Still, PG&E was another client of the top DC lobbyist, McBee Strategic Consulting, of  
2 which I divulged in my September 2013 Green Corruption File. As reported by the Washington  
3 Free Beacon in 2012, “PG&E has become an aggressive buyer of power supplied by solar, wind,  
4 and other renewable sources, in large part due to statutory requirements under California’s  
5 Renewable Portfolio Standard, which mandated that 20 percent of the utility’s electricity come from  
6 renewable sources by 2010 — and 33 percent by 2020.”

7 The big win for this huge energy corporation is that they have an invested interest in seven  
8 Energy Department stimulus loans worth \$7.6 billion. Moreover, with the exception of  
9 BrightSource Energy’s \$1.6 project, of which we now know from an email Dated January 4, 2010,  
10 that Peter Darbee, then CEO of PG&E, had himself spoken to President Obama about this deal, the  
11 rest of the loans were finalized between June and September 2011. While the details into these  
12 taPlaintiff 42ayer-funded projects can be found in my April 2013 post, here’s an overview.

13 Agua Caliente Solar Power Project located in Yuma, Arizona, of which “PG&E will  
14 purchase the project’s power and deliver it to customers in California.” Project by NRG Solar: \$967  
15 million loan guarantee

16 BrightSource Energy development located in Baker, CA, of which “electricity from the  
17 project will be sold under long-term power purchase agreements with Pacific Gas & Electric and  
18 Southern California Edison Company (SCE).” Project by NRG Energy, Inc. (BrightSource): \$1.6  
19 billion loan guarantee

20 California Valley Solar Ranch of which the 250-megawatt is under construction in eastern  
21 San Luis Obispo County, and “is generating clean, reliable solar power for transmission over  
22 PG&E’s utility grid.” Project by NRG Solar and SunPower is still involved: \$1.237 billion loan  
23 guarantee

24 Desert Sunlight Project located in Riverside, CA, with the PPA (purchase power agreement) listed  
25 as Southern California Edison and PG&E. This is a First Solar Project that is co-owned by NextEra  
26 Energy Resources, GE Energy Financial Services, and Sumitomo Corporation of America: partial  
27 guarantee of \$1.46 billion

28 Genesis Solar Energy Project located in Riverside County, CA of which “power from the

1 project will be sold to Pacific Gas and Electric Company.” Project by NextEra Energy Resources,  
2 LLC: partial guarantee of \$852 million loan

3 Mesquite Solar 1, LLC located in Maricopa County, AZ, of which Bloomberg News had  
4 reported at the time the GOVT loan was approved, “Sempra will sell electricity from the Mesquite  
5 Solar 1 plant to California’s largest utility, PG&E Corp., under a 20- year contract.” Project by  
6 Sempra Mesquite: \$337 million loan guarantee

7 Mojave Solar located in San Bernardino County, CA, of which at the time of the GOVT  
8 loan approval (September 2011), “Abengoa signed a power-purchase agreement with PG&E to buy  
9 the energy produced by the project for a period of 25 years.” Project by the Spanish firm Abengoa  
10 Solar, Inc.: \$1.2 billion loan guarantee

11 Meanwhile, my May 2013 “Smart Grid, Dirty Devices” divulges PG&E’s partnership with  
12 Silver Spring Networks on many fronts (PG&E is their top customer). Silver Springs is the the  
13 lucky smart-grid technology company that I mentioned earlier, who has an array of White House  
14 connections — Foundation Capital, Kleiner Perkins and Google — and as of January 2013 is linked  
15 to at least \$1.3 billion in smart-grid stimulus grants.

16 But there’s more...

17 PG&E won a significant amount of stimulus money for various projects, of which last year I  
18 found at least seventeen that added up to over \$55 million of tax dollars.

19 PG&E also bagged at least four stimulus 1603 grants in 2012 and 2013 (for fuel cell,  
20 hydropower and solar) totaling \$127.2 million.

21 SolarCity and SunRun, who both won large sums of stimulus money (duly noted in this  
22 post), are in cahoots with P.G.&E. Corporation, the California utility holding company’s tax-equity  
23 fund to finance residential solar installations.

24 CAP’S 2011 & 2012 DONORS: Clean-Energy Money Winners (referred to as “American  
25 Progress Business Alliance Members”)

26 **Energy/Utilities**

27 **#8) American Electric Power (AEP):**

28 While I found that AEP (between 2009 and 2010) was awarded at least four stimulus grants

1 totaling \$740 million, which was detailed in my March 2013 Green Corruption File, there is more to  
2 share. According to Schweizer’s bombshell book, “in the first quarter of 2009, Soros made an initial  
3 purchase of more than 1.5 million shares in American Electric Power (AEP), a utility company that  
4 invested heavily in an energy project called FutureGen.”

5 This was a project that had been abandoned by the Bush administration; however, on June  
6 12, 2009, the Obama administration revived FutureGen: “a federal-industry partnership that would  
7 build an advanced coal-burning power plant in Illinois to trap and store carbon dioxide emissions.”  
8 After Obama took office, he not only restarted FutureGen with \$1 billion from the stimulus  
9 package, but he moved the project to Meredosia.

10 The FutureGen Industrial Alliance “was formed to partner with the U.S. Department of  
11 Energy on the FutureGen project.” At that time it was a consortium of major coal and utility  
12 companies such as American Electric Power Co. Inc. and Peabody Energy Corp. Just thirteen days  
13 later, both AEP and Southern Co withdrew from the U.S.-government backed FuturGen project.

14 Despite ongoing drama, cost overruns and delays, as well as potential air pollution and other  
15 matters; back in February 2013, the FutureGen project was moving forward. While AEP was gone,  
16 we did find Ameren Corp (another Soros timely investment) along the way. Currently the  
17 FutureGen Industrial Alliance includes Alpha Natural Resources, Joy Global Inc, Peabody Energy,  
18 Xstrata Coal Pty Limited, and another CAP corporate donor, Anglo American (up next).

19 **#9) Anglo American (confirmed donor since 2012, listed under energy/utility):**

20 As detailed above, Anglo American, “one of the world’s largest mining companies, is  
21 headquartered in the UK and listed on the London and Johannesburg stock exchanges,” is now part  
22 of the FutureGen project funded with green energy funds. This past January, the Energy Department  
23 “gave the long-planned FutureGen clean-coal project one of the final OKs [and \$1 billion] it needs  
24 to start building,” announced the Daily Journal.

25 According to most reports, “If all goes according to plan, the FutureGen project should be  
26 fully operational by 2017 and continue commercial operations for at least 20 years.”

27 **#10) Constellation Energy:**

28 Again, this is one of those twelve alternative energy and utility companies that another Soros

1 had invested in shortly having helped craft the 2009 stimulus package that I had alluded to in the  
2 beginning of this post (exposed in my March 2013 Green Corruption File). I found that  
3 Constellation, an Exelon Company, which is labeled as “the president’s utility,” was another top  
4 2008 Obama donor and big winner of “green” funds. Constellation received a \$200 million stimulus  
5 grant, of which since they are (were) the parent of Baltimore Gas and Electric Co, I’m assuming the  
6 \$200 million smart-grid grant (awarded in October 2009) that went to BGE is the one Schweizer  
7 had mentioned in his book (unless they got another \$200 million for something else).

8           Moreover, according to the Washington Free Beacon, “Constellation is one of the most  
9 prolific providers of green energy to federally owned facilities, sporting contracts with the General  
10 Services Administration (GSA) for the U.S. Capitol building, the Federal Reserve, the Smithsonian  
11 Institution, the United Nations building in New York, and a host of federal buildings in several  
12 states.”

13           **#11) Dow Corning (Silicone Manufacturing/Solar):**

14           In January 2010, two manufacturing tax credits were awarded from the 48C stimulus-created  
15 program for solar projects in Michigan. The tax credits included “\$141.9 million for Hemlock  
16 Semiconductor’s (a joint venture of Dow Corning Corporation and others) ePlaintiff 42ansion of its  
17 Michigan polycrystalline silicon operations, and \$27.3 million for a monosilane plant Dow Corning  
18 is building.”

19           By 2012, Hemlock Semiconductor announced that they “were postponing three of the four  
20 phases of their \$1.2 billion plant in Tennessee,” of which the state of Tennessee had committed  
21 \$245 million to Hemlock — some of which was stimulus funds. In 2013, the company began laying  
22 off hundreds of workers at their Clarksville plant — even 100 were from their facility in Michigan  
23 (March 2013), and 50 more in May 2013. With the future of their plants unknown, “Dow Corning  
24 Corp. announced [November 2013] that it is acquiring a bigger stake in Hemlock Semiconductor.”  
25 So, here we have two more failing stimulus-funded projects that we need to watch — and a CAP  
26 donor ta boot.

27           **#12) Duke Energy:**

28           As duly noted, Duke Energy — the nation’s largest electric power company — has been a

1 client of the Podesta Group since 2009. Jim Rogers, the chairman of Duke Energy, is another  
2 Obama donor, who was a major player at the 2012 Democratic convention, as a contributor,  
3 creditor, host, and even a speaker.

4 While Duke Energy is worthy of additional scrutiny, my January 2013, Big Wind Story  
5 documented that in 2011, Duke Energy was the recipient of a \$22 million grant from the GOVT’s  
6 ARPA-E advanced energy research program that was funded by the 2009 stimulus package. This  
7 was “to design, build and install large-scale batteries to store wind energy at one of its wind farms  
8 in Texas.”

9 Then in May 2013 (previously dated June 2010), Notrees Windpower — a project of Duke  
10 Energy located in Texas — was handed a stimulus grant from the 1603 Program for \$103.6 million.  
11 And after a quick glance, I found three 1603 stimulus grants for Duke Energy Carolinas, LLC that  
12 were dished out in 2012 and 2013, totaling over \$62 million for “hydropower” and “solar  
13 electricity.” Duke Energy was also privy to the “smart” money as well — in 2009, the GOVT  
14 awarded Duke Energy a \$200 million stimulus smart-grid grant to support projects in the Midwest.

15 **#13) Enel Green Power North America:**

16 In July 2012, Enel Green Power, through its US subsidiary Enel Green Power North  
17 America Inc., was awarded a grant for approximately \$99 million from the 2009-Recovery Act  
18 1603 grant program for the construction of the Caney River wind farm in Kansas. The Caney River  
19 and the Rocky Ridge wind farm project includes J. P. Morgan as well as Wells Fargo Wind  
20 Holdings LLC and Metropolitan Life Insurance Company.

21 **#14) First Solar (Solar Manufacturing and possibly a 2011 donor):**

22 As I’ve alluded to many times in this post and others, First Solar has considerable ties to the  
23 Obama administration, starting with the fact that this solar firm was an early investment of  
24 Goldman Sachs, the Wall Street giant mentioned above as a CAP corporate donor since 2012  
25 (maybe sooner).

26 In the mix we find another First Solar investor — Generation Investment Management  
27 (GIM), which as you know, is Al Gore’s sustainability firm tied to many green energy deals. Along  
28 the way we find a myriad of Obama billionaire cronies (donors and bundlers) that were also

1 investors in First Solar: Ted Turner, Paul Tudor Jones, Whitney Tilson, David Shaw, as well as the  
2 fact George Soros bought First Solar stock sometime in late 2007, until about May 2011, as  
3 recorded at GuruFocus.com.

4 Prior to the \$3 billion in GOVT stimulus loans, in 2010, First Solar snagged \$16.3 million  
5 “to ePlaintiff 42and its manufacturing facility to produce fully completed thin-film solar modules,”  
6 in Ohio, which was part of the 2009-Recovery Act via the GOVT / Treasury, Clean Energy  
7 Manufacturing Tax Credits (48C). According to reports, “The Ohio Department of Development  
8 also lent First Solar \$5 million, and the state’s Air Quality Development Authority gave the  
9 company an additional \$10 million loan” — marking First Solar’s Ohio facility as taPlaintiff  
10 42ayer-funded with over \$30 million.

11 But it gets better: First Solar, in 2011, “also scored \$547.7 million in loan guarantees [by the  
12 controversial taxpayerfunded ePlaintiff 42ort-Import Bank (Ex-Im)] to subsidize the sale of solar  
13 panels to solar farms abroad,” as documented by Veronique de Rugy (senior research fellow at the  
14 Mercatus Center) in her stunning assessment of GOVT’s Loan Program. Ms. de Rugy goes on,  
15 “More troubling is the fact that some of the Ex-Im money [\$192.9 million] went to a Canadian  
16 company named St. Clair Solar, which is a wholly owned subsidiary of First Solar, meaning that the  
17 company received a loan to buy solar panels from itself.”

18 This Ex-Im transaction even hits closer to CAP, starting with Carol Browner — CAP fellow,  
19 former GOVT insider, and Al Gore’s pal — who is sits on (and has for a while) the Advisory  
20 Committee of the ePlaintiff 42ort-Import Bank.

21 Still, the Daily Caller last month, unearthed another alarming connection: “[First Solar] is  
22 not only listed as a CAP donor, but has also been listed as a client of the Albright Stonebridge  
23 Group (ASG) in 2011 — a lobbying firm founded by former Clinton Secretary of State Madeleine  
24 Albright. ASG is also listed as a CAP donor.”

25 And, it gets better, as reported in The DC...  
26

27 Coincidentally, ePlaintiff 42ort-Import Bank President Fred Hochberg has spoken annually at CAP  
28 since 2011 — the same year First Solar got its loan. It is unknown whether the solar company was

1 also a CAP donor at the time.

2           When Hochberg spoke at the progressive think tank in 2012, he mentioned that Alice  
3 Albright was in attendance — Madeleine Albright’s daughter and the Ex-Im’s chief operating  
4 officer from 2009 to 2013. Hochberg spoke on June 25 and First Solar was awarded \$57.3 million  
5 in financing on July 18.

6 In 2011, Hochberg spoke on June 15 and, just over a week later on June 23, Ex-Im awarded First  
7 Solar millions more in financing. That year the Plaintiff 42ayer-backed ePlaintiff 42ort bank  
8 awarded First Solar nearly \$573 million to make their products more competitive abroad and boost  
9 their sales — most of that financing came after Hochberg gave his speech. First Solar Vice  
10 President Frank de Rosa was likely bundling donations for Obama’s reelection campaign around  
11 this time.

12           Nevertheless, the big money came from the Energy Department: First Solar, an Arizona-  
13 based manufacturer of solar panels, in August and September 2011, won three 1705 GOVT “junk  
14 rated” stimulus loans totaling over \$3 billion. Marita Noon and I first covered the “First Solar  
15 Swindler” in the summer of 2012, which began by documenting how seven solar companies  
16 received fast-tracked approval by the Department of the Interior (DOI) to lease federal lands in a  
17 no-bid process:

18           Abengoa Solar, BrightSource Energy, First Solar, Nevada Geothermal Power, NextEra  
19 Energy Resources, Ormat Nevada, and SolarReserve.

20           Since then, we’ve tracked First Solar’s woes, which began since the finalization of these  
21 three large GOVT loan guarantees — projects, by the way, that were sold to more Obama “energy”  
22 cronies just after the taxpayerfunds were approved. However, First Solar remained involved in all of  
23 them.

24           **The Projects**

25           Exelon (Antelope Valley Solar Ranch): \$646 million stimulus loan

26           In September 2011, the same day that the Antelope Valley Solar Ranch, located in  
27 California, received a GOVT loan guarantee for \$646 million, Exelon Corp. purchased it. First  
28 Solar, which developed the project, is still actively involved. The AVSR1 project, by the way, is

1 ePlaintiff 42ected to create 350 constructions jobs and 20 permanent jobs.

2 The Chicago-based Exelon Corp, a big Obama donor and labeled as “The President’s  
3 Utility,” by itself is a huge piece of the Green Corruption scandal, which I have alluded to in the  
4 past and a another piece of the scandal in the works.

5 **NextEra Energy Resources, LLC (Desert Sunlight): \$1.46 billion stimulus loan**

6 The California Desert Sunlight, in September 2011 — again the same day that this project  
7 received \$1.46 billion offer for a partial loan guarantee from the GOVT — was sold to NextEra  
8 Energy Resources, LLC, the competitive energy subsidiary of NextEra Energy, Inc. and GE Energy  
9 Financial Services. Yet, the September announcement also stated, “First Solar will continue to build  
10 and subsequently operate and maintain the project under separate agreements.” Both CEO’s Jeffrey  
11 Immlet and Lewis Hay were featured in my “Green Five: Spreading the Wealth to Obama’s Ultra-  
12 Rich Jobs Council Members” series.

13 According to the GOVT, Desert Sunlight, which is ePlaintiff 42ected to create 550  
14 construction jobs and 15 permanent jobs for the plant’s operation, “will deploy commercially  
15 available First Solar Series 3 modules and is projected to achieve commercial operation by February  
16 28, 2015.”

17 **NRG Solar, LLC (Agua Caliente): \$967 million stimulus loan**

18 In August 2011, as the \$967 million GOVT loan guarantee for the Agua Caliente, located in  
19 Arizona, was announced, it was purchased from First Solar by NRG Solar, LLC, a subsidiary of  
20 NRG Energy. At that time it was noted that the First Solar will be providing the solar panels for this  
21 project, and that the plant, when completed, would supply power to PG&E.

22 According to the GOVT, the Agua Caliente project — considered another jobs creator with  
23 an ePlaintiff 42ected 400 construction jobs and 10 permanent jobs — “currently generates enough  
24 energy to power 49,600 households annually.”

25 Keep in mind that documented much earlier was Steve Spinner — the two-time Obama  
26 bundler GOVT advisor ( April 2009 to September 2010) turned CAP fellow (September 2010 to  
27 October 2011) — and his part in the First Solar deal making, which included advocacy for the at  
28 least the Antelope Valley project. Nevertheless, there are additional CAP players here, starting with

1 what The Nation revealed in May 2013:

2 José Villarreal — a consultant at the power-house law and lobbying firm Akin Gump, who  
3 ‘provides strategic counseling on a range of legal and policy issues’ for corporations — was on First  
4 Solar’s board until April 2012 while also sitting on the board of CAP, where he remains a member,  
5 according to the group’s latest tax filing.

6 **#15) First Wind**

7 In my January 2013 Big Wind Story — also a client of the top DC lobbyists McBee  
8 Strategic Consulting — I exposed a “twister of sweetheart deals” found in the Department of  
9 Energy’s junk bond portfolio, which included four risky wind projects. One of those was Kahuku  
10 Wind Power, LLC, a project of First Wind in Kahuku Oahu, HI, which in July 2010, was granted a  
11 \$117 million GOVT stimulus loan, estimated to create a whopping 200 jobs. And then on February  
12 3, 2012 this same project received a 1603 grant for over \$35 million [docket #2594 to \$35,148,839].

13 Sadly, in August 2012 a fire that destroyed First Wind’s battery storage facility (built by  
14 Xtreme Power) and sent toxic fumes into the air, which left ratepayers in the dark over costs and  
15 safety. And, it was reported on January 23, 2014 that “Xtreme Power ran out of cash and filed for  
16 bankruptcy,” — NOTE: Xtreme Power built the energy storage system for Duke Energy’s Notrees  
17 wind energy farm in Texas, another winner of stimulus funds, listed above.

18 The First Wind plan was to secure taxpayer money and then go public. Now they achieved  
19 their first objective with the help of U.S. taxpayers, because and as of July 2012, First Wind’s  
20 projects have also received over \$452 million in grants through the stimulus’ 1603 Program.

- 21 • First Wind’s Stetson Wind Farm in Maine — \$40,441,471
- 22 • Cohocton Wind Farm in New York, \$52,352,334
- 23 • Dutch Hill Wind Farm In New York, \$22,296,494
- 24 • Milford Wind Corridor Phase I In Utah; \$120,147,809
- 25 • Milford Wind Corridor Phase II In Utah, \$80,436,803
- 26 • Rollins Wind Farm In Maine; \$53,246,347
- 27 • Sheffield Wind Farm In Vermont, \$35,914,864
- 28 • Kahuku Wind Farm In Hawaii, \$35,148,839

- Steel Winds II Wind Farm In New York, \$12,778,75

However, in November 2010, Bloomberg announced, “First Wind Holdings Inc., the operator of wind-energy projects backed by D.E. Shaw & Co. and Madison Dearborn Partners LLC, said it withdrew its initial public offering because of unfavorable market conditions” that’s code for “weak demand.”

Speaking of IPO’s...

Within the House Oversight leaked emails that were unleashed late October 2012, more specifically the 350+ page Appendix II (“2012 Internal GOVT Email Dump”), we find that just months prior to the final approval of the Kahuka loan there was intense interaction within the GOVT regarding this transaction...

“Someone is pressing Jonathan [Jonathan Silver is the former Executive Director of the Loan Program Office] who is now pressing hard on the everyone as the sponsor has an IPO in the works.”

This and more can be found in my Big Wind Story, including a the fact the first-rate, high-powered political ties to First Wind are vast, starting with D.E. Shaw & Co, a New York-based investment firm that is a backer of First Wind Holdings Inc. (also an investor in First Solar). This was noted when I profiled Larry Summers from CAP — adding that, according to Peter Schweizer, “Larry Summers was part owner of First Wind.”

The founder of the hedge fund DE Shaw & Co., David Shaw, is a two-time Obama bundler, who employed Larry Summers before heading to the Obama White House, as the top economic advisor. It turns out that in 2011, according to BusinessInsider.com, Shaw, a computer scientist and computational biochemist, was “appointed by Obama to serve on the President’s Council of Advisors on Science and Technology.”

As revealed by Peter Schweizer, “another 42 percent of First Wind is owned by Madison Dearborn Partners, an investment firm with close ties [and friend of] to then-White House Chief of Staff Rahm Emanuel. The founder of the firm, David Canning, had been a bundler for George W. Bush. But he switched sides in 2008 and gave heavily to Obama. Madison Dearborn gave more to Emanuel’s congressional campaigns than did any other business.”

1 While the GOP found that “Julia Bovey, First Wind’s Director of External Affairs, was  
2 formerly Director of External Affairs for Obama’s Federal Energy Regulatory Commission (June  
3 2009 to June 2010),” there is much bigger fish here. All government backed green comes with a  
4 slew of lobbyists, and First Wind is no different — enter in Larry Rasky’s Lobbying Firm with ties  
5 to the top.

6 Larry Rasky, “a longtime confidant and campaign strategist” of Vice President Joe Biden,  
7 was also a 2012 Obama bundler, and since Obama took office, “Rasky has visited the White House  
8 at least 21 Times,” half of which were during the course of the GOVT loan review process  
9 (Data.gov, Accessed 7/18/12). Moreover, we know that in 2009, about the time the 2009-Recovery  
10 Act passed, First Wind retained lobbyists Rasky Baerlein Strategic Communications as well as  
11 Brownstein, Hyatt et al, who is primarily a Democrat donor, with some Republicans in the mix —  
12 and as of 2012, maintains the work of Rasky. .

### 13 **#16) General Motors (donor in 2011)**

14 As I divulged at the beginning of this post, General Motors (GM) — a CAP donor in 2011  
15 — was a client of the Podesta Group from 2010 until 2012. Even after the taxpayers bailed out  
16 General Motors in 2009 (over \$80 billion — \$17.5 billion under Bush and \$63.4 billion from  
17 Obama), of which we lost at least \$14 billion, green energy taxpayer money continues to subsidize  
18 the failed auto maker. This time, though, was for GM’s hybrid electric vehicle the Chevy Volt — a  
19 car that’s not doing very well.

20 What I’ve tracked so far is that starting in 2009 until recently, GM has bagged hundreds of  
21 millions of stimulus dollars ( \$471.6 million to be exact) to support the Chevy Volt as well as green  
22 car components, of which I’ll share the details when I dissect the CAP corporate donors.

23 According to the January 25, 2012 House Oversight Report...

24 The American Recovery and Reinvestment Act of 2009 (ARRA) appropriated \$2.4 billion  
25 for domestic production of batteries and components for electric cars. Of this, \$1.5 billion in grants  
26 were directed toward manufacturing the batteries, while the remaining \$900 million went to  
27 building new facilities or improving existing facilities to produce electric drive components. This  
28 included \$151.4 million to Michigan-based Compact Power, Inc., for production of lithium-ion

1 polymer battery cells for the GM Volt; \$105.9 million directly to GM for production of high-  
2 volume battery packs for the Volt; \$105 million to GM to construct facilities for electric drive  
3 systems; and \$89.3 million to Delphi Automotive Systems, a former division of GM, to ePlaintiff  
4 42and manufacturing facilities for electric drive power components.

5 Also, “buyers of the Volt will receive a federal tax credit of up to \$7,500 of per vehicle” as  
6 well as state tax credits.

7 Then, lo and behold, on December 12, 2013, Think Progress — CAP’s propaganda machine  
8 — announced, “Ford Motor Company and General Motors Company will receive a combined \$50  
9 million to support their respective manufacturing facilities that produce electric cars.” This was  
10 from the stimulus-created 48C Program, of which GM’s share was \$20 million for “its Detroit-  
11 Hamtramck Assembly Plant where the company manufactures Extended Range Electric Vehicles—  
12 Chevrolet Volts and the Cadillac ELR electric luxury coupe — along with internal combustion  
13 cars.”

14 **#17) Xcel Energy:**

15 What’s interesting is that Xcel Energy was in the loop with Cogentrix Energy, a subsidiary  
16 of Goldman Sachs, which in September 2011, snagged a \$90.6 million GOVT stimulus loan for the  
17 Alamosa Solar Generating Project. Then on July 16, 2012, Cogentrix bagged a \$34.6 million  
18 stimulus grant (free taxpayermoney) from the 1603 Grant Program — I’m assuming this is for the  
19 same project.

20 What’s interesting (see graph with Goldman Sachs stimulus loans) is that the partners  
21 involved in this project included utility Xcel Energy (XEL), which signed a 20-year contract to buy  
22 enough CPV power to supply electricity to 6,500 homes; and Amonix, the California-based  
23 company that will supply the CPV panels — Amonix (complete with Obama buddies) was  
24 subsidized with \$29.6 million of taxpayermoney before it went bankrupt in July 18, 2012. What a  
25 scam...

26 Also, according to MinnPost.com, in 2010, Minnesota’s Senator Al Franken visited  
27 Mulroy’s Body Shop “to highlight the use of federal stimulus funds in creating jobs and boosting  
28 the alternative energy economy.” It turns out that the owner had 174 solar panels installed on the

1 roof of his Nicollet Avenue body shop in South Minneapolis. And that “Minneapolis-based  
2 Solarflow Energy installed the system and is leasing the equipment to Mulroy’s under contract with  
3 Xcel Energy. The lease agreement also includes installation, maintenance and support. The federal  
4 stimulus funds deliver a grant-in-lieu of a 30 percent tax credit on the value of the installation to  
5 Solarflow.” Solarflow start-up was partially funded through an Xcel Energy Renewable  
6 Development Fund grant of \$1.5 million.

7         While Xcel was omitted from the \$3.4 billion in stimulus smart-grid grants in 2009, for their  
8 highly touted \$100 million “Smart Grid City” project in Boulder, Colorado did snag about \$24.2  
9 million in federal economic stimulus money for “Smart Grid” updates to the state’s power grid and  
10 customer meters. Still, Xcel Energy is slapping ratepayers with the bill: “In 2010, Xcel found itself  
11 asking Colorado regulators for permission to recoup \$44.5 million in rate increases, but the  
12 Colorado Public Utilities Commission only gave it \$27.9 million,” as documented by  
13 GreenTechMedia in 2012. And it seems that while they were seeking another \$16.6 million in 2012  
14 for their Smart Grid City mess, “The Colorado Public Utility Commission (recently) denied Xcel’s  
15 request to recover a big chunk of that \$45 million,” reported Smart Grid News in August 2013.

16         In closing...

17         What’s clear is that spending millions to elect the right president, while giving big money to  
18 other high-ranking politicians, pays big time. This game is played by also hiring high-powered  
19 lobbyists, while employing think tanks and organizations that have significant clout. Sadly, this is  
20 how crony capitalism works — more like corporate welfare, because this game is rigged for the  
21 ultra rich and huge corporations, screwing the taxpayer all the way to the bank. In the meantime,  
22 career politicians continue in power; thus fueling the never-ending corrupt cycle of political  
23 payback.

24         Along the way, what counts is either a position or connection (friends and family) inside the  
25 White House or a particular government department. It’s all about “access and influence” — thus  
26 those that play the game well are guaranteed millions, if not billions, of taxpayer money. It’s not for  
27 the feeble minded, the regular law-abiding citizen, nor the small business worthy of American  
28 taxpayers support.

1           **However, Americans have the power to vote the bums out and make it a FELONY for**  
2 **any politician, or their family members, to own stock market stocks or assets.**

3           In the Bay Area Elite arrogant asshole dynasties send their kids to Stanford University.  
4 Stanford puts the kids in asshole frat houses to train them to get away with rape and run  
5 monopolies. When they graduate they either go up the hill to Sandhill Road and start a venture  
6 capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-up  
7 or political campaign using money scammed from your parents pension funds. They only work with  
8 their frat buddies and insiders in a tribal 'old boys club' manner. They steal all the technology and  
9 markets they want because they control all of the tech lawyers and politicians via bribes and  
10 revolving doors. Stanford bosses keep all of this covered-up and covertly fund political campaigns  
11 to grease the wheels of political corruption. They then sexually extort some Stanford interns in  
12 Rosewood Hotel rooms, get the most 'trophy wife' ones pregnant, and start the cycle all over again.  
13 This is how “Silicon Valley” operates.

1  
2  
3 **EXHIBIT 42 - David Brock Can Kill You, And Destroy Your Democracy,**  
4 **With A Single Facebook Page**

5 - You may not have the right kind of education, technical savvy or psychology PhD to  
6 understand how this is possible but you know that Silicon Valley is doing something very, very bad  
7 to you..right?

8 [Michael Wade](#) reveals that the dealings that have been revealed between Cambridge  
9 Analytica and Facebook have all the trappings of a Hollywood thriller: a Bond villain-style CEO, a  
10 reclusive billionaire, a naive and conflicted whistleblower, a hipster data scientist turned politico, an  
11 academic with seemingly questionable ethics, and of course a triumphant president and his  
12 influential family. Facebook, Google and Netflix executives and venture capitalists set out to use  
13 their data to push their ideology and politics on the world using psychological tricks embedded in  
14 their media. You, and Congress, are not smart enough to see how they are doing it. The cow at the  
15 meat processing plant is not smart enough to see that, at the end of the week, a metal rod will be  
16 shot into his skull and he will be gutted. The public and the cow are both being harvested. One for  
17 their privacy, the other for their meat.

18 The public still buys devices with microphones and cameras on them. The public still uses  
19 sites and programs that you have to "log in" to so that you can be data-harvested. Cows can't read  
20 newspapers so they can be excused for not knowing that millions of cows before them were  
21 chopped up. The news tells the humans that all of the products of Silicon Valley spy on, and abuse  
22 them, yet the humans still keep using those products and buying those phones that are just glorified  
23 listening devices. One could argue that the humans are dumber than the cows because the humans  
24 seem to be incapable of considering the consequences of their digital actions even after being  
25 warned.

26 Much of the discussion has been on how Cambridge Analytica was able to obtain data on  
27 more than 50 million Facebook users – and how it allegedly failed to delete this data when told to  
28 do so. But there is also the matter of what Cambridge Analytica actually did with the data. In fact

1 the data crunching company’s approach represents a step change in how analytics can today be used  
2 as a tool to generate insights – and to exert influence. They proved that Facebook has a file on every  
3 American.

4 For example, pollsters have long used segmentation to target particular groups of voters,  
5 such as through categorizing audiences by gender, age, income, education and family size.  
6 Segments can also be created around political affiliation or purchase preferences. The data analytics  
7 machine that presidential candidate Hillary Clinton used in her 2016 campaign – named "Ada" to  
8 target groups of eligible voters in the same way that Barack Obama had done 4 years previously. In  
9 fact Google and Facebook manipulated culture, the internet and elections and pretty much, **alone**,  
10 illicitly put Obama in the White House in exchange for Quid Pro Quo.

11 Cambridge Analytica was contracted to the Trump campaign and provided an entirely new  
12 weapon for the election machine. While it also used demographic segments to identify groups of  
13 voters, as Clinton’s campaign had, Cambridge Analytica also segmented using [psychographics](#). As  
14 definitions of class, education, employment, age and so on, demographics are informational.  
15 Psychographics are behavioral – a means to segment by personality.

16 Huge numbers of kids have committed suicide because of posts on Facebook. This is widely  
17 reported. What is not widely reported is that huge numbers of adults have committed suicide  
18 because of organized attacks on them operated by Media Matters, Fusion GPS and hundreds of  
19 other hired political attack services.

20 This makes a lot of sense. It’s obvious that two people with the same demographic profile  
21 (for example, white, middle-aged, employed, married men) can have markedly different  
22 personalities and opinions. We also know that adapting a message to a person’s personality –  
23 whether they are open, introverted, argumentative, and so on – goes a long way to help getting that  
24 message across and/or to control the intent of others.

### 25 **Understanding people better for better election manipulation**

26 Eric Schmidt, David Drummond, Larry Page, Mark Zuckerberg, Kent Walker, and the other  
27 Facebook/Google oligarchs, are clinical sociopaths. The feds never arrest them, the fines against  
28 them are meaningless, corrupt U. S. Senators protect them, they have Jeffrey Epsteinian hookers-

1 on-demand...there is no reason for them to end their crimes and every incentive for them to double-  
2 down on their machinations. They are above the law!

3 Traditionally, there have been two routes to ascertaining someone's personality. You can  
4 either get to know them really well – usually over an extended time. Or you can get them to take a  
5 personality test and ask them to share it with you. Neither of these methods is realistically open to  
6 pollsters. Cambridge Analytica found a third way, with the assistance of two University of  
7 Cambridge academics.

8 The first, Aleksandr Kogan, sold them access to 270,000 personality tests completed by  
9 Facebook users [through an online app he had created](#) for research purposes. Providing the data to  
10 Cambridge Analytica was, it seems, against Facebook's internal code of conduct (except if it pushes  
11 ideologies Zuckerberg wants), but only in March 2018 has Kogan been "banned" by Facebook from  
12 the platform. In addition, Kogan's data also came with a bonus: he had reportedly collected  
13 Facebook data from the test-takers' friends – and, at an average of 200 friends per person, that  
14 added up to some 50 million people.

15 However, these 50 million people had not all taken personality tests. This is where the  
16 second Cambridge academic, [Michal Kosinski](#), came in. Kosinski – who is said to believe that  
17 micro-targeting based on online data could strengthen democracy – had figured out a way to [reverse](#)  
18 [engineer a personality profile from Facebook activity](#) such as likes. Whether you choose to like  
19 pictures of sunsets, puppies, or people apparently says a lot about your personality. So much, in  
20 fact, that on the basis of 300 likes, Kosinski's model is able to predict someone's personality profile  
21 [with the same accuracy as a spouse](#).

22 Kogan developed Kosinski's ideas, improved them, and cut a deal with Cambridge  
23 Analytica. Armed with this bounty – and combined with additional data gleaned from elsewhere –  
24 Cambridge Analytica built personality profiles for more than 100 million registered US voters. It's  
25 claimed the company then used these profiles for targeted advertising.

26 Imagine for example that you could identify a segment of voters that is high in  
27 conscientiousness and neuroticism, and another segment that is high in extroversion but low in  
28 openness. Clearly, people in each segment would respond differently to the same political ad. But

1 on Facebook they do not need to see the same ad at all – each will see an individually tailored ad  
2 designed to elicit the desired response, whether that is voting for a candidate, not voting for a  
3 candidate, or donating funds. Google does this every minute of every day, to influence politics,  
4 because they get away with it with ease.

5 Cambridge Analytica worked hard to develop dozens of ad variations on different political  
6 themes such as immigration, the economy, and gun rights, all tailored to trick different personality  
7 profiles.

8 Behavioral analytics and psychographic profiling are here to stay, no matter what becomes  
9 of Cambridge Analytica This digital data rape industrializes what salespeople have always done but  
10 in the most sinister and evil way possible, by adjusting their message and delivery to the personality  
11 of their customers. This approach to electioneering – and indeed to marketing – will be Cambridge  
12 Analytica’s ultimate legacy of darkness.

13 **Protect yourself from tech Cartel corruption: *Poison your data* by always lying in**  
14 **online forms, use fake names and fake email addresses online, NEVER put your real address,**  
15 **city, phone, birth date or ANY other identifiable data online. Deny the Silicon Valley Cartel**  
16 **ANY ability to abuse your data!**

20  
21  
22 **It is time to directly confront the Silicon Valley cultists and**  
23 **demand FBI, Congressional and SEC investigation!**

24  
25 **The Documented Characteristics of Silicon Valley Venture Capitalists and Tech**  
26 **CEO’s:**

1 A horrific phenomenon of cultural depravity and white-collar crime is going unchecked in  
2 Silicon Valley because Silicon Valley controls the media and the politicians that are usually  
3 supposed to check these kinds of things. Millions of pages of news reports, documentaries,  
4 interviews and legal transcripts prove the following to be true:  
5

6 **Elitist Cult.** Silicon Valley elitists believe they are better than everyone else. Silicon  
7 Valley’s Kleiner Perkins founder: VC Tom Perkins, said that poor people must be “Nazi’s” for not  
8 accepting the “*superior intellect*” of VC’s. Silicon Valley’s Kleiner Perkins VC Vinod Khosla, took  
9 over California’s favorite public beach, bribed the White House for “green cash” and got sued for  
10 arrogance by a horde of public interest lawsuits. Silicon Valley’s Kleiner Perkins founder Ray Lane  
11 was indicted for tax evasion. Silicon Valley’s Kleiner Perkins boss John Doerr was sued for sexual  
12 office abuse and running a “frat house”. Most of the VC’s and tech CEO’s in Silicon Valley are  
13 charged with ethics breaches.  
14  
15

16  
17 **Prostitutes.** Silicon Valley males hire more hookers and “rent-boys” and fly more sex  
18 workers into the Bay Area than any other city in America. Google’s and Tesla Investments  
19 executives were killed in sex and drug romps with hookers. Google’s Eric Schmidt ran a huge “sex  
20 penthouse” and promotes infidelity and “anti-marriage”. Google’s search engine rigging boss died  
21 at the hands of one of his hookers. The Silicon Valley VC’s had the Rosewood Hotel built at the  
22 end of Sandhill Road as a place to take interns and hookers to for sex. Underage sex efforts operated  
23 by these VC’s and Tech CEO’s have created the “Pizzagate” phenomenon.  
24

25  
26 **Rapists and Sexual Coercion of Employees.** Young interns are “sent up the hill” by  
27 Stanford to the VC’s Sandhill Road offices to become sexual playthings for the VC’s at the  
28 Rosewood Hotel. Ellen Pao sued Kleiner Perkins over the sexual “rape culture” that they promoted.

1 Thousands of women have written books and articles about the sexual intimidation they are  
2 subjected to by Silicon Valley VC's and their tech CEO's. VC's Joe Lonsdale, Micheal Goguen and  
3 hundreds of others have been charged with rape and sex trafficking. Stanford University gets  
4 "endowments" and "gifts" for hushing rape culture and intern-fluffing up.

5  
6 **Assholes.** Fraternity *House Take-What-You-Want* culture is re-percussively promoted in the  
7 bars, clubs, meetings, conferences and emails of the VC's and CEO's. The TV Show: **Silicon**  
8 **Valley**, underscores the point of the dangers of infectious asshole-ism in Silicon Valley.  
9

10  
11 **Clones.** They assemble those around them that have the same stereotypical facial structure.  
12 In a room full of ordinary people and Tech VC's, the VC's faces stand out as Hollywood-type  
13 character-cartoon duplicates of each other.  
14

15  
16 **Sexual deviance and extremism.** Google's founders have all had extreme sex scandals  
17 involving cheating, 3-way sex, divorces over abuse, forced anal sex and other outrages. Their  
18 teachers at Stanford have had to quite over their sex scandals. Their willingness and infatuation with  
19 sexual extremes defines them as moral degenerates who care little about laws and ethics.  
20

21 **Insider Dysfunctional Parents.** The majority of the VC's and Tech CEO's come from rich  
22 dynastic families who are cultism-like devoted to "the family bloodline" and run by male oligarchs  
23 who believe in a rape culture/oligarch ethos. This belief system is passed on to their children. The  
24 oligarch parents threaten to cut endowments to Stanford University if Stanford punishes their son's  
25 Frat Houses for date rapes.  
26  
27  
28

1           **Tone Deaf.** Silicon Valley Tech people exist in a conceptual ideology reinforcement bubble  
2 by never interacting with, or reading information or news from, anyone outside of their group. VC  
3 Tim Draper spent vast amounts of money trying to make Silicon Valley it’s own country in order to  
4 systemize the Silicon Valley tunnel-vision bubble. They want to secede from America because they  
5 are offended by normal people who they consider to be low-class and unworthy.  
6

7           **Murders.** Rajeev Motwani taught the Google founders how to build Google and was found,  
8 mysteriously, floating, dead, in his Silicon Valley swimming pool. Silicon Valley’s Gary D. Conley  
9 reported John Doerr and Elon Musk for corruption and was found with a bullet in his head behind  
10 Beale Air Force base. Three top Tesla engineers reported corruption at Tesla Motors and then  
11 suddenly died in a plane crash next to Tesla’s factory in San Carlos. There are over 100 mysterious  
12 deaths associated with people who had conflicts with Google, Kleiner Perkins and other Silicon  
13 Valley oligarchs.  
14

15           **Arrogant.** Self-Centered Narcissists. Elon Musk has spent over a billion dollars buying  
16 exclusive Google, Twitter, MSM and Facebook hype about himself. Every Tech CEO has a multi-  
17 million dollar PR agent assigned to make them look like “Gods of Industry”. They regularly hold  
18 “Babes and Ball’s” parties and sex parties in Woodside that require women to beg for their money.  
19 They were trained to be “assholes” and “abusive dominants” via the Stanford Rape/Frat Culture.  
20  
21

22           **Misogynists.** All White-Male-Controlled with frat house pasts. Women are used As Sex  
23 Objects and *Window Dressing*. The largest number of anti-women news stories, jock/bro blog  
24 reports and charges for abuse come from Silicon Valley. VC Steve Westly’s CEO friend is  
25 notorious for kicking his girlfriend hundreds of times because she “sassed” him. Almost of of their  
26 Divorce filings include abuse charges against the man.  
27  
28

1  
2           **Manipulation of Employees.** Silicon Valley cartel companies practice Scientology-like  
3 indoctrination and “cultural programming” of employees. These highly impressionable naive young  
4 employees are kept in “controlled environments”, sent to “mindfulness programming workshops”  
5 and told what kind of political opinions they should have. Tight-knit groups of females experience  
6 [synchronized menstrual periods](#) (  
7 <http://www.nature.com/nature/journal/v229/n5282/abs/229244a0.html> ) over time, cohesive Google  
8 and Facebook employee groups engaged in decision-making [discount dissenting viewpoints](#) in the  
9 interests of consensus, and that couples who stay together long enough [begin to look alike](#). A [new](#)  
10 [study](#) has captured another group phenomenon in Silicon Valley and chronicled in humans’ natural  
11 habitat: “[group brain synchrony](#)”. This is a CIA-like brainwashing technique ePlaintiff 42loited to  
12 get all Google/Facebook/Twitter employees to rapidly adopt the same political views.  
13  
14

15  
16           **Racists.** Silicon Valley companies have the lowest rates of hiring, or promoting blacks, in  
17 America even though they have a high population of blacks at the edge of their community.  
18

19           **Male insecurity issues.** They use **TED-Talks, SXSW** and **Syncronicity Events** as self-  
20 promoting hype in which to act like an apostle of a tech religion. They buy Tesla cars as a badge of  
21 arrogance and mock any male who does not own what they own or who who did not go to Stanford  
22 or Yale. These pretentious and ostentatious boys are more inclined to brag about penis-size than  
23 family.  
24

25           **Blacklisting.** In the **AngelGate Investigation** and **Silicon Valley No Poaching Class**  
26 **Action Lawsuit**, Silicon Valley was exposed as an insider club that black-lists those who look  
27 different or are not part of the boys club.  
28

1           **Politically corrupt.** Silicon Valley has bribed more politicians than any other domestic  
2 region in history. They promote more immigration in order to get cheap labor for their tech  
3 companies. They steal their technology and bribe politicians to eliminate patent protections for  
4 small inventors that they steal from. Political Corruption and Bribery Is *The Norm* for these boys.  
5 Silicon Valley created a CIA knock-off called “In-Q-Tel” in order to use CIA technology to  
6 manipulate elections at Google, Facebook and Twitter. The 60 Minutes Episode called: “The  
7 Cleantech Crash” is about their multi-billion dollar scam using the Dept. of Energy as a slush-fund.  
8 They refuse to allow their MSM to report on their corruption and crony kickbacks, ie: Tesla Motors  
9 Funding, Off-shore tax evasion, Hooker networks, etc.  
10

11  
12           **Collusion.** In the **AngelGate Investigation, the Silicon Valley No Poaching Class Action**  
13 **Lawsuit**, and hundreds of other cases, Silicon Valley was exposed as an insider club that colludes  
14 to rig valuations, stock markets and employee poaching. They operate in herds within their peer  
15 group. They are not inclined to independent thinking. Kleiner Perkins has been caught placing  
16 moles and saboteurs inside competitors start-ups. They operate in herds within their peer group.  
17 They are not inclined to independent thinking.  
18

19  
20           **Stock Market Criminals.** Stock Market Pump-and-Dump, Flash Boy Algorithm  
21 Manipulation, Insider Trading, Market Rigging. The Securities and Exchange law violations and  
22 FTC monopoly law violations are vast in number.  
23

24  
25           **Burning Man Sex-and-Drugs Devotees.** Silicon Valley frat boys have a huge participation  
26 in the date-rape goings-on at Burning Man and buy extensive pheromone and skin contact delivery  
27 animal-tranquilizer drugs to use on young Burning Man girls.  
28

1           **Minimal Regard For Consequences.** Although their PR agents promote them as “green”  
2 and “socially positive”, it is all hype to get tax waivers and government hand-outs. Mark  
3 Zuckerberg’s take-over of San Francisco General Hospital’s brand was entirely a scam to get him a  
4 \$1 billion dollar tax evasion deployment. The Silicon Frat Boys act on impulse and try to buy off  
5 the collateral damage later.

6  
7           **Closeted homosexuals.** Using the tremendous funds they have at hand from their exclusive  
8 monopolies in public media, they push their trans-gender agendas through their bought-and-paid for  
9 politicians. This has resulted in a generation of sexually confused children who believe that they  
10 should cut their penises off. The top bosses at Facebook, Google, Twitter, Tesla and other  
11 companies are lying to the public about their sexuality and using hired wives, known as “beards”. If  
12 they lie about something so basic, one has to wonder what else they lie about.

13  
14           **Thieves.** They steal most of their technology from small inventors who can’t defend  
15 themselves. They get inventions from Indian engineers and then ship them back to India before the  
16 employees can get any stock or IP rights. The tech CEO’s send their VC friends to competing start-  
17 ups to spy on competing technologies and steal it. The VC’s say they are just doing “due diligence”  
18 but they are actually sucking the competing start-up dry of IP and staff and making a clone of it  
19 under another name.

20  
21  
22           There are so many other awful things about the people of Silicon Valley. You get the  
23 picture. Silicon Valley is a swamp and a cesspool.  
24  
25  
26  
27  
28

1  
2 **EXHIBIT 43 – How The Public Is Helping Fight Back Against This Corruption**  
3

4 **If you are a member of the public, do these things:**

5 - WRITE YOUR REGULATORY AGENCIES AND DEMAND INVESTIGATIONS AND  
6 PROSECUTOR INDICTMENTS OF THE SUSPECTS TODAY!

7 - DEMAND THAT THE LAW MAKE STOCK MARKET OWNERSHIP ILLEGAL FOR  
8 POLITICIANS AND THEIR FAMILIES! MAKE IT A FELONY FOR ANY PUBLIC OFFICIAL,  
9 OR THEIR FAMILY MEMBERS, TO OWN ANY SECURITIES OR STOCKS BECAUSE  
10 THAT IS HOW ALL MODERN BRIBES ARE PAID!

11 - WRITE CONGRESS AND DEMAND THAT CRIMINAL COMPANIES LIKE  
12 GOOGLE, FACEBOOK, TESLA, THE NVCA, ET AL, BE RAIDED AND SHUT DOWN BY  
13 THE FBI

14  
15 **If you are a public official, do these things:**

16  
17 - PAY Plaintiffs THEIR DAMAGES AND END THE BLOCKADE OF Plaintiffs  
18 BENEFITS AND PAYMENTS

19 - MAKE LAWS TO END THESE CORRUPTION CRIMES AND DARK MONEY  
20 BRIBERY SCAMS

21 - GET READY FOR EVERY MEMBER OF THE PUBLIC TO USE FBI-QUALITY  
22 FORENSIC AI SOFTWARE ON YOU, PERSONALLY, WITH THEIR HOME COMPUTERS, IF  
23 YOU DON'T DO THESE THINGS

24  
25 In summation, here is where things now stand: New open-source, and free, public software  
26 let's any citizen get any corrupt politician arrested. Any voter can use the software from the comfort  
27 of their living room. The AI replicates itself (Like a benign digital version of Covid) across the  
28 entire web.

1 Illegal and corrupt Congressional insider trading tends to be something we don't hear about  
2 until it's hit the big news networks and newspapers as the SEC goes for the throat of the accused. By  
3 then, unfortunately, those committing it have made their gains, usually in the multi-millions of  
4 dollars, and the damage has been done to the stock, its company, investors and the American Way.

5 Quite frankly, the jail time assessed doesn't correct the damage done, and the fines rarely aid  
6 the investors, or the voters, in getting their money and their democracy back. Many of those hurt are  
7 Average Joe's and Jill's who were just trying to save their retirement nest eggs. Shame is the tool  
8 that works best on the corrupt!

9 These crimes involves a Nancy Pelosi, Kamala Harris or Dianne Feinstein **investment**  
10 **banker husband** using information, which was not available to the public, buying and selling a  
11 company's stock in an underhanded manner. **It is particularly onerous when one of those Senators**  
12 **buys Tesla, Google, Facebook or Solyndra stock, and makes laws that only benefits Tesla,**  
13 **Solyndra, etc, while sabotaging their competitor constituents.** Because the dealings involved are  
14 pretty much done on the sly, it's been difficult, until now, for the governing body of the SEC to  
15 prove illegal insider trading, unless one of the cohorts tattles on the others or their actions become  
16 glaringly obvious. In some cases, a sharp mind around the action may take notice and become  
17 what's called a whistle-blower.

18 Previously, writes [Andrew Beattie of Investopedia](#): "... insider trading is often difficult for  
19 the SEC to spot. Detecting it involves a lot of conjecture and consideration of probabilities." That  
20 was the 'old days', though. Today, the new AI software can bust through these scams like a hot knife  
21 through butter!

22 With this new open-source, free, public spy agency-class software, detecting illegal insider  
23 trading is actually less complicated than it sounds.

24 To the eyes of this new super-powerful AI observer server bot and peer-to-peer databases, it  
25 is easy work.

26  
27 You, the citizen, just type the politician or agency employee name into a field and hit the "**analyze**"  
28 button. A few minutes later you receive a multi-page PDF report similar to an FBI report on the

1 target. You can either research the subject in more detail or send copies of the report to the FBI,  
2 GAO, OSC, SEC or other enforcement group.

3 The software is an automated AI temporal matching system which includes 24/7 analysis of  
4 all stock trades involving politicians to its information source, politician finances, communications  
5 and policy participators. it uses some of the same software code used by the CERN mega-research  
6 center in Switzerland.

7 **The technology Core Evaluation Points:**

8 • Analyst estimates - these come from what an analyst estimates that a company's  
9 quarterly or annual earnings will be. They are important because they help approximate the  
10 fair value of an entity, which basically establishes its price on the stock exchange.

11 • Share volume - this reflects the quantity of shares that can be traded over a certain  
12 period of time. There are buyers and there are sellers, and the transactions that take place  
13 between them contribute to total volume.

14 **One Way The AI Detects Congressional Insider Trades**

15 Metricized signs of illegal insider trading occur when trades occur that break out of the  
16 historical pattern of share volume traded compared to beneficiary participation's of those connected  
17 to company and political entity. Another clue of the illegal insider trading is when a lot of trading  
18 goes on right before earnings announcements. That tends to be a sign that someone already knows  
19 what the announcement is going to indicate, and it's an obvious violation. One module of the new  
20 software hunts these trends around-the-clock in an unmanned manner like a detective who never  
21 needs to sleep.

22 The software red alerts are issued when trades are linked closer to the actual earnings and  
23 politicians bills instead of what the predicted earnings were. In a corruption case, it's clear the trades  
24 - especially made by politicians close to the company - stemmed from information that was not  
25 readily available to the general public.

26 In other words, at the time an insider makes a trade, the trade has a stronger relationship to  
27 earnings guidance rather than to earnings results achieved.

28 **Part Of The Insider Trading Detection AI Uses 'Dynamic Time Warping (DTW)'**

1 In econometrics, which is a concept frequently used by quantitative analysts to evaluate  
2 stock market prices, dynamic time warping (DTW) is an algorithm that can be used for measuring  
3 similarity between two data sequences by calculating an optimal match between the two. This  
4 sequence "matching" method is often used in time series classification to properly "line things up."

5 The method, coupled with AI machine learning ensemble methods, can provide a clear path  
6 between the trades made by insiders and public data used to make the trades.

7 This is a product of artificial intelligence that has been ePlaintiff 42anded by Indexer,  
8 Splunk, Palantir and other firms fast becoming experts in products that can be used to advance the  
9 art of manipulating political and social trends in business and markets by using social media,  
10 financial data and news stories. The new software process has taken that sort of approach to the next  
11 level and targeted every member of Congress, their staff, family and friends. The first emphasis is  
12 on California and Washington, DC public figures.

13 In a hypothetical example, a group of executives failed to trade by industry standards by  
14 leveraging material non-public information and policy manipulation. Although consensus estimates  
15 called for higher commodity prices at the end of 2015, it appears key executives traded for their  
16 personal accounts as a result of the forecast provided by a specialist system within the firm that was  
17 adept at predicting prices alongside lobbyist manipulations. Flash-boy trading is now dirtier and  
18 powered by Google-class server systems.

19 In the hypothetical scenario the software aggregates executive trades in 2014 and 2015 and  
20 finds a strong link between buys and sells of executive stock options, which line up with material  
21 non-public estimates of commodity prices that were provided by the specialist system.

22 For example, in a "Exec Sell and Exec Buys" graph, a green line represents sells, while a  
23 black line represents buys. In the corresponding period, one finds a red line represents unrevised  
24 prices provided by the specialist system, and green line represents consensus estimates.

25 During Q1-2014, there was \$28M in purchases of executive stock options, while in Q2-  
26 2014, there was \$25M in sales of executive stock options. The specialist system called for Q3-2014  
27 commodity prices to make a precipitous decline going into the end of 2014. Remember, under this  
28 scenario, no revisions were made to the specialist systems' price forecast. In this example,

1 executives were afforded a significant advantage using price predictions from the specialist system.

2 In a final bullet chart, there was a dynamic time warping distance between trades and  
3 consensus estimates of 7.23, but this distance is only 2.19 when comparing specialist system  
4 estimates and executive trades. Please note, the closer the distance score is to zero, the more similar  
5 the trades are to the estimates they are measured against.

6 **We have applied this process to companies well-known for influence buying like,**  
7 **Google, Tesla and Facebook**

8 It's obvious that the tech executives involved did not follow industry standards in their  
9 actions and make public the "insider" information they had access to prior to the trades they made.  
10 The lobbyists they hired promoted this rigged trend and paid off Senators with perks. These are the  
11 kind of violations the SEC and other governing bodies can look to in attempting to protect the  
12 trading public and the integrity of financial marketplaces. Artificial intelligence tools are a major  
13 factor in assisting the tracking of insider trading. Eric Schmidt, of Google, does not look good under  
14 such circumspection.

15 "Every facet of our everyday lives has been impacted, infiltrated and greatly influenced by  
16 artificial intelligence technologies," says Vernon A. McKinley, a multi-jurisdictional attorney,  
17 based in Atlanta. "In fact, The U.S. Government and its multiple agencies have developed  
18 specialized intelligence units to detect, track, analyze and prosecute those unscrupulous individuals  
19 seeking to profit from the use of such tools, specifically in the financial industry, and to protect the  
20 integrity and strength of the U.S. economy and its investors." Now these tools are being turned  
21 against the corrupt!

22 The public can now detect trading anomalies in financial situations using this artificial  
23 intelligence software on their desktop computers. No public official will ever be able to do these  
24 kinds of corruptions, again, without getting caught.

25 This approach has already had an impact on how political insiders trade on Wall Street and  
26 in financial markets around the world.

27 **This technology can end this corruption in America forever!**

28 A module of the software uses data from The Center for Responsive Politics, ICIJ Panama

1 Leaks records, Swiss Leaks records and FEC files to reveal covert routes. Jerry Brown, Dianne  
2 Feinstein, Nancy Pelosi, Kamala Harris and other famous California politicians own part of Tesla  
3 Motors, Facebook, Google, Netflix, YouTube and other companies they helped get government  
4 money for. All of their competing constituents have suffered for it or been put out of business by  
5 exclusive deals that only Tesla Motors, Facebook, Google, Netflix and YouTube got. That is a  
6 crime!

7 A large volume of forensic research proves that Silicon Valley Cartel tech firms receive  
8 benefits from politicians and politicians, at the same time, benefit from these firms.

9 This evidence on the exchange of benefits between politicians and firms proves an  
10 agreement between the politicians and the companies. This agreement, however, cannot be in the  
11 form of a written contract as writing direct fee-for-service contracts between a politician and a firm  
12 is considered bribery (Krozner and Stratmann 1998; 2000). In addition, either party to this  
13 agreement might renege on its promise and the other party cannot resort to the courts.

14 Procon.org, for example, reports: “Less than two months after ascending to the United States  
15 Senate, Barack Obama bought more than \$50,000 worth of stock in two speculative companies  
16 whose major investors included some of his biggest political donors. One of the companies was a  
17 biotech concern that was starting to develop a drug to treat avian flu. In March 2005, two weeks  
18 after buying about \$5,000 of its shares, Mr. Obama took the lead in a legislative push for more  
19 federal spending to battle the disease. The most recent financial disclosure form for Mr. Obama . . .  
20 shows that he bought more than \$50,000 in stock in a satellite communications business whose  
21 principal backers . . . had raised more than \$150,000 for his political committees.”

22 (<http://insidertrading.procon.org/viewresource.asp?resourceID=1580#obamaa>. See more examples  
23 from the Citizens for Responsibility and Ethics in Washington (CREW) report (2009).)

24  
25 The literature and our eye-witness experience proves that politically-connected Silicon Valley tech  
26 firms monthly obtain economic favors, such as securing favorable legislation, special tax  
27 exemptions, having preferential access to finance, receiving government contracts, or help in  
28 dealing with regulatory agencies. The evidence proves that Google's support, for example, can help

1 in winning elections. For example, firms can vary the number of people they employ, coordinate the  
2 opening and closing of plants, and increase their lending activity in election years in order to help  
3 incumbent politicians get re-elected. (See Roberts 1990; Snyder 1990; Langbein and Lotwis 1990;  
4 Durden, Shorgen, and Silberman 1991; Stratmann 1991, 1995, and 1998; Fisman 2001; Johnson and  
5 Mitton 2003; Ansolabehere, Snyder, and Ueda 2004; Sapienza 2004, Dinç 2005; Khwaja and Mian  
6 2005; Bertrand, Kramarz, Schoar, and Thesmar 2006; Faccio 2006; Faccio, Masulis, and McConnell  
7 2006; Jayachandran 2006; Leuz and Oberholzer-Gee 2006; Claessens, Feijen, Laeven 2008; Desai  
8 and  
9 Olofsgard 2008; Ramanna 2008; Goldman, Rocholl, and So 2008, 2009; Cole 2009; Cooper, Gulen,  
10 and Ovtchinnikov 2009; Correia 2009; Ramanna and Roychowdhury 2010; Benmelech and  
11 Moskowitz 2010.)

12         The software can see that the share ownership of politicians serves as a mechanism to quid-  
13 pro-quo their relationships with big tech firms, is as follows: The ownership of politicians plays  
14 multiple distinct (but not necessarily independent) roles; one that relies upon the amount of  
15 ownership and one that does not. First, as investors in firms, politicians tie their own interests to  
16 those of the firm. Thus, harming (benefiting) the firm means harming (benefiting) the politician and  
17 vice versa. By owning a firm's stock, politicians commit their personal wealth to the firm and  
18 reduce a firm's uncertainty with regard to their actions toward the firm. This will, in turn, enhance  
19 the firm's incentive to support the politician-owner during both current and future elections in order  
20 to prolong the incumbency period for as long as possible. Firms have their lobbyists push to be able  
21 to know the amount of ownership likely to be material to politicians. This knowledge, in turn,  
22 enables them to judge whether the politician's interest is aligned with the firm's interest and  
23 optimize quid-pro-quo.

24         The Political Action Committee (PAC) contribution of firms (which is a direct measure of  
25 benefits flowing from firms to politicians) is a significant determinant of ownership allocations by  
26 members of Congress. The ownership of Congress members in firms that contribute to their election  
27 campaigns is roughly 32.8% higher than their ownership in noncontributing firms even after  
28 accounting for factors that are associated with both ownership and contribution (such as familiarity,

1 proximity and investor recognition). Democratic members invest more (less) in firms that favor, i.e.,  
2 contribute more to, the Democratic Party. Politicians are partisan investors.

3       The committee assignments of politicians is a proxy for whether their relations with firms  
4 are enforced (Kroznner and Stratmann 1998).Silicon Valley tech firms like Facebook, Tesla and  
5 Google obtain private benefits out of their mutual relations with politicians. When the strength of  
6 the association between ownership and contributions at the firm level increases, the provision of  
7 government contracts to those firms increases.

8       embers of Congress, candidates for federal office, senior congressional staff, nominees for  
9 executive branch positions, Cabinet members, the President and Vice President, and Supreme Court  
10 justices are required by the Ethics in Government Act of 1978 to file annual reports disclosing their  
11 income, assets, liabilities, and other relevant details about their personal finances.

12       Personal financial disclosure forms are filed annually by May 15 and cover the preceding  
13 calendar year. The Center for Responsive Politics (CRP) collected the 2004–2007 reports for  
14 Congress members from the Senate Office of Public Records and the Office of the Clerkof the  
15 House. The Center then scanned the reports as digital images, classified the politicians’ investments  
16 into categories including stocks, bonds, and mutual funds, and built a database accessible via a web  
17 query.

18       Using CRP's data, you can use the software to collect the shares in S&P 500 firms held by  
19 members of Congress between 2004 and 2007, for example.You can collect the stock ownership  
20 data for every firm that joined the S&P 500 Index any time between January 2004 and April  
21 2009;regardless of when it joined the index, and the software can obtain all the available stock  
22 ownership data for that firm between 2004 and2007. Likewise, if a firm dropped out of the index at  
23 any time during 2004–2008, the software, nevertheless, will retain the firm in a sample for the target  
24 period. As such, the sample would include stocks in hundreds of unique firms owned by politicians  
25 between 2004 and 2007, for example.

26       Politicians are required to report only those stocks whose value exceeds \$1,000 at the end of  
27 the calendar year or that produce more than \$200 in income. They are CURRENTLY not required  
28 to report the exact value of the holding, but instead must simply check a box corresponding to the

1 value range into which the asset falls. The CRP then undertakes additional research to determine the  
2 exact values of these stocks. When the Center makes these determinations, it reports them instead of  
3 the ranges and I use these values in my study. When only the range is available, you should use its  
4 midpoint as the holding's value. You would, thus have data on the stock holdings of hundreds  
5 politicians for that time period.

6 Using the software, you can search for all Political Action Committees (PACs) associated  
7 with tech firms. It then collects data on each contribution these PACs made to candidates (both the  
8 winners and losers) running for the Senate and House elections. Tricky corrupt Silicon Valley firms  
9 establish several PACs, each in a different location, and each of these PACs can contribute to the  
10 same candidate. In such cases, the software would total, for each candidate, every contribution he or  
11 she received from PACs affiliated with the same firm. To parallel the investment data sample  
12 period, for example, the software collects every contribution made from the 2003–2004 cycle up to  
13 and including the 2007–2008 cycle. Many Silicon Valley tech firms use deeply covert Fusion GPS,  
14 Perkins Coie, BlackCube, Psyops-type service to make very hidden additional payola payments to  
15 California politicians.

16 For sources, for example, the software collects government contract data from Eagle Eye  
17 Publishers, Inc., one of the leading commercial providers of Federal procurement and grant business  
18 intelligence and <http://www.usaspending.org>. Eagle Eye collects its contract data from Federal  
19 Procurement Data System–Next Generation (FPDS-NG), the contract data collection and  
20 dissemination system administered by the U.S. General Services Administration (GSA). FPDS-NG  
21 provides data on procurement contracts awarded by The U.S. Government . When these contracts  
22 are awarded to company subsidiaries, Eagle Eye searches for the names of their parent companies  
23 and assigns each subsidiary to its appropriate parent. The software collects both the number and  
24 aggregate value of government contracts that were awarded to sample firms between 2004 and 2007  
25 in this example time-frame..

26 The software reveals, for example, that Representative Maxine Waters (D-CA) is a ten-term  
27 member of Congress and a senior member of the House Financial Services Committee. She  
28 arranged a meeting between the Department of Treasury and One United Bank, a company with

1 close financial ties to Ms. Waters, involving both investments and contributions.

2 “In September 2008, Rep. Waters asked then-Secretary of the Treasury Henry Paulson to  
3 hold a meeting for minority-owned banks that had suffered from Fannie Mae and Freddie Mac  
4 losses.

5  
6 The Treasury Department complied and held a session with approximately a dozen senior banking  
7 regulators, representatives from minority-owned banks, and their trade association. Officials of One  
8 United Bank, one of the largest black-owned banks in the country that has close ties to Rep. Waters,  
9 attended the meeting along with Rep. Waters’ chief of staff. Kevin Cohee, chief executive officer of  
10 One United, used the meeting as an opportunity to ask for bailout funds.

11 . . . Former Bush White House officials stated they were surprised when One United  
12 Officials asked for bailout funds. . . . In December 2008, Rep. Waters intervened again, asking  
13 Treasury to host another meeting to ensure minority-owned banks received part of the \$700 billion  
14 allocated under the Troubled Asset Relief Program. . . . Within two weeks, on December 19, 2008,  
15 One United secured \$12.1 million in bailout funds. . . . This was not the first time Rep. Waters used  
16 her position to advance the interests of the bank. Rep. Waters’ spouse, Sidney Williams, became a  
17 shareholder in One United in 2001, when it was known as the Boston Bank of Commerce. In  
18 2002, Boston Bank of Commerce tried to purchase Family Savings, a minority-owned bank in Los  
19 Angeles. Instead, Family Savings turned to a bank in Illinois. Rep. Waters tried to block the merger  
20 by contacting regulators at the FDIC. She publicly stated she did not want a major white bank to  
21 acquire a minority-owned bank.

22 When her efforts with the FDIC proved fruitless, Rep. Waters began a public pressure  
23 campaign with other community leaders. Ultimately, when Family Savings changed direction and  
24 allowed Boston Bank of Commerce to submit a winning bid, Rep. Waters received credit for the  
25 merger. The combined banks were renamed One United. . . . In March 2004, she acquired One  
26 United stock worth between \$250,001 and \$500,000, and Mr. Williams purchased two sets of stock,  
27 each worth between \$250,001 and \$500,000. In September 2004, Rep. Waters sold her stock in One  
28 United and her husband sold a portion of his. That same year, Mr. Williams joined the bank’s board.

1 . . . One United Chief Executive Kevin Cohee and President Teri Williams Cohee have donated a  
2 total of \$8,000 to Rep. Waters' campaign committee. . . .On October 27, 2009, less than two months  
3 before One United received a \$12 million bailout, the bank received a cease-and-desist order from  
4 the FDIC and bank regulatory officials in Massachusetts for poor lending practices and excessive  
5 executive compensation . . . the bank provided excessive perks to its executives, including paying  
6 for Mr. Cohee's use of a \$6.4 million mansion . . ." (Crew report 2009,pp. 123–125)

7 Thanks to Crony quid-pro-quo revelations by an earlier version of the software, you can also  
8 see that Fisker Automotive, Inc.'s \$529 Million U.S. taxpayerLoan Approval by The U.S.  
9 Government was dirty. Fisker Automotive's Chief Operating Officer Bernhard Koehler pleaded  
10 with The U.S. Government in a panicked Saturday midnight hour email to receive a \$529 million  
11 loan as the company was 2 weeks from Chapter 7 liquidation, that it was laying off most of its  
12 employees, that no private sector investors would fund the company without GOVT guarantees, and  
13 that Fisker was unable to raise any further equity funding from independent private-sector investors  
14 given the company's financial condition. These statements were made to a Loan Officer at the  
15 GOVT . No private sector Loan underwriting (approval) committee would ever grant a low interest  
16 loan to a desperate buyer that had just confessed it was in a state of insolvency and was about to  
17 layoff most of its staff. Yet within a few weeks the GOVT would approve a \$529 Million Credit  
18 Facility to Fisker. Despite the GOVT Loan Officer official's sworn testimony at April 24th's House  
19 Oversight Committee that the GOVT used "same private sector underwriting standards when  
20 approving Fisker and other approved taxpayerFunded Loans" - likely perjury based in documents.

21 In a 'U.S. GOVERNMENT CONFIDENTIAL EMAIL': FISKER AUTOMOTIVE: August  
22 2009: Co-Founder Bernhard Koehler emails U.S. Dept. of Energy Loan Officer in Sat. midnight  
23 Panic admitting VC Firms all declined to invest, and company is out of cash. Weeks later the  
24 U.S.Department of Energy approves \$529M U.S. taxpayerFunded Loans to FISKER. NO  
25 PRIVATE SECTOR Lender would ever authorize a Loan for even \$5 Million let alone \$529  
26 Million after receiving this email stating private sector investors had examined the company and  
27 declined equity investments, that they might loan money as more secure Debt, and the Chief  
28 Operating Officer of the company further stating that the borrower is totally insolvent. (Weeks after

1 this email the U.S. Federal Government Dept. of Energy Loan Committee Approves Fisker  
2 Automotive as a credit-worthy borrow for \$529 Million in U.S. taxpayerFunded Loans). Fisker got  
3 the cash because President Obama said to "give it to them" in order to please his campaign  
4 financiers.

5       The same thing happened with Tesla Motors. Elon Musk and Tesla Motors were broke when  
6 GOVT gave them the money.

7       PrivCo CEO Sam Hamadeh stated in an official statement: *"The documents obtained by*  
8 *PrivCo paint a picture of how an insolvent,unproven automaker received \$192 million in*  
9 *taxpayerfunding. The U.S. Government made a loan that no rational lender would have made. This*  
10 *loan was the equivalent of staying execution on a company that was terminally ill to begin with."*  
11 Tesla and Fisker could not have been taxpayerfunded unless bribes and criminal quid-pro-quo was  
12 underway by President Obama and the U.S. Senator insider traders.

13       WITNESS Vehicle's had been the first to initiate negotiations to retask the NUMMI plant in  
14 Fremont, California after Elon Musk went on the record saying the NUMMI Plant was worthless to  
15 Tesla. Dianne Feinstein's chief of staff then threatened WITNESS and warned them to cease action  
16 on NUMMI. Shortly thereafter, Tesla announced they had acquired the NUMMI plant which  
17 Dianne Feinstein's family owned a business interest and she had arranged for Tesla to get funding  
18 and presided at the Tesla re-opening of the NUMMI plant.

19       **YOU** can fight back and destroy dirty oligarchs!

20       When the bad guys, and their lap-dog politicians, attack you because your products are  
21 better than theirs they are proving that they have to cheat to compete. They cheat with political  
22 bribes, black-lists, character assassination attacks, collusion and other anti-trust violating acts.

23       When your Senator holds stock market shares in companies that exist to profit on the backs  
24 of consumers, then it is impossible for that Senator to ever do anything but be corrupt!

25       As Mother Jones top editor says:

26       In 18 years of living here, I find zero evidence that the "City Family" is benefiting anybody  
27 but its members, developers, old-school socialites, and tech billionaires.

28       — Clara Jeffery (@ClaraJeffery) [February 14, 2020](#)

1 I can't even with how insular and incestuous and corrupt SF is. Mayor [@londonbreed](#)  
2 acknowledges she had relationship with DPW Nuru two decades ago and that they remained close  
3 friends <https://t.co/HEhIlulkyj>

4 — Clara Jeffery (@ClaraJeffery) [February 14, 2020](#)

5 Your public officials set-up, operated and maintained an organized crime scheme for  
6 personal profit at the expense of every taPlaintiff 42ayer. They went after **Five Trillion** treasury  
7 dollars of your tax money for their personal interests via rigged stock market scams, rigged  
8 government contracts, exclusionary policy manipulations and other schemes that harmed American  
9 taxpayers.

## 10 11 **You Owe It To Yourself And The Nation To Take These Crooks Down!**

12  
13 **You** can wipe them out, all by yourself, in 100% legal ways.

14 **You** can wipe them out even faster with crowd-sourced forensics and anti-corruption ai  
15 software!

16 **You** can join the rest of the public in an epic anti-corruption effort!

17 You must write FBI-quality criminal activities reports and file those reports, by certified  
18 mail, with every law enforcement and regulatory agency in every country in the world, including  
19 the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc. CC the social media sites with your reports.

20 You can use basic private investigator websites to track and back-ground every person,  
21 organization and company involved in the corruption and trace their RICO law violations. You can  
22 provide that data to The U.S. Congress and every agency, with a copy to every social media posting.

23 You can now use open-source, free, collaborative NSA-class global databases that can track  
24 all of the locations, hookers, fake fronts, family trusts, bank accounts, stock market accounts, bribes  
25 and other goodies, of any corrupt public official, in minutes! You get that free anti-corruption  
26 software from GitHub, CodePen, Torrents, Onion Project, The Guardian, ICIJ and all over the web.

27 YOU open your own private investigator/citizen sleuth crowd-sourced investigations into  
28 the following:

- 1 - Every stock market account they or their family owns
- 2 - Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
- 3 - Every flight manifest they appeared on
- 4 - Every bank account they have ever held
- 5 - Every lawsuit, divorce record and police record they have ever appeared in
- 6 - Every trust fund they or their family holds
- 7 - Every shell corporation they, or their family holds
- 8 - Every person named in the Epstein Pedo book:  
9 <https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted> cross  
10 referenced across all of the other databases and then supplied to the FBI and Child Protection  
11 Agencies
- 12 - Every item in the Swiss Leaks that cross connects to their holdings
- 13 - Every item in the Panama Papers Leaks that cross connects to their holdings
- 14 - Every item in the WikiLeaks that cross connects to their holdings
- 15 - Every item in the Snowden Leaks that cross connects to their holdings
- 16 - Every sex trafficking incident that connects to each of them alone, and in groups
- 17 - Every financial transaction between any of the parties on the master list and the character  
18 assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik,  
19 Gizmodo, Black Cube, Fusion GPS, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence,  
20 WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct  
21 The Recor, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs,  
22 Covington and Burling, BuzzFeed, Perkins Coie and Wilson Sonsini or their derivatives with  
23 common owners.
- 24 - Every item in the Quest Leaks that cross connects to their holdings
- 25 - Every tactical deployment, by a campaign financier, of the tactics listed in this manual: <https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>
- 26 <https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>
- 27 - Every sex service that their credit card payments every connect too
- 28 - Every real estate transaction that any name or company they, or their family, were involved

1 in, tracks to

2 ..... and hundreds of thousands of other information points about them that prove that they  
3 benefit from crimes that they engage in for others who engage in crimes using the America public  
4 policy system.

5 It all goes into shared 100% legal public collaborative databases that work like  
6 XKEYSCORE, or MS Access, or Oracle Databases.

7 The proof of collusion, organized criminal actions and raw covert corruption is indisputable.  
8 The actors are all the same people. The beneficiaries are all the same people. The communications  
9 between the parties all coordinate the same actions.

10 Demand their arrests, indictments, exposures and bankruptcies in public ads, letters to the  
11 editor, blog posts, bumper stickers, lawsuits, flyers, newsletters, email and every other outreach  
12 manner.

13 Say "*Fuck You*" to the Silicon Valley Oligarch 'Illuminati' scumbags and the crooked  
14 Senators and Governor's they bribed.

15 As one of the team said: *“Without breaking a single law and WITH the help of the largest*  
16 *law enforcement and investigative resources on the planet, I have killed off every single*  
17 *motherfucker that has come after me, including some of the largest entities in the world! I use*  
18 *lawsuits, federal investigations, news reports, whistle-blowers, new public regulations, anti-trust*  
19 *filings, tens of millions of crowd-sourced voters and unique AI-based forensics. I will find every*  
20 *person and organization on the globe that hates you, gather them together and aim them all at your*  
21 *life! Anyone who attacks me stays on the shit list for the rest of their lives plus the next 100+ years*  
22 *of internet time. You come for me, prepare to suffer. Every stock you buy is a notice to my team to*  
23 *bankrupt the company that you invested in. Even if I am dead, your punishment will be carried out*  
24 *by a legacy team of public volunteers. It may happen to you tomorrow or it may be a slow-drip over*  
25 *the next 15 years. Never stop looking over your shoulder. If you decided to cheat against my*  
26 *business rather than fairly compete against me, then start carving your tombstone. If you hired*  
27 *media attackers, ePlaintiff 42ect 100 times what you did to me to come back at you and your family*  
28 *forever! I am fine with forgive-and-forget, except when it comes to criminal bullies: They are*

1 *terminated!...*”

2 That is what happens when you try to kill members of the public

3 Show these oligarch crooks what billions of taPlaintiff 42aying voters with collaborative  
4 FBI-class forensics investigation software can do to their corrupt tech Cartel!

5  
6 **What To Do To Write Up The Dossier On Each Person And**  
7 **Each Corrupt Politician:**

8 1. Dig through their trash and buy their trash bags from the garbage man after  
9 they pick them up

10 2. Locate a beneficiary for a probate proceeding

11 3. Research current and / or historical property holdings

12 4. Identify mortgage information

13 5. Identify secured lenders

14 6. Identify related party property transactions

15 7. Determine current market value of real property

16 8. Locate bankruptcy filings

17 9. Retrieve and analyze bankruptcy records

18 10.Uncover improper relationships

19 11.Locate federal civil lawsuits

20 12.Locate federal criminal records

21 13.Retrieve and analyze federal civil and criminal records

22 14.Retrieve mug shots from arrest records

23 15.Provide independent analysis

24 16.Locate state and local criminal arrest records

25 17.Retrieve and analyze review criminal records

26 18.Provide peace of mind

27 19.Locate home phone numbers

28 20.Locate cell phone numbers

- 1 21. Identify owner of home or cell phone number
- 2 22. Determine owners of corporation
- 3 23. Retrieve and analyze corporate records
- 4 24. Locate current or former executives
- 5 25. Interview current or former executives
- 6 26. Find and retrieve judgment and lien filings
- 7 27. Research familial history
- 8 28. Connect the dots
- 9 29. Locate witnesses for a civil or criminal lawsuit
- 10 30. Interview witnesses for a civil or criminal lawsuit
- 11 31. Find assets
- 12 32. Find current or historical boat registrations
- 13 33. Find current or historical aircraft registrations
- 14 34. Search for hidden assets
- 15 35. Conduct business intelligence
- 16 36. Discreet intelligence gathering
- 17 37. Determine connections between parties
- 18 38. Locate bank account information
- 19 39. Locate current or former employees of a company
- 20 40. Interview current or former employees of a company
- 21 41. Locate significant inheritances
- 22 42. Show you the big picture
- 23 43. Identify a will for an estate
- 24 44. Locate probate records
- 25 45. Identify foreign assets
- 26 46. Locate regulatory records
- 27 47. Identify regulatory actions
- 28 48. Identify professional licenses

hotties to see if they are hookers or ill-repute escorts

99. Use one of the many free on-line news publishing softwares and make a global online newspaper that constantly exposes their crimes

100. Write every federal agency and demand investigation and prosecution of the perps

101. Assemble the massive number of news reports about their sex scandals and distribute those reports as books, articles, documentaries and news aggregations to prove what a bunch of sick perverts these people are

102. Publish the speaker list from Techonomy, Davos, TED, Burning Man, etc. to show that it is always the same little group of arrogant assholes that self-promote their hype at each of these elitist events

103. Leave notices on the windshield of any of their Tesla's reminding them what douche-bags they are

104. Organize petitions and letter-writing campaigns to have the overtly corrupt ones removed from their jobs

105. Go to their share-holder meetings and hand-out flyers about their corruption

106. Hire Charles Spies ( <https://www.dickinson-wright.com/our-people/charles-spies?tab=0> ) to sue them

107. Hire Harmeet K. Dhillon ( <http://www.dhillonlaw.com> ) to sue them

108. Hire COA ( <http://www.causeofaction.org> ) to sue them

109. Hire law firms from China or Russia to sue them for a very low price

110. Hire Steven S. Biss ( <http://www.linkedin.com/in/steven-s-biss-6517037> ) to sue them

111. Blog about the corruption of the political targets every day with the day's news each day

112. Read their divorce filings in court records and see who else might help expose their corruption

113. Read their locations over the last 12 months -

<https://www.protocol.com/government-buying-location-data>

114. Talk to every neighbor that has filed a complaint about them

115. Hire *Pierce Bainbridge Beck Price & Hecht LLP* to sue them, especially tech media companies

116. Re-read all of the latest "How To Be A Private Investigator" books and brochures

117. Ask Paul Kangas in San Francisco how he investigates the corrupt

118. Go back to <http://www.pacer.gov> and read each of the lawsuits against them to get more clues about them

119. Put a card table and a pop-up booth outside their office and hand out flyers about them

120. Publish every stock market share they, and their family, owns

121. Produce a dossier on every corrupt partner of every Silicon Valley VC firm

122. Know that there are over 3000 additional forensic tools you can use to expose them 100% legally...

You can work with our peers to solve the ethics crisis in society.

We have hired the best investigators who used to work with the FBI, CIA, FTC, DOJ, SEC, GAO, IG and Interpol.

We have also been teaching every voter in the world how to be a top notch criminal investigator and how to use digital forensic AI tools to "follow-the-money" and bust these crooks. Imagine the entire resources of Palantir, XKEYSCORE, Splunk, Axiom and Taleo aimed at people like Zuckerberg, Hoffman, Musk and Schmidt. They will never survive it!

Every single asshole in Silicon Valley can be plaintiff to have accurate, highly professional, criminal charges and referrals filed against them with every federal law enforcement and regulatory agency. Those reports are being BCC'd to the news media and the public.

When you see reports like this book you can clearly see that **Every Tech CEO And Investor In Silicon Valley Is A Predatory, Parasitic, Sex Trafficking, Misogynist, Money**

1 **Laundering, Politician Bribing, Exclusionary, Black-Listing Criminal.** Now the world will see  
2 the truth about them!

10  
11 [Is Pelosi's husband guilty of insider trading?](#)

12  <https://www.americanthinker.com/blog/2016/04/>

13 [is\\_pelosis\\_husband\\_guilty\\_of\\_insider\\_trading.html](#)

14 Is Pelosi's husband guilty of **insider trading**? By Rick Moran. In late October 2014, Nancy  
15 Pelosi's husband Paul purchased between \$100,000 and \$250,000 in stock from **green energy**  
16 company Sun ...

17  
18  
19 WASHINGTON—Chris Miller nearly doubled his \$3,500 stock investment in a renewable-  
20 energy firm in 2008. It was a perfectly legal bet, but he's no ordinary investor.

21 Reid's spokesman tried to defend the staffer, Reid's top energy policy adviser, by asserting  
22 that he had no influence over tax incentives for renewable energy firms.

23 -----

24 Under federal securities law, of course, it is not important whether the staffer had any  
25 influence over legislation, Sen. Reid or anyone or anything else.

26 If it can be shown that the staffer breached a duty of confidentiality in using "inside  
27 information" as the basis for buying and selling the stock, then he may very well be guilty of the  
28 crime of insider trading.

1 In May 2009, the Associated Press reported,  
2 Federal prosecutors and the FBI have been investigating possible illegal insider trading  
3 by two Securities and Exchange Commission enforcement attorneys who were in a  
4 position to receive sensitive information about agency probes of public companies.

5 Similarly, if the staffer had material information that the public didn't have and he took  
6 advantage of it in the buying and selling of securities, he could have committed a serious crime —  
7 as well as anyone he may have tipped off.

8 Reid's staffer has denied wrongdoing, but that should not be dispositive.

9 The Department of Justice, FBI and U.S. Securities and Exchange Commission ought to be  
10 investigating the staffer as well as any other potential insider trading violations described in the  
11 WSJ article.

12 At the very least, the staffer should be afforded the same opportunity as Martha Stewart to  
13 chat with federal investigators — that worked out so well for her.

14 Don't expect this to happen, however, as Sen. Reid and other members of Congress  
15 will no doubt quietly work to quash any investigation.

### 16 **Big Brother Has Turned Green**

17 The environmental movement has cultivated a warm and fuzzy public image, but behind the  
18 smiley-face rhetoric of "sustainability" and "conservation" lies a dark agenda. The Greens aim to  
19 regulate your behavior, downsize your lifestyle, and invade the most intimate aspects of your  
20 personal life.

21 In this stunning expose, Steve Milloy unveils the authoritarian impulse underlying the Green  
22 crusade. Whether they're demanding that you turn down your thermostat, stop driving your car, or  
23 engage in some other senseless act of self-denial, the Greens are envisioning a grim future for you  
24 marked by endless privation.

25 Steamrolling nearly all opposition with its apocalyptic predictions of environmental doom,  
26 the Green movement has gained influence throughout American society--from schools and local  
27 planning boards to the biggest corporations in the country. And their plans are much more  
28 ambitious than you think, says Milloy. What the Greens really seek, with increasing success, is to  
dictate the very parameters of your daily life--where you can live, what transportation you can use,

1 what you can eat, and even how many children you can have.

2 Citing the tactics and goals of Green groups as explained by their own activists and leaders,  
3 *Green Hell* demonstrates:

4 \* How Green pressure campaigns threaten the safety of your home and your car, and public  
5 health overall

6 \* Why the election of President Obama portends a giant leap forward for coercive Green policies

7 \* Why Greens obstruct the use of all forms of energy--even the renewable sources they tout to the  
8 public

9 \* How wealthy Green elites stand to profit fabulously from the restrictions and regulations they  
10 seek to impose on the rest of us

11 \* How Green pressure campaigns are hamstringing the military and endangering our national  
12 security

13 \* Why big business is not only knuckling under to the Greens, but is aggressively promoting the  
14 green agenda to the detriment of its own stockholders

15 \* What you can do to help stop the great Green machine

16 A one-of-a-kind, comprehensive takedown of the entire environmental movement, *Green*  
17 *Hell* will open your eyes to a looming threat to our economy, our civil liberties, and the entire  
18 American way of life.

19 '*Green Hell* explains why Americans can't afford to fall for Al Gore's 'the debate is over'  
20 line on global warming. While we're all for the environment, *Green Hell* explains why we need to  
21 oppose the environmentalists."

22 --Fred Barnes, Executive Editor, the *Weekly Standard*

23 "*Green Hell* is the 'inconvenient truth' on extremist, growth-killing environmentalism. A  
24 must-read for those interested in keeping America free and prosperous."

25 --Steve Forbes, President and Chief Executive Officer of Forbes

26 "Regardless of whether you believe global warming is a fraud, the fact is that the current  
27 depression, the past spike in oil prices, and the coming technology of electric cars are all going to  
28 solve whatever problem exists. Liberals want to use climate change as an excuse to take over the

1 economy and regulate everything and this book exposes their plans."

2 --Dick Morris, FOX News commentator and former political consultant to Bill Clinton

3 "This book describes why the world can't afford to fall for global warming alarmism and  
4 environmental hysteria. Steve Milloy shows how to avoid the environmentalists' vision of our  
5 future."

6 --VACLAV KLAUS, President of the European Union and President of the Czech Republic

7 "Free market capitalism is still the best path to prosperity. *Green Hell* is a must-read for  
8 anyone who wants to keep America on that path and away from Soviet-style command-and-control  
9 environmentalism."

10 --Larry Kudlow, Host, CNBC's *The Kudlow Report*

11 Former President Barack Obama liked to portray himself as a politician watching out for the  
12 little guy.

13 But it looks like he spent much more time protecting his rich friends – and manipulating the  
14 government to help make them a fortune.

15 It was all part of a scheme that looks a lot like insider trading – or what author Peter  
16 Schweizer calls “smash and grab.”

17 In his new book, *Secret Empires: How the American Political Class Hides Corruption and*  
18 *Enriches Family and Friends*, Schweizer lays out how Obama used government regulations to help  
19 lifelong pals buy up companies for pennies on the dollar.

20 Basically, the Obama Administration would threaten and devalue companies, and Obama’s  
21 pals would be ready to swoop in and buy them on the cheap.

22 And apparently nobody ever stopped to consider the effect that this plot would have on  
23 ordinary shareholders – who lost millions – or the employees at the companies.

24 In an interview with Breitbart, Schweizer gives one shocking example – the case of Marty  
25 Nesbitt, who has been described as Obama’s “best friend.”

26 After Obama was reelected on 2012, Nesbitt set up a private equity firm called Vistria to  
27 invest in highly regulated industries – in other words, industries that Obama and his administration  
28 can help control.

1 Schweizer points to Vistria’s acquisition of online learning giant the University of Phoenix  
2 as an example of Obama and Nesbitt working together on a “smash and grab” deal.

3 The Obama Administration had threatened to withhold GI Bill money from the University of  
4 Phoenix over the quality of its education, sending its share price tumbling.

5 Then, Nesbitt and Vistria were able to purchase the university for “three cents on the dollar,”  
6 Schweizer reports.

7 After the deal was made, the Obama Administration withdrew its threat to withhold federal  
8 funds.

9 Schweizer says Obama repeated the strategy throughout his presidency to enrich liberal  
10 billionaires like Tom Steyer and George Soros, who have both worked to ruin current President  
11 Donald Trump.

12 “Barack Obama smashes coal companies, [and] what do these guys do? They go in, they buy  
13 them for pennies on the dollar, and when the regulatory weight is lifted, their valuations increase,  
14 and they make a lot of money, and you see that pattern in all of these industries,” Shweizer said.

15 And what happens to other shareholders – the ones who aren’t friends with Obama? They’re  
16 left holding the bag when the companies are devalued.

17 Schweizer says that some of the ill-gotten gains realized by Obama’s friends eventually  
18 found their way to the Obama Foundation.

19 It’s a scheme that absolutely cries out for a federal investigation. But with so many Obama  
20 puppets still left in the government, we won’t be holding our breath.

26  
27  
28

1  
2 **EXHIBIT 44 - How The Quid Pro Quo In This Case Works At The U.S.**  
3 **Dept Of Energy**

4  
5 How do you give payola, funded by working class taxpayers, to millionaires that don't need  
6 it, to pay kick-backs for funding Obama's political marketing?

7 Easy: You use the **U.S. Department of Energy** as the world's biggest political slush-fund.  
8 This way, you get to pay bribes IN PLAIN SIGHT!

9 The U.S. Government bosses get to claim everything is on the "up and up" but EVERY  
10 SINGLE TIME, only the political campaign financiers get the money and their competitors get  
11 sabotaged. Neat trick, right?

12 Here is how it works:

13 **Quid pro quo** ("something for something" in [Latin\[2\]](#)) is a [Latin phrase](#) used in [English](#) to  
14 mean an exchange of goods or services, in which one transfer is contingent upon the other; "a favor  
15 for a favor". Phrases with similar meanings include: "give and take", "[tit for tat](#)", "you scratch my  
16 back, and I'll scratch yours", and "one hand washes the other". Other languages use other phrases  
17 for the same purpose.

18 Corruption in politics at The U.S. Government arises from the mismatch on Capitol Hill:  
19 squadrons of well-paid, experienced lobbyists versus GOVT offices where aides are overworked,  
20 underpaid and have to depend on those lobbyists for information about issues. We want to see  
21 GOVT offices with more aides, supervised by FBI agents, who would get better pay, to keep them  
22 on the Hill longer while they develop their own expertise. We would also close the metaphorical  
23 revolving door, through which staffers and lawmakers travel to make more money as lobbyists.

24 The need for campaign finance reform has always been an urgent one. The quid pro quo of  
25 shadow money and special interest campaign financing is at the root of corruption in this country,  
26 particularly at the Department of Energy. When government uses millions of taxpayerdollars to  
27 rent a bond hastily acquired and for no clear purpose from a 'party financier', that is the spectre of  
28 campaign finance related corruption showing itself. When construction companies that finance

1 political campaigns to the tune of millions are being awarded public work contracts worth billions  
2 under questionable public tendering rules, that is campaign finance related corruption. When a  
3 branding company that provided 'free' billboards to a political campaign is given the lion's share of  
4 billboard and branding contracts under a new government, we see the spectre of corruption. And  
5 then of course there is the issue of abuse of state resources for campaigning, something we seem to  
6 have come full Animal Farm on.

7         Elon Musk, Solyndra, Fisker, Abound and over a hundred other wire transfers from The  
8 U.S. Government were quid-pro-quo payoffs to Obama financiers. The layers of the deals were  
9 complex but the money always ended up in the same few pockets.

10         The U.S. Government has a massive fake due diligence program which spends a hundred  
11 times more time and money than any bank undertakes to provide funds. All of that due diligence is  
12 a fraud. It is a smoke-screen to provide the appearance of "proper review" when, in each and every  
13 case, the funds were covertly already arranged in a back room deal.

14         All of those people that work on those due diligence efforts must feel like fools. Their work  
15 is pointless because the deals were already done in smoke-filled back rooms at Perkins Coie,  
16 Wilson Sonsini and Covington Burling lobbyist buildings. All of The U.S. Government staff own  
17 the stock of the company that "wins" the government cash and most of them leave the Department  
18 of Energy, right after the money is transferred, and go to work at that company or it's suppliers.

19         It is an EPIC crime!

20         Now, the need for reform is even more urgent, particularly considering the complexity of  
21 how capital moves in an oil and gas economy and the impact of that capital on political decision-  
22 making. (ie: "...One emerging party, for example, has been against renegotiation of the oil contract  
23 with Exxon, arguing that we should accept it and guard against ePlaintiff 42loitative arrangements  
24 with future contracts. When The U.S. Government recently revealed that it had recently hired a US  
25 firm to do what should have been done years ago, revise the decades-old Petroleum (ePlaintiff  
26 42loration and Production) Act, it was casually revealed that the local firm the US company had  
27 partnered with is owned by the Presidential Candidate of the very new party that has – along with  
28 the PPP and APNU+AFC – refused to consider contract renegotiation, even in the wake of the

1 damning Global Witness report....")

2 By breaking the close bonds between lobbyists and congressional offices, lawmakers might  
3 become less beholden to the lobbyists' employers — the corporations, unions and special interests  
4 that underwrite American politics.

5 As value is in the eye of the beholder, the something being exchanged for another something  
6 may not be equal in value, instead skewed based on one's perspective.

7  
8 Democrats and their media masters are salivating over now having what they believe is a smoking  
9 gun to take down President Trump. Notwithstanding that this must be their hundredth smoking gun,  
10 and that each previous one misfired, they are hot on impeachment over this Latin term "quid pro  
11 quo."

12  
13 The [Washington Post](#), happy to let democracy die in darkness while they endeavor to overturn the  
14 last presidential election, is giddy over quid pro quo.

15  
16 In politics, quid pro quo is standard operating procedure. Take campaign contributions, for example.  
17 I contribute to Senator X because I want Senator X to support legislation favorable to my business  
18 interests. My money, something of value, will be exchanged for a tax break or new regulation,  
19 which is usually of greater value to me, as a quid pro quo, and perfectly legal and acceptable.

20  
21 A bundler for a presidential candidate raises millions of dollars for said candidate. If that candidate  
22 wins the presidency, the bundler may have a choice of any number of ambassadorships around the  
23 world. The value of the campaign cash is exchanged for a four-year stint living in the American  
24 embassy in London or Paris, attending parties and banquets. Something for something.

25  
26 Members of Congress do the quid pro quo thing amongst themselves all the time. I'll vote for your  
27 bill to build a military facility in your district if you support my bill creating an NSA data center in  
28 my district. In Congress it's called "horse trading."

1  
2 What about economic sanctions? The [Council on Foreign Relations](#), also known as Club Deep State,  
3 explains how economic sanctions work.

4 Governments and multinational bodies impose economic sanctions to try to alter the  
5 strategic decisions of state and nonstate actors that threaten their interests or violate  
international norms of behavior.

6 Economic sanctions are defined as the withdrawal of customary trade and financial  
7 relations for foreign- and security-policy purposes.

8 Sanctions take a variety of forms, including travel bans, asset freezes, arms embargoes,  
capital restraints, foreign aid reductions, and trade restrictions.

9  
10 Quid pro quo, something for something. If you want American money in terms of trade or aid, you  
11 had better behave, meaning do as we tell you to do in your political and economic decisions.

12  
13 Here are a few examples of quid pro quo economic sanctions.

14  
15 Economic sanctions were put in place against Cuba in 1958. Similar sanctions have been in place  
16 against North Korea since the Korean War. Economic sanctions have been in effect against  
17 Venezuela since 2015 and Sudan since 1997. These are quid pro quo moves -- behave, give up your  
18 nukes, provide human rights, or we will punish you economically. Something for something.

19  
20 Several of the ladies of [the Squad hinted](#) at cutting off aid to Israel after one of the gals was denied  
21 entry to Israel last summer. Presidential candidate [Bernie Sanders threatened](#), “Israel would have to  
22 ‘fundamentally change’ its relationship to Gaza to receive aid if he is elected.” Something for  
23 something, quid pro quo.

24  
25 Three Democratic senators [wrote a letter](#) to Ukraine’s prosecutor general,

26  
27 ePlaintiff 42ressing concern at the closing of four investigations they said were critical  
28 to the Mueller probe. In the letter, they implied that their support for U.S. assistance to  
Ukraine was at stake.

21  
22  
23  
24  
25  
26  
27  
28

They wanted something for something, quid pro quo.

Then Vice-President Joe Biden, in a now well-known interview, [acknowledged](#), “I looked at them and said: I’m leaving in six hours. If the prosecutor is not fired, you’re not getting the money. Well, son of a b-tch. He got fired.” Quid pro quo, something for something.

So, what did Trump do? He asked the Ukrainian President to investigate corruption, specifically foreign interference in a U.S. election. Biden was an afterthought in the conversation, but his pay to play corruption is fair game, whether or not he is running for president. Until he secures the Democratic party nomination, he is not Trump’s political opponent. What if Bernie or Pocahontas win the nomination?

Trump has a constitutional duty as president to investigate corruption. The U.S. and Ukraine share a [treaty ratified in 1999](#) for “Mutual assistance in criminal matters.”

There is also “The United Nations Convention against Corruption” of 2003, [signed by both](#) Ukraine and the U.S. And then finally is President Trump’s [Executive Order](#) signed in December 2017, “Blocking the property of persons involved in serious human rights abuse or corruption.”

Note that last word.

Trump is doing his job as president, yet the Democrats and media howl in outrage over a supposed quid pro quo. But something for something is standard operating procedure in Washington, D.C., even to the point of corruption as Joe Biden illustrated in Ukraine, China, and possibly Romania.

The psychologists call this Democratic caterwauling “projection,” accusing others of doing what you are guilty of. Trying to impeach President Trump over a quid pro quo would be like impeaching him because he didn’t keep a campaign promise, something every elected official, past and present,

1 is guilty of.

2           Since its ruling in Buckley v. Valeo, the U.S. Supreme Court has expressed concern  
3 regarding corruption or the appearance of corruption stemming from political quid pro quo  
4 arrangements and the deleterious consequences it may have on citizens' democratic behavior.  
5 However, no standard has been set as to what constitutes "the appearance of corruption," as the  
6 Court was and continues to be vague in its definition. As a result, campaign finance cases after  
7 Buckley have relied on public opinion polls as evidence of perceptions of corruption, and these  
8 polls indicate that the public generally perceives high levels of corruption in government. The  
9 present study investigates the actual impact that perceptions of corruption have on individuals'  
10 levels of political participation. Adapting the standard socioeconomic status model developed most  
11 fully by Verba and Nie (1972), an extended beta-binomial regression estimated using maximum  
12 likelihood is performed, utilizing unique data from the 2009 University of Texas' Money and  
13 Politics survey. The results of this study indicate that individuals who perceive higher levels of quid  
14 pro quo corruption participate more in politics, on average, than those who perceive lower levels of  
15 corruption.

16           Quid pro quo is not a difficult concept to understand. Too bad the media doesn't endeavor to  
17 investigate and explain it. Your politicians don't work for you, they work for their own insider  
18 trading stock market holdings for themselves!

19           This is about a group of U.S. Senators, Silicon Valley Oligarchs, Detroit Oligarchs, Crooked  
20 Law Firms and Lobbyists who commit crimes in order to manipulate over a trillion tax dollars into  
21 their, and their friends pockets. They use "*stimulus*" funding and tell the public: "*don't-ask-*  
22 *questions, it's-an-emergency*" as a trick to fool you.

23           They use media monopoly tricks to try to shut out any other viewpoints. They push  
24 manufactured "*emotional trigger*" issues that they believe will get more tax money allocated to  
25 "*issue solutions*" that they, and their friends, happen to already own the vaccine, windmill, electric  
26 car and battery monopolies for.

27           They are felons, yet they control some of the offices of the agencies who are supposed to  
28 arrest them. Silicon Valley bought K Street lobby firms and U.S. Senators, gave them more 'Dark

1 Money' than history has ever seen and then had giant tech-law firms bribe, hit-job and blockade any  
2 attempts to arrest them.

3 ***The U.S. Government hired the Plaintiffs/victims, paid them only part of their money,***  
4 ***then defrauded the Plaintiffs by asking them to spend THEIR life savings and years of their time***  
5 ***on the government's federal project based on lies and false-promises from government bosses at***  
6 ***the White House, Congress and The Department of Energy. Then they took the assets Plaintiffs***  
7 ***were asked to invest, plus the money they owed Plaintiffs, and gave it to their friends and***  
8 ***financiers at Google, Tesla and other crony operations. When Plaintiffs reported the crimes to***  
9 ***the FBI, Congress and the SEC, government officials hired Fusion GPS, Gawker, Gizmodo,***  
10 ***Media Matters and other hit-job services to run "hit-jobs" on Plaintiffs and threaten their lives.***

11 As a group of domestic citizens, some of the Plaintiffs filed FBI complaints and lawsuits  
12 against The U.S. Government and their senior staff along with lawsuits against a rogue Silicon  
13 Valley off-shoot of the CIA called "In-Q-Tel". These citizens instigated Congressional corruption  
14 investigations and hearings against the most senior members of the State and Federal government.

15 These actions resulted in the termination of very famous public officials (Steven Chu, Eric  
16 Holder, James Comey, etc.) and their crony criminal embezzlement scams. These investigations  
17 almost resulted in the President being forced to leave office, mid-term, based on revelations of a  
18 massive crony campaign finance kick-back scheme which began to be exposed after the FBI raid of  
19 Solyndra.

20 The director of the FBI was fired for assisting in cover-ups related to this matter.

21 The Detroit car Cartel oligarchs had written the hard-wired money give-away for  
22 Department of Energy ATVM and LGP funds, exclusively for themselves, and wanted the money in  
23 exchange for Obama votes of union members.

24 Silicon Valley oligarchs heard about the deal and wanted half of it for themselves in  
25 exchange for web-rigging search engines and media for Obama-votes. In particular: Elon Musk got  
26 government money by bribing public officials and stacking hundreds of his friends and  
27 shareholders, ie: Steven Chu, Matt Rogers, Steve Westly, Steve Spinner's 'special friend', investor  
28 Google's employees, etc. on the staff of The U.S. Government and in the White House. In other

1 words, hundreds of Elon Musk's friends and financiers from Silicon Valley (Mostly from his  
2 investor: Google) were placed in the very offices that decided if he got the government funds.

3 Our team has FBI-class records, financial tracking, emails, stock market relay records and  
4 other forensic data that proves the assertions in this book.

5 The Plaintiffs can swear, warrant, certify and prove these assertions in front of: 1.) Congress  
6 in a live Congressional hearing or 2.) in Civil Jury trial, given non-compromised legal backing or  
7 3.) before a Grand Jury criminal hearing.

8 Musk bribed Senators, bought a President and had his buddies take over most of the  
9 Department of Energy. Lithium metals, and other rare earth mining materials, are monopolized by  
10 Elon Musk and his Silicon Valley Cartel, in rare-earth corrupt mining scams. Ford and Tesla had  
11 insiders (<https://forums.tesla.com/forum/forums/tesla-should-partner-somehow-ford> )

12 who kept trying to merge or JV them but the personality clashes kept it from happening. The  
13 Detroit Cartel and the Silicon Valley Cartel have cultural differences that always keep them at  
14 loggerheads.

15 The natural-born American domestic group of engineers Plaintiffs were attacked with a \$30  
16 million dollar+ retribution/political reprisal program contracted by White House political  
17 operatives, and their appointees, who were also the business competitors of the engineers.

18 The attackers used Fusion GPS-type character assassination smear campaigns (operated by  
19 their cronies at Google, Gawker, Gizmodo, Jalopnik and Facebook), NVCA black-listing, Solyndra-  
20 laundering, stone-walling, Lois Lerner-class agency manipulation and search engine rigging. In-Q-  
21 Tel turns out to be the only federally financed "charity" whose staff are also employed by each of  
22 the suspects in this case and who financed the suspects in this case.

23 It was revealed that White House executives ordered government agencies to harm members  
24 of the public and to reprisal with-hold public resources from the public. This was a violation of tort,  
25 RICO and anti-trust laws.

26 ***BUT...***

27 ***The victims fought back.***

28 With the encouragement of members of Congress they used 100% legal tools to interdict the

1 corruption.

2       Essentially; they helped the United States government sue itself!

3       **First**, with a unique new kind of pioneering federal lawsuit, victims established — FOR  
4 THE FIRST TIME IN LEGAL HISTORY — that political cronyism is a valid basis for a claim of  
5 arbitrary-and-capricious agency action under the Administrative Procedure Act. See: Federal Case  
6 One, (D.D.C. 2015).

7       **Second**, they prevailed in the United States Court of Appeals for the District of Columbia  
8 Circuit on their appeal of the district court’s ruling that an agency may escape judicial review of its  
9 action by requesting a voluntary remand but refusing to reconsider its initial denial of an  
10 application. See: Case Federal Two, (D.C. Cir. 2017). The Washington DC Circuit agreed with the  
11 victims that an agency may only seek a remand if it promises to reconsider its initial decision. It is  
12 because of that victory that the government, under court and FOIA orders, is now reviewing  
13 charges filed by Plaintiffs and GAO, FBI, Inspector General and Congressional oversight offices are  
14 watching to assure effective ethics and transparency.

15       **Third**, these cases placed, on permanent public record, one of the most detailed  
16 documentation sets, ever assembled, about how modern political "Dark Money" conduits operate.  
17 Plaintiffs placed the records an evidence in global repositories and ‘torrents’ around the globe on  
18 public record forever. The legal team hired ex-FBI, CIA and SEC experts to track down covert bank  
19 accounts, revolving door bribes, insider stock trades and other payola between the victim's  
20 competitors and public officials. This documentation now prevents the use of those kinds of  
21 criminal efforts, in the future, by ePlaintiff 42osing their tactics to the public. This was one of the  
22 goals of the case: TO CREATE PERMANENT PUBLIC exposure OF THIS KIND OF  
23 CORRUPTION!

24       **Fourth**, the victim's team engaged in the interdiction and termination of corrupt agency  
25 executives, contractors and their financiers. This included some of the most well-known names in  
26 Washington, DC, at the time. Many of them were, and are still being, investigated and surveilled by  
27 the FBI, GAO, SEC and Congress.

28       **Fifth**, and most important, the effort put every corrupt political scheme on notice that they

1 WILL be found out and interdicted!

2       The bottom line? The victims group WON on every single aspect of their public-interest  
3 goals but still have yet to be recompensed for their damages!

4       Now the "bad guys" have less options to engage in the corruption of our Democracy and the  
5 COVID dynamics have made all of them more desperate! Desperate crooks make bigger mistakes!

6       **The AI software this team helped create can now hunt down**  
7 **every single one of them and report them to every voter in the nation,**  
8 **every regulatory agency, every news outlet and every law enforcement**  
9 **agency.**

10       **Now with the push of a button on your smart phone or home**  
11 **computer, you can expose the criminals in our Democracy and end**  
12 **corruption!**

1 **EXHIBIT 45 - The Corrupt Crony-Capitalism Quid Pro Quo Payola**

2  
3 Sycophant scumbags at The U.S. Government are covering up these crimes because they own stock  
4 in, and get contracts and revolving door jobs from, Elon Musk, Google, et al. The U.S. Government  
5 is a deep, dark, smug abyss of crony payola, kick-backs, market monopolization, bribes and insider  
6 corruption beholden to the tech cartel. Google, Facebook and Silicon Valley are a private  
7 government that is more powerful than The U.S. Government . They use The U.S. Government as  
8 their bitch! These people put mobster-like 'hit-jobs' on the victims and operated state-sponsored  
9 attacks against them because they reported the crimes to law enforcement.

10           If you don't believe that Silicon Valley is operated by an organized crime cartel of sociopath  
11 frat boys that are protected by famous Senators and public officials, who own their stock and get  
12 their campaign cash, then here is absolute proof of the crimes and the cover-ups that go all the way  
13 to the White House. We conducted an exhaustive, decades-long, investigation deep into the roots of  
14 modern political corruption and here is how it works and how to destroy it!

15  
16  
17  
18  
19  
20  
21  
22  
23  
24  
25  
26  
27  
28

1  
2  
3 **EXHIBIT 46 - The Blockades Of The Victim’s Legal Representation**  
4

5 "Government staff and contractors have told us: “just sue us”. This was their response to  
6 trying to resolve this issue.

7  
8 That response, by government officials, is a felony violation of Constitutional law, human rights  
9 law, State and Federal public policy directives, the ePlaintiff 42ectations of the national citizenry  
10 and the principles of Democracy.

11  
12 The government response is, thus legally “non-responsive” and a threat to every voter and citizen.

13  
14 Our previously filed demand, attached hereto as a PDF document under the title: “VICTIM  
15 DEMAND Jan 12 2020.pdf” proves that no care or attention was paid to Plaintiffs previously filed  
16 complaint by your office except to operate a cover-up campaign. Any cover-up campaign of this  
17 felony organized crime matter subjects each, and every, government employee and contractor  
18 involved in said cover-up to felony arrest and prosecution.

19  
20 You have blocked Plaintiffs from getting a lawyer or getting any legal help. That is a felony  
21 violation of the law and an abhorrent violation of U.S. and State Constitutional and human rights.

22  
23 The current tactics being used to prevent Plaintiffs from their legal rights include:

24  
25 **A.** Plaintiffs have been “black-listed”. Even though the law in California (Cal. Lab. Code § § 1050  
26 to 1053) says that an entity can't prevent or attempt to prevent former workers from getting work or  
27 representation through misrepresentation, knowingly permitting or failing to take reasonable steps  
28 to prevent blacklisting, or make a statement about why an employee was discharged or left

1 employment, implying something other than what is explicitly said, or providing  
2 information that was not requested: It is done every day in Silicon Valley. The "Silicon Valley No  
3 Poaching Black-List" class-action lawsuit was about this issue. Federal FAR Section 9.104-1 (d),  
4 and related laws, apply. Blacklisting is a key part of the IC Vendetta Cycle attacks. The victims also  
5 suffered damage to their rights under the Age Discrimination in Employment Act (ADEA) (29 USC  
6 Sec. 621, et seq.); the Americans with Disabilities Act (42 USC Sec. 12181, et seq.); the Civil  
7 Rights Acts - (42 USC Sec. 2000, et seq.); the Davis-Bacon Act (40 USC Sec. 276a, et seq.); the  
8 Employee Retirement Income Security Act (ERISA) (29 USC Sec. 1001, et seq.); the Equal Pay  
9 Act (29 USC Sec. 206[d]) and other violations.

10  
11 **B.** Each and every law firm capable of handling Plaintiffs case has been contracted, paid and/or  
12 influenced so that they are “conflicted out” from representing Plaintiffs. Law firm Mofo was  
13 threatened if they helped Plaintiffs. Lawyer Amy Anderson was threatened and lost her license for  
14 attempting to help Plaintiffs. Every lawyer or law firm who attempts to help Plaintiffs are hired by  
15 Defendants, or their agents and threatened or compromised in order to prevent them from helping  
16 Plaintiffs because this case affects trillions of dollars of energy industry profits, the White House,  
17 billionaire oligarchs and multi millionaire corrupt Senators. In fact, this issue lies at the root of this  
18 entire corruption case. Sociopath over-moneyed Silicon Valley oligarchs have hire Morrison  
19 Foerster, Wilson Sonsini, Perkins Coie, Covington Burling and every other major law firm and  
20 lobbyist and told them to “kill everyone and destroy everything that I don’t like...”. These law firms  
21 (controlled by Mark Zuckerberg, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod  
22 Khosla, Laurene Powell Jobs, Nancy Pelosi, etc. All of whom have nearly a trillion dollars of funds  
23 at their disposal) have carte blanche and unlimited payments to run coups, character assassination  
24 campaigns, money laundering and other crimes for the oligarchs. They have the staffing to do these  
25 things and zero incentive to not do crimes. These law firms are the dirty deeds teams for the  
26 mobster-like suspects and there is no law enforcement body with the will nor resources to stop  
27 them. It is a violation of the U.S. Constitution to tell Plaintiffs to “go get a law firm” when EVERY  
28 possible, equitable, law firm works for, and is massively compensated by, the criminals that need to

1 be sued. Both the politicians AND the tech oligarchs charged with these crimes have hired the very  
2 law firms that government agencies have told Plaintiffs to go out and hire.

3  
4 **C.** There is a precedent that was set in the US Supreme Court case: Gideon v. Wainwright, (1963)  
5 that clarifies that you have a right to a lawyer even if you don't have money for one. The Sixth  
6 Amendment, as applied to the states through the Fourteenth Amendment Due Process Clause gives  
7 one their Due Process rights. One needs to kill someone, though, to most easily get your free  
8 lawyer, since the court-appointed lawyer is rarely ever appointed, on citizens behalf, in a case like  
9 this. Even if a defendant is represented by an attorney of his or her choosing, he or she may be  
10 entitled to relief on appeal if the attorney did not provide adequate representation. A defendant must  
11 demonstrate that the attorney's performance "fell below an objective standard of reasonableness"  
12 and that this was prejudicial to the case. See: Strickland v. Washington (   
13 <https://supreme.justia.com/cases/federal/us/466/668/case.html> ) , 466 U.S. 668, 688-92 (1984). A  
14 few "free lawyers", that victims had tried, turned out to be working for the opposition side.

15  
16 **D.** The federal organization: <https://www.lsc.gov> is required to help but has refused because it's  
17 administrators were friends with, and appointed by, the public officials charged with corruption in  
18 this case.

19  
20 **E.** Plaintiffs have personally asked the Attorney General, The Director of the FBI and the U.S.  
21 Attorney's office for representation but they have been told not to respond because the case is  
22 politically embarrassing to major public officials and their corrupt Silicon Valley financiers.

23  
24 **F.** The government agencies who have told Plaintiffs that Plaintiffs should "hire a law firm and sue  
25 them", in order to resolve this matter, are the same government agencies that have cut-off, or  
26 blockaded Plaintiffs income sources in order to prevent Plaintiffs from being able to afford to hire a  
27 law firm to sue them.

1 **G.** A federal agency provided Plaintiffs with a list of “free lawyers”. Upon FBI-level investigation  
2 of every “free lawyer” on the list, (via their financial contributions, voting records, leaked emails,  
3 social media postings, event attendance, public records, social connections lists online and other  
4 surveillance data) they all worked for, or with the opposition interests and could not have possibly  
5 provided unbiased services. In fact, multiple lawyers have contacted Plaintiffs who turned out to be  
6 working for the opposition. They were sent in to delay, or redirect, Plaintiffs in order to keep the  
7 cases from being filed or properly prosecuted in order to protect the suspects. This is a common  
8 infiltration procedure widely documented in CIA, British secret service, Russian FSB and Snowden  
9 leaks documents on IC dirty tricks tactics.

10  
11 Agency staff were ordered to harm Applicants by manipulating their benefits in order to deny,  
12 delay, obfuscate and reduce their income as reprisal for their assistance to law enforcement in a  
13 political corruption and money laundering matter. Agency staff, ranging from the lowest level staff  
14 and up to the director headquarters offices, participated in this reprisal-vendetta-revenge action to  
15 harm Applicants.

16  
17 Applicant’s peers have filed DOJ and FBI criminal referrals, launched federal investigations and the  
18 assertions have been proven in numerous IG, FBI, Congressional and major news media  
19 investigations. Agency offices have failed to provide responsive FOIA requested data, hearing  
20 investigation data and fair responses because some of their staff are STILL operating a criminal  
21 cover-up which has now been update-reported to the FBI, Congress, the IG, the AG and  
22 investigative reporters.

23  
24 Other federal agencies have complied, verified and provided the requested deliverables. SSA and  
25 GOVT have pointed the searchlight of suspicion on themselves, laser-like, by their overt failure to  
26 comply, unlike every other agency. Ironically, the political financing of their executives and their  
27 personal relationships “happens” to be with the exact same Silicon Valley oligarchs under felony  
28 criminal investigations. The stock market brokerage records, family trust accounts, PAC trace-

1 routing, Interpol records and SEC investigation records proves it!

2  
3 Unfortunately for the crooked agency staff, some Applicants have the authority, law enforcement  
4 credentials and training to arrest any person at their home or office and remand them to the FBI,  
5 DOJ or Sheriff. For example: Every “unsigned” SSA email is tracked to the individual author by  
6 their IP address, device IMEI, web camera, building key card, door camera, parking lot use chart,  
7 building camera, vehicle tracking circuits, text dba records, keyboard UI/UX patterns, motherboard  
8 ID #, DNS routing, stingray read-outs and a vast number of other metrics. Applicant investigation  
9 peers know the exact person that wrote every SSA email or document or file request. There is no  
10 such thing as an anonymous SSA email. Transparency is the Applicants middle name. The FBI and  
11 CIA people that SSA and GOVT insiders think are their “buddies” may actually be the  
12 APPLICANTS buddies!

13  
14 You will either give the Applicant his money and damages compensation, or suffer the  
15 consequences of the rapid acceleration of one of the largest investigations in modern history,  
16 supported by millions of voters with a shared peer-to-peer forensics social media network, the FBI  
17 and Congress. With the push of a single button, our latest info can be in the inbox of every blogger  
18 and independent investigative journalist in the world, in minutes.

19  
20 History has proven that non-corrupt portions of federal agencies and public service law and  
21 community action firms have executed on their willingness to ePlaintiff 42end millions of dollars of  
22 resources to fight this injustice. Every individual involved in this at SSA and GOVT are on a  
23 forensic database. No person at SSA or GOVT who uses our government as a garage sale for  
24 corruption favors or a kill mill for political reprisals will avoid the 100% legally executed  
25 consequences. They will be targeted and prosecuted even more profoundly than the Applicants were  
26 targeted with IC-type hit jobs.

27  
28 This felony criminal investigation case, is documented on thousands of websites and in dozens of

1 federal court case records in which Applicant won the case or was vindicated in the case and in  
2 thousands of news websites.

3  
4 Applicants researchers and investigators disagree with any decision by any agency which causes a  
5 delay in response which puts the applicants in jeopardy for their life and safety.

6  
7 Testifying, and/or reporting about this crime has resulted in the death, potentially by murder, of the  
8 following individuals who reported to the authorities about this crime matter:

9  
10 Rajeev Motwani; Gary D. Conley; Seth Rich; Philip Haney; David Bird; Doug Bourn; Misti  
11 Epstein; Joshua Brown; Kenneth Bellando; Moritz Erhardt; Imran Aliev; Kate Matrosova; David  
12 Drye; Vincent Foster; Kathy Ferguson; Duane Garrett; Eric S. Fox; Judi Gibbs; Berta Caceres;  
13 Suzanne Coleman; L.J. Davis; John Hillyer; Stanley Huggins; Sandy Hume; Shawn Lucas; Gary  
14 Johnson; John Jones; John F. Kennedy, Jr.; Stephen Ivens; Mary 'Caity' Mahoney; Eric Butera;  
15 Danny Casolara; John Ashe; Tony Moser; Larry Nichols; Joseph Rago; Ron Brown; Bob Simon;  
16 Don Adams; Peter Smith; Victor Thorn; Lori Klausutis; Gareth Williams; Daphne Caruana Galizia;  
17 James D Johnston; Dave Goldberg; Loretta Fuddy; Paul Wilcher; Gary Webb; Beranton J.  
18 Whisenant Jr; Stanley Meyer; Jon Parnell Walker; Tyler Drumheller; Barnaby Jack; Dominic Di-  
19 Natale; Barbara Wise; Ilya Zhitomirskiy; Jeff Joe Black; Robin Copeland; John Wheeler; Ashley  
20 Turton; Michael Hastings; Antonin Scalia; David Koschman; David Werner; Alex Okrent; Kam  
21 Kuwata; Larry Frankel; And hundreds more connected to this case who suddenly, and strangely,  
22 turned up dead in this case and, ironically, their deaths all benefit the suspects in this case.

23 Applicants are also whistle-blowers who have been previously attacked in reprisal and who have  
24 been threatened with continued harm and death.

25  
26 Any delay, obfuscation, cover-up, FOIA refusal or other obscuring tactic by each and every member  
27 of an agency employee or contracting entity will be prosecuted on a person-by-person basis. Each  
28 employee or official who causes, by their action, further harm to the Applicants will be sued

1 personally, have their assets garnished and will have a formal criminal referral authored and  
2 submitted to the FBI, DOJ, FTC, Congress and the news media. Applicants have sued the highest  
3 level personnel in the government for corruption, launched FBI and Congressional investigations  
4 against them and had them removed from their jobs and placed under permanent surveillance. The  
5 court and news records prove this fact. Do not imagine that any reprisal action by a public agency  
6 staffer will go unnoticed or unpunished by federal law enforcement, public forensics and major  
7 independent news media investigations.

8       The suggestion, by certain agency bosses, that one should "just file an IG report" is like  
9 telling someone to file a complaint against Hitler at the Nazi SS headquarters. You won't make it  
10 through the night! IG reports seem to accomplish nothing more than painting a target on your own  
11 back. Court records and news headlines prove that almost every citizen who reported similar  
12 political corruption through "official channels" was targeted with hit-jobs and economic  
13 blockades....ask Snowden!

14       What would you do if you found out that your politicians (ie: Dianne Feinstein, Nancy  
15 Pelosi, Harry Reid, Kamala Harris) had put over one hundred million dollars in their covert family  
16 bank accounts which they got from sabotaging your business, because it competed with them, and  
17 from blockading your money because their tech oligarch insiders told them to? Our forensic  
18 investigators can 'swear, warrant and certify' that the politicians did the asserted crimes and  
19 corruption.

20       Like a social *Terminex*(c) pest control service, we are eliminating every single tech asshole  
21 in Silicon Valley (like the roaches that they are) using 100% legal, law enforcement approved,  
22 resources.

23       You are probably asking: "***How Did Palo Alto, California Become Populated Entirely By***  
24 ***Assholes***"?

25       Why is the Tesla THE OFFICIAL CAR OF TONE-DEAF ARROGANT PRICK  
26 ASSHOLES!?

27       A glut of recent feature films ( ie: [The feature film: Assholes: A Theory](#) ) have excoriated  
28 the likes of Sand Hill Road and University Avenue scumbags...but pointing them out is not enough.

1 They must be exterminated. You can verify the following facts, yourself, via court records, police  
2 records, FBI reports, FOIA and Congressional records.

3 As U.S. Marshal Raylan Givens (Timothy Olyphant) famously opined on the TV show  
4 "**Justified**", "*You run into an asshole in the morning, you run into an asshole at lunch. You run into*  
5 *assholes all day*"; America on the precipice of the fallout of a monumental presidential election, it  
6 seems that assholes are not only everywhere you turn—in newspapers, on cable TV, at political  
7 rallies and protests, and all over social media—but that they, and their behavior, has been  
8 normalized because they own the media. Silicon Valley has a tsunami of "assholery" underway.  
9 This reality is covered in the philosophy of professor Aaron James' non-fiction book and new  
10 documentary aimed at both 1.) precisely defining the term "asshole," and 2.) investigating how  
11 those who fit that bill have increasingly come to dominate key spheres of modern public life.

12 Stanford University graduates are inspired by the likes of corrupt Elon Musk and corrupt  
13 Italian Prime Minister Silvio Berlusconi—the forerunner of the media-manipulating populist-  
14 criminal-strongman trend that's recently swept through Western nations—or passages discussing  
15 Facebook, Twitter and Google's prioritization of profit over their responsibility to safeguard  
16 democracy from hate speech and disinformation. Stanford and Yale have proven to be the key  
17 training grounds for beginner assholes. Eric Schmidt, Larry Page, Elon Musk, Jack Dorsey, Reid  
18 Hoffman, John Doerr, Vinod Khosla and Mark Zuckerberg are the embodiment of this problem.  
19 They flout all of the rules and standards of common decency. They have made it appear acceptable,  
20 and in fact rewarding, to act in the worst possible manner as a means of achieving one's selfish  
21 ends. Their Silicon Valley is the pit of American assholery. You can spot an asshole, easily, when  
22 they are driving the official car of assholes: A Tesla, but what about the ones that are more under-  
23 cover?

24 Most people that have been tech raped by a Palo Alto Sandhill Road scumbag feel the same  
25 way as Mr. Sun, who says: "*Silicon Valley Oligarchs must be punished. Without breaking a single*  
26 *law and WITH the help of the largest law enforcement and investigative resources on the planet, my*  
27 *task force has killed off every single motherfucker that has come after me with their anti-trust*  
28 *violating schemes, including some of the largest entities in the world! My peers and I use lawsuits,*

1 federal investigations, news reports, whistle-blowers, new public regulations, anti-trust filings, tens  
2 of millions of crowd-sourced voters and unique AI-based forensics. Our private investigators have  
3 found my every person and organization on the globe that hates the oligarchs. We gathered them  
4 together and aimed them all at the tech assholes! My rule is that **Anyone** who attacks me stays on  
5 the shit list for the rest of their lives plus the next 100+ years of internet time. When you  
6 Zuckerbergs, Larry Page;'s Elon Musk's, John Doerr's, Reid Hoffman's, etc., come for me, prepare  
7 to suffer. Every stock you buy is a notice to my team to bankrupt the company that you invested in.  
8 Even if I am dead, your punishment will be carried out by a legacy team of public volunteers. It may  
9 happen to you tomorrow or it may be a slow-drip over the next 15 years. Never stop looking over  
10 your shoulder. If you decided to cheat against our businesses rather than fairly compete against us,  
11 then start carving your tombstone. If you hired media attackers, ePlaintiff 42ect 100 times what you  
12 did to us to come back at you and your family forever! We are fine with "forgive-and-forget", except  
13 when it comes to criminal bullies: They are terminated!

14 He has pledged millions of dollars, from his family trust, to the effort. His AI database lists  
15 every investor, VC and executive in Silicon Valley, their family data and their "asshole ranking".  
16 Most of the people attacked and ripped off by the tech oligarchs feel the same way. None of the  
17 victims have the monopolized control of the big tech law firms like the tech oligarchs do. None of  
18 the victims can afford to have an army of crooked law firms (ie: Mofo, Covington & Burling,  
19 Perkins Coie, Wilson Sonsini, etc.) working around the clock to enable financial crimes, corruption  
20 and Democracy abuses.

21 To grasp the argument that these people are assholes, one need only listen to the Silicon  
22 Valley Assholes's basic description. As many state, "*The asshole is the guy who allows himself*  
23 *special advantages in Bay Area cooperative life out of an entrenched sense of entitlement that*  
24 *immunizes him against the complaints of other people.*" In other words, he's the individual—  
25 generally male, although as John Cleese candidly admits, his mother probably was one too—who  
26 thinks the general rules don't apply to them because they're somehow smarter, better, or more  
27 special than their fellow citizens. James' example is a surfer who violates the right-of-way customs  
28 in the ocean. Yet the type is universal, whether in line at the grocery store, on the road in traffic, or

1 at work. They're the arrogant creeps convinced they're fundamentally superior, and thus free to  
2 conduct themselves in whatever way they see fit. That IS the essence of scumbag megalomaniacs:  
3 Eric Schmidt, Larry Page, Elon Musk, Jack Dorsey, Reid Hoffman, John Doerr, Vinod Khosla and  
4 Mark Zuckerberg!!!

5 The way "they see fit", of course, is often hateful, perverse and idiotic. The Assholes thrive  
6 in a bubble of trophy wives, rent boys and superficial TED conferences. In the midst of ongoing  
7 protests and debate over America's own domestic culture, which has long had a tradition of closing  
8 ranks and demonizing critics, every Silicon Valley employee ordeal sounds eerily familiar among  
9 every worker at Google and Facebook.

10  
11 Such attitudes, according to the Silicon Valley Assholes are created by Stanford University  
12 Fraternities which are breeding grounds for horrid group-think mindsets about women and sex. The  
13 tech financial sector encourages greed, ruthlessness, and vulgarity as the best way to get ahead.  
14 Google executives champion initiation-ritual abuse in service of its own greater good. You can see  
15 the movies: *Animal House*, *The Wolf of Wall Street* and *Full Metal Jacket* to see the underscore of  
16 the notion that these milieus are all rife with a similar brand of assholery in which arrogance and  
17 entitlement justify all manner of despicable ideas and deeds. Every major rape fraternity in the USA  
18 eventually sent those abusive boys to run Sandhill Road venture capital companies and Google or  
19 Facebook departments.

20 Every executive at Google knows that they are doing crimes, lying to Congress and the  
21 public and operating the biggest scam in history. That is why they will come up with any lie, re-  
22 interpretation of the facts or denial to hide the truth!

23  
24 Any Presidential Administration that puts sociopath, Epstein-like Eric Schmidt, Larry Page or ANY  
25 Google executive IN their Administration is either proving their tone-deaf lack of awareness of the  
26 facts or that their President is such a bitch to Google's campaign cash that they could not possibly  
27 be trusted by any world leader or any citizen. ( See: [https://therevolvingdoorproject.org/letter-to-](https://therevolvingdoorproject.org/letter-to-oppose-eric-schmidt/)  
28 [oppose-eric-schmidt/](https://therevolvingdoorproject.org/letter-to-oppose-eric-schmidt/) ) ( <https://nymag.com/intelligencer/2013/07/eric-schmidt-penthouse-new->

1 [york-photos-apartment.html](#) )

2       The Silicon Valley Assholes Process proves that real Silicon Valley VC and tech assholes  
3 probably don't know they are one; central to this condition is the certainty that all bad behavior is  
4 actually OK.

5       This is detectable in the media posts of workers from Greylock, Kleiner, Andressen and  
6 other tech asshole firms. Many of the tech interns freely admit that that they only pay attention to  
7 other social media users if there's a personal benefit to connecting with them. That type of me-first  
8 worldview is crucial to Palo Alto Sandhill Road's conception of twisted reality. Asshole-rich Silicon  
9 Valley America (where "exceptionalism" is ingrained from an early age) lives in contrast to  
10 asshole-light Canada (where folks tend to be more agreeable and accommodating)(Justin, though, is  
11 a novel kind of asshole).

12  
13 The most compelling—and enraging—realities concerns Silicon Valley, where Mark Zuckerberg  
14 and like-minded CEOs have bred a culture of trampling on competitors, laws, historical norms, and  
15 the bedrock tenets of democracy in pursuit of additional eyeballs, clicks, and revenue streams. In a  
16 place where young men team up in a desperate quest to develop the innovative next big thing that'll  
17 turn them into tech moguls ("bro-gramming"), nothing matters but the self-centered end goal. And  
18 though Facebook, Twitter, Google, Kleiner Perkins, Greylock and their ilk could alter this  
19 landscape by simply cracking down on the horridness that permeates their platforms, they choose  
20 not to because of the negative financial consequences and their lust for hookers, private jets and  
21 cocaine.

22       To travel through Silicon Valley is to take a gravely depressing survey of a 21st century in  
23 thrall—in several crucial arenas—to humanity's worst impulses.

24       So what is being done about this crisis of society?

25       We have hired the best investigators who used to work with the FBI, CIA, FTC, DOJ, SEC,  
26 GAO, IG and Interpol.

27       We have also been teaching every voter in the world how to be a top notch criminal  
28 investigator and how to use digital forensic AI tools to "follow-the-money" and bust these crooks.

1 Imagine the entire resources of Palantir, XKEYSCORE, Splunk, Axciom, Fusion GPS and Taleo  
2 aimed at people like Zuckerberg, Hoffman, Musk and Schmidt. They will never survive it!

3 Every single asshole in Silicon Valley can ePlaintiff 42ect to have accurate, highly  
4 professional, criminal charges and referrals filed against them with every federal law enforcement  
5 and regulatory agency. Those reports are being BCC'd to the news media and the public.

6 When you see reports like these, you can clearly see that: **Every Tech CEO And Investor**  
7 **In Silicon Valley Is A Predatory, Parasitic, Sex Trafficking, Misogynist, Money Laundering,**  
8 **Politician Bribing, Exclusionary, Black-Listing Criminal:**

7 Theranos CEO Elizabeth Holmes and former president Ramesh "Sunny" Balwani were  
8 charged with an "elaborate, years-long fraud."

9 A viral thread has busted the MYTH about "*Famous Billionaires Starting Out "Poor"*."  
10 Jonas Grinevičius and Justinas Keturka have revealed that we all love stories about scrappy  
11 underdogs who overcome the odds and make it big through relentless hard work, unwavering grit,  
12 and sheer force of will. However, the stories about how some of the richest and most powerful  
13 people made their millions (and billions) are too romanticized and gloss over some very important  
14 details. That's the point that Aidan Smith made in a viral Twitter thread where he explained how Jeff  
15 Bezos and others had a huge leg-up when it came to helping lay the foundations of their business  
16 empires. Namely—having families with lots of money. Google used taxpayer funds to start its  
17 monopoly per [https://medium.com/insurge-intelligence/how-the-cia-made-google-](https://medium.com/insurge-intelligence/how-the-cia-made-google-e836451a959e)  
18 [e836451a959e](https://medium.com/insurge-intelligence/how-the-cia-made-google-e836451a959e) and [https://qz.com/1145669/googles-true-origin-partly-lies-in-cia-and-nsa-](https://qz.com/1145669/googles-true-origin-partly-lies-in-cia-and-nsa-research-grants-for-mass-surveillance/)  
19 [research-grants-for-mass-surveillance/](https://qz.com/1145669/googles-true-origin-partly-lies-in-cia-and-nsa-research-grants-for-mass-surveillance/) ***Not only does Google not pay tens of billions of dollars of***  
20 ***its taxes to sponsor firemen and teachers but Google used public resources to start its company!***  
21 ***Billions of dollars of citizen funds were used by Google to create its evil empire. Google gets***  
22 ***away with this crap because it bribes major U.S. politicians from California!***

23  
24 Aidan told Bored Panda that the US isn't the only country where a lot of people believe myths  
25 about businessmen while the truth is a Google search away. "It's far from a U.S.-exclusive  
26 phenomenon, but in America, it's easier for most people to imagine becoming a billionaire  
27 themselves than it is to imagine an economic order in which a handful of people own half the  
28 world's wealth. Social mobility from working-class to middle-class is increasingly out of reach and

1 the illusion that one can conceivably amass a net worth of over a billion dollars is a comforting  
2 fantasy for many people.”

2 **EXHIBIT 47 - The Indisputable Facts**

3 **... that the Silicon Valley Oligarchs And Their Politicians:**

- 4 1. Control business and politics like a crime Cartel
- 5 2. Are a white male fraternity who attack outsiders in organized manners
- 6 3. Come from dynastic families that systematically ran them through Stanford, Harvard and
- 7 Yale sociopath-in-training men's clubs
- 8 4. Were socially trained and programmed to operate in a closed, tribal, exclusionary manner
- 9 5. Operated the "Angelgate" collusion scandal and most every other financial crime in
- 10 America.
- 11 6. Operated the "Silicon Valley High Tech Employee Collusion" for which they were sued
- 12 in a famous class-action case
- 13 7. Controlled the White House and traded most of the key staff with the Administration.
- 14 8. Have been sued, indicted and charged in divorce proceedings with an unusually massive
- 15 amount of sex trafficking matters
- 16 9. Use the same 10 law-firms who have been charged with public policy manipulation
- 17 10. Control internet news, media and information
- 18 11. "Own" certain U.S. Senators by virtue of direct bribe payments and securities/stock
- 19 payola payments
- 20 12. Use a variety of tools like GUST, Private Google Docs sites, covert Facebook pages and
- 21 similar, to secret conspire and plan collusion and organized monopolistic practices
- 22 13. Have their venture capitalists spy on entrepreneurs and copy their technology to be
- 23 deployed by Google, or Facebook under a new name
- 24 14. Are a Mafia-like criminal organization.

25 Who are some of the biggest, elitist, self-aggrandizing, entitled, tone-deaf assholes in Silicon

26 Valley?

27 The Tech Crunch Silicon Valley database-of-assholes provides that answer. They include:

28 David Krane, Brian Bendett, Brendan Bulik-Sullivan, Terri Burns, Blake Byers, Tim Draper, Steve

1 Jurvetson, Elon Musk, Steve Westly, Steve Spinner, Tyson Clark, Frederique Dame, Tom Perkins,  
2 Plaintiff 22Davis, Reid Hoffman, Eric Schmidt, Larry Page, Jared Cohen, David Drummond, Karim  
3 Faris, Tom Hulme, Joe Kraus, John Lyman, Vinod Khosla, Laura Melahn, Dave Munichiello, Erik  
4 Nordlander, Anthony Philippakis, Sridhar Ramaswamy, David Reshef, Ben Robbins, Issi Rozen,  
5 David Schenkein, Vidu Shanmugarajah, M.G. Siegler, Graham Spencer, Bethany Tsui, Jessica  
6 Verrilli, Andy Wheeler, Krishna Yeshwant, Asheem Chandna, Jerry Chen, Mike Duboe, Sarah Guo,  
7 Christine Kim, Josh McFarland, Saam Motamedi, Sridhar Ramaswamy, Corinne Riley, Jason Risch,  
8 Seth Rosenberg, David Sze, David Thacker, David Wadhvani, Manuel Bernal, Allie Dalglish, Don  
9 Sullivan, Yasmin Green, Kent Walker, Matt Rogers, Steven Chu, David Plouffe, Sergy Brin, Andy  
10 Rubin, Ian Fette, Travis Kalanick, Elizabeth Holmes, Dustin Moskovitz, Laurene Powell Jobs,  
11 Andy Bechtolsheim, Brian Goncher, Cheryl Sandberg, Gilman Louie, Ira Ehrenpreis, Tim Cook,  
12 James Breyer, Joe Lonsdale, Keith Rabois, Marc Andreessen, George Soros, Mario Rosatti, Martin  
13 LaGod, Michael Moritz, Viktor Vekselberg, Larry Summers, Pierre Omidyar, Tom Steyer,  
14 RoseAnn Rotando, Larry Birenbaum, Judy Estrin, Steven Goldby, Terry Kramer, Helen Raiser,  
15 John Scully, Sandi Thompson, Ann Wojcicki and their ilk...

16  
17 You can see that most of them have the same facial deformities that make them all look like yuppie  
18 frat or sorority clones with Moonie/Scientology dead eyes and fake smiles that broadcast their blind  
19 zealotry and sports bar fakery to the world. Every email, phone call, text, condo, office and brothel  
20 that these people use should be bugged by the FBI. These scammers built an insider-trading bubble  
21 of TED conferences and tech parties in which they mutually promote their Elizabeth Holmesian  
22 fantasies of holier-than-thou idiocracy. Emily Chang's book: "*Brotopia*" covers these scum-bags in  
23 great length.

24 As a Hoover Fellow puts it: "...*Elite arrogant asshole dynasties send their kids to Stanford*  
25 *University. Stanford puts the kids in asshole frat houses to train them to get away with rape and run*  
26 *monopolies. When they graduate they either go up the hill to Sandhill Road and start a venture*  
27 *capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-*  
28 *up or political campaign using money scammed from your parents pension funds. They only work*

1 *with their frat buddies and insiders in a tribal 'old boys club' manner. They steal all the technology*  
2 *and markets they want because they control all of the tech lawyers and politicians via bribes and*  
3 *revolving doors. Most of the money in Stanford University bank accounts is from Foreign and*  
4 *Hollywood oligarchs delivered as bribes meant to get their snot-nosed brats into Stanford. Stanford*  
5 *bosses keep all of this covered-up and covertly fund political campaigns to grease the wheels of*  
6 *political corruption. They then sexually extort some Stanford interns in Rosewood Hotel rooms, get*  
7 *the most 'trophy wife' ones pregnant, and start the cycle all over again. Alas, Stanford is the*  
8 *training ground for abuse, corruption and 'Bro-Crime'..."*

9       White House Staff including Rahm Emanuel, Bill Daley, Jay Carney, David Plouffe, Robert  
10 Gibbs, Steve Rattner, David Axelrod, John Podesta, et al; and The Secretary of Energy Steven Chu  
11 and the Chief Counsel for the United States Department of Energy Daniel Cohen and Bill Cooper  
12 were, (from 2007 forward), either financed by, friends, with, sleeping with, dating the staff of,  
13 holding stock market assets in, promised a revolving door job or government service contracts from,  
14 partying with, personal friends with, photographed at private events with, exchanging emails with,  
15 business associates of or directed by; our business adversaries, or the Senators and Department of  
16 Energy politicians that those business adversaries pay campaign finances to, or supply political  
17 digital search manipulation services to. Criminal U.S. Senators coordinated and profited in these  
18 schemes. Their own family members have now supplied evidence against them. Elon Musk and his  
19 frat boys display their self-aggrandizing vanity in sociopath glory because nobody tells them "no".  
20 Now we are calling them out!

21  
22 From 2007 forward, The White House and The U.S. Government were controlled by the Silicon  
23 Valley tech oligarchs for monopolistic profiteering! That is a violation of the law, the Constitution  
24 and the American Way. The named person's we have presented to the FBI, DOJ, SEC and other  
25 agencies, engaged in crimes to personally profit in the stock market and political venues. At the  
26 same time they operated the command and control of millions of dollars of defamation, character  
27 assassination and black-list attacks against us for reporting their crimes. These perpetrators are now  
28 being exposed, arrested, indicted and drained of their ill-gotten profits. We are owed our damages

1 compensation and we will not rest until we get it! Every member of the public is invited to help  
2 crowd-source the termination of these corrupt crooks.

3  
4 We worked for, with, in and around the White House and The Department of Energy. We were at  
5 the homes of the most famous people in government and their Silicon Valley financiers. We have  
6 cooperated with top law enforcement and Congressional investigators. Additional whistle-blowers  
7 have provided our effort with even more evidence. Ourselves, and investigating agencies, have  
8 absolute proof of the crimes, corruption and illicit activities and the ongoing cover-ups.

9 Agency staff were ordered to harm Applicants by manipulating their benefits in order to  
10 deny, delay, obfuscate and reduce their income as reprisal for their assistance to law enforcement in  
11 a political corruption and money laundering matter. Agency staff, ranging from the lowest level  
12 staff at the San Francisco, San Mateo, Los Angeles and Marin offices, and up to the director  
13 headquarters offices, participated in this reprisal-vendetta-revenge action to harm Applicants.  
14 Applicant’s peers have filed DOJ and FBI criminal referrals, launched federal investigations and the  
15 assertions have been ***proven*** in numerous IG, FBI, Congressional and major news media  
16 investigations. Agency offices have failed to provide responsive FOIA requested data, hearing  
17 investigation data and fair responses because some of their staff are STILL operating a criminal  
18 cover-up which has now been update-reported to the FBI, Congress, the IG, the AG and  
19 investigative reporters.

20 Other federal agencies have complied, verified and provided the requested deliverables. SSA  
21 and GOVT have pointed the searchlight of suspicion on themselves, laser-like, by their overt failure  
22 to comply, unlike every other agency. Ironically, the political financing of their executives and their  
23 personal relationships “happens” to be ***with the exact same Silicon Valley oligarchs under felony***  
24 ***criminal investigations***. The stock market brokerage records, family trust accounts, PAC trace-  
25 routing, Interpol records and SEC investigation records proves it!

26 Unfortunately for the crooked agency staff, some Applicants have the authority, law  
27 enforcement credentials and training to arrest any person at their home or office and remand them to  
28 the FBI, DOJ or Sheriff. SSA and GOVT staff should not longer screw around! For example: Every

1 “unsigned” SSA email is tracked to the individual author by their IP address, device IMEI, web  
2 camera, building key card, door camera, parking lot use chart, building camera, vehicle tracking  
3 circuits, text dba records, keyboard UI/UX patterns, motherboard ID #, DNS routing, stingray read-  
4 outs and a vast number of other metrics. Applicant investigation peers know the exact person that  
5 wrote every SSA email or document or file request. There is no such thing as an anonymous SSA  
6 email. Transparency is the Applicants middle name. The FBI and CIA people that SSA and GOVT  
7 insiders think are their “buddies” may actually be **the APPLICANTS** buddies!

8       You will either give the Applicant his money and damages compensation, from his 2007  
9 benefits filings, forward, or suffer the consequences of the rapid acceleration of one of the largest  
10 investigations in modern history, supported by millions of voters with a shared peer-to-peer  
11 forensics social media network, the FBI and Congress. With the push of a single button, our latest  
12 info can be in the inbox of every blogger and independent investigative journalist in the world, in  
13 minutes.

14  
15 History has proven that non-corrupt portions of federal agencies and public service law and  
16 community action firms have executed on their willingness to ePlaintiff 42end millions of dollars of  
17 resources to fight this injustice. Every individual involved in this at SSA and GOVT are on a  
18 forensic database. No person at SSA or GOVT who uses our government as a ***garage sale for***  
19 ***corruption favors*** or a ***kill mill*** for political reprisals will avoid the 100% legally executed  
20 consequences. They will be targeted and prosecuted even more profoundly than the Applicants  
21 waere targeted with IC-type hit jobs.

22  
23 This felony criminal investigation case, is documented on thousands of websites *and in dozens of*  
24 *federal court case records in which Applicant won the case or was vindicated in the case* and in  
25 thousands of news websites. Applicants researchers and investigators disagree with any decision by  
26 any agency which causes a delay in response which puts the applicants in jeopardy for their life and  
27 safety. Testifying, and/or reporting about this crime has resulted in the death, potentially by murder,  
28 of the following individuals who reported to the authorities about this crime matter: *Rajeev*

1 Motwani; Gary D. Conley; Seth Rich; Philip Haney; David Bird; Doug Bourn; Misti Epstein;  
2 Joshua Brown; Kenneth Bellando; Moritz Erhardt; Imran Aliev; Kate Matrosova; David Drye;  
3 Vincent Foster; Kathy Ferguson; Duane Garrett; Eric S. Fox; Judi Gibbs; Berta Caceres; Suzanne  
4 Coleman; L.J. Davis; John Hillyer; Stanley Huggins; Sandy Hume; Shawn Lucas; Gary Johnson;  
5 John Jones; John F. Kennedy, Jr.; Stephen Ivens; Mary 'Caity' Mahoney; Eric Butera; Danny  
6 Casolara; John Ashe; Tony Moser; Larry Nichols; Joseph Rago; Ron Brown; Bob Simon; Don  
7 Adams; Peter Smith; Victor Thorn; Lori Klausutis; Gareth Williams; Daphne Caruana Galizia;  
8 James D Johnston; Dave Goldberg; Loretta Fuddy; Paul Wilcher; Gary Webb; Beranton J.  
9 Whisenant Jr; Stanley Meyer; Jon Parnell Walker; Tyler Drumheller; Barnaby Jack; Dominic Di-  
10 Natale; Barbara Wise; Ilya Zhitomirskiy; Jeff Joe Black; Robin Copeland; John Wheeler; Ashley  
11 Turton; Michael Hastings; Antonin Scalia; David Koschman; David Werner; Alex Okrent; Kam  
12 Kuwata; Larry Frankel; And hundreds more connected to this case who suddenly, and strangely,  
13 turned up dead in this case and, ironically, their deaths all benefit the suspects in this case.

14 Applicants are also whistle-blowers who have been previously attacked in reprisal and who have  
15 been threatened with continued harm and death.

16 Because this case involves a huge number of deaths, spies, trillions of dollars of energy  
17 industry funds, hit-jobs and epic political dirty tricks contracts there is a warning in effect to every  
18 suspect on "***the list***". ***"If any other principle whistle-blower in this case is killed, within 24 hours***  
19 ***of their death, every person on "the list" will experience the worst possible outcome!"***

20 Any delay, obfuscation, cover-up, FOIA refusal or other obscuring tactic by each and every  
21 member of an agency employee or contracting entity will be prosecuted on a person-by-person  
22 basis. Each employee or official who causes, by their action, further harm to the Applicants will be  
23 sued personally, have their assets garnished and will have a formal criminal referral authored and  
24 submitted to the FBI, DOJ, FTC, Congress and the news media. Applicants have sued the highest  
25 level personnel in the government for corruption, launched FBI and Congressional investigations  
26 against them and had them removed from their jobs and placed under permanent surveillance. The  
27 court and news records prove this fact. Do not imagine that any reprisal action by a public agency  
28 staffer will go unnoticed or unpunished by federal law enforcement, public forensics and major

1 independent news media investigations.

2  
3 Pay the Applicants their damages compensation, whistle-blower fees, back-fees and offset monies

4 **NOW!**

5         And 200+ other cases related to the same Cartel members including many lawsuits against  
6 Google for corruption, sex trafficking, racketeering and other forms of their usual crimes. Google's  
7 financier, political manipulation partner and spying command-and-control operative: In-Q-tel, was  
8 also sued for running dirty tricks campaigns against the Whistle-blowers. In-Q-Tel was forced to  
9 come to court in San Francisco and watch the Corbett Report's expose on them (

10 <https://www.corbettreport.com/meet-in-q-tel-the-cias-venture-capital-firm-preview/> and

11 <https://www.corbettreport.com/siliconvalley/> ) and then try to explain to the judge why they are a  
12 "non-profit charity" when they run dirty tricks campaigns for politicians and were caught with tons  
13 of cocaine on their airplanes.

26 The solipsistic self-aggrandizing corrupt pigs in San Francisco's City Hall and Pacific  
27 Heights are being hunted down (100% legally) and eviscerated by the FBI, public task forces like  
28 ours, the news media, private citizens and the biggest email leaks in history. Hundreds of people

1 will be taken down. The few arrests you have read about in the media are only the beginning. We are  
2 all starting at the bottom of the cesspool and working our way up, all the way through Elon Musk,  
3 Eric Schmidt, Larry Page, et al, and up to the White House. They will not escape, even in death.  
4 Roger Boas, Jeffrey Epstein, et al, may not still be lurking around but the truth about them will live  
5 on FOREVER!

6 The headline reads: "**House Lawmakers Introduce Antitrust Package to Limit Power of**  
7 **Tech Giants**"

8 ([https://www.ntd.com/house-lawmakers-introduce-antitrust-package-to-limit-power-of-tech-](https://www.ntd.com/house-lawmakers-introduce-antitrust-package-to-limit-power-of-tech-giants_626721.html)  
9 [giants\\_626721.html](https://www.ntd.com/house-lawmakers-introduce-antitrust-package-to-limit-power-of-tech-giants_626721.html))

10 This bipartisan initiative is being led by the House Judiciary Antitrust Subcommittee  
11 leadership, with each of the five bills having a Republican and Democratic co-sponsor. Each of the  
12 bills target different ways that tech companies **abuse their power, manipulate American politics**  
13 and **maliciously and mercilessly attack competitors** with help from California politicians who own  
14 parts of those tech companies. The witnesses in this case have been instrumental in driving these,  
15 and other tech anti-corruption efforts, to fruition. Those witnesses have sworn warranted and  
16 certified that the Defendants are a "**RICO Racketeering Organized Crime Cartel**", as defined by  
17 law, that is colluding for criminal purposes. This crime group is harming American citizens, the  
18 U.S. economy, and domestic Democracy. They use The U.S. Government and The Department of  
19 Transportation as a private slush-fund to pay off political financiers.

20 Ryan Cooper has noted that "...what America has today is almost exclusively the personal  
21 type of corruption, which is considerably worse than the other sort. (A patronage machine may be  
22 bent and inefficient, but at least a goodly share of the population gets a piece of the action, and  
23 often functional public works and services to boot.) For example, Rohit Chopra and Julie Margetta  
24 Morgan recently released a new report for the Roosevelt Institute looking not at money in politics,  
25 but money in government. They argue that existing anti-corruption laws are barely being enforced,  
26 and are outdated anyway... They also say the revolving door and cultural capture (i.e. the tendency  
27 of government employees to sympathize with supposed private-sector adversaries) has made  
28 regulators identify with the industries they oversee. Former Attorney General Eric Holder, for

1 instance, had an office reserved for him at the high-powered corporate law firm Covington &  
2 Burling for his whole tenure, to which he returned after repeatedly refusing to prosecute big banks  
3 or their employees for staggering crimes. (The really insidious thing is he would probably honestly  
4 deny his corporate ties influenced his decisions.) Finally, all this mess is largely out of public view  
5 and thus harder to understand or root out...It involves de facto bribery of government employees of  
6 both parties (in the form of future jobs, consulting gigs, speaking engagements, etc) by the  
7 wealthiest institutions in the land...”

8 The key Witnesses/Victims/Plaintiffs have demanded: 1.) damages payments; 2.) back-fee  
9 monies that are owed; 3.) release of benefits payments blockaded in reprisal; 4.) witness fees that  
10 are owed; 5.) whistle-blower fees that are owed; 6.) informant fees and 7.) related payments owed  
11 from the U.S. and California government and the operative Defendants.

12 The victims still have not received a dime of compensation while they suffered billions of  
13 dollars in government-sponsored damages. At the same time, the Defendants in this case made  
14 billions of dollars of government-sponsored profits at the expense of the victims.

15 The victims alliance has spent over a decade ePlaintiff 42osing the evidence in this book to  
16 every single voter in the nation. They have used direct mail, advertising, social media, torrents and  
17 other novel methods and technologies. Their goal is to end corruption in America by destroying all  
18 of the methods of corruption and each of the crooked main players using those methods. This book  
19 is being emailed to every person in America.

20 Many of the Witnesses/Victims/Plaintiffs were “Democrats” until they witnessed the heads  
21 of their party engage in bribery, fraud, corruption and other forms of some the most severe  
22 violations of the law, and the public trust, that one might ever imagine. In this case victims were  
23 having their own Senator competing against them and cutting off their government funds to help the  
24 victims competitors. Citizens suffered state-sponsored harm because their Senator owns stock in  
25 their competitors, ie: Google or Tesla, etc.

26 This matter involves each and every regulatory agency, services agency and law  
27 enforcement agency of the United States Government. It also involves the State Of California and  
28 the interaction between each and every one of the Cartel members.

1 The founders of Google, Facebook, Netflix, LinkedIn, Tesla, Sony Pictures, YouTube. Etc.  
2 (the so called: “Tech Cartel”); knew Plaintiffs and went to school with Plaintiffs. They, and their  
3 investors, asked to look at Plaintiffs patents, technologies and companies which Plaintiffs had  
4 engineered and launched as businesses many years prior to when the Cartel copied those efforts.  
5 Plaintiffs had patented and shown them to the Cartel bosses, under NDA, years before the “Tech  
6 Cartel” bosses copied them and started their own versions of them. The emails, NDA's, patent office  
7 files, court records, document leaks, Russian hacks and lawsuit records prove it. The Tech Cartel,  
8 and their crooked politicians "spied and lied".

9 The Cartel chose to "*cheat rather than compete*". They spent over 16 billion dollars on  
10 lobbyists at the United States Patent Office in order [to blockade the rights of small American](#)  
11 [inventors like](#) Plaintiffs. They hired millions of dollars of Fusion  
12 GPS-type/Gawker/Gizmodo/Google/YouTube media attackers to run hit-jobs on Plaintiffs, and  
13 other entrepreneurs, because the Tech Cartel could not face the truth in a fair fight. Plaintiffs have  
14 reported that they were in meetings with Defendants in which the Cartel planned, colluded and  
15 designed efforts to manipulate the government, create monopolies and control and censor all media  
16 access.

17 This is not a matter of “*crying over spilled milk*” because Plaintiffs were cut-out of  
18 Defendants schemes. This is a matter of *Criminal Collusion!*

19 The Defendants companies and their founders ran ***an organized crime operation Cartel.***  
20 That assertion is backed up in the books: "***Brotopia***" by Emily Chang; "***Whistleblower***" by Susan  
21 Fowler, "***A Colossal Wreck***" By Alexander Cockburn, "***Emotional Intelligence***" By Daniel  
22 Goleman, "***Drain The Swamp***" By Ken Buck, "***How Political Corruption Actually Works***" A  
23 feature film by The Wiki Law-Pedia Group, "***Deleted***" By Allum Bokhari, "***The Creepy Line***" By  
24 Matthew Taylor, "***Chaos Monkeys***" By Antonio Martinez, "***Disrupted***" By Dan Lyons, "***Catch and***  
25 ***Kill***" By Ronan Farrow, "***Permanent Record***" By Edward Snowden, "***Throw Them All Out***" By  
26 Peter Schweizer, "***The Circle***" By David Eggers, "***World Without Mind***" By Franklin Foer, "***A***  
27 ***Journey into the Savage Heart of Silicon Valley***" By Corey Pein, and in ***hundreds*** of other books  
28 and thousands of reports from the ***FBI, DOJ, FEC, SEC, FTC, EU, Inspector General's*** and other

1 government organizations globally. It is proven in the CBS news 60 Minutes episodes: "***The***  
2 ***Cleantech Crash***", "***Congress Trading On Insider Information***", "***The Lobbyists Playbook***" and  
3 other segments. It is proven in the feature documentary films including: "***Too Big To Fail***", "***Inside***  
4 ***Job***", "***How Political Corruption Works***", and "***Omerta - A Corruption Story***". The Cartel is deeply  
5 connected to the likes of Harvey Weinstein, Jeffrey Epstein and other notorious folks. The Cartel  
6 buys elections with impunity.

7 It is proven in hundreds of lawsuits, including Silicon Valley divorce court filings for abuse,  
8 available at [www.pacer.gov](http://www.pacer.gov) and it is now proven by the United States Government in the latest of a  
9 series of federal monopoly lawsuits. Per federal ***Case # 1:20-cv-03010***:

10 *"Today, millions of Americans rely on the Internet and online platforms for their daily lives.*  
11 *Competition in this industry is vitally important, which is why the challenge against Google — the*  
12 *gatekeeper of the Internet — for violating antitrust laws is a monumental case both for the*  
13 *Department of Justice and for the American people,"* said Attorney General William Barr. *"Since*  
14 *my confirmation, I have prioritized the Department's review of online market-leading platforms to*  
15 *ensure that our technology industries remain competitive. This lawsuit strikes at the heart of*  
16 *Google's grip over the internet for millions of American consumers, advertisers, small businesses*  
17 *and entrepreneurs beholden to an unlawful monopolist."*

18 *"As with its historic antitrust actions against AT&T in 1974 and Microsoft in 1998, the*  
19 *Department is again enforcing the Sherman Act to restore the role of competition and open the door*  
20 *to the next wave of innovation—this time in vital digital markets,"* said Deputy Attorney General  
21 Jeffrey A. Rosen.

22 As an example: As one of the wealthiest companies on the planet with a market value of \$1  
23 trillion, Google is the monopoly gatekeeper to the internet for billions of users and countless  
24 advertisers worldwide. For years, Google has accounted for almost 90 percent of all search queries  
25 in the United States and has used anti-competitive tactics to maintain and extend its monopolies in  
26 search and search advertising. Stanford University trained these people to be the worst version of  
27 criminal frat boys the world could have imagined. Now America must make things right again.

28 Hiring your own family in order to keep dark money secrets in Washington has gotten

1 "nuts". Walt Shaub, the former director of the United States Office of Government Ethics, called the  
2 situation "positively ridiculous" in a statement to the News.

3 "Haven't we had enough of nepotists in presidential administrations?" Shaub said. "It may be  
4 legal if Ricchetti wasn't directly involved in the hiring, but this is no way to send a message that  
5 ethics matters to the administration. It feels like the taxpayers are funding a career-building charity  
6 for the Ricchetti family. Add to that the fact that you've got Ricchetti's brother lobbying the  
7 administration, and this feels like a very special episode of the Partridge Family where they all pile  
8 in the van and go visit Washington — only they should call this show the Patronage Family."

9 As alleged in the Complaint, Google has entered into a series of exclusionary agreements  
10 that collectively lock up the primary avenues through which users access search engines, and thus  
11 the internet, by requiring that Google be set as the preset default general search engine on billions of  
12 mobile devices and computers worldwide and, in many cases, prohibiting preinstallation of a  
13 competitor.

14 Google owns, controls, pays and manipulates 70% of the members of Congress!

15 In particular, the Complaint alleges that Google has unlawfully maintained monopolies in  
16 search and search advertising by:

17 - Entering into exclusivity agreements that forbid preinstallation of any competing search  
18 service.

19 - Entering into tying and other arrangements that force preinstallation of its search  
20 applications in prime locations on mobile devices and make them undeletable, regardless of  
21 consumer preference.

22 - Entering into long-term agreements with Apple that require Google to be the default – and  
23 de facto exclusive – general search engine on Apple's popular Safari browser and other Apple  
24 search tools.

25 - Generally using monopoly profits to buy preferential treatment for its search engine on  
26 devices, web browsers, and other search access points, creating a continuous and self-reinforcing  
27 cycle of monopolization.

28 These and other anticompetitive practices harm competition and consumers, reducing the

1 ability of innovative new companies to develop, compete, and discipline Google’s behavior.

2       The antitrust laws protect our free market economy and forbid monopolists from engaging in  
3 anticompetitive practices. They also empower the Department of Justice to bring cases like this one  
4 to remedy violations and restore competition, as it has done for over a century in notable cases  
5 involving monopolists over other critical industries undergirding the American economy like  
6 Standard Oil and the AT&T telephone monopoly. Decades ago the Department’s case against  
7 Microsoft recognized that the antitrust laws forbid anticompetitive agreements by high-technology  
8 monopolists to require preinstalled default status, to shut off distribution channels to rivals, and to  
9 make software undeletable. The Complaints allege that Google is using similar agreements itself to  
10 maintain and extend its own dominance and to attack and destroy smaller companies and inventors.

11       The Complaints allege that Google’s anticompetitive practices have had harmful effects on  
12 competition and consumers. Google has foreclosed any meaningful search competitor from gaining  
13 vital distribution and scale, eliminating competition for a majority of search queries in the United  
14 States. By restricting competition in search, Google’s conduct has harmed consumers by reducing  
15 the quality of search (including on dimensions such as privacy, data protection, and use of consumer  
16 data), lessening choice in search, and impeding innovation. By suppressing competition in  
17 advertising, Google has the power to charge advertisers more than it could in a competitive market  
18 and to reduce the quality of the services it provides them. Through filing the lawsuit, the  
19 Department seeks to stop Google’s anticompetitive conduct and restore competition for American  
20 consumers, advertisers, and all companies now reliant on the internet economy.

21       Those who cover-up for these crooks will experience a wrath like nothing they can imagine!  
22 The payback will come from the courts, the public, the news media, the history books and a new  
23 kind of automated AI software forensics that hunts and destroys the corrupt!

24       The witnesses and victims saw these crimes happen. FBI, GAO, SEC, FTC, DOJ, FCC, FEC  
25 and IG investigators have confirmed these assertions.

26       White House insiders have ordered this case covered-up and justice delayed.

27       The fact remains: **The Silicon Valley Oligarchs and their hired Senators are MOBSTERS!**

1 This document is being provided in both hard-copy and digital PDF versions, concurrently,  
2 because the URL links in blue text, herein, provide crucial confirming evidence regarding our  
3 assertions. The online version of this document is updated weekly.

4 Additionally, the CBS News 60 Minutes broadcast news journal broadcasts titled: “**The**  
5 **Cleantech Crash**” and “**Congress Trading On Insider Information**” provide confirmations of the  
6 assertions. Additionally, the film: “**How Political Corruption Works**” at  
7 XXXXXXXXXXXXXXXXXXXX further details these assertions. Additionally the June 10, 2021 White  
8 House report on the urgent gaps in domestic electric car energy storage minerals further confirms  
9 our stated assertions of the dollar amounts being manipulated by corrupt politicians and oligarchs.  
10 Additionally, FBI, DOJ, FEC, EC, OSC, SEC and Congressional committee case files on this matter

12 All evidence, below, has previously been supplied to SSA, FBI, OSC, OGIS, OGE and other  
13 jurisdictional agencies. Copies of the evidence are available, to view, again, online and in  
14 Victim/Witnesses’s evidence binders, upon request.

15 One victim was an employee/contractor for the United States Government. Under California  
16 , [Assembly Bill 5](#) (AB-5), which is California Labor Code Section 2750.3 , Victim/Witnesses has  
17 all of the rights of a government employee, irrespective of contractor status. Victim/Witnesses’s  
18 work as a U.S. Forest Service fire mitigation specialist; their rights as an heir under their father, a  
19 U.S. military and U.S. Forest Service long-term employee; Victim/Witnesses’s work for The  
20 National Park Service on public use programs; Victim/Witnesses’s credentialed under-cover work  
21 for various law enforcement and IC programs; Victim/Witnesses’s work for the United States  
22 Department Of Energy under contract; Victim/Witnesses’s work with Argonne, Sandia, Lawrence  
23 Livermore national laboratories per the executed non-disclosure and secrecy documents signed with  
24 each; Employment law firms have confirmed that, under current laws and legal precedents,  
25 Victim/Witnesses would be considered BOTH a previous government employee and government  
26 contractor; Millions of pages of supporting evidence relative to these assertions have provided to  
27 the government on hard drives, in on-line digital evidence repositories, Congressional Committee  
28 reports and in hundreds of published and broadcast news stories. This, and additional evidence,

1 proves that Victim/Witnesses deserves all of the rights, benefits, whistle-blower protections and  
2 earnings of a both a government employee and contractor but the government is blocking those  
3 rights in reprisal for reporting this corruption crime.

4         One Victim/Witnesses was exposed to toxic poisoning in their work in the national program  
5 laboratories per: Victim/Witnesses’s work for the United States Department Of Energy under  
6 federal contract awarded in the Congressional Iraq War Bill; Victim/Witnesses’s contract with  
7 Sandia National Laboratories under federal contract and NDA; Victim/Witnesses’s U.S.  
8 Government certified issued and federally verified U.S. patent’and other IP per their work with the  
9 U.S. Department of Energy, The White House and The Environmental Protection Agency and  
10 related agencies document that Victim/Witnesses was exposed to deadly and dangerous chemicals  
11 and energy projectors alongside radioactive weapons-grade materials and that an adversary could  
12 have forced high dose exposure in a situation like the notorious Salisbury or Litvenenko reprisal  
13 poisonings; Victim/Witnesses’s patents were drafted, researched and verified by major law firms  
14 who had engineers on staff that were able to later research and verify the chemical MSDS dangers (   
15 [https://en.wikipedia.org/wiki/Safety\\_data\\_sheet](https://en.wikipedia.org/wiki/Safety_data_sheet) ) of the chemicals listed in those patents, which  
16 only The U.S. Government had full knowledge of the dangers of and which Victim/Witnesses was  
17 not properly advised of or HazMat protected by during their work; Victim/Witnesses has been  
18 admitted to the emergency room on multiple occasions for toxic exposure to strange materials;  
19 Millions of pages of supporting evidence relative to these assertions have provided to the  
20 government on hard drives, in on-line digital evidence repositories, Congressional Committee  
21 reports and in hundreds of published and broadcast news stories;  
22 <https://en.wikipedia.org/wiki/Poisoning>; [https://en.wikipedia.org/wiki/Metal\\_poisoning](https://en.wikipedia.org/wiki/Metal_poisoning);  
23 <https://en.wikipedia.org/wiki/Toxicity>;  
24 [https://en.wikipedia.org/wiki/Electromagnetic\\_radiation\\_and\\_health](https://en.wikipedia.org/wiki/Electromagnetic_radiation_and_health);  
25 [https://en.wikipedia.org/wiki/Biological\\_effects\\_of\\_high-energy\\_visible\\_light](https://en.wikipedia.org/wiki/Biological_effects_of_high-energy_visible_light);  
26 [https://en.wikipedia.org/wiki/Karen\\_Silkwood](https://en.wikipedia.org/wiki/Karen_Silkwood);  
27 [https://en.wikipedia.org/wiki/Nuclear\\_and\\_radiation\\_accidents\\_and\\_incidents](https://en.wikipedia.org/wiki/Nuclear_and_radiation_accidents_and_incidents);  
28 [https://en.wikipedia.org/wiki/Lithium\\_Toxicity](https://en.wikipedia.org/wiki/Lithium_Toxicity); [https://en.wikipedia.org/wiki/Thallium\\_poisoning](https://en.wikipedia.org/wiki/Thallium_poisoning);

1 [https://en.wikipedia.org/wiki/Nuclear\\_labor\\_issues](https://en.wikipedia.org/wiki/Nuclear_labor_issues);

2 [https://en.wikipedia.org/wiki/Energy\\_Employees\\_Occupational\\_Illness\\_Compensation\\_Program](https://en.wikipedia.org/wiki/Energy_Employees_Occupational_Illness_Compensation_Program);

3 <https://www.cancerbenefits.com/cancer-benefit-programs/dept-of-energy-workers/>

4 This, and additional evidence, proves that Victim/Witnesses suffered toxic exposure through  
5 their work, or that victim's were reprisal-targeted for "[political poisoning](#)" which qualifies them for  
6 full SSDI benefits and that those SSDI benefits should be backdated to 2008. Victim's SSA benefits  
7 were ordered blocked in 2008, as reprisal for helping expose corruption and safety issues at the U.S.  
8 Department of Energy.

9 As part of this matter, one victim was employed for an average 60 hours per week, mostly in  
10 government and community agency work, from 1970 to 2008. The victim has provided over 1000  
11 pages of documents, verification letters, videos and other material on a website created for SSA to  
12 prove these assertions. Convicted Congressman Jesse Jackson Jr. (D-IL) is scheduled to receive  
13 \$8,700 per month in government disability pay, as well as a partial federal pension of \$45,000. That  
14 generous \$8,700 in disability comes thanks to Jackson's sudden development of a "mood disorder"  
15 as the federal government began looking to indict him. Jackson, who was sentenced to 2.5 years in  
16 prison, had no history of mental illness during his prior 17 years in Congress. So a criminal gets  
17 \$150K per year in the USA for disability and the victim only gets \$10K per year because the victim  
18 helped expose criminals like that one. SSA consultants have stated that they never heard of an  
19 Victim/Witnesses who had such a vast proven work record that then received such low monthly  
20 checks from SSA unless Victim/Witnesses's files and decisions had been manipulated by  
21 government officials operating a reprisal. Millions of pages of supporting evidence relative to these  
22 assertions have provided to the government on hard drives, in on-line digital evidence repositories,  
23 Congressional Committee reports and in hundreds of published and broadcast news stories.  
24 Victim/Witnesses wrote SSA and IRS together to ask them to research why there were blank years  
25 in SSA earnings records. Little or no help has been provided by SSA on this research. This, and  
26 additional evidence, proves that Victim/Witnesses/Victim is receiving an intentionally lower  
27 monthly benefit payment, than he earned, compared to the mean average of all other U.S. natural  
28 born citizens. Victim/Witnesses charges that benefits have been down-reduced in reprisal for

1 whistle-blowing and law enforcement assistance in a federal corruption investigation.

2 Over 80 individuals, who victims worked with, or knew, or who reported about the same  
3 crime that the victims reported, then died under suspicious circumstances. This validates the  
4 previous warnings of threatened reprisal harms against the victims. See Evidence Death List  
5 Document # 2021-DL3. Testifying, and/or reporting about this crime has resulted in the death,  
6 potentially by murder, of the following individuals who reported to the authorities about this crime  
7 matter: *Rajeev Motwani; Gary D. Conley; Seth Rich; Philip Haney; David Bird; Doug Bourn; Misti*  
8 *Epstein; Joshua Brown; Kenneth Bellando; Moritz Erhardt; Imran Aliev; Kate Matrosova; David*

17 *Ashley Turton; Michael Hastings; Antonin Scalia; David Koschman; David Werner; Alex Okrent;*  
18 *Kam Kuwata; Larry Frankel;* And hundreds more connected to this case who suddenly, and  
19 strangely, turned up dead in this case and, ironically, their deaths all benefit the suspects in this  
20 case. Victim/Witnesses are also whistle-blowers who have been previously attacked in reprisal and  
21 who have been threatened with continued harm and death. Millions of pages of supporting evidence  
22 relative to these assertions have provided to government offices on hard drives, in on-line digital  
23 evidence repositories, Congressional Committee reports and in hundreds of published and broadcast  
24 news stories. This, and additional evidence, proves the damages caused to victims by receiving  
25 ongoing death threats which are disabling and nerve-wracking.

26 Numerous federal investigators, Bob Simon of CBS News 60 Minutes, Sharyl Attkisson of  
27 CBS News, White House Chief of Staff Rahm Emmanuls staffer, Jofi Joseph and other insiders  
28 have confirmed that senior political officials ordered a “hit-job” on the victims in reprisal for

1 reporting financial crimes involving The U.S. Department of Energy and The White House. The  
2 attackers ordered victims “...cut off from every source of income...” as payback reprisal for their  
3 effective help in a massive anti-corruption effort by Congress and law enforcement concerns. The  
4 blockading of victims income and benefits was a key part of this vendetta effort., per: Agency  
5 Abuse and IRS Lois Lerner Lawsuit report # 2014-hg53; See Sharyl Attkisson’s books including  
6 “**Stonewalled**”; See Federal anti-corruption lawsuit which Victim/Witnesses and their peers won,  
7 proving crony reprisal manipulation of Victim/Witnessess government funds; The family of a U.S.  
8 Senator has stayed at the Victim/Witnesses’s home and Victim/Witnesses has had a long personal  
9 history with that family. Members of that family disclosed some of this information;  
10 Victim/Witnesses had a personal relationship with two of the best friends of the Secretary of State.  
11 One of those parties disclosed some of this information; Millions of pages of supporting evidence  
12 relative to these assertions have provided to the government on hard drives, in on-line digital  
13 evidence repositories, Congressional Committee reports and in hundreds of published and broadcast  
14 news stories.

15 This case involves “**trillions of dollars of stock market, financial and monopoly crimes**”  
16 by others. It is common knowledge that adversaries kill others in order to control trillions of dollars  
17 of anything. The USGS says the rare earth and energy mineral market is worth “trillions of dollars”  
18 which is also verified by hundreds of federal reports, CIA reports and news articles such as:

1  
2 **EXHIBIT 49 – Turning Government Employees And Contractors Into**  
3 **Mobsters**  
4

5 It is easy to understand that a business that generates trillions of dollars of profits would  
6 have a large organized crime operation involved in it that had members who were Senators and  
7 public agency officials who would go to great lengths, including felony crimes, to protect their  
8 endless supply of private jets, private islands and sex workers from these profits.

9 The U.S. Department Of Defense states that over 2300 United States citizens were killed in  
10 the fight for control of mineral and energy rights in Afghanistan. A large number of the deaths on  
11 Evidence Death List Document # 2021-DL3 were whistle-blowers in energy industry corruption  
12 relating to the “rare earth and energy mineral market”. The related facts prove that some people  
13 regularly kill other people, or harm them, in order to control this multi-trillion dollar energy market.  
14 Victim/Witnesses’s patents, technologies and work with The U.S. Government had a direct and  
15 overt ability to effect this market. Victim/Witnesses has proven there was 1.) the will, 2.) the  
16 motivation, 3.) the exclusive state-sponsored means, and 4.) a vast record of the suspects conducting  
17 the same exact attacks on Victim/Witnesses’s peers.

18 Over 20 Congressional hearings verify the evidence. 5 different federal lawsuits and their  
19 court records verify the assertions. The FBI, Police offices and security experts affirm that the  
20 evidence provided. On two different occasions, Victim/Witnesses’s car was rammed by a third party  
21 who then took off. Victim/Witnesses has received multiple phone, email and drive by death threats.  
22 Over 20 different attacks have been undertaken against Victim/Witnesses as documented in  
23 Demand Document # 2021-DMDn45

24 In this SSA case, Victim/Witnesses’s civil rights, human rights, legal rights, U.S.  
25 Constitutional rights and California Constitutional rights have been blockaded and violated.  
26 Additionally, SSA has prevented Victim/Witnesses from hiring a lawyer by minimizing their  
27 payments to such a barely survivable level that they can’t afford proper legal or CPA support.

28 This, and additional evidence, further proves that major public figures had the means and

1 intent to manipulate, and DID manipulate Victim/Witnesses’s government money and benefits. The  
2 massive scope and dollar amount of the organized crime validates the scale or illegality and the  
3 depth of tactics which the suspects are known to stoop to in order to harm those in their way. The  
4 massive scope and dollar amount of the organized crime validates the scale or illegality and the  
5 depth of tactics which the suspects are known to stoop to in order to harm those in their way.

6 According to Victim/Witnesses’s DOJ, FBI and CIA contacts: The U.S. Government , in  
7 particular the DOJ, have filed charges against over 100 individuals who hacked into The U.S.  
8 Government ’s highest level servers, including the GOVT, DOJ and SSA servers on which  
9 Victim/Witnesses’s records are kept. Individuals including: Wang Dong, Sun Kailiang, Wen Xinyu,  
10 Huang Zhenyu, and Gu Chunhui, who were officers in Unit 61398 of the Third Department of the  
11 Chinese People’s Liberation Army (PLA) and Anatoliy Sergeyevich Kovalev, Aleksei Sergeyevich  
12 Morenets, 41, Evgenii Mikhaylovich, Serebriakov, 37, Ivan Sergeyevich Yermakov, 32, Artem  
13 Andreyevich Malyshev, 30, and Dmitriy Sergeyevich Badin, 27, who were each assigned to  
14 Military Unit 26165, and Oleg Mikhaylovich Sotnikov, 46, and Alexey Valerevich Minin, 46, who  
15 were also GRU officers, and hackers-for-hire including Kevin David Mitnick, Adrian Lamo, Albert  
16 Gonzalez, Matthew Bevan, Richard Pryce, Jeanson James Ancheta, Michael Calce, Kevin Poulsen,  
17 Jonathan James, The hacker known as ASTRA, The hacker known as GUCIFER, The hacker  
18 known as ANON 4CHAN, The for-hire hacking service known as “Hafnium” and THOUSANDS  
19 of other individuals had free access and free reign throughout NSA, FBI, SSA, DOJ, OPM, CIA and  
20 other government servers via the SPECTRE, EMOTET, PRIME ROOTKIT, SERCOMM  
21 BACKDOOR, NOTPETYA, MELTDOWN, MASTERKEY, RYZENFALL, FALLOUT,  
22 CHIMERA, and hundreds of other back doors and penetration vulnerabilities in Cisco, Intel,  
23 Juniper Networks, AMD, and other equipment.

24 Additionally, all of the core server penetration tools used by the CIA and the NSA were  
25 hacked by foreign nations and their core source code posted on the internet for all to use. It is well  
26 documented that most agency government servers, prior to 2020, were widely penetrated and  
27 manipulated. The hackers are all known to have sold, or provided the results of their work to  
28 famous politicians for use against their competitors. Nancy Pelosi is an owner of the hacking

1 manipulation firm: CROWDSTRIKE. Crowdstrike and famous California Senators had the easy  
2 means, the motivations, the staffing, the resources and the known engagement of services to  
3 manipulate SSA, DOJ, SEC, FTC and other agency decisions and filing records in order to harm  
4 Victim/Witnesses, reporters and whistle-blowers who reported their crimes and corruptions.

5 Each and every law firm capable of handling Victim/Witnesses case has been contracted,  
6 paid and/or influenced so that they are “conflicted out” from representing Victim/Witnesses. Law  
7 firm Mofo was threatened if they helped Victim/Witnesses. Lawyer Amy Anderson was threatened  
8 and lost her license for attempting to help Victim/Witnesses. Every lawyer or law firm who  
9 attempts to help Victim/Witnesses is hired by Defendants, or their agents and threatened or  
10 compromised in order to prevent them from helping Victim/Witnesses because this case affects  
11 trillions of dollars of energy industry profits, the White House, billionaire oligarchs and multi  
12 millionaire corrupt Senators. In fact, this issue lies at the root of this entire corruption case.

13 Sociopath over-moneyed Silicon Valley oligarchs have hire Morrison Foerster, Wilson Sonsini,  
14 Perkins Coie, Covington Burling and every other major law firm and lobbyist and told them to “kill  
15 everyone and destroy everything that I don’t like...”. These law firms (controlled by Mark  
16 Zuckerberg, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod Khosla, Laurene Powell  
17 Jobs, Nancy Pelosi, etc. All of whom have nearly a trillion dollars of funds at their disposal) have  
18 carte blanche and unlimited payments to run coups, character assassination campaigns, money  
19 laundering and other crimes for the oligarchs. They have the staffing to do these things and zero  
20 incentive to not do crimes. These law firms are the dirty deeds teams for the mobster-like suspects  
21 and there is no law enforcement body with the will nor resources to stop them. It is a violation of  
22 the U.S. Constitution to tell Victim/Witnesses to “go get a law firm” when EVERY possible,  
23 equitable, law firm works for, and is massively compensated by, the criminals that need to be sued.  
24 Both the politicians AND the tech oligarchs charged with these crimes have hired the very law  
25 firms that government agencies have told Victim/Witnesses to go out and hire.

26 There is a precedent that was set in the US Supreme Court case: Gideon v. Wainwright,  
27 (1963) that clarifies that you have a right to a lawyer even if you don't have money for one. The  
28 Sixth Amendment, as applied to the states through the Fourteenth Amendment Due Process Clause

1 gives one their Due Process rights. One needs to kill someone, though, to most easily get your free  
2 lawyer, since the court-appointed lawyer is rarely ever appointed, on citizens behalf, in a case like  
3 this. Even if a defendant is represented by an attorney of his or her choosing, he or she may be  
4 entitled to relief on appeal if the attorney did not provide adequate representation. A defendant must  
5 demonstrate that the attorney’s performance “fell below an objective standard of reasonableness”  
6 and that this was prejudicial to the case. See:

7 [Strickland v. Washington](#)

8 ( <https://supreme.justia.com/cases/federal/us/466/668/case.html> )

9 , 466 U.S. 668, 688-92 (1984). A few “free lawyers”, that victims had tried, turned out to be  
10 working for the opposition side.

11 The federal organization: <https://www.lsc.gov> is required to help but has refused because it’s  
12 administrators were friends with, and appointed by, the public officials charged with corruption in  
13 this case. Victim/Witnesses have personally asked the Attorney General, The Director of the FBI  
14 and the U.S. Attorney’s office for representation but they have been told not to respond because the  
15 case is politically embarrassing to major public officials and their corrupt Silicon Valley financiers.  
16 Victim/Witnesses contacted David L. Anderson, U.S. Attorney for the Northern District of  
17 California, and his senior staff, via certified letter and requested that they assist with the case but  
18 senior DOJ officials in Washington, DC refused to respond to the Northern District.

19 The government agencies who have told Victim/Witnesses that Victim/Witnesses should  
20 “hire a law firm and sue them”, in order to resolve this matter, are the same government agencies  
21 that have cut-off, or blockaded Victim/Witnesses income sources in order to prevent  
22 Victim/Witnesses from being able to afford to hire a law firm to sue them.

23 SSA provided Victim/Witnesses with a list of “free lawyers”. Upon FBI-level investigation  
24 of every “free lawyer” on the list, (via their financial contributions, voting records, leaked emails,  
25 social media postings, event attendance, public records, social connections lists online and other  
26 surveillance data) they all worked for, or with the opposition interests and could not have possibly  
27 provided unbiased services. In fact, multiple lawyers have contacted Victim/Witnesses who turned  
28 out to be working for the opposition. They were sent in to delay, or redirect, Victim/Witnesses in

1 order to keep the cases from being filed or properly prosecuted in order to protect the suspects. This  
2 is a common infiltration procedure widely documented in CIA, British secret service, Russian FSB  
3 and Snowden leaks documents on IC dirty tricks tactics.

4 Agency staff were ordered to harm Victim/Witnesses by manipulating their benefits in  
5 order to deny, delay, obfuscate and reduce their income as reprisal for their assistance to law  
6 enforcement in a political corruption and money laundering matter. Agency staff, ranging from the  
7 lowest level staff and up to the director headquarters offices, participated in this reprisal-vendetta-  
8 revenge action to harm Victim/Witnesses.

9 Victim/Witnesses’s peers have filed DOJ and FBI criminal referrals, launched federal  
10 investigations and the assertions have been proven in numerous IG, FBI, Congressional and major  
11 news media investigations. Agency offices have failed to provide responsive FOIA requested data,  
12 hearing investigation data and fair responses because some of their staff are STILL operating a  
13 criminal cover-up which has now been update-reported to the FBI, Congress, the IG, the AG and  
14 investigative reporters.

15 Other federal agencies have complied, verified and provided the requested deliverables. SSA  
16 and GOVT have pointed the searchlight of suspicion on themselves, laser-like, by their overt failure  
17 to comply, unlike every other agency. Ironically, the political financing of their executives and their  
18 personal relationships “happens” to be with the exact same Silicon Valley oligarchs under felony  
19 criminal investigations. The stock market brokerage records, family trust accounts, PAC trace-  
20 routing, Interpol records and SEC investigation records proves it!

21 Precedents, and the law, provide that, under the circumstances, the government must provide  
22 a law firm and CPA service to Victim/Witnesses, at no charge to Victim/Witnesses, to mediate a  
23 resolution to these issues. SSA must take an effective hand in coordinating these services to be  
24 provided to Victim/Witnesses.

25 This, and additional evidence, proves that Victim/Witnesses’s rights to equitable legal  
26 representation, as required by law, have been denied and blockaded

27

28

4           Those are some of the key “bad guys” in the corruption matter. Jury trials have been  
5 demanded but the Defendants have spent millions of dollars to blockade any jury trial from every  
6 happening because they know that their Cartel will be exposed in any such trial.

2 **EXHIBIT 51 - We're Not Saying It's Mobsters But...It's Mobsters**  
3

4 Per the Office of the Clerk of this honorable Court, in order to assist the Court after being  
5 assured that a RICO Case Statement is never *prohibited*, this Complaint (and analogous follow-on  
6 Complaints) will be proceeded by such a Case Statement.

7 As will be referenced below, allegations contained within this RICO Case Statement, RICO  
8 Complaint and Anti-Trust filing are based upon eye-witness information, FBI reports, FTC reports,  
9 GAO reports, Congressional Ethics Reports, SEC reports, FEC reports, good faith information and  
10 belief.

11 Social Security Administration records and servers were hacked and manipulated. Data and  
12 decision materials harmful to lead Plaintiffs were manipulated and political reprisal actions were  
13 undertaken by Social Security officials in order to punish lead Plaintiffs for his whistle-blower and  
14 law enforcement actions in a substantial organized crime case.

15 Victim/Witnesses' were induced to invest millions of dollars, and all of their life savings, in  
16 a government run project. It was later discovered that ***every government operator of that project***  
17 ***was either financed by, friends, with, sleeping with, dating the staff of, holding stock market***  
18 ***assets in, promised a revolving door job or government service contracts from, partying with,***  
19 ***personal friends with, photographed at private events with, exchanging emails with, business***  
20 ***associates of or directed by; the Victim/Witnesses' business adversaries, or the politicians that***  
21 ***those business adversaries pay campaign finances to, or supply political digital search***  
22 ***manipulation services to. They all used the same couple of law-firms, investment bankers, CPA's,***  
23 ***lobbyists and policy manipulation operatives. There can be no question about the fact that the***  
24 ***government officials involved "colluded", "conspired" and "coordinated" for their own,***  
25 ***personal, unjust gain and quid pro quo. Crooked government employees and contractors made***  
26 ***billions of dollars in unjust gains while Victim/Witnesses' lost billions of dollars BECAUSE***  
27 ***crooked government employees and contractors engaged in these crimes, defrauded***  
28 ***Victim/Witnesses' and used Victim/Witnesses' as a smoke-screen to cover-up their crimes. That***

1 ***“project” turned out to be an operation of the Tech Cartel described in this document as an***  
2 ***organized crime endeavor.***

3 ***To be clear: EACH CITY, STATE, COUNTY AND FEDERAL OFFICIAL CHARGED***  
4 ***IN THIS MATTER WAS RECEIVING STOCK MARKET ASSETS, DIRECT CASH***  
5 ***PAYMENTS, POLITICAL CAREER EXCLUSIVES, SEX WORKER EXCHANGES, REAL***  
6 ***ESTATE PERKS, PROMOTIONS AND OTHER BRIBES; AND THOSE OFFICIALS HAD***  
7 ***INVESTMENT, PERSONAL AND POLITICAL AFFILIATIONS WITH THE ADVERSARIES***  
8 ***CHARGED HEREIN; AND THOSE OFFICIALS HAVE BEEN FOUND, BY FEDERAL***  
9 ***INVESTIGATORS, TO HAVE USED SPY AGENCY RESOURCES TO ATTACK Plaintiffs IN***  
10 ***REPRISAL AND IN ANTI-COMPETITIVE BUSINESS INTERFERENCE.***

11 Victim/Witnesses/Plaintiffs AKA “WITNESS-2021B” had a personal, professional, social,  
12 co-habitation and other relationships with White House, Congressional, City Hall and government  
13 agency staff from 1970 to this date. Alas, many of those figures have been found to have been  
14 owned and control by Victim/Witnesses/Plaintiffs arch competitors who also happen to be in  
15 violation of numerous felony laws. For example: The Silicon Valley Big Tech Cartel, which these  
16 RICO and anti-trust charges are focused on, are seeking to pull the plug on the effort to recall  
17 California Gov. [Gavin Newsom](#) because Newsom ges most of his money and marketing from them.  
18 Laurene Powell Jobs, the widow of Apple CEO Steve Jobs, donated \$200,000 to his political action  
19 committee, followed by a \$100,000 donation from former Google CEO Eric Schmidt on June 4,  
20 according to a [filing](#) with California's secretary of state.  
21 Reed Hastings, the founder and co-CEO of Netflix, [gave](#) \$3 million to save Newsom, making him  
22 the largest donor to any candidate in the likely gubernatorial recall.  
23 Paramount Pictures [donated](#) \$40,000, but the contribution was actually made by ViacomCBS, the  
24 studio's parent company, despite the record from the California secretary of state's office listing  
25 Paramount as the contributor, a Paramount spokesperson [said](#).  
26 Donations to a candidate for office would normally be subject to campaign finance laws, but  
27 Newsom's effort to prevail in a recall is considered a ballot initiative rather than a candidacy, lifting  
28 the cap.

1 Almost every party on the attached Defendants list has ownership in companies that compete with  
2 Victim/Witnesses/Plaintiffs forced out of business companies and federal patents, which  
3 Victim/Witnesses/Plaintiffs created years before any of the Defendants did.  
4 The facts are that almost every official in HUD, SSA, GOVT and related agencies have been  
5 exposed in their emails, financials, stock records and revolving door jobs to be competitors to  
6 Victim/Witnesses/Plaintiffs by providing funds to, or receiving assets from his competitors and by  
7 their foolish belief that one technology, or another, has a political party designation associated with  
8 it and a “good ole boys club” protecting it. Victim/Witnesses/Plaintiffs ran for the office of Mayor  
9 in 1987 at the suggestion of the Fair Political Practices and other law enforcement entities. That  
10 matter was a “sting operation” which resulted in the arrest and prosecution of other candidates for  
11 Mayor for embezzlement of City funds and the operation of a child prostitution ring.  
12 Victim/Witnesses/Plaintiffs have an “FBI-level” knowledge set of political corruption in the Bay  
13 Area and receives/provides information from/to federal law and intelligence investigators. For these  
14 types of services, SSA was compromised to be used as a reprisal weapon against  
15 Victim/Witnesses/Plaintiffs.

16 This matter involves Defendants, together known as the “Tech Cartel”, and their organized  
17 crime activities. These activities are operated by well-known public officials working with Silicon  
18 Valley tech oligarchs via surrogates at a specific set of colluding: 1.) tech law firms, 2.) CPA firms,  
19 3.) lobbyists, 4.) media hit-job services and 4.) tactical contracted-operatives.

20 For the past decade in which relevant predicate reprisal acts were corruptly carried out by  
21 the named defendants as “payback” for Plaintiffs role in the *Solyndra; Energy Stock Bribes* and  
22 *Rare Earth Mining Corruption* cases and his status as a “whistle-blower” to GAO, FBI, FTC,  
23 Congress and other entities (for his temerity in telling the truth concerning obstruction of justice and  
24 gross abuse of power), along with the corrupt politicians surrogates and collaborators (referenced  
25 individually and collectively as the “Tech Cartel”).

26 It is hereby demanded that the FBI interview and ascertain the attack contract compensation  
27 sources along with the command and control managers for attacker/Defendants: **GABRIELLE**  
28 **DARBYSHIRE, A.J. DELAURIO, DAVID PLOUFFE, PATRICK GEORGE, ADRIAN**

1 **COVERT, JOHN HERRMAN, NICHOLAS GUIDO DENTON, and JOHN COOK**, for their  
2 organized attacks on Plaintiffs. The FBI evidence from those interviews and investigations will  
3 confirm the assertions herein.

4 Defendants actions have been synonymous with criminal behavior, malicious baseless  
5 attacks (using mainly the illicit and vicious defamatory tactics against perceived political enemies  
6 (like the Plaintiffs here) of those willing to compensate participants like Brock, Plouffe, Carney,  
7 etc.) – and coordinating by mail and wire to violate myriad Federal and State laws in the  
8 exploitation of Tech Cartel nonprofit entities they use for purely partisan purposes.

9 This Tech Cartel has taken such attacks to an unprecedented and chilling new level  
10 involving illegal domestic human and electronic surveillance, and spy agency tradecraft such as  
11 “lures” run in order to obstruct other federal Investigations by compromised agencies of the  
12 government, all against private citizens in order to assist putting crony associates in political office,  
13 destroying whistle-blowers, and enriching themselves with monopolistic control of **internet, media,**  
14 **energy, vehicle** and **mining markets**. While the **Frank Giustra** mining deals and the **Uranium1**  
15 mining deals have been the subject of recent reports, the entirety of the rare earth mining corruption  
16 and payola, worth **trillions of dollars** in ill-gotten profits, has yet to be fully ePlaintiff 42lored in the  
17 media.

18 **In one example:** according to investigations by the United States Congress, and as  
19 anticipated to emerge from numerous ongoing government investigations, politicians and Silicon  
20 Valley tech oligarchs and certain other Tech Cartel named and unknown named, and high-level  
21 surrogates, colluded with Russian intelligence (SVR and FSB) and a disgraced (and according to a  
22 referral from the United States Senate Committee on the Judiciary, a putative criminal) former  
23 British intelligence officer (Christopher Steele) to accomplish their illicit and unconstitutional  
24 objectives. These Tech Cartel defendants, surrogates and participants have their opportunity to  
25 properly respond before a court they knowingly misled many times using the most powerful  
26 counterintelligence tools available. Let them do so now.

27 Defendant Brock’s malfeasance became more precisely organized in the Tech Cartel, and  
28 thus fully weaponized, as he joined forces with former president William Jefferson Clinton, Hillary

1 Rodham Clinton and funder George Soros (“Soros”), and at various stages of the illegal Tech  
2 Cartel, the other defendants named here. They, and the Tech Cartel they formed to control the  
3 Democratic Party, took illicit advantage of a previously inviolate structural arrangement (between  
4 all three branches of our government) codified in the Foreign Intelligence Surveillance Act  
5 (“FISA”) by arranging for payment through smear merchants Fusion GPS to the Russian SVR and  
6 FSB and British (former) agent Christopher Steele (“Steele”). To abolish their enemies, in other  
7 words, the Tech Cartel defendants were willing to defy all legal and constitutional dictates –  
8 including certain actors within the Obama Department of Justice ineffably misleading Article III  
9 colleagues resident in this very Court. This is sedition, bordering on treason, and patently illegal.

10 As will be discussed throughout this RICO matter, the Tech Cartel set up and used many  
11 unsecure private email servers to conceal from Congress and the Article III Courts tens of thousands  
12 of e-mails. These emails, many of which remain missing, obscured (and obscure) from all  
13 constitutional branches (thus obstructing justice in myriad ways), and, more broadly, from the  
14 people of the United States who are not judges or elected officials, Tech Cartel wrongdoing. Of  
15 those emails that have been recovered, they contain classified information that should never be on  
16 an unsecured server because that presents (for many reasons), a danger to the national security of  
17 the United States. Russian and Chinese state spy agencies are known to have acquired all such  
18 emails via hacking and back door 9-11 ePlaintiff 42loits. They have begun posting that data widely  
19 on the internet. The total email batches from John Doerr and Vinod Khosla, alone are shocking in,  
20 and of, themselves. Third party hackers have the entire drive sets from the Hunter Biden laptop and  
21 the Clinton home server.

22 As such, The Tech Cartel can and must be charged with using illicit espionage under the  
23 clear language of the relevant statute(s). Tech Cartel surrogate James Comey (then-FBI Director)  
24 and Loretta Lynch (then-Attorney General) did not so charge; instead, they devised a scheme to  
25 protect their Crony’s within the Tech Cartel – with the intent that such scheme would help ensure  
26 the election of their friends and with such victory would ensure the Tech Cartel would persevere  
27 into perpetuity and that they (and other Tech Cartel principals, surrogates and participants) would  
28 be richly rewarded. No one would have ever known except for certain FBI and Whiste House

1 whistle-blowers.

2 At the time of this filing, numerous government investigations involving findings highly-  
3 similar to the factual allegations and claims underlying this Complaint are ongoing at the United  
4 States Department of Justice at the FBI, within the DoJ Inspector General’s Office, and at least one  
5 United States Attorney’s Office. The United States Congress is/are conducting several more, in both  
6 the House and the Senate, and despite holdover Tech Cartel obstruction appears within its  
7 committee oversight function to be making substantial progress regarding the very issues raised  
8 here. The evidence produced by those investigations will spurn follow-on investigations and/or  
9 prosecutions with respect to the Tech Cartel defendants and their surrogates and other participants  
10 as described herein. Corroborated and/or new evidence from these (and possibly other)  
11 investigations, as they mature, can and must be incorporated into this lawsuit at the appropriate time  
12 to reinforce its verisimilitude.

13 Another major investigation (among several) of this seditious abuse by the Tech Cartel and  
14 individuals named herein has been undertaken by the Department of Justice Inspector General,  
15 providing yet another avenue to satisfy the standard of plausible evidence for this lawsuit,  
16 comcomitant with a parallel investigation relating to this and related illegalities by Tech Cartel  
17 participants – undertaken at the instructions of the United States Attorney General and conducted by  
18 the United States Attorney for the District of Utah as a predicate for the putative referral to a duly  
19 constituted grand jury and the appointment of a(nother) Special Counsel. Also pending is the  
20 appointment and findings of a Special Counsel to investigate and prosecute FISA abuse and Media  
21 Matters/Shareblue illicit partnership with Facebook to “weaponize” private information in violation  
22 of U.S. law. Bill Gates, Elon Musk, Bill Clinton, The heads of MIT and other notables, have all  
23 been connected with the Epstein sex cult. The actual connection between all of those players is as  
24 much political as it is sexual. Their meetings were Tech Cartel organized crime collusion planning  
25 sessions and many of those meetings were recorded. Bill Gates divorce, Jeffrey Epstein’s death and  
26 Elon Musk’s flight to Texas are all because of these leaks.

27 In another example, Plaintiffs informed FBI Director and James Comey and United States  
28 Attorney General Eric Holder, in time-stamped writing, of the following facts. Plaintiffs are now

1 informed that those parties ran cover-ups of these facts and charges in order to protect the Tech  
2 Cartel:

3 Compensation is thereby demanded from The U.S. Government and the California State  
4 Government, by Victim/Witnesses', for damages, monies owed, witness fees, legal expenses,  
5 whistle-blower fees, informant fees and with-held benefits monies. Additionally, Victim/Witnesses'  
6 submitted invoices to FBI, GAO, SEC, and other agencies that Victim/Witnesses' have provided  
7 witness and investigation services to.

8 This case involves the illicit sale and trading of stocks, bonds, mutual funds, and other  
9 securities; quid pro quo political bribery; election manipulation; monopoly and anti-trust law  
10 violation; bodily harm and other criminal matters applicable to every law enforcement and  
11 regulatory agency.

12 This corruption involves the following:

- 13 • where a financial or other advantage was offered, given or promised to another person with  
14 the intention to induce or reward them or another person to perform their responsibilities or duties  
15 improperly (it does not have to be the person to whom the bribe is offered that acts improperly); or
- 16 • where a financial or other advantage was requested, agreed to be received or accepted by  
17 another person with the intention of inducing or rewarding them or another person to perform their  
18 responsibilities or duties inappropriately (it does not have to be the person who receives the bribe  
19 that acts improperly).

20 The bribes included:

- 21 • assets given or received directly or through a third party (such as someone acting on the  
22 government's behalf, for example an agent, distributor, supplier, joint venture partner or other  
23 intermediary); or
- 24 • assets and stocks for the benefit of the recipient or some other person.

25 The bribes took many forms, for example:

- 26 • money (or cash equivalent such as shares);
- 27 • unreasonable gifts, entertainment or hospitality;
- 28 • kickbacks;

- 1 • prostitutes;
- 2 • attacks on, and murders of, witnesses;
- 3 • unwarranted rebates or excessive commissions (e.g. to sales agents or marketing agents);
- 4 • unwarranted allowances or expenses;
- 5 • “facilitation” payments/payments made to perform their normal job more quickly and/or
- 6 prioritise a particular constituent;
- 7 • political/charitable contributions;
- 8 • uncompensated use of company services or facilities; or
- 9 • anything else of value.

10 This corruption goes between both the public and private sectors.

11 No agency may refuse, or seek to re-direct, this case, to another agency, because this case  
12 falls within the purview of every law enforcement and regulatory agency in the USA. This case also  
13 falls within the purview of multi-national enforcement under Interpol, FinCEN, EU, etc. To  
14 reiterate: this is not a single-agency matter. No agency has the right to seek to shove this case off to  
15 another agency or cover-up this matter at the expense of citizen Constitutional and human rights.

16 This case involves different organizations who are in contest to control the United States  
17 government and the financial and power benefits therefrom.

18 This case involves the control of the White House and the existence, or termination, of the  
19 power in the Oval Office and international corrupt mining deals worth trillions of dollars.

20 Victim/Witnesses’ witnessed an organized criminal Tech Cartel which affected government  
21 Treasury funds. The crime scheme involved: stock market manipulation, corrupt international  
22 mining deals and media company power manipulations. When Victim/Witnesses’ reported the  
23 crime, millions of dollars of state-sponsored reprisal attacks ( enumerated in detail below) were  
24 launched against Victim/Witnesses’ in vendetta.

25 Related cases shed illuminate the depths of criminality and the scope of crimes and illicit  
26 deeds by the colluding perpetrators and their crime culture:

27 In federal **Case No. 1:20-cv-03010** – you see proof that perpetrator Google is monopoly and  
28 runs competitor attacks. In **Case No. 11-CV-2509** -<https://www.cand.uscourts.gov/judges/koh-lucy->

1 h-lhk/in-re-high-tech-employee-antitrust-litigation/ - you see proof that the Silicon Valley Cartel  
2 colludes to harm others. In Task Force Case **No. 20-xyz2020a** - XXXXXXXXXXXXXXXX - you see  
3 proof that this “Silicon Valley Cartel” is a RICO law violating entity. In **Case No. 20-03664** -  
4 <https://www.insurancejournal.com/app/uploads/2020/06/brown-v-google.pdf> – you see further  
5 evidence that the Google-Youtube-Alphabet organization operates as a racketeering entity that  
6 controls portions of the government.

7 In Case No. **1:12-CV-00774-mms** and related cases - [https://thehill.com/blogs/congress-](https://thehill.com/blogs/congress-blog/the-administration/250109-a-case-study-in-pay-to-play-cronyism)  
8 [blog/the-administration/250109-a-case-study-in-pay-to-play-cronyism](https://thehill.com/blogs/congress-blog/the-administration/250109-a-case-study-in-pay-to-play-cronyism) – You see that criminal  
9 referrals against the attackers have been filed with the FBI, DOJ, SEC, FEC, FTC and that insider  
10 cronyism at The U.S. Government is accelerating at a rapid pace up and including the recent  
11 Granholm investigations.

12 Additional court cases, available on [www.pacer.gov](http://www.pacer.gov), have filed extensive further evidence  
13 proving Victim/Witnesses' assertions. Such key cases include:

14 **Case No. 18-cv-8865** (S.D.N.Y.)(SEC v. Elon Musk for lies and scams )

15 **Case No. 18-cv-8947** (S.D.N.Y.)( SEC v. Tesla, Inc. for lies and scams )

16 **Case No. 1:14-cv-270143** ( Google racketeering charges -  
17 <https://artistrightswatch.com/2017/10/08/googles-racketeering-challenge/> )

18 **Case No. 1:19-cr-00490** ( United States v. Epstein - Big tech sex cult crimes case )

19 **Case No. 129 So.3d 1196** (Fla. 2d DCA 2014); 170 So.3d 125 (Fla. 2d DCA 2015)  
20 ( Gawker Media, LLC v. Bollea in which Gawker, Deadspin, Gizmodo, Jalopnik, Jezebel, Kotaku  
21 and Lifehacker were exposed as character assassination and money-laundering fronts working for  
22 notorious third parties)

23 **Case No. 19-cv-343672** James Martin (on behalf of ALPHABET INC) v Larry Page et al  
24 (Sex Cults In Silicon Valley )

25 **Case No. CGC-11-508414**, California Superior Court, San Francisco (Victim/Witnesses' v  
26 Google )

27 **Case No. 3:16-cv-03061** U.S. DISTRICT COURT, NORTHERN DISTRICT OF  
28 CALIFORNIA, San Francisco Division ( Victim/Witnesses' V. Google/Alphabet/YouTube)

1 Case No. 18-CIV05380 Rubin Vs. Rubin (Google sex cult and sex slave charges )

2 Case No. : 1:17 - cv - 06404 Vs. Rubin (Organized crime sex trafficking by stock market  
3 manipulators )

4 Case No. D.C. No. 3:17-cv-05369 - VC (Big tech harassment of outsiders)

5 Case No. 3:21-cv-00077 (Another of many lawsuits proving that the Silicon Valley Cartel  
6 conspires to manipulate media and markets)

7 1. Victim/Witnesses’ were induced to invest millions of dollars, and all of their life savings, in  
8 a government run project. It was later discovered that ***every government operator of that***  
9 ***project was either financed by, friends, with, sleeping with, dating the staff of, holding***  
10 ***stock market assets in, promised a revolving door job or government service contracts***  
11 ***from, partying with, personal friends with, photographed at private events with,***  
12 ***exchanging emails with, business associates of or directed by; the Victim/Witnesses’***  
13 ***business adversaries, or the politicians that those business adversaries pay campaign***  
14 ***finances to, or supply political digital search manipulation services to. They all used the***  
15 ***same couple of law-firms, investment bankers, CPA’s, lobbyists and policy manipulation***  
16 ***operatives. There can be no question about the fact that the government officials involved***  
17 ***“colluded”, “conspired” and “coordinated” for their own, personal, unjust gain and quid***  
18 ***pro quo. Crooked government employees and contractors made billions of dollars in***  
19 ***unjust gains while Victim/Witnesses’ lost billions of dollars BECAUSE crooked***  
20 ***government employees and contractors engaged in these crimes, defrauded***  
21 ***Victim/Witnesses’ and used Victim/Witnesses’ as a smoke-screen to cover-up their crimes.***  
22 ***That “project” turned out to be an operation of the Tech Cartel described in this***  
23 ***document as an organized crime endeavor.***

24

25

26 This is a felony-grade criminal racketeering case. White House, Department of Energy,

27 Department of State and other California State and Federal government agency staff coordinated

28 with their political campaign financier/beneficiaries from Solyndra, Tesla, Fisker, Facebook,

1 Google, YouTube, Netflix, Linkedin, Alphabet, Kleiner Perkins, Greylock, Goldman Sachs and  
2 other PAC-aligned Silicon Valley businesses to operate a RICO-law and Antitrust-law violating  
3 illicit business “Cartel”. The operation of this Cartel has been proven by leaked emails, whistle-  
4 blowers, lawsuits and FBI-type forensic accounting.

5 ***The statute of limitations*** has not been exceeded in this case because the attacks, harms and  
6 perpetrators actions have continued as recently as yesterday.

7 This illicit organization had planned to skim trillions of dollars of exclusive profits from  
8 government contracts, political payola, foreign rare earth mining operations, internet news and  
9 search manipulation deals, revolving-door deals and massive computerized algorithm-based stock  
10 market manipulations. The Defendants schemes, particularly, planned to ePlaintiff 42loit funds  
11 from the 2008 and 2021 “Stimulus Bills”. Victim/Witnesses"s', government employee/contractors,  
12 competed with these entities, with superior technology at lower prices, and were targeted by this  
13 Cartel, for termination.

14 Victim/Witnesses"s' became information providers and whistle-blowers for investigators in  
15 the examination of this crime. Defendants ePlaintiff 42ended vast amounts of corporate and  
16 taxpayermoney and resources harming Victim/Witnesses's in reprisal vendetta attacks. Over a  
17 million pages of evidence and proof are provided on the case website. Damages and attacks on  
18 Victim/Witnesses' continue to today.

19  
20  
21  
22  
23  
24  
25  
26  
27  
28

1 **EXHIBIT 52 - Blockade Of Plaintiffs Legal Representation And Rights**

2 Victim/Witnesses' Demand State-Funded **Legal Representation**

3 **A.** Victim/Witnesses's have been “black-listed” from getting legal representation. Even though the  
4 law in California (Cal. Lab. Code § § 1050 to 1053) says that an entity *can't* prevent or attempt to  
5 prevent former workers from getting work or representation through misrepresentation, knowingly  
6 permitting or failing to take reasonable steps to prevent blacklisting, or make a statement about why  
7 an employee was discharged or left employment, implying something other than what is ePlaintiff  
8 42licitly said, or providing information that was not requested: ***It is done every day in Silicon***  
9 **Valley.** The "*Silicon Valley No Poaching Black-List*" class-action lawsuit, the "*AngelGate Scandal*  
10 *Investigation*" , and many other notorious scandals and books are about this issue. Federal FAR  
11 Section 9.104-1 (d), and related laws, apply. Blacklisting is a key part of the IC Vendetta Cycle  
12 attacks. The Victim/Witnesses' also suffered damage to their rights under the Age Discrimination in  
13 Employment Act (ADEA) (29 USC Sec. 621, et seq.); the Americans with Disabilities Act (42 USC  
14 Sec. 12181, et seq.); the Civil Rights Acts - (42 USC Sec. 2000, et seq.); the Davis-Bacon Act (40  
15 USC Sec. 276a, et seq.); the Employee Retirement Income Security Act (ERISA) (29 USC Sec.  
16 1001, et seq.); the Equal Pay Act (29 USC Sec. 206[d]) and other violations.

17  
18  
19  
20  
21 **B.** Each and every law firm capable of handling Victim/Witnesses's case has been contracted, paid  
22 and/or influenced so that they are “conflicted out” from representing Victim/Witnesses's. Law firm  
23 Mofo was threatened if they helped Victim/Witnesses's. Lawyer Amy Anderson was threatened and  
24 lost her license for attempting to help Victim/Witnesses's. Every lawyer or law firm who attempts to  
25 help Victim/Witnesses's is hired by Defendants, or their agents and threatened or compromised in  
26 order to prevent them from helping Victim/Witnesses's because this case affects trillions of dollars  
27 of energy industry profits, the White House, billionaire oligarchs and multi millionaire corrupt  
28

1 Senators. In fact, this issue lies at the root of this entire corruption case. Sociopath over-moneyed  
2 Silicon Valley oligarchs have hire Morrison Foerster, Wilson Sonsini, Perkins Coie, Covington  
3 Burling and every other major law firm and lobbyist and told them to “*kill everyone and destroy*  
4 *everything that I don’t like...*”. These law firms (controlled by Mark Zuckerberg, Elon Musk, Larry  
5 Page, Eric Schmidt, Steve Westly, Vinod Khosla, Laurene Powell Jobs, Nancy Pelosi, etc. All of  
6 whom have nearly a trillion dollars of funds at their disposal) have carte blanche and unlimited  
7 payments to run coups, character assassination campaigns, money laundering and other crimes for  
8 the oligarchs. They have the staffing to do these things and zero incentive to not do crimes. These  
9 law firms are the dirty deeds teams for the mobster-like suspects and there is no law enforcement  
10 body with the will nor resources to stop them. It is a violation of the U.S. Constitution to tell  
11 Victim/Witnesses's to “go get a law firm” when EVERY possible, equitable, law firm works for,  
12 and is massively compensated by, the criminals that need to be sued. Both the politicians AND the  
13 tech oligarchs charged with these crimes have hired the very law firms that government agencies  
14 have told Victim/Witnesses's to go out and hire.  
15  
16  
17

18 **C.** There is a precedent that was set in the US Supreme Court case: *Gideon v. Wainwright*, (1963)  
19 that clarifies that you have a right to a lawyer even if you don't have money for one. The Sixth  
20 Amendment, as applied to the states through the Fourteenth Amendment Due Process Clause gives  
21 one their Due Process rights. One needs to kill someone, though, to most easily get your free  
22 lawyer, since the court-appointed lawyer is rarely ever appointed, on citizens behalf, in a case like  
23 this. Even if a defendant is represented by an attorney of his or her choosing, he or she may be  
24 entitled to relief on appeal if the attorney did not provide adequate representation. A defendant must  
25 demonstrate that the attorney’s performance “fell below an objective standard of reasonableness”  
26 and that this was prejudicial to the case. See:

27  
28 *Strickland v. Washington* ( <https://supreme.justia.com/cases/federal/us/466/668/case.html> ) , 466

1 U.S. 668, 688-92 (1984). A few “free lawyers”, that Victim/Witnesses' had tried, turned out to be  
2 working for the opposition side.

3  
4 **D.** The federal organization: <https://www.lsc.gov> is required to help but has refused because it's  
5 administrators were friends with, and appointed by, the public officials charged with corruption in  
6 this case.

7  
8  
9 **E.** Victim/Witnesses's have personally asked the Attorney General, The Director of the FBI and the  
10 U.S. Attorney's office for representation but they have been told not to respond because the case is  
11 politically embarrassing to major public officials and their corrupt Silicon Valley financiers.

12  
13 **F.** The government agencies who have told Victim/Witnesses's that Victim/Witnesses's should  
14 “*hire a law firm and sue them*”, in order to resolve this matter, are the same government agencies  
15 that have cut-off, or blockaded Victim/Witnesses's income sources in order to prevent  
16 Victim/Witnesses's from being able to afford to hire a law firm to sue them.

17  
18  
19 **G.** A federal agency provided Victim/Witnesses's with a list of “free lawyers”. Upon FBI-level  
20 investigation of every “free lawyer” on the list, (via their financial contributions, voting records,  
21 leaked emails, social media postings, event attendance, public records, social connections lists  
22 online and other surveillance data) they all worked for, or with the opposition interests and could  
23 not have possibly provided unbiased services. In fact, multiple lawyers have contacted  
24 Victim/Witnesses's who turned out to be working for the opposition. They were sent in to delay, or  
25 redirect, Victim/Witnesses's in order to keep the cases from being filed or properly prosecuted in  
26 order to protect the suspects. This is a common infiltration procedure widely documented in CIA,  
27 British secret service, Russian FSB and Snowden leaks documents on IC dirty tricks tactics.  
28

1  
2 **H.** Agency staff were ordered to harm Victim/Witnessess by manipulating their benefits in order to  
3 deny, delay, obfuscate and reduce their income as reprisal for their assistance to law enforcement in  
4 a political corruption and money laundering matter. Agency staff, ranging from the lowest level  
5 staff and up to the director headquarters offices, participated in this reprisal-vendetta-revenge action  
6 to harm Victim/Witnessess. Victim/Witnesses’s peers have filed DOJ and FBI criminal referrals,  
7 launched federal investigations and the assertions have been proven in numerous IG, FBI,  
8 Congressional and major news media investigations. Agency offices have failed to provide  
9 responsive FOIA requested data, hearing investigation data and fair responses because some of their  
10 staff are STILL operating a criminal cover-up which has now been update-reported to the FBI,  
11 Congress, the IG, the AG and investigative reporters.  
12

13  
14 Other federal agencies have complied, verified and provided the requested deliverables. SSA and  
15 GOVT have pointed the searchlight of suspicion on themselves, laser-like, by their overt failure to  
16 comply. Ironically, the political financing of their executives and their personal relationships  
17 “happens” to be with the exact same Silicon Valley oligarchs under felony criminal investigations.  
18 The stock market brokerage records, family trust accounts, PAC trace-routing, Interpol records and  
19 SEC investigation records proves it!  
20

21  
22 Every “unsigned” anonymous government email is tracked to the individual author by their IP  
23 address, device IMEI, web camera, building key card, door camera, parking lot use chart, building  
24 camera, vehicle tracking circuits, text dba records, keyboard UI/UX patterns, motherboard ID #,  
25 DNS routing, stingray read-outs and a vast number of other metrics. Victim/Witnesses investigation  
26 peers know the exact person that wrote every government email or document or file request.  
27  
28

1 Stone-walling based cover-ups are being mitigated by Victim/Witnesses', and their peers, by  
2 carbon-copying these disclosures to every member of the press, every voting citizen and every  
3 jurisdiction agent.

4  
5 For years, victim/Victim/Witnesses's, and their advocates and peers, have contacted every  
6 government agency and authority listed in government directories, which may have any jurisdiction  
7 over this case. The usual response has been cover-ups, finger-pointing, stone-walling, obfuscation,  
8 failure-to-reply or other tactics to delay the inevitable. This has forced victim/Victim/Witnesses's to  
9 use social media and novel distribution technologies to present their case to every registered voter in  
10 the public. Agency officials who were supposed to be helping victim/Victim/Witnesses's have been  
11 exposed taking bribes from victim/Victim/Witnesses' enemies and adversaries in this case.

12  
13 Certain California State officials, Obama White House Staff and Federal Agency staff  
14 **accepted bribes** from Silicon Valley Oligarchs and Investment Bank Cartels. They were bribed  
15 with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and  
16 stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook,  
17 Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported  
18 to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event  
19 Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs  
20 in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those  
21 Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced  
22 "Speaking Engagements" which are really just pay-offs conduited for donors; Gallery art; Private jet  
23 rides and the use of Government fuel depots (ie: Google handed out NASA jet fuel to staff);  
24 Recreational drugs; Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and  
25 related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche  
26 Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services  
27 owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson  
28 Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials; Payroll W2 and 1099

1 payments which were actually bribe payments for political work such as character assassinations  
2 and internet rigging; and other means now documented by us, The FBI, the FTC, The SEC, The  
3 FEC and journalists.

1  
2 **EXHIBIT 53 - The Office Of The Special Counsel (OSC) Is Not Your**  
3 **Friend**

4 While the “OSC” makes people think of the victory over corruption at the Watergate  
5 hearings, that is about the only good thing OSC has ever done. Most people now think OSC stands  
6 for: *The Office Of Shredding And Corruption.*

7 OSC gathers the tips about corruption and then makes sure those tips never see daylight.

8 The head of the U.S. Office of Special Counsel (OSC), Plaintiff 22J. Bloch, pleaded guilty  
9 to criminal contempt of Congress for willfully and unlawfully withholding pertinent information  
10 from a House committee investigating his decision to have several government computers wiped,  
11 announced U.S. Attorney for the District of Columbia Ronald C. Machen Jr., Office of Personnel  
12 Management (OPM) Inspector General, Patrick McFarland, and FBI Assistant Director in Charge  
13 Shawn Henry.

14 The plea was entered before U.S. Magistrate Judge Deborah A. Robinson in U.S. District  
15 Court for the District of Columbia, who scheduled sentencing for July 20, 2010. Bloch faces a  
16 maximum sentence of one year in jail and a fine of \$100,000. Bloch’s likely sentencing range is  
17 zero to six months in jail under the federal sentencing guidelines.

18 The OSC is an independent federal agency charged with safeguarding the merit-based  
19 employment system by protecting federal employees and applicants from prohibited personnel  
20 practices, with an emphasis on protecting federal whistleblowers. Bloch, a presidential appointee  
21 whose title was Special Counsel, headed the OSC from 2004 through 2008.

22 According to the statement of offense, on March 4, 2008, Bloch submitted to a transcribed  
23 interview with staff members of the U.S. House of Representatives Committee on Oversight and  
24 Government Reform, which was investigating, among other things, whether and why Bloch:  
25 directed the deletion of e-mails or files on any of Bloch’s OSC-issued computers in December of  
26 2006 by using the computer repair service Geeks On Call; directed that the computer repair service  
27 delete e-mails or files contained on the computers of two of his OSC aides; and directed that any  
28 such deletion of computer files be done by use of a “seven-level wipe” process. This duly

1 empowered congressional inquiry came after various media reports that Bloch had directed the  
2 deletion of files on several OSC-issued computers by using the repair service.

3       The statement of offense describes five separate exchanges during Bloch’s March 4, 2008,  
4 interview with staff members of the House Oversight Committee during which Bloch unlawfully  
5 and willfully withheld pertinent information from the committee. Bloch admitted in court today that  
6 he refused and failed to state fully and completely the nature and extent of his instructions that  
7 Geeks On Call perform “seven level wipes” on his OSC computers as well as the two OSC-issued  
8 computers of two non-career OSC staff members in December 2006.

9       In announcing today’s guilty plea, U.S. Attorney Machen, Inspector General McFarland,  
10 and Assistant Director in Charge Henry praised the outstanding work of the investigative agents  
11 involved in this matter, especially Special Agent Marc R. Diehl and Andrew Smallman of the FBI;  
12 as well as Jill P. Maroney, Deputy Assistant Inspector General for Investigations; and J. David  
13 Cope, Assistant Inspector General for Legal Affairs of OPM. They also acknowledged the hard  
14 work of Paralegal Specialists Diane Hayes and Mary Treanor; Legal Assistant Jamasee Lucas;  
15 former Legal Assistant April Peeler; Supervisory IT Specialist Joe Calvarese; and Assistant U.S.  
16 Attorneys Laurel Loomis Rimon, Dan Butler, James Mitzelfeld, and Glenn S. Leon, who is  
17 prosecuting the case.

18       During the Bloch era, the OSC was criticized for (1) very rarely recognizing legitimate  
19 whistleblowers, typically only when the whistleblower had already prevailed elsewhere; (2) taking  
20 too long to investigate meritorious cases; (3) using a conservative litmus test in hiring; (4)  
21 discouraging federal whistleblowers from using their legal protections, and (5) generally siding with  
22 the federal administration instead of with the whistleblowers it was supposed to protect.[\[40\]](#)[\[41\]](#)

23       On March 22, 2007, U.S. Senator [Daniel K. Akaka \(Democrat, Hawaii\)](#), Chairman of the  
24 [Subcommittee on Oversight of Government Management, the Federal Workforce, and the District](#)  
25 [of Columbia](#), held a hearing on "Safeguarding the Merit System Principles." In his opening  
26 statement, Sen. Akaka stated, "organizations that help whistleblowers claim that OSC has gone  
27 from being their first option for relief to their last choice since OSC no longer works with agencies  
28 to achieve informal relief and the percentage of corrective actions and stays has been cut in half

1 since 2002."[\[42\]](#)

2           OSC protects the seated President and the most powerful politicians who have the biggest  
3 war chests.

2  
3 **EXHIBIT 54 - How Government Agencies Were Used As Reprisal  
Weapons Against Plaintiffs**

4  
5 The San Mateo, California Social Security Administration offices are under investigation  
6 because one, or more, of their staff used SSA resources to attack an Victim/Witnesses because a  
7 staff member (erroneously) thought that an Victim/Witnesses was opposed to that SSA staffer's  
8 beliefs on "open-borders". The SSA official ordered up reprisal operations, against the  
9 Victim/Witnesses, simply to vent that SSA officials political angers. That is illegal.

10 A vast number of agency abuse cases and lawsuits are now on public record in the Inspector  
11 General's offices and federal courts.

12 It is an indisputable fact that some government agencies run "hit-jobs" on citizens on orders  
13 from certain corrupt politicians. These actions are felony violations of the law.

14 Federal and State Agencies including SSA, FEC, GOVT, HHS, VA, CIA, HUD, SA, SEC,  
15 FBI, DOJ and many others, have been charged, and found guilty, in these crimes against citizens.

16 In the Congressional investigation published by the United States Congress in review of the  
17 U.S. Department of Energy LGP/ATVM programs, it is clearly proven that the U.S. Department of  
18 Energy was used as a slush-fund by some GOVT executives in order to pay off campaign financiers  
19 by attacking and sabotaging their competitors.

20 The GOVT Paducah Gaseous Diffusion Plant under contracts with The U.S. Government  
21 and the government-owned U.S. Enrichment Corp paid \$5M whistle-blower awards to those  
22 whistle-blowers who were attacked, using government agency resources, for reporting a crime.

23 Dept. of Energy Hanford URS has agreed to settle a lawsuit brought by former employee  
24 Walter Tamosaitis for \$4.1 million. The settlement in the whistle-blower case comes almost one  
25 year before the case was set for a jury trial in federal court in Richland and compensates Tamosaitis  
26 for attacks against him, by GOVT officials, in retribution for reporting a crime.

27 VA officials attacked hundreds of citizens who reported corruption, ie:  
28 <https://www.thenewamerican.com/usnews/health-care/item/18610-va-whistleblowers-facing->

1 retribution.

2 As shown in this report: [https://www.pogo.org/analysis/2018/08/new-report-confirms-](https://www.pogo.org/analysis/2018/08/new-report-confirms-whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-affairs/)  
3 [whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-affairs/](https://www.pogo.org/analysis/2018/08/new-report-confirms-whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-affairs/)

4 , Agencies attack often and harshly.

5 CIA and NSA executives have been widely shown to use spy tools to attack domestic  
6 citizens they don't like, ie: [https://www.dailymail.co.uk/news/article-2435011/NSA-employees-](https://www.dailymail.co.uk/news/article-2435011/NSA-employees-used-phone-tapping-tools-spy-girlfriends-cheating-husbands.html)  
7 [used-phone-tapping-tools-spy-girlfriends-cheating-husbands.html](https://www.dailymail.co.uk/news/article-2435011/NSA-employees-used-phone-tapping-tools-spy-girlfriends-cheating-husbands.html) , and hundreds of other news  
8 links that can be provided.

9 Elon Musk and Tesla, as well as Eric Schmidt and Larry Page at Google, have been proven  
10 to use the CIA group: IN-Q-TEL, to run government sponsored/financed attacks on business  
11 competitors.

12 In Civil Action No. 1:13-cv-00777-RBW GOVERNMENT AGENCIES WERE CAUGHT  
13 BEING USED FOR ATTACKS AGAINST CITIZENS AND PUNISHED IN THE COURT AND  
14 THE MEDIA!

15 The IRS, and hordes of other government agencies have been caught and proven, IN  
16 COURT, to target and attack people for presumed political differences.

17 Why should we assume that the Social Security Administration is not ALSO doing this too  
18 to harm citizens who speak out?

19 The Lois Lerner IRS attacks took many years to resolve. In an unprecedented victorious  
20 conclusion to a four year-long legal battle against the IRS, the bureaucratic agency admitted in  
21 federal court that it wrongfully targeted citizens, during the Obama Administration, because of their  
22 political viewpoints and issued an apology to those people for doing so.

23 In addition, the IRS is consenting to a court order that would prohibit it from ever engaging  
24 in this form of unconstitutional discrimination in the future.

25 In a proposed Consent Order filed with the Court, the IRS has apologized for its treatment of  
26 U.S. citizens including organizations from 20 states that applied for 501(c)(3) and (c)(4) tax-exempt  
27 status with the IRS between 2009 and 2012 -- during the tax-exempt determinations process.

28 Crucially, following years of denial by the IRS and blame-shifting by IRS officials, the agency now

1 ePlaintiff 42ressly admits that its treatment of our clients was wrong and a total violation of our  
2 Democracy..

3 As set forth in the proposed Order:

4 “The IRS admits that its treatment of Victim/Witnesses's during the tax-exempt  
5 determinations process, including screening their applications based on their names or policy  
6 positions, subjecting those applications to heightened scrutiny and inordinate delays, and  
7 demanding of some Victim/Witnesses' information that TIGTA determined was unnecessary to the  
8 agency’s determination of their tax-exempt status, was wrong. For such treatment, the IRS ePlaintiff  
9 42resses its sincere apology.”

10 Throughout litigation of this case, activists have remained committed to protecting the rights  
11 of the public who faced unlawful and discriminatory action by the IRS and other agencies. The  
12 objective from the very beginning has been to hold agencies accountable for corrupt practices.

13 This Consent Order represents a historic victory for the public and sends the unequivocal  
14 message that a government agency’s targeting of citizens organizations, or any organization, on the  
15 basis of political viewpoints, will never be tolerated and that revenge will be swift and vast.

16 The Order will put an end, once and for all, to the abhorrent practices utilized against  
17 citizens, as the agreement includes the IRS’s ePlaintiff 42ress acknowledgment of – and apology for  
18 – its wrongful treatment of the public. While this agreement is designed to prevent any such  
19 practices from occurring again, rest assured that all public interest lawyers will remain vigilant to  
20 ensure that the IRS, SSA, DOJ or SEC does not resort to such tactics in the future.

21 Per detailed reports, in March of 2012 lawyers began being contacted by literally dozens of  
22 citizens and groups who were being harassed by the Obama IRS after submitting applications for  
23 tax-exempt status. Their tax-exempt applications were held up for years (over seven years in some  
24 cases), and they began receiving obtrusive and unconstitutional requests for donor and member  
25 information. That began a now more than five and a half year fight with the burgeoning bureaucracy  
26 at the IRS. Then on May 10, 2013, Lois Lerner, the then head of the IRS Tax Exempt Organizations  
27 Division, publicly implicated the IRS in one of the worst political targeting scandals of the century.

28 This is an extraordinary victory against government agency abuse. It sends a powerful

1 warning to the deep state bureaucracy that it will not be allowed to violate the Constitution in order  
2 to silence and shut down the whistle-blowers.

3 In addition to the IRS’s admissions of and apology for its wrongful conduct, the Consent  
4 Order would specifically award Victim/Witnesses's the following:

5 - A declaration by the Court that it is wrong to apply the United States tax code to any tax-  
6 exempt Victim/Witnesses or entity based solely on such entity’s name, any lawful positions it  
7 espouses on any issues, or its associations or perceived associations with a particular political  
8 movement, position or viewpoint;

9 - A declaration by the Court that any action or inaction taken by the IRS must be applied  
10 evenhandedly and not based solely on a tax-exempt Victim/Witnesses or entity’s name, political  
11 viewpoint, or associations or perceived associations with a particular political movement, position  
12 or viewpoint; and

13 - A declaration by the Court that discrimination on the basis of political viewpoint in  
14 administering the United States tax code violates fundamental First Amendment rights. Disparate  
15 treatment of taxpayers based solely on the taxpayers’ names, any lawful positions the taxpayers  
16 espouse on any issues, or the taxpayers’ associations or perceived associations with a particular  
17 political movement, position or viewpoint is unlawful.

18 In the Order, the IRS has also agreed that (unless ePlaintiff 42ressly required by law) certain  
19 actions against the Victim/Witnesses's– i.e. the sharing, dissemination, or other use of information  
20 unnecessarily obtained by the IRS during the determinations process (such as donor names, the  
21 names of volunteers, political affiliations of an organization’s officers, etc.) – would be unlawful. In  
22 addition, the IRS promises not to take any retaliatory action against our clients for ePlaintiff  
23 42osing the targeting scheme.

24 Finally, and of crucial significance, the IRS admits it targeted persons and groups based on  
25 their viewpoints (i.e., “policy positions”) and that such viewpoint discrimination violates  
26 fundamental First Amendment rights. This is the first time the IRS has admitted that its targeting  
27 scheme was not just “inappropriate” – as TIGTA found – but, as alleged, blatantly unconstitutional.

28 To ensure consistency and uniformity within the agency’s operations going forward, the IRS

1 is required, pursuant to the Order, to inform all employees within the Exempt Organizations  
2 Division, as well as the Commissioners and Deputy Commissioners within other divisions, of the  
3 Order’s terms.

4 This Order not only validates allegations about their treatment at the hands of the corrupt  
5 Obama-era IRS but also provides important assurances to the American public that the agency  
6 understands its obligation to refrain from further such discriminatory conduct. As Attorney General  
7 Sessions acknowledged in this regard, “[t]here is no excuse for [the IRS’s] conduct,” as it is  
8 “without question” that the First Amendment prohibits the conduct that occurred here, i.e.,  
9 subjecting American citizens to disparate treatment “based solely on their viewpoint or ideology.”  
10 Sessions further confirmed his Department’s commitment to ensuring that the “abuse of power” in  
11 which the IRS engaged here “will not be tolerated.”

12 It is impossible to overstate the importance of this victory. This marks a years-long fight for  
13 justice in defense of the constitutional rights of the public.

14 This is an extraordinary victory against abuse of power and corruption.

15 It sends a powerful warning to the deep state bureaucracy that it will not be allowed to  
16 violate the Constitution and manipulate the IRS, SSA and other agencies in order to silence and shut  
17 down those who speak out about political corruption crimes.

18 In the wake of Wisconsin Watchdog’s investigation into SSA staff allegations of  
19 incompetence, misconduct, and retaliation in Social Security disability appeals offices, several  
20 employees have taken their complaints to a Senate committee led by Wisconsin Sen. Ron Johnson.

21 An official with knowledge of the complaints said the Senate Homeland Security and  
22 Governmental Affairs Committee, chaired by the Oshkosh Republican, has received emails and  
23 other contacts from “certain people” inside the Social Security Administration’s Office of Disability  
24 Adjudication and Review.

25 The initial complaints came from an employee inside the Milwaukee office following  
26 Wisconsin Watchdog’s opening investigative report that found some claimants waiting more than  
27 1,000 days for an appeals decision on their disability benefits claim.

28 Following Wednesday’s story of a whistleblower in the Madison ODAR office, the

1 committee has received more specific complaints about retaliation against employees, the source  
2 said.

3 Committee staff members sent the latest Watchdog piece to SSA administrators hoping they  
4 will “cooperate,” the source said. To date, the agency has been less than cooperative.

5 “This is an ongoing process, and they are not always as forthcoming as we’d like them to  
6 be,” the source said. “Hopefully with your continued reporting, this is an issue they can’t duck.”

7 A Senate committee member said officials there are working with the Office of Special  
8 Counsel on “multiple whistleblower retaliation claims.” The committee continues to request  
9 information from the SSA.

10 The whistleblower in the Madison office claims management retaliated against her after she  
11 was called to testify in a misconduct case. The incident involved “inappropriate behavior” by an  
12 administrative law judge, she said.

13 “They are so corrupt. It’s absolutely horrible,” said the woman, a lead case technician in the  
14 Madison Office of Disability Adjudication and Review.

15 She spoke on condition of anonymity, fearing more retribution from her supervisors. While  
16 she said recounting her particular experiences will more than likely betray her identity anyway, the  
17 ODAR case worker insisted she has had enough.

18 “I’m at point where they don’t care about me, I don’t see why I’m protecting them. This is  
19 my last resort,” she said. “I want to do my work without fear of retaliation.”

20 She said she has contacted the Senate committee.

21 “I forwarded my information to them and I got an email back from them. They said people  
22 are coming out of the woodwork with their complaints (about ODAR) following your story,” the  
23 whistle-blower said.

24 Ronald Klym, a long-time senior legal assistant in the Milwaukee ODAR office, alleges he  
25 has been retaliated against by supervisors for going public with his charges of incompetence and  
26 misconduct in the agency. The federal employee, who has worked for SSA for 16 years, provided  
27 Wisconsin Watchdog with documents showing extremely long wait times for claimants appealing  
28 their denied applications for benefits.

1 Doug Nguyen, SSA regional spokesman, in a previous story said the agency acknowledges  
2 that Milwaukee ODAR has a “high average processing time for disability appeal hearings, and we  
3 are working to address the issue.”

4 Beyond the delays is what Klym calls the “shell game,” the wholesale transferring of cases  
5 to other parts of the country by administrators to make the Milwaukee office’s numbers look better  
6 than they are.

7 The Madison office whistle-blower confirmed Klym’s allegations, saying at one point she  
8 saw 2,000 cases from the Milwaukee office handed off to the Oak Brook operation.

9 There are over 10,000 SSA disability manipulation charges against SSA executives and  
10 staff. There are over 185,000 charges filed by domestic citizens against all of the parties we listed in  
11 our *reported-to* list above.

2 **EXHIBIT 55 - How Plaintiffs And The Members Of The Public Were Harmed,**  
3 **Specifically**

4  
5 "Victim/Witnesses A" and his co-workers were cooperating with agency investigations into  
6 organized crime operating within government agencies. In order to discourage, threaten and  
7 intimidate "Victim/Witnesses A", he and his peers were attacked with a \$30M+ state-sponsored  
8 reprisal attack which included the following attack tactics, operated by Fusion GPS, Black Cube,  
9 Psy-Ops type contractors and White House specialists, which caused quantifiable harms and  
10 damages for which "Victim/Witnesses A" is owed compensation:

- 11
- 12 1.) Defrauding Victim/Witnesses via fake government requests to invest in rigged government  
13 contracts, thus costing Victim/Witnesses' their life savings;
  - 14
  - 15 2.) Placing moles in, and spying inside, Victim/Witnesses's companies;
  - 16
  - 17 3.) Blockading legal counsel for Victim/Witnesses's;
  - 18
  - 19 4.) Character assassination and sophisticated contracted defamation media attacks;
  - 20
  - 21 5.) Defendants contracted off-shore "click-farm" and "troll-factory" processed social media attacks;
  - 22
  - 23 6.) Government benefits from SSA, HUD, etc, blockades and manipulations;
  - 24
  - 25 7.) Jobs and venture capital funding blacklisting;
  - 26
  - 27 8.) FOIA obfuscation for official government FOIA filings;
  - 28

- 1 9.) Arbitrary government deadline manipulation for SSA, GOVT, HUD and other applications;
- 2
- 3 10.) Creation of endless fake hurdles in agency applications (ie: GOVT) to protect rigged
- 4 "winners";
- 5
- 6 11.) Toxic workplace poisonings like the Salisbury, Nalvany, Litvinenko poisonings;
- 7
- 8 12.) Workplace sabotage and obstruction of Victim/Witnesses's companies;
- 9
- 10 13.) Contracted media defamation attacks via Gawker, Gizmodo, Jalopnik, Google, Youtube, etc.
- 11 Which have now had the payments for the attacks tracked through accounting systems
- 12
- 13 14.) Commercial employment database "Lois Lerner-ing" and red-flagging;
- 14
- 15 15.) Murders or forced deaths of peers (ie: Rajeev Motwani, Seth Rich, Gary D. Conley and 120+
- 16 others);
- 17
- 18 16.) Revenue blockades and internet income re-direction;
- 19
- 20 17.) Troll farm attack teams hired from Chinese attack farms;
- 21
- 22 18.) Fusion GPS, Media Matters, David Plouffe attack contracts issued targeting whistle-blowers;
- 23
- 24 19.) Manual search engine lock-in attacks on Google, YouTube, LinkedIn;
- 25
- 26 20.) U.S. patent office manipulation to blockade revenue;
- 27
- 28 21.) Honey-traps sent out targeting the whistle-blowers;

28

22.) Fake news tabloid empires created just for defamation attacks;

23.) Housing access and financing blockades created to reprisal harass whistle-blowers;

24.) Ongoing hacking of Victim/Witnesses's devices;

25.) Tech industry black-list coordination within the National Venture Capital Association;

26.) HUD and USDA mortgage rights blockades;

27.) DNS and IP routing manipulation to prevent Victim/Witnesses' from selling anything online;

28.) Digital attacks designed to put horrific fake news about target in front of 7.5 billion people...

and more spy agency type "dirty tricks"that cost the Victim/Witnesses' their lives, life savings, income and other disabling losses as detailed in the related support documents on the case website.

**Victim/Witnesses' have currently had their rights to legal representation and a trial blockaded by government officials who fear political embarrassment in a public trial of this case. In fact, history has proven that those officials have caused a thousand-fold increase in their own public media shame by delaying a settlement of this dispute!**

**EXHIBIT 56 – Further Details On The Demand By Victim/Plaintiffs**

**What The Government And Corrupt Defendants Need To Do To Offset The Harm**

**They Caused:**

- Victim/Victim/Witnesses' demands the provision of a state-sponsored court-provided law firm to represent victim/Victim/Witnesses' under the variances and human rights laws affording such provision of services.

- The finding that this matter includes a violation of RICO racketeering laws and Anti-trust laws by the combined organized efforts of the Defendants.

- Awarding Victim/Witnesses' compensatory including actual, consequential, and incidental damages for malicious defamatory conduct as alleged herein in an amount to be determined at trial and in excess of \$35,000,000 U.S. Dollars.

- Awarding punitive damages for Defendant's malicious defamatory conduct based on the routine and accepted calculation of 5 percent of their invested current net worth of over \$63 billion U.S. dollars. Thus, punitive damages are requested be awarded by the in an amount to exceed \$3 billion U.S. dollars, which amount of punitive damages are designed to sufficiently punish Defendant in order that its illegal conduct not reoccur.

- Awarding Victim/Witnesses' attorney's fees and costs.

- Granting any such further relief as the Court deems appropriate including preliminary and permanent injunctive relief.

- Damages in excess of \$225 million against Chu, Axelrod, Podesta, Carny, Biden, Emanuel, Gibbs, Rattner and Seward, jointly and severally, for their violations of Victim/Witnesses"s civil rights.

- A declaration pursuant to 28 U.S.C. §§ 2201 and 2202 and 5 U.S.C. § 706(2)(B) that Victim/Witnesses"s Loan Program application was wrongfully denied and injunctive relief directing Defendants to reconsider and/or approve same.

- A declaration pursuant to 28 U.S.C. §§ 2201 and 2202 and 5 U.S.C. § 706(2)(B) Victim/Witnesses"s ATVM Loan Program application was wrongfully denied and injunctive relief

1 directing Defendants to reconsider and/or approve same without respect for political considerations.

2 - A declaration pursuant to 28 U.S.C. §§ 2201 and 2202 and 5 U.S.C. § 706(2)(B) that the  
3 rejection of Victim/Witnesses"s LGP application without recourse was unlawful, and injunctive  
4 relief directing Defendants to accept and consider same without respect for political considerations.

5 - Such costs and attorney fees as Victim/Witnesses"s may be entitled to under law.

6 - Such other relief as this Court deems just.

7 - Victim/Witnesses' have sent an invoice for "*informant and witness fees*" to the GAO, FBI,  
8 FTC and SEC in the amount of \$5,000,000.00 per agency but have not had a response, relative to  
9 payment, from those agencies.

1 **EXHIBIT 57 - How Much Have Others Been Paid For The Same Damages?**

2  
3 **Reference past payment precedent examples:**

4 - Campbell worked as an informant for federal authorities investigating Vadim Mikerin, a  
5 Russian official in charge of U.S. operations for Tenex, a unit of Rosatom. Authorities later accused  
6 Mikerin of taking bribes from a shipping company in exchange for contracts to transport Russian  
7 uranium into the United States. He pleaded guilty in federal court in Maryland and was sentenced to  
8 prison for four years. The Justice Department had also initially charged Mikerin with extorting  
9 kickbacks from Campbell after hiring him as a \$50,000-a-month lobbyist. Prosecutors alleged  
10 Mikerin had demanded Campbell pay between one-third and half of that money back to him each  
11 month under threat of losing the contract and veiled warnings of violence from the Russians. The  
12 demand prompted Campbell to turn to the FBI in 2010, which gave its blessing for him to remain  
13 part of the scheme as a whistle-blower who was compensated for his efforts.

14 - The FBI has a Congressional docket which documents it's annual witness and informant  
15 ePlaintiff 42enditures for the last 20 years. Those financial on-the-record documents show the  
16 average payment for a high-ticket case RICO-type informant such as Victim/Witnesses' and are  
17 hereby placed in this case record as references of payment standards.

18 - In a similar case, Victim/Witnesses' Terry Bollea (AKA: Hulk Hogan) was awarded \$145  
19 million dollars in damages because of character assassination efforts by the same parties. The  
20 attacks on Victim/Witnesses's exceeded the resources used against Terry Bollea by many  
21 magnitudes and thus, the \$145 million dollar figure would be a minimum damages figure for each  
22 Victim/Witnesses' in our case as each Victim/Witnesses was attacked in such a manner. Each of the  
23 parties attacked by Gawker/Gizmodo (who worked for White House operatives) received at least  
24 \$170,000.00 in damages.

25 - The GOVT Paducah Gaseous Diffusion Plant under contracts with The U.S. Government  
26 and the government-owned U.S. Enrichment Corp paid \$5M whistle-blower awards to those  
27 whistle-blowers who were attacked, using government agency resources, for reporting a crime.

28 - <https://www.foxbusiness.com/markets/deutsche-bank-whistleblower-gets-200-million->

1 [bounty-tip-libor-misconduct](#)

2 - Adam Lovinger, a 12-year veteran of the Pentagon's Office of Net Assessment (ONA),  
3 filed a whistleblower reprisal complaint with the Defense Department's inspector general in May  
4 against ONA boss James Baker and received compensation for his whistle-blower efforts.

5 - A Tesla whistle-blower was awarded \$150 million.

6 - The FBI's informant in the Uranium One scandal involving the Obama administration gave  
7 written testimony to three congressional committees this week in which he accused the Obama  
8 administration of making decisions that directly benefited the Russian government and their goals  
9 of gaining geopolitical advantages over the United States. The informant, Douglas Campbell, told  
10 congressional investigators on Wednesday that Moscow sent millions of dollars to the U.S. with the  
11 ePlaintiff 42ectations that it would benefit the Clinton's, while Hillary Clinton "quarterbacked a  
12 'reset' in US-Russian relations" in her role as Secretary of State during the Obama administration,  
13 The Hill reported. The FBI found Campbell's undercover work valuable enough to reward him with  
14 a \$50,000 check in 2016.

15 - Dept. of Energy Hanford URS has agreed to settle a lawsuit brought by former employee  
16 Walter Tamosaitis for \$4.1 million. The settlement in the whistle-blower case comes almost one  
17 year before the case was set for a jury trial in federal court in Richland and compensates Tamosaitis  
18 for attacks against him, by GOVT officials, in retribution for reporting a crime.

19 - In **Civil Action No. 1:13-cv-00777-RBW**, government agencies were caught being used  
20 for attacks against citizens and punished in the court and the media! The IRS, and hordes of other  
21 government agencies have been caught and proven, IN COURT, to target and attack people for  
22 presumed political differences

23 - Some of the biggest evidence-of-loss examples are found in the financial records from  
24 General Motors, Ford Motors, Nissan and Tesla Motors executives for the time-frame from Jan. 1,  
25 2000 to today. Those records validate the income loss to Victim/Witnesses'.

26 - Over 400+ other cases decisions, settlement records and government payment precedents  
27 are on file at <http://www.pacer.gov> validating the amount that Victim/Witnesses' should be  
28 compensated via known and quantified precedents.

1 **EXHIBIT 58 - One Example Of The Corruption experience**  
2

3 A part of this case documents a state-sponsored attack on a technology manufacturer who  
4 was promised a level playing field in its applications for funds to government entities, only to be  
5 unfairly denied and financially and detrimentally attacked and harmed, in political and anti-  
6 competitive reprisal, in the process. In the course of the investigation, an organized crime Cartel  
7 was exposed in operation among Silicon Valley technology oligarchs and well-known political  
8 representatives.

9 This section, below, shows how investigative lawyers and FBI experts broke down the facts  
10 in a portion of the case:  
11

- 12 1. This case has exposed cronyism at government agencies, The White House and among U.S.  
13 Senators.
- 14 2. This case represents the Victim/Witnesses' of the crime as well as taxpayers who deserve an  
15 open, transparent, and fair government process without the current layers of bribery and  
16 stock market payola quid pro quo.
- 17 3. The government should immediately grant Declaratory and Injunctive Relief, retribution  
18 fees and other damages to Victim/Witnesses'

19 **Key Points:**

20 (a) Funding granted through, for example: the GOVT's Loan Guarantee Program  
21 (LGP ) and Advanced Technology Vehicle Manufacturing (ATVM) loan  
22 programs, and other agencies, are administered in an arbitrary and capricious  
23 manner, inconsistently favoring some and disadvantaging other "outsider" non-  
24 crony Victim/Witnesses; lacked mechanisms for Victim/Witnesses to  
25 administratively appeal its decisions; and re-reviewed rejected applications on an  
26 ad hoc and biased basis in order to protect the friends of government staff and  
27 harm their competitors.

28 (b) Victim/Witnesses' ATVM application was deliberately "set aside", hidden,

1 delayed, stone-walled and substantially “delayed consideration” by GOVT in  
2 favor of loan applications from politically-connected government cronies like  
3 Tesla and Fisker, whose top executives and investors, Steve Westly (Tesla), Tim  
4 Draper (Tesla) and John Doerr (Fisker) donated millions to Democrats and the  
5 Obama Administration in 2008.

6 (c) Many of the loan applications granted by the GOVT went to companies that failed  
7 to produce the promised results, were not innovative in technology, or ultimately  
8 declared bankruptcy (After skimming billions in stock market “pump-and-dump”  
9 profits) with the harm going to the American taxpayers (See Solyndra, Tesla and  
10 Fisker as examples); while Victim/Witnesses' was previously funded by The U.S.  
11 Government and was one of the ONLY entities that did deliver on the contract.

12 (d) Of the \$25 billion that Congress authorized the GOVT to loan, \$16 billion  
13 remains un-disbursed. Why was Victim/Witnesses' \$40 million request not  
14 granted when it could have been used to immediately create jobs?

15 (e) The GOVT violated multiple non-disclosure agreements with Victim/Witnesses'  
16 (and Victim/Witnesses') passing along patented technology to General Motors and  
17 other government cronies and that technology, only after that fact, was displayed  
18 by Ford, General Motors, Tesla and other competitors who were funded by  
19 GOVT.

20 (f) In the case of Victim/Witnesses', we see another example of the GOVT's  
21 cronyism, broken promises to American taxpayers, and misuse of executive  
22 agency influence.

23 (g) This case goes back to the year 2000, and forward, as there were crony political  
24 payments between the White House, Department of Energy, Department of State  
25 and other State and Federal government agency staff coordinated with their  
26 political campaign financier/beneficiaries from Solyndra, Tesla, Fisker, Facebook,  
27 Google, YouTube, Netflix, Linkedin, Alphabet, Kleiner Perkins, Greylock,  
28 Goldman Sachs and other PAC-aligned Silicon Valley businesses to operate a

1 RICO-law and Antitrust-law violating illicit business “Cartel” which  
2 Victim/Witnesses' were “outsiders” to.

3 **EPlaintiff 42anded Points:**

- 4 (a) The U.S. Government engaged in arbitrary and capricious methods when  
5 awarding loan guarantees through the Advanced Technology Vehicle  
6 Manufacturing (ATVM) loan program
- 7 a. The GOVT administers the ATVM loan program, in which Congress  
8 authorized GOVT to provide direct federal government loans supporting  
9 the advancement of technology vehicles
  - 10 b. Congress authorized GOVT to make \$25 billion in ATVM loans (GOVT  
11 currently has approx. \$16 billion of unused lending authority which  
12 politicians have been constantly trying to grab for themselves).
  - 13 c. At all times relevant, GOVT knew that the ATVM loans had evaporated  
14 the private markets, and that unduly delaying or denying a small,  
15 innovative technology company’s ATVM loan likely would scare away  
16 other private investors and lenders—meaning a business death sentence.
- 17 (b) Victim/Witnesses's are a small business that has demonstrated innovation, energy  
18 efficiency, and provided technology that can advance green energy efforts and  
19 create jobs in the United States. They were initially funded by a Congressional  
20 award and a Department of Energy commission.
- 21 a. In November, 2008 at the request of government officials,  
22 Victim/Witnesses' applied for an ATVM loan to build a scalable,  
23 innovative and efficient electric car. This car would have obsoleted Tesla  
24 Motors, which paid profits to ATVM bosses, staff, consultants and related  
25 Senators. The metrics ( Range, Safety, Price, Cost To Produce, Energy  
26 Efficiency, Use of Domestic Labor, Avoidance of Genocide-based Mining,  
27 etc.) of that car, and almost every other Victim/Witnesses beat Tesla by  
28 many magnitudes. Any Victim/Witnesses who might affect Tesla’s market

1 was black-listed in order to protect Senator’s and GOVT staff stock market  
2 profits. Elon Musk had been promised a 10,000% boost over any  
3 competitor, using federal resources. This was a violation of federal RICO  
4 and anti-trust laws.

- 5 b. Victim/Witnesses' design cost less than \$20,000 in base configuration,  
6 required no gasoline or extension cords to charge, was easy to repair and  
7 build, and used crash effect reduction materials.
- 8 c. All of the Victim/Witnesses' car’s key parts were built and tested or  
9 already existed in off-the-shelf components proven in the industry for over  
10 a decade.
- 11 d. Victim/Witnesses' offered GOVT asset collateral of over \$100 million to  
12 secure the ATVM loan
- 13 e. On December 2, 2008, GOVT Director of Advanced Technologies  
14 Manufacturing Loan Program Lachlan Seward wrote to Victim/Witnesses'  
15 acknowledging receipt of its application and requesting certain  
16 information, which Victim/Witnesses' then provided.
- 17 f. On December 31, 2008, Seward informed Victim/Witnesses' that its  
18 application was “substantially” complete, and that GOVT would advise  
19 Victim/Witnesses' if it needed additional information during the  
20 application review process.
- 21 g. At all times relevant, Victim/Witnesses' qualified for the ATVM loan  
22 based on GOVT’s published material (see additional docs).

23 (c) We see from the examples of Tesla and Fisker that ATVM loans were massive  
24 ePlaintiff 42enditures that produced few results.

- 25 a. Victim/Witnesses' application was “set aside” by GOVT in favor of  
26 ATVM loan applications from other companies who have not produced  
27 results, therefore wasting taxpayerdollars that were intended to create jobs  
28 and promote better technology and innovation. The other companies

1 partnered with Goldman Sachs to produce stock market manipulation  
2 profits (like Tesla did) but no consumer market-price products.

3 (d) The government stole technology from Victim/Witnesses', violating non-  
4 disclosure agreements, and handed that information to General Motors, Ford, and  
5 other companies that received GOVT funding.

- 6 a. Victim/Witnesses' had worked with GOVT on applied fuel cell research  
7 and commercialization for over a decade.
- 8 b. Victim/Witnesses' obtained a grant in 2005 through the power plant  
9 development group which it used to develop a battery 3 times more  
10 powerful than lithium batteries according to written research by Sandia  
11 National Laboratories based on their validation of Victim/Witnesses'  
12 patented technologies.
- 13 c. Victim/Witnesses' and Victim/Witnesses' signed NDAs with the GOVT  
14 and Sandia, a government contractor, which were violated and resulted in  
15 General Motors and Ford using Victim/Witnesses' technology.

16 Facts about Victim/Witnesses'

- 17
- 18 • Key Victim/Witnesses' in this portion of the investigation are a technology start-up  
19 comprised of multiple divisions including: 1.) The Auto production group and 2.) the  
20 powerplant development group. This is the same structure Tesla Motors, Ford and Nissan  
21 have., ie: Tesla sells cars to consumers and powerplants to competitor/customers.
  - 22 • In September 2008, Victim/Witnesses' became ***the very first Victim/Witnesses*** to file with  
23 the U.S. Department of Energy for a development loan under the ATVM Program and also  
24 filed applications under the Loan Guarantee Program for Innovative Energy Projects (LGP)  
25 established under Title XVII of the Energy Policy Act of 2005.
  - 26 • A loan application was also filed under the Loan Guarantee Program.
  - 27 • Victim/Witnesses' provided the following law enforcement and intelligence work  
28 credentials: 1.) A signed letter from the Executive Vice President of ASIS welcoming him as

1 a member of The American Society For Industrial Security, 2.) His Senior Membership  
2 certificate for The Society Of Manufacturing Engineers for his working building counter-  
3 measures technologies, 3.) His State Of California, Department of Consumer Affairs license  
4 and investigator certification, 4.) His American Federation of Police membership  
5 certification, 5.) His Department of Consumer Affairs State-issued investigators ID, 6.) His  
6 California Association of Licensed Investigators membership certification, 7.) His  
7 International Narcotics Enforcement Officers Officers membership certificate, 9.) His copies  
8 of letters from The White House to him, personally, on White House stationary, 10.) His  
9 letters from the Federal Office Of Personnel Management showing ranking in the top  
10 percentile on the West Coast under Homeland Security as 1811-C Criminal Investigator  
11 testing by OPM. 11.) Press clippings from famous cases he worked on. These letters and  
12 documents date back to the 1980's and show that Victim/Witnesses' had participation in, and  
13 interacted with, other senior law and IC staff who would have been capable of supplying  
14 and/or supporting the high-level of charges and validations listed in this document.

- 15 • Victim/Witnesses' filed 3 loan applications in total, back then. One under Victim/Witnesses'  
16 Vehicles in the ATVM Program. One under Victim/Witnesses' in the Loan Guarantee  
17 Program. Another under Victim/Witnesses' in the ATVM program.
- 18 • Victim/Witnesses' application ranked by outside comparison as one of the top company  
19 Victim/Witnesses", was a Forbes top rated company, had top national reviews and press,  
20 top issued patents, top staff references, industry leading staff and vast other positive metrics.
- 21 • Victim/Witnesses' had received funding from GOVT via it's Victim/Witnesses' powerplant  
22 group before and successfully completed a contract with GOVT via it's vehicle power plant  
23 division. GOVT staff told Victim/Witnesses' that oil companies wanted fuel cell's  
24 minimized in GOVT efforts because they competed with oil company interests too  
25 effectively.
- 26 • Victim/Witnesses' had received funding from GOVT before and successfully completed a  
27 contract with GOVT via it's vehicle power plant division.
- 28 • The Victim/Witnesses' Vehicles car goes an almost unlimited range via hot-swap fuel

27  
28

cartridges, costs less than \$20,000 in base configuration, uses no gasoline, is easy to repair and build, saves lives better than any other car by using “damp down” crash effect reduction materials like those used in the bumper, dashboard and body of the Prius, is faster than competing solutions, can be recharged as fast as one can pull out an empty fuel cassette and slide in a charged fuel cassette: often in 50% less time than it takes to refill a gasoline vehicle, does not require an extension cord because people living in apartments generally cannot use extension cords, uses electricity and creates green jobs. NO factory needs to be built because Victim/Witnesses' was retasking already existing factories and at very low cost. All of the key parts of the car were built and tested or already existed in off-the-shelf components proven in industry for over a decade. Autodesk and other engineering software allowed for full virtual prototyping and operational testing of the design. The company already has thousands of customers lined up who want to buy their unique and very “green” car. The company hand delivered letters from those customers to the GOVT ATVM office in Washington DC in 2008. The company currently had no significant debt and the company leaders had been contributing their time and resources for many years based on positive feedback received repeatedly by Department of Energy (GOVT) loan reviewers and staff. The company won a semi-finalist position in the prestigious “Forbes: America’s Most Promising Companies” contest.

- Certainly company officials were not claiming that their vehicles will solve all of the world’s energy problems. However with each car that is sold, we will help reduce domestic reliance on imported fuel and reduce environmental C02 by putting a vehicle on the road that uses absolutely no gasoline and creates American Jobs. This vehicle is truly using “advanced technology” via clever configuration of standard off the shelf components available today. – a major goal of this loan program and a key stated goal of the Administration. In addition, with a company that has no current debt, several patents, and thousands of interested customers; the company asserts that GOVT’s financial risk in investing in the technology would be extremely low, and the failures of competitors, as predicted by Victim/Witnesses' staff, who already received funding from the same program

1 validates this assertion. Victim/Witnesses's had the best debt ratio of any Victim/Witnesses,  
2 especially Tesla. Tesla was “cooking the books” with Detroit and Middle East cover cash to  
3 make it temporarily not look as nearly bankrupt as it was.

4 **Facts about GOVT Loans**

- 5 • The Department of Energy’s (GOVT) Loan Programs Office (LPO) administers three  
6 separate programs: the ATVM Loan Program and the Title XVII Section 1703 and Section  
7 1705 loan guarantee programs. The ATVM Loan Program was established by Section 136  
8 of the Energy Independence and Security Act of 2007, and provides direct loans to support  
9 the manufacturing of advanced technology vehicles and qualifying components in the  
10 United States.
- 11 • The Program provides loans to automobile and automobile parts manufacturers for the cost  
12 of reequipping, expanding, or establishing manufacturing facilities in the United States to  
13 produce advanced technology vehicles or qualified components, and for associated  
14 engineering integration costs.
- 15 • In 2010, Section 136 was amended to include ultra-efficient vehicles within the definition of  
16 advanced technology vehicles.
- 17 • The FY 2009 Continuing Resolution (CR), which was enacted on September 30, 2008,  
18 appropriated \$7.5 billion in credit subsidy to support up to \$25 billion in loans under the  
19 ATVM Loan program.
- 20 • The FY 2009 CR also provided GOVT with \$10 million to administer the Program.
- 21 • On November 5, 2008, GOVT issued the Interim Final Rule for the Program.
- 22 • GOVT accomplished this effort in approximately half of the 60-day time-frame  
23 mandated by Congress.
- 24 • The program began receiving applications on December 2, 2008. Victim/Witnesses'  
25 application was the first one because Victim/Witnesses' had been informed they should  
26 apply via Barbara Boxer’s, Jackie Spier’s and Nancy Pelosi’s staff
- 27 • The ATVM Program has received numerous applications from both automobile original  
28 equipment manufacturers (OEMs) and component manufacturers. Most of them have written

complaints similar to Victim/Witnesses', about GOVT. (See the Eco-Motors, Zap, Bright Automotive, Carbon Motors, etc. Complaint documents about GOVT cronyism and lies)

- The GOVT’s Advanced Technology Vehicles Manufacturing (ATVM) Loan Program is a direct loan program created by Congress to provide funding to automobile manufacturers and component suppliers to stimulate the development of new fuel efficient technology, thereby promoting U.S. energy independence by reducing the demand for foreign oil.
- ATVM is authorized under Energy Independence Security Act of 2007
- The Secretary of the GOVT established the Advanced Technology Vehicle Loan Program pursuant to Section 136(e) of the Energy Independence and Security Act of 2007, Public Law 110-140, 42 U.S.C. § 17013
- Section 129(a) of the Consolidated Security, Disaster Assistance, and Continuing Appropriations Act of 2009, Public Law 110-329, appropriated \$7.5 million to the “Advanced Technology Vehicles Manufacturing Loan Program Account.” Section 136(d) of the 2007 Energy Independence and Security Act authorizes the Secretary to provide no more than \$25 billion in direct loans to individuals and entities determined by the Secretary to be eligible for the program. See 42 U.S.C. § 17013(d)(1).
- GOVT promulgated an interim final rule on November 12, 2008, which was published at 73 F.R. 66,721 to 66,737. Comments were accepted until December 12, 2008. The Final Rule was codified at 10 CFR Part 611 (2009).
- GOVT reviews applications for the loan program in tranches, with the deadline for the first tranche initially falling on December 31, 2008 and the deadline for subsequent tranches falling at the end of every subsequent quarter, until so long as the available funds and loan authority permit. 73 F.R. 66,721.
- Loans are available under the ATVM Loan Program to two classes of Victim/Witnesses eligible for loans under the program: automobile manufacturers and component manufacturers. See 10 CFR Part 611.100. Eligibility criteria for automobile manufacturers that did not manufacture a vehicle in 2005 are described at 10 CFR 611.100(b)(2). In brief, the Victim/Witnesses must demonstrate that its vehicle’s projected combined fuel economy

is “greater than or equal to the industry adjusted average fuel economy for model year 2005 of equivalent vehicles.” Id. In contrast, component manufacturers need not demonstrate improved fuel economy. 10 CFR 611.100(b)(3).

- Regardless of their classification, Victim/Witnessess must be financially viable without the additional funding provided by the ATVM Loan Program in order to be eligible. 10 CFR 611.100(a)(2). The Secretary is authorized to consider a number of factors to determine financial viability, including:
  - o The Victim/Witnesses’s debt to equity ratio;
  - o The Victim/Witnesses’s earnings before interest, taxes, depreciation, and amortization (EBITDA) for the most recent fiscal year prior to the date of the loan application;
  - o The Victim/Witnesses’s debt to EBITDA ratio;
  - o The Victim/Witnesses’ s fixed charge coverage ratio (EBITDA plus fixed charges divided by fixed charges plus interest expenses);
  - o The Victim/Witnesses’s interest coverage ratio (EBITDA plus fixed charges divided by fixed charges plus interest expenses);
  - o The Victim/Witnesses’s liquidity;
  - o Statements from the Victim/Witnesses’s lenders that the Victim/Witnesses is current; and
  - o Financial projections demonstrating the Victim/Witnesses’s solvency through the life of the loan.
- LGP program authorized under the 2005 Energy Policy and Conservation Act.

Facts about Victim/Witnesses' Government Applications

ATVM

- On or around November 10, 2008 Victim/Witnesses' Vehicles applied to the GOVT ATVM program. Elon Musk had already warned Department of Energy officials to “not fund any of

his competitors or Obama will never finish his first term...”

- On December 2, 2008, Lachlan Seward wrote to Victim/Witnesses' requested further information on Victim/Witnesses' ability to comply with general, financial, technical, and environmental requirements.
- On December 6, 2008, Victim/Witnesses' submitted additional clarification to the GOVT.
- On December 17, 2008, Victim/Witnesses' had a telephone conversation with Matthew McMillen and Walter Eccard of the GOVT.
- On December 23, 2008, Victim/Witnesses' wrote to Messrs.' McMillen and Eccard providing additional information concerning the asset valuation of its patents as well as an updated NEPA review statement.
- On December 29, 2008 Victim/Witnesses' had a telephone conference with Matthew C. McMillen concerning National Environmental Policy Act (NEPA) compliance under § 136 of 10 C.F.R. 611.106. Victim/Witnesses' Vehicles requested \$40,000,000 through the ATVM Loan Program based on advice from Congressional officials that that amount was “all that would be left in the fund after Detroit got their allocation.”.
- The application fees for the Loan Gaurantee program cost between \$20,000 and \$100,000. The “fees” for the ATVM program were called a “Co-participation fee.” In other words, Victim/Witnesses' would have to provide 15-20 % of the loan amount to GOVT up front. If Victim/Witnesses' were approved, Victim/Witnesses' would have to pay another \$15 - \$20 m. or provide in-kind value, and no cash, as the team did in the past
- Victim/Witnesses' met with venture capitalists in order to get fee money. One in particular was a real estate developer in Detroit named Patrick Jett.
- Victim/Witnesses' also hired Covington and Burling in San Francisco and Washington DC as well as other firms in D.C. in order to get help to watch-dog the application.
- Andrew Beato of Stein Mitchell was one lawyer to Victim/Witnesses' in ATVM applications.
- On December 2, 2008, Lachlan Seward, the Director, Advanced Technology Vehicles Manufacturing Loan Program, wrote to the Victim/Witnesses', determining that the

submitted application was not substantially complete.

- On or before December 31, 2008, Victim/Witnesses' submitted materials relating to the requirements set forth in Section 611.100 of the Interim Final Rule of the Energy Independence and Security Act.
- On December 31, 2008, Lachlan Seward wrote to the Victim/Witnesses' informing Victim/Witnesses' that it was “substantially complete”.
- At this time other Victim/Witnessess began contacting Victim/Witnesses', who had been on network newscasts, asking if “it seemed like GOVT might be rigging the process for favorite friends...”
- The December 31, 2008 letter stated that the GOVT will advise Victim/Witnesses' if it needs additional information as it continued the application review process.
- Victim/Witnesses' alleges that on or after December 31, 2008, Lachlan Seward and Brent Peterson began processing the loan materials to secure Victim/Witnesses' funds in January 2009.
- Victim/Witnesses' alleges that loan processing was unreasonably terminated due to untoward action by the U.S. Department of Energy, including but not limited to John Doerr, who was appointed as a member of the USA Economic Recovery Advisory Board by President Barack Obama and was a lead investor in GOVT application winners; and other members of the “Silicon Valley Cartel” who had quid pro quo deals with the White House.
- At this point, Google had become one of the primary suppliers of staff to the White House and was directing many government decisions. Google was, at that time, in violation of Victim/Witnesses's patents and was a silent partner in Tesla Motors. Google ordered White House staff to fund, or not fund certain projects and Google was considered to be the most powerful member of “The Silicon Valley Cartel”. Had had manipulated most of the internet to put Obama in office. Google’s bosses were at the Obama Campaign HQ on the night of his election win, coordinating internet manipulations. The article “*The Android Administration*” in The Intercept, discussed that aspect of the corruption in great detail.
- On February 1, 2009, Victim/Witnesses' submitted its application for a ATVM Loan under

the Department of Energy’s Advanced Technology Vehicles Manufacturing Incentive Program. DO

- On April 10, 2009, Lachlan Seward wrote to Victim/Witnesses' advising that, as a matter of law, Victim/Witnesses' proposed project could not be funded under the Program.
- On April 11, 2009, Victim/Witnesses' contested the April 10 denial.
- On May 13, 2009, The U.S. Government stated that the April 11, 2009 letter “has not changed our determination that your proposed project can not, as a matter of law, be funded under the Advanced Technology Vehicles Manufacturing Incentive Program (Program).”
- On April 23, 2009, Jason Gerbsman of the ATVM Loan Program at the U.S. Department of Energy notified Victim/Witnesses' that
  - Victim/Witnesses' has submitted a substantially complete application and has been assigned to both a technical eligibility and merit review team, as well as a financial viability analysis team. The technical team is very close to finishing their evaluations on both eligibility and project merit, and the financial team will be launching a more detailed and interactive due diligence phase of the Victim/Witnesses' application review very soon. Following the technical and financial evaluation under the second stage of the process, we will move into the underwriting phase where our goal is to negotiate a conditional commitment, including a detailed term sheet. This will be followed by the fourth phase of the loan process where the final details will be negotiated and the loan will be closed.
- On May 26, 2009, Jason Gerbsman of the ATVM Loan Program at the U.S. Department of Energy wrote to Victim/Witnesses' requesting the opportunity to meet, in-person, concerning the ATVM Loan Application process, including “Victim/Witnesses' next steps.”
- On June 2, 2009, after Victim/Witnesses' had written to Jason Gerbsman of the ATVM Loan Program at the U.S. Department of Energy, stating that Victim/Witnesses' “is entering financial viability phase” of its ATVM application, Mr. Gerbsman responded to Victim/Witnesses' stating “I look forward to continuing the process with Victim/Witnesses'.”

- 1 • Between June 22, 2009 and July 19, 2009, Brent Peterson of TMS, Inc, a contractor with the  
2 ATVMIP at the U.S. Department of Energy, and Victim/Witnesses' discussed details of the  
3 Victim/Witnesses' loan application.
- 4 • At no point during this time period did the GOVT communicate that Victim/Witnesses' was  
5 disqualified or ineligible. In fact, all members of GOVT, Congress and other government  
6 offices had said they were “certain” Victim/Witnesses' was about to be funded. All of the  
7 national news stories indicated approval and the massive out-pouring of consumer support  
8 indicated approval.
- 9 • On June 15, 2009, Victim/Witnesses' informed Mr. Peterson that it was a semi-finalist in the  
10 Forbes America’s Most Promising Companies List for 2009.
- 11 • At or around June 15, 2009, Mr. Peterson responded to Victim/Witnesses' June 15, 2009 e-  
12 mail with, “Congrats, thanks for sharing.”
- 13 • On June 29, 2009, Victim/Witnesses' wrote to Jason Gerbsman stating Victim/Witnesses'  
14 applied for ATVM Loan funding in the beginning of November of 2008 (hereinafter “June  
15 29, 2009 Gerbsman Correspondence”).
- 16 • In the June 29, 2009 Gerbsman Correspondence, Victim/Witnesses' alleged it was advised, at the  
17 time by Senate staff, that the funds were to be released by the end of December 2008.
- 18 • In the June 29, 2009 Gerbsman Correspondence, Victim/Witnesses' alleged it had a significant  
19 challenge in waiting such a vast number of months for a simple loan review that was  
20 substantially longer than the commercially reasonable time period exercised by banking  
21 institutions.
- 22 • Due to the U.S. GOVT’s delay, Victim/Witnesses' needed to delay paying staff and had to use  
23 Victim/Witnesses's personal and family savings.
- 24 • In the June 29, 2009 Gerbsman Correspondence, Victim/Witnesses' alleged that when a smaller  
25 car company applies for ATVM funding, it reduces the ability of the company to get other  
26 funding because other financing entities are aware that they cannot compete with ATVM  
27 terms so they forestall decisions until AFTER GOVT terms sheets are issued. GOVT  
28 withheld termsheets in order to cut off all funding options for competitors to the “WINNERS”.

- 1 • In the June 29, 2009 Gerbsman Correspondence, Victim/Witnesses' alleged all other financing  
2 options are awaiting the GOVT conditional approval letter.
- 3 • In the June 29, 2009 Gerbsman Correspondence, Victim/Witnesses' alleged applying for an  
4 ATVM loan halts funding options for a smaller car company.
- 5 • In the June 29, 2009 Gerbsman Correspondence, Victim/Witnesses' alleged it appeared  
6 unreasonable that a Japanese car manufacturer (Nissan) was awarded funding, especially in  
7 the first round of loan awards, and smaller companies, who need the funding more, were  
8 bypassed.
  - 9 ○ In the June 29, 2009 Gerbsman Correspondence, Victim/Witnesses' alleged that a core  
10 objective of Section 136 of the Energy Independence and Security Act of 2005 was  
11 to put American car manufacturers back in the lead in the green car race, not fund  
12 international competitors as a priority.
- 13 • In the June 29, 2009 Gerbsman Correspondence, Victim/Witnesses' alleged it was informed by  
14 the press that other companies who applied later in the process were moved ahead of  
15 Victim/Witnesses' in the review process because of greater lobby effort ePlaintiff  
16 42enditures.
- 17 • In the June 29, 2009 Gerbsman Correspondence, Victim/Witnesses' alleged it was operating at a  
18 disadvantage because it simply didn't hire lobbyists or pay any bribes.
- 19 • In the June 29, 2009 Gerbsman Correspondence, Victim/Witnesses' alleged it had been on time,  
20 and ahead of time, in its responses.
- 21 • In the June 29, 2009 Gerbsman Correspondence, Victim/Witnesses' alleged its application was  
22 one of the first deemed, "substantially complete".
- 23 • In the June 29, 2009 Gerbsman Correspondence, Victim/Witnesses' alleged its technology,  
24 price, BOM, TCO and ROI is clearly superior to the other Victim/Witnessess.
- 25 • Victim/Witnesses' forwarding its June 29, 2009 Gerbsman Correspondence, stating "This is  
26 good and to the point which is maybe what they need right now."
- 27 • All government, media and expert sources were telling Victim/Witnesses', Bright  
28 Automotive, and Eco-Motors that they were about to receive their GOVT funding "any day

now”.

- On, or about, early August of 2009, White House staff ordered Secretary of Energy Steven Chu not to fund Victim/Witnesses', Bright Automotive, and Eco-Motors because they could put Tesla Motors, The White House financier, out of business if they moved forward.
- On August 21, 2009, Lachlan W. Seward, Director, Advanced Technology Vehicles Manufacturing Incentive Program, wrote to Victim/Witnesses' informing Victim/Witnesses' that its ATVMIP application for a loan was rejected.
- Victim/Witnesses' claims Victim/Witnesses' Technology passed the tests for financial viability in its applications from 2008-2009.
- Victim/Witnesses' has patents and lists of assets. Tesla, by comparison, had 4,000 % higher debt than Victim/Witnesses' and Tesla was awarded loans by GOVT, while Victim/Witnesses' was not.
- Additionally, the NEPA for Victim/Witnesses' Vehicles had been reviewed, edited and approved by GOVT National Environmental Protection Act (NEPA) staff (Matthew McMillen) at the beginning of 2009
- Victim/Witnesses' alleges that it did not pay for a NEPA analysis. Matthew McMillen at GOVT both offered to help and did help Victim/Witnesses' with drafting its NEPA review material. He edited their drafts and did Victim/Witnesses' NEPA analysis. To see his edits, look in Drop-box file titled “Properties” under file named “McMillen edits.” There are documents with the ‘track changes’ function showing his assistance with the NEPA review documents Victim/Witnesses' had to provide GOVT.
- On September 21, 2009, Victim/Witnesses' wrote to Secretary Steven Chu of the U.S. Department of Energy inquiring about the circumstances for Victim/Witnesses' non-selection for negotiation of a loan with a lengthy list of issues that investigators had uncovered which indicated corruption and cronyism.
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged no reasons were given for its rejection under the Advanced Technology Vehicles Manufacturing (ATVM) Program.
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged it was able to receive

reasons for its rejection orally, only after several attempts at phoning the ATVM office.

- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged it has still not received the reasons in writing.
- Victim/Witnesses' alleges “After multiple demands reasons were finally given by phone call and letter but the reasons appeared to have nothing to do with our company and serves to demonstrate that review data was manipulated.”
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged the reasons for its rejection were not applicable to its loan application and did not reflect what was included in its submission.
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that after several more attempts at receiving more clarification from the ATVM office, no one has been in further contact with it.
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged it has not been able to find out whether there will be another round of loans granted and how it can alter its loan application to increase its chances of success.
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that one of the reasons given for its rejection was that Victim/Witnesses' car does not use E85.
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged its car uses no gasoline.
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged another reason provided by the GOVT for its rejection was that it was not making millions of cars.
  - Victim/Witnesses' alleged its marketing plan did not support that production volume nor did its requested funding levels but that Victim/Witnesses' was fully capable and able of producing millions of cars on scale up to market demand, request of GOVT or at any reasonable time in manufacturing flow.
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that GOVT stated that Victim/Witnesses' was not planning to sell cars to the government.
  - Victim/Witnesses' alleges this is false and that its application clearly stated that the

1 core sales plan of the company is based on government fleet sales.

- 2 • In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that GOVT asserted its  
3 factory cost estimates were too low because the metal body fabrication systems were not  
4 calculated high enough.
- 5 ○ Victim/Witnesses' alleges its vehicles use no metal fabrication in their bodies.
- 6 • In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted questions  
7 to the GOVT ATVM staff the day after it received the rejection and had still not received  
8 any response.
- 9 ○ These questions include: (1) GOVT reviewers never even talked to the founder,  
10 inventor, engineers, project leads or primary contractors. Victim/Witnesses' was told  
11 over and over again that everything in its application was good and that no additional  
12 information was needed. This is despite the fact that the reasons given for its  
13 rejection did not reflect the technology being used and therefore the ATVM  
14 reviewers did not understand Victim/Witnesses' concept and product.  
15 Victim/Witnesses' wrote, "Why was no one at Victim/Witnesses' Vehicles  
16 contacted?"; (2) After nearly a year of waiting, accompanied by writing, verbal and  
17 in-person proclamations that "everything was fine", "everything is on-track", "you  
18 appear to meet every criteria", etc. and after staff ePlaintiff 42 ended the majority of  
19 their personal funds based on these positive assertions, the application was suddenly  
20 and mysteriously rejected. Victim/Witnesses' wrote, "Why was staff at GOVT during  
21 the course of the year, positive about the outcome and never asked for additional  
22 information?"; (3) At the start of the application process Victim/Witnesses' was told  
23 that the review would be very interactive but there was almost no interaction with us  
24 while larger players, who applied later, were reviewed earlier, had extensive  
25 interaction and have already been awarded their funds. Victim/Witnesses' wrote,  
26 "Why was the interactivity process never used with us?"; (4) Rejection comments  
27 supplied by Chris Foster of GOVT and third party press seem to be unrelated to the  
28 business of the company and have no foundation in fact. Victim/Witnesses' wrote,

1 “Why is that?”; (5) One of the main reasons the GOVT gave for the rejection was the  
2 fact that Victim/Witnesses' vehicles do not use E85 gasoline. Victim/Witnesses'  
3 wrote, “If that was true, why did Tesla & Nissan get approved funding? Their  
4 vehicles also do not use E85.”; (6) While it is true that Victim/Witnesses' did not  
5 wish to use carcinogenic gasoline, at no point was E85 gasoline ever mentioned,  
6 discussed, commented on or requested. In fact the topic was particularly avoided by  
7 GOVT staff. Victim/Witnesses' wrote, “Why not?”; (7) Another rejection point was  
8 that Victim/Witnesses' was not planning to make enough cars. Victim/Witnesses'  
9 claims this is false. The company would like to build and sell more cars than any  
10 other car company. Victim/Witnesses' is fully willing to produce millions of vehicles  
11 if provided with the appropriate funding as it has quantified millions of fleet buyers  
12 for its vehicles. No GOVT entity ever asked Victim/Witnesses' to adjust, discuss or  
13 amend its numbers and Victim/Witnesses' was more than willing to adjust those  
14 numbers if anyone had even bothered to ask. Victim/Witnesses' wrote, “What is the  
15 validity of this comment by the reviewers based on?”; (8) Victim/Witnesses'  
16 provided more than \$100 million of asset collateral opportunity for a \$40 million  
17 loan request. This constitutes over twice the collateral of the value of the loan.  
18 Victim/Witnesses' wrote, “How is this not as secure of a structure as any of the other  
19 Victim/Witnessess?”; (9) Victim/Witnesses' was told that it was rejected because it  
20 was not planning to sell cars to the government. Victim/Witnesses' claims this is  
21 false. The core sales plan of the company is based on government and commercial  
22 fleet sales. Victim/Witnesses' wrote, “Why did your reviewers say this? Why did you  
23 think this?”; (10) Victim/Witnesses' was told that electric motors and batteries were  
24 considered by the reviewers to be too futuristic of a technology and not developed  
25 for commercial use even though they have been in use in over 40 industries for over  
26 20 years, including by NASA. Victim/Witnesses' wrote, “What is the rationale for  
27 this argument?”; (11) Almost every other part of the Victim/Witnesses' car was to be  
28 purchased from existing commercial sources with multiple points of supply, so it is

1 not possible to see how a reviewer might think the vehicle had any significant  
2 technical acquisition hurdles. Victim/Witnesses' wrote, "Why does GOVT assume  
3 that the following companies with whom we would be contracting could not perform  
4 the following responsibilities: (a). Deloitte & Touche to provide auditing and  
5 reporting of financial data. (b). Autodesk or Microsoft to deliver the process and  
6 design software. (c). NEC, Intel or the other leading electronics companies in the  
7 world to build our controllers. (d). Roush Automotive, one of the most successful  
8 automobile electronics groups in the world, to build the electronic module. (e). US  
9 National Lab system to solder a box together. (f). Over 100 other major supplier  
10 companies that have been building parts for the auto, aerospace and industry for  
11 decades to deliver the component parts for our vehicles."; (12) The primary purpose  
12 of this loan program, Victim/Witnesses' was told by its authors, was to develop  
13 advanced technology and further reduce American dependence on gasoline. The  
14 Victim/Witnesses' Vehicles car uses no gasoline and gets over 125 miles per battery  
15 charge. Victim/Witnesses' wrote, "How is this not a direct conflict with the precepts  
16 of the Section 136 law?"; (13) Victim/Witnesses' was also told that its factory cost  
17 was too low because the metal body fabrication systems were not calculated high  
18 enough but the reviewers apparently did not even pay attention to the fact that  
19 Victim/Witnesses' uses no metal fabrication in its body. Victim/Witnesses' wrote,  
20 "What was the rationale in making such an erroneous comment?"; (14) Reviewers  
21 also stated that the car was a "hydrogen car" which it is not. It is an electric car.  
22 Victim/Witnesses' wrote, "Why did they say that?"; (15) Victim/Witnesses' wrote,  
23 "In what ways were the following documents actually reviewed? Your office stated  
24 that they 'lost our documents' twice. Why?";

- 25 • Victim/Witnesses' alleges that applications that have already been approved, have had less  
26 plans or hard development data. These awardees also had the same three-year timeframe in  
27 their proposals, and one even went into 2013. We also find this contrary to the  
28 Administration's stated goal about electric vehicles. According to a GOVT spokesman, the

28

Administration “shares the goal of ensuring that the program (ATVM) is flexible enough to account for the full range of available technologies.” In fact, when Tesla Motors received it’s GOVT cash it had no car design, just some pretty pictures. Nothing in the Tesla car in the showrooms was in a factory engineering drawing at the time Tesla got its GOVT funds. Tesla designed the entire car FROM SCRATCH, after it got the GOVT money. Anybody could have done that with 50% less money than Tesla spent doing it after the fact.

- Victim/Witnesses' alleges that the claim that the project’s impact on fuel economy of the US Light Duty Fleet over time was weak was never discussed with Victim/Witnesses's team at any point of the process. However, it is surprising to how a vehicle that is lighter than any other Victim/Witnesses by half, safer than any other Victim/Witnesses by many times and beats the metrics of every other Victim/Witnessess could not have exceeded every Victim/Witnesses on any comparison to Light Duty fleet metrics, a market that was core to Victim/Witnesses' business plan. Their fleet sales were targeted directly at the Light Duty fleet and the Pentagon so the GOVT excuse seems to be a lie by GOVT staff.
- The third reason cited in the letter was about the use of “advanced fuels.” First of all, at no point did anyone from GOVT ask about or discuss with Victim/Witnesses' technical staff their fuel plans. The letter further goes on to say that their use of hydrogen was one of the reasons that their application was being rejected. Even though GOVT knew that BMW, Toyota, Honda and Hyundai were in factory preparation with hydrogen fuel cell cars which are as common today as any other car. Hydrogen was non-essential to Victim/Witnesses' vehicle. The hydrogen tank was, rather, an optional and stand-by range-extender system for the electric vehicles. Further everyone of expertise fails to see how GOVT could state that hydrogen is an “impractical and unproven energy source” in light of the fact that Honda and BMW are already shipping cars using that fuel source and large numbers of main stream auto companies have announced production launch plans for 100% hydrogen fuel cell vehicles. To must reiterate: hydrogen was not an essential component of their vehicles and had GOVT asked Victim/Witnesses' about this fuel source, it ccould have explained that to them. It should be noted that most of the Obama and GOVT staff had invested their money

in lithium ion battery mining in Afghanistan and lithium battery production. Thus they had a conflict-of-interest reason to harm fuel cell vehicle production.

- Corrupt rare earth mineral mines were a large part of the scam.

The men who controlled the White House and The U.S. Government at this time are known as “The Silicon Valley Cartel”, AKA “The Paypal Mafia”, AKA “The Deep State”. They run Google, Facebook, Tesla and venture capital funds.

The entities involved as perpetrators in this case have violated a number of laws and ethical standards including: **The Mail Fraud Act** (1872); **The Tillman Act** (1907); **The Hatch Act** (1939); **The Hobbs Act** (1946); **The Taft- Hartley Act** (1947); RICO and Anti-trust laws; **The Federal Election Campaign Act** (1974); **The Federal Program Bribery Statute** (1984); **The Bipartisan Campaign Reform Act** (2002); and many other laws. They all use the same corrupt army of dirty lawyers, corrupt CPA’s, unethical lobbyists, character assassination services and covert ex-CIA operatives.

- Finally, the letter states that the Victim/Witnesses' Vehicles petroleum use reductions were unrealistic. The whole world is most confused about this point as Victim/Witnesses' car uses absolutely no gasoline. How could their reductions be “unrealistic”? Was that not a goal of the Obama Administration? ..or were GOVT staff just a bunch of “lying, deceitful, conniving, manipulative skills that will do anything to protect their friends and harm their competitors..” as other Victim/Witnesses’s stated.
- The company hired famous senior systems engineer to validate the final vehicle numbers submitted in the base response and provided numbers in support of that data produced by Sandia National Laboratories.
  - How could those entities have provided numbers which the ATVM office could have interpreted so negatively for a vehicle which weighs less, goes farther and requires less energy storage than any other submitted vehicle in the entire set of Victim/Witnessess to date?
  - How could the ATVM reviewers never even submit a question to the Victim/Witnesses' technical team about any of these metrics?
- In summation, these clarifying reasons for rejecting the Victim/Witnesses' Vehicles ATVM loan application are still confusing, not applicable in many cases and unwarranted when considering those applications that have been approved. The listed points appear to have no foundation in facts relative to our design and we again question why there was no

26  
27  
28

communication from GOVT with the developers of the vehicle over a year. Clearly, GOVT was running a “Slush-Fund” designed to ONLY pay political campaign financiers and shut down those financiers competitors.

- Further, Congressional investigators found that competing larger companies like Tesla were given much counseling, guidance, feedback and opportunity to “tweak” their applications by GOVT. These companies submitted their applications later than Victim/Witnesses' and were awarded funding. Our question is then why did Tesla lover Carol Battershell, GOVT Senior Advisor state during the December 1, 2008 Public Meeting that “And that might lead one to believe that applying earlier is better than apply later.” When the program was first announced, that indeed was the guidance given – first come, first served – so scores of smaller, electric car companies and suppliers submitted their applications. Yet the rules were changed mid-way through the process to allow larger automotive companies who did not submit their applications first to send them in and now they are being funded.
- Finally, Victim/Witnesses' were very disappointed to read in the September 23, 2009 issue of E&E News that Secretary Chu had suggested in June that the Administration was hoping that GM and Chrysler would be able to participate in the (ATVM) loan program. “There is money there, I wouldn’t say set aside, but let’s just say we are trying to stretch those dollars as far as we can.” This forces us to ask whether these funds are being set aside at the expense and loss of smaller, more advanced technology electric car companies and suppliers who are requesting billions less in guaranteed loans and who are offering more forward-thinking and advanced projects to help us move away from our dependence on oil.
- Tesla, Fisker & Nissan did not provide as much collateral offerings in their application, at the same time as Victim/Witnesses' application, and to date, may not have ever provided such collateral offers.
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT detailed, comprehensive 10-year, person-by-person financials that cost the company almost \$200,000.00 to prepare and that other companies spent more than \$200,000.00 to prepare;
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT

- metrics that demonstrated that the Victim/Witnesses' car can save millions of lives per year and that it was safer than any vehicle;
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT metrics that demonstrate that a gasoline/hybrid vehicle is dangerously carcinogenic when filled at a gas station compared to an Victim/Witnesses' Vehicle; World Health Organization and leading medical and university studies have substantiated these facts.
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT engineering and IP metrics that beat every competitor on price, range, safety, TOC, efficiency, toxic safety and hundreds of other points;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT examples of work from \$3M of cash and person-hours previously invested by founders, GOVT & partners;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT lists of top auto and aerospace corporate partners, staff and resources, on stand-by, equaling thousands of people in all groups combined;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT validation of a deep team of core staff that have been developing the project and parts of the project for 3-15 years part time;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT samples of extensive international positive press coverage;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT proof of a market opening timed with tax and national imperative incentives that created a dramatic window for success;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT proof that Victim/Witnesses' was the lowest overhead car company in the market which equates to the best chance to profit and return funds;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT samples of an in-house created online process management architecture; market and

- marketing studies; CAD designs, engineering plans and manufacturing plans; a detailed website; a detailed path to \$1.5B within 5 years or less from a less than \$100M investment;
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT examples of dozens of prototypes as seen in the photographs on the BUILDS page of its website;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT numerous patents;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT a large pending portfolio with third party valuation and validation reports valuing IP at over \$100M;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT information concerning senior scientists, chemists and engineers from top university and federal laboratories, including staff that has built and delivered millions of vehicles to the consumer market;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT information concerning its partners: Federal, University, Fortune 500, Private Research Organizations;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT written Customer inquiries from a massive national customer base of qualified retail leads and 1.2M of commercial unit opportunities equaling a \$1.5B+ opportunity.
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT contracts: Federal Contract fully executed and MOU's executed;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT Awards/Commendations: Congress, DARPA;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT Research Data: Over 200+ technical research documents & 15+ years of research;
  - In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT evidence of over 22,000+ man hours of development;

- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT market data;
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT over 100+ documents of industry study;
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT issued trademarks;
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT information concerning its facilities;
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it provided to GOVT unique access to Federal Labs & leased facility options;
- In the September 21, 2009 Chu Letter, Victim/Witnesses' alleged that it submitted to GOVT other supporting materials.
- In the September 21, 2009 Chu Letter, Victim/Witnesses' asked for the opportunity to speak with Secretary Chu in person to discuss its technology and how it can help our country.
- Victim/Witnesses' wrote, "I believe there was some confusion about our application and vehicle technology that I would very much like to clear up with you in person."
- § 611.103 sets forth the evaluation criteria for ATVM loan Victim/Witnessess, outlining the technical merit of the proposed advanced technology vehicles or qualifying components, with greater weight given for factors including, but not limited to: Improved vehicle fuel economy above that required for an advanced technology vehicle; Potential contributions to improved fuel economy of the U.S. light-duty vehicle fleet; Likely reductions in petroleum use by the U.S. light-duty fleet; and Promotion of use of advanced fuel (e.g., E85, ultra-low sulfur diesel).
- Victim/Witnesses' alleges that Victim/Witnesses' data-sets beat the other Victim/Witnessess on metrics, performance and value.
- Victim/Witnesses' alleges ATVM loan approvals lacked appropriate criteria. This is confirmed by multiple GAO reports about corruption and failure to comply AGAINST GOVT by the GAO.

- 1 • Victim/Witnesses' alleges applications offered more collateral than any other  
2 Victim/Witnesses or “winner”, more letters of support from waiting customers, a less  
3 complex bill-of-materials, with a lower initial volume manufacturing cost, that re-opened  
4 more closed factories than any other Victim/Witnesses or “winner” at the time of  
5 submission.
- 6 • The substantive ePlaintiff 42lanation for why Victim/Witnesses' merited the ATVM loan is  
7 that Victim/Witnesses' was prepared to manufacture a cheaper version of the Nissan Leaf.  
8 As of Dec. 28, 2008 Victim/Witnesses' had a design more finished and ready than Tesla,  
9 Fisker and Nissan. Victim/Witnesses' model was almost exactly the same as the Nissan Leaf.
- 10 • Victim/Witnesses' claims GOVT staff synthetically manipulated Victim/Witnesses' results to  
11 be low in order to favor others.
- 12 • Victim/Witnesses' alleges that Victim/Witnesses' application process was sabotaged, inside  
13 and outside, in order to benefit competing interests and disfavor smaller, independent  
14 companies who applied.
- 15 • Victim/Witnesses' alleges GOVT officials ordered reviewers of funding applications to  
16 change their review criteria, part way through the process, in order to favor certain  
17 Victim/Witnessess or “winners”.
  - 18 o Many of those Victim/Witnessess would have qualified at the bottom of a proper  
19 review in an unbiased review.
  - 20 o GOVT paid outside reviewers for work in the review process under a variety of  
21 names, and the work performed, by a company with little experience in the industries  
22 it was to review, was produced per GOVT officials specifications rather than per the  
23 metrics of the actual facts.
  - 24 o Staff from national labs have stated to reporters that they were directed to manipulate  
25 data.
  - 26 o Victim/Witnesses' staff have seen “shoot-out” unofficial, internal, confidential,  
27 GOVT Excel comparison matrices as of Dec. 29, 2008 and March 2, 2009 and  
28 Victim/Witnesses' placed in the top 5% in over-all comparison metrics.

- 1 • Victim/Witnesses' application was first-in-line (which is how the law said applications were  
2 to be processed) yet GOVT staff changed/violated the law in order to cut Victim/Witnesses',  
3 and other Victim/Witnessess, out and favor “special Victim/Witnessess” who didn’t apply  
4 properly because they knew they had the money “hard-wired” already.
- 5 • Victim/Witnesses' alleges GOVT officials changed the first-come-first-served published rules  
6 and standards of the funding in order to take Victim/Witnessess in order of who they favored  
7 and who had purchased the most influence instead of the order in which they applied, as  
8 required.
- 9 • Victim/Witnesses' alleges GOVT officials were ordered by GOVT senior executives and  
10 outside public office executive staff to not respond to non-favored Victim/Witnessess until  
11 certain application deadlines had passed in order to remove the non-favored, non-influence  
12 purchasing Victim/Witnessess from potential funding.
- 13 • Victim/Witnesses' alleges “GOVT officials personally assisted and hand-held  
14 Victim/Witnesses' competitor’s Victim/Witnessess including site meetings in which they  
15 drafted the Victim/Witnessess applications while ignoring competing Victim/Witnessess to  
16 those favored Victim/Witnessess.”
- 17 • Victim/Witnesses' alleges Victim/Witnesses' spoke to Carol Battershel, who stated she was  
18 the due diligence technical lead, who said she had gotten everything she needed “off our  
19 website”. Battershel was later revealed to be an ad hoc advocate for Tesla Motors.
- 20 • Victim/Witnesses' alleges “GOVT reviewers never even talked to the founder, inventor,  
21 engineers, project leads or primary contractors.”; “GOVT never even contacted our  
22 engineers and refused to speak to them even once, although our engineers called them and  
23 visited them to see if they could provide any data because they were so surprised that  
24 nobody from GOVT ever called them.”
- 25 • Victim/Witnesses' alleges Victim/Witnesses' was told that everything in their application  
26 was good and that no additional information was needed.
- 27 • Victim/Witnesses' alleges “reviewers at national labs were ordered to change data, or their  
28 data was changed.”

- Victim/Witnesses' alleges “standard commercial bank loan processes were not used for each Victim/Witnesses.”
  - Victim/Witnesses' alleges “Commercial bank officers will testify that all banks process the same loan applications for the same commercial manufacturing purposes in an average 18 days and not in timeframes measured in years. The ‘Loan review process’ was intentionally stalled to keep competitors from competing with the ‘winners’.”
  - Victim/Witnesses' alleges “The original distribution date for the funds was set to be Dec. 08/Jan. 09. Victim/Witnesses' suffered damages because of multiple date manipulations.”
  - Victim/Witnesses' alleges “Victim/Witnesses' and other Victim/Witnessess were given different hoops to jump through in order to go through the application process depending on whether or not they had purchased influence or not.”
  - Victim/Witnesses' alleges “The process was different for favored Victim/Witnessess vs. unfavored Victim/Witnessess.”
  - Victim/Witnesses' alleges “GOVT staff told multiple independent car company Victim/Witnessess that the fund was out of money and that, that was one of the reasons that those Victim/Witnessess could not move forward. At no time was the fund out of money and, indeed, a ‘carve out’ of money was ‘held out’ for Detroit. GOVT gave favored, limited, small cluster ‘carve out’ Victim/Witnessess top-tier status for consideration based on ‘special relationships.’”
  - Victim/Witnesses' “Leaf’s” would have sold more volume at a higher mark-up than Nissan’s Leaf’s because Victim/Witnesses' metrics already exceeded what the customers already demanded so Victim/Witnesses' would have had an even higher profit number, by now, than the \$205,000,000.00.
- 70 GOVT stated that they “lost our documents” twice. This seemed to Victim/Witnesses' like a “Lois Lerner” tactic.
- On October 23, 2009, Lachlan W. Seward, Director, Advanced Technology Vehicles Manufacturing Incentive Program, wrote to Victim/Witnesses' informing them that critical issues were identified in its application.

27  
28

o Victim/Witnesses' disputed these critical issues.

- Victim/Witnesses' alleges that after months of reassurance from certain GOVT staff that Victim/Witnesses' application was “substantially complete,” the application was denied without ePlaintiff 42lanation in August 2009.
- Victim/Witnesses' alleges that the GOVT ATVM Director, Lachlan Seward, was improperly influenced to fund Detroit-based “Big Three” projects as well as the politically well-connected Tesla, contrary to the letter and spirit of the loan-enabling legislation. White House car czar: Steve Rattner confirmed this.
- In addition, Victim/Witnesses' believes that Seward improperly discriminated against their company’s application after the Company questioned the logic of one of the LGP’s policies in a public hearing and subsequently requested a review of the GOVT application process by Senator Bingaman, Chairman of the Senate Energy and Natural Resources Committee.
- Victim/Witnesses' alleges in its first meeting with the senior officers of the GOVT program and the auto industry at GOVT HQ (which was videotaped by GOVT) Victim/Witnesses' senior staff asked Lachlan Seward a question about the logic of one of his policies after he had been contradicted by his staff on the stage. It was later reported to Victim/Witnesses' that, after the meeting, Mr. Seward said within earshot of his staff something to the effect of “it will be a cold day in hell before I let them get any of this money”.
- Victim/Witnesses' filed four different complaints on Mr. Seward’s office with the Senate Committee in charge of GOVT under Sen. Bingaman.
- The misrepresentations and the special treatments of competitors cost the company massive losses in competitive positioning, ramp-up costs based on assertions of favorable loan status, and other damages.
- Victim/Witnesses' alleges that the U.S. GOVT has failed to reform the application selection process based on recommendation provided in report GAO-10-627 by The U.S. Government Accountability Office in July 2010.
- Victim/Witnesses' alleges it used the same power plant as Victim/Witnessess Nissan and Tesla.

- 1 • On October 29, 2009, Rebecca M Makar, of The U.S. Government Accountability Office,  
2 reached out to Victim/Witnesses' concerning Victim/Witnesses' ATVM application.
- 3 • On November 3, 2009, Ms. Makar wrote to Victim/Witnesses' to schedule an interview with  
4 Victim/Witnesses' concerning Victim/Witnesses' experiences with the Department of  
5 Energy's ATVM program.
- 6 • The application was again deemed substantially complete on November 10, 2009.
- 7 • Upon information and belief, on November 10, 2009, Victim/Witnesses' completed stage  
8 one of the review process.
- 9 • On June 9, 2011, Frank Rusco, Director of Natural Resources and Environment at GAO,  
10 provided testimony before the U.S. Senate Committee on Energy and Natural Resources,  
11 Report No. GAO-11-745T, titled "Advanced Technology Vehicle Loan Program Needs  
12 Enhanced Oversight and Performance Measures," in which GAO stated, "[t]he ATVM  
13 program has set procedures for overseeing the financial and technical performance of  
14 borrowers and has begun oversight, but at the time of our February report it had not yet  
15 engaged engineering expertise needed for technical oversight as called for by its procedures.  
16 . . . However, the program had not yet engaged such expertise. As a result, GOVT cannot be  
17 adequately assured that the projects will be delivered as agreed."
- 18 • Victim/Witnesses' alleges GOVT has failed to address the 2011 GAO report on the ATVM  
19 loan program recommended objective technical and financial criteria to measure program  
20 performance.
- 21 • The June 9, 2011 testimony also stated, "GOVT has not developed sufficient performance  
22 measures that would enable it to fully assess progress toward achieving its three program  
23 goals."
- 24 • Victim/Witnesses' alleges that Patent filed May 21, 2004 and granted October 9, 2007 for a  
25 Solid-State Hydrogen Storage System was infringed due to untoward conduct by the U.S.  
26 Department of Energy.
- 27 • Victim/Witnesses' alleges that Patent filed August 6, 2008 and granted October 30, 2012 for  
28 an Inflatable Electric and Hybrid Vehicle System was infringed due to untoward conduct by

the U.S. Department of Energy.

- There is some evidence that GOVT shared sensitive scientific information that Victim/Witnesses' provided GOVT with Victim/Witnesses' competitors. For example, Victim/Witnesses' visited the Argonne National Laboratory in California and learned that GM obtained sensitive, patented information about some of Victim/Witnesses' technology. With it, GM built a duplicate of Victim/Witnesses' energy-saver device.
- On May 3, 2005 The U.S. Congress in H2866 in the Congressional Record as part of the “Iraq War Bill” commended the Victim/Witnesses' project and directed the GOVT to award them funding. The U.S. Congress supported the project in the “Iraq War Bill” because of the teams technology which can reduce U.S. dependence on foreign oil as a value to U.S. security.
- In its application under the ATVM program, Victim/Witnesses' stated “Exhibit D provides a copy of Victim/Witnesses' Vehicles Business Plan, which is extremely confidential!”
- On March 29, 2009, Victim/Witnesses' counsel wrote to Jason Gerbsman, the Director of External Affairs at the GOVT, requesting confidential treatment under 10 C.F.R. §§1004.11 and 1004.10(b)(4) as well as under 5 U.S.C. §552(b)(4).
- In September 2005, Victim/Witnesses' received a grant from The U.S. Government for a project with end date of 8/31/2006. In an e-mail dated March 5, 2002 from Plaintiff 22Vaupen at Sandia National Laboratories to Victim/Witnesses', Mr. Vaupen wrote, concerning hydrogen storage via Fuel Cell, “If you are interested in licensing technologies, please let me know exactly what areas you are interested in and I can try to sort out what technologies we have available.”
- In Victim/Witnesses' November 12, 2008 ATVM Loan application, subcontractors were identified as Victim/Witnesses' and Sandia National Laboratories.
- Victim/Witnesses' alleges there is evidence that GOVT shared sensitive scientific information that Victim/Witnesses' provided GOVT with Victim/Witnesses' competitors. Victim/Witnesses' visited Sandia National Laboratories and communicated, via phone and e-mail, with the Argonne National Laboratory and learned that GM obtained sensitive,

28

patented information about some of Victim/Witnesses' technology. With it, GM built a duplicate of Victim/Witnesses' energy-saver device. The “sensitive scientific information” was submitted to GOVT by Victim/Witnesses' as part of its ATVM loan application, which was protected by confidentiality. This scientific information included fuel cell and hydrogen storage technologies, fuel cassettes and pressure membrane body parts,

- Victim/Witnesses' was invited to The U.S. Government Sandia National Laboratories and was given a facility tour. In one room where large glove-boxes and chemical testing equipment was used, he saw a table with a presentation set-up for another group. On that table were duplicates of the technology he had filed patents on, built, tested and received issued patents on and signage on the devices stated: “General Motors hydrogen vehicle production system” and “NALH General Motors Reversible Hydrogen Vehicle Energy System built by General Motors and Sandia” NALH is one of the exact chemistries, of over 2800+ possible chemistries that might be used, that Victim/Witnesses' has an issued patent on. Victim/Witnesses' pointed this out to Chris Moen and Daniel Dedrick, senior scientists at Sandia, who stated that they were concerned that there might be “a problem with that” and said that we “might want to contact GM to seek to make a “partnership” so there was no acrimony. On December 12, 2008, a nondisclosure agreement was made and entered into between Palintiff and Sandia National Laboratories.
- On or about Jan. 15, 2012, Victim/Witnesses' became aware of internet stories about GM productizing alanates solid state hydrogen storage for its fuel cell cars via Sandia and Argonne National Labs
- On or about March 12, 2012 Victim/Witnesses' became aware of articles about Ford Motors, Inc., planning to ship inflatable seats, seat belts and inflatable body parts.
- Victim/Witnesses' alleges potential patent infringement
  - o Currently a number of companies (over 30) are selling Victim/Witnesses' exact patented technology without paying for it.
  - o This is the exact technology Victim/Witnesses' designed, proposed, patented and won acclaim for.

- o Some of them were enabled by GOVT funding. Some of them were hired as “reviewers” for Victim/Witnesses' applications, by GOVT.
- o Hard evidence has been provided to Victim/Witnesses' demonstrating that these parties infringed Victim/Witnesses' patents during this period.
- o At least two companies acquired Victim/Witnesses' technical data through the programs and then marketed that technology as their own, infringing Victim/Witnessess existing, issued, patents.

- Victim/Witnesses' included, as Appendix A, in its loan application, its issued energy industry patents and their estimated value valued by outside third party patent analysts. This included a U.S. Patent with an estimated value of \$104,072,538.36; A U.S. Patent with an estimated value of \$17,291,568.64; A U.S. Patent with an estimated value of \$10,524,792.26; and a U.S. Patent with an estimated value of \$5,607,695.94. The total estimated value of these patents is \$137,496,595.20.
- A U.S. Department of Energy Press Release from Thursday, November 6, 2008, titled “Fact Sheet: Advanced Technology Vehicles Manufacturing Loan Program” stated “The FY 09 Continuing Resolution authorized up to \$25 billion in direct loans to eligible Victim/Witnessess for the costs of reequipping, expanding, and establishing manufacturing facilities in the U.S. to produce advanced technology vehicles, and components for such vehicles.”
- In the Fact Sheet, GOVT explained that Congress set forth the criteria for projects and costs eligible to receive direct loans. “The key criteria for qualified advanced technology vehicles or qualified components require: Manufacturing facilities be located in the U.S.; Engineering integration be performed in the U.S.; Costs be reasonably related to the reequipping, ePlaintiff 42ending, or establishing a manufacturing facility in the U.S.; and Costs of engineering integration be performed in the U.S.”
- The Interim Final Rule, 10 C.F.R. Part 611, Advanced Technology Vehicles Manufacturing Incentive Program, clarifies that: “Section 136 provides two categories of projects eligible for direct loans: (1) manufacturing facilities in the United States designed to produce

qualified advanced technology vehicles or qualified components; and (2) engineering integration performed in the United States of qualifying advanced technology vehicles and qualifying components. Eligible costs of such projects are: (a) those costs that are reasonably related to the reequipping, expanding, or establishing a manufacturing facility in the United States to produce qualifying advanced technology vehicles or qualifying components; (b) costs of engineering integration performed in the United States for qualifying vehicles or qualifying components. Costs eligible for payment with loan proceeds are costs incurred, but not yet paid by the borrower, after a substantially complete application has been submitted to GOVT and costs incurred after the closing of the loan.

- Section 136 of the Energy Independence and Security Act of 2007 (“EISA”) authorizes the Secretary of Energy to “make grants and direct loans to eligible Victim/Witnesses for projects that reequip, ePlaintiff 42and, or establish manufacturing facilities in the United States to produce qualified advanced technology vehicles, or qualifying components and also for engineering integration costs associated with such projects.”
- Victim/Witnesses' interpreted EISA, together with the Interim Final Rule, to authorize federal funds to support U.S. production of qualifying components.
- GOVT gave Tesla Motors, Inc. a \$465 million loan under the ATVM program. According to a U.S. Department of Homeland Security, Immigration and Customs Enforcement report dated December 22, 2011, the GOVT loan to Tesla was to “(1) Reopen an auto manufacturing plan in Fremont, California to produce specially-designed, all-electric, plug-in vehicles and (2) to develop a manufacturing facility to produce battery packs, electric motors and other powertrain components that will power all-electric plug-in vehicles manufacturing by Tesla[.]”
- According to the ICE Report, DHS ICE investigated whether Tesla Motors used foreign made parts in manufacturing their vehicles.
- According to a July 15, 2009 article in Venture Beat, Tesla Motors “recent recipient of \$465 million in low-cost federal loans via the U.S. Department of Energy’s Advanced

Technology Vehicles Manufacturing program, won't have to raise new matching funds to qualify like other recipients.”

- If so, Victim/Witnesses' believe Tesla violated the requirements of both the Interim Final Rule and EISA.

LGP

- In early February 2009, Victim/Witnesses' was informed by House Speaker Pelosi's office that the Loan Guarantee program existed and that the company appeared to meet the criteria for a successful application. The company emailed the GOVT program office stating their intent to apply for a loan. However, after some additional research, it appeared that the application fees were prohibitive.
- Victim/Witnesses' Vehicles company officials were then invited to attend, via webcam, a Senate Energy Committee hearing chaired by Sen. Jeff Bingaman (D-NM) in which dramatic changes and repairs to the program were discussed, including waiving the fees. Also during the hearing, the loan program office was admonished for problematic management and fees, as well as the fact that the process was structured in an exclusionary manner.
- The company was then invited to a conference call with John Podesta, GOVT Secretary Steven Chu and Interior Secretary Ken Salazar during which Mr. Chu stated his intention to waive the application fees. Victim/Witnesses' Vehicles then submitted their application with a cover letter stating that they understood that Mr. Chu was waiving the application fees.
- Company officials then received a call on February 26, 2009 from Myrtle Gross from GOVT stating that they still needed to pay the fees and that funds needed to be wired by midnight February 26, 2009 in order for the loan application to be submitted. Victim/Witnesses' Vehicles contacted several investors, but considering the extremely short notice could not complete the transaction with less than 12 hours' notice.
- Victim/Witnesses' was in part obstructed in its attempt to procure a Loan Guarantee by the actions of another senior GOVT official, Plaintiff 22Tobin, who refused to respond to

Victim/Witnesses' requests for instructions on where and how to pay the fees to have the loan disbursed.

- Therefore, on February 27, 2009 the company assumed they had missed the deadline, but then they received a call from another GOVT official (Mr. Dan Tobin) stating that there were a few days of flexibility to send the application fees so the company re-contacted its investors. Mr. Tobin promised to get back to the company about where to wire the money. Funding was lined up but no information could be obtained about where to send it. More than six phone calls were placed by the Victim/Witnesses' and associates, along with scores of others from other company associates, to GOVT but these were never returned.
- The GOVT refused to respond to Victim/Witnesses' request for review and explanation of the denial of their application, as well as numerous FOIA requests.
- The GAO undertook a review of GOVT's application policies (in response to Victim/Witnesses' complaints, among other things), and recently issued findings that (1) GOVT's implementation of the LGP has treated Victim/Witnesses inconsistently, favoring some and disadvantaging others; and that (2) GOVT lacks systematic mechanisms for LGP Victim/Witnesses to administratively appeal its decisions or to provide feedback to GOVT on its process for issuing loan guarantees. Instead, the GAO found, GOVT re-reviews rejected applications on an ad hoc basis. The GAO report issued specific recommendations that GOVT take steps to ameliorate these failings.
- Daniel C. Tobin, Senior Investment Officer of the GOVT Loan Guarantee Program Office stated that he (Mr. Tobin) would pre-review Victim/Witnesses' application and call back in order to provide feedback so investors could be informed in order for them to wire the money for the application fee.
- Victim/Witnesses' alleges that after numerous calls and letters the GOVT response was not the pre-review communication that had been promised by Daniel Tobin, even though Victim/Witnesses' application had been received on time, but a dismissal from the program without recourse.
- Victim/Witnesses' had a conference call with Secy. Chu who said he'd get the fees waived.

The company was then invited to a conference call with John Podesta, GOVT Secretary Steven Chu and Interior Secretary Ken Salazar during which Mr. Chu stated his intention to waive the application fees. Victim/Witnesses' Vehicles then submitted their application with a cover letter stating that they understood that Mr. Chu was waiving the application fees.

- On April 9, 2009, Dan Tobin of the GOVT wrote to Victim/Witnesses' (lead investor in Victim/Witnesses' Technology), that “due to non-remittance of the required application fee, your application will not be reviewed.”
- This cost Victim/Witnesses' its funding opportunity and the associated revenue from such an opportunity.
- Victim/Witnesses' demanded to Sen. Bingaman that it be re-entered into the Loan Guarantee Program or receive offset consideration in some other funding opportunity based on this situation.
- GOVT’s response completely ignored the Tobin assertion. In other words, Tobin refused to act on his promise until the day after the deadline had passed and then sent a “you are rejected because you missed the deadline” email even though we had the money he wanted ready to wire to him on a moment’s notice. Victim/Witnesses' application was then rejected even though it had the highest metrics. Victim/Witnesses' staff were subjected to punitive and retribution action by GOVT staff, and their associates, for “whistle-blowing”.
- Victim/Witnesses' alleges that investigators have provided Victim/Witnesses' with hard evidence of GOVT staff requiring subordinates to break the law and circumvent federal contracting, procedural and standard operating directives regarding communication protocols, documentation and file storage in order to obscure transparency and process and avoid revelation of their true activities.
- Victim/Witnesses' claims, “One Senate investigation was stone-walled for a historically long period of time because GOVT staff intentionally hid, obscured and sought to destroy requested evidence.”

**Recent Results Of Federal And Private Investigations**

1 Since this matter began, FBI, SEC and Congressional investigations have revealed much.

2 The latest revelations are:

3 - CROOKED POLITICAL INSIDERS have learned that when a government funded tech  
4 company fails, THOSE INSIDERS make billions of dollars in unjust profits from tax write-offs,  
5 Goldman Sachs services "fees" and stock market pump-and-dump manipulations while taxpayers  
6 lose BILLIONS on those same companies at Solyndra, Abound, Ener1, etc..... THAT'S RIGHT,  
7 the crooks make profits off of PLANNED-TO-FAIL taxpayerfunded companies, many of which  
8 never even sold anything. It happened in the 2008 pretend "stimulus" and it is happening again,  
9 many times more, in the 2021 pretend "stimulus". The Cleantech companies were made-to-fail, as  
10 stock scams, by the insiders! Insider friend's at the Dept of Energy get to "jump-the-line", ePlaintiff  
11 42loit the cash and Trojan horse the tech start-up into oblivion.

12 As with nearly a thousand Silicon Valley tech dirty money deals, for example, Netflix tech  
13 bosses are now getting caught selling media influence in exchange for bribes! Michael Kail  
14 (Netflix IT Boss), and other Netflix executives are under investigation for manipulating which  
15 media technologies get to make money. Netflix funds the DNC political campaigns. Netflix board  
16 positions and media slots are often traded as political quid pro quo payola for political favors.

17  
18 'Not only did Mr. Kail deprive Netflix of its money and resources by abusing his position as VP of  
19 IT Operations,' FBI Special Agent in Charge Craig D. Fair said in a statement, 'he created a pay-to-  
20 play environment whereby he stole the opportunity to work with an industry pioneer from honest,  
21 hardworking Silicon Valley companies.' The San Francisco FBI and the United States Patent Office  
22 has been asked, by independent video-on-demand inventors, to look at how Netflix, YouTube and  
23 other tech oligarchs, steal technologies and cancel media access in a coordinated anti-trust violating  
24 scheme.

25  
26 Kail was indicted in 2018 on 19 counts of wire fraud, three counts of mail fraud, and seven counts  
27 of money laundering. The trial began April 19 in federal court in San Jose, California. The jury  
28 found him guilty on 28 of the 29 counts. Prosecutors said that Kail had accepted more than

1 \$500,000 in kickbacks - as well as valuable stock options - in exchange for approving millions of  
2 dollars in contracts for nine tech companies seeking to do business with Netflix between February  
3 2012 and July 2014.

4  
5 In a statement, the the Department of Justice said: 'He used his kickback payments to pay personal  
6 expenses and to buy a home in Los Gatos, California in the name of a family trust.' The Mercury  
7 News reports he must now forfeit his \$2.6 million three-bedroom, two-bathroom Los Gatos home to  
8 the federal government. Kail created and controlled a limited liability company, Unix Mercenary  
9 LLC, to receive the bribes, fund personal expenses and buy a home in Los Gatos, California,  
10 prosecutors said. This kind of case is typical of the **MAJORITY** of Silicon Valley tech executives.

11 Netflix, Google, and their *Silicon Valley Cartel*, operate secret programs that use data from  
12 personal and business records to manipulate business, politics and ideologies. For example, in the  
13 company's digital advertising exchange, Google manipulates it's ad-buying system, it's political  
14 marketing and it's executives ideology promotions to gain a dramatic advantage over competitors,  
15 according to court documents and federal records revealed in new antitrust lawsuits by various  
16 Attorney General's. Elon Musk is a mobster yet he used public funds to buy a facade of self-  
17 aggrandizement at the expense of the taxpayers.

18  
19 One corrupt secret Google program, known as "Project Bernanke," wasn't disclosed to publishers  
20 who sold ads through Google's ad-buying systems. It generated hundreds of millions of dollars in  
21 revenue for the company annually, the documents show. Google and Youtube, a unit of Alphabet  
22 Inc., always gets an unfair competitive advantage over rivals in business, politics, stock market  
23 valuations. In another corrupt program, Google invested in Tesla Motors, hyped Tesla and Musk  
24 and attacked Musk's competitors using nearly a hundred million dollars of equivalent competitor  
25 attack marketing. We are some of the Victim/Witnesses' of those attacks.

26 *"..Over 540 pages including a key set of four pages of documents from the office of the*  
27 *Secretary of State of California reveal how state officials employ Silicon Valley media companies*  
28 *(Twitter, Facebook, Google (YouTube)) to censor posts about politics. Included in these documents*

1 were “misinformation briefings” emails that were compiled by communications firm SKDK,  
2 that **lists** Biden for President as their **top client**. The documents show how California state agencies  
3 successfully pressured YouTube to censor videos concerning things that **California political Cartel**  
4 **bosses like Harris, Pelosi and Feinstein** don't want citizens to see. A **December 2020**  
5 **report** surfaced that shows that the State of California is surveilling, tracking, and seeking to censor  
6 the speech of Americans in order to cover-up the political crimes and stock market manipulations  
7 that State officials are engaged in. California politicians own portions of Twitter, Facebook,  
8 Google (YouTube), LinkedIn, etc. and those social media companies are simply an arm of their  
9 political and stock market manipulation efforts..."

**EXHIBIT 59 - The Scams At The Secretary Of Energy’s Office**

**Energy Secretary Steven Chu** and his staff held stock and business partnerships in Tesla Motors and the rare earth companies used to make his batteries. The Energy Department has lied about their massive conflicts of interest, covered up hundreds of crony insider manipulations of applications and run Lois Lerner-type reprisal attacks on those who compete with Tesla and their crony buddies. In an exact repeat of the 2008 Solyndra "Stimulus" scam: **Energy Secretary Jennifer Granholm** owns up to \$5 million in the electric battery and vehicle manufacturer President Joe Biden will promote on Tuesday as part of his push for a \$1.9 trillion infrastructure bill. Biden’s virtual visit to the electric battery producer Proterra comes days after Vice President Kamala Harris paid a visit to Thomas Built Buses, a North Carolina-based school bus company that counts Proterra as its main supplier of electric vehicles. The back-to-back White House visits to Granholm-connected companies risk at least the appearance of impropriety and demonstrate how lawmakers can use policy initiatives to pad their own wallets.

America can no longer give out taxpayercash based on who the best friends of crooked Senators are!

10	Proterra, Inc., vested stock options	N/A	\$1,000,001 - \$5,000,000	None (or less than \$201)
11	Proterra, Inc., stock options (value not readily ascertainable): 38,542 unvested shares, strike price \$5.35, vest 12/2021, exp. 12/2024	N/A		None (or less than \$201)
12	Proterra, Inc., stock options (value not readily ascertainable): 22,500 unvested shares, strike price \$4.26, vest 12/2021, exp. 12.2024	N/A		None (or less than \$201)

Granholm has taken a leading role in the administration’s forthcoming infrastructure package. The president in February tasked her with "identifying risks in the supply chain for high-capacity batteries, including electric-vehicle batteries, and policy recommendations to address these risks." The U.S. Government did not respond to multiple requests for comment.

Granholm joined Proterra’s board of directors in March 2017; internet archives list her as a board member as recently as February 19, 2021, shortly before her confirmation on February 25. Her financial disclosures reveal up to \$5 million worth of stock options in the green tech company,

1 which went public in January through the special purpose acquisition company ArcLight Clean  
2 Transition Corp. Arclight, a NASDAQ-listed company, saw shares shoot up about [55 percent](#) since  
3 its September IPO, a spike financial traders attributed directly to the acquisition of Proterra.

4  
5 In a January 16 letter to the designated agency ethics official, Granholm vowed to step down  
6 from the board and sell her stock in the company, as well as the steps she will take "to avoid any  
7 actual or apparent conflict of interest." The former Michigan governor has sold some stock, but has  
8 not offloaded any of her Proterra shares, according to a White House official. Granholm's stake in  
9 Proterra represents her largest financial asset outside of a house in Oakland, Calif., that she values  
10 as between \$1 and 5 million, according to her financial disclosures. The White House confirmed  
11 that Granholm still holds stock in Proterra, but said she played no role in planning the president's  
12 visit. Proterra was selected for today's virtual visit because it is the leading U.S. manufacturer of  
13 electric buses, employing 600 workers at its South Carolina and California plants," a White House  
14 official told the Washington Free Beacon. "Neither Secretary Granholm nor The U.S. Government  
15 were involved in selecting the Proterra plant."

16  
17 In a February 24 executive order, Biden placed Granholm in charge of "identifying risks in the  
18 supply chain for high-capacity batteries, including electric-vehicle batteries, and policy  
19 recommendations to address these risks." One of Proterra's key products is electric-vehicle  
20 batteries. Proterra's website boasts that "our flexible design enables Proterra® EV batteries to be the  
21 best choice for commercial vehicles ranging from transit buses and trucks to delivery vehicles,  
22 construction equipment, and more." Nearly 85 percent of Proterra employee campaign contributions  
23 went to Democrats, including Joe Biden, according to the Center for Responsive Politics. "You can't  
24 win", but that's all part of the politicians crooked plan. These crimes involve well-known public  
25 officials and pervert Silicon Valley billionaires who are trying to cover these crimes up. We won't  
26 let them get away with this corruption, though! Here is over a million pages of evidence and hours  
27 of video against them! Nicholas and Joby Pritzker—members of Illinois Democratic governor J.B.  
28 Pritzker's megadonor family—own nearly 12 million shares of ArcLight through their venture

1 capital fund, Tao Capital. ArcLight in January announced a \$1.6 billion merger with Proterra, which  
2 will see the electric vehicle manufacturer go public in 2021. Granholm served on Proterra's board  
3 for nearly four years and still holds up to \$5 million in company stock.

4  
5 National Economic Council director Brian Deese is also tied to Proterra through BlackRock, the  
6 investment giant where he worked as global head of sustainable investing before joining the Biden  
7 administration. BlackRock is one of several investment firms that pumped a combined \$415 million  
8 into the Proterra merger, and Deese reported holding more than \$2.4 million in BlackRock vested  
9 restricted stock in his February financial disclosure. These investors are posed for steep gains, as  
10 ArcLight's stock price has surged 50 percent—from \$11.90 to \$18 per share—since January.

The revelations come as congressional Republicans demand investigations into potential conflicts of interest between the Biden administration and Proterra, which could receive billions in taxpayer funds through a proposed infrastructure package. Rep. Ralph Norman (R., S.C.), who serves as ranking member on the environment subcommittee of the House Committee on Oversight

1 and Reform, told the *Free Beacon* that "the American people deserve to understand the full extent  
2 of Secretary Granholm's involvement with Proterra." "Her position of roughly \$5 million in the  
3 electric car company Proterra is another unfortunate example of politicians using their position for  
4 personal gain," Norman said. "Due to the President's recent unveiling of a \$2 trillion infrastructure  
5 package, this matter should be investigated thoroughly." Deese in April virtually toured Proterra's  
6 South Carolina factory with President Joe Biden, touting a proposed \$45 billion government  
7 investment in "clean, zero-emissions buses" such as those produced by Proterra. Just days later, the  
8 Biden administration again amplified the bus company, hosting Proterra CEO Jack Allen at its  
9 Leaders Summit on Climate. Administration officials repeatedly praised Proterra at the event, and  
10 Allen responded by thanking the White House for its "longstanding support of electric transit buses  
11 and zero emission transportation."

12 "Proterra manufactures half of the U.S.'s electric bus market, which is pretty amazing,"  
13 Biden national climate adviser Gina McCarthy said at the event. "And as you know, funding for  
14 electric school buses is a priority in the American Jobs Plan." McCarthy went on to ask Allen "what  
15 role" the federal government can play in "spurring the demand for zero emission electric vehicles,  
16 including school buses." Granholm also spoke at the summit. The White House did not return a  
17 request for comment on Deese's BlackRock holdings as well as the director's role in planning events  
18 with Proterra. As a top BlackRock executive, **Deese led an investment team tasked with identifying**  
19 **"sustainable" investment opportunities**, according to his online bio. A BlackRock spokesperson  
20 said Deese "was not involved" with the Proterra investment. The Pritzkers, meanwhile, will own  
21 between 6 and 7 percent of Proterra once the company goes public, SEC documents filed by  
22 ArcLight reveal. Nicholas Pritzker is one of two Tao Capital executives with "sole voting and  
23 dispositive power" over the Proterra shares. The investment firm, which did not return a request for  
24 comment, first backed Proterra through a \$10 million stake in 2014. Granholm joined the bus  
25 company's board three years later. During her tenure, Tao Capital co-led another \$155 million  
26 investment in Proterra. "We at Tao are proud to support Proterra in its mission to bring forth a  
27 clean, electric transportation ecosystem," Nicholas Pritzker said in 2018. The firm's website touts  
28 the likes of Proterra, Tesla, and Bird as part of its "Alternative transportation" portfolio.

“KPCB Holdings”, on the list above is the notorious John Doerr. A name involved with other quid pro quo political cases.

Nicholas Pritzker and his wife Susan are prolific donors to Democratic candidates and causes. In the 2020 cycle alone, Susan Pritzker—a Tao Capital director—was the 95th largest donor in America. She contributed more than \$3 million to Democrats in disclosed money, according to the Center for Responsive Politics. Nicholas Pritzker has given at least \$1.9 million to Democrats in direct contributions, including maximum contributions to Biden's campaign and victory fund, FEC filings show. The government should not enable crony insiders while sabotaging their enemies using government money.

15 [Dear FBI Team:](#)

16 As know you, our task force has created a large number of public-interest crowd-sourced  
17 testimony websites to provide real-time information, about this case, to your agents. We have  
18 spoken to your office on multiple occasions as informants, whistle-blowers, witnesses and providers  
19 of testimony about this large criminal matter involving well known public figures..

20 Congress must be forced to eliminate both the appearance and the actual operation of  
21 financial conflicts of interest that we have identified going on every day. Americans must be  
22 confident that actions taken by public officials are intended to serve the public, and not those  
23 officials and their corrupt Silicon Valley big tech leash-holders. Their actions counter-act the law,  
24 The Constitution and general morality. A number of our associates are now dead, under mysterious  
25 circumstances. It seems like some of them were killed to shut them up.

26 We experienced all of the damages from each of the abuse-of-power issues listed below. The  
27 FBI, FTC, SEC, FEC must become a taskforce that ends these crimes. These are the crimes we saw  
28 and suffered from and the solutions to those crimes:

1 We documented modern bribes being paid through stock market scams. We saw the  
2 perpetrators do it. Please help ban individual stock ownership by Members of Congress, Cabinet  
3 Secretaries, senior congressional staff, federal judges, White House staff and other senior agency  
4 officials while in office. Please prohibit all government officials from holding or trading stock  
5 where its value might be influenced by their agency, department, or actions. The perpetrators are  
6 TODAY committing crimes and corruption in this manner... ([READ THE REST AT THIS LINK](#))  
7

3  
4 **And hundreds of other leaks and hacks publicly dumped on the internet...**

5  
6 When you cross index all of the public leak data into an AI auditing system, any basic PC computer  
7 can FOLLOW THE BRIBE AND PAYOLA MONEY right back to the bank accounts of each  
8 corrupt Senator, White House executive and Silicon Valley oligarch! If only The U.S. Government  
9 had a federal enforcement agency whose very job it was to do that sort of investigation....Oh,  
10 wait,...The U.S. Government has SIX agencies who are supposed to do that...

11 - Victim/Witnesses' had global character assassination and propaganda-media defamation  
12 reprisal attacks operated against them by White House staff and their political financiers: Elon  
13 Musk, Larry Page, Steve Jurvetson, Eric Schmidt, Steve Westly, John Doerr, et al. Jury and FBI-  
14 compliant evidence proves this as fact.

15 - All of the offered government money had been hard-wired to political friends ahead of  
16 time and there was no possibility that outsider Victim/Witnessess could have received the funds.  
17 Victim/Witnessess were lied to and defrauded.

18 - Victim/Witnesses' were attacked because 1.) they helped law enforcement investigate the  
19 attackers, 2.) They competed with the attackers that attacker's products and the Silicon Valley Cartel  
20 attackers chose to "cheat rather than compete". Jury and FBI-compliant evidence proves this as fact.

21 - The attackers spent over \$30M+, part of that using taxpayerresources, attacking the  
22 Victim/Witnesses' as proven in the financial transaction records from Google, Gawker, Gizmodo,  
23 Jalopnik, Media Matters, Fusion GPS, et al. Jury and FBI-compliant evidence proves this as fact.

24 - Victim/Witnesses' had been previously funded by The U.S. Government and had a multi-  
25 decade relationship with the highest offices of the Government, which provided them with deep  
26 knowledge of the crimes that were committed. Jury and FBI-compliant evidence proves this as fact.

27 - The U.S. Department of Energy is used as a political slush fund to pay back campaign  
28 finance millionaires while blockading the competitors of those millionaires from reaching the

1 market or receiving funding. Jury and FBI-compliant evidence proves this as fact.

2 - The only entities who participated in the global character assassination and propaganda-  
3 media defamation reprisal attacks were those entities owned and controlled by the attackers. Jury  
4 and FBI-compliant evidence proves this as fact.

5 - Through corrupt rare-earth mining scams and control of federal contracts and grants,  
6 attackers had planned to acquire at least one trillion dollars in unjust gains and illegal profiteering.  
7 Jury and FBI-compliant evidence proves this as fact.

8 - This amount of money they sought, and the "Mafia-like" structure they adopted, caused the  
9 suspects to engage in the most extreme crimes, including murder and "Deep State" coup attempts.  
10 Jury and FBI-compliant evidence proves this as fact.

11 - A significant number of person's who were in conflict with the attackers have died in  
12 suspicious manners. Jury and FBI-compliant evidence proves this as fact.

13 - The suspects have hired the largest numbers of lobbyists and corporate manipulation  
14 lawyers in U.S. history in order to manipulate political decisions. Jury and FBI-compliant evidence  
15 proves this as fact.

16 - The suspects have spent more money on political bribes than any group of men has spent  
17 in the last century. Jury and FBI-compliant evidence proves this as fact.

18 - The suspects placed top federal law enforcement and agency bosses (ie: Michelle Lee,  
19 Steven Chu, Kamala Harris, James Comey, et al) from their own Cartel, into top government  
20 positions, with orders to run cover and protection schemes for them. Jury and FBI-compliant  
21 evidence proves this as fact.

22 - California State officials including the Governor, Controller, The Senators, Secretary of  
23 State and regional officials participated in these crimes and pocketed the initial profits from these  
24 crimes in covert investment banking. Jury and FBI-compliant evidence proves this as fact.

25 - Tesla Motors, Google, Netflix, Facebook, Linkedin, Amazon and other tech Cartel  
26 members operate with a common goal of psychological mass ideology manipulation and  
27 monopolistic profiteering based on government sponsored anti-trust violations and server control  
28 exclusivity. Jury and FBI-compliant evidence proves this as fact.

1 - The attempted cover-ups of these crimes continues to this day. Jury and FBI-compliant  
2 evidence proves this as fact.

3 - Natural-born U.S. citizen Victim/Witnesses #1 has been employed in the USA for many  
4 decades and was a federal contractor/employee. The State of California employment laws now  
5 provide that of of Victim/Witnesses #1's "contractor" was actually "employee" work per California  
6 law. He worked for his community and his country as a law enforcement and intelligence researcher  
7 (law/IC) in which he closed cases that saved Americans billions of dollars. He holds numerous state  
8 and federal certifications and credentials to this effect and was certified as an investigator under the  
9 State Government at the California Office Of Consumer Affairs. He also worked as a CEO,  
10 Inventor and Product Development Director for which The U.S. Government has awarded him  
11 dozens of seminal patent awards for products in use by Microsoft, Sony and other major companies  
12 to provide products and services to billions of people. He has received commendation letters from  
13 U.S. Presidents, Agency heads and Mayors. He is pictured in videos, photographs, articles,  
14 meetings and on letterhead government and corporate correspondence with some of the most  
15 famous public and White House figures in America for decades. He reported the corruption in a  
16 trillion dollar Department of Energy embezzlement scam involving crooked uranium, lithium,  
17 indium and other metals, he was attacked by State and Federal employees, many of whom have now  
18 been terminated because of their illicit actions. Victim/Witnesses was also exposed to those toxic  
19 materials in his work for the Department of Energy.

20 - Part of the state-sponsored attack launched against Victim/Witnesses #1 used the same  
21 exact personnel, servers, digital systems, production equipment and other resources that are owned,  
22 or managed, by Google/Alphabet/YouTube for national election candidate counter-measures  
23 services. Google/Alphabet/YouTube sells these services, under many guises, as offerings to  
24 promote any candidate or damage any candidate for a fee, or for an exchange of items of value. Our  
25 investigators have acquired some of the billing and banking documents verifying this and the FBI  
26 has full access to all such documents proving this assertion. The billing value of the attack against  
27 Victim/Witnesses #1 (in commensurate multiple-billing efforts by Google/Alphabet/YouTube) had  
28 a minimum commercial value of \$30M in billings. This metric is based on records of political

1 election campaign services sold by Google/Alphabet/YouTube since the year 2002. In other words,  
2 in a past elections, hard, documented numbers, employee statements, banking records, stock  
3 records, billing records and other materials exist, in jury trial acceptable form, to prove that, for  
4 example, Google/Alphabet/YouTube spent a certain exact amount of money and resources-of-value  
5 to defeat one candidate and to seek to elect that candidates opposition.

6 - Additionally, relative to the Google/Alphabet/YouTube portion of the attack,  
7 Google/Alphabet/YouTube owners are on federal and Congressional record swearing under oath  
8 that they do "not manipulate search results in order to harm others", yet investigators for  
9 Victim/Witnesses #1 and over 1000 outside third parties proved that the opposite was true and that  
10 Google/Alphabet/YouTube executives lied under oath. The fact that the attack link on Google's  
11 front page never moved position for 5 years and other confirming data, proves the assertion that  
12 Google/Alphabet/YouTube sells defamation and character assassination services and sold them  
13 against Victim/Witnesses. Victim/Witnesses helped place sensors on servers globally which used  
14 comparative search results from competing global search engines to prove that  
15 Google/Alphabet/YouTube was rigging most search results to promote it's friends and harm it's  
16 political and business enemies.

17 - California Senators, White House staff and the owners and executives of  
18 Google/Alphabet/YouTube are also the investor/shareholders in Victim/Witnessess competitors  
19 who were government financed.

20 - The industry metricized standard for person's with, at least, the skills and experience of  
21 Victim/Witnesses, in his demographic, is a minimum of \$10,000 per month in the local technology  
22 market for those with less hours, less patent awards, less past work reference letters and less  
23 experience than Victim/Witnesses. Silicon Valley job metrics and census data prove that that is  
24 even a low figure for a commensurate worker. Lost work opportunity for Victim/Witnesses should  
25 be valued at a minimum of \$10,000.00 per month.

26 - Even though Victim/Witnesses has been an extraordinarily productive, working member of  
27 the community and The U.S. Government ; and Victim/Witnesses has organized companies and  
28 programs which have paid millions of dollars in taxes, Victim/Witnesses is currently only afforded

1 the most minimal benefits possible. In other words, Victim/Witnesses has saved billions of dollars  
2 for the Government and the taxpayers and, additionally, has organized companies and programs  
3 which paid millions of dollars in taxes and free services to The Government yet Victim/Witnesses  
4 seems to be getting only political reprisals as gratitude.

5  
6 - State and Federal employee corruption and reprisal actions cost Victim/Witnesses his savings and  
7 nearly a billion dollars of potential income by intentionally sabotaging and terminating his  
8 operating, Congressional financed, Congressional commended national service companies featured  
9 on NPR, CBS News, and in The Wall Street Journal, The New York Times and hundreds of other  
10 mainstream news outlets. Corrupt State and Federal employees engaged in these benefit blockade  
11 reprisals because Victim/Witnesses's companies competed with the stock market holdings of those  
12 corrupt State and Federal employees.

13  
14 - These are the very same public officials who have interdiction capability at state and federal  
15 agencies. It is quite reasonable to assume that these State and Federal employees, who have a court  
16 record of using reprisal actions against others, just like they did to Victim/Witnesses, ordered  
17 federal agencies to harm Victim/Witnesses. These public officials defrauded Victim/Witnesses by  
18 asking and causing him, and his Team, to invest in their program. It turned out they were using  
19 Victim/Witnesses's business ventures to cover (smoke-screen) their crimes at the expense of  
20 Victim/Witnesses and the taxpayers.

21  
22 - To be clear, Government employees put hundreds of millions of dollars of stock market profits in  
23 their, and their associates pockets, part of which they took from Victim/Witnesses's funding, and  
24 then attacked Victim/Witnesses, in a large number of reprisal actions.

25  
26 - Victim/Witnesses reported crimes by public officials which led to the FBI raid of Solyndra,  
27 opened the Uranium One investigation and the firing of the Secretary Of Energy for corruption. Part  
28 of Victim/Witnesses's work involved creating America's next national energy solutions.

1 - Victim/Witnesses worked with the U.S. Department of Energy, HUD, NAHB and related  
2 entities in work with the national weapons and energy labs since 2000. Victim/Witnesses worked  
3 with nuclear, heavy metals, sintered rare earth metals, extreme solvents and nano-particulated exotic  
4 chemistries and won a historical Congressional commendation, first-ever seminal U.S. Government  
5 patent awards, industry and press acclaim, customer acclaim and a multi-million dollar lab research  
6 grant in the Congressional Iraq War Bill.

7 - Even though Victim/Witnesses's has worked in service to his country, Victim/Witnesses  
8 has been denied his legal rights. Victim/Witnesses's U.S. Constitution and California Constitutional  
9 rights have been denied because he "did the right thing" and helped law enforcement.

10  
11 - The most senior FBI and DOJ executives including James Comey, Andrew McCabe, Peter Strzok,  
12 David Oh and others are under federal investigation for running character assassinations and  
13 working with the economic assassins from Fusion GPS, Google Media, Gawker Media and other  
14 illicit attack organizations. Victim/Witnesses reported to some of these men. Charges of FBI, DOJ,  
15 VA and SSA executive reprisal manipulations and attacks against citizens would have sounded hard  
16 to believe a decade ago but, in the post-Snowden world, catching those who pervert State and  
17 Federal offices has become common-place. It is beyond reasonable to assume that  
18 Victim/Witnesses's charges of government agency reprisal-stonewalling are well founded and have  
19 full legal merit.

20 - The services who charge to perform the support work for such attacks provide a life-time  
21 placement of negative attack data on Google and on all of the Axiom, Taleo and other hiring HR  
22 and hiring databases, globally; and the locking, on the front top page of Google search results,  
23 forever, of the attack and defamation data, as was done because Victim/Witnesses testified to  
24 Congress, the GAO and the FBI.

25 - The attacks on Victim/Witnesses were "State Sponsored Attacks" directed, financed and  
26 managed by California State public officials and Federal Agency officers.

27 - Instead of the "Thanks of a grateful nation", Victim/Witnesses has received political  
28 reprisals, revenge and vendettas using taxpayerfinanced resources. Victim/Witnesses has

1 contributed more in the service of his country and community than most citizens. We ask your  
2 office to Correct the Record and the Nick Denton tabloid empire and bring fairness and justice to  
3 the finalization of this case. Victim/Witnesses, his family, friends, associates and others will pursue  
4 this forever, through the media, law enforcement and alternative means ...until it is fairly resolved.

5 - The suspects in these crimes received over 50 billion dollars in profits from the crimes.

6  
7 - The suspects received over 50 billion dollars at the expense of the Victim/Witnesses' because they  
8 intentionally, maliciously and in a coordinated manner, circumvented, those monies from the  
9 Victim/Witnesses' and the victim's income streams.

10  
11 - The amount of money that the suspects acquired from these crimes is confirmed by reports at the  
12 Securities and Exchange Commission, The Internal Revenue Service, the FTC and stock market  
13 transfer records.

14  
15 - Each competing company of the Victim/Witnesses's that the suspects sabotaged had the potential  
16 to make as much money, or more money, than the suspects companies did in the same time period.  
17 Victim/Witnesses's companies would have operated competitively had they not been sabotaged by  
18 the government officials. These other companies offered lower cost, safer, longer range products  
19 which higher volumes of consumers had demanded. This means that, if these companies had not  
20 been sabotaged by these corrupt government officials who, owned stock in these insider companies,  
21 they would have made even more money than the insider companies.

22 - Thus, and by extension, the corrupt Senator's and White House staff stock ownership's in  
23 Victim/Witnesses's competitor's, provide a minimum baseline damages amount reference for  
24 comparable damages values using GAAP accounting references. Each competing company that  
25 suspects sabotaged, had the potential to make as much money, or more money, than known  
26 competing company revenues.

27 - The government officials used character assassination as a vendetta process to seek to  
28 destroy the brands, reputations and witness testimony of the Victim/Witnesses' by manipulating

1 their properties.

2 - The suspects hired Fusion GPS, Black Cube, Google, Media Matters, Gizmodo and  
3 Gawker Media to author and distribute character assassination propaganda to the majority of the  
4 world's population via their pre-arranged and contrived control of the vast majority of digital media.  
5 For example, Google, the stock of which is owned by the suspects, locked the attacks on the front  
6 page on the top line of Google for over five years, without ever moving it, even though  
7 Victim/Witnesses's purchased thousands of servers, and take-down requests to attempt to move the  
8 attacks even a few lines lower. This proves that Google was manually, and daily rigging the attacks.  
9 Thus, the damages award to the Victim/Witnesses should be much higher than the Terry Bollea  
10 award.

11 - Government funding which was circumvented by suspects from Victim/Witnesses to  
12 themselves was not the largest quantified value of loss. Working with Goldman Sachs, JP Morgan,  
13 McKinsey, etc., suspects ePlaintiff 42loited the White House relationship with The Fed and the SEC  
14 to create a massive stock market valuation padding scheme which yielded historical profits. By  
15 stating government funds as “profit” and switching back and forth from stock skims to government  
16 funds in accounting records, tremendous stock market profits were placed in the pockets of the  
17 suspects.

18 - Had Victim/Witnesses's not been circumvented by suspects then Victim/Witnesses's would  
19 have acquired these same benefits. The stock market loss to the Victim/Witnesses's at the expense  
20 of the Victim/Witnesses's is also calculated into the damages consideration.

21 - The suspects ordered Steven Chu, Lachlan Seward, Carol Battershel, McKinsey and  
22 Deloitte Consulting, Kathy Zoi and other executives at the U.S. Department of Energy, to be placed  
23 into positions in the U.S. Department of Energy as shills on their behalf, to lie to and defraud the  
24 Victim/Witnessess. All of the ATVM and LGP grant and loan funds from the U.S. Department of  
25 Energy had been secretly hard-wired and the distribution of it covertly arranged to go to the  
26 suspects stealthed stock ownerships.

27 - Thus, the Victim/Witnessess, who had superior technology, more customer orders, better  
28 value and provided less of a national security risk were defrauded into spending tens of millions of

1 dollars on the Victim/Witnesses process via false promises and assurances of success which were  
2 already known to be lies from the first 2007 forward. The losses in time, expenses and time-to-  
3 market delays created by these fraudulent promises and assertions by the agents, in public office,  
4 covertly working for the suspects are calculated into these damages.

5 - Victim/Witnesses's are demanding from The U.S. Government , The California State  
6 Government and the individual suspect/Defendants; general damages according to proof; special  
7 damages according to proof; exemplary or punitive damages; For a preliminary injunction and a  
8 permanent injunction enjoining defendant and their/her agents, servants, and employees, and all  
9 persons acting under, in concert with, or for him/her from continuing to publish the above-described  
10 private facts about Victim/Witnesses's; for costs of suit herein incurred; for such other further relief  
11 as the court may deem proper; and for an award of a percentage of suspect/Defendants gross  
12 revenue since inception wherein that revenue was derived from profits made from the use of, or  
13 interdiction of, Victim/Witnesses's patented and trade secret products, services and technology  
14 which Defendants covertly acquired information about and copied for profit. Forensic accounting  
15 based on Subpoenas against the suspects and attack providers, and further FBI support, will be  
16 required to finalize the amount but recent leaks and witness testimony confirm the veracity of these  
17 assumptions.

18

1 **EXHIBIT 61 - State-Sponsored Reprisal Attacks Suffered By Plaintiffs**

2  
3  
4 ***CIA, In-Q-Tel, Black Cube Mossad and other spy operatives contracted their services to***  
5 ***White House and Senate senior officials to attack and destroy reporters, whistle-blowers and***  
6 ***other Victim/Witnesses'.***

7 The United States Government and State of California senior officials own the stock in  
8 Tesla, Facebook, Google and other tech companies and take their orders from those companies. that  
9 is "criminal collusion"!

10 *"these are the reprisal attacks that they ran against us, in vendetta, that we are now, legally,*  
11 *sending straight back to each of them...."*

12 **Senators and oligarchs run an organized crime operation.** The Victim/Witnesses' were  
13 attacked with a \$30M+ state-sponsored reprisal attack program which included the following attack  
14 tactics operated by the same WHITE HOUSE "OPPOSITION RESEARCH" AND ATTACK  
15 TEAM used to attack opposition Presidential candidates and reporters that were in disfavor.

16 Just like Bin Laden was caught by tracking his "relay-men", The Silicon Valley Cartel has  
17 their Steve Westly's, David Plouffe's, Jay Carney's, Nick Denton's, David Brock's, and the other  
18 little sociopath sociopolitical manipulations bastards who always seem to escape the law. They have  
19 not escaped public forensics, though.

20 Now the Victim/Witnesses' have demanded that the FBI, and others, bug, hack and  
21 forensically track them to expose the coordinating/colluding/conspiring structure of the same little  
22 rats nest of CPA, PAC, fake charities, trust funds, fake shell companies, tech law firms and other  
23 dirty tricks operatives that they use to run their Cartel. The Panama Papers leaks exposed one corner  
24 of their system. From there it was easy to drill into the heart of this financial and political crime  
25 operation. The forensic accounting trails all lead back to the exact same crooks. It is no coincidence  
26 that they all use the same people and transfer the cash through the same routes.

27 The attacks on the Victim/Witnesses' could only have been accomplished by White House  
28 and Department of Energy operatives. Only they had the resources and experience to undertake

1 something this heinous and spy agency-like. The funding for the attacks tracks right back to them,  
2 too. Ask the FBI what the forensic tracking of the attackers revealed!

3 Investigations have revealed that the White House and California Senators hired the  
4 character assassination and defamation attack services: [Cardinal & Pine](#); **Pacronym, Acronym**; The  
5 Americano; Investing in US; **Shadow Inc**; **Courier Newsroom**; **IN-Q-Tel**; **Gawker Media**;  
6 **Jalopnik**; **Gizmodo Media**; **K2 Intelligence**; **WikiStrat**; **Podesta Group**; **Fusion GPS**; Google;  
7 **YouTube**; **Alphabet**; **Facebook**; **Twitter**; **Think Progress**; **Media Matters**); **Black Cube**; **Correct**  
8 **the Record** and the **Nick Denton tabloid empire**; **Orbis Business Intelligence**, **Undercover Global**  
9 **Ltd**; **Stratfor**; **Jigsaw**; **ShareBlue/Acronym**; **Versa LLC**; **American Ledger**; **Supermajority News**;  
10 **New Venture Fund**; **Sixteen Thirty Fund**; **Cambridge Analytica**; **Sid Blumenthal**; States  
11 Newsroom; **Hopewell Fund**; **Open Society.**; **David Brock**; **AmpliFire News**; **American Bridge**;  
12 **Plouffe Consulting**; **Pantsuit Nation**; **MotiveAI**; **American Bridge 21st Century Foundation**;  
13 **Priorities USA**; **PR Firm Sunshine Sachs**; **The American Independent Foundation**; **Covington**  
14 **and Burling**; **Buzzfeed**; The American Independent; **Perkins Coie**; **Secondary Infektion**; **Wilson**  
15 **Sonsini** and thousands more to run hit-jobs, character assassinations, dirty tricks and economic  
16 reprisal attacks on any targets who reported the crimes. Each of those companies are now under  
17 federal and civil investigation. Most of these businesses offer the service of manipulating elections  
18 and news coverage in order to steer stock market profits into the pockets of billionaire clients at the  
19 expense of the taxpayer and Democracy. They hide their transactions via money-laundering. All of  
20 these services, when focused on individual citizens, are lethal.

21  
22  
23  
24  
25 Why would we go to this much trouble to take these people down? because they did these  
26 things to us in reprisal for reporting their crimes:

27  
28 **1.) Defrauding Victim/Witnesses via fake government requests to invest in rigged**

1 **government contracts;**

2

3 **2.) Placing moles and spying inside Victim/Witnesses's companies;**

4

5 **3.) Blockading legal counsel for Victim/Witnesses's;**

6

7 4.) Character assassination and sophisticated contracted defamation media attacks;

8

9 **5.) Offshore factory processed social media attacks;**

10

11 **6.) Government benefits from SSA, HUD, etc, blockades and manipulations;**

12

13 **7.) Jobs and venture capital funding blacklisting;**

14

15 **8.) FOIA obfuscation for official government FOIA filings;**

16

17 **9.) Arbitrary government deadline manipulation for SSA, GOVT, HUD and other**  
18 **applications;**

19

20 **10.) Creation of endless fake hurdles in agency applications (ie: GOVT) to protect rigged**  
21 **"winners";**

22

23 **11.) Toxic workplace poisonings like the Salisbury, Nalvany, Litvinenko poisonings;**

24

25 **12.) Workplace sabotage and obstruction of Victim/Witnesses's companies;**

26

27 **13.) Media defamation attacks via gawker, Gizmodo, Jalopnik, Google, Youtube, etc.;**

28

1 **14.) Commercial employment database "lois lerner-ing" and red-flagging;**

2

3 15.) Murders of peers (ie: Rajeev Motwani, Seth Rich, Gary D. Conley and 120+ others);

4

5 **16.) Revenue blockades and internet income re-direction;**

6

7 **17.) Troll farm attack teams hired from Chinese attack farms;**

8

9 **18.) Fusion GPS, Media Matters, David Plouffe attack contracts issued targeting whistle-**  
10 **blowers;**

11

12 **19.) Manual search engine lock-in attacks on Google, YouTube, LinkedIn;**

13

14 **20.) U.S. patent office manipulation to blockade revenue;**

15

16 **21.) Honey-traps sent out targeting the whistle-blowers;**

17

18 **22.) Fake news tabloid empires created just for defamation attacks;**

19

20 **23.) Housing access and financing blockades created to reprisal harass whistle-blowers;**

21

22 **24.) Ongoing hacking of Victim/Witnesses's devices;**

23

24 **25.) Tech industry black-list coordination within the National Venture Capital Association;**

25

26 **26.) HUD and USDA mortgage rights blockades;**

27

28 **27.) DNS and IP routing manipulation to prevent Victim/Witnesses' from selling anything**

1 **online;**

2  
3 **28.) Digital attacks designed to put horrific fake news about target in front of 7.5 billion**  
4 **people...**

5  
6 and more spy agency type "dirty tricks"that cost the Victim/Witnesses' their lives, life savings,  
7 income and other disabling losses. Diane Feinstein, Nancy Pelosi, Harry Reid, White House Staff,  
8 Department of Energy Executives, and others, have the power, with a single phone call, to  
9 implement all of the above attacks.

10 *"They all had the means and motivation. They all had stock market profits affected by this.*  
11 *They all had been proven to have contracted FUSION GPS and other attack services on multiple*  
12 *occasions! They all will do ANYTHING to cover up these crimes! If these people could do these*  
13 *things to us then it must be completely legal to do these things right back to them, correct? Their*  
14 *attacks prove that our assertions are true because nobody would undertake such large, state-*  
15 *sponsored attacks, unless they were afraid these particular crimes would come to light."*

16 **2021A - Documented Attack Incident On Victim/Witnesses':** Government agency bosses  
17 solicited the target with false promises of future loans, contracts or grants from their agency and  
18 caused the target victim to ePlaintiff 42end millions of dollars and years of their time for projects  
19 which those government bosses had covertly promised to their friends. They used the target victim  
20 as a "smokescreen" to cover their illegal government slush-funds for the Victim/Witnesses'  
21 competitors and personal enemies. By using this tactic, the attackers drain the target  
22 Victim/Witnesses' funds and forced victim into an economic disaster without the government bosses  
23 fearing any reprisal for their scam in which they made billions of dollars in profit in the notorious  
24 Solyndra scandals as seen in the CBS 60 Minutes episode: "***The Cleantech Crash***", thousands of  
25 TV news segments and the related GAO and Congressional corruption reports.  
26  
27

28 **2021B - Documented Attack Incident On Victim/Witnesses':** Government officials and

1 LSC corporation (A federal agency dedicated to providing legal services to Victim/Witnesses')  
2 blockaded victim's rights to legal representation in order to prevent victim from personally suing  
3 the attackers because such a lawsuit would have embarrassed corrupt public officials. High tech law  
4 firms that were discussing a services agreement with victim were threatened and ordered to not help  
5 victim or "*they would be black-listed or be cut-off from tens of millions of dollars of Google,*  
6 *Netflix, Facebook and government contracts*". Individual lawyers were threatened with black-listing  
7 and getting "*flooded with more filings than you could ever respond to in your life-time...*" LSC  
8 officials, who were almost entirely Obama Administration associates, refused to assist with lawyer  
9 referrals, which is against their federal contract.  
10

11  
12 **2021C - Documented Attack Incident On Victim/Witnesses':** A sophisticated animated  
13 attack film was produced attacking victim. An animated film is an ePlaintiff 42ensive effort  
14 involving considerable time and expense. An attacker must be well financed to undertake such an  
15 effort. The film was published on YouTube and locked onto the very top search result line on every  
16 YouTube search in front of 5 billion internet users for over a decade. The damage to victim's  
17 reputation is estimated in the tens of millions of dollars. YouTube steadfastly refused to remove or  
18 adjust the search results even though YouTube executives knew victim and knew that the video  
19 represented a character assassination attempt against victim because YouTube owners finance the  
20 political campaigns of the public officials who ordered the attacks. While Google/YouTube stated  
21 to Congress that all of it's search results are arbitrary, the never-moving search result of this attack  
22 video proved that Google's and YouTube's search results are manually manipulated by human  
23 maintained black-lists.  
24

25  
26 **2021D - Documented Attack Incident On Victim/Witnesses':** Social networking sites  
27 including MeetUp, Match, Facebook, etc. and all other IAC-owned, or similar, sites (IAC is  
28 managed by Hillary Clinton's daughter, whose Mother knew victim) have had their profiles, texts,

1 and inter-member communications, since those companies were started, hacked or purchased. The  
2 financiers of almost everyone of these sites are also the financiers of the suspects. The attack service  
3 providers use Palantir , In-Q-Tel financed data analysis software to analyze every activity in those  
4 services ***in order to find honey-trap***, blackmail and social conflict exploitation opportunities. Your  
5 social life will, essentially, end. Every photo on every social site is cross checked with every other  
6 photo on the internet in order to cull your Facebook, LinkedIn, Snapchat and other social media  
7 together to create a total manipulation profile data file on you. New contacts on these sites were  
8 contacted by the attackers and told to “avoid” the victim in order to damage victim.  
9

10  
11 **2021E - Documented Attack Incident On Victim/Witnesses':** Social Security, SSI, SDI,  
12 Disability and other earned benefits were stone-walled. Applications for benefits for the victim were  
13 intentionally “lost” like a “Lois Lerner hard drive”. Files in the application process “disappeared”.  
14 A U.S. Senator ordered Victim’s benefits to “never be approved” even though victim worked 60  
15 hour+ weeks for decades in service to their nation and their community. A SSA official in the local  
16 SSA office, who had a devout expressed hatred against one United States President ordered a  
17 benefits blockade against victim because he found out that victim’s ex-lawyer now worked in the  
18 White House.  
19

20  
21 **2021F - Documented Attack Incident On Victim/Witnesses':** Government officials and  
22 tech oligarchs contacted members of the National Venture Capital association (NVCA) and created  
23 national “black-lists” to blockade victim from receiving investor funding. This was also confirmed  
24 in a widely published disclosure by Tesla Motors Daryl Siry and in published testimony. If Silicon  
25 Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal and the  
26 "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding again.  
27

28 **2021G - Documented Attack Incident On Victim/Witnesses':** Federal FOIA requests

1 were hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to  
2 seek to hide information and run cover-ups.

3  
4 **2021H - Documented Attack Incident On Victim/Witnesses':** State and federal officials  
5 play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the  
6 government officials, had stonewalled and obfuscated applications for, in order to force these  
7 deadlines that they set, to appear to be missed.

8  
9 **2021I - Documented Attack Incident On Victim/Witnesses':** Victim/Witnesses' was  
10 found to be strangely poisoned, not unlike the Alexander Litvenko case. Heavy metals and toxic  
11 materials were found right after victim's work with The U.S. Government weapons and energy  
12 facilities. Many wonder if victim was intentionally exposed to toxins in retribution for their  
13 testimony. The federal MSDS documents clearly show that a number of Victim/Witnesses' were  
14 exposed to deadly compounds and radiations, via GOVT, without being provided with proper  
15 HazMat suits which GOVT officials knew were required.

16  
17  
18 **2021J - Documented Attack Incident On Victim/Witnesses':** Victim/Witnesses'  
19 employers were called, and faxed, and ordered to fire target Victim/Witnesses' from their places of  
20 employment, in the middle of the day, with no notice, as a retribution tactic.

21  
22 **2021K - Documented Attack Incident On Victim/Witnesses':** On orders from Obama  
23 White House officials ***Google, YouTube***, Gawker Media and Gizmodo Media produced attack  
24 articles and defamation videos. [Google](#) locked these contrived attack articles from the Nicholas  
25 Guido Denton tabloid empire on the top line, of the front page of all [Google](#) searches for a decade  
26 in front of 7.5 billion people, around the world. This attack-type uses over \$40 million dollars in  
27 server farms, production costs and internet rigging. The forensic data acquired from tracking some  
28

1 of these attacks proves that Google rigged these attacks against victim on the internet and that all of  
2 Google's "impressions" are manually controlled by Google's executives who are also the main  
3 financiers and policy directors of the Obama Administration. This data was provided to the  
4 European Union for it's ongoing prosecution of Google's political manipulation of public  
5 perceptions. Hired attackers Nicholas Guido Denton, John Herman, Adrian Covert, Ian Fette,  
6 Patrick George, Gabrielle Darbyshire and John Cook have been referred to the FBI for surveillance,  
7 tracking and interview relative to the command, control and compensation for those attacks.  
8

9  
10 **2021L - Documented Attack Incident On Victim/Witnesses':** Victim/Witnesses' HR and  
11 employment records, on Taleo, Palantir and EVERY recruiting and hiring database, was embedded  
12 with negative keywords and "flags" in order to prevent the victim from ever gaining future  
13 employment.  
14

15  
16 **2021M - Documented Attack Incident On Victim/Witnesses':** Gary D. Conley, Seth Rich,  
17 Rajeev Motwani who victim knew, and many other whistle-blowers in these matters, turned up dead  
18 under strange circumstances. Victim has received ongoing death threats for his help to federal  
19 investigations in the larger organized crime investigation relative to this matter. You might wonder  
20 why energy deals get people killed. You might wonder why Joe Biden's son Hunter was running an  
21 energy company he knew nothing about. A widening investigation into allegations of high-level  
22 corruption on the island of Malta, first levelled by murdered journalist Daphne Caruana Galizia,  
23 stretches to China and a \$400 million investment into Europe by a Chinese state power company  
24 with connections to Dianne Feinstein's family China partners, Reuters has found. Caruana Galizia  
25 was murdered in October 2017 as she investigated a web of companies that she believed were  
26 funneling bribes to Maltese politicians. Now, Reuters and a consortium of journalists have traced  
27 two firms involved in that web to relatives of a senior Chinese executive for Accenture, the global  
28 consultancy firm. The executive, 43-year-old Chen Cheng from Shanghai, negotiated investments

1 on behalf of China’s state-owned Shanghai Electric Power in Malta and in another small European  
2 state, Montenegro, over the past decade, according to Maltese officials and official records. The  
3 revelation of a Chinese connection potentially adds a new international dimension to a scandal that  
4 has rocked Malta’s government and last year led to the resignation of the prime minister. It also  
5 could figure in a series of Maltese official investigations into the events leading up to Caruana  
6 Galizia’s death. Backed by Malta’s government, the investments by Shanghai Electric Power were  
7 portrayed by Maltese and Chinese political leaders as one component of China’s multi-trillion dollar  
8 Belt and Road initiative to pour money into economic infrastructure in central Asia and Europe. In  
9 2016, a year before she was murdered in a car bombing, Caruana Galizia identified Chen’s key role  
10 in the transactions on her blog. Reporter David Bird was looking into these energy connections and  
11 he was then found dead in the woods on the East Coast. A total of six people in Malta have been  
12 charged with Caruana Galizia’s killing and await trial. Caruana Galizia reported that Chen created a  
13 company in the British Virgin Islands in 2014, for an unknown purpose. In the same year, Chen  
14 played a central role in negotiations and due diligence for Shanghai Electric Power to invest 380  
15 million euros (\$400 million) in buying a share of Malta’s state power company, Enemalta. Caruana  
16 Galizia did not specify any wrongdoing by Chen. Chen and Accenture did not respond to Caruana  
17 Galizia’s report at the time. Now, reporters at Reuters, the Times of Malta, the Organized Crime  
18 and Corruption Reporting Project and the Süddeutsche Zeitung, have discovered that Chen’s family  
19 set up two further companies in Hong Kong, both with business links to Malta. The first of the  
20 companies set up by the Chen family, known as Macbridge, planned to pay up to \$2 million to  
21 Panama firms controlled by two Maltese politicians, Reuters has previously reported. The second,  
22 called Dow’s Media Company, received one million euros (\$1.2 million) from a business owned by  
23 one of Malta’s richest men, Yorgen Fenech, according to financial records seen by Reuters. Fenech  
24 is in jail, awaiting trial on a charge of masterminding Caruana Galizia’s murder. He has pleaded not  
25 guilty. According to international legal requests seen by Reuters, Maltese law enforcement officials  
26 suspect that Macbridge and Dow’s Media were part of an elaborate scheme, involving some  
27 participants in the China-Malta deals, to make payments to politicians in Malta and siphon off  
28 profits for themselves. The Panama Papers Leaks, The Swiss Leaks And Wikileaks have shown that

1 dirty CPA firms for American politicians and Silicon Valley oligarchs were all laundering money  
2 through these shared illegal conduits.

3  
4 **2021N - Documented Attack Incident On Victim/Witnesses':** Paypal (A DNC-biased  
5 operation) and other on-line payments for on-line sales by victim are de-platformed, delayed,  
6 hidden, or re-directed in order to terminate income potential for target who competed with the  
7 attackers interests and holdings. This further denied victim income. As a test, victim built an online  
8 store with hundreds of thousands of products and marketed it globally. Trackers, placed by victim's  
9 technicians, on servers, discovered that Paypal and an outside "Virgina-based system" were DNS  
10 and payment re-directed all traffic away from the store so that victim received no traffic and no  
11 income. In DNS redirection, "website spoofing" sends target Victim/Witnesses' websites to dead  
12 ends where no sales orders or customer inquiries actually get back to the target. These internet  
13 revenue activity manipulations are conducted using outside covert servers operated by the attackers  
14 and revealed in the Snowden Leaks. All commercial storefronts and on-line sales attempts by target  
15 Victim/Witnesses', had their sites hidden, or search engine de-linked by a massively resourced  
16 facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials  
17 for the victim.  
18  
19

20  
21 **2021O - Documented Attack Incident On Victim/Witnesses':** Contracted trolls, shills,  
22 botnets and synth-blog deployments are deployed to place defamatory statements and  
23 disinformation about victim in front of 7.5 billion people around the world on the internet in order  
24 to seek to damage their federal testimony credibility by a massively resourced facility. Some of  
25 these troll farms were uncovered in Russia, Ukraine, Israel and Brazil.  
26

27 **2021P - Documented Attack Incident On Victim/Witnesses':** Campaign finance dirty  
28 tricks contractors were hired by campaign financiers to attack the friends and family members of the

1 target victim in order to create low morale for the target Victim/Witnesses' psyche and motivation.

2  
3 **2021Q - Documented Attack Incident On Victim/Witnesses':** In one case covert political  
4 partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked  
5 the media portion of the attacks into the top lines of the top pages of all Google searches globally,  
6 for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on  
7 Victim/Witnesses' by many magnitudes.

8  
9 **2021R - Documented Attack Incident On Victim/Witnesses':** Covert Cartel financier:  
10 Google, placed Google's lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn,  
11 stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-  
12 supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted  
13 for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for  
14 technology theft and a number of those lawsuits refer to Google's operations as "Racketeering",  
15 "Monopolistic Cartel" and "Government Coup-like" behaviors. Thousands of articles and  
16 investigations detail the fact that Google, "essentially" ran the Obama White House and provided  
over 80% of the key White House staff. A conflict-of-interest unlike any in American history.  
Google's investors personally told Victim they would "kill him". Google and the Obama  
Administration were "the same entity". Victim testified in the review that got Michelle Lee  
terminated and uncovered a tactical political and social warfare group inside Google who were  
financed by Federal and State funds.

17 **2021S - Documented Attack Incident On Victim/Witnesses':** "Honeytraps" and moles  
18 were employed by the attackers. In this tactic, people who covertly worked for the attackers were  
19 employed to approach the "target" in order to spy on and misdirect the subject. The State-Sponsored  
20 Spies And Hired Character Assassins Of Match.com. Victim/Witnesses' employed some of the  
21 founder's of Match.com and has intimate knowledge of the Match.com organization's intelligence  
22 and dirty tricks sub-set. Over 1000 profiles on Match.com, and it's related sites, are spies that are  
23 there entirely to operate as contractors to attack others! Through a series of facades, these attackers  
24 are directed by White House and Department of Energy Bosses with orders to help government  
25 officials attack, punish, defame and harm whistle-blowers, business competitors and political  
26 adversaries. Since 2008, one San Francisco business man has recorded over 20 of these spy girls  
27  
28

1 recording him and reporting back to his competitor. He has placed a private investigation firm on  
2 long-term contract to hunt down and prosecute these spider-women who sell entrapment services  
3 and operate under cover of Match.com’s guise.

4  
5 While naive readers may laugh at such a claim, there is now public record proof that a  
6 network of activists, aided by a British former spy, mounted a campaign during a national election  
7 campaign, using Match.com, to discredit perceived enemies of candidates inside the government,  
8 according to documents and people involved in the operations.

9  
10 The campaign included a planned sting operation against the national security adviser at the  
11 time, H.R. McMaster, and secret surveillance operations against FBI employees, aimed at ePlaintiff  
12 42osing certain cronyism sentiment in the bureau’s ranks.

13 The operations against the FBI, run by the conservative group Project Veritas, were  
14 conducted from a large home in the Georgetown section of Washington that rented for \$10,000 per  
15 month. Female undercover operatives arranged Match.com dates with the FBI employees with the  
16 aim of secretly recording them making disparaging comments about competitors.

17 The campaign shows the obsession that some of competitors’s allies had about a shadowy  
18 “deep state” trying to blunt his agenda — and the lengths that some were willing to go to try to  
19 purge the government of those believed to be disloyal to the president.

20 Central to the effort, according to interviews, was Richard Seddon, a former undercover  
21 British spy who was recruited in 2016 by security contractor Erik Prince to train Project Veritas  
22 operatives to infiltrate trade unions, Democratic congressional campaigns and other targets. He ran  
23 field operations for Project Veritas until mid-2018.

24 Last year, The New York Times reported that Seddon ran an ePlaintiff 42ansive effort to  
25 gain access to the unions and campaigns and led a hiring effort that nearly tripled the number of the  
26 group’s operatives, according to interviews and deposition testimony. He trained operatives at the  
27 Prince family ranch in Wyoming.

28 The efforts to target American officials show how a campaign once focused on ePlaintiff

1 42osing outside organizations slowly morphed into an operation to ferret out competitors’s  
2 perceived enemies in the government’s ranks.

3 Whether any of competitors’s White House advisers had direct knowledge of the campaign  
4 is unclear, but one of the participants in the operation against McMaster, Barbara Ledeen, said she  
5 was brought on by someone “with access to McMaster’s calendar.”

6 At the time, Ledeen was a staff member of the Senate Judiciary Committee, then led by Sen.  
7 Chuck Grassley, R-Iowa.

8 This account is drawn from more than a dozen interviews with former Project Veritas  
9 employees and others familiar with the campaign, along with current and former government  
10 officials and internal Project Veritas documents.

11 The scheme against McMaster, revealed in interviews and documents, was one of the most  
12 brazen operations of the campaign. It involved a plan to hire a woman armed with a hidden camera  
13 to capture McMaster making inappropriate remarks that his opponents could use as leverage to get  
14 him ousted as national security adviser.

15 Although several Project Veritas operatives were involved in the plot, it is unclear whether  
16 the group directed it. The group, which is a nonprofit, has a history of conducting sting operations  
17 on news organizations, Democratic politicians and advocacy groups.

18 The operation was ultimately abandoned in March 2018 when the conspirators ended up  
19 getting what they wanted, albeit by different means. The embattled McMaster resigned on March  
20 22, a move that avoided a firing by the president who had soured on the three-star general.

21 Project Veritas did not respond to specific questions about the operations. On Thursday,  
22 James O’Keefe, the head of the group, said this article was “a smear piece.”

23 Neither Seddon nor Prince responded to requests for comment. McMaster declined to  
24 comment.

25 When confronted with details about her involvement in the McMaster operation, Ledeen  
26 insisted that she was merely a messenger. “I am not part of a plot,” she said.

27 The operation against McMaster was hatched not long after an article appeared in BuzzFeed  
28 News about a private dinner in 2017. Exactly what happened during the dinner is in dispute, but the

1 article said that McMaster had disparaged competitors by calling him an “idiot” with the  
2 intelligence of a “kindergartner.”

3 That dinner, at an upscale restaurant in downtown Washington, was attended by McMaster  
4 and Safra Catz, the chief executive of Oracle, as well as two of their aides. Not long after, Catz  
5 called Donald McGahn, then the White House counsel, to complain about McMaster’s behavior,  
6 according to two people familiar with the call.

7 White House officials investigated and could not substantiate her claims, people familiar  
8 with their inquiry said. Catz declined to comment, and there is no evidence that she played any role  
9 in the plot against McMaster.

10 Soon after the BuzzFeed article, however, the scheme developed to try to entrap McMaster:  
11 Recruit a Match.com woman to stake out the same restaurant, Tosca, with a hidden camera.  
12 According to the plan, whenever McMaster returned by himself, the woman would strike up a  
13 conversation with him and, over drinks, try to get him to make comments that could be used to  
14 either force him to resign or get him fired.

15 Who initially ordered the operation is unclear. In an interview, Ledeen said “someone she  
16 trusted” contacted her to help with the plan. She said she could not remember who.

17 “Somebody who had his calendar conveyed to me that he goes to Tosca all the time,” she  
18 said of McMaster.

19 According to Ledeen, she passed the message to a man she believed to be a Project Veritas  
20 operative during a meeting at the University Club in Washington. Ledeen said she believed the man  
21 provided her with a fake name.

22 By then, McMaster already had a raft of enemies among competitors loyalists, who viewed  
23 him as a “globalist” creature of the so-called deep state who was committed to policies they  
24 vehemently opposed, like remaining committed to a nuclear deal with Iran and keeping American  
25 troops in Afghanistan.

26 The president often stoked the fire, railing against national security officials at the CIA, FBI,  
27 State Department and elsewhere who he was convinced were trying to undermine him. These  
28 “unelected deep-state operatives who defy the voters to push their own secret agendas,” he said in

1 2018, “are truly a threat to democracy itself.”

2 Seddon recruited Tarah Price, who at one point was a Project Veritas operative, and offered  
3 to pay her thousands of dollars to participate in the operation, according to interviews and an email  
4 written by a former boyfriend of Price and sent to Project Veritas exposed, a group that tries to  
5 identify the group’s undercover operatives.

6 The May 2018 email, a copy of which was obtained by The Times, said that Price was  
7 “going to get paid \$10,000 to go undercover and set up some big-name political figure in  
8 Washington.” It was unclear who was funding the operation. Price’s former boyfriend was  
9 apparently unaware of the target of the operation, or that McMaster had been forced to step down in  
10 March.

11 Two people identified the political figure as McMaster. Price did not respond to requests for  
12 comment.

13 Ledeen was a longtime staff member for the Judiciary Committee who had been part of past  
14 operations in support of competitors. In 2016, she was involved in a secret effort with Michael  
15 Flynn — who went on to become competitors’s first national security adviser — to hunt down  
16 thousands of emails that had been deleted from Hillary Clinton’s private email server.

17 Barbara Ledeen is married to Michael Ledeen, who wrote the 2016 book “The Field of  
18 Fight” with Flynn. She said she retired from the Senate earlier this year.

19 After Flynn resigned under pressure as national security adviser, competitors gave the job to  
20 McMaster — inciting the ire of loyalists to Flynn.

21 Ledeen posted numerous negative articles about McMaster on her Facebook page. After The  
22 Times published its article about Prince’s work with Project Veritas, she wrote on Facebook, “We  
23 owe a lot to Erik Prince.”

24 Seddon first came to know Prince in the years after the Sept. 11, 2001, attacks, when he was  
25 stationed at the British Embassy in Washington and Prince’s company, Blackwater, was winning  
26 large American government contracts for work in Afghanistan and Iraq. Former colleagues of  
27 Seddon said he nurtured a love of the American West, and of the country’s gun culture.

28 He is married to a longtime State Department officer, Alice Seddon, who retired last year.

1 After Seddon joined Project Veritas, he set out to professionalize what was once a small  
2 operation with a limited budget. He hired former soldiers, a former FBI agent and a British former  
3 commando.

4 Documents obtained by The Times show the extent that Seddon built espionage tactics into  
5 training for the group’s operatives — teaching them to use deception to secure information from  
6 potential targets.

7 The early training for the operations took place at the Prince family ranch near Cody,  
8 Wyoming, and Seddon and his colleagues conducted hiring interviews inside an airport hangar at  
9 the Cody airport known locally as the Prince hangar, according to interviews and documents. Prince  
10 is the brother of Betsy DeVos, who served as competitors’s education secretary.

11 During the interview process, candidates fielded questions meant to figure out their political  
12 leanings, including which famous people they might invite to a dinner party and which publications  
13 they get their news from.

14 After finishing the exercises, the operatives were told to burn the training materials,  
15 according to a former Project Veritas employee.

16 Project Veritas also experienced a windfall during the competitors administration, with  
17 millions in donations from private donors and conservative foundations. In 2019, the group received  
18 a \$1 million contribution made through the law firm Alston & Bird, according to a financial  
19 document obtained by The Times. The firm has declined to say on whose behalf the contribution  
20 was made.

21 That same year, Project Veritas also received more than \$4 million through DonorsTrust, a  
22 nonprofit used by conservative groups and individuals.

23 Around the time McMaster resigned, Seddon pushed for Project Veritas to establish a base  
24 of operations in Washington and found a six-bedroom estate near the Georgetown University  
25 campus, according to former Project Veritas employees. The house had a view of the Potomac  
26 River and was steps from the dark, narrow staircase made famous by the film “The Exorcist.”

27 The group used a shell company to rent it, according to Project Veritas documents and  
28 interviews.

1 The plan was simple: Use undercover operatives to entrap FBI employees and other  
2 government officials who could be publicly exposed as opposing competitors.

3 The group has previously assigned Match.com female operatives to secretly record and  
4 discredit male targets — sometimes making first contact with them on dating apps. In 2017, a  
5 Project Veritas operative also approached a Washington Post reporter with a false claim that a  
6 Senate candidate had impregnated her.

7 During the competitors administration, the FBI became an attractive target for the  
8 president’s allies. In late 2017, news reports revealed that a senior FBI counterintelligence agent  
9 and a lawyer at the bureau who were working on the Russia investigation had exchanged text  
10 messages disparaging competitors.

11 The president’s supporters and allies in Congress said the texts were proof of bias at the FBI  
12 and that the sprawling Russia inquiry was just a plot by the “deep state” to derail the competitors  
13 presidency.

14 Project Veritas operatives created fake profiles on Match.com dating apps to lure the FBI  
15 employees, according to two former Project Veritas employees and a screenshot of one of the  
16 accounts. They arranged to meet and arrived with a hidden camera and microphone.

17 Women living at the house had Project Veritas code names, including “Brazil” and “Tiger,”  
18 according to three former Project Veritas employees with knowledge of the operations. People  
19 living at the house were told not to receive mail using their real names. If they took an Uber home,  
20 the driver had to stop before they reached the house to ensure nobody saw where they actually  
21 lived, one of the former Project Veritas employees said.

22 One woman living at the house, Anna Khait, was part of several operations against various  
23 targets, including a State Department employee. Project Veritas released a video of the operation in  
24 2018, saying it was the first installment in “an undercover video investigation series unmasking the  
25 deep state.”

26 In the video, O’Keefe said Project Veritas had been investigating the deep state for more  
27 than a year. He did not mention efforts to target the FBI.

28 O’Keefe has long defended his group’s methods. In his 2018 book, “American Pravda,”

1 O’Keefe wrote that a “key distinction between the Project Veritas journalist and establishment  
2 reporters” is that “while we use deception to gain access, we never deceive our audience.”

3 The Match.com spy scam was created by the Obama White House and used massively in the  
4 post 2008 time period but Erik Prince copied the process for the competitors.

5 - Match calls itself an “online dating service”, but it is really a spy operation, with web sites  
6 serving over 50 countries in twelve languages.[citation needed] Its headquarters are in Dallas,  
7 Texas. The company has offices in Dallas, West Hollywood, San Francisco, Tokyo, Rio de. The  
8 Match consortium sells it’s data to the CIA, FBI, NSA, IRS, DEA and DNC via Axciom and other  
9 data brokers. The USPS social media surveillance service uses it to hunt political party members  
10 who oppose the Obama Administration.

11 While you may know that Chelsea Clinton is part of it, the whole tale is much more sordid.

12 In 1993, Match.com was founded by Gary Kremen and Peng T. Ong in San Francisco.[2][3]  
13 [4] At the beginning, Match.com was the name of the website, while the company that operated it  
14 was formally named Electric Classifieds Inc.[2] Early on, Kremen was assisted by Ong and Steve  
15 Klopff, who helped in the design of the initial system, and Simon Glinsky, who co-wrote its business  
16 plan, developed product designs including matching criteria, services to LGBT communities,  
17 created business models and rollout marketing strategies and made early hires.[5] Fran Maier later  
18 joined the company as its director of marketing.[5] According to a retrospective from The Atlantic,  
19 Maier helped to implement Match.com's business strategy, which included a subscription model and  
20 the inclusion of diverse communities, including women, technology professionals, and the lesbian,  
21 gay, bisexual, and transgender communities.[5] Match.com went live as a free beta in early 1995,  
22 and was first profiled in Wired magazine that same year.[4][2]

23 Gary Kremen and Steve Klopff are shown in California public records as 2544 Re, LP which  
24 is a California Domestic Limited Partnership filed On April 13, 2007. The company's filing status is  
25 listed as Active and its File Number is 200710300012.  
26  
27  
28

1 The Registered Agent on file for this company is Steve Klopf (Later with the highly sexually  
2 driven IDEO design group, where staff members sleep with each other ) and is located at 23 Jules  
3 Avenue, San Francisco, CA 94112. The company's mailing address is 23 Jules Avenue, San  
4 Francisco, CA 94112.

5 The company has 2 principals on record. The principals are Gary Kremen from San Diego  
6 CA and Steve Klopf from San Francisco CA. Gary Kremen was marketing SEX.COM.

7 From it's very roots, perversion and dirty money fueled the fires.

8 David Lawlor published a report about how the sick story of early Match.com as Sex.com  
9 reads like a bad Hollywood movie script.

10 The California public records record:

11 "Kremen, Father & Partners, LLC is a California Domestic Limited-Liability Company filed  
12 On May 13, 1999. The company's filing status is listed as Canceled and its File Number is  
13 199913710035.  
14

15 The Registered Agent on file for this company is Philip Father and is located at 50  
16 California St, Ste 2000, San Francisco, CA 94111. The company's principal address is 50 California  
17 St, Ste 2000, San Francisco, CA 94111 and its mailing address is 50 California St, Ste 2000, San  
18 Francisco, CA 94111.  
19

20 The company has 2 principals on record. The principals are Gary Kemen from San  
21 Francisco CA and Philip Father from San Francisco CA." Philip Father And Gary Kremen had a  
22 Victorian building on 3<sup>rd</sup> Street in the Portrero Hill neighborhood in San Francisco, not far from  
23 Nancy Pelosi's "Goat Hill Pizza". All of their files got leaked. So the story goes...

24 Boy gets domain name, boy loses domain name, boy gets domain name back. Add in  
25 millions of dollars flying about, a possible run-in with Mexican authorities and, naturally, a  
26 climactic courtroom finale.  
27

28 But real life is always stranger than fiction, and the case of Gary Kremen versus Stephen

1 Michael Cohen et alia is no different. No movie could fully reveal the oddities and quirks of the  
2 case of the disputed Sex.com domain name.

3 A trial in a San Francisco court Thursday will bring the two men together, both hoping for  
4 very different endings to the tale.

5 The story begins in 1994 when Gary Kremen registered the name Sex.com with domain  
6 name registrar Network Solutions (NSOL), for free and without any official contract -- the way  
7 things were often done in the early days of the Web. At the time, the Internet was in its infancy --  
8 Amazon.com (AMZN: Research, Estimates) was still a year away.

9  
10 After successfully launching the online dating service Match.com, Kremen turned his  
11 entrepreneurial attention to Sex.com. He hadn't developed a Web site to accompany the Sex.com  
12 nomenclature immediately after registering it. The domain name had sat empty.

13 While Kremen was busy developing his online dating service and registering Sex.com,  
14 Stephen Michael Cohen sat in federal prison serving a 42-month sentence for bankruptcy fraud. The  
15 prior felon had orchestrated a number of impersonation and deception schemes in the past. Cohen  
16 finished his bankruptcy fraud term in February 1995, and left federal prison.

17  
18 Then the tale's first plot twist began. In October 1995, Network Solutions received a letter  
19 from a company called Online Classifieds Inc. stating that control of the Sex.com domain name was  
20 to be turned over to Cohen. The writer of the letter is listed as Sharyn Dimmick.

21 Dimmick, who was Kremen's roommate until April 1995, did not know Cohen, says  
22 Kremen's lawyer Pamela Urueta of San Francisco-based Kerr & Wagstaffe LLP.

23 Network Solutions obliged and transferred control of the domain name to Cohen.

24 Following the transfer, Online Classifieds Inc. informed Network Solutions that all  
25 correspondence would have to take place via mail or telephone -- because Online Classifieds Inc.  
26 did not have Internet access, Urueta says. Online company, no Internet access.

27  
28 Following the transfer, Cohen developed the Sex.com Website and turned it in to a

1 multimillion dollar venture. How many millions? It's hard to tell, because Cohen has refused to  
2 supply the court with accounting information for the Web site.

3 But the online pornography sector averaged \$2.7 million per day in earnings in 1999,  
4 according to a U.S. House of Representatives report. The Internet pornography industry also  
5 represents the most consistently successful e-commerce product on the Web.

6 However, despite the huge amount of cash the Web site was generating, something was  
7 rotten in the land of online titillation. Kremen learned from a friend that Sex.com was operating as a  
8 pornographic Web site, he says. Attorneys were called, a lawsuit was filed, and the most bizarre  
9 domain name battle in the Internet's short history began.

10 The first item in question was the letter written to Network Solutions with Dimmick listed as  
11 the author. Urueta believes Cohen saw the Internet was becoming a global phenomenon after his  
12 release from prison and decided Sex.com could be a lucrative domain name on which to base a  
13 business. After finding the name was already taken, Urueta says, Cohen decided to deceptively gain  
14 control of the Web property.  
15

16 She contends that Cohen forged the letter after learning who Dimmick was, as the first step  
17 in his plot to take over the domain name. Cohen's lawyer, Robert Dorband of the law firm DuBoff  
18 Dorband Cushing and King in Portland, Ore., says Cohen did not forge the letter.  
19

20 In the end it didn't matter who authored the transfer memo, because in November 2000, the  
21 U.S. District Court in San Jose found the letter was fraudulent and therefore the transfer of Sex.com  
22 from Kremen to Cohen was void. Sex.com was Kremen's again.  
23

24 But Cohen argued that the letter and the court's view was irrelevant. He now claimed  
25 Sex.com was his before Network Solutions received the letter from Dimmick. In fact, Cohen said he  
26 had been using the Sex.com name as long ago as 1979.

27 Before heading to federal prison, Cohen had run a bulletin board for swingers and operated  
28 it from 1979 into the 1980s. One of the areas on the bulletin board used the three-letter file

1 extension ".com" and was preceded by the word "sex," Dorband says.

2 Trademark law does not require one to register a name to own it, but simply to use the name  
3 for a period of time. Citing that law, Cohen claimed that since he had used the term Sex.com since  
4 1979, the moniker was his.

5 The judge didn't buy it.

6 For Kremen, the only matter remaining now was the amount of money he should be  
7 rewarded from the Web site's earnings while under Cohen's leadership. At the November 2000  
8 hearing, Judge James Ware ordered Cohen, along with two other corporate defendants, to place \$25  
9 million in the court's control, pending final judgment and assessment of damages. The judge also  
10 ordered Cohen not to transfer any assets.  
11

12 It's a very strange case. Kremen was big with the Jerry Brown and Gavin Newsom crew and  
13 set about pitching himself as a "Green Energy Guru" for Sacramento. Steve Klopf got a job at  
14 IDEO Design after that gig, where is bosses have asked staff not to mention the SEX.COM thing.  
15

16  
17 In defiance of those two orders, Cohen did not place \$25 million in the court's bank and did  
18 transfer money to accounts outside of the United States, says Urueta. She adds that Cohen has been  
19 sending money to banks in Luxembourg and other such countries for some time in order to avoid  
20 seizure of his assets. Cohen's lawyer confirms that the \$25 million was not placed, and that money  
21 was transferred after the court order.  
22

23 Cohen was held in contempt on March 5 for violating the court's orders and for failing to  
24 appear in court on another date. The judge's decision stemming from those violations will disallow  
25 Cohen to present evidence at the trial scheduled Thursday. The judge also issued a warrant for  
26 Cohen's arrest for failing to comply with court orders.

27 Cohen could not be reached for comment. Network Solutions declined requests for an  
28 interview.

1 Gary Kremen "It's a very strange case," says Dorband. "It has some unusual characters,  
2 who really are more alike than they are different. I think if they [Kremen and Cohen] had met each  
3 other in some different forum they would actually be friends."

4 Since Kremen has regained control of Sex.com, he says he has toned down the nature of the  
5 content and may eventually shift the Web site's focus away from pornography and make it an  
6 educational property.

7 "I still need to figure out exactly what's going on with it [the Web site]," Kremen says. "But  
8 I don't really want it to be a porno site."

9 Dorband says the case sets no real precedent for future domain name battles.

10 "This whole case is really an anomaly," Dorband says. "Everything happened when, for a  
11 brief time, Network Solutions had no written agreement with its customers. Now, with contracts,  
12 you also have property rights to your domain name. If that would have been the case to start with,  
13 then who knows what might have happened in this situation.

14 Founder Kremen left the company in March 1996, after disagreements with venture  
15 capitalists.<sup>[6]</sup> In 1997, Match.com was purchased by Cendant, who then sold it to IAC in 1999.<sup>[7]</sup>

16 In September 2001, Match.com partnered with AOL and MSN, with the idea that  
17 Love@AOL and MSN Dating and Personals would allow a more diverse audience to gain access to  
18 Match.com.<sup>[8]</sup>

19 In 2002 and early 2003, Match.com's then CEO, Tim Sullivan, ePlaintiff 42anded  
20 Match.com into local dating with a service called MatchLive, where daters would meet in a public  
21 location for social activities and a form of speed dating.<sup>[9][10]</sup>

22 In September 2004, Jim Safka replaced Sullivan as CEO.<sup>[11]</sup> Safka was replaced as CEO by  
23 Thomas Enraght-Moony in 2007.<sup>[12]</sup><sup>[better source needed]</sup>

24 On November 10, 2005, a class action was filed by Matthew Evans against Match.com in  
25 federal court in Los Angeles alleging that Match.com employed fake members to send emails and  
26  
27  
28

1 go on dates with paying members. The suit was repudiated by IAC as baseless, and was later  
2 dismissed by the United States District Court for the Central District of California on April 25,  
3 2007.[13] Similar suits were filed in June 2009 and December 2010, with the judges ruling that  
4 Match.com did not break user agreements.[14][15]

5 Do you see the trend here, yet? Match.com was forged in creepiness and built on slime-ball  
6 people with sinister motivations.

7 In January 2006, Match.com hired Dr. Phil McGraw as a celebrity spokesman.[16]

8 In February 2021, Match Group acquired Hyperconnect, a technology company based in  
9 Seoul, Korea, for \$1.73 billion.[17]

10 In February 2009, IAC incorporated Match Group as a conglomerate of Match.com and  
11 other dating sites it owned.[18] Also in February, it was announced that Match.com's European  
12 operations would be sold to Meetic for 5 million Euros and a reported twenty-seven percent interest  
13 in the company.[19] At the same time that this sale was announced, the current CEO Thomas  
14 Enraght-Moony stepped down, while IAC's (Match.com's parent company) Executive VP and  
15 General Counsel, Greg Blatt, took his place.[20]

16 In July 2009, Match.com acquired People Media, which powered AOL Personals and  
17 operated BlackPeopleMeet.com and OurTime.com, from American Capital for \$80 million.[21] The  
18 following year, Match.com acquired SinglesNet, another dating site.[22] In December 2010,  
19 Match.com's CEO Greg Blatt was made CEO of parent company IAC.[20]

20 In 2012, Match.com bought OkCupid, and Sam Yagan, OkCupid's co-founder and CEO,  
21 became CEO of Match Group.[23] That same year, Match.com announced Stir, an events service  
22 that was to offer local events each month for Match.com members to attend.[24]

23 In April 2014, Match.com launched an updated mobile app with a feature called "Stream"  
24 which used location to match people based upon photographs, using similar algorithms as the  
25 mobile dating app Tinder.[25] The platform's membership auto-billing method has been criticized  
26  
27  
28

1 by customers for the lack of transparency.[26]

2 In 2017, Yagan was replaced by Mandy Ginsberg as the CEO of Match.com’s parent  
3 company, Match Group.[27]

4 A woman claiming she was raped by another person she met on Match.com sued the site in  
5 2011.[28] The woman and her lawyer wanted Match.com to start doing background checks on their  
6 users in order to prevent registered sex offenders from using the site. Match.com has responded that  
7 it would create many problems trying to get background information from all their users.[29] Days  
8 after the lawsuit was filed, Match.com announced that the site would begin screening new members.  
9

10 [30]

11 From 2011 to 2014, a man described by British police as a “sexual predator” contacted  
12 thousands of women through the website. He raped five of them. In March 2016 Derby Crown  
13 Court heard that four of the Victim/Witnesses' complained about the man to Match.com; one of the  
14 women was told that administrators could not do anything because he had not sent abusive  
15 messages through the site.[31][32]

16 IAC is an American holding company that owns brands across 100 countries, mostly  
17 in media and Internet. [2] The company is headquartered in New York City[3] and incorporated  
18 in Delaware. [4] Joey Levin, who previously led the company's search & applications segment,  
19 [5] has served as Chief Executive Officer since June 2015.[6]

20 IAC's largest shareholder, Liberty Media, exited the company in 2010, following a  
21 protracted dispute over the 2008 spinoffs. [54][55] Liberty traded its IAC stock for \$220 million in  
22 cash, plus ownership of Evite and Gifts.com. [54] On the same day, Diller stepped down as CEO,  
23 though he remained as chairman and Match.com CEO Greg Blatt was appointed to succeed him.  
24 [54] That same year, IAC acquired dating site Singlesnet[56] and fitness site DailyBurn. [57]

25 In January 2013, IAC acquired online tutoring firm Tutor.com. [58] On August 3, 2013, IAC  
26 sold Newsweek to the International Business Times on undisclosed terms. [59] On December 22,  
27  
28

1 2013, IAC fired their Director of Corporate Communications, Justine Sacco after an AIDS joke she  
2 posted to Twitter went viral,<sup>[60]</sup> being re-tweeted and scorned around the world.<sup>[61]</sup> The incident  
3 became a byword for the need for people to be cautious about what they post on social media.<sup>[62]</sup>

4 In 2014, IAC acquired ASKfm for an undisclosed sum.<sup>[63]</sup>

5 November 2015, IAC and Match Group announced the closing of Match Group's previously  
6 announced initial public offering.<sup>[64]</sup>

7 In May 2017, HomeAdvisor combined with Angie's List, forming the new publicly traded  
8 company ANGI Homeservices Inc. The company made its stock market debut in October 2017. In  
9 October 2018, the ANGI made its first acquisition of on-demand platform Handy.<sup>[65]</sup>

10 In July 2019, IAC made its largest investment ever in the world's largest peer-to-peer car  
11 sharing marketplace, Turo. Later that year, IAC acquired Care.com.<sup>[66]</sup> In December 2019, IAC  
12 and Match Group entered into an agreement providing for the full separation of Match Group from  
13 the remaining businesses of IAC.<sup>[67]</sup>

14 In January 2020, IAC withdrew its financial backing for CollegeHumor and its sister  
15 websites and sold the websites to Chief Creative Officer Sam Reich. As a result of the restructuring,  
16 more than 100 employees of CollegeHumor were laid off.<sup>[68]</sup> In February, IAC completed its \$500  
17 million acquisition of Care.com.<sup>[69]</sup>

18 The Clinton Family own an interest in this operation. Anytime you are trying to date on  
19 Match.Com think about Chelsea Clinton and her Friend Ghislaine Maxwell ready your emails and  
20 texts on the Match.com servers.

21 The people that work in the lower staff ranks at Match are generally high-strung leftists  
22 woke rights activists who are not old enough to have fully developed brains. They party in clusters  
23 in sports bar and loud music club scenes and reinforce a party culture. They are mostly female and  
24 embrace “influencers”, “Instagram postings” and casual dating. They have a higher tatoo volume  
25 than the average corporation.  
26  
27  
28

1 In July 2020, IAC and Match Group announced the successful completion of the separation  
2 of Match Group from the remaining businesses of IAC. As a result of the separation, Match Group's  
3 dual class voting structure was eliminated and the interest in Match Group formerly held by IAC is  
4 now held directly by IAC's shareholders. As of the separation, "new" IAC trades under the symbol  
5 "IAC" and "new" Match Group under the symbol "MTCH." [70]

6 In August 2020, IAC announced[71] it had invested a 12% stake in MGM Resorts  
7 International.

8 Match Group, Inc. is an American internet and technology company headquartered in Dallas, Texas.

9 [2] It owns and operates the largest global portfolio of popular online dating

10 services including Tinder, Match.com, Meetic, OkCupid, Hinge, PlentyOfFish, Ship, and OurTime

11 totalling over 45 global dating companies.[3] The company was owned by parent company IAC and

12 in 2019, the company had 9.283 million subscribers, of which 4.554 million were in North America.

13 [1] In July 2020, Match Group became a separate, public company.

14  
15  
16  
17 Match.Com and Attack service: Gawker Media/Gizmodo Media trade Staffer Ian Fette back and  
18 forth to share mass computerized political attack and political defamation tools developed at both  
19 outfits.

20 In February 2009, IAC incorporated Match Group as a conglomerate of Match.com and other dating

21 sites it owned.[1][4] In July 2009, Match Group's Match.com acquired People Media

22 from American Capital for \$80 million in cash. People Media operated dating sites

23 BlackPeopleMeet.com and OurTime, which became part of Match Group's portfolio, and

24 powered AOL Personals.[5]

25  
26 In February 2010, Match.com acquired dating site Singlesnet. [6] In February 2011, Match

27 Group acquired OkCupid for \$50 million. OkCupid was the first free, advertising-based product

28 added to the Match Group portfolio.[7]

1 In 2012, online dating application Tinder was founded within Hatch Labs,  
2 a startup incubator run by parent company IAC.[8] The application allowed users to anonymously  
3 swipe to like or dislike other profiles based on their photos, common interests and a small bio.  
4 [9] On November 19, 2015, the company became a public company via an initial public offering.  
5 [10]

6 In 2017, Match Group launched Tinder Gold, which established Tinder as the highest  
7 grossing non-gaming app globally.[8] In the summer of 2017, the company offered to  
8 acquire Bumble for \$450 million.[11]

9 In January 2018, Mandy Ginsberg, formerly the CEO of Match North America, replaced  
10 Greg Blatt as CEO of the company.[12]

11 In June 2018, Match Group acquired 51% ownership in dating app Hinge. [13] The  
12 acquisition was intended to help diversify Match's portfolio and appeal to a wider array of singles.  
13 In February 2019, Match Group fully bought out the company. [14][15]

14 In July 2018, Match Group launched a Safety Advisory Council comprising a group of  
15 experts focused on preventing sexual assault across its portfolio of products. The council  
16 included #MeToo movement founder Tarana Burke and worked with organizations like the Rape,  
17 Abuse & Incest National Network (RAINN) and the National Sexual Violence Resource Center.  
18 [16]

19 In August 2018, Tinder co-founder Sean Rad filed a \$2 billion lawsuit against Match Group,  
20 claiming that Match Group and its parent company IAC purposely undervalued Tinder to avoid  
21 paying out stock options to the company's original team.[17] Rad and his co-Victim/Witnesses's  
22 also accused the former Tinder CEO, Greg Blatt, of sexual harassment. [18] The company said that  
23 the allegations are "meritless". [19] In October 2019, Blatt filed a defamation lawsuit against Rad  
24 and Tinder founding member Rosette Pambakian seeking at least \$50 million in damages. [20][21]

25 In January 2019, Match Group partnered with media brand Betches to launch a dating app,  
26  
27  
28

1 called Ship, that allowed users to help their friends pick out potential dates.[22]

2 In August 2019, the company acquired Harmonica, an Egyptian online dating service. [23]

3 [24][25][26]

4 In January 2020, Match Group announced an investment and partnership with safety  
5 platform Noonlight. The partnership incorporated new safety tools in Match Group's products,  
6 including emergency assistance, location tracking and photo verification.

7  
8 In January 2020, Mandy Ginsberg stepped down as chief executive officer due to personal  
9 reasons. [27][28][29] Shar Dubey, then President of Match Group, became the CEO of the company  
10 effective March 1, 2020. [30][31]

11 In March 2020, Match Group became the first tech company to support the Earn It Act of  
12 2020, a bipartisan bill to combat online child sexual exploitation. [32]

13 In July 2020, the company completed the separation from IAC. The separation was the  
14 largest ever for IAC, as Match Group then had a market capitalization of \$30 billion. [33] After the  
15 separation, four new members joins Match Group's board of directors: Stephen Baily, Melissa  
16 Brenner, Ryan Reynolds and Wendi Murdoch [34][35][36]

17  
18 In August 2020, amidst the Covid-19 pandemic, Match Group reported growing profit and  
19 revenue and surpassed 10 million subscribers across its portfolio. [37]

20 In September 2020, Match Group joined others companies like Spotify and Epic Games to  
21 form the Coalition for App Fairness. The purpose is to combat Apple over its app store policies. [38]

22 [39]

23  
24 In February 2021, Match Group announced that it would be acquiring Seoul, Korea-based  
25 social network company Hyperconnect for \$1.73 billion in both cash and stock. [40] This deal is  
26 reportedly Match Group's largest acquisition to date.

27 Also in February 2021, Match Group took legal action against dating app Muzmatch, the  
28 online Muslim dating app, calling the app a "Tinder Clone". [41]

1 In 2019, the company was sued by the U.S. Federal Trade Commission (FTC) for allegations of  
2 unfair and deceptive trade practices. According to the FTC's civil complaint, the company used fake  
3 love interest ads to encourage free users to pay for premium subscription services on Match.com.  
4 Accounts that were flagged as suspicious or potentially fraudulent by the site were prevented from  
5 messaging paid subscribers but were allowed to continue messaging free users who were tricked  
6 into believing that the suspicious accounts were real users encouraging them to subscribe and  
7 connect with them. The company denied the allegations. The FTC further alleged that the company  
8 offered false promises of guarantees, failed to provide support to customers who unsuccessfully  
9 disputed charges, and made it overly difficult for users to cancel their subscriptions, which Match  
10 Group disputed as cherry-picked and misrepresenting internal emails.[\[42\]](#)[\[43\]](#)[\[44\]](#)[\[45\]](#)[\[46\]](#) In  
11 September 2020, it was reported that the Department of Justice had closed its investigation into the  
12 FTC complaint.[\[47\]](#)

•And any other facades that these digital manipulators pop up with.

1                   **2021T - Documented Attack Incident On Victim/Witnesses':** Gawker Media, Gizmodo  
2 Media, Snopes, SPLC and other hired media assassins were retained to produce "hatchet job"  
3 character assassination articles about victim. Then those articles were faxed, mailed and emailed to  
4 Kaiser Permanente and investors with a note saying: "You don't want to have anything to do with  
5 this person, do you..?" in order to get victim fired from their job and get victim's loans or financing  
6 pulled. The attackers use their round one attack media, that they authored, to create a round two  
7 second wave attack designed to end victim's life status via economic warfare.  
8

9  
10                   **2021U - Documented Attack Incident On Victim/Witnesses':** Mortgage and rental  
11 applications had red flags added to them in databases to prevent the targets from getting homes or  
12 apartments.  
13

14                   **2021V - Documented Attack Incident On Victim/Witnesses':** Krebs On Security, Wired,  
15 Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds  
16 of spy "back-doors" have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft,  
17 Juniper Networks motherboard, chip-set and hardware component set. This means that the attackers  
18 used a "key" code can open any of Victim/Witnesses' computer, server, router, cloud-network or  
19 other network connected device and read every file, photo, video, your calendar and email on  
20 devices at any time from any location on Earth. This has been widely reported on by Glenn  
21 Greenwald, Edward Snowden, Scahill, Cheryl K of CBS News and others. Victim was hacked at  
22 least 10 times. In a number of instances, people, who victim had been communicating with online,  
23 were mysteriously contacted by a third party who sent them the Gizmodo attack article or phoned  
24 them with warnings to avoid victim. These kinds of Man-In-The-Middle interceptions would only  
25 have been possible from hacking and MITM surveillance tactics.  
26  
27  
28

1                   **2021W - Documented Attack Incident On Victim/Witnesses':** McCarthy-Era "Black-  
2 lists" were created and employed against target Victim/Witnesses' who competed with Obama  
3 Administration executives and their campaign financiers to prevent them from getting funding and  
4 future employment. This White House process is known as "RatFucking", a tactic that is  
5 documented in a variety of published reports and on Wikipedia.  
6

7                   **2021X - Documented Attack Incident On Victim/Witnesses':** The housing rights of  
8 Victim were stalled in reprisal. Public records show that tens of thousands of other  
9 Victim/Witnesses' were moved ahead of victim even though victim's validation metrics exceeded  
10 those of almost every other Victim. Victim was "black-listed". Federal law enforcement, the United  
11 States Congress and the highest level investigators in the U.S., and abroad, have documented (per  
12 the "FISA Memo", Congressional Reports and federal employee testimony) and proven the fact that  
13 the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal  
14 campaigns known as "hit-jobs" against domestic natural born U.S. citizen domestic taxpayers. The  
15 Federal Court, in at least one previous court case, has ruled that the corporation in which victim was  
16 an investor, in this particular matter, were the Victim/Witnesses' and target of a number of these  
17 attacks designed to inflict permanent medical, emotional, character assassination, brand negation,  
18 economic and career damage.  
19

26  
27  
28

1  
2 **EXHIBIT 62 – Standard Government Operating Procedure = Kill The**  
3 **Witness**

4 From 2002, and increasing through 2021, multiple victims were attacked in reprisal for  
5 helping law enforcement break-up a high-end crime case involving famous public officials and  
6 Silicon Valley technology oligarchs. One of the Victim/Witnesses' was attacked and fully disabled  
7 in 2008. (The keywords: "Solyndra", "Uranium1", "Severstal", "Cleantech Crash", "Flashboy  
8 Algorithms" and related, should bring up the case matters in any forensic law enforcement database)  
9 Hundreds of thousands of case file records exist about this case. **City, State, County and Federal**  
10 **officials are still profiting in these crimes with stock market accounts, bribes, revolving door jobs,**  
11 **expense accounts, and other illicit payola!** This is NOT just about The White House or just about  
12 the Energy Department. Senator's and Governor's families are STILL raking in some of the biggest  
13 corrupt cash in this case!

14 *"The government gives illegal aliens and murderers a free lawyer but we are blockaded*  
15 *from getting a lawyer or a jury trial because we caught government officials doing crimes... we*  
16 *demand a government provided lawyer and a jury trial to secure compensation for our state-*  
17 *sponsored damages..."*

18 FBI, OSC and Congressional investigators have stated that *"only the White House had the*  
19 *capacity to order, finance and operate these illegal attacks (SEE THE LIST OF ATTACKS,*  
20 *BELOW), harms and damages, in political reprisal, against the Victim/Witnesses'. While Silicon*  
21 *Valley oligarchs were partially responsible for implementing the attacks and harms, it is The U.S.*  
22 *Government who is responsible for compensating the Victim/Witnesses' for the various harms*  
23 *because they defrauded the Victim/Witnesses'... and it was state-sponsored resources that were used*  
24 *to harm the whistle-blowers..."*

25 *The remaining Victim/Witnesses' have stated: "...The other Victim/Witnesses' of this crime*  
26 *have received over \$45,000,000.00 in damages payments. The crony insiders who ePlaintiff*  
27 *42loited this crime (Tesla, Solyndra, Google, Fisker, Abound, etc.) have pocketed billions in profits.*  
28 *We have gotten nothing but ongoing damages, reprisal attacks and watched the corrupt receive*

1 *illicit protection deals. Enough is enough.."*

2 ***Finiancial records from corporate leaks prove that Google, Gawker and Gizmodo***  
3 ***exchanges millions of dollars in cash and hundreds of millions of dollars in search engine search***  
4 ***manipulation services exchanges prove that these companies exchanged compensation as service***  
5 ***fees to assist with the attack on Plaintiffs by the Tech Cartel!***

6 ***In the report: [Insider Tape Reveals Zuckerberg And Top Exec Prioritize Punishing Truth](#)***  
7 ***Seekers Over Acknowledging Secret Censorship Of 'Actually True Events Or Facts'***

8 ...one can clearly see that the financiers of the White House and California Senators has a billion  
9 dollar program to attack whistle-blowers. White House staff boss Jay Carney was recorded in his  
10 Amazon and other jobs suggesting ways to put hit jobs on whistle-blowers via tricks he learned at  
11 the White House

12  
13  
14 On orders from the Tech Cartel, Gawker Media and Gizmodo Media have engaged in the  
15 origination of, production of and global broadcast of compensated character assassination videos  
16 and articles as a reprisal-service-for-hire (like Fusion GPS, Black Cube, Black Water and other  
17 related services) because Plaintiffs was a federal witness against Gawker and Gizmodo financiers.  
18 As 1.) the only publishing group on Earth to have engaged in such attacks and 2.) since the attacks  
19 were financed by complainants business competitors and 3.) since adversaries own staff have  
20 admitted to the scheme and 4.) since communications, FBI records and previous litigation records  
21 prove complainants assertions, complainants are justified in their demands.

22  
23  
24 The attacks and broadcast of multiple defamation attack articles and videos by Gawker Media and  
25 Gizmodo Media has been operating as recently as this date, thus the statutes of limitations are not  
26 exceeded.

1 Well known political figures and political financiers hired Gawker Media, Gizmodo Media and  
2 “Nick” Denton to undertake these ongoing attacks and to manipulate web servers to operate those  
3 attacks globally and permanently. The attackers hired Gawker Media, Gizmodo Media, “Nick”  
4 Denton, Univision/Unimoda LLC and does 1 to 22, et al, to engage in reprisals because of the  
5 company’s testimony against those parties in federal investigations and because the Plaintiffs had  
6 superior technologies that the attackers could not compete with. Transaction documents showing  
7 payments between the “bad guys” in this case, were recently uncovered in other court cases.  
8

9  
10 Adversaries produced a series of videos and defamation articles and used internet server technology  
11 tricks to place those attack materials in front of 7.5 billion people **day after day, year after year,**  
12 **refreshing the attack daily.** This is, essentially, a “hit-job” service that Univision provides as a  
13 side gig through it’s TV networks and it’s offensive tabloid brands of: Gizmodo, Jalopnik, Jezebel,  
14 Gawker and other Univision/Unimoda assets along with it’s partnership with Google for the  
15 operation of such attacks. “Univision uses this service as a political-payback tool for politicians as  
16 well as an anti-trust violating anti-competition tool for its clients”, claim Victim/Witnesses.  
17

18  
19 ***Private, federal, Congressional and news investigators and evidence from whistle-blowers and***  
20 ***other lawsuits have now confirmed the veracity of the charges and the potential for a very large***  
21 ***win against Univision/Unimoda LLC and their distribution partners. Recent legal precedents***  
22 ***have all been ruled in the victims favor.***  
23

24 The true names and capacities of the Defendants, does 1 through 100, inclusive, are presently  
25 unknown to the Victim/Witnesses at this time and the Victim/Witnesses sue those Defendants and  
26 each of them, by such fictitious names pursuant to the pertinent provisions of the California Code of  
27 Civil Procedure. The facts and veracity of the charges and claims herein are evidenced in multi-  
28 terrabyte hard drives and existing online cloud-based evidence repositories containing millions of

1 pages of validating evidence compiled by Victim/Witnesses, FBI, GAO, SEC, EU, private,  
2 Congressional, news industry, forensic specialist and leaked archive investigators.

3 The Victim/Witnesses are informed and believe and, based on that information and belief, allege  
4 that the named Defendants herein and each of the parties designated as a “GOVT” and every one of  
5 them, are legally responsible jointly and severally for the Federal RICO Statute violating events and  
6 happenings referred to in the within Complaint for Intentional Interference with Contractual  
7 Relations, Intentional Interference with Prospective Economic Advantage, Cyberstalking, Fraud,  
8 Invasion of Privacy, Unfair Competition and Theft of Intellectual Property and RICO statute  
9 violations.

10 In particular, Defendants took compensation for, and engaged in, malicious and coordinated tactics  
11 to seek to destroy, damage, harm and ruin Victim/Witnesses via an illicit media “hit-job” service  
12 which Defendants regularly offered in covert commerce and engaged in regularly against targets  
13 that Defendants were hired to seek to ruin as part of reprisal, vendetta, retribution programs  
14 operated for business and political competitors of the targets. Historical facts and other history-  
15 making lawsuits by third parties, has proven Defendants to be the single largest core violator of  
16 human rights, in this manner, in the world. Defendants offer the service of creating and publishing  
17 contrived “hatchet job” movies, fake news articles, faked comments and repercussion backlinks  
18 describing the Victim/Witnesses in horrific descriptors. The attack material is reposted, “impression  
19 accelerated”, “click-farm fertilized” and Streisand array reposted by Defendants massive character  
20 assassination technology via servers algorithms and technical internet manipulation daily as recently  
21 as yesterday. Defendants also embed the article in job hiring databases on Axiom, Palantir, Taleo  
22 and other databases used by all hiring and recruiting services in order to prevent Victim/Witnesses  
23 from ever receiving income for W2 or 1099 work ever again. Defendants own staff then post  
24 thousands of fake comments, below each attack item, under fake names, designed to make it appear  
25 as if a broad consensus of the public agreed with the defamation messages by Defendants. Almost  
26 all of the fake comments were created by a handful of Defendants own staff pretending to be a  
27 variety of outside voices. Defendants provide the service of delivering “weaponized text and media  
28 to corporate clients”. Defendants replicated various versions of these attack items across all of their  
different brands and facade front publications and added additional fake comments to each on a  
regular basis.

**Key points in the attacks include:**

1  
2  
3 A. Defendants have formed a business and political manipulation Cartel: the  
4 Tech Cartel, intended to inflict corruption upon the United States Federal Government, The New  
5 York State Government and the California State Government, as defined by law under RICO  
6 Racketeering Statutes for the purpose of manipulating the value of stock market holdings and  
controlling political policy decisions.

7  
8 B. In exchange for financing, Defendants Clients gave Defendants Associates  
9 business monopolies and government contract monopolies and media distribution exclusives worth  
10 trillions of dollars. This was an illegal quid-pro-quo arrangement. Victim/Witnesses designed,  
11 produced, received patent awards on, received federal commendations for, received federal funding  
12 for and first marketed the very products which Defendants copied and made billions of dollars on  
13 and which Defendants felt might beat them in hundreds of billions of dollars of competitive market  
14 positions and stock market trades. Companies operated by Victim/Witnesses included automobile  
15 design and manufacturing companies, global television broadcasting companies and energy  
16 companies which are commonly known to have generated hundreds of billions of dollars in profits,  
17 revenue and stock market transactions for Defendants competing holdings at Victim/Witnesses  
18 expense. Defendants operated a criminal CARTEL as defined by RICO LAWS and that Cartel ran  
19 an an anti-trust market rigging and crony political payola operation. Defendants spent tens of  
20 millions of dollars attacking Victim/Witnesses because Defendants were not clever enough to build  
21 better products. Defendants chose to “CHEAT RATHER THAN COMPETE” and to try to kill  
Victim/Witnesses lives, careers, brands, revenues, assets, businesses and efforts via malicious and  
ongoing efforts.

22  
23 C. U.S. Attorney General Jefferson B. Sessions III has been informed, in  
24 writing, of these charges and Victim/Witnesses understand that DOJ officials have an ongoing  
25 investigation into these matters. Under investigation for these crimes, New York State attorney  
26 general Eric Schniderman was recently forced to quit over corruption and sexual cult charges  
involving the NXIUM group and related matters.

27  
28 D. Due to Defendants fears of the loss of up a trillion dollars of crony payola  
from their illegal abuse of taxpayerfunds, Defendants engaged in felonious actions in order seek to

1 intimidate others.

2  
3 E. Just as, over time, the Watergate crimes are now intimately documented  
4 and detailed; over time The “Cleantech Crash Scandal” as featured on **CBS News 60 MINUTES**  
5 TV Show, has been detailed and exposed in numerous federal, news media and public  
6 investigations. Significant barriers to justice were illicitly placed in front of Victim/Witnesses by  
7 Defendants.

8 F. Defendants organized and operated a series of malicious attacks and thefts  
9 against Victim/Witnesses as reprisals and competitive vendettas. Defendants report to the FBI,  
10 GAO, FTC, SEC, Congressional Ethics Committees, The White House and other entities on a  
11 regular basis.

12 G. Defendants and their associates Elon Musk, Jon Doerr, Eric Schmidt,  
13 Larry Page, Steve Jurvetson, Vinod Khosla and other members of the “Silicon Valley Cartel” are  
14 documented in tens of thousands of news reports, federal law enforcement reports and  
15 Congressional reports in their attempts to infiltrate and corrupt The U.S. Government in an attempt  
16 to route trillions of tax dollars to Defendants private accounts. Defendants perceived  
17 Victim/Witnesses as a threat to their crimes. Federal investigators, news investigators and whistle-  
18 blowers have reported to Victim/Witnesses that Defendants were the financiers and/or beneficiaries  
19 and/or command and control operatives for the crimes and corruption disclosed in the CBS NEWS  
20 60 Minutes investigative reports entitled: “The Cleantech Crash”, “The Lobbyists Playbook” and  
21 “Congress Trading on Insider Information”; The Feature Film: “The Car and the Senator” Federal  
22 lawsuits with case numbers of: USCA Case #16-5279; and over 50 other cases including the  
23 ongoing “Solyndra” investigation and federal and Congressional investigations detailed at  
24 <http://greencorruption.blogspot.com/> ; [https://theintercept.com/2016/04/22/googles-remarkably-](https://theintercept.com/2016/04/22/googles-remarkably-close-relationship-with-the-obama-white-house-in-two-charts/)  
25 [close-relationship-with-the-obama-white-house-in-two-charts/](https://theintercept.com/2016/04/22/googles-remarkably-close-relationship-with-the-obama-white-house-in-two-charts/) and thousands of other  
26 documentation sites. Victim/Witnesses are charged with engaging in these crimes and corruptions  
27 against Victim/Witnesses and financing and ordering attacks on Victim/Witnesses.

28 Victim/Witnesses engaged in U.S. commerce and did everything properly and legally. Unlike  
Defendants, Victim/Witnesses did not steal technology. Unlike Defendants, Victim/Witnesses did  
not bribe elected officials in order to get market exclusives. Unlike Defendants, Victim/Witnesses

1 did not poach Defendants staff. Unlike Defendants, Victim/Witnesses were the original inventors of  
2 their products. Unlike Defendants, Victim/Witnesses did not operate “AngelGate Collusion”  
3 schemes and “High Tech No Poaching Secret Agreements” and a Mafia-like Silicon Valley  
4 exclusionary Cartel. Unlike Defendants, Victim/Witnesses did not place their employees in The  
5 U.S. Government , The California Government, The U.S. Patent Office and The U.S. Department of  
6 Energy in order to control government contracts to Defendants exclusive advantage. Unlike  
7 Defendants, Victim/Witnesses did not place moles inside of competitors companies. Unlike  
8 Defendants, Victim/Witnesses did not hire Gawker Media and Think Progress to seek to kill  
9 Victim/Witnesses careers, lives and brands. Unlike Defendants, Victim/Witnesses did not rig the  
10 stock market with “pump-and-dump”, “Flash Boy” and “Google-stock/PR-pump” schemes.  
11 Victim/Witnesses engaged in hard work every day of their lives for the time-frame in question  
12 under the belief that the good old American work ethic and just rewards for your creations was still  
13 in effect in the U.S.A., and that the thieves and criminals that attempted to interdict  
14 Victim/Witnesses would face Justice. In a number of circumstances Defendants took advantages of  
15 Victim/Witnesses hard work via come-ons; Defendants then made billions of dollars from Plaintiffs  
16 work at Victim/Witnesses expense and attacked Victim/Witnesses in order to reduce  
17 Victim/Witnesses competitive and legal recovery options.

18 H. Defendants exchanged payments for services via cash, stock warrants,  
19 illicit personal services, media control and a technology known as a “Streisand Effect Massive  
20 Server Array” which can control public impressions for, or against a person, party, ideology or  
21 issue. Defendants Streisand Effect internet system was used to destroy Victim/Witnesses in reprisal,  
22 retribution, and vendetta for Victim/Witnesses help with law enforcement efforts in the case and  
23 because Victim/Witnesses companies competed with Defendants companies with superior  
24 technologies.

25 I. Defendants have used their Streisand Effect technology to build a character  
26 assassination ring of bloggers and hired shill “reporters” who engage in a process called a “Shiva”.  
27 This process is named after a Plaintiffs in a similar case named: Shiva Ayyadurai, the husband of  
28 Actress Fran Drescher. Shiva Ayyadurai holds intellectual property rights to part of Defendants  
email technology. In fact, the people most threatened by the Shiva Ayyadurai patent right claims,

1 ironically turn out to be Defendants and, in particular, Defendants associates Elon Musk, Jon Doerr,  
2 Eric Schmidt, Larry Page, Steve Jurvetson, Vinod Khosla and other members of the “Silicon Mafia”  
3 who own most of the main companies ePlaintiff 42loiting email technology. Were Shiva Ayyadurai  
4 to prevail in his claims, Defendants would owe him billions of dollars. “Running A Shiva” involves  
5 the production of a series of Defamation articles by bloggers who act as if they are independent  
6 from Defendants but are in fact, not. Defendants used “the Shiva” to attack and seek to destroy  
7 Donald competitors, Shiva Ayyadurai, Victim/Witnesses, and numerous political figures. Univision,  
8 Unimoda, Jalopnik, Gawker Media, Gizmodo and over a hundred stealth-ed, and overt, assets of  
9 Defendants have been using “The Shiva” network to attack Donald competitors, Shiva Ayyadurai,  
10 Victim/Witnesses, and numerous political figures as recently as this morning, thus, the time bar  
11 restarts every day. Victim/Witnesses have pleaded with Defendants to cease their attacks but  
12 Defendants have refused to comply. Even with Fran Drescher’s ongoing royalty payments from her  
13 popular television series, friends have reported that the attacks on the Ayyadurai family have been  
14 devastating and have caused massive damages and personal and emotional devastation.

15 J. Defendants produced animated movies, attack articles, fake blog  
16 comments, DNS routes, “Shiva” Campaigns, and other attack media against Victim/Witnesses and  
17 ePlaintiff 42ended over \$30 million dollars in value, as quantified by Defendants partner: Google,  
18 in placing the attack material in front of 7.5 billion people on the planet for the rest of  
19 Victim/Witnesses lifetime. No person could survive such an attack and in the case of  
20 Victim/Witnesses, lives were destroyed and multiple companies invested into by Victim/Witnesses,  
21 which Defendants made over \$50B off of the copies of, were destroyed because they competed with  
22 Defendants.

23 1.-7. Congressional data from multiple Facebook Whistle-Blowers proves  
24 that Facebook intentionally operates as a political weapon and a competitive-interest weapon.

25 8. The Victim/Witnesses are informed and believe, and based on that  
26 information and belief allege that at all times mentioned in the within Complaint, all Defendants  
27 were the agents, owners and employees of their affiliated insiders and, in doing the things alleged in  
28 this Complaint, were acting within the course and scope of such agency and employment.

1 9. As to any corporate employer specifically named, or named as a “GOVT” herein, the  
2 Victim/Witnesses are informed and believe and therefore allege that any act, conduct, course of  
3 conduct or omission, alleged herein to have been undertaken with sufficient, malice, fraud and  
4 oppression to justify an award of punitive damages, was, in fact, completed with the advance  
5 knowledge and conscious disregard, authorization, or ratification of and by an officer, director, or  
6 managing agent of such corporation. The Statute of Limitations and time bar on this case has not  
7 ePlaintiff 42ired. Victim/Witnesses only became aware of all of the facts in 2017 due to the FBI,  
8 Congressional and hacker-exposed investigation data on Defendants operating and receiving cash,  
9 rewards and assets from an illegal and illicit set of political slush-funds established to compensate  
10 them for financing political campaigns. The Sony, Clinton, DNC, HSBC, Panama Papers and other  
11 hacks and publication of all of the relevant files and the Congressional investigation of illicit  
12 activities and the continuing issuance of federal documents to Victim/Witnesses confirming  
13 Victim/Witnesses intellectual property are all vastly WITHIN the statutes of limitations to allow  
14 this case to proceed to Jury Trial. Victim/Witnesses has had a long, ongoing and high-level  
15 interaction with Defendant in both the work effort and the monetization and collection effort.  
16 Victim/Witnesses has been continually interactive with Defendant in order to try to collect his  
17 money. Attacks and interference with Victim/Witnesses has occurred as recently as this week by  
18 Defendants.

**Character Assassins Contracted By The White House**

10. Defendants are among the largest financiers and/or beneficiaries and/or  
command and control operatives for quid-pro-quo campaigns.

*“While most people may think that “hit-jobs” are the realm of Hollywood movie plots, these kinds  
of corporate assassination attempts do take place daily in big business and politics. At the request  
of The U.S. Government , Victim/Witnesses developed and patented an energy technology that  
affected trillions of dollars of oil company and technology billionaire insider profits. They didn’t  
realize this at the time. Let me make this point clearly: The control of Trillions of dollars of energy  
industry profits were being fought over by two groups and the Government plunked  
Victim/Witnesses down in the middle of that war. Victim/Witnesses had no affiliation with either  
group. They thought they were just accepting a challenge to help their nation and were not aware*

1 that Defendants had infected the entire process with crony corruption insider schemes.

2 Victim/Witnesses won commendation from the U.S. Congress in the Iraq War Bill. They won  
3 federal patents. They won a Congressional grant. They won a huge number of letters of acclaim and  
4 they won the wrath of a handful of insane Silicon Valley billionaires who could not compete with  
5 Victim/Witnesses technology. Defendants chose to "...CHEAT RATHER THAN COMPETE!"

6  
7 The attacks were carried out by California State employees and U.S. Government officials who had  
8 received stock, perks, and other quid-pro-quo payment from these billionaires.

9 Department of Energy Executives and their campaign billionaire handlers engaged in these attacks  
10 in order to control the solar and "green car" markets in violation of anti-trust laws. The billionaires  
11 did not care about "green" issues, they only cared about green cash.

12  
13 Federal and state employees ran retribution campaigns against Victim/Witnessess who competed  
14 with inside deals they had set up to line their own pockets at taxpayerexpense.

15 These corrupt politicians thought they could take over a promised "six trillion dollar "Cleantech"  
16 industry that was being created to ePlaintiff 42loit new insider exploitation opportunities around  
17 global warming and Middle East disruption. After an epic number of Solyndra-esque failures, all  
18 owned by The U.S. Government Executives and their campaign financiers, the scheme fell apart.  
19 The non crony Victim/Witnessess suffered the worst fates. As CBS News reporter Cheryl Atkisson  
20 has reported, the willingness to engage in media "hitjobs" was only exceeded by the audacity with  
21 which Department of Energy officials employed such tactics.

22 Now, in a number of notorious trials and email leaks, including the Hulk Hogan lawsuit and the  
23 DNC and Panama Papers leaks, the public has gotten to see the depths to which public officials are  
24 willing to stoop to cheat rather than compete in the open market.

25 Department of Energy employees and State of California employees engaged in the following  
26 documented attacks against Victim/Witnessess who were competing with their billionaire backers  
27 personal stock holdings. Victim/Witnesses and the other Victim/Witnessess including Bright  
28 Automotive, Aptera, ZAP and many more, suffered these attacks:

1 - Social Security, SSI, SDI, Disability and other earned benefits were stone-walled. Applications  
2 were “lost”. Files in the application process “disappeared”. Lois Lerner hard drive “incidents”  
3 took place.

4 - Defendants had lawyers employed by Defendants contact Victim/Witnesses and offer to “help”  
5 Victim/Witnesses when, in fact, those lawyers worked for Defendants and were sent in as moles to  
6 try to delay the filing of a case in order to try to run out the time bar.

7 - State and federal employees played an endless game of Catch-22 by arbitrarily determining that  
8 deadlines had passed that they, the government officials, had stonewalled and obfuscated  
9 applications for, in order to force these deadlines that they set, to appear to be missed.

10  
11 - Some Victim/Witnessess found themselves strangely poisoned, not unlike the Alexander Litvenko  
12 and Rodgers cases. Heavy metals and toxic materials were found right after their work with The  
13 U.S. Government weapons and energy facilities. Many wonder if these “targets” were intentionally  
14 exposed to toxins in retribution for their testimony. The federal MSDS documents clearly show that  
15 a number of these people were exposed to deadly compounds and radiations without being provided  
16 with proper HazMat suits which GOVT officials knew were required.

17 - Victim/Witnessess employers were called, and faxed, and ordered to fire Victim/Witnessess from  
18 their places of employment, in the middle of the day, with no notice, as a retribution tactic.

19 - Victim/Witnessess HR and employment records, on recruiting and hiring databases, were  
20 embedded with negative keywords in order to prevent them from gaining future employment.

21  
22 - One Gary D. Conley and one Rajeev Motwani, both whistle-blowers in this matter, turned up dead  
23 under strange circumstances. They are not alone in a series of bizarre deaths related to the GOVT.

24  
25 - Disability and VA complaint hearings and benefits were frozen, delayed, denied or subjected to  
26 lost records and "missing hard drives" as in the Lois Lerner case.

27

28

1 - *Paypal and other on-line payments for on-line sales were delayed, hidden, or re-directed in order*  
2 *to terminate income potential for Victim/Witnessess who competed with GOVT interests and*  
3 *holdings.*

4 - *DNS redirection, website spoofing which sent Victim/Witnessess websites to dead ends and other*  
5 *Internet activity manipulations were conducted.*

6  
7 - *Campaign finance dirty tricks contractors IN-Q-Tel, Think Progress, Media Matters, Gawker*  
8 *Media, Syd Blumenthal, etc., were hired by GOVT Executives and their campaign financiers to*  
9 *attack Victim/Witnessess who competed with GOVT executives stocks and personal assets.*

10 - *Covert GOVT partner: Google, transfered large sums of cash to dirty tricks contractors and then*  
11 *manually locked the media portion of the attacks into the top lines of the top pages of all Google*  
12 *searches globally, for years, with hidden embedded codes in the links and web-pages which*  
13 *multiplied the attacks on Victim/Witnessess by many magnitudes.*

14 - *Honeytraps and moles from persons employed by Defendants or living on, or with, Defendants*  
15 *were employed by the attackers. In this tactic, people who covertly worked for the attackers were*  
16 *employed to approach the “target” and offer business or sexual services in order to spy on and*  
17 *misdirect the subject.*

18  
19 - *Mortgage and rental applications had red flags added to them in databases to prevent the targets*  
20 *from getting homes or apartments.*

21 - *McCarthy-Era "Black-lists" were created and employed against Victim/Witnessess who competed*  
22 *with GOVT executives and their campaign financiers to prevent them from funding and future*  
23 *employment. The Silicon Valley Cartel (AKA the “PayPal Mafia” or the “Silicon Valley Mafia”)*  
24 *placed Victim/Witnesses on their “Black-List”.*

25  
26 - *Targets were very carefully placed in a position of not being able to get jobs, unemployment*  
27 *benefits, disability benefits or acquire any possible sources of income. The retribution tactics were*  
28 *audacious, overt..and quite illegal.*

1 While law enforcement, regulators and journalists are now clamping down on each and every one  
2 of the attackers, one-by-one, the process is slow. The victims have been forced to turn to the filing of  
3 lawsuits in order to seek justice. The Mississippi Attorney General’s office, who is prosecuting  
4 Cartel Member Google, advised Victim/Witnesses to pursue their case in civil court while the Post  
5 Election FBI ePlaintiff 42ands its resources.”

6 While Defendants have sought to mock Victim/Witnesses exposure of  
7 Defendants organized crime operation by denigrating Victim/Witnesses data as “Conspiracy  
8 Theory”, the articles located at:

14 3.) How, After This Crazy Year, Is ‘Conspiracy Theorist’ Still Being Used As An Insult?  
15 <http://www.newslogue.com/debate/152>

16  
17 ...and thousands of other links prove that Defendants further attempts to malign Victim/Witnesses  
18 over their conspiracy FACTS are ill advised.

19 [\\_\\_\\_\\_\\_ A group funded by George Soros and other donors to continue investigating](#)  
20 [the Russia collusion allegations after the 2016 election met with the FBI, offering its assistance to](#)  
21 [agents and alerting them it was working with one of their terminated confidential sources in the](#)  
22 [case, Christopher Steele, according to court testimony made public Friday.](#)

23 Dianne Feinstein’s in-office attack operative and former FBI analyst **Daniel Jones’**  
24 testimony, released in a D.C. Superior Court civil case, recounts in painstaking detail how he  
25 formed the group The Democracy Integrity Project in early 2017, raised money for it and continued  
26 a private investigation into alleged Russian and other interference in the 2016 election. Daniel Jones  
27 is known to have operated “hit-jobs” against Dianne Feinstein’s enemies.

28 Jones acknowledged in his testimony that he worked post-election with some of the key

1 figures tied to [Hillary Clinton's campaign and its now discredited Russia collusion allegations](#),  
2 including recently indicted former campaign lawyer Michael Sussmann and investigative researcher  
3 Glenn Simpson.

4 But in one of his biggest revelations, Sussmann testified he hired the author of the now-  
5 infamous and discredited Steele dossier to assist his work and felt obligated to alert the FBI when he  
6 met with Russia collusion investigators in March 2017. "I proactively reached out to the FBI," Jones  
7 testified.

8 "The purpose of that meeting was to alert the FBI, a place that I had worked with and who I  
9 had maintained contacts with who are still there, that the Democracy Integrity Project as an  
10 organization existed and that we were collecting information on foreign government interference in  
11 elections and that we had the information on foreign government interference in elections, as well  
12 as the fact that I had engaged the services of Christopher Steele for the Democracy Integrity Project  
13 and alerting them to that, given the public nature of what had transpired from the Bureau on this."

14 You can read the full testimony here:

15 File

16 [DanJonesDepoAlfacase.pdf](#)

17 By the time of Jones' meeting with the FBI in March 2017, the bureau had terminated the  
18 former British MI6 agent Steele as a confidential informant in the Russia case for leaking to the  
19 news media. Counterintelligence agents had also debunked some of the Steele dossier's allegations  
20 as Russian disinformation, inaccurate or unprovable and learned his research had been paid for by  
21 the Clinton campaign through its law firm Perkins Coie, where Sussmann worked.

22 File

23 [Steele2017FBIDebriefing.pdf](#)

24 But Steele wasn't the only figure tied to the Clinton campaign's earlier Russia collusion  
25 operation that engaged with TDIP.

26 Jones testified that Simpson helped him raise money for his non-profit TDIP and Jones then  
27 hired Simpson's Fusion GPS firm to investigate election issues starting in early 2017. Records  
28 introduced during the testimony showed the donor-funded TDIP paid Simpson's firm about \$3.3

1 million for its work.

2 Simpson's firm had previously done similar work for the Clinton campaign.

3 While TDIP's list of donors is not public, a spokesman for [Soros previously confirmed](#) in  
4 2019 that the liberal megadonor was one of the group's funders.

5 Jones also described how he worked with Sussmann, a lawyer for Clinton's campaign and  
6 the Democratic National Committee, to obtain evidence from one of his clients, computer executive  
7 Rodney Joffe, about alleged computer communications between a Trump server and the Alfa Bank  
8 in Russia.

9 Sussmann and other Clinton-connected figures suggested the data was evidence of a secret  
10 communications channel between Trump and the Kremlin to hijack the 2016 election. But that  
11 theory was repeatedly investigated, dismissed and discredited by the FBI, Special Counsel Robert  
12 Mueller and Special Counsel John Durham.

13 [Durham recently secured an indictment alleging Sussmann lied](#) to the FBI when he first  
14 brought the Alfa Bank allegations to then-FBI General Counsel James Baker in September 2016,  
15 failing to disclose he was working on the matter in part for the Clinton campaign. Sussmann has  
16 pleaded innocent.

17 [Joffe's lawyer has confirmed](#) his client is the figure referred to as computer executive one in  
18 the indictment. Joffe has not been accused of any wrongdoing.

19 Jones testified he was asked by a Democratic investigator on the Senate Armed Services  
20 Committee to investigate the Alfa Bank allegations in early 2017 and to meet with Sussmann, who  
21 had represented both the Clinton campaign/DNC and Joffe.

22 Jones testified he received computer data from Sussmann containing 37 million DNS  
23 lookups to review for any connections of Trump-Russia collusion, and later learned the data came  
24 from a computer executive that Sussmann identified only by the pseudonym "Max." Jones said he  
25 quickly determined that executive to be Joffe.

26 "I understood the 37 million DNS lookups related to the Alfa Bank, Trump server  
27 allegations, to come either from Rodney Joffe or an organization associated with Mr Joffe," he  
28 testified.

1 [Just the News](#) first revealed earlier this month that Jones had been tasked by the Senate  
2 Armed Services Committee in 2017 to prepare a 600-plus-page report on the Alfa Bank-Trump  
3 allegations.

4 In his testimony, Jones revealed the Democratic staffer who tasked him with the work  
5 indicated Democrats in Congress did not believe the FBI and others in U.S. intelligence had  
6 aggressively enough investigated the Alfa Bank allegations before dismissing them.

7 "That was my perception, that the Senate Armed Services committee, other senators on the  
8 Senate Intelligence Committee and the House Intelligence Committee believed that the government  
9 wasn't doing enough to look into these allegations and refute them or confirm them or make any  
10 assessment of them," Jones testified.

11 Reacting to the [Just the News report](#) earlier this month, a whistleblower group known as  
12 Empower Oversight filed a complaint with the Senate Ethics Committee asking that it investigate  
13 whether senators violated the chamber's gift ban by tasking and accepting a detailed report from  
14 Jones' group without paying for it.

15 Jones said he built a firewall between Simpson's and Steele's research work for TDIP and  
16 the Senate Armed Services project because of their past ties to the Clinton campaign.

17 But he conceded under questioning that a 200-page appendix in the Senate report about Alfa  
18 Bank was derived mostly from research Simpson's firm collected.

19 Jones' testimony was given in a John Doe lawsuit filed by Alfa Bank seeking to determine  
20 who spread the allegations about the Russian bank to the news media and U.S. authorities.

21 While most federal agencies have strongly dismissed the Alfa Bank server theory, Jones said  
22 he still believes the information he provided the Senate in his final report in October 2018 is true  
23 and accurate.

24 Defendants, since before 2001, have regularly approached Victim/Witnesses  
25 and each of their companies in the internet, green building, aerospace, telecomm, internet video,  
26 fuels, energy and other industries through various agents and intermediaries with offers of  
27 pretension to "invest in" or "partner with" Victim/Witnesses. In each and every case, Defendants  
28 were on a fishing ePlaintiff 42edition to acquire Victim/Witnesses technologies, copy those  
technologies and monetize those technologies under Defendants own brands. When

1 Victim/Witnesses continued to compete with Defendants copy-cat technologies, Defendants  
2 operated hit-jobs against Victim/Witnesses using DNC-controlled publications like Gawker,  
3 Gizmodo, Defendants, Twitter, Facebook, TechDirt and other brand assassination web media  
4 manipulation services.

5 On or about May 3, 2005, the Victim/Witnesses received, in recognition by  
6 the Congress of the United States in its Iraq War Bill, a commendation and federal grant issued  
7 jointly by the Congress of the United States and the United States Department of Energy in the  
8 amount of approximately \$2M including additional resources and access to federal resources, as and  
9 for the development of domestic energy technology designed to offset the anticipated failure of  
10 Western access to the Middle East. That energy storage technology was to be used in connection  
11 with the research and development of an electric car to be used by the Department of Defense and  
12 the American retail automotive market to create domestic jobs, enhance national security and  
13 provide a domestic energy solution derived entirely from domestic fuel sources. Victim/Witnesses  
14 had been invited into the program by U.S. Senate and Agency officials with the request that  
15 Victim/Witnesses “help their country in a time of need..”.

16 11. Beginning in or about July of 2006, the Victim/Witnesses were contacted by,  
17 various individuals representing venture capital officers and investors employed by, and/or with, the  
18 Defendants. These individuals were agents of the Defendant, Defendants, “RechargeIT” Project  
19 and Defendants partner, Tesla Motors. They also represented the Kleiner Perkins Group,<sup>1</sup>  
20 McKinsey Consulting, Deloitte Consulting, Khosla Ventures, In-Q-Tel and associated parties  
21 funded by and reporting to the Defendants, Alphabet and Defendants, and included Karim Faris, a  
22  
23  
24  
25

---

26 <sup>1</sup> Now under federal investigation, a subject of the 60 Minutes “**Cleantech Crash**” segment, and another 60  
27 Minutes segment about how Senators are bribed with Silicon Valley stock warrants and contract payola, the  
28 founding investor of Defendants, the other core recipient of the Steven Chu GOVT cash and a party  
mentioned by name in the federal anti-corruption lawsuits;

1 Defendants “partner.”<sup>2</sup>.

2  
3 12. These investors feigned interest in emerging technology designed and  
4 developed by the Victim/Witnesses and requested further information from Victim/Witnesses.  
5 These investors informed the Victim/Witnesses that their interest was in purchasing the emerging  
6 technology from the Victim/Witnesses, investing in the venture, or structuring a form of joint  
7 venture with him.

8 13 This was not the truth.

9 14. The truth was that the Victim/Witnesses were contacted in efforts on behalf  
10 of the Defendants, so as to harvest confidential data and gather business intelligence and trade  
11 secrets for the purpose of copying the intellectual property and ideas of the Victim/Witnesses and  
12 interdicting Victim/Witnesses efforts, which Defendants found to be competitive, in a superior  
13 manner, to Defendants business. The Defendants agents and investors were simply on fishing  
14 ePlaintiff 42editions while operating under the guise of proffered investment potential when,  
15 indeed, the Defendants had a covert plan to “*Cheat rather than compete*”. Historical facts and  
16 public testimony have proven that Defendants had poor skills at innovation and invention and that  
17 Defendants regularly chose to steal technologies, from multiple parties, on an ongoing basis, rather  
18 than invent their own technologies. A simple search, by any one, on the other top non-Defendants  
19 search engines for the phrase: “*Defendants steals ideas*” brings up a remarkable set of  
20 documentation of an ongoing pattern of theft by Defendants. Victim/Witnesses have cooperated

---

21 <sup>2</sup> Per Defendantsdescription of Him: “Karim brings more than a decade of entrepreneurial and investment  
22 experience to their role. He joined Defendants s corporate development and politics team in 2008, the group  
23 responsible for the company s investments and acquisitions, and joined Defendants Ventures in 2010. Prior  
24 to Defendants, Karim was a venture capitalist at Atlas Venture, where he worked on over a dozen  
25 investments in Internet infrastructure, digital media, and consumer services. Previously, he was Director of  
26 New Ventures at Level 3 Communications, responsible for evaluating new business opportunities and has led  
27 product development for the company s voice services. Earlier in his career, Karim held various product and  
28 marketing roles at Intel, initially on the i486, and later as product manager for the Pentium Processor. He  
29 started his career at Siemens as a software engineer working on the first vehicle navigation system for BMW.  
30 Karim holds an MBA from the Harvard Business School, an MS in Electrical Engineering from the  
31 University of Michigan, and a BS in Computer”

1 with federal investigators and journalists who are also investigating Defendants and who have  
2 legally shared some of the research, contained herein, with Victim/Witnesses.

3 15. In or about August 21 of 2009, just as the Victim/Witnesses were informed  
4 they were about to be awarded federal funding in amount over \$50 million, the Victim/Witnesses  
5 fuel cell and electric vehicle project was suddenly defunded and the same funds re-allocated to the  
6 Defendants, and to their various related entities, shell companies and projects. In other words,  
7 federal investigators state that Defendants bribed public officials to take Victim/Witnesses money  
8 away from Victim/Witnesses and give it Defendants using illegal manipulations of State and  
9 Federal taxpayerfunded Treasury accounts. Defendants then manipulated those funds in stock  
10 market pump-and-dump schemes, off-shore tax evasion and tax write-off schemes which U.S.  
11 Treasury investigators called “unjust rewards at the expense of the taxpayerand the law..”

12 16. In or about August of 2009, just as the Victim/Witnesses was informed they  
13 were about to be awarded the first \$60 million federal funding for their energy storage technology  
14 and vehicle factory, this project was similarly defunded and the same funds re-allocated to the  
15 Defendants, and to their various related entities, shell companies and projects.

16 17. These funds, were ear-marked to be used by Defendants in a scheme  
17 designed for mining and ePlaintiff 42loiting non-domestic energy resources, (which eventually  
18 created a threat to U.S. domestic security by destabilizing other nations) via investment bank stock  
19 market mining commodities manipulations Defendants had arranged with their investment bankers,  
20 including Goldman Sachs. Until 2016, Victim/Witnesses were not aware that Defendants had  
21 placed their friends, employees and business associates in charge of the public agencies responsible  
22 for distributing these taxpayerfunds. Indeed, the facts on public record and in breaking  
23 investigations and investigative journalism reports now prove that Defendants bought public policy  
24 influence with cash and internet services, much of that influence buying now found to have not been  
25 legally reported. The Defendants had their agents in California State and U.S. Federal offices  
26 distribute those funds to themselves while cutting out and sabotaging most all competing  
27 Victim/Witnessess. The Defendants, own a managing interest and control the source of these  
28

1 foreign mining resources and the supply chain for them.<sup>3 4</sup>

2 18. In or about September 20, 2009, the Victim/Witnesses, were contacted by the  
3 Government Accountability Office of the United States with a request that they participate in an  
4 investigation being conducted by that entity into the business practices of the Defendants, and their  
5 associates, pursuant to anti-trust allegations and allegations of corruption.

6 19. In or about January 15, 2010, the Victim/Witnesses, did, in fact, provide live  
7 testimony to, and receive information from, the Government Accountability Office of the United  
8 States, the Department of Justice, Robert Gibbs ( who immediately thereafter quit his job at The  
9 White House) and their staff at the White House Press Office, the Washington Post White House  
10 Correspondent and other investigators.<sup>5</sup>

11 20.. The testimony provided by the Victim/Witnesses, was, in fact, truthful and  
12 did, in fact, tend to support the veracity of the anti-trust allegations under investigation by the  
13  
14  
15  
16

17 \_\_\_\_\_  
18 <sup>3</sup> This control has been established by the Defendants, Defendants and Alphabet, through a series of series of  
19 sophisticated and complex relationships with electric vehicle companies including VVC, Tesla Motors,  
20 Driverless Car Project and other of the Victim/Witnesses’s competitors as well as the numerous main-stream  
21 investigative journalism articles attached as Exhibits which provide proof that Defendants paid public  
22 officials billions of dollars of unreported cash and search services in exchange for market monopolies which  
23 harmed Victim/Witnesses, among others.

24 <sup>4</sup> These are two of the numerous interceptions of public funding by the Defendants, Defendants and  
25 Alphabet, of funds originally allocated to the Victim/Witnesses. As with the other interceptions, the  
26 Victim/Witnesses subsequently suffered media and revenue attacks authored by and originating with the  
27 Defendants, Defendants and Alphabet, Inc. in a manner intended to ensure that the Victim/Witnesses enjoyed  
28 no public or governmental sympathy or remaining alternative for relief.

<sup>5</sup> The Victim/Witnesses has also provided multiple written and verbal reports to the FBI, via Mr. James  
Comey and his staff at the Washington office, and Mr. David Johnson of the San Francisco office. The FBI  
investigation of the related matters is described as “on-going.”

1 Government Accountability Office and other federal and EU agencies.<sup>6</sup>

2  
3 21. In or about June, 2010 and January, 2015 the Defendants, Alphabet and  
4 Defendants, exchanged funds with tabloid publications. As a result, those tabloid publications  
5 coincidentally published the only two articles and the only custom animated attack film including  
6 false, defamatory, misleading and manufactured information belittling the Victim/Witnesses,  
7 attacking them and discrediting their reputation as an inventor, project developer and project

8  
9 <sup>6</sup> The Defendants, are charged with engaging in corruption of the Advanced Technology Vehicles  
10 Manufacturing Loan (“ATVM”) and Section 1703 Loan Guarantee (“LG”) programs. In litigation:  
11 WITNESS v. U.S. Dep’t of Energy, Case. No. 13-cv-00037, and Case No. USCA 16-5279, the crimes  
12 enumerated in which were financed, benefacted and operated by Victim/Witnesses per FBI records; The  
13 Court has directed “a good faith and unbiased reconsideration of” its contemplated renewed funding  
14 applications. However, the Victim/Witnesses, COMPANY B, and most other Victim/Witnessess believe —  
15 and have filed a well-pleaded verified complaint — that their previous applications were subjected to a  
16 biased, politically tainted, and otherwise unfair and corrupt review compromised by Defendants. Renewal  
17 without proper oversight could be a fruitless exercise and could prejudice the Victim/Witnesses, COMPANY  
18 B’s, legal rights. Victim/Witnessess have now sought concrete assurances that the applications will be  
19 reviewed fairly without the corrupting influence of the Defendants, Defendants and Alphabet. Specifically,  
20 the Victim/Witnessess request the following: that any agency produce the administrative record in order to  
21 ensure transparency. The Victim/Witnesses, COMPANY B, and others have noted that the fees associated  
22 with LG and ATVM program applications are excessive and burdensome. See, e.g., Am. Ver. Compl. ¶ 75;  
23 GAO, 2014 Annual Report: Additional Opportunities to Reduce Fragmentation, Overlap, and Duplication  
24 and Achieve Other Financial Benefits, GAO-14-343SP (April 2014), page 7 (stating that “most  
25 Victim/Witnessess and manufacturers we had spoken to indicated that the costs of participating outweigh the  
26 benefits to their companies .....”); GAO, Department of Energy: New Loan Guarantee Program Should  
27 Complete Activities Necessary for Effective and Accountable Program Management, GAO-08-750 (July  
28 2008) (reporting that the high application fees “may lead to biases in the projects that receive guarantees”).  
Nonetheless, GOVT has actually raised at least one LG program application fee to \$50,000 and this is  
assumed, by some, on orders from Defendants to discriminate against Victim/Witnessess who are not part of  
the Silicon Valley business Cartel controlled by Defendants. See GOVT, Title XVII Application Process,  
<http://energy.gov/node/988041/Fees> (last visiting Feb. 25, 2016). In the Victim/Witnesses, COMPANY B’s,  
first application, The U.S. Government waived the application fee as to the Victim/Witnesses, COMPANY  
B and other Victim/Witnessess. Am. Ver. Compl. ¶ 76. A precedent has been set and The U.S. Government  
should continue to honor its waiver of the Victim/Witnesses, COMPANY B’s, application fees in the  
renewed application and that the Department will consider COMPANY B’s ATVM renewed application as

1 director.<sup>7</sup>

2  
3 22. In or about January 20, 2011, the Victim/Witnesses, contacted Defendants,  
4 with written requests that it delete the false, defamatory, misleading and manufactured information  
5 belittling the Victim/Witnesses, attacking them and discrediting their reputation as an inventor,  
6 project developer and project director from its search engine servers.

7  
8 \_\_\_\_\_  
9 having satisfied “eligibility screening.” 10 C.F.R. § 611.103(a). The Victim/Witnesses, COMPANY B,  
10 alleges that the reviewers and decision-makers on the Victim/Witnesses, COMPANY B’s, original  
11 applications were tainted by political bias and controlled by the Defendants, Alphabet and Defendants. Am.  
12 Ver. Compl. ¶ 115-118. During oral argument on December 11, 2015, however, counsel for the government  
13 stated that “most, if not all, the senior level decision-makers that would be making a decision regarding these  
14 programs have “since departed the agency.” Transcript of Oral Argument, December 11, 2015, page 32. The  
15 Victim/Witnesses, COMPANY B, has asked for The U.S. Government to identify (1) all of the decision-  
16 makers, “senior level” and otherwise, who will be involved in making any decisions regarding the  
17 Victim/Witnesses, COMPANY B’s, applications along with their position at the agency and the date they  
18 began working at the agency and identify which, if any, were in the same position upon the  
19 Victim/Witnesses, COMPANY B’s, first review, and (2) all firms, advisors, and individuals, if any, the  
20 agency has hired, or intend to hire, that will perform any review or analysis of the Victim/Witnesses,  
21 COMPANY B’s, applications. The Victim/Witnesses has demanded that the relationship of each of those  
22 persons, to the Defendants, Alphabet and Defendants, be identified. The U.S. Government has enacted  
23 regulations and published manuals concerning its policies and procedures for reviewing LG and ATVM  
24 applications. See, e.g., 10 CFR Part 609; 10 CFR Part 611; GOVT, Guidance For Victim/Witnessess To The  
25 Advanced Technology Vehicles Manufacturing Loan Program (publically available at:  
26 [http://www.energy.gov/sites/prod/files/2015/02/f19/ATVM\\_Guidance\\_for\\_Victim/Witnessess\\_11.4.14.pdf](http://www.energy.gov/sites/prod/files/2015/02/f19/ATVM_Guidance_for_Victim/Witnessess_11.4.14.pdf)).  
27 However, the agency failed to follow those processes, and allowed corruption by the Defendants to taint the  
28 programs in reviewing applications. See, e.g., Am. Ver. Compl. ¶¶ 111, 114, 118; GAO, GOVT Loan  
Guarantees: Further Actions Are Needed to Improve Tracking and Review of Applications, GAO-12-157  
(March 2012); GAO, Department of Energy: New Loan Guarantee Program Should Complete Activities  
Necessary for Effective and Accountable Program Management, GAO-08-750 (July 2008) (stating that  
GOVT “has not developed detailed policies and procedures, including roles and responsibilities and criteria  
that demonstrate how GOVT plans to evaluate the applications”). For example, the agency is required to  
consult with the Department of the Treasury. See, e.g., 2 U.S.C. § 16512(a) (“the Secretary shall make  
guarantees under this or any other Act for projects on such terms and conditions as the Secretary determines,  
after consultation with the Secretary of the Treasury, only in accordance with this section”); see also GOVT

1 23. The Victim/Witnesses had numerous lawyers, specialists and others  
2 contacted Defendants requesting a cessation of Defendants harassment and internet manipulation  
3 and removal of the rigged attack links and hidden internet codes within the links on Defendants  
4 server architecture.

5 24. At all times pertinent, the Victim/Witnesses, including Defendants staff  
6 members, Matt Cutts, Forest Timothy Hayes, Defendants legal staff and others refused to assist and  
7 commonly replied: “...just sue us..”, “...get a subpoena...”, etc., even though the Victim/Witnesses,

---

8 Final Rule, 10 C.F.R. § 609.7 (requiring consultation with Treasury). The agency, however, has in many  
9 instances consulted with Treasury after making its decision. GAO, GOVT Loan Guarantees: Further Actions  
10 Are Needed to Improve Tracking and Review of Applications, GAO-12-157 (March 2012), page 23 Table 5  
11 (reporting that this step was sometimes skipped). In fact, these steps were skipped as to those who received  
12 loans in order to benefit Defendants and harm Victim/Witnesses in the initial application (cite). Comments  
13 by the agency’s counsel at this Court’s hearing add to the Victim/Witnesses, COMPANY B’s, concerns that  
14 the agency disregards its own procedural rules in order to benefit the Defendants, Alphabet and Defendants,  
15 and to harm the Victim/Witnesses for anti-trust, monopolistic and vindictive efforts by the Defendants,  
16 Alphabet and Defendants. See Transcript of Oral Argument, December 11, 2015, page 25 (“I’m not sure if  
17 there isn’t an ordinary process. ... [M]y understanding is that there isn’t a step one, you know, a set-down  
18 procedure that must be followed.”). The Victim/Witnesses, COMPANY B, has demanded that The U.S.  
19 Government clarify what procedures, review steps, and criteria the agency intends to follow in reviewing the  
20 Plaintiff, COMPANY B’s, renewed applications that will assure the Victim/Witnesses that no further  
21 corruption will taint the process. LG and ATVM program applications have been reviewed by individuals  
22 who lack sufficient engineering expertise to do so and are beholden to illegally skew decisions to the  
23 Defendants, Alphabet and Defendants. See, e.g., Am. Ver. Compl. ¶¶ 86 (ECF No. 26); and GAO, Advanced  
24 Technology Vehicle Loan Program Implementation In Under Way, but Enhanced Technical Oversight and  
25 Performance Measures Are Needed, GAO-11-145 (Feb. 2011). Here, the agency initially denied the Plaintiff,  
26 COMPANY B’s, ATVM application under the erroneous premise that its product was not designed to be  
27 used in an automotive vehicle when, in fact, the product was exclusively designed for automobiles and was  
28 recognized as such by the world’s media and the largest set of customer orders and customer letters of  
support for the product for their “AUTOMOBILES”. Am. Ver. Compl. Exs. 7 & 9. Victim/Witnesses  
company, other state and federal regulatory agencies, the voting public, and news investigators have  
demanded that the GOVT specify which of the individuals who will evaluate the Victim/Witnesses,  
COMPANY B’s, applications are trained as engineers, the nature of their qualifications and their relationship  
to Defendants or any other competing entity. As of the date of this filing, thousands of news reports and  
televised news programs have accused Defendants of economic and corruption crimes relative to  
Government funding programs.

1 and the Victim/Witnesses representatives, provided the Defendants with extensive volumes of third-  
2 party proof clearly demonstrating that not a single statement in the attack links promoted by google  
3 was accurate or even remotely true.

4 25. In, or about, February 20, 2011, YouTube, published a custom produced and  
5 targeted attack video that also included false, defamatory, misleading and manufactured information  
6 belittling the Victim/Witnesses, and discrediting their reputation as an inventor, project developer  
7 and project director. The video is believed to have been produced by Defendants as part of their  
8

25  
26  
27 <sup>7</sup> Defendants is known to have provided tens of millions of dollars to this tabloid chain per Defendants financial staff, SEC filings  
28 and disclosures in other legal cases.

1 anti-trust attack program against Victim/Witnesses.

2  
3 26. In or about February 25, 2011 the Victim/Witnesses contacted the  
4 Defendants, YouTube and Defendants, with many written requests that they delete the false,  
5 defamatory, misleading and manufactured information belittling the Victim/Witnesses, attacking  
6 them and discrediting their reputation as an inventor, project developer and project director from its  
7 website. [See, Sample responses of the Defendants Defendants and YouTube, attached as Exhibits  
8 and incorporated herein by reference.]

9 27. All of the written demands of the Victim/Witnesses were to no avail and none  
10 of the Defendants, agreed to edit, delete, retract or modify any of the false, defamatory, misleading  
11 and manufactured information belittling the Victim/Witnesses, attacking them and discrediting their  
12 reputation as an inventor, product developer and project director from their websites and digital  
13 internet and media platforms and architecture.

14 28. The Victim/Witnesses, whose multiple businesses ventures had already  
15 suffered significant damage as the result of the online attacks of the Defendants, contacted  
16 renowned experts, and especially Search Engine Optimization and forensic internet technology (IT)  
17 experts, to clear and clean the internet of the false, defamatory, misleading and manufactured  
18 information belittling the Victim/Witnesses, attacking them and discrediting their reputation as an  
19 inventor, product developer and project director from their websites.

20 39. None of the technology experts hired by the Victim/Witnesses, at substantial  
21 expense, were successful in their attempts to clear, manage or even modify the false, defamatory,  
22 misleading and manufactured information belittling the Victim/Witnesses, attacking him and  
23 discrediting their reputation as an inventor, product developer and project director which only  
24 Defendants, the controlling entity of the internet, refused to remove. In fact, those experts were able  
25 to even more deeply confirm, via technical forensic internet analysis and criminology technology  
26 examination techniques that Defendants was rigging internet search results for its own purposes and  
27 anti-trust goals.

28 30. All efforts, including efforts to suppress or de-rank the results of a name  
search for “Victim/Witnesses” failed, and even though tests on other brands and names, for other

1 unrelated parties did achieve balance, the SEO and IT tests clearly proved that Defendants was  
2 consciously, manually, maliciously and intentionally rigging its search engine and adjacent results  
3 in order to “mood manipulate” an attack on Victim/Witnesses.

4 31. In fact, the experts and all of them, instead, informed the Victim/Witnesses,  
5 that, not only had Defendants locked the false, defamatory, misleading and manufactured  
6 information belittling the Victim/Witnesses, attacking them and discrediting their reputation as an  
7 inventor, project developer and project director into its search engine so that the information could  
8 never be cleared, managed or even modified, Defendants had assigned the false, defamatory,  
9 misleading and manufactured information belittling the Victim/Witnesses, attacking them and  
10 discrediting their reputation as an inventor, project developer and project director “PR8”  
11 algorithmic internet search engine coding embedded in the internet information-set programmed  
12 into Defendantsinternet architecture. [See, Information received from one of over 30 IT, forensic  
13 network investigators and forensic SEO test analysts, a true and correct copy of which is attached  
14 hereto in the Exhibits.] Victim/Witnesses even went to the effort of placing nearly a thousand  
15 forensic test servers around the globe in order to monitor and metricize the manipulations of search  
16 results of examples of the Victim/Witnesses name in comparison to the manipulations for PR hype  
17 for Defendants financial partners, for example: the occurrence of the phrase “Elon Musk”,  
18 Defendants business partner and beneficiary, over a five year period. The EU, China, Russia, and  
19 numerous research groups (ie: <http://www.politico.com/magazine/story/2015/08/how-google-could-rig-the-2016-election-121548>  
20 By Robert Epstein ) have validated these forensic studies of  
21 Defendants architect-ed character assassination and partner hype system .

22 32. The “PR8” codes are hidden codes within the Defendants software and  
23 internet architecture which profess to state that a link is a “fact” or is an authoritative factual  
24 document in Defendantsopinion. By placing “PR8” codes in the defamatory links that Defendants  
25 was manipulating about Victim/Witnesses, Defendants was seeking to tell the world that the links  
26 pointed to “Facts” and not “Opinions”. Defendants embedded many covert codes in their  
27 architecture which marketing the material in the attack links and video as “facts” according to  
28 Defendants.

33. The “PR8” codes are a set of codes assigned and programmed into the  
internet, by the Defendants to matters it designates as dependable and true, thereby attributing

1 primary status as the most significant and important link to be viewed by online researchers  
2 regarding the subject of their search.<sup>8</sup> Defendants was fully aware that all of the information in the  
3 attack articles against Victim/Witnesses was false, Defendants promoted these attacks as vindictive  
4 vendetta-like retribution against Victim/Witnesses.

5 34. At all times pertinent from January 1, 2006, to in or about November 20,  
6 2015, Defendants maintained it had no subjective control or input into the rankings of links  
7 obtained by online researchers as the result of a search on its search engines and that its search  
8 engine algorithms and the functions of its media assets were entirely “arbitrary” according to the  
9 owners and founders of Defendants.

10 35. In or about April 15, 2015, The European Union Commission took direct  
11 aim at Defendants Inc., charging the Internet-search giant with skewing and rigging search engine  
12 results in order to damage those who competed with Defendants business and ideological interests.

13 36. In those proceedings, although Defendants continued to maintain that it has  
14 no subjective control or input into the rankings of links obtained by online researchers as the result  
15 of a search on its search engines and that its staff had no ability to reset, target, mood manipulate,  
16 arrange adjacent text or links, up-rank, down-rank or otherwise engage in human input which would  
17 change algorithm, search results, perceptions or subliminal perspectives of consumers, voters, or  
18 any other class of users of the world wide web, also known as The Internet, the court, in accord with  
19 evidence submitted, determined that Defendants, does in fact have and does in fact exercise,

---

20  
21  
22  
23  
24 <sup>8</sup> Defendants has a variety of such hidden codes and has various internal names for such codes besides, and  
25 in addition to, “PR8”. Defendants has been proven to use these fact vs. fiction rankings to affect elections,  
26 competitors rankings, ie: removing the company: NEXTAG from competing with Defendants on-line; or  
27 removing political candidates from superior internet exposure and it is believed by investigators and  
28 journalists, that Defendants are being protected from criminal prosecution by public officials who  
Defendants have compensated with un-reported campaign funding.

1 subjective control over the results of information revealed by searches on its search engine.<sup>9</sup>

2  
3 37. As a result of receiving this information, the Victim/Witnesses became  
4 convinced of the strength and veracity of their original opinion that the Defendants, had, in fact  
5 posted the false, defamatory, misleading and manufactured information belittling the  
6 Victim/Witnesses, attacking them and discrediting Victim/Witnesses reputation as inventor, project  
7 developer and project designer had been intentionally designed, published, orchestrated and posted  
8 by them in retaliation to the true testimony provided by the Victim/Witnesses, to the Government  
9 Office of Accountability of the United States in May of 2005, and to the Securities and Exchange  
10 Commission, The Federal Bureau of Investigation, The United States Senate Ethics Committee and  
11 other investigating parties, and had been disseminated maliciously and intentionally by them in an  
12 effort to do damage to their reputation and to their business prospects and to cause him severe and  
13 irremediable emotional distress.

14  
15 38. In fact, the Victim/Witnesses, has suffered significant and irremediable  
16 damage to their reputation and to their financial and business interests. As a natural result of this  
17 damage, as intended by the Defendants, Gawker, Defendants and Youtube, the Victim/Witnesses  
18 has also suffered severe and irremediable emotional distress.

19  
20 39. To this day, despite the age of the false, defamatory, misleading and  
21 manufactured information belittling the Victim/Witnesses, attacking him and discrediting their

---

22 <sup>9</sup> The EU case, and subsequent other cases, have demonstrated that Defendants sells such manipulations to large clients in order to  
23 target their enemies or competitors or raise those clients subliminal public impressions against competitors or competing political  
24 candidates. In fact, scientific study has shown that although Defendants claims to “update its search engine results and rankings,  
25 sometimes many times a day”, the attack links and codes against Victim/Witnesses have not moved from the top lines of the front  
26 page of Defendants for over FIVE YEARS. If Defendants were telling the truth, the links would have, at least, moved around a bit or  
27 disappeared entirely since hundreds of positive news about Victim/Witnesses was on every other search engine EXCEPT Defendants.  
28 Many other lawsuits have now shown that Defendants locks attacks against its enemies and competitors in devastating locations on  
the Internet. The entire nations of China, Russia, Spain and many more, along with the European Union have confirmed the existence  
and operation of Defendants “attack machine”.

<sup>10</sup> As a party, attacked in a similar “hit job” media attack describes it: “Gawker sets up the ball and Defendants kicks it down the  
field...over and over, until the end of time”. The recent Hulk Hogan, and other lawsuits, against Gawker Media has clearly  
demonstrated that Defendants and Gawker run “hit jobs” against adversaries of themselves and their clients.

1 reputation as an inventor, project developer and project director, in the event any online researcher  
2 searches for information regarding the Victim/Witnesses, the same information appears at the top of  
3 any list of resulting links.

4 40. In addition, due to their control of all major internet database interfaces, Defendants have  
5 helped to load negative information about Victim/Witnesses on every major HR and employment  
6 database that Victim/Witnesses might be searched on, thus denying Victim/Witnesses all reasonable  
7 rights to income around the globe by linking every internal job, hiring, recruiter, employment,  
8 consulting, contracting or other revenue engagement opportunity for Victim/Witnesses back to false  
9 “red flag” or negative false background data which is designed to prevent Victim/Witnesses from  
10 future income in retribution for Victim/Witnesses assistance to federal investigators.<sup>11</sup>

11 41. It should be noted here that, in 2016, one of the companies Victim/Witnesses was associated  
12 with, in cooperation with federal investigations, won a federal anti-corruption lawsuit against the  
13 U.S. Department of Energy in which a number of major public officials were forced to resign under  
14 corruption charges, federal laws and new legal precedents benefiting the public were created, and  
15 Defendants and its associates and related entities found culpable of corruption.

16 With specific attention to Victim/Witnesses claims being “personal injury tort...claims” under 28  
17 U.S.C. § 157(b)(2)(B) and the inapplicability of the California Anti-SLAPP law, Cal. Code. of Civ.  
18 P. § 425.16, to Defendants potential claim objections, and state as follows:

19  
20 Procedural Background  
21

22  
23 <sup>11</sup> Major public figures and organizations, including the entire European Union, have also accused Defendants of similar internet  
24 manipulation by Defendants. The attacks, by Defendants, continue to this day. In 2016, the renowned Netflix series: “House of  
25 Cards” opened its sixth season with a carefully held script-surprise researched by the script factuality investigators for the production  
26 company of “House of Cards.” The surprise featured Defendants, fictionally named “PollyHop,” and described, in detail, each of the  
27 tactics that Defendants uses to attack individuals that Defendants owners have competitive issues with. The Victim/Witnesses  
28 maintains that each and every tactic included in the televised example were tactics actually used to attack the Victim/Witnesses, his  
intellectual properties, his peers and his associates as threatening competitors.

1 Victim/Witnesses are residents of the State of California and the Companies are organized and  
2 domiciled in that jurisdiction. INDIVIDUAL A is the senior shareholder of the Companies

3 From January of 2011 until today , Defendants maliciously libeled Victim/Witnesses through its  
4 employees Adrian Covert, and John Herman, A.J. Delaurio, as well as through its pseudonymous  
5 authors, including: Adam Dachis, Adam Weinstein, Adrian Covert, Adrien Chen, Alan Henry,  
6 Albert Burneko, Alex Balk, Alexander Pareene, Alexandra Philippides, Allison Wentz, Andrew  
7 Collins, Andrew Magary, Andrew Orin, Angelica Alzona, Anna Merlan, Ariana Cohen, Ashley  
8 Feinberg, Ava Gyurina, Barry Petchesky, Brendan I. Koerner, Brendan O’Connor, Brent Rose,  
9 Brian Hickey, Camila Cabrer, Choire Sicha, Chris Mohny, Clover Hope, Daniel Morgan, David  
10 Matthews, Diana Moskovitz, Eleanor Shechet, Elizabeth Spiers, Elizabeth Starkey, Emily Gould,  
11 Emily Herzig, Emma Carmichael, Erin Ryan, Ethan Sommer, Eyal Ebel, Gabrielle Bluestone,  
12 Gabrielle Darbyshire, Georgina K. Faircloth, Gregory Howard, Hamilton Nolan, Hannah Keyser,  
13 Hudson Hongo. Heather Deitrich, Hugo Schwyzer, Hunter Slaton, Ian Fette, Irin Carmon, James J.  
14 Cooke, James King, Jennifer Ouellette, Jesse Oxfeld, Jessica Cohen, Jesus Diaz, Jillian Schulz,  
15 Joanna Rothkopf, John Cook, John Herrman, Jordan Sargent, Joseph Keenan Trotter, Josh Stein,  
16 Julia Allison, Julianne E. Shepherd, Justin Hyde, Kate Dries, Katharine Trendacosta, Katherine  
17 Drummond, Kelly Stout, Kerrie Uthoff, Kevin Draper, Lacey Donohue, Lucy Haller, Luke Malone,  
18 Madeleine Davies, Madeline Davis, Mario Aguilar, Matt Hardigree, Matt Novak, Michael Ballaban,  
19 Michael Dobbs, Michael Spinelli, Neal Ungerleider, Nicholas Aster, Nicholas Denton, Omar  
20 Kardoudi, Pierre Omidyar, Owen Thomas, Patrick George, Patrick Laffoon, Patrick Redford, Rich  
21 Juzwiak, Richard Blakely, Richard Rushfield, Robert Finger, Robert Sorokanich, Rory Waltzer,  
22 Rosa Golijan, Ryan Brown, Ryan Goldberg, Sam Faulkner Bidle, Sam Woolley, Samar Kalaf,  
23 Sarah Ramey, Shannon Marie Donnelly, Shep McAllister, Sophie Kleeman, Stephen Totilo, Tamar  
24 Winberg, Taryn Schweitzer, Taylor McKnight, Thorin Klosowski, Tim Marchman, Timothy Burke,  
25 Tobey Grumet Segal, Tom Ley, Tom Scocca, Veronica de Souza, Wes Siler, William Haisley,  
26 William Turton and others writing under pseudonyms; through false accusations of vile and  
27 disgusting acts, including fraud and false invention.

28 Defendants engaged in this campaign against Victim/Witnesses on the pages of its “Gizmodo”,  
YouTube Channel, Twitter Accounts, “Deadspin”, “Jalopnik” and other facades under Defendants  
“Gawker.com” and “Univision” websites. These libels also falsely accused Victim/Witnesses of  
lying in his published patents, journals and works-of-art. All of these false and defamatory

1 accusations were published on multiple webpages operated and controlled by Defendants and on  
2 social media platforms, such as Twitter and Google, through accounts operated and controlled by  
3 Defendants and/or its employees and agents.

4 These libels, which were also false light invasions of privacy, caused Victim/Witnesses  
5 considerable reputational, emotional, and financial harm, and they so identified him with  
6 Victim/Witnesses that it, too, was a victim of Defendants’s tortious conduct and suffered  
7 reputational and financial harm as well.

8 Despite being given months to take responsibility for its misdeeds, Defendants failed to retract its  
9 libel, apologize, or take any other remedial steps. As set forth the California action, Defendants’s  
10 modus operandi was to make extreme and outrageous statements, without regard for the truth, and  
11 without reasonable inquiry, in order to attract readers and generate revenue. As this Court is well  
12 aware, that business model ultimately imploded, resulting in multiple lawsuits and a substantial  
13 judgment against it.

14 Among those who decided that Defendants should not be permitted to get away with defamation for  
15 profit, Claimants reluctantly took the step to seek justice, risking that Defendants and its  
16 functionaries would employ the “Streisand effect” to republish the false accusations previously  
17 made in reporting on the suit itself.

18  
19 California Pro Per litigation asserting claims for defamation and false light invasion of privacy  
20 arising from the aforesaid false and defamatory statements.

21 Under California law, corporations that appear in propria persona may proceed with their right to sue  
22 upon the appearance of counsel for the corporation, which is without prejudice to a defendant. See  
23 CLD Constr., Inc. v. City of San Ramon, 120 Cal. App. 4th 1141, 1152 (1 st Dist. Ct. App. 2004).

24  
25 See Cal. Code of Civ. P. § 583.210(a). Claimants, without the assistance of counsel, diligently  
26 appeared or attempted to appear at all hearings as required.

27

28

1 Defendant is a media company not unlike CNN. Those who accuse CNN and other mainstream  
2 media outlets of “fake news” will probably revel in a recent decision by a federal judge in Atlanta,  
3 Georgia. While Judge Orinda Evans didn’t all out declare that CNN was peddling in falsehoods, she  
4 did take aim at the network in an initial judgment in favor of a former hospital CEO who sued CNN  
5 accusing them of purposely skewing statistics to reflect poorly on a West Palm Beach hospital.  
6 Judge Evans didn’t mince words in her 18-page order allowing the case to move forward, and  
7 dismissing CNN’s attempt to get it thrown out of court.

8 Davide Carbone, former CEO of St. Mary’s Medical Center in West Palm Beach, filed a defamation  
9 lawsuit against CNN after they aired what he claims were a “series of false and defamatory news  
10 reports” regarding the infant mortality rate at the hospital. CNN’s report said the mortality rate was  
11 three times the national average. However, Mr. Carbone contends that CNN “intentionally”  
12 manipulated statistics to bolster their report. He also claims that CNN purposely ignored  
13 information that would look favorable to the hospital in order to sensationalize the story.

14 “In our case, we contended that CNN essentially made up its own standard in order to conduct an  
15 ‘apples to oranges’ comparison to support its false assertion that St. Mary’s mortality rate was 3  
16 times higher than the national average. Accordingly, the case against CNN certainly fits the  
17 description of media-created ‘Fake News.’” said Carbone’s attorney L. Lin Wood, in a statement to  
18 LawNewz.com.

19  
20 Wood says that as a result of CNN’s story Carbone lost his job and it became extremely difficult for  
21 him to find new employment in the field of hospital administration.

22 “False and defamatory accusations against real people have serious consequences. Neither St.  
23 Mary’s or Mr. Carbone did anything to deserve being the objects of the heinous accusation that they  
24 harmed or put babies and young children at risk for profit,” Wood said.

25  
26 On Wednesday, Federal District Judge Orinda Evans ruled that the case could move forward, even  
27 ruling that she found that CNN may have acted with “actual malice” with the report — a standard  
28 necessary to prove a defamation claim.

1 “The Court finds these allegations sufficient to establish that CNN was acting recklessly with regard  
2 to the accuracy of its report, i.e., with ‘actual malice,’ the order reads. CNN had tried to get the case  
3 dismissed.

4 Nothing in the legislative history indicates that defamation or invasion of privacy claims are not  
5 “personal injury torts”. In fact, all of the history provided by Defendants would preclude their  
6 narrow interpretation when Congress was ePlaintiff 42ressly acting to ensure the district court  
7 would hear such claims. Similarly, although some courts have permitted the California Anti-SLAPP  
8 law to be heard in cases involving diversity jurisdiction, it does not follow that the procedural  
9 mechanisms can apply in an objection to claim proceeding.

10 Defendants also neglects to mention its ongoing, post-petition libel. See, e.g., Trotter, J.K., “What  
11 did Internet Troll Chuck Johnson Know about Peter Thiel’s Secret War on Gawker?” (Jun. 17,  
12 2016) (reiterating false accusation of misreporting a story about Sen. Menendez) available at  
13 <[http://gawker.com/what-did-internet-troll-chuck-johnson-  
14 know-about-peter-1782110939](http://gawker.com/what-did-internet-troll-chuck-johnson-know-about-peter-1782110939)>.

15 At that hearing and in response to objections to claims, other claimants also argued that the district  
16 court was required to hear defamation claims as personal injury claims under 28 U.S.C. § 157(b)(2)  
17 (B).

### 18 **Personal Injuries are More Than Just Bodily Injuries**

19  
20 Although Defendants mentions the reorganization of authority between the bankruptcy courts and  
21 the district courts in the wake of Northern Pipeline Construction Co. v. Marathon Pipeline Co., 458  
22 U.S. 50 (1982), it fails to explain what motivated the Marathon decision.

23  
24 The concern in that case was the extent to which Congress could empower Article I courts. The  
25 Supreme Court specifically observed that “Congress cannot ‘withdraw from [Art. III] judicial  
26 cognizance any matter which, from its nature, is the subject of a suit at the common law, or in  
27 equity, or admiralty.’” 458 U.S. at 69 n.23, quoting Murray’s Lessee v. Hoboken Land &  
28 Improvement Co., 18 How. 272, 284 (1856). Such suits involved “private rights”, as opposed to  
“public rights” created legislatively.

1 During debate over the Bankruptcy Amendments and Federal Judgeship Act of 1983, Pub. L. 98-  
2 353, Senator Robert Dole specifically noted: This title establishes an article I bankruptcy court, with  
3 judges appointed for limited terms, to handle the routine business of bankruptcy claims based upon  
4 State law, which under Marathon will require the attention of article III judges, will be referred to  
5 the district courts except where the parties consent to bankruptcy court jurisdiction. One of those  
6 areas reserved for attention of the district courts will be personal injury claims, which are exempted  
7 from the definition of core proceeding under the bill. 130 Cong. Rec. S20083 (daily ed. June 29,  
8 1984). However, none of the legislative history, including that cited by Defendants, specifically  
9 addresses whether defamation claims are “personal injury” claims. 5i.

### 10 **Slander and Libel are Common-Law Personal Injury Claims**

11  
12 In determining the meaning of “personal injury”, this Court must look to the common law  
13 understanding. Over a century ago, in determining whether a slander was among the “willful and  
14 malicious injuries to the person or property of another” not discharged in bankruptcy, the Kentucky  
15 Court of Appeals found that a slander is a “personal injury—that is, an injury to his person”, and  
16 further explained its holding in the context that “[t]he act of Congress must be 5

17  
18 There is no inconsistency with including defamation claims among the “narrow range of cases” that  
19 are personal injury cases raised by Rep. Kastenmeir. 130 Cong. Rec. H7491. As Defendants notes,  
20 the sole example was an automobile accident claim; by Defendants’s logic, all medical malpractice  
21 claims would be excluded. None of the remainder of the legislative history cited provides any  
22 further insight.

23 Sutherland on Statutory Construction, 289.” Sanderson v. Hunt, 116 Ky. 435, 438, 76 S.W. 179,  
24 179 (1903); accord McDonald v. Brown, 23 R.I. 546, 51 A. 213 (1902); Nat’l Sur. Co. v. Medlock,  
25 2 Ga. App. 665, 58 S.E. 1131 (1907). The Sanderson decision was adopted by the Sixth Circuit  
26 Court of Appeals, similarly finding a libel to be a “personal injury” under the common law such that  
27 it would not be dischargeable under the bankruptcy act. Thompson v. Judy, 169 F. 553 (6th Cir.  
28 1909); 6 see also Parker v. Brattan, 120 Md. 428, 434-35, 87 A. 756, 758 (1913). This  
understanding was also adopted by at least one district court in the Second Circuit. See In re

1 Bernard, 278 F.734, 735 (E.D.N.Y. 1921). 14.

2 Congress, in drafting Section 157(b)(2)(B) must, therefore, be understood as having used the words  
3 “personal injury” with reference to its common-law acceptance. From the earliest cases, claims  
4 sounding in defamation have been deemed a “personal injury.” Indeed, this Court recognized as  
5 much nearly twenty years ago when it wrote in *In re Boyer*, 93 B.R. 313, 317 (Bankr. N.D.N.Y.  
6 1988), in the context of a Section 1983 & 1985 claim: The term “personal injury tort” embraces a  
7 broad category of private or civil wrongs or injuries for which a court provides a remedy in the form  
8 of an action for damages, and includes damage to an individual’s person and any invasion of  
9 personal rights, such as libel, slander and mental suffering, BLACK’S LAW DICTIONARY 707,  
10 1335 (5th ed. 1979).

11 Accord *Soukup v. Employers’ Liab. Assur. Corp.*, 341 Mo. 614, 625, 108 S.W.2d 86, 90 (1937)  
12 citing 3 Words & Phrases, Fourth Series, p. 90 (workers’ compensation case observing that “The  
13 words ‘personal injuries’ as defined by lexicographers, jurists and textwriters and by common  
14 acceptance, denote an injury either to the physical body of a person or to the reputation of a person,  
15 or to both.”)

16 Simply put, “[t]here is no firm basis to support the proposition that libel and slander were  
17 considered to be other than personal injuries at common law.” *McNeill v. Tarumianz*, 138 F. Supp.  
18 713, 717 (D. Del. 1956). In support thereof, the Delaware district court quoted 1 Blackstone 6 The  
19 Thompson decision was generally met with approval by the Second Circuit Court of Appeals in *In*  
20 *re Conroy*, 237 F. 817 (2d Cir. 1916).

21 Commentaries 129, which classified rights of “personal security” to consist “in a person’s legal and  
22 uninterrupted enjoyment of his life, his limbs, his body, his health and his reputation.” *Id.* at 716  
23 (further noting that the courts consider “rights of personal security” as synonymous with “personal  
24 injury”). 716.

25  
26 The Supreme Court of Pennsylvania, in 1825, laid down the following common law history in the  
27 context of a claim involving a decedent: That a personal action dies with the person is an ancient  
28 and uncontested maxim. But the term “personal action,” requires ePlaintiff 42lanation. In a large  
sense, all actions except those for the recovery of real property, may be called personal. This

1 definition would include contracts for the payment of money, which never were supposed to die  
2 with the person. The maxim must therefore be taken in a more restricted meaning. It extends to all  
3 wrongs attended with actual force, whether they affect person or property; and to all injuries to the  
4 person only, though without force. Thus stood originally the common law, in which an alteration  
5 was made by the stat. 4. Ed. 3. c. 7, which gave an action to an executor for an injury done to the  
6 personal property of his testator in his life, which was extended to the executor of an executor by  
7 stat. 25, Ed. 3. And by the stat. 31, Ed. 3 c. 11, administrators have the same remedy as executors.  
8 These statutes received a liberal construction from the judges, but they do not extend to injuries to  
9 the person of the deceased, nor to his freehold. So that no action now lies, by an executor or  
10 administrator for an assault and battery of the deceased, or trespass vi et armis, on his land, or for  
11 slander; because it is merely a personal injury.

12 *Lattimore v. Simmons*, 13 Serg. & Rawle 183, 184-85 (Pa. 1825) (emphasis added). 17.

13 The Supreme Court of Wisconsin, in 1874, ePlaintiff 42ounded upon this concept in a matter  
14 involving state bankruptcy law. It observed “A libel or a slander might deprive a man of life.

15 The Georgia Supreme Court in *Johnson v. Bradstreet Co.*, 87 Ga. 79, 81-82, 13 S.E. 250, 251  
16 (1891) ePlaintiff 42ounded upon this understanding: At common law, absolute personal rights were  
17 divided into personal security, personal liberty, and private property. The right of personal security  
18 was subdivided into protection to life, limb, body, health, and reputation. 3 Blackst. Com. 119. If  
19 the right to personal security includes reputation, then reputation is a part of the person, and an  
20 injury to the reputation is an injury to the person. Under the head of “security in person,” Cooley  
21 includes the right to life, immunity from attacks and injuries, and to reputation. Cooley on Torts (2d  
22 ed.), 23, 24. See, also, Pollock on the Law of Torts, \*7. Bouvier classes among absolute injuries to  
23 the person, batteries, injuries to health, slander, libel, and malicious prosecutions. 1 Bouv. L. Dic.  
24 (6<sup>th</sup> ed.) 636. “Person” is a broad term, and legally includes, not only the physical body and  
25 members, but also every bodily sense and personal attribute, among which is the reputation a man  
26 has acquired. Reputation is a sort of right to enjoy the good opinion of others, and is capable of  
27 growth and real existence, as an arm or a leg. If it is not to be classed as a personal right, where does  
28 it belong? No provision has been made for any middle class of injuries between those to person and  
those to property, and the great body of wrongs arrange themselves under the one head or the other.  
Whether viewed from the artificial arrangement of law writers, or the standpoint of common sense,  
an injury to reputation is an injury to person.

1 In an attack that destroys: employment, destroy his credit, ruin his business, and greatly impair his  
2 estate; yet an action therefor would be an action for a personal injury, the effect of the wrong on the  
3 estate of the injured party being merely incidental.” Noonan v. Orton, 34 Wis. 259, 263 (1874).

4 That same year, the Supreme Court of Virginia recognized that an “action of slander” did “involve a  
5 claim for personal damages” and, as such, did not pass to the assignee in bankruptcy. Dillard v.  
6 Collins, 66 Va. 343, 345-47 (1874). 18.

7  
8 Similarly, a claim by a wife for slander was deemed a “personal injury” claim such that, under the  
9 law at that time, her husband was required to join in the suit. See, e.g., Smalley v. Anderson, 18 Ky.  
10 56 (1825) (in a claim for “personal injury”, husband was required to join suit with wife in claim for  
11 slander accusing her of adultery); accord Gibson v. Gibson, 43 Wis. 23, 26- 27 (1877); Leonard v.  
12 Pope, 27 Mich. 145, 146 (1873) (a claim for slander is “a personal grievance or cause of action”).

13 The U.S. Court of Appeals for the Fifth Circuit agreed that “libel is a personal injury” and that “[a]t  
14 common law, libel and slander were classified as injuries to the person, or personal injuries. 3  
15 Blackstone, 119; Cooley on Torts (2d Ed.) 23, 24; Bouvier, Law Dictionary, verbo ‘Injury.’”  
16 Times-Democrat Pub. Co. v. Mozee, 136 F. 761, 763 (5th Cir. 1905). Although  
17 the law now recognizes spousal independence, the nature of the action has not changed. 19.

18 The principle that slander and libel are personal injuries is one that was generally recognized, and,  
19 as seen above, it tended to be addressed in cases involving decedents. Blackstone, in his  
20 Commentaries (vol. 3, p. 302), stated the rule: “In actions merely personal, arising ex delicto, for  
21 wrongs actually done or committed by the defendant, as trespass, battery, and slander, the rule is  
22 that actio personalis moritur cum persona; and it shall never be revived either by or against the  
23 executors or other representatives.” Thus, by statute, states such as Illinois, in overriding the  
24 common law to permit actions to survive, ePlaintiff 42ressly carved out slander and libel as being  
25 personal injuries that would not survive. See Holton v. Daly, 106 Ill. 131, 139 (1882) quoting Ill.  
26 Rev. Stat. 1874, p. 126 (“actions to recover damages for an injury to the person, except slander and  
27 libel, ... shall also survive.”).

28 In contrast, a claim for wrongful death was not recognized at common law precisely because  
personal injury actions did not survive under the action personalis moritur cum persona universal

1 maxim.

2 Statutes were, therefore, enacted to permit claims for wrongful death “compensatory of the damages  
3 sustained by the heirs or next of kin, who had, or are supposed to have had, a pecuniary interest in  
4 the life of the intestate.” *Burns v. Grand R. & I. R. Co.*, 113 Ind. 169, 171, 15 N.E. 230, 231 (1888).  
5 Specifically, “[t]hese statutes, while they do not in terms revive the common law right of action for  
6 personal injury, nor make it survive the death of the injured person, create a new right in favor and  
7 for the benefit of the next of kin or heirs of the person whose death has been wrongfully caused.” *Id.*

8  
9 Defendants mistakenly believes that the addition of “wrongful death” implies that because only  
10 such a claim can arise from the death of a natural person’s body, the term “personal injury” must be  
11 construed similarly in context. Defendants misunderstands that a wrongful death claim is not a  
12 common law personal injury claim; thus it had to be specifically added. The addition of wrongful  
13 death claims does not, however, modify the common law understanding of “personal injury,” which  
14 included libel and slander.

15 The legislative history, therefore, shows that claims for wrongful death were added because they  
16 were not recognized at common law to be a “personal injury.” Libel and slander, on the other hand,  
17 were. The legislative record is otherwise silent as to the specific torts that made up a “personal  
18 injury” claim and therefore should be understood to include all such claims at common law,  
19 including slander and libel. Although Defendants worries that claims for emotional damages will  
20 “create an exception that swallows the rule” (Defendants’s Brief at 10), it creates a straw- man  
21 argument, improperly lumping in claims that are not common law “personal injury” claims that  
22 happen to provide for emotional distress damages. Those claims are different, statutory causes of  
23 action; the only statutory claim included in Section 157(b)(2)(B) is the wrongful death claim.

24 Thus, when Congress enacted Section 157(b)(2)(B), it necessarily imported the common law  
25 meaning of “personal injury” and, therefore, libel and slander claims. 8 ii. Victim/Witnesses is  
26 Entitled to Invoke Section 157(b)(2)(B) 23. Defendantss seek to treat Victim/Witnesses, as a  
27 corporate person, differently under Section 157(b)(2)(B) than Victim/Witnesses. There is no reason  
28 for this. As libel is a “personal injury” tort, there is no basis to suggest a corporate person should be  
treated any differently than a natural person. Simply because it cannot suffer a battery does not

1 mean it is foreclosed from all personal injury claims. As explained by the Georgia Supreme Court in  
2 Johnson v. Bradstreet Co., 87 Ga. 79, 81-82, 13 S.E. 250, 251 (1891), an “injury to reputation is an  
3 injury to person.” Although a corporation may be unable to suffer a physical, bodily injury, it can  
4 suffer an injury to reputation.

5 Defendants’s citations are inapposite. The U.S. Supreme Court has not said that a corporation  
6 cannot suffer a personal injury; rather, N.P.R. Co. v. Whalen, 149 U.S. 157, 162-163 (1893),  
7 address actions in nuisance, which can only either affect life, health, senses, or property, and not  
8 reputation. Defendants’s quote from Roemer v. Commissioner of Internal Revenue, 176 F.3d 693,  
9 699 n. 4 (9th Cir. 1983), was a matter of pure dicta; the Ninth Circuit had no occasion to pass upon  
10 whether a corporation could, in fact, suffer a personal injury. Subsequent cases, such as In re Lost  
11 Peninsula Marina Dev. Co., LLC, 2010 U.S. Dist. LEXIS 78532 (E.D. Mich. 2010), wrongly rely  
12 upon such dicta. In fact, the Ninth Circuit’s entire basis was DiGiorgio Fruit Corp. v. American  
13 Federation of Labor, which does not say a corporation cannot suffer a “personal injury”;it merely  
14 says that “a corporation has no reputation in the personal sense”, yet “it has a business reputation”.  
15 215 Cal.App.2d 560, 571, 30 Cal.Rptr. 350, 356 (1963). The Second Circuit has specifically  
16 refrained from finding a dichotomy between a business reputation and the reputation 8

17 Similarly, as invasions of personal rights, Claimants’ false light invasion of privacy claims are  
18 “personal injury” claims. See Mercado v. Fuchs (In re Fuchs), No. 05-36028-BJH-7, 2006 Bankr.  
19 LEXIS 4543, at \*6-7 (U.S. Bankr. N.D. Tex. Jan. 26, 2006) (finding invasion of privacy claim to be  
20 a “personal injury” under Section 157(b)(2)(B)); see also Bernstein v. Nat’l Broad. Co., 129 F.  
21 Supp. 817, 825 (D.D.C. 1955) (“The tort of invasion of privacy being a personal injury....”)

22 of a natural person. See Agar v. Commissioner, 290 F.2d 283, 294 (2d Cir. 1961). However, the  
23 Eleventh Circuit specifically answered in the affirmative the question “[i]s damage to one’s  
24 business reputation a personal injury?” Fabry v. Commissioner, 223 F.3d 1261, 1270 (11th Cir.  
25 2000).

26 In fact, the purpose of Section 157(b)(2)(B) was to properly address claims that should be heard by  
27 an Article III court. As noted above, such was prompted by the Marathon decision, a case where the  
28 sole litigants were corporate persons. Where a natural person would have a right to have a matter

1 heard by an Article III court but a corporate person does not, such denial of equal protection would  
2 be unlawfully violative of due process under the Fifth Amendment. See *Bolling v. Sharpe*, 347 U.S.  
3 497 (1954) (holding equal protection claims implicate due process).

4 Even if corporate persons could be treated differently from natural persons for claims arising from  
5 the same transaction, it would be improper to abide Defendants’s suggestion to have the Bankruptcy  
6 Court determine the corporate claim first, in order to then argue a preclusive effect against the  
7 natural person. This attempted end-run around a specifically mandated statutory provision,  
8 grounded in Constitutional rights, should not be condoned. This is not what the Supreme Court was  
9 considering in *Katchen v. Landy*, 382 U.S. 313 (1966); in *Katchen*, the determination involved a  
10 single party who submitted to equity jurisdiction. Victim/Witnesses has not taken action to deprive  
11 himself of his rights. Where Congress has acted to provide for access to Article III courts, it would  
12 run afoul of the intent of the law to make that access ephemeral.

13 Although Defendants at least has the decency to acknowledge that is its purpose, it would set an  
14 unconscionable precedent. Many natural persons conduct business through or have some  
15 relationship with a corporate person such that harms giving rise to their individual personal injury  
16 claims would also harm the corporate person. As a result, Defendantsswho would seek to deprive  
17 such natural persons of their right to be heard by an Article III court could simply involuntarily join  
18 or otherwise implead the related corporate person, have that matter heard first, and then attempt to  
19 preclude the natural person’s claim on that basis.

20 **The California Anti-SLAPP Law does Not Apply**

21 Defendants’s motion is not about allowance of claims; it is about whether a state law procedural  
22 mechanism is to apply in a non-adversarial, contested matter. Although some federal courts permit  
23 the application of the California Anti-SLAPP law, Cal. Code Civ. P. § 425.16, in civil cases arising  
24 from diversity jurisdiction, it has never been found applicable to a contested claim proceeding in  
25 bankruptcy court. The differences between the Federal Rules of Civil Procedure and the Federal  
26 Rules of Bankruptcy Procedure demonstrate that it makes little sense to do take such an  
27 unprecedented step.  
28

1 The very nature and purpose of a proof of claim differs from a traditional complaint, rendering the  
2 California law impracticable. As this Court is aware: Correctly filed proof of claims “constitute  
3 prima facie evidence of the validity and amount of the claim . . . . To overcome this prima facie  
4 evidence, an objecting party must come forth with evidence which, if believed, would refute at least  
5 one of the allegations essential to the claim.” *Sherman v. Novak (In re Reilly)*, 245 B.R. 768, 773  
6 (2d Cir. B.A.P. 2000). By producing “evidence equal in force to the prima facie case,” an objector  
7 can negate a claim's presumptive legal validity, thereby shifting the burden back to the claimant to  
8 “prove by a preponderance of the evidence that under applicable law the claim should be allowed.”  
9 *Creamer v. Motors Liquidation Co. GUC Trust (In re Motors Liquidation Co.)*, No. 12 Civ. 6074  
10 (RJS), 2013 U.S. Dist. LEXIS 143957, 2013 WL 5549643, at \*3 (S.D.N.Y. Sept. 26, 2013) (internal  
11 quotation marks omitted). If the objector does not “introduce[] evidence as to the invalidity of the  
12 claim or the excessiveness of its amount, the claimant need offer no further proof of the merits of  
13 the claim.” 4 *Collier on Bankruptcy* ¶ 502.02 (Alan N. Resnick & Henry J. Sommer eds., 16<sup>th</sup> ed.  
14 2014). *In re Residential Capital, LLC*, 519 B.R. 890, 907 (Bankr. S.D.N.Y. 2014). 30. In contrast,  
15 under Cal. Code Civ. P. § 425.16(b)(1): A cause of action against a person arising from any act of  
16 that person in furtherance of the person’s right of petition or free speech under the United States  
17 Constitution or the California Constitution in connection with a public issue shall be subject to a  
18 special motion to strike, unless the court determines that the Plaintiffs have established that there is  
19 a probability that the Plaintiffs will prevail on the claim.

20 California courts have established a two-step process: first, the defendant must establish the action  
21 arose from protected speech or petitioning activity, then “then the burden shifts to the Plaintiffs to  
22 establish a probability that the Plaintiffs will prevail on the claim, i.e., make a prima facie showing  
23 of facts which would, if proved at trial, support a judgment in Plaintiffs favor.

24 In making its determination, the trial court is required to consider the pleadings and the supporting  
25 and opposing affidavits stating the facts upon which the liability or defense is based.” *Dowling v.*  
26 *Zimmerman*, 85 Cal. App. 4th 1400, 1417, 103 Cal. Rptr. 2d 174, 188 (2001) (internal citations and  
27 quotation marks omitted).

28 Further, [t]o establish a probability of prevailing, the Plaintiffs must demonstrate that the complaint  
is both legally sufficient and supported by a sufficient prima facie showing of facts to sustain a  
favorable judgment if the evidence submitted by the Plaintiffs are credited. For purposes of this

1 inquiry, the trial court considers the pleadings and evidentiary submissions of both the Plaintiffs and  
2 the defendant (§ 425.16, subd. (b)(2)); though the court does not weigh the credibility or  
3 comparative probative strength of competing evidence, it should grant the motion if, as a matter of  
4 law, the defendant’s evidence supporting the motion defeats the Plaintiffs attempt to establish  
5 evidentiary support for the claim. In making this assessment it is the court’s responsibility to accept  
6 as true the evidence favorable to the Plaintiffs. The Plaintiffs need only establish that his or her  
7 claim has minimal merit to avoid being stricken as a SLAPP.

8 Soukup v. Law Offices of Herbert Hafif, 39 Cal. 4th 260, 291, 46 Cal. Rptr. 3D 638, 662-63, 139  
9 P.3d 30, 50 (2006) (internal citations and quotation marks omitted).

10 This process makes little sense in a non-adversarial, claims objection proceeding. First, as noted,  
11 Claimants’ proofs of claim already enjoy a presumption of prima facie validity under Fed. R. Bankr.  
12 P. 3001(f) and Claimants’ submissions must be accepted as true. Thus, as a matter of law,  
13 Claimants will always prevail on a California anti-SLAPP motion, having the “minimal merit”  
14 which would support allowance of the claim. Second, once a party objects to a proof of claim and  
15 introduces evidence of invalidity, a claimant must prove his claim by a preponderance of the  
16 evidence, not merely a probability of prevailing. Defendants would require a bankruptcy court to  
17 make an unnecessary finding that a disallowed claim nevertheless had a probability of prevailing.  
18 The burden shifting framework does not work in a contested claim proceeding, even if it might  
19 work for an adversarial matter or in a case under the Rules of Civil Procedure.

20 Notably, even in diversity cases, the entirety of the California Anti-SLAPP law is not imported in  
21 its entirety. Unlike in California state courts, a denial of an Anti-SLAPP motion is not an appealable  
22 interlocutory order in Federal courts. See Hyan v. Hummer, 825 F.3d 1043 (9th Cir. 2016). Federal  
23 courts do not apply the timing requirements set forth in Section 425.16(f), which directly collides  
24 with the timeline allowed under Fed. R. Civ. P. 56. See Sarver v. Chartier, 813 F.3d 891 (9th Cir.  
25 2016). Federal courts do not stay discovery upon the filing of an Anti- SLAPP motion, as otherwise  
26 directed by Section 425.16(g). See Metabolife Int’l, Inc. v. Wornick, 264 F.3d 832, 845 (9th Cir.  
27 2001).

28 Even the very idea of the burden-shifting framework has been questioned by the Ninth Circuit. See  
Englert v. MacDonell, 551 F.3d 1099, 1102 (9th Cir. 2009) (reserving the issue with respect to a

1 parallel Oregon statute). The D.C. Circuit directly confronted this issue in *Abbas v. Foreign Policy*  
2 *Grp., LLC*, 783 F.3d 1328, 1335 (2015). In *Abbas*, the D.C. Circuit directly rejected the idea that an  
3 analogous burden-shifting framework created a substantive, quasi-immunity from suit, because the  
4 law collided with Rules 12 and 56 as to how a showing is to be made, rendering it inapplicable  
5 pursuant to *Shady Grove Orthopedic Associates, P.A. v. Allstate Insurance Co.*, 559 U.S. 393, 398-  
6 99, 130 S. Ct. 1431 (2010). See 783 F.3d at 1335.

7 Defendants attempts to distinguish *Abbas* by highlighting the non-mandatory nature of applying  
8 Rules 12(b)(6) and 56, suggesting that collision is avoided if those rules are not applied.  
9 Defendants’s Brief at 15-16. First, it bears observing that Defendants, in its objections to the claims,  
10 did move to apply Rule 12(b)(6), rendering its own argument moot. Thus, where § 425.16 does  
11 conflict with Rule 7012, its application would directly collide with this Court’s authority to “direct  
12 that one or more of the other rules in Part VII shall apply.” Fed. R. Bankr. P. 9014(c). Second,  
13 although Defendants argues that the Court can “otherwise direct” Rule 7056 not apply per Rule  
14 9014, it provides no reason why the normal rules should be avoided here; Claimants located but one  
15 case where a bankruptcy court made such direction to permit the parties to “flesh out the record”,  
16 there on a motion to employ, not a claims objection. See *In re Rusty Jones, Inc.*, 109 B.R. 838, 845  
17 (Bankr. N.D. Ill. 1989). Fleshing out a record would similarly be reason not to apply § 425.16  
18 where Defendants has otherwise obtained a briefing schedule in order for it to take discovery. See  
19 Dkt. No. 703. Essentially, the only reason to “otherwise direct” Rule 7056 not apply is because it  
20 collides with § 425.16. Third, to not apply certain rules simply because Claimants are California  
21 citizens would deny such citizens equal protection in a manner to be so violative of due process that  
22 it is an offense to the Fifth Amendment. See *Shapiro v. Thompson*, 394 U.S. 618, 642, 89 S. Ct.  
23 1322, 1335 (1969).

24 Moreover, it makes little sense to import the California procedure where Fed. R. Bankr. P. 3007  
25 permits parties in interest other than the Defendants to object to a claim. It could well be  
26 impracticable where a Defendants does not believe protected speech was involved, but a third party  
27 does. It is not equitable for one class of objector (a Defendants) to potentially enjoy the benefits of  
28 the California procedure (attorneys’ fees) and not others (other creditors).

Contrary to the assertion of Defendants, the procedures of § 425.16 are not “bound up” with the law  
of libel, even to the extent Justice Stevens’s concurrence in *Shady Grove Orthopedic Assocs., P.A.*

1 v. Allstate Ins. Co., 599 U.S. 393, 419-410 (2010), is controlling. First, Defendants fails to identify  
2 what the substantive law is that Section 425.16 is bound up with. The California Anti-SLAPP law is  
3 not limited to the law of libel; it also applies to other state law claims. See, e.g., State Farm Mut.  
4 Auto. Ins. Co. v. Lee, 193 Cal. App. 4th 34, 122 Cal. Rptr. 3D 183 (2011) (application to abuse of  
5 process and unfair business practice claims); Jarrow Formulas, Inc. v. LaMarche, 31 Cal. 4th 728, 3  
6 Cal. Rptr. 3d 636, 74 P.3d 737 (2003) (application to malicious prosecution claims); Fremont  
7 Reorganizing Corp. v. Faigin, 198 Cal. App. 4th 1153, 131 Cal. Rptr. 3d 478 (2011) (application to  
8 breach of confidence, breach of fiduciary duty, equitable indemnity, and violation of Cal. R. Prof.  
9 Conduct 3-310(C)); Peregrine Funding, Inc. v. Sheppard Mullin Richter & Hampton LLP, 133  
10 Cal.App.4th 658, 674–675, 35 Cal. Rptr. 3D 31 (2005) (application to legal malpractice and breach  
11 of fiduciary duty claims). Section 425.16 is not analogous to a bond posting requirement, statute of  
12 limitations, evidentiary rule, or verdict capping identified by Justice Stevens, all of which have a  
13 substantive quality. See Shady Grove, 599 U.S. at 419-410. Here, Defendants seeks to employ a  
14 burden shifting framework that could appear at but one discrete stage of a diversity case and has no  
15 role in a claim objection; this is not even, then, an example of a “state-imposed burden[ ] of proof”,  
16 which would go to the ultimate outcome. *Id.* at 410 n. 4. There is no question that Claimants have  
17 the ultimate burden of proof, with or without the Anti-SLAPP motion. Thus, as it is not sufficiently  
18 bound up with any particular substantive law, it is not applicable in this matter.

19 Claims in a bankruptcy case are distinguishable from adversarial matters, especially those brought  
20 in district court on the basis of diversity jurisdiction. Claimants did not choose this forum;  
21 Defendants did by filing its petition. In doing so, it effectively stripped Claimants of their usual  
22 litigation rights. As Defendants says, “what is good for the goose is good for the gander”.  
23 Defendants’s Brief at 14. It would be inequitable to allow Defendants the benefit of a normal civil  
24 case, such as the use of Section 425.16, while simultaneously denying Claimants the benefits of  
25 such a case, by having deprived them of their chosen forum. C.

#### 26 **Should This Matter Be Heard by the District Court**

27 Moving forward, this matter should proceed before the district court. Defendants incorrectly asserts  
28 that *Exec. Bens. Ins. Agency v. Arkison*, 134 S. Ct. 2165 (2014) commands that this Court first  
determine the case; rather, it held that having summary judgment first heard by the bankruptcy  
court, to be followed by de novo review by the district court, was permissible under 28 U.S.C. §

1 157(c). See *Messer v. Magee (In re FKF 3, LLC)*, No. 13-CV-3601 (KMK), 2016 U.S. Dist. LEXIS  
2 117258, at \*52 n.11 (S.D.N.Y. Aug. 30, 2016). Section 157(c)(1) says that a bankruptcy court  
3 “may” hear a non-core proceeding, not that it must.

4 The standard as to whether the bankruptcy court should hear the non-core proceeding in the first  
5 instance under Section 157(c)(1) is not well articulated. Guidance from cases under Section 157(d),  
6 regarding withdrawal, however, may be informative. In such cases, the considerations are “(1)  
7 whether the case is likely to reach trial; (2) whether protracted discovery 9

8 Although Defendants noted the availability of fees under § 425.16, such provision is secondary to  
9 the burden-shifting framework. If the Bankruptcy Court does not perform the mechanism to  
10 determine whether or not a probability of success occurs, it would never reach the issue of fees.  
11 Section 425.16 does not create a substantive right to fees in all libel cases; only those cases where a  
12 defendant is successful on a motion to strike.

13 Court oversight will be required; and (3) whether the bankruptcy court has familiarity with the  
14 issues presented.” In *re Times Circle East, Inc.*, 1995 U.S. Dist. LEXIS 11642, 1995 WL 489551, at  
15 \*3 (S.D.N.Y. Aug. 15, 1995). All three factors warrant the matter being heard by the District Court  
16 in the first instance.

17  
18 This case is likely to reach trial. Claimants have properly asserted multiple false and defamatory  
19 statements as libelous. Because of the defenses asserted by Defendants, it is more probable than not  
20 that multiple statements will require factual determinations beyond otherwise being readily apparent  
21 on their face. Defendants has asserted a defense of lack of actual malice; such will require probing  
22 and evidence into its research, editorial, and publication process. Defendants has asserted a defense  
23 under Section 230 of the Communications Decency Act; such will require probing and evidence  
24 into its business practices, sources, and publication processes. Neither do Claimants have any  
25 confidence that this matter will reach settlement; as noted above, even after having filed a  
26 bankruptcy petition arising from publication malfeasance, Defendants continued to defame  
27 Claimants.

28 Moreover, this non-core proceeding will likely require a jury trial to determine the claim’s value. As  
having filed personal injury tort claim, Claimants are entitled to and claim the right to trial by jury.

1 See 28 U.S.C. § 1411(a). The Second Circuit has found that jury trials in non-core proceedings are  
2 likely prohibited “due to the district court’s de novo review of such proceedings.” In re Orion  
3 Pictures Corp., 4 F.3d 1095, 1101 (2d Cir. 1993).

4 Protracted discovery with court oversight will be required. Among other matters, without limitation:  
5 Claimants will seek depositions from Defendants. Claimants will require discovery of the identities  
6 of the Gawker authors and campaign financiers and will seek to depose them.

7 Claimants will seek discovery from Defendants as to its business practices, including editorial and  
8 publication decisions and social media cross-promotion, as well as the source code relative to the  
9 Kinja and website platforms. Claimants will require detailed discovery into the readership and  
10 extent of circulation. Claimants anticipate significant litigation over several of these items.

11  
12 A Bankruptcy Court is unfamiliar with the issues presented. A LEXIS search for cases involving  
13 “actual malice” or “section 230”, involving “libel”, “slander”, or “defamation”, yielded only six  
14 decision in three cases in this Court. This is not the typical claim arising in a Chapter 11 proceeding.  
15 Such cases and issues arise with far more frequency before the District Court.

16 Because all of the factors favor the District Court, the Bankruptcy Court should not hear these non-  
17 core proceedings. III.

18  
19 As set forth above, the California Anti-SLAPP law is not applicable to a contested matter under  
20 Fed. R. Bankr. P. 3007, especially as it relates to the allowance of claims. The state statute conflicts  
21 with the Federal procedures and otherwise is unworkable where a proof of claim is already prima  
22 facie evidence of a possibility of prevailing. Notwithstanding, Claimants filed their proofs of claims  
23 knowing they would ultimately prevail, whether or not the California Anti- SLAPP law applies.

24 The claims asserted by Claimants are personal injury tort claims that should be heard by the District  
25 Court for all further proceedings. Congress must be deemed to have understood the meaning of the  
26 term “personal injury” when it legislated, a meaning that, for centuries, has included causes of  
27 action sounding in libel and slander, as well as false light invasion of privacy. Defendants has failed  
28 to demonstrate that any different meaning was intended.

*The issues raised by Defendants show a determined intent to attempt to avoid facing liability for the multiple calumnies it heaped upon Claimants. Claimants are entitled to be heard and to vindicate their claims.*

1  
2 **EXHIBIT 63 - State Sponsored Reprisal Programs Operated By Public**  
3 **Officials**

4  
5 Agency staff were ordered to harm Victim/Witnessess by manipulating their benefits in order to  
6 deny, delay, obfuscate and reduce their income as reprisal for their assistance to law enforcement in  
7 a political corruption and money laundering matter. Agency staff, ranging from the lowest level  
8 staff at the San Francisco, San Mateo, Los Angeles and Marin offices, and up to the director  
9 headquarters offices, participated in this reprisal-vendetta-revenge action to harm  
10 Victim/Witnessess. Victim/Witnesses’s peers have filed DOJ and FBI criminal referrals, launched  
11 federal investigations and the assertions have been proven in numerous IG, FBI, Congressional and  
12 major news media investigations. Agency offices have failed to provide responsive FOIA requested  
13 data, hearing investigation data and fair responses because some of their staff are STILL operating a  
14 criminal cover-up which has now been update-reported to the FBI, Congress, the IG, the AG and  
15 investigative reporters.

16  
17 Other federal agencies have complied, verified and provided the requested deliverables. SSA and  
18 GOVT have pointed the searchlight of suspicion on themselves, laser-like, by their overt failure to  
19 comply, unlike every other agency. Ironically, the political financing of their executives and their  
20 personal relationships “happens” to be with the exact same Silicon Valley oligarchs under felony  
21 criminal investigations. The stock market brokerage records, family trust accounts, PAC trace-  
22 routing, Interpol records and SEC investigation records proves it!

23  
24 Unfortunately for the crooked agency staff, some Victim/Witnessess have the authority, law  
25 enforcement credentials and training to arrest any person at their home or office and remand them to  
26 the FBI, DOJ or Sheriff. SSA and GOVT staff should not longer screw around! For example: Every  
27 “unsigned” SSA email is tracked to the individual author by their IP address, device IMEI, web  
28 camera, building key card, door camera, parking lot use chart, building camera, vehicle tracking

1 circuits, text dba records, keyboard UI/UX patterns, motherboard ID #, DNS routing, stingray read-  
2 outs and a vast number of other metrics. Victim/Witnesses investigation peers know the exact  
3 person that wrote every SSA email or document or file request. There is no such thing as an  
4 anonymous SSA email. Transparency is the Victim/Witnessess middle name. The FBI and CIA  
5 people that SSA and GOVT insiders think are their “buddies” may actually be the  
6 Victim/WitnessesS buddies!

7  
8 History has proven that non-corrupt portions of federal agencies and public service law and  
9 community action firms have executed on their willingness to ePlaintiff 42end millions of dollars of  
10 resources to fight this injustice. Every individual involved in this at SSA and GOVT are on a  
11 forensic database. No person at SSA or GOVT who uses our government as a garage sale for  
12 corruption favors or a kill mill for political reprisals will avoid the 100% legally executed  
13 consequences. They will be targeted and prosecuted even more profoundly than the  
14 Victim/Witnessess waere targeted with IC-type hit jobs.

15  
16 This Tech Cartel cartel operational scheme involves a significant culture of corruption within its  
17 spacious mosaic – creating a pointillist portrait of the Tech Cartel culture and why it must be  
18 remedied – for the Article III courts not to await all relevant input.

19 Not to place too fine of a point on this, but there was no branch within our constitutional  
20 structure that the Tech Cartel did not abuse for their own political gain, destruction of those who  
21 Hillary Clinton oppose them, and (thus) their long-term enrichment. Connecting the dots through  
22 obtaining additional corroborative evidence – such as putative ongoing obstruction through opaque  
23 threats of investigating Congress – will not paint a pretty picture (to say the very least), but is  
24 necessary and proper to placing a check on future Tech Cartel misconduct. And notwithstanding  
25 RICO misconduct, there is wide-ranging agreement that the Hatch Act was used by supporters of  
26 the Tech Cartel (including admissions by several, like McCabe, Strzok and Page) within the federal  
27 enforcement agencies to help manipulate elections.

28 As noted in the Complaint herein, particularly egregious because it may sound in treason

1 (among many illegal and/or predicate acts) involved the Tech Cartel bribery (“bribery” constituting  
2 a federal offense both in giving and receiving), in which candidates *inter alia*, as statutory  
3 representative on the lead agency for transfer of control of United States uranium to Russia (the  
4 “Committee on Foreign Investment in the United States” or “CFIUS”), deceived President Obama  
5 when she not only did not object to the uranium transaction during the CFIUS process, but  
6 intentionally did not inform Obama that defendants Clinton Foundation and Clinton Global  
7 Initiative stood gain financially through such Russian control. Nor did Secretary of State Hillary  
8 Clinton (or Attorney General Eric Holder, also a member of CFIUS) inform President Obama that  
9 Russia would likely convey the U.S. uranium, surreptitiously and in part, to end users Iran and  
10 North Korea – countries which directly threaten the United States and its key allies in the Middle  
11 East.

12 This also occurred with lithium, nickel, indium and cobalt mines unjustly expanding the  
13 profits of Defendant Elon Musk as billions of dollars of illicit gains, inspired by the mining schemes  
14 and illicit deeds of Musk’s father which includes getting Musk’s sister pregnant.

15 While seditious in nature and correlated precisely with the Tech Cartel operational scheme,  
16 these predicate and otherwise illegal acts, and those related to them, are hardly exclusive as the  
17 Tech Cartel scheme, associated in fact in pursuit of a common purpose. *See generally* 18 U.S.C. §  
18 1961. The infiltration of the Democratic Party by the Tech Cartel malfeasants described herein was  
19 carried out in a fashion similar to that which *La Cosa Nostra* gained control of legitimate entities in  
20 order to engage in a criminal Tech Cartel. While this honorable court needs no lengthy ePlaintiff  
21 explanation of “racketeering”, it is significant that a major political party has – through the misuse of  
22 the tax and nonprofit laws, the FISA (and your colleagues) to surreptitiously surveil a political  
23 opponent’s campaign – been so deeply infected with Tech Cartel wrongdoing that even primary  
24 opponents of crony political candidates were victims of the long-term Tech Cartel scheme and  
25 common purpose to assure control of public elections via Google/Facebook Tech Cartel controlled  
26 mass media manipulation and the stated bribe compensation types.

27 The parties to this litigation are set forth in the Complaint and need not be repeated in this  
28 Case Statement. The same applies for the Jurisdiction and Venue statement set out in the Complaint.

1 The numerous Factual Allegations will, as with Case Statements in other district courts, be  
2 appropriately cross-referenced in the Case Statement here in narrative form.

3 The Tech Cartel cancer that has metastasized within the American election system is  
4 characterized by strictly organized mass corruption and malfeasance. Setting aside for the moment  
5 the destruction of the FISA process (primarily in this very court), the political *mafioso* has, by their  
6 own admission and numerous investigative findings, conspired to defeat and then damage a duly-  
7 certified President, and destroy the business and reputation of whistle-blowers.

8 Plaintiffs, as the evidence will show, has been destroyed by the Tech Cartel for simply  
9 recounting what he observed – this is rather odd, as Plaintiffs sought to protect the Government  
10 from, among other things, the criminal actions of crony political operators.

11 Like nothing we have ever seen, Tech Cartel principals and surrogates have now also been  
12 plausibly shown to have – as part of the Tech Cartel scheme and directly related to the FISA abuse  
13 of this very district court – conspired to infiltrate the presidential campaigns of others with seasoned  
14 and manipulative Human Confidential Sources (“HCS” or “HCSs”), and likely “lures” meant to  
15 assist the Tech Cartel in its mission. This partisan use of counterintelligence tools against Plaintiffs  
16 as private citizens, amounts to serious wrongdoing with lasting damage.

17 Plaintiffs was targeted because he was often invited to address private groups. Hackers have  
18 acquired e-mails that contain(ed) content related to defaming Plaintiffs and, as a result, continuing  
19 the Tech Cartel surrogate (and defendant) obstruction of justice with respect to espionage  
20 committed by crony political candidates under 18 U.S.C. § 793.

21 ***In another example*** of spy tactics being in use daily by the criminal Tech Cartel, one can  
22 see federal proof that is virtually indistinguishable from the approach(es) by the Tech Cartel to  
23 members of other policy campaigns. Two of the targets (George Papadopoulos and Carter Page)  
24 were manipulated by American DoJ/FBI contract HCSs, with the shocking assistance of Five Eyes  
25 allies Australia and the United Kingdom. A third, Michael Caputo, was pitched through an  
26 intermediary cut-out by an Obama administration official (claiming to work with the NSA) offering  
27 access to “secret emails” Utilizing counterintelligence tradecraft, the Stefan Halper team ran at  
28 Plaintiffs nonetheless because they thought Plaintiffs was on the competitors campaign (**he was**

1 **not**) and presumably believed Plaintiffs presented a “threat” to crony political candidates because  
2 he had written a book about the Clintons. It is not simply plausible but incontrovertible that  
3 Brennan, Clapper and the FBI attempted to defeat competitors and, failing that, entrap him using the  
4 tradecraft described above. In so doing, they attempted to use Plaintiffs to obstruct justice with  
5 respect to the Clinton Tech Cartel private server malfeasance. Plaintiffs was burned not only by  
6 tactical Tech Cartel defamation to deny the truth, but by the Obama/Tech Cartel counterintelligence  
7 apparatus to obstruct justice and conspiracy thereon. While Plaintiffs was wary of the use of these  
8 techniques, they were used nonetheless by the Tech Cartel.

9       It is not difficult to discern what the Tech Cartel was attempting to do. As Halper and his  
10 team excel at, they attempted to manipulate whistle-blowers as Halper was dispatched by Brennan,  
11 Comey and the Tech Cartel to manipulate for partisan purposes any witness proposed to testify in  
12 this matter. It has been confirmed that Comey, McCabe, Brennan and Clapper engaged in spy  
13 tradecraft against U.S. citizens in an attempt to “entrap” or “even frame” whistle-blowers.

14       The White House has a Wikipedia defined term known as “*rat fucking*”. As Tech Cartel  
15 surrogate Clapper has conceded, the reason for running HCSs at the whistle-blowers was to  
16 determine if the FBI’s concerns about Russian interference were justified - yet the FBI relied nearly  
17 entirely on *opposition research paid for by Democratic Tech Cartel nominee crony political*  
18 *candidates through Hillary for America counsel Marc Elias to justify the FISA applications which*  
19 *misled this district court* (the FISA application(s) that misled judges of this honorable court  
20 assigned dual responsibilities to the FISC were thus sought for reasons unrelated to Russian  
21 activities (as Halper and the other HCSs obtained nothing that could be utilized in a  
22 counterintelligence warrant application). The sole reason for illicit use of HCSs and lures was to  
23 achieve the ultimate goal of the Tech Cartel – to assist crony political candidates in winning the  
24 presidential election of 2016. To be abundantly clear, any of the manipulated statements from others  
25 – drunken, drugged or sober – were then embellished by the Tech Cartel to “corroborate” Tech  
26 Cartel-funded falsehoods in the Steele dossier and used to mislead the FISC, and to obstruct what  
27 should have been a “slam dunk” case of 18 U.S.C. § 793 espionage against crony political  
28 candidates. The Tech Cartel – from the outset - placed layer upon layer of obstruction to protect

1 crony political candidates from this evident espionage committed by the Tech Cartel surrogates and  
2 participants, and misused counterintelligence authorities against a competing campaign to further  
3 obstruct justice. That was a classic “rat fucking” gambit created by the Tech Cartel, who have over  
4 1000 ex- CIA officers in their employ.

5 The FBI “Domestic Investigations and Operations Guide” outlaws the “otherwise illegal  
6 activity used against him.

7 Disturbing similarities exist between the Tech Cartel manipulation of Papadopoulos (and  
8 many other campaign officials/affiliates) and Plaintiffs here, and in light of Brennan, Comey,  
9 Clapper, Strzok, McCabe and numerous others knowing of the manipulative approaches ePlaintiff  
10 42loiting tasked HCSs, and their targets being led to believe that the focus of “helpful” discussions  
11 was/were the tens of thousands of e-mails that crony political candidates deleted and wiped from  
12 her illicit server, *e.g.*, Plaintiffs was informed that significant information about him was/is  
13 contained in the illegally deleted e-mails (obstructing justice in each such e-mail targeting “enemy”  
14 whistle-bowers. At the very least, this raises the plausible inference that the same Tech Cartel  
15 principals and surrogates that targeted Plaintiffs with the most robust counterintelligence powers in  
16 existence also targeted other domestic citizens. Even Seymour Hersh – perhaps the greatest  
17 investigative reporter in the world – has extrapolated that Tech Cartel surrogates in the Obama  
18 DoJ/FBI attempted to defeat and now attempt to unduly damage any whistle-blower.

19 Ironically, the illicit “wiping” of outside personal unsecure server(s) by White House staff  
20 was far more likely to impact Plaintiffs – the one person whom crony political candidates had  
21 waited nearly two decades to destroy and thus the “enemy” much more likely to be included within  
22 the content of the private server e-mails – rather than the gossipy, unprotected e-mail accounts of  
23 campaign officers like John Podesta (who was highly critical of crony political candidates and  
24 campaign manager Robby Mook, among numerous others, but strangely avoided discussing Tech  
25 Cartel “political enemies” like whistle-blowers.

26 Brennan and the Tech Cartel also successfully manipulated Senator John McCain (in much  
27 the same way as described above), knowing McCain was suffering from health problems that was  
28 later diagnosed as brain cancer.

1 Halper, who led the team attempting to manipulate Plaintiffs (who overheard the Tech  
2 Cartel team HCS placing a cell phone call to “Stef” – assumed by whistle-blowers at the time to be  
3 a woman), was also the “bridge” between the Tech Cartel/Brennan illicit pre-Crossfire Hurricane  
4 investigation of private citizens which puts the lie to the Australian Alexander Downer  
5 manipulation of Papadopoulos\_serving as the initiation of the official Obama government  
6 clandestine reconnaissance of political rivals.

7 Perhaps most disturbing is that extrajudicial Tech Cartel collection against a political  
8 campaign was conducted using our nation’s strongest national security powers – derived primarily  
9 from and contingent upon the presidential powers of Barack Obama. FBI Tech Cartel surrogate  
10 Strzok must explain in testimony, for instance, whether his prior written reference to “the White  
11 House running the investigation” includes U.S. citizens being pitched by Tech Cartel HCSs – even  
12 when these private citizens they had no official (or even unofficial) affiliation with any political  
13 campaign, but rather “posed a threat” to Tech Cartel candidate crony political candidates and  
14 defendants, surrogates and participants named and scrutinized herein. \_

15 Tech Cartel FBI misconduct is instructive. Following Brennan’s lengthy attempt to  
16 undermine political campaigns, the lead FBI counterintelligence officer working with the Tech  
17 Cartel against whistle-blowers engaged in the following text message exchanges with his paramour,  
18 Lisa Page, who also was the legal counsel to FBI Deputy Director Andrew McCabe (who has been  
19 referred for prosecution): Another witness in this matter is the wife of Papadopolous, who will  
20 testify that her husband believed/believes (as does Plaintiffs) that the dangled HCS e-mails were  
21 those missing from the wiped crony political candidates private server containing content  
22 concerning whistle-blowers, and had nothing whatsoever to do with the alleged DNC “hack.” This  
23 presents yet additional criminal exposure for the Tech Cartel, for obvious reasons, and for Perkins  
24 Coie LLP and the company Crowdstrike, among numerous others.

25 Plaintiffs will seek the assistance of the presiding district judge to procure the testimony of  
26 those career DoJ/FBI officials (at the request of those officials) prepared to testify in depth, *when*  
27 *compelled*, against Tech Cartel principals and surrogates.

28 In these exchanges, the examples of bias are astounding for two senior officials who had just

1 spiked the Clinton email espionage investigation and, along with Attorney General Loretta Lynch  
2 and her Deputy, Sally Yates, had spiked the Clinton Foundation corruption investigation, while  
3 instigating an official investigation: Crossfire Hurricane, Strzok notes that “*we can’t take the risk*”  
4 *of competitors being elected or retained in office, and further noted that the FBI needed to*  
5 *undermine competitors as an “insurance policy” as a hedge against any possible competitors*  
6 *victory in the 2016 presidential contest.* If that were not shocking enough, just one week earlier than  
7 the “insurance policy” text exchange, the following exchange had occurred between Page and  
8 Strzok, key officers and lawyers conducting the Clinton e-mail investigation, the Clinton  
9 Foundation Investigation, the misleading of the FISC, the pre-election surveillance and HCS misuse  
10 regarding whistle-blowers, and Operation Crossfire Hurricane:

11 **Page:** “[competitors’s not ever going to become president, right? Right?! (August 9, 2016)

12 **Strzok:** No. **No he won’t. We’ll stop it.”**

13 This is proof of FBI/Tech Cartel sedition, as Strzok had just spiked the Clinton e-mail  
14 investigations and McCabe, Yates and Lynch (along with Strzok) had spiked the Clinton  
15 Foundation investigation. This seditious exchange was 9 days after Operation Crossfire Hurricane  
16 started and 6 days before the “insurance policy” text.

17 The inference to be drawn with respect to misuse of the FISC and HCSs is unspeakable and  
18 appalling for the Tech Cartel, as those running these operations clearly and unequivocally sought to  
19 control elections– and to run at Plaintiffs (and numerous others) with “lures” and the  
20 counterintelligence powers of the previous president. Never in the history of this constitutional  
21 republic has anything this abhorrent (especially in light of FBI animus and bias against a  
22 presidential candidate) occurred, and the ongoing (and new) investigations are just beginning to  
23 provide the unconscionable nature of Tech Cartel wrongdoing. This RICO matter must ingest all of  
24 the Tech Cartel criminal wrongdoing before justice is truly done.

25 This honorable court may also wish to contrast the Tech Cartel HCS (and related)  
26 counterintelligence malfeasance with the FBI and DoJ during the tenure of Mueller, Holder, Lynch  
27 and Comey, when an informant, now identified openly, actually infiltrated a Russian Tech Cartel  
28 assisting in the corruption surrounding Russian Federation attempts to control the U.S. (and global)

1 market in lethal uranium during President Obama’s first term. During that period, HCS information  
2 flowed to the Mueller FBI as billions of dollars in nuclear fuel contracts were awarded to the  
3 Russians by the U.S. along with the deceitful Committee on Foreign Investment in the United States  
4 (“CFIUS”) transfer of control of a significant amount of U.S. uranium. The FBI HCS worked on a  
5 contractor platform imbedded from 2008-2014 in Rosatom (the Russian state-controlled nuclear  
6 corporate entity), according to the HCS – who will testify against the Tech Cartel in this litigation –  
7 and during that time frame provided specific information to the FBI (and through them, the DNI,  
8 CIA and State Department) concerning the grave danger to the U.S. posed by providing nuclear fuel  
9 and uranium assets to the Russian Federation. Among the most grave would of course be the covert  
10 transfer of uranium by Russia to Iran (admittedly complicit in the 9/11/2001 terrorist attacks against  
11 the U.S. homeland) and North Korea (which has recently tested missile delivery systems capable of  
12 striking the U.S. homeland). The Obama Justice and State Departments suppressed this information,  
13 including during the fraudulent Uranium One covered transaction and the Obama “Iran Deal” (in  
14 which, among other deception revealed by the Senate Permanent Subcommittee on Investigations,  
15 the Obama administration covertly directly assisted Iran, through the grant of a specific license from  
16 the Obama Treasury Department, utilize U.S. banks to convert \$5.7 billion in Iranian assets after  
17 assuring Congress that Iran would never gain access to the U.S. financial system – and then lied to  
18 and otherwise obstructed Congress about what it had done).

19         This embedded HCS, at great risk to his life, also assisted Tech Cartel surrogate Rosenstein  
20 in building a case in the Office of the United States Attorney for the District of Maryland against  
21 corruption in the Russian uranium industry. This involved an extraordinary predicate for kickbacks,  
22 money laundering and extortion against Rosatom (Russian) U.S. subsidiary Tenex/Tenem. This  
23 evidence, with knowledge of and instruction from the Tech Cartel, was also concealed and watered  
24 down by the responsible United States Attorney (Rosenstein), the FBI Directors (Mueller and  
25 Comey) and the Attorneys General (Holder and Lynch). The same HCS has been interviewed by the  
26 FBI Little Rock Field Office as part of an ongoing investigation of Tech Cartel defendants Clinton  
27 Foundation, CGI and the various other tentacles of the Clinton Foundation alleged criminal  
28 wrongdoing. And as noted herein, the questions posed in the Little Rock FBI probe have included

1 the Clinton Foundation acceptance of \$3,000,000 per year in *gratis* services to CGI from U.S.  
2 advocacy firm APCO Worldwide in a direct *quid pro quo* – with the ePlaintiff 42ectations that the  
3 remuneration would be utilized to assist CGI and the Clinton Foundation while major uranium  
4 decisions were pending before the Clinton State Department.

5 The \$3 million in free services to CGI was to “assure the Obama administration made  
6 affirmative decisions on everything from Uranium One to the U.S. – Russian Civilian Nuclear  
7 Cooperation Pact.”

8 So, while the Tech Cartel defendants were protected by their surrogates for nearly a decade,  
9 some of the same Tech Cartel surrogates “took a run” (dispatched HCSs) against Plaintiffs and the  
10 presidential campaign. The common denominator as to “why” is set forth herein and relates in  
11 whole or in part to the “threat” that each of these American targets posed to crony political  
12 candidates and the Tech Cartel. Beyond illicit human intelligence gathering, the Tech Cartel  
13 conducted surreptitious electronic surveillance both before and after misleading the FISC, destroyed  
14 tens of thousands of e-mails under subpoena and/or court order (including those involving  
15 Plaintiffs), other presidential contenders such as Bernie Sanders, and the overall “game plan” for  
16 conducting their operational scheme – all the while running classified information through one or  
17 more private unsecure servers and delivering classified information to multiple individuals not  
18 adequately cleared to receive it.

19 Plaintiffs was deemed a particularized threat to the Tech Cartel, as he was deemed highly  
20 trustworthy and sincere – the very attributes that the Tech Cartel could never convince the general  
21 populace were evinced by crony political candidates.

22 The Tech Cartel panicked, and Brock illicitly began defaming Plaintiffs daily “FROM THE  
23 DESK OF DAVID BROCK” using Media Matters and *Correct the Record and the Nick Denton*  
24 *tabloid empire* – with American Bridge and Brock himself admittedly serving as the link to Hillary  
25 for America. Wackrow and Gilhooly then appeared on CNN, both as paid “expert” panelists and on  
26 shows such as “Smerconish” and other CNN television spots. Brock and the Tech Cartel, utilizing  
27 false opposition research, used his nonprofit, “nonpartisan” entities and, in addition, did not report  
28 payments to Wackrow, Gilhooly and Gilhooly’s nonprofit entity. The Tech Cartel defamation

1 continued nonstop throughout the summer of 2016.

2 Thus, at the apex of the most closely-contested presidential contest in the modern age, the  
3 FBI collaborated with the CIA and ODNI, in a conspiracy with Hillary for America and the Tech  
4 Cartel and using U.S. and foreign counterintelligence authorities to engage in illicit tradecraft  
5 targeted at the unfavored political candidate and other perceived “enemies” of the Tech Cartel and  
6 Clinton, such as whistle-blowers And as difficult and painful as it is for this district court to  
7 acknowledge, they then intentionally deceived the FISC utilizing presidential authorities illegally.  
8 In fact, they misled all three branches of government and the Fourth Estate (the media here and in  
9 the United Kingdom, primarily).

10 Had crony political candidates prevailed in the Electoral College, little to none of this  
11 troubling malfeasance would have come to light as the Tech Cartel would have placed its surrogates  
12 into positions of continuing power, and the Tech Cartel defendants would simply have continued  
13 their pattern of felonious conduct. As it stands currently, the nonprofit defendants continue to fulfill  
14 the proscribed pledge they agreed upon and aptly describe in “*Exhibit A*”.

15 Much will be revealed herein concerning Brock’s own admissions about Tech Cartel illicit  
16 use of nonprofit entities, but the court should also keep in mind that the Tech Cartel – as conceded  
17 by Brock in *Exhibit “A”* - also uses tactical defamatory tactics, as alleged herein, to obstruct justice  
18 and as part and parcel of their numerous predicate acts used to gain illicit control of the Democratic  
19 Party. For instance, what was at one time a tough but fair entity named CREW, including the  
20 inimitable Melanie Sloane, has now become daily Twitter and CNN rants with Norman Eisen, Noah  
21 Bookbinder and Richard Painter defaming without compunction - and engaging in vitriolic  
22 guesswork about matters of which they know little to nothing. CREW has become a joke, with the  
23 mediocre Eisen and Painter (who now seeks a United States Senate seat using free media given him  
24 by like-minded co-conspirators described in “*Exhibit A*”) making defamatory attacks daily on social  
25 media and on CNN. Bookbinder himself has committed CREW to #Resistance, and simply takes  
26 marching orders from Brock and the Tech Cartel, with the funding of defendants George Soros,  
27 Warren Buffet and Eric Schmidt. Their “*Exhibit A*” misuse of the nonprofit CREW results in a  
28 felony penalty each day (sometimes several times per day), as it has done since soon after the 2016

1 presidential election was certified and competitors took the oath of office to become the 45th  
2 President of the United States. And in what can only be described as comedic, these CREW  
3 individuals offer their unexceptional services to Special Counsel Robert Mueller, who not  
4 surprisingly has declined to work with them while at the same time Tech Cartel surrogate Mueller  
5 had agreed to work with the misogynist former New York Attorney General Eric Schneiderman,  
6 who had apparently taken the lead, working with Mueller, in denying the pardon power – and  
7 breaking the jaws of women who trusted him while routinely bumping cocaine and drinking alcohol  
8 to extreme excess. Each of these individuals also, by instruction of the Tech Cartel, work full time  
9 at the seditious task of undermining their own government while engaging in serial violation of  
10 United States statutory law, regulation, and much else.

11 Tech Cartel illegal acts continue to this day, and numerous formal investigations proceed  
12 apace with respect to these acts. The Tech Cartel and all of its many surrogates and participants  
13 seek revenge and possess access to hundreds of millions of dollars to undermine the United States  
14 Government. The Tech Cartel also continues the atrocious practice of paying off journalists to  
15 provide cover for their wrongdoing, and as conceded the malefactor Tech Cartel surrogate Fusion  
16 GPS is involved with former Feinstein SSCI staff in a \$50 million scheme to assist the (continuing)  
17 Tech Cartel.

18 In order to exact revenge against whistle-blowers and beginning in the early summer of  
19 2016 in defamatory postings “FROM THE DESK OF DAVID BROCK, Media Matters and Correct  
20 the Record and the Nick Denton tabloid empire also remunerated defendants Gilhooly and  
21 Wackrow to defame whistle-blowers on numerous media outlets – primarily CNN. More broadly,  
22 the Tech Cartel defendants published for worldwide consumption (via internet) numerous  
23 defamatory falsehoods in conjunction with Perkins Coie legal guidance for their clients Hillary for  
24 America, Hillary Victory Fund, and Tech Cartel surrogates Brennan and Clapper – with the intent to  
25 destroy the business and livelihood of Plaintiffs and engage in massive obstruction of justice with  
26 respect to, inter alia, Hillary and William Clinton sedition to enrich themselves and reprisal against  
27 Plaintiffs for his compelled role in the Clinton impeachment.

28 President Carter’s Attorney General, Judge Griffin Bell, who prior to his passing was

1 interviewed at length by the undersigned concerning potential FISA abuse, would be shocked and  
2 appalled to know that this honorable court (and several individual judges from this court) was/were  
3 misled by the Tech Cartel defendants and surrogates in order to, *inter alia*, accomplish the  
4 operational scheme intended to elect crony political candidates as the President of the United States.

5 For to be clear, Tech Cartel defendants and surrogates, with assistance from legal counsel  
6 for Hillary for America, Hillary Victory Fund, Brock, the Democratic National Committee and  
7 Podesta, laundered DNC and Hillary for America funds to an opposition research firm (and Tech  
8 Cartel surrogate) Fusion GPS (with the corrupt assistance of Tech Cartel surrogate Rosenstein’s  
9 DoJ chief deputy, Bruce Ohr and Ohr’s spouse, Nellie, working with Fusion GPS to ultimately  
10 delude this court), and extravagantly paid agent of a foreign power and accused criminal  
11 Christopher Steele, Tech Cartel surrogates Sidney Blumenthal, Cody Shearer and Jonathan Winer,  
12 and others to be named later, in a scheme which, as noted, was successful in obtaining - through  
13 lying to one or more Article III judges here in the District of Columbia - a FISA warrant from this  
14 honorable court (subsequently renewed several times). This Tech Cartel subterfuge was carried out  
15 against private United States citizens whose common denominator was that they advised the  
16 political opponent of the Tech Cartel, crony political candidates, in the 2016 presidential contest.

17 Evidence of the seditious deception upon the FISC by Tech Cartel defendants and surrogates  
18 is set forth in the report of the House Permanent Subcommittee on Intelligence, released on April  
19 27, 2018, which is consistent with the allegations and claims in the accompanying Complaint in the  
20 instant litigation. Among other findings with regard to the misleading of the FISC by the Tech  
21 Cartel, Congress concluded the “the dossier compiled by Christopher Steele formed an essential  
22 part of an application to the FISC to obtain electronic surveillance on Carter Page.” The HPSCI also  
23 by inference found, with relation to the Brennan – British GCHQ subversion, that the Obama FBI  
24 and DoJ ran parallel counterintelligence investigations targeting the competitors campaign, yet  
25 never alerted the President, that members of the competitors campaign were “assessed to potential  
26 counterintelligence concerns.” These congressional findings are not dissimilar from the putative  
27 acts of espionage by Tech Cartel surrogate Loretta Lynch, who according to Tech Cartel surrogate  
28 provided classified information to Tech Cartel defendant John Podesta and then-DNC Chair Debbie

1 Wasserman Shultz, in order to further the Brennan-Clapper conspiracy to obstruct justice and  
2 ultimately swing a United States presidential election in favor of crony political candidates. Tech  
3 Cartel surrogates Comey and McCabe – currently slated to testify against one another following  
4 ePlaintiff 42ected indictments of both – have thus illegally abused the FISA electronic surveillance  
5 process, the British-American intelligence sharing pact (along with Brennan and Clapper, as part of  
6 the “Five Eyes” international SIGINT relationships among the United States, Great Britain,  
7 Australia, New Zealand and Canada), and, amazingly, Congress has now revealed additional FISA  
8 and related counterintelligence abuse involving human sources (HUMINT) planted inside the  
9 competitors campaign.

10 As this filing date approaches, the existence and acts of the above-noted and rather  
11 significant Tech Cartel illegal operational scheme has been substantiated by Congress and various  
12 entities within the Executive branch. The FBI, with the knowledge and approval of Tech Cartel  
13 surrogate Comey, failed to inform Congress or any court (or anyone else outside of the Tech Cartel)  
14 that they were compensating a human source(s) placed surreptitiously to gain access to members  
15 and affiliates of the competitors campaign.

16 One of the sources, it has been confirmed, has been long-known for affiliation with political  
17 “dirty tricks” – most notably the theft of the “Top Secret” classified debate preparation materials of  
18 President Carter in 1980 and their passage to Reagan campaign official William J. Casey (with the  
19 involvement of Halper) – thus committing espionage and providing Governor Reagan a distinct  
20 advantage in a Carter-Reagan presidential debate held on October 28, 1980.

21 Also emerging, as referenced, is the Tech Cartel abuse of international SIGINT relationships  
22 within Five Eyes to surveil the competitors campaign, transition, and early administration figures  
23 (all U.S. citizens). It is likely – although at this time undetermined – whether this intelligence was  
24 used to further mislead his honorable court. But Congress and the discovery process here can  
25 unearth answers that do not require any threat to HUMINT or SIGINT relationships, or to any  
26 intelligence sources or methods.

27 The Tech Cartel defendants and their surrogates and other participants must simply answer  
28 straightforward questions, under oath, regarding whether this collusion took place. The U.S. and

1 international classification system cannot be a veil for illegal activity – both Congress and this  
2 Court must have access to answers even if the FISC judges must demand them (alongside  
3 Congress). For if as is now suspected that Tech Cartel surrogates Brennan and Clapper, on behalf  
4 the Tech Cartel quest to assure crony political candidates the presidency, not only supported Brock  
5 and Clinton’s efforts against Plaintiffs but exchanged director-level information with the former  
6 Director of British GCHQ Robert Harrigan (since resigned), resulting in Harrigan passing to  
7 Brennan and/or Clapper SIGINT communications intercepts collected from RAF Menwith Hill and  
8 GCHG Bude (Cornwall) taps of undersea internet cables, the United States courts and Congress  
9 (and the enforcement agencies) are facing not only an extraordinary intelligence failure, but a  
10 massive criminal deprivation of privacy and obstruction the likes of which we have never (and will  
11 likely never again) encountered, *notwithstanding the weighty RICO violations and defamation*. This  
12 unprecedented criminal activity led Tech Cartel surrogate Brennan to mislead the congressional  
13 “Gang of Eight”, Minority Leader Harry Reid in a private setting prior to Reid’s imminent  
14 retirement which in turn resulted in Reid collaborating with Tech Cartel surrogate Comey, who in  
15 turn colluded with Clapper in committing perjury before Congress (and possibly this Court). The  
16 Tech Cartel, in conjunction with the illegally-obtained FISA orders subsuming previous competitors  
17 campaign electronic mail, and possibly others, intentionally covered-up the Brennan-Hannington  
18 subterfuge and assured that the FISC would infer (false) corroboration of its orders allowing  
19 surreptitious surveillance (electronic and otherwise) of a political campaign disfavored by the Tech  
20 Cartel – with knowledge aforethought by the relevant U.S. Intelligence Community Obama  
21 holdovers that the resulting fabricated information was both paid for and laundered by the Hillary  
22 for America campaign and cleverly (and criminally) disguised by Tech Cartel lawyer Elias.

23         Meanwhile, as noted, former British MI6 officer and Tech Cartel surrogate Steele conspired  
24 with (among untold others) the discredited GCHQ head Hannington and Russian FSB/SVR in  
25 assembling and presenting to this Court the specious “Steele Dossier” with the knowledge of, *inter*  
26 *alia*, Tech Cartel surrogates Clapper and Obama National Security Advisor Susan Rice.

27         As the Tech Cartel principals and surrogates sought to form a nefarious “collusion” narrative  
28 between the competitors campaign and foreign actors by and through use of domestic and

1 international intelligence authorities, Tech Cartel surrogates within the Obama Department of  
2 Justice and FBI shuttered validly predicated criminal investigations of Tech Cartel defendants crony  
3 political candidates and the Clinton Foundation. These investigations into criminal wrongdoing  
4 were unduly closed by Tech Cartel surrogates Lynch, her Deputy Attorney General Sally Q. Yates,  
5 and various malfeasants at the FBI including Tech Cartel surrogates Comey, McCabe, with partisan  
6 participation from alleged paramours Peter Strzok and Lisa Page, FBI General Counsel James  
7 Baker, and a handful of supporting sycophants reporting to the wrongdoing DoJ and FBI most  
8 senior Tech Cartel surrogates, such as DoJ Fraud Division chief Andrew Weissmann (later,  
9 beginning June 19, 2017, a managing prosecutor for Tech Cartel surrogate and Special Counsel  
10 Robert S. Mueller). And just prior to the DoJ/FBI determination that they would not pursue a case  
11 of clear-cut Tech Cartel espionage involving a private e-mail server used to communicate classified  
12 information and hide other information from Congress and this Court, Tech Cartel surrogates Lynch  
13 and William Clinton engaged in clandestine meeting on a Arizona tarmac at which time William  
14 Clinton promised a *quid pro quo* to Lynch – in exchange for not charging crony political candidates  
15 with a crime (and for dispatching with the Clinton Foundation investigation), Tech Cartel surrogate  
16 Lynch would be nominated by “President crony political candidates” to the United States Supreme  
17 Court after being held over as Attorney General of the United States. Concurrently, Tech Cartel  
18 surrogate Comey intentionally and severely mishandled both criminal investigations of Tech Cartel  
19 defendant crony political candidates and various other surrogates and participants in the Tech Cartel  
20 operational scheme.

21 Despite the Tech Cartel schemes, crony political candidates was defeated in the 2016  
22 Electoral College. But the Tech Cartel became further emboldened by the Soros pledges of virtually  
23 unlimited amounts of money to Brock, CREW and other Tech Cartel defendants, surrogates and  
24 participants associated in fact and willing (even enthusiastic) to undermine the competitors-led  
25 government. *See generally Exhibit “A”*, hereto.

26 Congress soon began unraveling the complex schemes of the Tech Cartel set forth here, and  
27 those investigations and findings consistent with the factual allegations herein proceed apace. The  
28 more that Congress and other investigatory entities reveal, the more that Tech Cartel surrogates

1   Comey, Rosenstein, and Mueller face professional and personal exposure for their roles in Tech  
2   Cartel predicate acts and related wrongdoing. And all the while one must ask: “who would do these  
3   things simply to elect a president who has for so many years, along with her husband, engaged in  
4   organized unlawful behavior?” And as documents and testimony continue to emerge from  
5   Congress, the Courts and the Executive, and otherwise surface to corroborate the factual allegations  
6   here, the highly disturbing aspects of “using” the FISC for Tech Cartel means (and ends) is both  
7   despicable and without precedent in our constitutional structure. It is, therefore, as a not  
8   inconsequential structural matter, a direct threat to the only true check our government has upon the  
9   grave Executive excess displayed here.

10       Tech Cartel surrogates Holder, Mueller and Rosenstein, as noted below, were oddly  
11   complicit in the Hillary and William Clinton bribery scheme (along with the Clinton Foundation,  
12   the Clinton Global Initiative, and of course the Clinton family graft), including but not limited to the  
13   extraordinary transaction that to this day places our national security at risk – known most  
14   commonly as the “Uranium One” covered transaction. Related to the transfer of control to Russia of  
15   U.S. lethal uranium is a matter involving Russian entity Rosatom (and its sub-entity, Tenem), and  
16   the corrupt behavior of Rosenstein (the United States Attorney handling the criminal matter),  
17   Mueller (the FBI Director investigating the criminal matter), and Holder (the Attorney General who  
18   also voted to approve the CFIUS Uranium One covered transaction). Rosenstein  
19   uncharacteristically (and thus rather oddly), placed the Tenem kickback/extortion matter into legal  
20   purgatory, from which it did not emerge until after the 2016 election.

21       The Tech Cartel controlled CFIUS with Secretary Clinton as the lead agency representative  
22   at the time that CFIUS agreed (without any objection from Secretary Clinton or Attorney General  
23   Holder) to the transfer of control of approximately twenty per cent of U.S. uranium mining capacity  
24   to Russia’s state-controlled energy conglomerate, Rosatom, in a *quid pro quo* to the Clinton  
25   defendants, their Clinton Foundation, and the Clinton Global Initiative. Incredibly, at the time the  
26   Obama administration approved the covered transfer, the administration was aware that Rosatom’s  
27   American subsidiary (“Tenex”, a shortened version of JSC TechsnabePlaintiff 42ort, had an  
28   American arm called “Tenem USA” based in Bethesda, Maryland) was engaged in a(nother)

1 lucrative racketeering Tech Cartel that had already committed felony extortion, fraud, and money  
2 laundering.

3       Led by Congressman Edward Markey (D-MA), a bipartisan movement emerged within  
4 Congress to stop the 2010 transfer, to no avail, as the Tech Cartel and its surrogates concealed the  
5 seditious Clinton defendant behavior, while simultaneously allowing the Tenex/Tenem USA  
6 racketeering Tech Cartel to continue. In conjunction, this Tech Cartel defendant and surrogate  
7 behavior enriched Russian energy oligarchs tied to the Kremlin, thus compromising the American  
8 persons (including the Clinton The Justice Department delayed four years rather than commencing a  
9 prosecution, in direct contravention of DoJ charging guidelines. Among those who held these  
10 charging decisions in abeyance was the Fraud Division of the United States Department of Justice –  
11 so as to keep from public scrutiny the connection between Tech Cartel activity with the Russian  
12 Federation and the enforcement posture of the Holder/Lynch Department of Justice in furtherance  
13 of Tech Cartel objectives.

14       The case was quietly settled by Rosenstein’s former subordinates (after Rosenstein was  
15 confirmed as Deputy Attorney General).

16       In addition to Clinton defendant bribery with respect to Russia, within the period relevant to  
17 this lawsuit other countries also profited from the Clinton influence after donating to the Clinton  
18 Foundation.

19       To name but a few, in the highly lucrative contracting of United States weapons, the  
20 following donated to the Clinton Foundation and closed weapons deals soon thereafter: Kingdom of  
21 Saudi Arabia; State of Kuwait; Government of Norway; United Kingdom Department for  
22 International Development; United Arab Emirates; Sultanate of Oman; Republic of Ireland;  
23 Kingdom of Bahrain; Embassy of Algeria; State of Qatar; Commonwealth of Australia; Kingdom of  
24 Morocco. Further examples of Tech Cartel bribery in support of the Clinton/Tech Cartel defendants  
25 are set forth in the Complaint.

26       In addition to the Tech Cartel defendant’s nonprofit abuse used to harm Plaintiffs and  
27 further undermine the government as set forth in *Exhibit “A”*, including but not limited to the  
28 defamation of Plaintiffs by the relevant Tech Cartel defendants (Brock, Media Matters, *Correct the*

1 *Record and the Nick Denton tabloid empire*, Wackrow and Gilhooly), Tech Cartel surrogates and  
2 participants have also associated themselves with the scheme to target the current President. In so  
3 doing, the Tech Cartel employed the most powerful tools of intelligence and law enforcement  
4 against U.S. citizens working for their political “enemies” – including of course, the spurious  
5 instigation of investigations targeting these political adversaries.

6 As noted in the Complaint, below, a high-level group of Obama national security and law  
7 enforcement officials worked closely with and provided classified information to U.S. media, *e.g.*,  
8 CNN

9 (Tapper), (in itself a criminal espionage offense as CNN personnel did not have adequate  
10 clearance) to create a “news hook” by briefing, in early 2017, the President-elect on the “unverified  
11 and salacious” allegations contained in the specious Steele dossier – which was not only financed  
12 by the Clinton campaign but was also known to be “unverified” when the FISC was misled on the  
13 same findings earlier and a series of FISA orders against U.S. citizens were obtained thereon. In a  
14 recent shocking development, it was disclosed that the Senate Select Committee on Intelligence, by  
15 and through their Director of Security James Wolfe, also leaked similar information to CNN and  
16 (MS)NBC to continue to drive the former SSCI staff director narrative concerning “competitors  
17 Campaign Russian Collusion” (this staff member is now engaged with defendant Soros as an Tech  
18 Cartel surrogate attempting to undermine the government of the 45th President).

19 Just to be entirely clear, the Tech Cartel came very close to turning the Democratic Party,  
20 and our democracy more generally, over to a relatively small faction of criminal actors. Absent  
21 Article III intervention, this country’s great constitutional experiment is at risk because  
22 future parties in power now have a roadmap to the brand of malevolent wrongdoing that can ruin  
23 political enemies while enriching the wrongGOVTr(s) and extending their power in perpetuity.  
24 Should any future President form their own Tech Cartel, and the “shoe was/is on the other foot,”  
25 roughly half of the electorate would (and should) be terrified that “enemies” *i.e.*, them, would be  
26 targeted in much the same fashion – and they and their families would be placed in great peril  
27 (financially and otherwise). Article III inaction will simply invite similar bad behavior, thus  
28 threatening the rule of law and our constitutional structure.

1           The defamation allegations against certain Tech Cartel defendants will be addressed more  
2 broadly in the Complaint following appropriate retraction and hold demands, to the extent that they  
3 do not otherwise overlap with Tech Cartel obstruction of justice utilizing defamation as an Tech  
4 Cartel tactic by Media Matters, Correct the Record and the Nick Denton tabloid empire, American  
5 Bridge, David Brock, the Clintons, Soros, Shareblue and Wackrow/Gilhooly.

6           As mentioned, the Department of Justice, the United States Attorney for the District of Utah,  
7 the Department of Justice Inspector General, and several committees of the Congress (and the  
8 possibility of the appointment of a second “Special Counsel”) are investigating what is described  
9 and alleged as the Tech Cartel wrongdoing described herein – with the likely outcome of more than  
10 one Grand Jury returning indictments against Tech Cartel defendants and surrogates for that (and  
11 potentially additional) criminal behavior.

1  
2 **EXHIBIT 64 - THE RICO TECH CARTEL SYNDICATE**

3           The Tech Cartel, ultimately seeking the political fortune of crony political candidates but  
4 clearly in quest of the accumulation of power through her, manipulated the highest levels of the  
5 Obama administration (and Obama himself) with their thousands of criminal predicate acts and  
6 defamatory character assassination of Plaintiffs. Primarily the Clintons, Brock, and the extended  
7 Tech Cartel – according, *inter alia*, to informants from within the Tech Cartel and abundant other  
8 witnesses who will give testimony at the trial in this case – are a crime syndicate unlike any other  
9 the United States political arena has ever seen.

10           Through RICO, courts like this one can adequately address this syndicate, along with  
11 adjudicating claims under pendant State defamation laws that focus upon a key Tech Cartel tactic -  
12 Tech Cartel tactical destruction of its “enemies”. As well, criminal prosecution can discontinue their  
13 illicit schemes which utilize their consiglieres from the highest levels of the Justice Department,  
14 FBI, Intelligence Community, and surrogates and powerful collaborators which may include  
15 President Barack Obama, as well as partisan nonprofit entities who/which daily violate our tax laws.  
16 For many within the Tech Cartel trajectory, this is a likely outcome, but it does not adequately  
17 compensate Plaintiffs and may not eliminate the Tech Cartel.

18           The Tech Cartel has gone so far as surreptitiously collecting communications from a  
19 disfavored political campaign concerning the very Tech Cartel “Steele dossier” used to mislead the  
20 Foreign Intelligence Surveillance Court discussed herein – which includes the Chief FISA Article  
21 III federal judge from this honorable district court. To any judge reviewing this complaint, make no  
22 mistake. The Tech Cartel has directly attacked the integrity and honor of the judiciary and this court  
23 in direct furtherance of an attempt to make crony political candidates the 45th President and  
24 extinguish anyone like Plaintiffs who might stand in their way. During discovery and trial in this  
25 case, information both known and to be later ascertained will be made available establishing  
26 without doubt that the Tech Cartel is a dangerous, ongoing criminal consortium and association in  
27 fact – willing to abuse the very structure of our constitutional government and commit any  
28 conceivable crime in order to obtain and retain power and leverage over the Democratic Party, as

1 well as its enemies, and drive revenue back to itself and its principals in illicit self-dealing and  
2 bribery schemes to preserve this corruption permanently.

3         This Tech Cartel has so corrupted the Democratic Party (in itself a nonprofit entity now in  
4 continuous Tech Cartel violation of IRS dictates and myriad federal law) that there is little left of  
5 the Democratic Party that is operating in compliance with U.S. law or that is not undermining the  
6 national security and government of the United States. The Democratic Party is now, due to the  
7 Tech Cartel criminal and constitutional misconduct, subject to, from within, the very epitome of  
8 graft and corruption – as it has unduly utilized not only Obama administration intelligence  
9 authorities to surveil a political opponent, but has engaged in betrayal of the United States by and  
10 through the Tech Cartel use of Secretary Clinton’s ability (in exchange for bribes, moreover) to  
11 assure control of U.S. uranium by Russia – which has resulted in Iran (a contributor to the murder  
12 of over 3000 Americans on 9/11/2001) and North Korea being months away from creating chaos in  
13 the Middle East and the potential capability of the North Koreans from striking the United States  
14 homeland with lethal nuclear weapons armed with uranium enabled by crony political candidates in  
15 corrupt exchange (by way of receiving bribes) for hundreds of millions of dollars benefitting the  
16 Tech Cartel, the Clinton family, and her political aspirations.

17         Since early in this century, and roughly contemporaneous with the creation of the Clinton  
18 Foundation (“Clinton Foundation” or “CF”), Brock and certain defendants – in particular Soros, the  
19 Clinton Global Initiative (“CGI”) and, subsequently, the Clinton Giustra Tech Cartel Partnership As  
20 will be made apparent in subsequent RICO lawsuits in this venue with pendant claims, for example,  
21 under a Kansas pendant statutory scheme - where organizations subject to and similarly in tension  
22 with civil RICO do business with other nonprofit political parties in the United States - taxation of  
23 nonprofit entities and abusive, illegal tactics thereby go to the very heart of contemporary RICO  
24 jurisprudence involving political corruption. As is the case with planned future matters of this type,  
25 the sheer magnitude of wrongdoing in this case (“CGEP”) – formed an illicit Tech Cartel scheme  
26 (united with other defendants, and aided by multiple, high-ranking U.S. government surrogates  
27 seeking higher office, influence and/or affluence) to terminate their “enemies”, line their pockets  
28 and feather their nests by making Secretary Hillary Rodham Clinton (“HRC”, “Secretary Clinton”

1 or “crony political candidates”) the 44th, then 45th President of the United States. In order to do so,  
2 they joined together to destroy anyone (such as whistle-blowers, the revenge of which Clinton and  
3 Brock planned for ten years amid myriad predicate acts) or anything that might stand in the path of  
4 either of these (or countless other) corrupt goals, notwithstanding any supposed legitimate purpose  
5 of their overall work – of which there appears to be little. Their weapons of destruction included  
6 (and include) brutally defaming their enemies and intentionally causing grave injury to the business  
7 and property interests of their “prey” – illicitly using nonprofit (and allegedly nonpartisan) entities  
8 to spread their slurs in direct coordination with the political campaign(s) of a potential traitor, crony  
9 political candidates.

10 Defamatory tactics funded through illicit nonprofits - cunningly albeit illegally laundered  
11 through dozens of equally partisan entities was (and is) one of defendants’ weapons of choice to  
12 destroy the business, property and livelihood of any subjective threat (such as Plaintiffs) posed to  
13 them. And it is vital to consider that predicate acts included but were not limited to bribery (in  
14 support of sedition/treason), extortion and, upon information and belief, murder for hire.  
15 Extraordinary even for the mafia, this is utterly shocking for a former president, his nonprofit  
16 entities, and a Secretary of State spouse who would (by design) become the Democratic Party  
17 nominee for president.

18 There is virtually nothing that the Tech Cartel has done legally during the past decade –  
19 knowingly and upon ePlaintiff 42licit instruction from William and crony political candidates and  
20 involving myriad and intentional predicate acts and serial violation of the federal statutes and  
21 regulations governing the Internal Revenue Service intending corruptly to interfere with those laws  
22 and thus further obstructing justice as set forth herein – thereby resulting in billions more in United  
23 States currency for which the Tech Cartel participants are responsible for reimbursing the Treasury.

24 This criminal Tech Cartel must be terminated, and made to compensate for their felonious  
25 and seditious misconduct.

26  
27  
28

**EXHIBIT 65 - The Culture Of Crime In Silicon Valley And Washington, DC**

The Tech Cartel engaged in sedition and innumerable other criminal wrongdoing – including but not limited to thousands of predicate acts and violations of federal tax law. Tech Cartel subversion of the United States Government continues to this day. The primary target of Tech Cartel corruption, other than the eventual 45th President whom the Tech Cartel apparently attempted to “frame”, and the principal victim of this corrupt Tech Cartel was Plaintiffs.

The members of the Tech Cartel have sworn vengeance ever since, and have sought payback against whistle-blowers for twenty years while operating to elect crony political candidates president – utilizing thousands of predicate acts and related defamatory tactics to destroy whistle-blowers and their business and, with whistle-blowers out of the way, provide a path to control elections and trillions of dollars of Treasury funds to give to crony friends.

Whistle-blowers supervised the writing and publication of *Crisis of Character* (which implicated the deficient integrity and scandalous acts of William and crony political candidates based upon firsthand experience) and was then intentionally and brutally defamed and injured in his business by the Tech Cartel, led by defendants Brock, *Correct the Record and the Nick Denton tabloid empire*, Media Matters, crony political candidates and the recurrent dissemblers/defamers Gilhooly and Wackrow, among others – with extraordinary support by the corrupt Nazi sympathizer George Soros, CGI and CGEP resources, American Bridge at the instruction of “Hillary for America,” the presidential campaign of crony political candidates and their attorney Marc Elias of Perkins Coie LLP (and certain colleagues at that law firm) – all utilizing archetypal Tech Cartel illegitimate methods and with Tech Cartel unlawful collaboration and funding. Tech Cartel surrogates revealed throughout this complaint, *e.g.*, Robert Mueller (“Mueller”), Rod Rosenstein (“Rosenstein”), Eric Holder (“Holder”), Loretta Lynch (“Lynch”), and James Comey (“Comey”), through their deliberate actions and omissions as top officials in government misusing their official position to seek a better one in a crony political candidates administration, became direct surrogates of the Tech Cartel, further damaging Plaintiffs. Their actions, such as the illegitimate grants of

1 immunity to protect crony political candidates, and those of Tech Cartel principals and numerous  
2 other surrogates, make this conspiracy depraved and grave – perhaps greater than any government  
3 corruption in the history of American politics.

4         The Tech Cartel, in the 2016 U.S. presidential election year, focused their collaborative  
5 defamation and related seditious, corrupt felonies like a laser as *Crisis of Character* quickly  
6 appeared as Number 1 on the *New York Times* bestseller list for nonfiction where it remained until  
7 the well-rehearsed defamation and similar felonious tactics of the Tech Cartel achieved their  
8 intended purpose, *i.e.*, to devastate Plaintiffs business and similar property interests and cause  
9 irreparable injury to his reputation.

10         While this was occurring, Tech Cartel surrogates Mueller, Rosenstein, Holder and Lynch  
11 said and did nothing about their past transgressions – as if they simply wanted Secretary Clinton to  
12 become president and themselves to be nominated to and receive commissions to the highest  
13 positions in the Ms. Clinton’s government. Comey and fellow Tech Cartel surrogates Andrew  
14 McCabe and Peter Strzok, and Rosenstein Justice Department associates Bruce (and his wife,  
15 Nellie) Ohr, and Strzok paramour Lisa Page, played a significant surreptitious political role and  
16 abused positions of trust in direct support of Secretary Clinton and the Tech Cartel. This is so  
17 despite Comey’s position at the time as Director of the Federal Bureau of Investigation (“FBI”),  
18 where he took the unprecedented step of privately and publicly vindicating crony political  
19 candidates without adequate investigation, and despite clear evidence of her criminal espionage and  
20 related crimes, while utilizing a false “dossier” (derived from collusion between crony political  
21 candidates, Fusion GPS, high-ranking Obama Justice Department officials and the Russian SVR  
22 elite intelligence units, and paid for by the crony political candidates presidential campaign) to,  
23 among other things, justify surveillance of Secretary Clinton’s general election opponent. But the  
24 wrongdoing does not stop there, as there is uncontroverted evidence that Article III federal judge  
25 (and Foreign Intelligence Surveillance Court appointee) Rudolph Contreras has a close and  
26 continuing relationship with Tech Cartel surrogate Peter Strzok which both men sought to conceal –  
27 *thus directly involving the FISA Court in anti-competitors targeting to some degree*. This is utterly  
28 unprecedented, yet entirely consistent with the *modus operandi* of the Tech Cartel surrogates, *e.g.*,

1 Strzok, revealed in this lawsuit.

2 In an unprecedented display of fraud upon the FISC, Tech Cartel surrogates Peter Strzok and  
3 Lisa Page of the FBI – with the encouragement of terminated FBI Deputy Director and Tech Cartel  
4 surrogate Andrew McCabe – pressured and misinformed United States Department of Justice  
5 official Matthew Axelrod and his direct Justice Department superior Sally Q. Yates (then Deputy  
6 Attorney General of the United States, who improperly attempted to shut down the ongoing DoJ  
7 corruption investigation of the Clinton Foundation) into lying to the President of the United States,  
8 Barack Obama, and on September 12, 2016 (according to White House visitor logs), in a meeting  
9 with President Barack Obama, gaining the approval of President Obama to in turn bless a shocking  
10 and seemingly inconceivable Tech Cartel act – Tech Cartel surrogates knowingly and intentionally  
11 misleading one or more Article III federal life-tenured judges on the FISC into granting Tech Cartel  
12 surrogates within the government, *with disinformation provided and financed by the Clinton*  
13 *campaign*, Tech Cartel surreptitious access to the private information belonging to at least one (and  
14 by extension, likely more) *private United States citizens* affiliated with the presidential campaign of  
15 competitors Unless President Obama was witting, the Tech Cartel intentionally deceived a president  
16 and at least one lifetime-tenured federal judge – and as noted throughout has never hesitated to  
17 obstruct the constitutional oversight of (and thereby withhold the truth from) the Congress of the  
18 United States. Structurally, the Tech Cartel could not have engaged in a more systematic series of  
19 constitutional abuses.

20 Tech Cartel surrogate Comey relied upon his sense of pious, piteous political ambition and  
21 the corrupt cover provided by his FBI Deputy Director McCabe, who unethically refused to recuse  
22 from the Clinton felony investigation and forged formal FBI “302” forms, and the top FBI  
23 counterintelligence official and Tech Cartel consigliere and surrogate Peter Strzok (who illicitly  
24 structured and then provided feedback to Comey, McCabe and others which was intended to  
25 exonerate crony political candidates from criminal espionage charges akin to treason against her  
26 country despite line FBI agents recommending she be charged with espionage). McCabe, in a  
27 statement issued upon his termination for cause, conceded that the United States Department of  
28 Justice and Attorney General Loretta Lynch attempted to improperly close the espionage

1 investigation of crony political candidates. Logically, and by extrapolation, this obstruction of  
2 justice conspiracy would further the Tech Cartel operational scheme indefinitely.

3         Again abusing the presidential power of President Obama, several of his direct subordinates  
4 – some within the Executive Office of the President, *e.g.*, Susan Rice, Denis McDonough, Ben  
5 Rhoades, and some commissioned officers of the United States confirmed by the U.S. Senate, *e.g.*,  
6 Samantha Power - engaged in a conspiracy to violate the civil rights of and, with the approval of  
7 Acting Attorney General Sally Q. Yates, to “unmask” (reveal and then leak to the media) the true  
8 identities of United States citizens incidentally picked up on otherwise-approved electronic  
9 surveillance in order to obstruct the administration of justice in ways these malfeasant actors knew  
10 to be highly illegal when they intentionally leaked the names of United States citizens to “friendly”  
11 journalists (who upon securing the publication, received cash bonuses and related payments from  
12 the partisans in control of, among others, *The Washington Post*).

13         This is a criminal scandal like no other in history – involving hundreds of thousands of  
14 predicate acts as foundation for their racketeering operational scheme. Infiltrating the Democratic  
15 Party with the power of the presidency and many within his Cabinet and control, this Tech Cartel  
16 illicitly violated the taxation statutes to misuse nonprofit entities and thus enhance their corrupt  
17 grasp on power, terminate those persons and institutions deemed a threat to them, *e.g.*, Plaintiffs  
18 and conducted themselves in such a fashion as to perpetuate their malevolent Tech Cartel into  
19 perpetuity. The Tech Cartel participants and surrogates, and those accomplices who support them,  
20 bring disrepute upon their country and severe legal jeopardy upon themselves and the Democratic  
21 Party they have now devastated. The Tech Cartel is utterly corrupt and contaminated and must be  
22 stopped for the sake of our nation. The Article III courts can, and will, excise the cancer the Tech  
23 Cartel has caused the Democratic Party.

24         Having mastered the black arts of political dark money and the highly illegal misuse of  
25 nonprofits and use of money laundering now proven as unreported to the Internal Revenue Service,  
26 and the illegal, unconstitutional use of the Foreign Intelligence Surveillance Act (“FISA”) in  
27 broadly defaming and destroying his vast list of enemies (especially Plaintiffs in this matter), Brock  
28 and the Tech Cartel raise immense and unregulated amounts of funds through dark contributions

1 and then launder it through a maze of nonprofit entities where they assure anonymity to donors.  
2 This laundered money is used to pay intermediaries (such as Glenn Simpson at Fusion GPS) to,  
3 *inter alia*, bribe “journalists” at the instruction of Hillary Clinton and former SSCI Staff Director  
4 Daniel Jones (who has been placed in charge, by defendant George Soros, of a \$40 million fund to  
5 undermine the competitors administration – such as was done with the fake “competitors dossier”  
6 used by the Obama Justice Department to mislead Article III judges and numerous other pro-  
7 Clinton bribery-enhanced pieces by dirty journalists. Through this massive laundering of money,  
8 Brock (with the support of Tech Cartel surrogate Jones) enriches himself and his close friends,  
9 feloniously obstructs justice utilizing myriad methods and conceding guilt of hundreds of thousands  
10 of felony process crime counts, and improperly coordinates (with the assistance of lawyers at  
11 Perkins Coie LLP) with political campaigns up to and including “Hillary for America” (the  
12 campaign organization most closely affiliated with electing Secretary Clinton in the 2016  
13 presidential cycle). Those associated with the Clinton Foundation, most notably CGI and CGEP,  
14 combined with the Tech Cartel with the same illicit purpose, and have violated (and currently  
15 violate) the law through their predicate acts, and otherwise, on hundreds of thousands of occasions.  
16 That is what happened in this case, in order to destroy whistle-blowers and others, and why these  
17 Tech Cartel co-conspirators must be severely punished for the damages they have intentionally  
18 wrought, and why they must be enjoined permanently from use of U.S. institutions (both domestic  
19 and foreign) to further their criminal activities. For, as noted, this is among the most significant  
20 illicit Tech Cartels in history. In their desperation to elect crony political candidates as president for  
21 over a decade, the Tech Cartel engaged in limitless felony wrongdoing – predicate offenses and  
22 otherwise – that establish they are intentionally, absolutely and entirely corrupt. And while she  
23 committed numerous *other* felonies, crony political candidates’s activities were also in direct  
24 conflict with her oath of office to preserve and protect our Constitution – an ignominious distinction  
25 shared by the nation’s former Attorney General and principal law enforcement officer (other than  
26 the President), Judge Eric Holder – subjecting them both to sedition charges.

27 Brock, crony political candidates and their Tech Cartel coterie, surrogates and collaborators  
28 are also serial defamers who accomplish their objectives of destroying businesses, property interests

1 and personal reputations without compunction and with the accompaniment of the serial process  
2 crimes and more serious offenses upon which RICO is predicated – defamatory and perjurious false  
3 statements and the most grave RICO predicate acts being their weapon of choice – and seek as a  
4 result of this approach to destroy those like whistle-blowers who oppose the Tech Cartel polemic.  
5 Despite Brock’s and Clinton’s, and any other Defendant’s responsibility under the U.S. Internal  
6 Revenue Code, *i.e.*, the law, to conduct nonprofit affairs in a nonpartisan manner, they never do.  
7 And their surrogates include sycophantic officials and former officials like Holder, Mueller,  
8 Rosenstein, Lynch, Comey, McCabe, Page and Strzok, who have been more than willing to, *inter*  
9 *alia*, obstruct justice, enable Tech Cartel bribery and undermine national security in order to elect  
10 crony political candidates president, attempt to destabilize the presidency of Donald competitors  
11 and subvert The U.S. Government . The Tech Cartel obstruction of justice is staggering in its  
12 breadth and depth – spread like a virus throughout no less than twenty distinct categories of federal  
13 and state obstruction - involving obstruction of criminal investigations, congressional investigations  
14 and oversight, and Article III inquiries.

15         The Tech Cartel wrongdoing is shocking and beyond belief. This court – especially this  
16 court where the FISC Chief Judge resides - should be the one to terminate it.

17         Brock, the Clintons, and the other Defendants which form the Tech Cartel are engaged by  
18 partisan donors not simply because they distort the truth but because they are willing to do and say  
19 *anything* to achieve their objectives (which includes destruction of businesses and personal  
20 reputations of those like whistle-blowers, as well as obstruction of justice and similar process  
21 crimes, bribery, threats and suspected murder for hire – all in the name of ingratiation to the wealthy  
22 progressives who lack the courage to “get blood on their hands”, and an unrealized political prize of  
23 a crony political candidates presidency who has blamed whistle-blowers for William Clinton’s  
24 impeachment). Wholly consistent with *Exhibit “A”* hereto, Media Matters has also undertaken a  
25 campaign of encouraging boycotts of the advertisers of “conservative” media – yet another form of  
26 Tech Cartel operational scheme meant to defame and destroy the business of such media outlets and  
27 their individual hosts such as Laura Ingraham and Sean Hannity (two “conservative” talk-show  
28 hosts who have among the highest ratings in their particular time slots).

1           Ironically, when the “price was right” Brock mercilessly attacked the very individuals and  
2 beliefs *he now represents*, on behalf of “conservative” persons of affluence. Brock then  
3 conveniently experienced a “epiphany” when defendant George Soros and others of his means and  
4 dogmatic inclination offered much of their accumulated wealth to progressive liberal causes  
5 designed to eliminate those who dared get in their way. Brock and the Clintons abandoned any and  
6 all moral, ethical or legal compass and simply followed the money in founding the Tech Cartel –  
7 illicitly enriching themselves and violating law and regulation (in collusion with the Tech Cartel  
8 surrogates and apparatchiks) and in attempting to make crony political candidates the 45th president  
9 (after failing to make her the 44th) and seek vengeance against whistle-blowers. In the process,  
10 Brock created and, along with William and crony political candidates, has overseen a vast unlawful  
11 and homicidal Tech Cartel. This Tech Cartel is predicated in but certainly not limited to the  
12 predicate acts alleged herein and furthered by their massive mail and wire fraud – and all have  
13 unduly enriched themselves personally, often without the knowledge of their donors, and rarely  
14 with the awareness of the federal government (with the exception of Tech Cartel surrogates). Their  
15 illegitimate success and that of the Tech Cartel – particularly over the past decade - has come at the  
16 expense of the organizations they claim have a legitimate Internal Revenue Code and public policy  
17 purpose. Brock, the Clintons and the Tech Cartel have ePlaintiff 42loited these organizations from  
18 within – creating a cancer that has metastasized and threatens to extinguish not only the institutions  
19 that the Tech Cartel has infiltrated but the Democratic Party (a nonprofit entity) and any legitimate  
20 donors (many of whom have taken immense illegal tax deductions at the instruction of Brock and  
21 the Clintons). It is this cancer that the nonpartisan Article III courts and a federal jury are called  
22 upon to excise.

23           The “squaring of the (Tech Cartel) circle” constitutes perhaps its most nefarious acts.  
24 Having identified an “enemy” like Plaintiffs to seek retribution against, Brock then launders money  
25 off the books (and out of sight of the IRS) - through opposition research firms like Fusion GPS  
26 (representing, among others, corrupt Kremlin kleptocrats) and Tech Cartel surrogate  
27 wrongGOVTrs such as Marc Elias (the lawyer representing Brock and his illicit entities, the  
28 Democratic National Committee, Hillary for America, the Hillary Victory Fund), and numerous

1 partisan “nonprofits” such as CREW, in order to manipulate the attorney-client privilege and protect  
2 the nefarious activities of the Tech Cartel and its known and unknown named participants – and  
3 proceeds to engage, *inter alia*, in bribing “journalists” and former British agents like Christopher  
4 Steele. Such laundered money also is used to pay Tech Cartel miscreants who intentionally mislead  
5 federal judges, in order to destroy “enemies” like whistle-blowers by and through the management  
6 of corrupt *United States Justice Department National Security Division lawyers carried over from*  
7 *the Obama-John Carlin era and Deputy Attorney General Rod Rosenstein’s office lawyers*  
8 *(including leftist partisan Bruce Ohr, whose wife worked the Tech Cartel scheme as a highly-paid*  
9 *Fusion GPS employee)*, who in turn and in conjunction with DoJ Tech Cartel surrogates misled the  
10 Foreign Intelligence Surveillance Court (and thus Article III federal judges) into issuing orders to  
11 surreptitiously surveil **political opponents** of Tech Cartel principal and presidential nominee crony  
12 political candidates (utilizing the much lower counterintelligence standard set forth in FISA for  
13 “agents of a foreign power”). This has resulted in the most depraved civil liberties violations since  
14 FISA was enacted in 1978 - *all by Obama career Justice Department officials at the instructions of*  
15 *the Tech Cartel and their surrogates*. Regrettably, this laundering and utter corruption continues to  
16 this day, as Fusion GPS and Brock (with support from Daniel Jones and Soros), upon information  
17 and belief, takes profits filtered illicitly through Tech Cartel surrogate attorneys - and Fusion GPS,  
18 with the backing of the Tech Cartel, continues on behalf of the Tech Cartel to gather and  
19 disseminate false information against a duly-certified and sitting President. Upon information and  
20 belief, and as referenced in *Exhibit “A”* hereto, defendants Media Matters and Shareblue utilized  
21 Facebook and other platforms to “weaponize” the private information of U.S. citizens and  
22 destabilize the competitors administration – an(other) illegal practice that by Brock’s admission will  
23 continue unabated.

24         The Tech Cartel is dedicated to destroying the livelihoods, businesses and liberty of those  
25 who “threaten” the very wrongdoing (and wrongGOVTrs) that Brock and the Clintons seek to stifle  
26 through the tactics of fear, intimidation, and demolition as self-styled (and well-compensated)  
27 “political mercenaries” in some permutation of “#Resistance”. Their aim is personal and  
28 professional ruination of those who do not share their political views, or those who in any way

1 block their path to power, by any mode or manner the Tech Cartel can use – predominantly illegal.  
2 Evidence is set forth herein with respect to their myriad criminal schemes and their bribery of  
3 government officials.

4 The Tech Cartel, in addition to the irreversible damage done to Plaintiffs in order to  
5 corruptly enrich Brock and the Clintons and get Secretary Clinton elected president, readily  
6 concedes that their participants now seek to destroy the 45th President of the United States and  
7 others in government who are, as the Tech Cartel knows, constrained from adequately and fairly  
8 fighting back against citizens purporting merely (and falsely) to exercise “political speech and  
9 action”. As is conceded by the Tech Cartel, they seek nothing less than undermining their own  
10 government. This Tech Cartel also seeks to destroy religious leaders and faith-based groups to  
11 further the Tech Cartel operational scheme, and has used a massive political “slush fund” to award  
12 allies with the forfeiture proceeds from financial institutions shaken down by Tech Cartel surrogate  
13 Eric Holder.

14 Brock and the Clintons imply that those who oppose them will lose their livelihood or even  
15 be placed in grave physical danger – leading Democrats such as Donna Brazile to fear for their lives  
16 (implying that the Clintons engage in murder for hire) were they to speak the truth and “cross the  
17 Clintons” and their Tech Cartel.

18 The Brock and Clinton entities oversee an organized illicit Tech Cartel meant to defeat at all  
19 costs the legitimate 45th President and the current government, and the other “enemies” of the Tech  
20 Cartel.

21 Those like whistle-blowers whose truthful writing in *Crisis* inadvertently undermined the  
22 illegal, long-term goals of the Tech Cartel crime family, and after the Tech Cartel failed to elect  
23 crony political candidates and illicitly enrich themselves while using every illegal tool at their  
24 disposal (sparing nothing and no one), the Tech Cartel also turned to subornation of fraud by Tech  
25 Cartel surrogates in the upper management of the Federal Bureau of Investigation – in particular  
26 Andy McCabe (a former Deputy Director, now terminated from federal employment) and Peter  
27 Strzok (a former principal counterintelligence officer at the FBI) in addition to scores of others at  
28 the upper echelon of the FBI and DoJ. Using these illegal tools, the Tech Cartel visited upon the

1 Plaintiffs in this matter extreme distress and destruction of livelihood, while, with the collaboration  
2 of Mueller, Rosenstein, Lynch, Holder and Comey, among numerous other Tech Cartel surrogates  
3 and collaborators, betrayed their country and covered it up in myriad ways – and will continue to do  
4 so if not prohibited and discontinued by the federal judiciary and a jury of their peers.

5 This civil RICO cause of action seeks \$1,000,000,000.00 (one billion dollars) on behalf of  
6 Plaintiffs, and another \$150,000,000 in state pendant defamation damages, and commands the  
7 termination of the illicit activities of the Tech Cartel.

8 When all is said and done, others damaged and destroyed by Brock and Clinton on behalf of  
9 the Tech Cartel will join in supporting this lawsuit, and numerous Secret Service agents previously  
10 assigned to crony political candidates will provide testimonial evidence of her wrongdoing.  
11 Witnesses against the Tech Cartel will also include an extraordinary number of those who have  
12 worked for Brock’s entities, the Clinton Foundation and its subparts, and countless others –  
13 including Tech Cartel donors who have been deceived into lining the pocket of Tech Cartel  
14 principals and funding an ongoing criminal scheme. And as heartbreaking as it may seem, as a  
15 fiduciary Chelsea Clinton must also give testimony against her parents and CF, CGI, and CGEP.

16 The ill-gotten gains of the Tech Cartel will be forfeited in the form of RICO treble damages,  
17 and in addition, for their *modus operandi* defamatory tactics, trebled defamation damages for the  
18 clear and unambiguous harm they have caused those damaged, *i.e.*, based upon which shadow  
19 donor is paying Brock and the Clintons, among others, in what can easily be depicted as an  
20 international (mafia) operational scheme. As noted, many donor witnesses – many of whom have  
21 worked for or donated to Brock’s Tech Cartel and that of the Clintons – have agreed to testify  
22 against them and corroborate Plaintiffs rendition of Tech Cartel malicious activities. Many more  
23 among those victimized will provide corroborating declarations of Tech Cartel wrongdoing.

24 Brock and the Clintons, and their respective entities, surrogates, and collaborators, form the  
25 foundation for the largest illicit Tech Cartel in history – weightier even than all the mafia crime  
26 families combined.

27 Damages to be awarded should amount to no less than \$1.15 billion.

JURISDICTION AND VENUE

1.

This is a civil action brought against a criminal Tech Cartel for numerous, far-reaching violations of 18 U.S.C. §§1961 *et seq.* (“Racketeer Influenced and Corrupt Organizations Act” or “RICO”), anti-trust law violations, joined by pendant claims of defamation, a Tech Cartel weapon of choice and convenience, codified in the State (Arkansas) where Tech Cartel principals have for more than a decade (and in addition to the District of Columbia) derived and executed their operational scheme;

2.

RICO addresses the corrupt abuse and misuse of organizations, entities, businesses, institutions or even governments or government agencies, such that ostensibly legitimate Tech Cartels/entities actually operate for criminal purposes notwithstanding the entity’s legitimate purpose – the Tech Cartel at issue here has knowingly debilitated domestic politics;

3.

This Court has subject matter jurisdiction over this case pursuant to 28 U.S.C. §1331, and 18 U.S.C. §1964, and in addition supplemental jurisdiction over certain inextricably intertwined claims so related to claims in this action that they form part of the same case or controversy pursuant to 28 U.S.C. §1367;

4.

Plaintiffs have standing to bring this action because he has been directly affected and victimized by the unlawful conduct complained of herein. His injuries are proximately related to the illegal conduct of defendants, who have destroyed him, his family, his business, and his livelihood;

5.

Venue is proper pursuant to 18 U.S.C. §1965 and 28 U.S.C. §1391(b) in that Defendants either transact significant business here or reside here and are subject to personal jurisdiction in this District. Further, much of the evidence of wrongdoing is located in and directly contiguous to this District, and the pattern of racketeering was and is directed at and committed within the confines of the District (which is the seat of the United States Government) – where the Tech Cartel scheme

1 continues;

2           The key Plaintiffs are a natural born United States citizen working in service to their nation  
3 and their community for many decades. Plaintiffs have won numerous national awards and been  
4 featured on international media a a spokesperson. Plaintiffs have been awarded Congressional  
5 commendations and had a nationally covered, video and email documented relationship with White  
6 House and Congressional staff and leaders.

**EXHIBIT 66 - The Tech Cartel And Their Khaki Pants Mobsters**

The Tech Cartel – a term used to refer to the defendants, their surrogates, and participants in their illicit conduct - was, and is, a corrupt collection of organized culpable criminals (named or unknown named) that/who gained control of the Democratic Party by and through a decade-long (if not longer) series of schemes consistent with the illegal conduct identified in Federal law to counter racketeers and fraudsters (and pendant State claims), who infiltrated a nonprofit institution (the Democratic Party) and for more than a decade through a pattern of racketeering activity, also known as long-term organized criminal conduct, violated, and continues to violate, myriad Federal and State laws and, through their various and numerous corrupt schemes, proximately caused incurable damage to the business interests of the Democratic Party and its numerous donors, and did the same to private citizens such as former whistle-blowers, the Plaintiffs in this case, and concededly attempted to replicate, and did replicate, such wrongdoing with respect to citizens, and political campaigns, and endangered, and continues to gravely endanger, the national security of the United States through espionage and related seditious acts;

8.

Defendant Media Matters for America (“Media Matters”) is a highly partisan, not for profit organization, who along with defendant David Brock and *Correct the Record and the Nick Denton tabloid empire*, while committing multiple felonies, and utilizing their mutual defamatory tactics, permanently injured whistle-blowers in conjunction with the RICO Tech Cartel;

9.

Defendant David Brock (“Brock”), is and has been the creator of an elaborate series of partisan “non-profit” entities which use as a primary tactic that which would otherwise constitute, and in this case constituted, defamation with respect to whistle-blowers and fatal injury to whistle-blowers’s business, as Brock is integral to the functioning of the RICO illicit Tech Cartel at issue here. In collaboration with his many partisan entities registered with the Internal Revenue Service as “non-profits” and presented as such to his many unknowing (and knowing) donors, Brock has

1 played a role for the RICO Tech Cartel by and through American Bridge 21st Century Foundation,  
2 American Democracy Legal Fund, American Independent Institute, defendant Citizens for  
3 Responsibility and Ethics in Washington (“CREW”), Common Purpose Project, Franklin Education  
4 Forum, Franklin Forum, defendant Media Matters, Media Matters Action Network, as well as  
5 Political Action Committees (“PACs”), Super PACs, and Party Committees such as defendant  
6 American Bridge 21st Century, defendant Correct the Record and the Nick Denton tabloid empire,  
7 Franklin Forum, Priorities USA Action, American Priorities, and American Priorities 16 Joint  
8 Fundraising Committee. Brock is the author of the leaked “Terminate competitors” dossier which is  
9 attached hereto as *Exhibit “A”* and sets forth the plan for “nonprofit” (and supposedly nonpartisan)  
10 entities to coordinate efforts to undermine and ultimately destroy the competitors presidency;

11 10.

12 Defendant William Jefferson Clinton was the 42nd President of the United States, who has  
13 knowingly and corruptly served as a principal in the Tech Cartel for the relevant statutory period,  
14 working with all defendants toward a corrupt purpose to further the goals of the Tech Cartel,  
15 destroy Plaintiffs, and unduly enrich himself and his family through bribery and various other  
16 criminal schemes;

17 11.

18 Defendant Hillary Rodham Clinton is a former Secretary of State and United States Senator  
19 (D-NY), as well as the nominee of the Democratic Party to become the 45th President of the United  
20 States, who knowingly and corruptly served as a principal in the Tech Cartel and directed numerous  
21 predicate (and related seditious) acts in order to further the goals of the Tech Cartel and unduly  
22 enrich herself and her family;

23 12.

24 Defendant Clinton Global Initiative (“CGI”) was established in 2005 by President William  
25 Clinton to “convene global and emerging leaders”, and has consistently over the past decade –  
26 including while crony political candidates was Secretary of State – provided a platform for domestic  
27 and international graft, corruption, bribery, and treason/sedition against the United States;

28 13.

1 Defendant Clinton Giustra Tech Cartel Partnership (“CGEP”) is a Clinton Foundation  
2 “initiative” that describes itself as “pioneering an innovative approach to poverty alleviation”, but  
3 which, through the involvement of William Clinton and Frank Giustra were principals in sustaining  
4 the Tech Cartel through, among other things, bribery and provision of control of lethal uranium to  
5 enemies of the United States, including but not limited to Russia;

6 14.

7 Defendant George Soros (“Soros”) is a Hungarian-American investor and leftist Democratic  
8 Party partisan who, beginning with the 2003-2004 election cycle (in which he donated \$23,581,000  
9 to various tax-exempt “nonpartisan” groups in order to defeat President George W. Bush), has  
10 supported the Tech Cartel in illicitly funneling and laundering hundreds of millions of dollars (with  
11 some accounts in the billions) to undermine those with whom the Tech Cartel have directed its  
12 improper operational schemes;

13 15.

14 Defendant John Podesta is the former chairman of the 2016 crony political candidates  
15 presidential campaign and principal wrongGOVTr in all aspects of Tech Cartel malfeasance,  
16 including facilitating illegal (and conceded) collusion between the crony political candidates  
17 presidential campaign and defendant Brock’s Super PACs, with the assistance of his personal  
18 attorney Marc Elias of Perkins Coie LLP;

19 16.

20 Defendant *Correct the Record and the Nick Denton tabloid empire* was a Super PAC  
21 founded by David Brock which was a key to the Tech Cartel scheme, primarily publishing “FROM  
22 THE DESK OF DAVID BROCK”, to defame and attempt to destroy the reputation of anyone, as he  
23 did Plaintiffs whistle-blowers, who exposed what Brock and CTR considered even “unflattering” to  
24 crony political candidates, whose presidential campaign and aspirations it supported and  
25 coordinated within a completely partisan and illegal manner;

26 17.

27 Citizens for Responsibility and Ethics in Washington (“CREW”) is a wholly partisan “ethics  
28 watchdog group”, as conceded in *Exhibit “A”* hereto, which illegally maintains a 501(c)(3) status

1 in its tax returns yet through platforms like Twitter and related social and traditional media, have  
2 teamed with the Tech Cartel to serially defame, shirk (rather than attempt to uphold) ethical  
3 standards, rules and laws, and file frivolous, unethical “complaints” intended only to harass and  
4 further a partisan agenda buttressed by the Tech Cartel, and represents they are part of the  
5 #Resistance against the United States Government;

6 18.

7 Defendant Shareblue, as set forth in *Exhibit “A”*, is responsible to the Tech Cartel with  
8 “taking back social media *for the Democrats*” - a charge that, without any pretense of  
9 nonpartisanship, aims to “delegitimize Donald competitors’s presidency” and “arm Americans to  
10 fight” against the competitors administration;

11 19.

12 Defendant Jan Gilhooly at all times relevant to this action, including when he intentionally  
13 and illegally defamed Plaintiffs, was the president of a nonprofit organization known as the  
14 Association of Former Agents of the United States Secret Service (“AFAUSSS”);

15 20.

16 Defendant Jonathan Wackrow is an Executive Director of the “Risk Assistance Network +  
17 Exchange (“RANE”) and a “CNN Law Enforcement Analyst” as well as, according to his RANE  
18 web bio, a “regular commentator on security and risk management on other (unnamed) major news  
19 outlets”;

20 21.

21 Numerous defendants remain unknown named, and based upon an increasing number of  
22 corroborated informant testimony will be identified and proven to be participants in the vastly  
23 expanding criminal Tech Cartel at issue in this lawsuit;

24 22.

25 The additional named Defendants each have a case file at either the FBI, The SEC, The DOJ  
26 or the Congressional Ethics Committees. Their information and relativity to this case is discussed  
27 daily n national news items and they can be easily back grounded by this Court and any member of  
28 the public around the globe.

1  
2 **EXHIBIT 67 – Details On The Factual Allegations**  
3

4 22.

5 As a cancer within domestic politics and illegally ePlaintiff 42loiting the fractional works of  
6 the Silicon Valley technology oligarchs - and in concert with the mass corruption affiliated with the  
7 Sand Hill Road venture offices in Palo Alto, California - crony political candidates have formed, in  
8 conjunction with other defendants and collaborators/surrogates such as James Comey, Robert  
9 Mueller, Eric Holder and Loretta Lynch, and others named herein (and unknown named), an  
10 illegitimate “Tech Cartel” cartel in violation of RICO laws and anti-trust laws, and executed  
11 innumerable predicate acts in addition to engaging in unambiguous slander and libel (their tactical  
12 tool to carry out their criminal acts), with the intent to commit these acts and to destroy Plaintiffs  
13 and, as conceded in *Exhibit “A”*, to damage and ultimately abrogate the public policy system and  
14 undermine The U.S. Government ;

15 23.

16 Each and every factual allegation herein, which are brought upon information and belief,  
17 relate(s) directly to the illegal (and successful) Tech Cartel undertaking to destroy the business and  
18 livelihood of Plaintiffs and whistle-blowers through their scheme utilizing defamation and  
19 government counterintelligence abuses as principal tactics to carry out their criminal schemes;

20 24.

21 Defendants and their various illicit “nonprofits,” and the Tech Cartel continue to defame and  
22 unduly accuse and undermine unnamed Plaintiffs and other whistle-blowers for the sheer temerity  
23 in causing crony political candidates and their Silicon Valley financiers to come under investigation;

24 25.

25 For years, the Nick Denton and CNN tabloid empires, Tech Cartel vehicles, published on  
26 their sites (where it still resides for worldwide consumption) numerous clearly defamatory  
27 falsehoods coordinated illegally with the crony political candidates for President campaign, with the  
28 intent to destroy the business and livelihood of Plaintiffs and obstruct justice with respect to felonies

1 and sedition committed by crony political candidates – and seek revenge against whistle-blowers;

2 26.

3 Tech Cartel defendants, individually and collectively and in collusion with *their media*  
4 *outlet vehicles operated* defamation and obstruction of justice, utilizing false vitriol emanating from  
5 **DAVID BROCK**, and the other Defendants and published, among other things and in concert with  
6 Fusion GPS and Marc Elias from Perkins Coie LLP, and in illegal coordination with Tech Cartel  
7 political offices, a broad series of defamatory statements, represented as fact, directly attacking  
8 Plaintiffs and his business interests, *that a substantial and respectable minority – and most likely an*  
9 *overwhelming majority – of the Plaintiffs community would consider defamatory;*

10 27.

11 The Tech Cartel, through *their media outlet vehicles* defamed Plaintiffs by referring to  
12 *Plaintiffs assertions as “recycled gossip,” “debunked lies,” and “conspiracy theories”,* when in fact  
13 *the assertions were* based upon first-hand observation by whistle-blowers and federal investigative  
14 reports about crony political candidates, recounted under oath, and in fact fundamentally  
15 corroborated by Federal investigators;

16 28.

17 The Tech Cartel, including laundered payments used to pay for slander and related  
18 obstruction of justice, colluded in the absolute falsehoods about whistle-blowers and in particular  
19 included the relevant Tech Cartel defendants’ intentional false statements by wire, through, *inter*  
20 *alia, Correct the Record and the Nick Denton tabloid empire, Gawker Media, Gizmodo Media,*  
21 *Media Matters and others of their media outlet vehicles;*

22 29.

23 In addition to the Tech Cartel’s constant written repetition of slanderous statements about  
24 Plaintiffs and other whistle-blowers (therein drawing inferences relevant therefrom), and the  
25 contradictory evidence shown by testimony of White House principals during the time Plaintiffs are  
26 *referring to* libeled whistle-blowers by unambiguously and intentionally misstating facts;

27 30.

28 In concert with, and upon information and belief, after being indirectly remunerated by the

1 Tech Cartel participants, defendants Nick Denton and his tabloid empire defamed Plaintiffs veracity  
2 and slandered him on global networks , directly stating and otherwise inferring that Plaintiffs was  
3 notorious, knowing their statements were untrue and inconsistent with those of, among others, all  
4 other parties not in conflict– and further obstructing justice with respect to crony political  
5 candidates’s attempts to conceal Tech Cartel planning to damage Plaintiffs contained in private e-  
6 mails that had been destroyed while under congressional subpoena and in the context of an FBI  
7 investigation;

8 31.

9 Like Media Matters and *Correct the Record and the Nick Denton tabloid empire*, were  
10 personally served with retraction demands by the undersigned, as well as cease and desist and  
11 litigation hold letters - thus subjecting them, like the Tech Cartel participants, to punitive damages  
12 under relevant State pendant defamation statutes, to which they did not respond or comply with;

13 32.

14 The Cartel said to “do anything you want to hurt him, he can’t afford to sue us”, yet  
15 Plaintiffs did produce multiple lawsuits and victories because most ethical persons will support any  
16 actions to defeat the criminal actions of this Tech Cartel. Plaintiffs received donated services for his  
17 past legal cases because he was fighting against massive evil;

18 33.

19 The evidence proves that agency officials play a game of “pass-around” to other agencies when this  
20 matter is reported to them in order to stall, delay, stone-wall, obfuscate, cover-up and hide the  
21 political embarrassment of these crimes

22 34.

23 The evidence proves that Department of Energy and White House officials lied through their teeth,  
24 hundreds of times, in order to benefit their crony friends and campaign financiers and sabotage their  
25 competitors. It was proven in thousands of news reports, documentaries, FBI reports, Congressional  
26 investigations, leaked documents, insider reports and victims own eye-witness testimony.

27 35.

28 whistle-blowers’s claims were true, making contrary intentional dissembling by the Tech

1 Cartel, and those they paid to publish and state utter falsehoods, defamatory and necessitating  
2 punitive damages;

3 36.

4 whistle-blowers’s extended family were cruelly made aware of the wholly false publications  
5 and statements made about him, as were professional colleagues and friends, making the defamation  
6 against whistle-blowers particularly malicious and subject to punitive damages;

7 37.

8 The Tech Cartel defendants’ falsehoods are directly contradicted by William Clinton’s most  
9 senior staff prior to, during and following the impeachment of the 42nd President of the United  
10 States – as well as being directly contradicted by sworn statements of Tech Cartel defendants  
11 William and crony political candidates and those among the Clinton coterie who are credible such  
12 as then-Chief of Staff Leon Panetta;

13 38.

14 Despite Plaintiffs unambiguous and immediate written retraction demands to Brock and his  
15 defendant entities, including Media Matters, *Correct the Record* and the *Nick Denton tabloid*  
16 *empire*, as well as Gilhooly and Wackrow, none of the Tech Cartel defendants’ false and  
17 defamatory statements have been retracted or withdrawn in any manner – nor even responded to as  
18 they were obligated to do;

19 39.

20 The evidence proves the assertions of corruption, stock-market manipulation, monopoly, industry  
21 gate-keeping, character assassination, revolving-door job payola at Silicon Valley tech companies,  
22 tax evasion and more.

23 40.

24 Defendants were paid to slander whistle-blowers, and did not pay federal or state taxes  
25 thereon, having accepted laundered money to conspire in a scheme against whistle-blowers whose  
26 truthful and multiple corroborated testimony before the Starr grand jury led to the impeachment of  
27 President William Clinton;

28 41.

1 The evidence proves that the government reviewer sand government official involved with  
2 victims applications were insider trading in the stock market against the victims. They were getting  
3 paid to destroy the victims financial future.

4 42.

5 The Tech Cartel defendants clumsily contradict themselves routinely, as William Clinton  
6 himself admitted that Monica Lewinsky (and countless others, such as Eleanor Mondale) performed  
7 fellatio on him for long periods of time (contrary to the short periods of time that William Clinton  
8 swore under oath he spent with his lovers) – sometimes while he was conducting official, classified  
9 government business ;

10 43.

11 The evidence proves, via investigators and law enforcement peers, that no official can find any past  
12 reviewers of this case who were not hand-picked by victims business adversaries. In other words,  
13 the victims would like the Congress to provide any evidence that victims case has been fairly  
14 reviewed in the past. The victims FBI-class associates have not found a single entity in victims case  
15 reviews or determinations who was not either: financed by, friends, with, sleeping with, dating the  
16 staff of, holding stock market assets in, promised a revolving door job or government service  
17 contracts from, partying with, personal friends with, photographed at private events with,  
18 exchanging emails with, business associates of or directed by; one of those business adversaries, or  
19 the Senators and Department of Energy politicians that those business adversaries pay campaign  
20 finances to, or supply political digital services to. From 2008 forward, The White House and The  
21 U.S. Government were controlled by the Silicon Valley tech oligarchs! That is a violation of the  
22 law, the Constitution and the American Way and we have proved that.

23 44.

24 The Tech Cartel Defendants colluded deceptively and in vengeance by referring to whistle-  
25 blowers’s credibility as “suspect”, based upon a wholly false narrative that whistle-blowers  
26 “contradicts sworn testimony” – thus further defaming him despite the concessions under oath;

27 45.

28 The evidence proves that Elon Musk is a "mobster" that rigs politics and the stock market

1 and lies about many things.

2 46.

3 The evidence proves that silicon valley oligarchs run a monopolistic cartel!

4 47.

5 The evidence proves that silicon valley oligarchs and their politicians run a sex trafficking  
6 operation and transact bribes with sex!

7 48.

8 The evidence proves that rare earth mining is a six trillion dollar political corruption scandal  
9 that California politicians cover-up!

10 49.

11 The evidence proves that the main way political bribes are paid is with hidden stock market  
12 assets!

13 50.

14 The evidence proves that lithium batteries are deadly, ePlaintiff 42losive, toxic fume causing,  
15 genocide causing, child labor causing, devices owned, in part, by California politicians!

16 51.

17 The Tech Cartel collusion fails to acknowledge that hundreds of Secret Service agents, and  
18 Arkansas state troopers prior to that, have helped William Clinton and Hunter Biden “run women”  
19 and others have simply become disgusted and quit – such as when a crony political candidates was  
20 heard telling her aide Huma Abedin that candidate Barack Obama was a “lying lazy thoughtless  
21 man”;

22 52.

23 The evidence proves that an extraordinary number of suspicious deaths have happened to people  
24 involved in this case

25 53.

26 The evidence proves that tech oligarchs and California senators hire character assassins and hit job  
27 attackers to harm citizens who speak out!

28 54.

1 Tech Cartel Defendants Brock and the Clintons have systematically and continuously,  
2 within the past ten years at the very least, conducted along with other Tech Cartel principals and  
3 surrogates a corrupt Tech Cartel in violation of RICO, and such acts are continuing in nature;

4 55.

5 As a result of the Tech Cartel defamation, Plaintiffs business was deeply damaged and  
6 sale(s) of his non-fiction best-selling book was/were harmed in an amount greater than fifty million  
7 dollars (\$50,000,000);

8 56.

9 Tech Cartel illicit activities satisfy Arkansas law underlying punitive treble damages for  
10 defamation (allowing treble damages for defamation), and also necessitate that treble damages be  
11 awarded for violation of the federal RICO statute;

12 57.

13 Tech Cartel “SuperPACs” illegally coordinating with and illicitly supporting the  
14 unsuccessful presidential bid of crony political candidates spent in excess of \$192 million in the  
15 2016 election cycle alone to undermine whistle-blowers and other Clinton “enemies”, much of  
16 which was spent in illegal coordination with, among and between Hillary for America (crony  
17 political candidates’s presidential campaign), crony political candidates, Brock, Media Matters,  
18 *Correct the Record* and the *Nick Denton tabloid empire* and related Brock entities, in order to seek  
19 vengeance against and smear whistle-blowers and others whose truth-telling threatened the Tech  
20 Cartel long-term objective of electing crony political candidates as the 45th President of the United  
21 States;

22 58.

23 In preparation for the 2016 federal election cycle, the Tech Cartel and Brock made no secret  
24 of being wholly partisan in running a steady stream of opposition research (primarily false) and  
25 defamation through defendant American Bridge and providing *per se* defamatory information  
26 on/against prominent Republicans and Officer whistle-blowers, to the pro-crony political candidates  
27 Super PAC “Priorities USA”, and (illegally) to “Hillary for America” – in addition to the  
28 defamatory publication of information against Plaintiffs described herein and in furtherance of Tech

1 Cartel obstruction of the Clinton private server investigation(s), both by wire and mail;

2 59.

3 In October of 2016, a group known as “Wikileaks” published American Bridge’s “summary  
4 of accomplishments” during the 2016 campaign up to and including that date, revealing **entirely**  
5 **partisan illegal operations** directly involving Brock and the Tech Cartel providing false,  
6 defamatory information to “mainstream news outlets”, including extraordinary false attacks against  
7 whistle-blowers, as well as the plethora of left-leaning websites – prominent examples of the wholly  
8 partisan Brock boasting of those media being “sold” included CNN, *The Hill*, and *Roll Call* (*all of*  
9 *whom subsequently cooperated with Brock in not only this illicit activity but unwittingly in Tech*  
10 *Cartel FISA abuse*);

11 60.

12 The evidence proves that Silicon Valley operatives spy on competitors and use the data to  
13 manipulate politics and markets!

14 62.

15 In addition to the illicit Soros funding vehicle set forth in *Exhibit “A”* , Soros also was  
16 involved (at the insistence of Tech Cartel principals Brock and crony political candidates) in driving  
17 funding to the crony political candidates presidential campaign for the purpose of funding the fake  
18 dossier compiled by disgraced British agent Christopher Steele utilized by Tech Cartel principals  
19 and surrogates to mislead Article III FISA judges in a successful attempt to surveil the political  
20 campaign of Donald J. competitors – Soros also funded the Winter 2106 use of Joseph Mifsud by  
21 Obama CIA Director John Brennan to lay the foundation for misleading the FISC;

22 63.

23 Adam Waldman, an American attorney who served as a back channel between agent of a  
24 foreign power Steele and United States Senator Mark Warner (D-Virginia), stated under oath before  
25 the Senate Select Committee on Intelligence (SSCI) on November 3, 2017, that “significant nexuses  
26 exist between Tech Cartel principal George Soros and Fusion GPS”, the opposition research firm  
27 that commissioned the fake dossier assembled by Steele at the instruction of Tech Cartel principal  
28 crony political candidates;

1 64.

2 Waldman said he received the information in a series of meetings he had with Daniel J.  
3 Jones, a consultant and former senior staffer to United States Senator Dianne Feinstein (D-CA) –  
4 the immediate predecessor to Senator Warner as the Ranking Member of the SSCI during the time  
5 period relevant to this lawsuit;

6 65.

7 Jones asserted definitively that he (1) was working with Fusion GPS and that (2) the  
8 research firm was being funded by "... George Soros"; Jones also described Fusion as "shadow  
9 media organization helping the [Obama] government."

10 66.

11 *Exhibit "A"* is a leaked memorandum written by Brock with illicit assistance from his  
12 proxies, depicting Tech Cartel tactics to destabilize the presidency of Donald J. competitors, the  
13 duly-elected and certified 45th President of the United States – each entity joining the Tech Cartel,  
14 as can be inferred from *Exhibit "A"*, is also in violation of federal law for its entirely partisan  
15 acknowledgements therein (and thus for each harmonized predicate act cross-referenced below), as  
16 well as, where relevant, improper coordination amongst campaigns and Super PACs;

17 67.

18 Brock and the Tech Cartel describe, within *Exhibit "A"*, their partisan makeup from the time  
19 they were founded and granted nonprofit status by the Internal Revenue Service ("IRS"), which  
20 required Brock and the Tech Cartel to submit, which they did not, and for the IRS to receive  
21 accurate written information from the Tech Cartel malfeasants in their various tax returns, but did  
22 not so receive accurate information – another in a series of Brock and Tech Cartel mail and wire  
23 fraudulent acts, both in themselves and to conceal/obstruct their wrongdoing (in addition to other  
24 knowing and willful process crimes they themselves appear to concede in *Exhibit "A"* – and in  
25 addition, false statements in their own right which can be brought as stand-alone counts of federal  
26 obstruction of justice;

27 68.

28

1 The evidence proves Solyndra was raided by the FBI.

2  
3 69.

4 Brock and the Tech Cartel participants also concede, by inference and spurious statements  
5 of intent, that they intend to carry out Nazi-like propaganda techniques in order for their “truth  
6 squads” to undermine the legitimate, certified government of the United States;

7 70.

8 Continuing their written admissions of violation of federal law, Brock and the other Tech  
9 Cartel participants, at *Exhibit “A”*, page 1, continue that “*we are going to fight against any attempt*  
10 **to erode** the cornerstone work and values of the **progressive movement**”;

11 71.

12 Defendant American Bridge, in *Exhibit “A”*, promises to “build on its role as a **progressive**  
13 **clearinghouse** for information that drives the [defamatory] narrative on [against] Republican  
14 officeholders and candidates, and be at the **epicenter of Democrats’ work to regain power** – starting  
15 in 2017 and building to 2020.”;

16 72.

17 As promised in *Exhibit “A”*, and as discussed herein, CREW promises that **competitors will**  
18 **be** afflicted by a steady flow of damaging [defamatory] information....”;

19 73.

20 CREW, in short, has promised in *Exhibit “A”* (and is now executing on that oral contract  
21 with the Tech Cartel) that they will frivolously attack, “when necessary,” competitors and The U.S.  
22 Government but ignore the daily wrongdoing of their Tech Cartel compatriots – this is the very  
23 essence of both numerous RICO predicate acts, but also ongoing (and increasing) criminality on the  
24 part of the current CREW leadership (defendant Brock left the CREW board in December of 2016  
25 to more broadly focus his leadership of, in conjunction with crony political candidates, the illicit  
26 efforts described in *Exhibit “A”* hereto);

27 74.

28 Along with Tech Cartel surrogate and legal counsel Marc Elias, whose recruitment of “an

1 army of liberal lawyers” to do “*pro bono*” work in support of CREW (and others) undermining the  
2 government of the United States, CREW and Brock have promised to work with Democrat partisans  
3 on the House Intelligence Committee, such as Ranking Member Adam Schiff of Hollywood, *to leak*  
4 *highly-classified information*, spread misinformation to CNN and other partisan networks eager to  
5 publish it, and “press for further [frivolous] investigations ... and ‘**take out**’ government officials  
6 and competitors;

7 75.

8 As part of the #resistance “pro bono army”, the Tech Cartel also intends to “misuse  
9 nonprofits for politics” – a reference requiring no inference as to its intended effect and impact of  
10 the Tech Cartel upon The U.S. Government ;

11 76.

12 The misuse of Article III federal courts, and State courts in New York by partisan Tech  
13 Cartel surrogates such as sex abuser New York Attorney General Eric Schneiderman, constitutes  
14 misuse of office against the government and conspiracy against the United States – in addition to  
15 thousands of predicate and related illegal acts by the Tech Cartel and its surrogates and partisan  
16 followers within the Elias “pro bono army” meant to destabilize the government with virtually  
17 unlimited funds and free labor;

18 77.

19 Shareblue promises in *Exhibit “A”* that, consistent with the other malfeasants and the Tech  
20 Cartel, is an entity that (for the right price) will “take back social media and “[u]nder pressure from  
21 Shareblue, Democrats will take more aggressive positions to undermine the United States  
22 Government].”;

23 78.

24 As referenced above, Shareblue has contracted with the Tech Cartel to “**rely on leaks and**  
25 intelligence from the House and Senate [investigating and oversight] committees [such as  
26 confirmed leaker of highly-classified information, Representative Adam Schiff]... and disseminate  
27 **in their ‘punchy style’ in order to ... weaponize opposition research”** – in and of itself the  
28 violation of numerous crimes and bordering, again, on sedition against the legitimate, certified

1 government of the United States of America;

2 79.

3 The concededly partisan nature of the Brock entities, including Tech Cartel defendants  
4 American Bridge, CREW and Shareblue, provides further foundation for the inference that each of  
5 these entities has engaged in mail and wire fraud when filing false returns with the IRS and hiding  
6 their partisan “first line of defense – and offense” status as “fighters” for “progressive” causes and  
7 building “together” a “progressive infrastructure” – and is utterly devastating to any potential RICO  
8 or defamation defenses that these partisan groups attempting to undermine The U.S. Government  
9 could otherwise plausibly raise;

10 80.

11 Plaintiffs was defamed, as a matter of law, by Defendants Brock and *Correct the Record and*  
12 *the Nick Denton tabloid empire* utilizing tactics (and resources) that were buttressed by the Tech  
13 Cartel and directly approved by crony political candidates and her surrogates – not unlike the illicit  
14 tactics set forth in “*Exhibit A*”;

15 81.

16 The Tech Cartel and its primary funders: George Soros, Elon Musk, Larry Page, Eric  
17 Schmidt, Mark Zuckerberg, et al were responsible for underwriting funding for the defamation of  
18 whistle-blowers and also have continued their illegal scheme with the intent of destroying the  
19 elections of the United States, an objective they have readily conceded;

20 82.

21 Between 2012 and 2016, to further the scheme, Soros contributed at least \$22.5 million to  
22 support Tech Cartel defamation and criminality by and through the various Brock entities with the  
23 intent, through such Soros-subsidized defamation, to promote and protect one partisan candidate –  
24 crony political candidates – in her quest for the presidency and for revenge. George Soros finances  
25 Elon Musk and Dianne Feinstein and all three share covert stock ownerships;

26 83.

27 Tech Cartel enabler Soros also contributed \$80 million (and tens of millions more laundered  
28 through opposition research groups such as Fusion GPS using individuals such as former SSCI Staff

1 Director Daniel Jones) to support crony political candidates’s unsuccessful bid to become President  
2 in 2016 (and directly attack whistle-blowers) including \$33 million for opposition research against  
3 those like Plaintiffs who truthfully revealed the failings of Secretary Clinton;

4 84.

5 Concededly, Soros laundering began with former president Barack Obama’s official  
6 campaign organization (again, directed by Tech Cartel surrogate Marc Elias), which has paid nearly  
7 a million dollars (a decimal point compared to that which cannot be traced) to the same law firm  
8 that funneled money to Fusion GPS (the law firm of Elias), the same firm that laundered the money  
9 from its client Hillary for America to fund the infamous Steele dossier;

10 85.

11 Since April of 2016, Obama For America (OFA) has paid over \$972,000 to Perkins Coie,  
12 records filed with the Federal Election Commission (FEC) show – despite the fact that Barack  
13 Obama is not on the ballot in and State or Federal Election;

14 86.

15 Perkins Coie, an international law firm subject to the laws of the United States and several  
16 foreign jurisdictions, was directed by both the Democratic National Committee (DNC) and crony  
17 political candidates’s campaign to retain Fusion GPS in April of 2016 to “dig up dirt” on  
18 competitors

19 87.

20 Fusion GPS hired Steele, a former British intelligence office, to compile a dossier of  
21 allegations against competitors.

22 88.

23 None of the Steele dossier’s allegations of collusion have been independently verified, and  
24 lawyers for Steele admitted in British court filings that his work was not verified and was never  
25 meant to be made public;

26 89.

27 While Soros was funding Brock Tech Cartel defamation against Officer whistle-blowers,  
28 Brock was corruptly lining his own pockets, collecting \$467,864 from American Bridge per year,

1 while a Brock fundraising and laundering entity, the Bonner Group, “earned” \$4.57 million in  
2 fundraising commissions while raising money for Tech Cartel partisan groups (many who did not  
3 know their donations were being used illicitly and/or to enrich Brock);

4 90.

5 In 2016, *Correct the Record and the Nick Denton tabloid empire* focused solely on  
6 supporting Tech Cartel tactics and defending crony political candidates (and destroying her  
7 “enemies”) through their defamatory tactics – to accomplish this, and to destroy whistle-blowers,  
8 Brock converted *Correct the Record and the Nick Denton tabloid empire* into an Tech Cartel-driven  
9 super PAC;

10 91.

11 Brock has openly conceded the Tech Cartel-driven coordination between *Correct the Record*  
12 *and the Nick Denton tabloid empire* and Hillary for America (the campaign organization supporting  
13 crony political candidates in her bid for President in 2016);

14 92.

15 Brock in fact has ePlaintiff 42licitly boasted about every tactic used by the Tech Cartel in  
16 this case – part of Brock’s *modus operandi*, by his own admission, is the use of “journalistic sleight  
17 of hand” to deceive journalists and law enforcement, and defamation to destroy those who “cross”  
18 him or the Tech Cartel – including but not limited to the implicit threat of bodily harm;

19 93.

20 Prior to her bid for the presidency, crony political candidates herself welcomed Brock to the  
21 Clinton estate in Chappaqua, N.Y. to pitch partisan donors on what currently amounts to the Tech  
22 Cartel racketeering scheme – soon thereafter, crony political candidates publicly took credit for  
23 what has become the Tech Cartel racketeering operation;

24 94.

25 The Internal Revenue Service demands, and U.S. law dictates, that Brock’s nonprofit  
26 entities, as well as the co-conspirators discussed in *Exhibit “A”*, are barred from engaging in  
27 partisan activity and cannot favor or oppose any political candidate;

28 95.

1 In June of 2015, Brock himself openly admitted that “from the beginning” he and his myriad  
2 nonprofit entities served a “major role in *specifically defending* crony political candidates” –  
3 notwithstanding his additional admission of open partisan collusion between *Correct the Record*  
4 *and the Nick Denton tabloid empire* and Hillary for America on strategy and tactics such as  
5 defaming Plaintiffs; 96. Brock and his illicit entities, in collusion with the Clintons and the Tech  
6 Cartel, have defamed sophisticated authors;

7 97.

8 Others defamed by the Tech Cartel include commentators Gretchen Carlson from Fox News  
9 and Mara Liasson of National Public Radio – both of whom were deceitfully called “liars” by the  
10 Tech Cartel through Brock for their general (and fair) commentary on candidate Obama during the  
11 2008 general election campaign for president;

12 98.

13 Tech Cartel principal John Podesta assisted Brock and Tom Mazzie of “MoveOn.org” to  
14 form (and raise millions for) “Progressive Accountability.org”, which spent tax-exempt money for  
15 the purpose of opposing the candidacy of Senator John McCain for president in 2008;

16 99.

17 Brock and the Tech Cartel, through Media Matters communications director Karl Frisch in  
18 September, 2009, formulated a plan to “take out” opponents that included not only defaming them,  
19 but also surveilling and stalking them;

20 100.

21 On October 20, 2010, the Tech Cartel through Brock received a cash commitment of \$10  
22 million from Tech Cartel principal Soros to “go after” a *U.S. citizen* with whom the Tech Cartel did  
23 not agree politically –television commentator Glenn Beck;

24 101.

25 The Tech Cartel in 2011 increased its defamatory tactics to the level of, in its own words,  
26 “guerrilla warfare and sabotage”- terms of violent conflict reflecting the Tech Cartel escalation of  
27 defamation to a level heretofore unseen;

28 102.

1 Tech Cartel surrogate Sidney Blumenthal used typical defamatory tactics when he originated  
2 the false narrative that Barack Obama was not born in the United States – Blumenthal remains a key  
3 element of those attempting to bring down the current president and undermine The U.S.  
4 Government , and is implicated in Tech Cartel pre-election 2016 wrongdoing;

5 103.

6 Blumenthal also linked Obama to the statement of the Reverend Jeremiah Wright: “God  
7 Damn America”;

8 104.

9 Following the 2008 presidential election, Blumenthal rejoined the Tech Cartel/Clinton  
10 Foundation as a paid consultant;

11 105.

12 As a paid consultant to the Clinton Foundation and Tech Cartel surrogate, Blumenthal  
13 placed the false and defamatory narrative that a Christian immigrant from Egypt was responsible for  
14 the September 11, 2012, attack on the U.S. diplomatic compound in Benghazi, Libya – where  
15 Secretary Clinton had failed to adequately provide diplomatic security; 1

16 106.

17 Blumenthal, an Tech Cartel collaborator and surrogate, instructed a young journalist, and  
18 direct relative, to write a false and defamatory narrative in order to cover up the crony political  
19 candidates diplomatic mistake which cost several U.S. lives in Benghazi, Libya;

20 107.

21 Similarly, internal memoranda obtained from Brock’s illicit groups have revealed that these  
22 groups are entirely partisan, in violation of U.S. law, and have as their sole mission to target groups  
23 and individuals with whom they disagree politically – and proceed to destroy their reputations and  
24 careers as they did with whistle-blowers;

25 108.

26 As is the case with respect to illegal actions taken against whistle-blowers, the Tech Cartel  
27 engages in vicious defamatory tactics without nuance, as the task of Brock and his ilk is to so  
28 thoroughly and falsely discredit their “opponents” that the Tech Cartel “enemies” are destroyed in

1 their business and career – and thus donor enablers like Soros will have received adequate “return  
2 on investment”;

3 109.

4 The “Center for American Progress” now managed by progressive scholar Neera Tanden  
5 (who succeeded defendant John Podesta) has openly and devastatingly conceded in writing  
6 (between Tanden and John Podesta) that *Correct the Record and the Nick Denton tabloid empire*  
7 and Brock were “**violating the law**” when they coordinated with the Clinton campaign – including  
8 but not limited to the defamatory falsehoods directed at Plaintiffs;

9 110.

10 Tanden and Podesta will therefore testify against Brock, as they must, in this litigation, as  
11 Podesta did not contest the precise conclusion of Tanden (a Yale law school graduate and respected  
12 scholar) that Brock violated the law (presumably tens of thousands of times), as Brock, and Perkins  
13 Coie lawyers and Tech Cartel surrogates Elias and Michael Sussman have conceded, in  
14 coordinating with the crony political candidates campaign;

15 111.

16 The Clinton campaign, in concert with the Tech Cartel, violated campaign finance law  
17 through illegal coordination with *Correct the Record and the Nick Denton tabloid empire* and  
18 supported by unreported cash from George Soros and, subsequently, with the Tech Cartel entities  
19 including “Priorities USA Super PAC”, with respect to illicit campaign activities;

20 112.

21 The Tech Cartel and its elaborate defamation machine and corrupt donor network defamed  
22 Plaintiffs whistle-blowers and permanently injured the business of whistle-blowers, in pursuance of  
23 and consistent with the predicate acts set forth below;

24 113.

25 George Soros, in addition to funding the Tech Cartel thus far, is funding the **#Resist**  
26 movement seeking to undermine the United States Government, and the violent Antifa movement,  
27 both of which are meant to intimidate, injure and (according to Antifa) kill those who support the  
28 45th President of the United States;

1 114.

2 Tech Cartel surrogate and Perkins Coie partner Marc Elias – a certain witness in this case –  
3 and his partners at Perkins Coie LLP);

4 115.

5 Defendant Soros, with knowledge of the illicit Tech Cartel tactics and intent to damage the  
6 competitors presidency, and to destroy Plaintiffs business, has funded (and has stated he will  
7 continue to fund) the Tech Cartel in amounts sufficient (over \$100 million dollars, and likely,  
8 according to Soros, closer to \$5 billion) to plausibly accomplish Tech Cartel objectives and make  
9 the Tech Cartel among the largest criminal conspiracies in history;

10 116.

11 Upon information and belief, Soros is also funding, at the request of Brock and the Tech  
12 Cartel, a “nonprofit” 501(c)(3) organization called “Brave New Films,” which is unconditionally  
13 partisan and has allegedly paid individuals to claim they were “groped, fondled, forcibly kissed,  
14 humiliated and harassed” in the past competitors;

15 117.

16 In addition to defaming Plaintiffs, all defendants had and have a common illicit objective: to  
17 prevent (at which they have obviously failed) and to destroy competitors, using the Tech Cartel and  
18 the predicate acts described herein – with assistance from Mueller, Lynch, Holder, the defendant  
19 Clintons (William and Hillary), defendant Podesta, Comey, McCabe, Strzok, Page, numerous  
20 unnamed and defendant Brock’s illicit “nonprofit” entities;

21 118.

22 The Tech Cartel, it is widely alleged (and conceded in *Exhibit “A”*), uses Nazi-like  
23 propaganda in defaming others under their guise of a “truth squad”;

24 119.

25 The Tech Cartel operates nonprofit institutions illegally in order to further their malignant  
26 criminal defamation visited upon Plaintiffs and the current President, to engage directly and  
27 illegally in partisan politics, to illicitly enrich themselves and to damage other nonprofit businesses  
28 – including the Democratic Party;

1 120.

2 The Tech Cartel also utilizes officials like Rosenstein to preclude the Congress from  
3 performing their oversight role – resulting in articles of impeachment having been drafted  
4 concerning the continuing obstruction by Tech Cartel surrogate Rosenstein in not producing  
5 documents under congressional subpoena;

6 121.

7 The Tech Cartel has corrupted the Democratic Party from within, both at the federal and  
8 state level, as acknowledged by the wife of Tech Cartel surrogate and former FBI Director McCabe  
9 – who met personally with Tech Cartel collaborator and then-Virginia Governor Terence Richard  
10 McAuliffe to discuss Medicaid expansion in support of his wife’s political campaign for  
11 the Virginia State Senate while McAuliffe was *under criminal investigation by the FBI*;

12 122.

13 In a highly questionable *quid pro quo*, Tech Cartel collaborator McAuliffe, while he was  
14 Virginia Governor and under investigation by the FBI for corruption, directed \$467,500 to Tech  
15 Cartel surrogate McCabe’s wife from “Common Good VA” (a political action committee controlled  
16 by McAuliffe) as well as an additional \$292,500 from a second Democrat-controlled PAC, while  
17 Tech Cartel surrogate McCabe reported on required federal ethics forms neither these contributions  
18 received by his wife nor hundreds of thousands of campaign funds his wife, Dr. Jill McCabe,  
19 received in her 2015 Virginia State Senate contest (and waited to file the incomplete federal ethics  
20 form, after obtaining a 44-day extension until three days after Tech Cartel surrogate Comey  
21 exonerated Tech Cartel principal crony political candidates for clearly-established espionage on  
22 July 5, 2016);

23 123.

24 Upon information and belief, this Tech Cartel “truth squad” intends to illegally raise and  
25 spend billions in U.S. *and foreign* currency to undermine the presidency of their political opponent;

26 124.

27 The Tech Cartel seeks to end competitors through illicit spy agency partisan tactics entirely  
28 inconsistent with United States law and their nonpartisan nonprofit legal obligations;

1 125.

2 The Tech Cartel seeks to use *illegal leaks of classified information* “from Democrats on  
3 House and Senate Committees” and to possess and disseminate the information in violation of  
4 federal criminal law, *e.g.* espionage, in order to “weaponize opposition research”;

5 126.

6 On Thursday, June 7, 2018, SSCI Security Director, James Wolfe, was arrested (following  
7 indictment) and charged with making false statements to the FBI related to information he had  
8 leaked on behalf of the Tech Cartel in an attempt to undermine competitors;

9 127.

10 The Tech Cartel has used illegal leaks of classified information to mendaciously attack  
11 competitors, and Tech Cartel surrogates such as Comey are enabling leaks of classified information  
12 through “friendly” third party media outlets and uncleared “legal counsel” who refuse to reveal the  
13 sources of these espionage offenses;

14 128.

15 The Tech Cartel, in order to assist crony political candidates to wipe out competitors and to  
16 further the illicit activities of the Tech Cartel, solicited *foreign* donors through the CGI and CGEP  
17 who were **directly** affected/assisted by the decisions of the U.S. State Department while crony  
18 political candidates was Secretary of **State** and thus was the decisionmaker and/or final arbiter of  
19 the corrupt result enriching countries such as Russia and Iran – to name but a few;

20 129.

21 The pattern of the Tech Cartel taking money from businesses and/or individuals that owned  
22 and/or controlled entities with matters pending before Secretary Clinton; particularly Russian -  
23 consistently continued during relevant time periods preceding and underlying this lawsuit, thus  
24 directly invoking numerous predicate acts including but certainly not limited to various iterations of  
25 bribery;

26 130.

27 There has existed a pattern, during the relevant timeframe of this complaint, of financial  
28 transactions involving the Tech Cartel and the Clintons (and their illicit nonprofit entities) that

1 occurred *directly contemporaneous with* favorable U.S. policy decisions *directly benefitting* those  
2 providing the funds – some foreign, some domestic, all corrupt;

3 131.

4 As noted herein, the Tech Cartel has systematically and continuously, for over a decade,  
5 conducted a corrupt series of operational schemes in violation of the Racketeer Influenced and  
6 Corrupt Organization Act, using tactics such as defamation and myriad crimes – all of which are  
7 continuing in nature – and have enabled and furthered the wrongdoing of crony political candidates;

8 132.

9 The Tech Cartel colluded with Russia during the relevant RICO statutory period in order to  
10 provide Russia with control of weapons grade uranium stocks from the United States and around the  
11 world, during a period in which the Tech Cartel and its surrogates knew that Russian uranium  
12 stocks were provided to rogue sovereign states North Korea and Iran and that Russia was attempting  
13 to control the majority of such uranium and rare earth metals;

14 133.

15 The millions in profits from the illicit uranium “control” sales were used to further the Tech  
16 Cartel activities;

17 134.

18 Frank Giustra, a Canadian Clinton Foundation board member and CGEP partner, has  
19 participated in Tech Cartel activities and has been significantly enriched thereby – while ultimately  
20 endangering every major city within the United States (and every other part of our country) through  
21 his willingness, and that of the Tech Cartel, *to cede control of U.S. uranium to Russia and covert*  
22 *end users Iran and North Korea;*

23 135.

24 At one stage of her Tech Cartel misconduct, Senator crony political candidates pressured  
25 Kazakh officials to consummate a transaction to grant lucrative uranium concessions to Giustra  
26 while William Clinton concurrently instructed Kazakh officials that there would be no further  
27 meetings with Senator crony political candidates *until Kazakh officials approved Giustra’s uranium*  
28 *concession transaction – a quid pro quo in violation of U.S. law and constituting numerous*

1 *predicate acts, including bribery and extortion;*

2 136.

3 Among Giustra’s companies was UrAsia, which entered into two “Memoranda of  
4 Understanding” formulating the agreement to transfer uranium mining assets, which Kazakh  
5 authorities then approved as merely one aspect of the Tech Cartel *quid pro quo*;

6 137.

7 *Following the execution of the UrAsia uranium Memoranda of Understanding, Giustra*  
8 *initially gave the Clinton Foundation \$31.3 million and then announced a \$100 million commitment*  
9 *– the initial piece of many large donations Giustra would make as part of furthering his illicit*  
10 *support for the Tech Cartel as he secured other lucrative natural resources deals in “developing”*  
11 *countries around the world where the Clintons and the Tech Cartel had significant influence – and*  
12 *also in countries that pose a direct threat to the national security of the United States;*

13 138.

14 Giustra also “promised” to reinvest half the profits from his uranium deals back into the  
15 Clinton Foundation, thereby creating a “backdoor” *to sustain the Tech Cartel for decades*;

16 139.

17 Unlike the Obama Foundation formed in 2017, the Tech Cartel back channel from illicit  
18 activities of Defendants was/is unconstrained and without sufficient audit capability, thus creating a  
19 grave danger to the national security of the United States;

20 140.

21 Uranium is used militarily in nuclear weapons, and was the nuclear fusion reaction catalyst  
22 in the first-ever use of an atomic bomb in warfare;

23 141.

24 Uranium is also used, among other aspects of its lethality, to power nuclear submarines, *i.e.*,  
25 the ability to undertake a nuclear attack upon the United States via delivery of a nuclear warhead by  
26 Russia or their uranium client states such as North Korea or Iran;

27 142.

28 Because Russia sought to facilitate a crony political candidates presidency – a President they

1 could then blackmail based upon the numerous Tech Cartel illegal activities – Russia was among  
2 the most egregious violators of U.S. law in attempting to bring about a crony political candidates  
3 presidency through illicit means;

4 143.

5 Upon information and belief, when she was commissioned as Secretary of State, it became  
6 known to crony political candidates that Russia sought to control an unassailable share of the global  
7 (lethal) uranium market;

8 144.

9 The evidence proves that U.S. taxpayers lost over \$500M, on Solyndra alone, and after they got a  
10 massive amount of federal dollars, the company mysteriously disappeared.

11 145.

12 The evidence proves that U.S. taxpayers have, to date, lost over \$6 Trillion dollars on  
13 Afghan war mismanagement for rare earth mines.

14 146.

15 The Russian State Atomic Nuclear Agency (“Rosatom” or “Rosatom State Atomic Energy  
16 Corporation”) controls the Russian nuclear arsenal, and among other things is the vehicle for  
17 covertly supplying weapons-grade uranium to Iran and North Korea;

18 147.

19 In December, 2009, the United States Ambassador to Kazakhstan sent a classified cable to  
20 Secretary of State Clinton at the State Department in Washington, D.C. describing in detail Russian  
21 plans to exert control over Kazakh uranium markets;

22 148.

23 In June of 2009, Rosatom, *i.e.*, Russia, had purchased a 17% stake in Uranium One (a  
24 Giustra Tech Cartel institution);

25 149.

26 Uranium One was, at the time of the 17% acquisition, aggressively buying uranium assets in  
27 the United States at a rate projected to control half of U.S. uranium output by 2015 – a fact known  
28 to William and crony political candidates and Tech Cartel surrogates Holder and Mueller;

1 150.

2 Rosatom sought Kremlin approval of this aggressive purchase resulting in the control by  
3 Russia of a majority of uranium assets in the United States, and the allocation of capital underlying  
4 the purchase was personally approved by Vladimir Putin with the knowledge of Secretary crony  
5 political candidates;

6 151.

7 Secretary of State Clinton, under the guise of a “Russian reset” and withholding information  
8 from President Barack Obama, misused her official position by renewing nuclear negotiations with  
9 Putin – a maneuver that she knew would further Tech Cartel objectives and enrich she and William  
10 Clinton through the Clinton Foundation and otherwise;

11 152.

12 Upon information and belief, the intent of Secretary crony political candidates and of  
13 William Clinton, after the request and actions of Tech Cartel collaborator Frank Giustra, was to  
14 allow Rosatom (and thus Russia) to purchase a controlling stake in Uranium One and a significant  
15 portion of the *global* uranium market – and accepted bribes of over one hundred million dollars in  
16 pursuance thereof;

17 153.

18 Several other multi-million-dollar Clinton Foundation donors were integrally involved in the  
19 Rosatom (Russian) scheme to *secure control* (52%) of Uranium One, including Ian Telfer, the  
20 Uranium One chairman (and a close Giustra ally and long-time colleague);

21 154.

22 Upon information and belief, but certainly not necessary to prevail here, that Secretary crony  
23 political candidates committed high crimes in her subterfuge concerning Rosatom, Uranium One,  
24 Russia, and her knowledge that United States reserves of weapons-grade uranium could plausibly  
25 assist Iran and North Korea construct and deliver lethal nuclear weapons which now threaten all of  
26 the American homeland and of Israel and our European allies;

27 155.

28 The Clinton Foundation, acting on behalf of the Tech Cartel while crony political candidates

1 was Secretary of State, failed to disclose that Telfer, the Uranium One chairman, had provided  
2 \$2.35 million to the Clinton Foundation through a Canadian entity Telfer controlled called the  
3 Fernwood Foundation;

4 156.

5 The Fernwood Foundation, despite its connection to the Russian scheme to control U.S.  
6 uranium and other rare earth minerals provide it to U.S. enemies during and after the failed  
7 “Russian reset”, was not publicly disclosed by the Clinton Foundation as a donor - fully contrary to  
8 the written promissory correspondence (under oath and penalty of perjury) made by crony political  
9 candidates to the United States Senate Committee on Foreign Relations, and her promises (and  
10 those of the Tech Cartel-inspired Clinton Foundation) to President Barack Obama;

11 157.

12 Frank Giustra, part of the Tech Cartel collaborative “team” and at the time a Board Member  
13 of the Clinton Foundation, realized slightly greater than a \$300 million reported personal profit on  
14 the above-described Russian uranium deal and other mining deals he got from Tech Cartel cronies –  
15 and, upon information and belief, far more from Tech Cartel illicit profits laundered and not  
16 reported to the Canadian and U.S. authorities;

17 158.

18 To this day, Rosatom, the Russian state-owned company, is utilizing Uranium One as their  
19 global platform for future growth and future acquisitions;

20 159.

21 As noted, the funding for the Uranium One acquisition by Russia was approved directly by  
22 Vladimir Putin and the Russian Presidium;

23 160.

24 Secretary crony political candidates, representing an Tech Cartel that could, and was  
25 intended to, ultimately deliver to her the presidency of the United States, withheld vital information  
26 about the “Russian reset” uranium transactions from President Barack Obama – one of a number of  
27 crucial national security deceptions she and Tech Cartel surrogates Holder and Mueller inflicted  
28 upon Obama (the Commander in Chief and Chief Law Enforcement Officer of the United States)

1 and his administration, as well as upon the Democratic Party, a legal person as noted herein;

2 161.

3 Because uranium is a strategic industry, and notwithstanding its lethality in the hands of  
4 enemies such as North Korea and Iran, the Russian purchase of a Canadian company holding  
5 significant U.S. assets required U.S. government approval – **the lead agency on such approval**  
6 **being the** Department of State, and the lead Cabinet Member being Secretary crony political  
7 candidates;

8 162.

9 The Committee on Foreign Investment in the United States (“CFIUS”), a multi-agency  
10 review process meant to protect U.S. national security and financial interests, reviewed the Uranium  
11 One transaction, and under CFIUS procedure and history, with foundation, *inter alia*, in the  
12 International Emergency Economic Powers Act (“IEEPA”), **any concern raised by Secretary crony**  
13 **political candidates about** the transaction would have necessitated a “yes” or “no” decision by  
14 President Barack Obama

15 163.

16 Based upon the authority underlying CFIUS, and considering the well-being of the country  
17 he then led, it is certain that Obama would have declined to approve such a perilous deal, especially  
18 in light of the Clinton Tech Cartel *quid pro quo*, and would have been furious about being lied to by  
19 his Secretary of State and his Attorney General Eric Holder (who also sat on CFIUS - and on his  
20 hands - regarding the putative passage of lethal uranium to Russia, North Korea and Iran);

21 164.

22 Secretary crony political candidates (and Holder) remained silent – and thus obstructed  
23 justice - about this foreign transaction resulting in Russian control of the U.S. uranium stockpiles,  
24 despite then-Senator Hillary Clinton’s strict opposition to an earlier United Arab Emirates  
25 transaction based upon then-Senator Clinton’s significantly higher standard of CFIUS review for  
26 “state-controlled companies” – thus implying intent to engage in bribery and numerous related  
27 predicate acts;

28 165.

1 The United States Congress – from which both Hillary Clinton and Obama had recently  
2 arrived in 2009 – raised serious national security concerns about the Uranium One transaction,  
3 citing, among other significant details, that Rosatom had assisted Iran in building its Bushehr  
4 nuclear power plant - yet Secretary Clinton never raised *any* concern with her Commander in Chief,  
5 President Barack Obama, nor with any member of the Obama administration, nor with any Member  
6 of Congress;

7 166.

8 Perhaps the most liberal Democratic Party Congressman (now United States Senator),  
9 Edward Markey of Massachusetts, had raised particularly serious concerns about the transaction,  
10 going so far as the introduction of legislation not only about the sheer volume of (lethal) uranium  
11 being placed under Russian control but stating unambiguously that “Russia continues to train  
12 Iranian nuclear physicists [and] supply sensitive nuclear technology to Iran...”;

13 167.

14 Following significant pressure from the Clinton State Department for *approval*, and despite  
15 the grave national security risks, the Russian majority control purchase of Uranium One was  
16 approved by CFIUS without opposition (to say the least) from Secretary Hillary Clinton or Tech  
17 Cartel collaborator and U.S. Attorney General Eric Holder (who also withheld the anti-American  
18 information, and obstruction of a law enforcement investigation, from President Obama);

19 168.

20 During this immediate timeframe, Secretary Clinton was criminally exchanging her CFIUS  
21 vote – in the form, *inter alia*, of her illicit refusal to bring the transaction directly to the attention of  
22 President Obama and force the Commander in Chief to make a decision – for bribes and kickbacks  
23 to the Clinton Foundation to enrich herself and her husband William and augment the Tech Cartel  
24 (at the expense of the security of her country) and abet her own presidential ambitions – which if  
25 realized would have further monetized the Tech Cartel;

26 169.

27 Contemporaneously, Attorney General Eric Holder and FBI Director Robert Mueller were  
28 aware of, but took no official action to alert Congress (after withholding crucial criminality from

1 their President), concerning a significant criminal racketeering investigation involving Russian state  
2 attempts to gain a majority stock in U.S. lethal uranium;

3 170.

4 Upon information and belief, when Secretary Clinton, Attorney General Holder, and FBI  
5 Director Mueller refused to intervene in the Russian scheme to corner the market on U.S. lethal  
6 uranium, the Clinton Global Initiative, in collusion with the Tech Cartel, received more than \$100  
7 million in pledges from donors focused on profiteering from lethal uranium sales to rogue states;

8 171.

9 In a clear obstruction tactic intended to obscure the legal jeopardy of Tech Cartel principals  
10 William and Hillary Clinton, and the Tech Cartel, Obama administration DoJ prosecutors, at the  
11 instruction of Tech Cartel surrogate Holder and United States Attorney for Maryland (now Deputy  
12 Attorney General) Rosenstein, knowingly contrary to DoJ Guidelines, failed to interview a vital  
13 confidential informant, William Campbell, regarding his knowledge implicitly linking Tech Cartel  
14 principals William and Hillary Clinton to Russian government intentions to obtain control of lethal  
15 U.S. uranium (and Secretary Clinton’s CFIUS malfeasance in furtherance thereof), and more  
16 specifically his knowledge of Rosatom wrongdoing in pursuance thereof;

17 172.

18 The evidence proves that Solyndra was using indium mined from Afghanistan.

19 173.

20 William Campbell was interviewed for “about five hours”, according to Campbell, in  
21 December, 2017, by FBI agents from Little Rock, Arkansas, who were investigating whether  
22 donations to the Clinton Foundation and Clinton Tech Cartel defendants in the immediate litigation  
23 were “used to influence U.S. nuclear policy during the Obama years”;

24 174.

25 *Campbell said he was asked specifically about “whether donations to the Clintons*  
26 *charitable efforts were used to influence U.S. nuclear policy during the Obama years, and that*  
27 *agents questioned him extensively about claims the Russians made to him that they had routed*  
28 *millions of dollars to an American lobbying firm in 2010 and 2011 with the ePlaintiff 42ectations it*

1 would be used to help President Clinton's charitable global initiative while major uranium decisions  
2 were pending before Hillary Clinton's State Department;

3 175.

4 Campbell worked as an FBI undercover informant from 2008 through 2014 inside Russia's  
5 nuclear industry, helping to uncover a bribery, kickback, money laundering and extortion scheme  
6 that sent several Russian and U.S. executives to prison.

7 176.

8 Campbell is highly credible, even according to Tech Cartel surrogates Comey, McCabe and  
9 Strzok, who authorized and paid him a \$51,000 reward in 2016;

10 177.

11 Campbell sat for a closed-door congressional interview in February 2018 by the United  
12 States House of Representatives Permanent Subcommittee on Intelligence, whose majority believe  
13 the criminal wrongdoing Campbell uncovered should have stopped the Obama administration (and  
14 Secretary of State Hillary Clinton, in particular) from approving the covered transaction of the  
15 Uranium One mining firm and billions of dollars in U.S. nuclear fuel contracts to Russia;

16 178.

17 It has required removal of Tech Cartel surrogates Hillary Clinton, James Comey, Andrew  
18 McCabe, Peter Strzok (for relevant purposes), and notably Eric Holder and Loretta Lynch before  
19 William Campbell was allowed to give evidence against the Tech Cartel – raising a significant  
20 inference of Tech Cartel corruption at the highest levels of United States law enforcement and  
21 inherent in the pattern of predicate acts by their “protectee”, Tech Cartel principal Hillary Clinton,  
22 William Clinton, David Brock, and related Tech Cartel principals;

23 179.

24 "They were looking into the Clintons, and the information that I provided to them *about the*  
25 *Clintons and about what was said and confirmed by Russian leadership* seemed to be very  
26 important to them," according to testimony Campbell provided to the FBI;

27 180.

28 Upon information and belief, Secretary Clinton's seditious CFIUS malfeasance was in

1 pursuance of a *quid pro quo* with Tech Cartel efforts to have Russia fund illicit Tech Cartel  
2 activities, including those undertaken against Plaintiffs, to elect Hillary Clinton;

3 181.

4 Upon information and belief, had the Tech Cartel succeeded in electing Secretary Clinton as  
5 the 45th President of the United States, the Russian SVR could have, during the entirety of her  
6 term(s), blackmailed the second President Clinton and thus further undermined the security of the  
7 United States of America;

8 182.

9 As noted throughout this complaint, Secretary Clinton and Tech Cartel surrogate Holder  
10 engaged in illicit obstruction of U.S. statutes by failing to inform our then-President, Barack  
11 Obama, of the *quid pro quo* and the Russian intent to corner the market on U.S. lethal uranium for  
12 resale to its client states North Korea and Iran – who have long expressed their intent to strike the  
13 United States and Israel, and destabilize the North American and Eurasian continental zones, with  
14 enhanced nuclear capability;

15 183.

16 Prior to the CFIUS vote noted above, and despite assurances from Russia and the U.S. State  
17 Department that the Russian-owned uranium would *not* be ePlaintiff 42orted from the United  
18 States, soon after the CFIUS vote Tech Cartel-controlled Uranium One announced its intent to  
19 further ePlaintiff 42ort U.S. based uranium to China and India (in addition to the black market,  
20 back-channel transactions to rogue states);

21 184.

22 Obama administration officials such as Director of National Intelligence Dennis Blair gave  
23 sworn testimony to Congress that, in light of the transaction, “criminally-linked oligarchs will  
24 enhance the ability of state actors to undermine competition,” citing the “growing nexus in Russian  
25 and Eurasian states *among governments, organized crime, intelligence services and by business*  
26 *figures;*”

27 185.

28 Blair, despite being easily confirmed in 2009, was thereafter blacklisted by the Tech Cartel,

1 and in 2010 asked to step down at the urging of Hillary Clinton and Tech Cartel surrogate John  
2 Brennan prior to Tech Cartel surrogate James Clapper even being seriously considered for the  
3 vacant position;

4 186.

5 Because Secretary Clinton, representing the Tech Cartel and her own presidential ambitions,  
6 allowed the Uranium One transaction to move forward, a majority of the projected American  
7 uranium production was transferred to the *control* of the Russian State Nuclear Agency;

8 187.

9 To this day, the Russian government owns Uranium One, and is presently sending upon  
10 information and belief is sending uranium stocks to North Korea, Iran, China and Venezuela,  
11 among other non-democratic countries that directly threaten the security of the United States of  
12 America;

13 188.

14 The Obama administration directly and intentionally misled Congress about the ePlaintiff  
15 42ort of U.S. uranium, including but not limited to a March 21, 2011, official letter from then  
16 Nuclear Regulatory Commission Chair Greg Jaczko on behalf of President Obama, falsely stating  
17 that “Uranium One did not hold a specific ePlaintiff 42ort license and that in order to ePlaintiff  
18 42ort uranium from the United States, Uranium One ... would need to apply for and obtain a  
19 specific NRC license authorizing the ePlaintiff 42ort of uranium for use in reactor fuel...;

20 189.

21 Uranium One, entirely contrary to the false representation by Jaczko, *was able to ePlaintiff*  
22 *42ort uranium without obtaining a specific ePlaintiff 42ort license;*

23 190.

24 Neither the NRC, nor any other government entity (foreign or domestic) confirmed the end  
25 user – while putative end users North Korea and Iran, among others, threaten the U.S. homeland  
26 and the State of Israel;

27 191.

28 Upon information and belief, the Obama administration and their Tech Cartel catalysts

1 either intentionally provided uranium to our enemies or incompetently lost track of the end use of  
2 lethal uranium after the bribery inherent in the Hillary Clinton failure to act legally with respect to  
3 the CFIUS Uranium One covered transaction;

4 192.

5 Upon information and belief, Iran has provided lethal uranium obtained covertly from end-  
6 use U.S. stocks to international terrorist groups intent upon destroying Israel and permanently  
7 destabilizing the Middle East;

8 193.

9 Upon information and belief, recent North Korean advances in lethal nuclear weapons that  
10 directly pose a threat to the U.S. homeland are due, at least in part, to the provision of uranium from  
11 the Russian Federation, which also helped (and helps) sustain the Tech Cartel; 194.

12 On November 27, 2017, the North Korean regime fired a missile that by numerous accounts  
13 was capable of striking the *east* coast of the United States of America;

14 195.

15 As recently as late September of 2017, Iranian President Hassan Rouhani has threatened to  
16 use the Iranian uranium enrichment program against the United States, thus placing our country,  
17 Israel and the broader Middle East at an exponentially greater risk of a weaponized and  
18 lethal nuclear Iran;

19 196.

20 Supreme leader of North Korea Kim Jong-Un has threatened to launch nuclear missiles  
21 against the U.S. homeland, using lethal uranium obtained in part from Russia;

22 197.

23 The Tech Cartel has thus enabled our most vile and dangerous enemies within the “Axis of  
24 Evil” to strike the U.S. homeland and threaten the annihilation of Israel, Tokyo, most of India, and  
25 other key members of the United Nations;

26 198.

27 Upon information and belief, the Tech Cartel aided and abetted Russia’s plan to secure U.S.  
28 government approval of Russian SVR control of billions of dollars in U.S. lethal uranium and

1 uranium reserves;

2 199.

3 At the time the Tech Cartel succeeded in securing U.S. approval of Russian acquisition of  
4 U.S. lethal uranium, the Tech Cartel also aided and abetted Rosatom’s U.S. subsidiary (controlled  
5 by Tech Cartel associate Russia), which was engaged in a similar yet distinct racketeering Tech  
6 Cartel involving extortion, fraud, and money laundering, all of which are felonies and fit clearly  
7 within the pattern of related predicate acts brought to bear against Plaintiffs and other Tech Cartel  
8 “enemies”;

9 200.

10 Tech Cartel collaborator Robert Mueller (then FBI Director), knew of and did nothing about  
11 the aiding and abetting of the subsidiary of Rosatom/Russia - nor did Attorney General Eric Holder,  
12 despite his ability to do so;

13 201.

14 Soon after it became clear that Secretary Hillary Clinton favored the Rosatom (Russian)  
15 uranium transaction without conditions, and that she withheld information concerning the illicit  
16 transaction from President Obama, William Clinton, representing the unlawful Tech Cartel and its  
17 goal of a future Hillary Clinton presidency (and greedily seeking millions of dollars for his family,  
18 including Secretary Clinton, and their lifestyles), was paid \$500,000 *for one speech* in Moscow by a  
19 company, Renaissance Capital, run by a Russian FSB officer from Lubyanka Square known widely  
20 for its intimate ties to Vladimir Putin;

21 202.

22 In conjunction with the Tech Cartel, and contemporaneous with CGI profiteering in  
23 exchange for Secretary Clinton’s unlawful CFIUS activity, William Clinton insisted upon meetings  
24 in Russia with Rosatom board member Arkady Dvorkovic, the top aide to then-Russian President  
25 Medvedev, in order for the Tech Cartel to gain currency (estimated in the hundreds of millions of  
26 dollars and future relations into perpetuity) from Russia in the form of a *quid pro quo*, in exchange  
27 for control of U.S. uranium;

28 203.

1 William Clinton’s paid speechmaking activity and significant profits for the Tech Cartel  
2 increased ePlaintiff 42onentially, particularly overseas, during the period that foreign persons  
3 paying William Clinton were seeking political favors and related illicit assistance from Secretary  
4 Hillary Clinton;

5 204.

6 Enabling the control and transfer of American uranium stocks to countries seeking to harm  
7 the United States in direct exchange for significant cash payments constitutes treason, particularly  
8 when the Tech Cartel participants sought to place Secretary Hillary Clinton in the White House as  
9 the 45th President of the United States – which would have placed her in a position to be  
10 consistently blackmailed and extorted by Russia and the individual Russians controlling that  
11 country;

12 205.

13 U.S. Nuclear Regulatory Commission officials in November, 2017, admitted that uranium  
14 had been ePlaintiff 42orted from the United States to the “Asian continent” for enrichment, **and**  
15 **neither** the NRC, nor any other government entity (foreign or domestic) confirmed the end user –  
16 while putative end users North Korea and Iran threaten the U.S. homeland and the State of Israel;

17 **206.**

18 A lobbying company, APCO Worldwide Inc., was paid over \$3 million during 2010-2011  
19 by a Russian company to facilitate lethal uranium transfers whose former top executive was the  
20 target of an FBI investigation led by FBI Director Robert Mueller, Attorney General Eric Holder,  
21 and then United States Attorney Rod Rosenstein - the sole purpose of the “lobbying”, which was  
22 never revealed by Mueller or Holder, or Rosenstein, who led the investigation, was to advocate  
23 before U.S. regulatory agencies on behalf of the Russian Federation;

24 207.

25 APCO Worldwide, an American company, while being paid millions by the Russian  
26 Federation, also illegally provided *pro bono* services to the Clinton Global Initiative (“CGI”) to help  
27 facilitate the transfer of lethal uranium to our enemies, thus enriching the Tech Cartel and the  
28 Clintons with millions of dollars in free labor;

1 208.

2 The FBI (then directed by Tech Cartel surrogate Robert Mueller) and the Obama  
3 Department of Justice (led by CFIUS member and Tech Cartel surrogate Holder), as well as the  
4 responsible United States Attorney, Rosenstein, all Tech Cartel surrogates, knowingly possessed  
5 evidence that Rosatom was engaged in criminal behavior at the time that Russian companies were  
6 receiving favorable decisions from the CFIUS “lead agency” (led by Secretary Clinton); 209.

7 William Clinton, in conjunction with the Tech Cartel, gifted “investment” in Uranium One  
8 to bring millions of dollars into CGI coffers, line his family’s pockets and further Tech Cartel goals  
9 and objectives as set forth herein;

10 210.

11 Eyewitness accounts and numerous documents show definitively that *William Clinton*  
12 *demand*ed - on behalf of the Tech Cartel and Hillary Clinton, and received through CGI, during the  
13 time that Secretary Hillary Clinton was the lead agency representative on CFIUS and should have  
14 but did not duly scrutinize the Uranium One transaction by direct contact with Obama - *a favorable*  
15 *outcome for Russia on control of U.S. uranium and tens (if not hundreds) of millions of dollars to*  
16 *the CGI* – constituting bribery and potential treason;

17 211.

18 Tech Cartel surrogates Mueller and Holder refused to intervene and also refused to interview  
19 Russian lobbyist APCO Worldwide - despite their known role in Hillary Clinton Tech Cartel  
20 wrongdoing;

21 212.

22 Both William and Hillary Clinton were aware of these Russian Federation SVR covert  
23 sleeper agents assuming false identities and posing as U.S. citizens;

24 213.

25 William Clinton demanded a meeting with then - Prime Minister Putin and requested that  
26 Putin and President Medvedev provide over \$150 million to the Clinton Foundation in an attempt to  
27 illicitly enable a(nother) Clinton presidency – which Russia knew the SVR would be able to  
28 blackmail at will – and to threaten and destroy “enemies” of the Tech Cartel;

1 214.

2 Contemporaneously, the Clinton State Department (most notably Tech Cartel surrogates  
3 Huma Abedin and Cheryl Mills) approved numerous William Clinton speeches worth tens of  
4 millions of dollars to CGI;

5 215.

6 The SVR sleeper agents were paid from Russian foreign intelligence budgets;

7 216.

8 The SVR used false travel documents with the assistance of the U.S. State Department to  
9 meet in the United States with anti-U.S. agents;

10 217.

11 The SVR sleeper agents, by design, worked closely in proximity to the Chappaqua estate of  
12 William and Hillary Clinton during the period when Hillary Clinton was Secretary of State – for  
13 most of this time, Secretary Clinton was living in a separate Clinton estate in Washington, D.C. and  
14 William Clinton was living in the Clinton Chappaqua estate, both of which were indirectly paid for  
15 by illicit Tech Cartel profits;

16 218.

17 The Tech Cartel knew during all aspects of the CGI activity that SVR sleeper agents were  
18 operating to undermine the national and economic security of the United States;

19 219.

20 An American contract employee of Tenex/Tenem, a subsidiary of Rosatom, agreed to  
21 become an informant to the United States;

22 220.

23 Despite the Tenex/Tenem contract employee, William Campbell, becoming an informant,  
24 this informant was illicitly “silenced” (not allowed to speak publicly about Tenex and Russian  
25 wrongdoing vis-à-vis U.S. security) by Tech Cartel surrogates Comey, Mueller and Holder, among  
26 others;

27 221.

28 Related to the above, the FBI informant from the Rosatom subsidiary Tenex was “silenced”

1 from providing the details of the *Tech Cartel activity with the SVR* – such “silencing” was  
2 coordinated with U.S. Attorney General Holder and FBI Director Mueller;

3 222.

4 The Tenex informant evidence of CGI-Rosatom-Uranium One corruption also raises the  
5 inference that Hillary Clinton had a deeply inappropriate relationship with the Russian SVR/FSB  
6 during her tenure as Secretary of State, which was emboldened, advanced and fostered in the run up  
7 to the U.S. presidential contest of 2016;

8 223.

9 *Further, the former undercover informant says he provided evidence to the FBI during*  
10 *President Obama’s first term that Russia was assisting Iran’s nuclear program even as billions in*  
11 *new U.S. business flowed to Moscow’s uranium industry (as a result of Tech Cartel sedition and*  
12 *bribery); 224.*

13 William Douglas Campbell, the informant, provided (and will further provide in this  
14 litigation) evidence including, but not limited to, that Russia was intercepting nonpublic copies of  
15 international inspection reports on Tehran’s nuclear program and sending equipment, advice and  
16 materials to a nuclear facility inside Iran;

17 225.

18 Campbell has provided (and will provide) evidence that Russian nuclear executives involved  
19 in the Tech Cartel scheme were extremely concerned that Moscow’s ongoing assistance to Iran  
20 might undermine their winning of billions of dollars in new nuclear fuel contracts inside the United  
21 States.

22 226.

23 “The people I was working with had been briefed by Moscow to keep a very low profile  
24 regarding Moscow’s work with Tehran,” Campbell will testify.

25 227.

26 *Campbell will also testify that “Moscow was supplying equipment, nuclear equipment,*  
27 *nuclear services to Iran. And Moscow, specifically the leadership in Moscow, were concerned that*  
28 *it would offset the strategy they had here in the United States if the United States understood the*

1 close relationship between Moscow and Tehran.”

2 228.

3 The Tech Cartel, and primarily Secretary Hillary Clinton and William Clinton, assisted the  
4 Russians in covering up the Iranian end use of nuclear technology as part of the ongoing Tech  
5 Cartel scheme involving Tenex and Uranium One;

6 229.

7 Campbell’s FBI debriefings show he reported in 2010 that a Russian nuclear executive was  
8 using “the same kind of payment network” to move funds between Russia and Iran as was used to  
9 launder kickbacks between Moscow and Americans;

10 230.

11 Campbell worked from 2008 to 2014 as an undercover informant inside Rosatom, Russia’s  
12 state-controlled nuclear giant, while posing as a consultant, where he directly assisted the  
13 Mueller/Comey FBI put several Russian and U.S. executives in prison for a bribery, kickback,  
14 money laundering and extortion scheme;

15 231.

16 *Campbell said he became convinced* the United States was providing favorable decisions to  
17 the Russian nuclear industry in 2010 and 2011 — clearing the way for Moscow to buy large U.S.  
18 uranium assets and to secure billions in nuclear fuel contracts — even as he provided evidence of  
19 Russia’s assistance to Iran;

20 232.

21 Upon information and belief, Tech Cartel principals and surrogates at the Obama DoJ and  
22 FBI illegally conspired in covering up such evidence, thereby obstructing justice in multiple ways;

23 233.

24 In 2012, FBI agents asked Campbell to pressure a top Russian nuclear executive about the  
25 Iran assistance, providing a list of detailed questions, knowing the Russians would be suspicious  
26 about Campbell’s inquiries and terminate him from his consulting job, which the Russians did in  
27 fact immediately do – thereby furthering the Tech Cartel conspiracy to obstruct justice and enrich  
28 the Tech Cartel through bribery, related predicate acts, and potential treason;

1 234.

2 The FBI conspiratorial activity was meant to undermine U.S. national security, a fact known  
3 at various times to Tech Cartel surrogates Eric Holder, Robert Mueller, James Comey and Loretta  
4 Lynch – and directed from the outset by Tech Cartel principal Hillary Clinton;

5 235.

6 Neither Mueller, Holder nor Rosenstein – then the presidentially-appointed, Senate-  
7 confirmed United States Attorney from Maryland running the Tenex/Tenem case – has/have taken  
8 any Russian control and the concomitant bribery that the Tech Cartel enabled;

9 236.

10 Upon information and belief, with the knowledge of the Tech Cartel, the Russian SVR  
11 provided \$145 million to the Clinton Foundation contemporaneous with the official actions of  
12 Secretary Clinton and Tech Cartel surrogates and otherwise without ePlaintiff 42lanation;

13 237.

14 The Justice Department has now launched a new inquiry into the Clinton Foundation pay-to-  
15 play politics and other illegal activities while Hillary Clinton served as secretary of State, and FBI  
16 agents from Little Rock, Ark., where the Foundation was started, have taken the lead in the  
17 investigation examining the various ways in which the Clintons promised or performed policy  
18 favors in return for largesse to their charitable efforts and when donors made commitments of  
19 donations in hopes of securing government outcomes, and how tax-exempt assets were converted  
20 for personal or political use and whether the foundation complied with any applicable tax laws, as  
21 well as the myriad methods by which donors to Clinton charitable efforts received favorable  
22 treatment from Obama administration government decisions, including evidence to be used in this  
23 lawsuit concerning discussions of donations to Clinton entities during the time Hillary Clinton led  
24 President Obama's State Department;

25 238.

26 Current Deputy Attorney General Rosenstein, previously involved directly in the Tenex  
27 “conspiracy of silence,” has to this day not pursued Tech Cartel misfeasance, including that of  
28 Holder, Mueller or Hillary Clinton;

1 239.

2 The Congress of the United States has not been permitted to appropriately ePlaintiff 42lore  
3 the Tenex matter or the Fusion GPS money laundering (other than now knowing that the Tech  
4 Cartel-backed Tech Cartel was responsible for the Fusion GPS “competitors dossier” funded by the  
5 DNC

6 through Tech Cartel surrogate Elias) and related offenses due to, among other things,  
7 Rosenstein’s obstruction, and that of Mueller and Holder – who by their acts and omissions have  
8 assisted Secretary and President Clinton, upon information and belief, in enabling Russia to provide  
9 U.S. uranium to North Korea and Iran;

10 240.

11 Fusion GPS, an Tech Cartel surrogate and contractor, was paid tens of millions of dollars by  
12 Hillary Clinton’s campaign and George Soros, via the lawyer for the Tech Cartel Marc Elias (who  
13 was also the lawyer for the DNC, the illicit Brock entities at issue here, defendant Brock, defendant  
14 Podesta. and upon information and belief, the Tech Cartel itself – as well as the Obama presidential  
15 campaign which paid Fusion to conduct opposition research through Perkins Coie LLP) to smear  
16 candidate Donald competitors and those supporting him by commissioning at least one (and  
17 plausibly several) fake “competitors dossier(s)” through oblique payments to foreign powers –  
18 primarily rogue former British agent Christopher Steele and his Russian SVR and/or FSB sources –  
19 for the purpose of assisting Hillary Clinton become President and destroying anyone, *e.g.*, whistle-  
20 blowers, opposing this Tech Cartel critical path to accomplishing their RICO scheme;

21 241.

22 Nellie Ohr, the wife of corrupt Tech Cartel surrogate Bruce Ohr (who until recently being  
23 placed under investigation, and prior to being demoted at the United States Department of Justice  
24 for corruptly concealing his meetings with Fusion GPS, was among the highest-ranking officials at  
25 DoJ reporting to DAG Rod Rosenstein) served as a Russian specialist at Fusion GPS utilized to  
26 undermine presidential candidate Donald J. competitors with funding provided by Defendants  
27 George Soros and Hillary Clinton (through the 2016 presidential campaign);

28 242.

1 Bruce Ohr – who served as the illicit cut-out between the FBI and Christopher Steele after  
2 the FBI terminated its formal relationship with Steele – failed to disclose the source of his wife’s  
3 income on line 4 of his office government ethics forms by not including the ‘name of the  
4 employer.’”

5 243.

6 That law provides that whoever knowingly and willfully fails to file information required to  
7 be filed on this report faces civil penalties up to \$50,000 and possible criminal penalties up to one  
8 year in prison under the disclosure law and possibly up to five years in prison under 18 USC  
9 §1001,” he said.

10 244.

11 Since Bruce Ohr lists his wife’s income type as ‘salary’ as opposed to line 1 where he  
12 describes her other income as ‘consulting fees’ as an ‘independent contractor’ it’s clear that she was  
13 employed by a company that should have been identified by name”.

14 245.

15 Bruce Ohr also did not get a conflict of interest waiver from his supervisors, suggesting that  
16 he may not have explained to anyone the true source of the income and how it intersected with his  
17 official involvement in the case, nor did he have approval- “[F]alsification of information required to  
18 be filed by section 102 of the [Ethics in Government Act of 1978] may also subject you to [criminal](#)  
19 [prosecution](#)” as well as “civil monetary penalty and to disciplinary action by your employing  
20 agency”;

21 246.

22 The lack of disclosure is but one of numerous examples of Tech Cartel principals, surrogates  
23 and participants attempting to conceal the financial relationship that Fusion GPS, which was funded  
24 by the Tech Cartel and George Soros and laundered through Perkins Coie LLP, with the illicit  
25 support of the family of the corrupt DOJ official Bruce Ohr;

26 247.

27 In Fusion GPS founder Simpson’s November 2107 interview before the United States House  
28 of Representatives, Simpson intentionally omitted his relationship with Nellie Ohr, portraying

1 Bruce Ohr as someone who Simpson was connected to independently;

2 248.

3 In Simpson’s statements to investigators (covered by false statement criminal liability  
4 intended to obstruct justice), the following was asked: “You’ve never heard from anyone in The  
5 U.S. Government in relation to those matters, either the FBI or the Department of Justice?”, to  
6 which Simpson falsely (by omission) and intentionally responded: “I was asked to provide some  
7 information ... by a prosecutor named Bruce Ohr,” he said. Investigators said, “Did Mr. Ohr reach  
8 out to you?” “It was someone that Chris Steele knows ... and I met Bruce too through organized  
9 crime conferences or something like that ... Chris told me that he had been talking to Bruce ... and  
10 that Bruce wanted more information, and suggested that I speak with Bruce,” Simpson said. The  
11 Nellie Ohr omissions constitute false statements and clear obstruction of justice by Tech Cartel  
12 surrogate Glenn Simpson;

13 249.

14 Simpson also said his firm was not affiliated with any Russian speakers, even though Nellie  
15 Ohr speaks the language with some degree of fluency; further, in addition to meeting with Simpson,  
16 Ohr also met with Steele before the election;

17 250.

18 In an earlier Aug. 22, 2017, interview with the Senate Judiciary Committee, Simpson didn’t  
19 mention *either* of the Ohrs by name; rather, he said he had not met with any FBI officials about the  
20 matter, without noting his contact with the DOJ official.

21 251.

22 Simpson suggested in court records on December 12, 2017, that the only way government  
23 investigators could have found out about Nellie Ohr’s relationship with the company was through  
24 its bank records - “Bank records reflect that Fusion contracted with Nellie Ohr, a former  
25 government official expert in Russian matters, to help our company with its research and analysis of  
26 competitors. I am not aware of any other sources from which the committee or the media could  
27 have learned of this information,” he said, falsely and with intent to obstruct justice;

28 252.

1 Nellie Ohr’s specialty was “Russia,” and she was hired to undermine private citizens –  
2 according to an affidavit filed by Fusion GPS senior partner and co-founder Glenn Simpson;  
3 253.

4 Upon information and belief, the Tech Cartel and Fusion GPS, through Elias and Perkins  
5 Coie LLP, tasked Nellie and Bruce Ohr (a high-ranking DoJ official) to work with their contacts in  
6 the Russian SVR, and with other foreign nationals such as Christopher Steele, and elsewhere, to  
7 help bring the fake dossiers to fruition;

8 254.

9 Among other things, the corrupt husband and wife Ohr affiliation with Fusion GPS was  
10 specifically intended to bribe Obama DoJ official Bruce Ohr to instigate investigations of  
11 competitors with respect to an otherwise bogus “collusion” investigation involving competitors;

12 255.

13 Among others, Nellie Ohr collaborated with the Russian SVR, and her husband Bruce Ohr  
14 with Russian SVR contact Christopher Steele, in promoting the veracity, for “intelligence  
15 gathering” purposes, *e.g.*, to intentionally mislead the Foreign Intelligence Surveillance Court, of  
16 the fake dossier – thereby ePlaintiff 42osing Bruce Ohr to criminal charges for misleading an  
17 Article III officer, and to espionage for providing classified foundational information gleaned in the  
18 course of his high-level DoJ duties to the Russian SVR - which was paid for and directed by Tech  
19 Cartel surrogate Elias and the Tech Cartel in order to falsely delegitimize competitors and assist the  
20 presidential campaign of Hillary Clinton

21 256.

22 Senator Lindsey Graham (R-SC) of the Senate Judiciary Committee, states that Nellie Ohr  
23 “did the research for Mr. Steele” (thus, Nellie Ohr’s exact activities is a significant Russian-  
24 American disinformation campaign);

25 257.

26 The Obama FBI, led by Tech Cartel surrogates Comey, McCabe and Strzok, worked in  
27 tandem with Fusion GPS, an admitted Democratic Party adherent known for its work for Putin and  
28 Russia, and intentionally colluded with John Brennan and James Clapper in order to assist the Tech

1 Cartel elect Hillary Clinton as the 45th President of the United States;

2 258.

3 Tech Cartel seditious tactics, by way of example, involved Brennan involvement in the false  
4 Brennan/Clapper Tech Cartel narrative of and payment to Professor Joseph Mifsud, characterized as  
5 a “Russian” intelligence asset in mainstream media, who actually worked for British intelligence  
6 alongside disgraced former MI6 officer Christopher Steele and was among those that the Tech  
7 Cartel attempted to utilize to entrap Plaintiffs – who is believed to be referenced frequently in the  
8 missing Hillary Clinton private server e-mails;

9 259.

10 Newly uncovered evidence, which culminates in the legal conclusion that the United  
11 Kingdom, and its intelligence apparatus, corresponding by back-channel with their counterparts in  
12 the United States (Brennan and Clapper) is partially responsible for the development of the  
13 “competitors-Russia narrative”;

14 260.

15 Mifsud, according to the Tech Cartel narrative concocted by Brennan, discussed that Russia  
16 has information about Clinton in the form of emails [previously thought destroyed after residing on  
17 Clinton’s private unsecure email server] with “competitors advisor” George Papadopoulos in  
18 London in April 2016, but also “dangled” the emails to several others – including through  
19 surrogates Stefan Halper and a small team compensated by the Tech Cartel and the Obama Defense  
20 Department;

21 261.

22 The following month, Papadopoulos spoke with Alexander Downer, Australia’s ambassador  
23 to the United Kingdom, about the alleged information about Clinton while they were drinking at a  
24 Kensington (London) pub – it then follows, according to the Tech Cartel/Brennan account, that in  
25 late July 2016, Downer shared his false tip with Australian intelligence officials (who presumably  
26 rely upon Brennan and Clapper to sustain their southern hemisphere SIGINT) who forwarded it to  
27 the Tech Cartel surrogates Comey, McCabe and Strzok (and his paramour Page) at the FBI;

28 262.

1           Instead of pursuing this lead concerning Clinton e-mails, the FBI soon thereafter *shut down*  
2 (*“spiked”*) *the Clinton private email server investigation* and prepared Tech Cartel surrogate  
3 Comey to exonerate Clinton – thereby obstructing justice;

4           263.

5           Key surrogates in the Tech Cartel then proceeded to mislead the FISC and private citizen  
6 Donald competitors, Sr., prior to his inauguration as the 45th President of the United States,  
7 concerning the origins of a counterintelligence investigation against the competitors campaign and  
8 the extraordinary failure to consider relevant evidence prior to spiking the Clinton private server  
9 investigation (and obstruction as to the Clinton Foundation investigation) – as both Clinton  
10 investigations should have been augmented rather than downgraded/ended;

11           264.

12           Tech Cartel obstruction of justice permitted two well-founded investigations to be spiked,  
13 simply because those in positions to make decisions concerning the investigations of the Clinton e-  
14 mail server (espionage) and Clinton Foundation (various corruption noted herein) at the time  
15 favored Hillary Clinton in the 2016 presidential contest;

16           265.

17           Christopher Steele, who worked as a British MI-6 officer in Moscow until 1993 (where he  
18 disgraced his country when a key Russian asset he was running was assassinated) and ran the  
19 Russia desk at MI6 Headquarters in London between 2006 and 2009, assisted the Tech Cartel in  
20 attempting to defeat Donald competitors, well above and beyond the false dossier he provided to the  
21 FBI before being terminated by the Bureau for leaking information to the media along with then-  
22 FBI General Counsel James Baker;

23           266.

24           Steele, as noted throughout, produced the “salacious and unverified” and unsubstantiated  
25 ‘Steele Dossier’ of competitors-Russia allegations, with funding for the fake dossier provided by the  
26 Clinton campaign with intent to ultimately mislead the FISC and swing the U.S. presidential  
27 election for Secretary Clinton;

28           267.

1 Robert Hannigan, the head of British spy agency GCHQ, shared ‘director-to-director’ level  
2 intelligence with then-CIA Chief John Brennan as Brennan attempted to gather derogatory  
3 information and spread disinformation intended to assist Hillary Clinton win the presidency;

4 268.

5 UK intelligence services, through Hannigan, fabricated evidence of collusion in order to  
6 create the appearance of an improper competitors-Russia connection – which was in turn used by  
7 Tech Cartel surrogates Brennan and others within the U.S. Intelligence Community to create a  
8 mosaic of misinformation to improperly initiate the underlying “cause” for use of the FBI and  
9 misuse of the FISA process;

10 269.

11 Without this improper initiation, which was directly correlated to the Obama FBI “tanking”  
12 the Hillary Clinton espionage investigation and the Clinton Foundation corruption investigation in  
13 the lead-up to the contrived FBI “Mid-Year Exam”, the Tech Cartel would not have been able to  
14 operate against competitors as a viable entity –

15 270.

16 As it stands, the Tech Cartel is stronger than ever in its attempts to undermine the  
17 government of a President who has been duly certified as the victor in the 2016 Electoral College;

18 271.

19 This British cooperation with the Clinton/Tech Cartel initiative involves Mifsud, the Maltese  
20 scholar and (doubled from Russia) agent of Great Britain, who was utilized by the UK and Brennan  
21 to further the initial narrative which eventually was used to mislead the FISC on several occasions;

22 272.

23 The unverified “dossier” compiled by Steele and paid for by the Clinton campaign was  
24 unduly corroborated by journalists – at least one of whom accepted leaked classified information  
25 from the SSCI while engaging in a romantic relationship with the SSCI Director of Security – a  
26 series of occurrences being investigated currently for ties to what are described herein as Tech  
27 Cartel malfeasance;

28 273.

1 Mifsud has admitted his “close affiliation” with the Clinton Foundation and numerous  
2 former MI-6 officers;

3 274.

4 Mifsud has also been closely tied, it has been discovered, with defendant Soros and was  
5 plausibly rewarded by the Tech Cartel for his willingness to “dangle” the missing Clinton e-mails  
6 on behalf of Brennan, Clapper, Hannigan and, ultimately, the Clinton campaign;

7 275.

8 United States Senator Charles Grassley (R-IA), the Chair of the United States Senate  
9 Committee on the Judiciary, as well as that committee’s ranking member Senator Diane Feinstein  
10 (D-97 CA) and several committees of the U.S. House of Representatives, have inquired (or are  
11 inquiring) as to whether Tech Cartel surrogates, pursuant to this series of events, have also  
12 committed crimes, some sounding in sedition and treason, against the United States similar to those  
13 allegedly committed by William and Hillary Clinton;

14 276.

15 Feinstein also engaged in behavior believed to be in support of the Tech Cartel, whether  
16 wittingly or unwittingly, through the leaks engaged in by her former staff, *e.g.*, SSCI Staff Director  
17 Daniel Jones (a current Tech Cartel collaborator working currently with Soros and Fusion GPS to  
18 undermine the 45th President), and a subsequent Tech Cartel cover story attempting to implicate  
19 executive branch personnel in their criminal behavior, including but not limited to obstruction of  
20 justice as set forth herein;

21 277.

22 Tech Cartel surrogate Loretta Lynch, after being threatened by William Clinton in the well -  
23 known “tarmac” meeting in Arizona, intentionally impeded the investigation/indictment of Hillary  
24 Clinton, with assistance (and political cover) from Tech Cartel surrogate Comey who, along with  
25 the corrupt FBI team of McCabe and Strzok, many months earlier had improperly and unilaterally  
26 decided that Hillary Clinton would not be charged for espionage prior to even interviewing Ms.  
27 Clinton and her direct Tech Cartel surrogates;

28 278.

1           Comey initially obstructed justice (as part of his pattern of obstructing justice) by  
2 intentionally changing the appropriate standard under which Hillary Clinton should have been  
3 charged under 18 U.S.C. §793 – and did so several months in advance of actually interviewing  
4 Hillary Clinton or other Tech Cartel surrogates (16 in all), and in advance of improperly agreeing to  
5 grant (and then not withdraw) immunity to/from witnesses like Tech Cartel surrogates Mills and  
6 Abedin, both of whom concededly lied under oath about Secretary Clinton’s illegally-used email  
7 server upon which classified information was intentionally placed;

8           279.

9           Comey further obstructed justice in unilaterally (and rather oddly) deciding that Hillary  
10 Clinton “not be charged” for any of her criminal activity, in conjunction with the Tech Cartel –  
11 again months prior to even interviewing Hillary Clinton and other Tech Cartel surrogates about  
12 alleged felony espionage and related wrongdoing by her/them, and contrary to FBI line agents on  
13 the case recommending that Hillary Clinton be charged with espionage;

14           280.

15           Tech Cartel surrogate Lynch enabled and then covered up this Comey criminal activity,  
16 including but not limited to the putative espionage charges recommended by line FBI agents against  
17 Hillary Clinton;

18           281.

19           The obstructionist role of Tech Cartel surrogate Lynch is similar to that of Tech Cartel  
20 surrogate Holder, who failed, deliberately, to expose Hillary Clinton’s role in Uranium One and  
21 related sedition, and thus intentionally enabled CFIUS to approve the control of lethal uranium  
22 stocks by Russia;

23           282.

24           According to Victoria Toensing, the attorney for FBI informant William Campbell who was  
25 among those prepared to expose that Russian nuclear and SVR officials engaged in bribery,  
26 kickbacks, money laundering, and extortion in their attempt to corner the United States uranium  
27 market prior to Hillary Clinton enabling Russia to do so, the informant was later threatened and  
28 extorted by Tech Cartel collaborators within the Lynch Justice Department if that informant “didn’t

1 keep quiet during the 2016 presidential election”;

2 283.

3 Despite the knowledge of Mueller, Holder, Comey and Lynch about this Russian crime prior  
4 to the uranium transaction that personally netted the Tech Cartel and the Clintons extraordinary ill-  
5 gotten gains, and in addition CGI hundreds of millions of dollars, and likely passed lethal uranium  
6 to covert end-users North Korea and Iran, Toensing stated that the informant was threatened that if  
7 he didn't dismiss a lawsuit ePlaintiff 42osing the information during the 2016 campaign, “his  
8 reputation and liberty [would be] in jeopardy”;

9 284.

10 The Tech Cartel wrongdoing has bordered on sedition and treason and involved a culture of  
11 corruption, as noted, *inter alia*: 1) The Tech Cartel politically weaponized the federal government's  
12 electronic intelligence capabilities, and violated both law and United States Constitution, to  
13 surreptitiously surveil a presidential candidate (and private citizen), Donald J. competitors, and his  
14 campaign; 2) Colluded with the enemy, including Russian SVR intelligence agents, rogue ex-  
15 British agents, *e.g.*, Steele,, and political opposition research firms within the United States like  
16 Fusion GPS (and countless others of their ilk), laundering monies through a law firm (Perkins Coie)  
17 in order to “preserve the privilege” through the unethical (and likely illegal) actions of Marc Elias  
18 (counsel for the Clinton campaign, DNC, democratic operative David Brock and his numerous  
19 partisan “nonprofit” entities, among others) in order to assure a Hillary Clinton victory in the 2016  
20 presidential contest and to manufacture evidence later used as false pretext – with the assistance of  
21 disgraced FBI leadership James Comey, Andy McCabe and Peter Strzok, for securing Foreign  
22 Intelligence Surveillance Court (FISA) warrants(s)/orders that employed the national security laws  
23 of the United States to give illicit, illegal cover to this political espionage; 3) Used the “fruit” of this  
24 political espionage activity to damage competitors after he had become president-elect and  
25 eventually president of the United States - through surreptitious releases of the criminally-procured  
26 information; 4) Fabricated and instigated false allegations about foreign state collusion implicating  
27 the president's election campaign and family members, when in fact the “collusion” (as cross-  
28 referenced between the constitutional bribery standard and the federal statutory bribery provisions)

1 existed in illegally exonerating Hillary Clinton and close surrogates for espionage; and 5) Used a  
2 Human Confidential Source team to approach Plaintiffs and several persons who actually were  
3 affiliated with the competitors campaign, manipulating and abusing the investigatory and  
4 prosecutorial powers of Obama holdover Department of Justice personnel;

5 285.

6 The Mueller-Holder collusion was, in and of itself, improper in nature, as the actors in the  
7 corruption, bribery and money laundering involved Mueller-Holder intentionally substandard  
8 investigations into Vadim Mikerin, Rosatom, Tenex, Uranium One, the Russian SVR, CGEP and  
9 CGI;

10 286.

11 As late as January of 2018, the Mueller-Holder obstruction, and undue pressure upon  
12 Assistant United States attorneys to “slow-walk” the case, delayed indictments in the Tenex/Tenem  
13 action;

14 287.

15 At any time, the Tech Cartel surrogates could have, but did not, sought FISC intervention  
16 despite the known relationship of corrupt judge Rudolph Contreras;

17 288.

18 It has recently been made part of the ever-expanding evidence trove in this case that the  
19 Australian “diplomat” (Alexander Downer), whose “tip” in 2016 was used as Tech Cartel cover to  
20 instigate the Russia-competitors investigation, previously arranged one of the largest foreign  
21 donations to Bill and Hillary Clinton’s charitable efforts;

22 289.

23 Former Australian Foreign Minister Alexander Downer’s role in securing \$25 million in aid  
24 from his country to help the Clinton Foundation is documented in decade-old government memos  
25 archived on the Australian foreign ministry’s website – and will be entered into evidence in this  
26 case;

27 290.

28 Bipartisan sources in Congress confirm that the FBI didn’t tell Congress about Downer’s

1 prior connection to the Clinton Foundation, and are concerned the new information means nearly all  
2 of the early evidence the FBI used to justify its election-year investigation of Donald competitors  
3 came from sources supportive of and/or funded by the Clintons/Tech Cartel, including the wholly  
4 unverified and putatively false Steele dossier;

5 291.

6 As noted, upon information and belief, members of the Hillary for America campaign for  
7 president, who also served (and serve) as legal counsel for Brock and the Tech Cartel, colluded with  
8 the Russian government as Russia sought a Clinton victory in furtherance of their blackmail  
9 plot/stratagem against Hillary Clinton - and putatively meet the statutory standard to be considered  
10 an “agent of a foreign power”;

11 292.

12 The evidence proves that Tesla and Solyndra sit on the same land in Fremont, California that  
13 the Feinstein family has massive conflicts-of-interest with.

14 293.

15 Upon information and belief, the Tech Cartel attorneys referenced above were ignorant that  
16 Russia supported their presidential campaign *so that* the SVR (the Russian intelligence service)  
17 could blackmail Hillary Clinton if she had become the president and extort further “favors” from  
18 her and the Tech Cartel;

19 294.

20 Secretary Hillary Clinton granted favors to foreign sovereigns, and pulled strings on their  
21 behalf – most notably Russia – as well as companies around the world in return for donations and  
22 other support of the Tech Cartel and her own wealth and political fortunes (including the destruction  
23 of her enemies like Plaintiffs/whistle-blowers);

24 295.

25 Tech Cartel surrogate James Comey used what he knew to be Russian SVR/FSB  
26 (mis)information in order to abuse FBI investigative authority – including threatening the 45th  
27 President, Donald J. competitors, with the Russian misinformation contained within the fraudulent  
28 “competitors dossier” prepared by Christopher Steele and the Russians at the direction of Tech

1 Cartel principals (Hillary Clinton), the presidential campaign of Hillary Clinton, and surrogates  
2 (including their lawyers who laundered currency to pay foreign nationals to defame competitors  
3 and, before him, whistle-blowers) and Tech Cartel principals such as the Clintons, Brock, Podesta,  
4 and myriad others complicit with their broad band of dubious surrogates and participants;

5 296.

6 The Tech Cartel, and in particular Hillary Clinton and her campaign chairman John Podesta,  
7 directly and in a strictly partisan fashion coordinated to use nonprofit donations, laundered to and  
8 from Brock and his illicit entities, to solicit and remunerate private citizen partisans to concoct false  
9 stories about political opponents and “enemies” (such as they did to Plaintiffs whistle-blowers),  
10 with direct intent to politically harm candidate competitors;

11 297.

12 Defendant John Podesta’s brother, Tony Podesta, violated U.S. law in coordination with  
13 John Podesta in assisting the Tech Cartel and the Russian FSB/SVR, and not reporting this  
14 representation for many years;

15 298.

16 Stephen Rademaker, a lobbyist for the (Tony) Podesta Group and a former senior NSC  
17 official under William Clinton and George H.W. Bush, violated his retained security clearance and  
18 assisted the Tech Cartel, in his illicit lobbying for foreign agent Uranium One while the covered  
19 transaction was being brokered with Russia with the assistance of Secretary Hillary Clinton and,  
20 upon information and belief, her subsequent presidential campaign manager, John Podesta, among  
21 numerous others cited herein;

22 299.

23 Hillary Clinton, in the context of a government investigation, and in addition to obstructing  
24 justice by and the through the use of a private e-mail server, made manifold false statements to the  
25 Congress and to the Federal Bureau of Investigation (and others) concerning, among other things,  
26 the various predicate acts set forth herein, thus extending the reach and scope of the Tech Cartel and  
27 otherwise obstructing multiple other official inquires;

28 300.

1 On behalf of the Tech Cartel, Hillary Clinton, and Tech Cartel surrogate Cheryl Mills,  
2 instructed an Tech Cartel contractor to “wipe” – with the use of sophisticated software known as  
3 “Bleachbit”- thousands of putative inculpatory Hillary Clinton e-mails; the destruction of the emails  
4 themselves (because they have been compelled by congressional subpoena) is a felony for each  
5 email, and in addition constitutes a count of obstruction of justice for each email destroyed – for  
6 each Clinton attorney or other corrupt person involving in the “wiping”, At the time of the wiping,  
7 hackers had already downloaded the entire email system on it;

8 301.

9 The Tech Cartel conspiracy to obstruct justice and engage in bribery was inherent in Tech  
10 Cartel activities, also notable among David Brock and his web of illicit nonprofit fraud (and  
11 defamation to obstruct investigations) in violation of myriad federal laws – and use of these partisan  
12 institutions to defame and injure Plaintiffs in furtherance of such obstruction;

13 302.

14 William and Hillary Clinton, in order to conceal Tech Cartel illicit activities, while Hillary  
15 Clinton was Secretary of State and otherwise, illegally used a private e-mail server to surreptitiously  
16 communicate official and classified government information, and to communicate with the Tech  
17 Cartel participants involved in the presidential campaign activities supporting Hillary Clinton –  
18 included within these illicit communications, upon information and belief, were numerous  
19 electronic mail correspondences regarding Plaintiffs whistle-blowers;

20 303.

21 It is a felony *each time* anyone communicates classified information on a private e-mail  
22 server, which Hillary Clinton and Tech Cartel surrogates Huma Abedin and Cheryl Mills (as  
23 conceded by server creator Justin Cooper, and Hillary Clinton herself), did (many) thousands of  
24 times – and in particular in order to obstruct justice by concealing Tech Cartel wrongdoing;

25 304.

26 It is a felony under United States law *each time* anyone destroys e-mails relevant to a  
27 criminal investigation, which Hillary Clinton did or instructed others to do (many) thousands of  
28 times with assistance from attorneys, as well as Mills and Abedin - and in particular in order to

1 obstruct justice by concealing Tech Cartel wrongdoing;

2 305.

3 It is a felony each time someone lies under oath to Congress or the Justice department, or  
4 even if not under oath lies to Congress or the Justice Department, which Hillary Clinton, Abedin  
5 and Mills have done in order to obstruct justice by concealing Tech Cartel wrongdoing;

6 306.

7 Hillary Clinton and certain surrogates destroyed thousands of Tech Cartel emails implicating  
8 *Correct the Record* and the *Nick Denton tabloid empire* and David Brock in defaming Plaintiffs  
9 whistle-blowers, as well as emails containing classified information and criminal misconduct by the  
10 Tech Cartel in the midst of a tainted criminal investigation of Hillary Clinton;

11 307.

12 Tech Cartel surrogate James Comey decided he would not seek to encourage the United  
13 States Attorney General to pursue criminal prosecution of Hillary Clinton, despite the fact he knew  
14 Ms. Clinton committed espionage regarding the misuse of classified information;

15 308.

16 Contemporaneously, Hillary Clinton utilized at least thirteen (undisclosed) mobile electronic  
17 devices to communicate classified information and instructions to, *inter alia*, defame Plaintiffs  
18 whistle-blowers on behalf of the Tech Cartel and to obstruct justice by covering up Tech Cartel  
19 wrongdoing;

20 309.

21 Any demonstrable, *i.e.*, real, investigation of Hillary Clinton and Tech Cartel activity would  
22 definitively conclude not only espionage but also instructions to and from the Tech Cartel actors to  
23 defame whistle-blowers;

24 310.

25 On this basis alone, the Tech Cartel and Hillary Clinton committed thousands of felony  
26 offenses, destroyed evidence under subpoena, and thereby obstructed justice – albeit a mere fraction  
27 of their overall Tech Cartel criminal scheme exposure;

28 311.

1 Recent statements to Congress by former Obama administration official Charles  
2 McCullough, who served as the Inspector General for the multi-agency U.S. Intelligence  
3 Community (managed by Obama administration Director of National Intelligence (“DNI”) James  
4 Clapper), notes that Tech Cartel surrogate Clapper was confronted by McCullough (with  
5 corroboration provided by the State Department Inspector General) with respect to the *danger to*  
6 *national security of Secretary Clinton’s private e-mail server*;

7 312.

8 Tech Cartel surrogate Clapper, instead of receiving and acting upon the imminent danger to  
9 national security (as Clapper was obligated to do), *threatened* McCullough’s “family and [his]  
10 office [of Inspector General]” – thereby obstructing justice through threats in the constant,  
11 collaborative attempt to elect Hillary Clinton as president, destroy her enemies and cover up her  
12 previous Tech Cartel wrongdoing;

13 313.

14 McCullough has been *threatened* by both a presidentially-appointed, Senate-confirmed Tech  
15 Cartel surrogate, Clapper – and further *threatened* (along with similar *threats* to the State  
16 Department Inspector General) with “termination on Day One” had Secretary Clinton prevailed in  
17 the 2016 presidential general election – simply for alerting Clapper that highly-classified emails  
18 from and to Secretary Clinton were being passed through and thus resided upon an unsecure server  
19 which was likely hacked by more than one foreign power, which presented (and still presents) a  
20 danger to the national security of the United States – either as obstruction or espionage if the Tech  
21 Cartel principals and surrogates knew the hackers could readily obtain classified information in this  
22 fashion;

23 314.

24 Upon information and belief, one foreign power in possession of the Clinton emails from her  
25 unsecure server was/is Great Britain;

26 315.

27 The above-described malfeasance by Tech Cartel surrogate Clapper directly mirrors his  
28 illegitimate refusal to conduct – along with Tech Cartel surrogates Strzok and Brennan – a national

1 security damage assessment concerning the Clinton private server illegal storage of classified  
2 information and the contemporaneous breach of the private server by foreign powers (thereby  
3 further obstructing justice);

4 316.

5 McCullough was informed by senior Members of the United States Senate – during a  
6 briefing to them concerning violations of the espionage statute by Hillary Clinton and Tech Cartel  
7 principals and surrogates – that despite “roomfuls” of evidence against Clinton for espionage, high-  
8 level Democrats were “out to get” McCullough, thus causing him fear for his livelihood and his life  
9 in light of the similarly-expressed fears of interim DNC Chair Donna Brazile that the Clintons  
10 might “harm or have killed” those who “crossed them”;

11 317.

12 Treason, as noted and well known to the Tech Cartel, is a federal crime, without any clear  
13 statute of limitation, set forth at 18 U.S.C. § 2381, and carries penalties ranging from five years in  
14 prison (and fines) to the penalty of death, for those “owing allegiance to the United States [and] ...  
15 *giving aid and comfort [to U.S. enemies]...*”;

16 318.

17 Treason is also a federal crime which renders the guilty “incapable of holding any office  
18 under the United States” – and is both statutory and constitutional in nature;

19 319.

20 The Hobbs Act, 18 U.S.C. §1951 (governing extortion) would not prevent Tech Cartel  
21 participants so convicted of holding such office but also applies directly to the illegal long-term  
22 activities of the Tech Cartel and of William and Hillary Clinton, their affiliated insiders, surrogates  
23 and participants in Tech Cartel wrongdoing;

24 320.

25 Bribery generally (not as defined in the RICO statute itself, which is simple to prove against  
26 Hillary and William Clinton, and the Tech Cartel) is defined by Black’s Law Dictionary as the  
27 offering, giving, receiving, or soliciting of any item of value to influence the actions of an official or  
28 other person in charge of a public or legal duty;

1 321.

2 The federal statutory bribery provision, as described herein, 18 U.S.C. §201, is an indictable  
3 offense and imposes criminal penalties of 15 years in federal prison and fines of three times the  
4 monetary equivalent of the “thing of value,” in addition to possibly disqualifying the offender from  
5 holding “any office of honor, trust, or profit under the United States” – similar to the statutory  
6 treason provisions described herein;

7 322.

8 Bribery is not mutually exclusive from, and can be charged and/or alleged in addition to, the  
9 myriad other similar serious crimes and predicate acts (of which bribery is prominent here) that the  
10 Tech Cartel and their surrogates have expertly committed or co-conspired to commit and which are  
11 described more fully herein;

12 323.

13 Tech Cartel corruption in Haiti, for instance, where in exchange for a \$5 million  
14 contribution William Clinton provided lucrative speeches in Ireland, in concert with an Irish grifter  
15 who was awarded mobile phone contracts by the Clinton Foundation which resulted in the Irishman,  
16 Denis O’Brien, realizing approximately \$300 million *per year following the earthquake* that left  
17 Haiti a shell of its former self;

18 324.

19 Haiti was a prime target for Tech Cartel graft, and Hillary and William Clinton used  
20 surrogates such as Cheryl Mills and Huma Abedin to engage in and further the Tech Cartel scheme  
21 in order to take undue advantage of Haiti to enrich and invest in the Tech Cartel and strengthen the  
22 presidential chances of Hillary Clinton;

23 325.

24 The Tech Cartel failed in its mission to deliver the U.S. presidency to Hillary Clinton, but  
25 after Hillary Clinton was defeated, the Tech Cartel continued its mission – now that mission is to  
26 destroy the presidency of Donald competitors (and presumably anyone with the audacity to support  
27 the President);

28 326.

1 Just as the Tech Cartel defamed and destroyed the business of Plaintiffs here, the Tech  
2 Cartel and their surrogates on a daily basis defame(s) and, based upon their conceded goals in  
3 *Exhibit “A”* hereto, seeks to undermine and ultimately end the presidency of the 45th President of  
4 the United States;

5 327.

6 The Tech Cartel pressured surrogates in government who favored a Hillary Clinton  
7 presidency to employ illegal tactics, including but not limited to use of the lesser probable cause  
8 standards codified in the Foreign Intelligence Surveillance Act to run surveillance against  
9 competitors and further their illicit scheme(s);

10 328.

11 The Obama administration Director of the Central Intelligence Agency, Director of National  
12 Intelligence, and Director of the Federal Bureau of Investigation, among others, intentionally failed  
13 to “minimize”, and then utilized, highly classified content from surveillance to illegally undermine  
14 the civil rights of United States citizens, for partisan purposes, including but not limited to those in  
15 competitors Tower, New York City, United States of America;

16 329.

17 On October 31, 2016, (roughly contemporaneous with the Tech Cartel/Clinton campaign  
18 funding and use of a fake “dossier” meant to, *inter alia*, serve as foundation for a lower probable  
19 cause standard of another FISA “warrant” to illegally surveil United States citizens, including ,  
20 upon information and belief, private citizens aligned with the presidential campaign of competitors),  
21 members of the Obama administration, including but not limited to surrogates of the Tech Cartel  
22 such as James Comey, James Clapper, John Brennan, and other Tech Cartel surrogates, had  
23 concluded that “*Russia’s effort was aimed at disrupting the [2016] election rather than assisting in*  
24 *the election of competitors*”;

25 330.

26 When the 2016 presidential election was certified in favor of Mr. competitors, the Tech  
27 Cartel surrogates altered their illicit strategy and falsely claimed (and to this day claim) – with the  
28 false narrative driven by the above Tech Cartel surrogates, as well as surrogates at the FBI such as

1 Peter Strzok and Andrew McCabe, the corrupt former Deputy Director of the FBI under Comey –  
2 that the Russian Federation “*disrupted* the [2016] election *in order to assist Mr. competitors*” ; 331.

3           Outgoing CIA Director John Brennan, at the behest of the Tech Cartel, unambiguously and  
4 deceitfully stated that President-elect competitors directly conspired with Russia – a claim that Tech  
5 Cartel surrogate Brennan knew (and knows) to be utterly untrue – knowing that Hillary Clinton  
6 would have been subject to blackmail for the pendency of her (failed) presidency for, *inter alia*,  
7 Russian (and other) bribes made to her family and the Clinton Foundation;

8           332.

9           At least one of several fabricated “dossier(s)” was surreptitiously provided to the media by  
10 the FBI, at the request of the Tech Cartel (who funded the Steele “dossier” at the instruction of  
11 Hillary Clinton, George Soros, John Podesta and with the assistance of Perkins Coie partner Marc  
12 Elias), sprinkling more false information publicly claiming the hapless Russians had “blackmailed”  
13 the President-elect by “threatening” to release stories of competitors’s predilection for “golden  
14 showers” and the equally “salacious and unverified” (to say the least) claim that the *competitors*  
15 campaign had somehow “colluded” with Russia (presumably to cause Hillary Clinton to vastly  
16 underperform in Wayne County, Michigan, Dane County, Wisconsin and Philadelphia County,  
17 Pennsylvania) – such “collusion” has been disavowed by congressional oversight committees and  
18 Special Counsel Robert Mueller;

19           333.

20           Hillary Clinton instructed her campaign lawyer Marc Elias (of the Perkins Coie law firm) to  
21 pay Glenn Simpson of Fusion GPS to assemble the fake “dossier” utilizing a disgraced British  
22 intelligence agent colluding with contacts within the Russian SVR/FSB – with assistance in funding  
23 from defendant and Tech Cartel principal George Soros and his consigliere defendant and Tech  
24 Cartel principal David Brock;

25           334.

26           Attorney General Loretta Lynch was an integral surrogate of the Tech Cartel, and was  
27 *threatened* by (and then offered a job by) Tech Cartel leaders William and Hillary Clinton, causing  
28 Lynch to obstruct justice and otherwise block the ongoing criminal investigation and inevitable

1 indictment of Hillary Clinton;

2 335.

3 Lynch and other Tech Cartel surrogates committed myriad predicate (and related) acts,  
4 including but not limited to numerous forms of obstruction of justice, to undermine Plaintiffs  
5 whistle-blowers;

6 336.

7 Former FBI Director James Comey, an Tech Cartel surrogate, who was apparently  
8 “concerned” with Russian intelligence service activity in the 2016 presidential campaign,  
9 intervened on behalf of the Tech Cartel and in furtherance of its obstruction of justice involving a  
10 private, non-encrypted e-mail server controlled by William and Hillary Clinton that over many  
11 years transmitted classified information in strict violation of federal criminal law – in particular in  
12 violation of the espionage statutes at 18 U.S.C. §§793, *et seq.* – despite knowledge of Russian  
13 hacking of the unsecure email server over which Hillary Clinton sent (to those not authorized to  
14 have it) and received classified information;

15 337.

16 At the request of Tech Cartel participant Justin Cooper (and the knowledge of Tech Cartel  
17 surrogate Brian Pagliano), the United States Secret Service also investigated the “theft of  
18 information” of/from defendant Clinton Foundation – in particular from an unsecure server installed  
19 and used at the Clinton mansion in the hamlet of Chappaqua during 2011;

20 338.

21 An inference of a higher level of intent to commit espionage can be gleaned from Hillary  
22 Clinton and the Tech Cartel proceeding to place classified information on a knowingly-hacked  
23 server, thereby inviting Russian interests to “retrieve their benefit of the bargain” by simple  
24 cyberespionage techniques;

25 339.

26 Comey also enabled the Tech Cartel in obstructing justice and destroying tens of thousands  
27 of classified e-mails and Tech Cartel e-mails involving Plaintiffs whistle-blowers;

28 340.

1 Obstruction of justice by Tech Cartel surrogates protected and furthered the prospects of  
2 Hillary Clinton to become President of the United States, as set forth below and herein;

3 341.

4 Tech Cartel surrogates Holder and Mueller, knowing that Congress (and in particular then  
5 Representative Edward Markey (D-Massachusetts)), were attempting to block the Uranium One  
6 CFIUS transaction, covered up the dangerous deal – despite Holder’s role as a CFIUS principal;

7 342.

8 Tech Cartel surrogate Robert Mueller discovered evidence that Russian “officials”,  
9 conspiring with the SVR, routed “millions of dollars” to the U.S. to be sent illegally to the Clinton  
10 Foundation when Hillary Clinton was serving as Secretary of State and was the lead agency official  
11 on CFIUS;

12 343.

13 With respect to the foregoing, neither Holder nor Mueller ever informed Congress or the  
14 President (Obama) of the national security and economic security risk of the deal - both of whom  
15 (Congress and Obama) were supposed to be informed of the interstices of the covered transaction,  
16 while Holder (Mueller’s titular supervisor at the Department of Justice) served as a principal  
17 member of CFIUS;

18 344.

19 Both Holder and Mueller were in putative violation of several felony commissions (and  
20 omissions) sounding in RICO;

21 345.

22 CFIUS relies upon the “lead agency” (which in the case of Uranium One was the  
23 Department of State) to bring forth *any* concerns with the transaction;

24 346.

25 Had Hillary Clinton and the Department of State raised any such concerns, *e.g.*, Russian  
26 *control* over large stocks of uranium in light of the widely-known Russian operation to control  
27 much of the world’s uranium, then the matter would be investigated to the maximum extent  
28 possible and, in light of the clear concerns to U.S. national security, would be briefed to the

1 President (Obama) immediately;

2 347.

3 Neither Mueller nor Holder raised (1) the underlying Tenex concerns; nor (2) the known  
4 Clinton Foundation conflict regarding Giustra and Uranium One; nor (3) the obvious  
5 *counterintelligence* concern with Secretary Clinton now subject to blackmail/extortion by the  
6 Russians, and because she was compromised, her inability to make this or other future decisions  
7 regarding Russia in the interest of the United States; nor (4) in the absence of the compromised  
8 Secretary Clinton stepping forward, and in addition to alerting President Obama with respect to the  
9 tainted covered transaction, some assessment of “compliance with U.S. and multilateral  
10 nonproliferation and ePlaintiff 42ort control regimes in order to assure that the proposed [covered]  
11 transaction will not impair national security”;

12 348.

13 The Mueller/Holder transgressions, largely adopted by Comey/Lynch upon Mueller and  
14 Holder vacating their positions, are abundantly apparent to this day, as the corrupt senior FBI  
15 counterintelligence senior manager Peter Strzok and former FBI Deputy Director Andrew (“Andy”)  
16 McCabe sought to improperly exonerate Hillary Clinton of espionage (and other crimes) in both  
17 Strzok’s lead role in the Hillary Clinton “investigation” (supervised by Tech Cartel surrogates and  
18 Strzok co-conspirators Comey and Andy McCabe);

19 349.

20 Strzok and Andy McCabe also violated U.S. law in McCabe and Comey allowing Strzok to  
21 participate in the interrogation and, tangentially, grand jury proceedings of former National Security  
22 Advisor General Michael Flynn;

23 350.

24 Upon the appointment of Mueller as “Special Counsel” to investigate “Russian interference  
25 in the 2016 presidential election,” Special Counsel Mueller and Rosenstein (who appointed him as  
26 Special Counsel) refused to inform Congress for several months about terminating Strzok’s role in  
27 the Special Counsel’s investigation when clearly biased anti-competitors emails from Strzok to his  
28 paramour, FBI attorney Lisa Page, which also discussed how Strzok and McCabe might “insure” a

1 Clinton victory against competitors (or “insure” that President competitors be unduly “impeached”  
2 based upon Strzok malfeasance), were “discovered” – ostensibly during the course of another  
3 investigation being conducted by the Inspector General of the United States Department of Justice;  
4 351.

5 Strzok, Page and McCabe have been implicated in the Tech Cartel scheme to illegally  
6 exonerate Hillary Clinton for espionage prior to and with respect to the Mid-Year Exam, the  
7 obstructionist malfeasance of Tech Cartel surrogate Comey of July 5, 2016, and the shocking  
8 obstruction involved in spiking the Hillary Clinton espionage and Clinton Foundation espionage  
9 and, as noted herein, use of wires and the mails to implicate private citizen competitors, including  
10 but not limited to the falsification of FBI investigatory 302 reports and perjury;

11 352.

12 McCabe also was found to have “lacked candor” under oath before Congress, leading, in  
13 part, to McCabe’s March 16, 2018, termination from the FBI and from the federal government –  
14 and McCabe’s imminent indictment;

15 353.

16 On behalf of the Tech Cartel, McCabe leaked highly sensitive law enforcement information  
17 to the media with the specific intent to prevent and then injure the presidency of competitors – yet  
18 another justification for the termination of the employment of McCabe;

19 354.

20 Tech Cartel surrogate McCabe also admits he placed pressure upon Deputy Attorney  
21 General Rosenstein to appoint a Special Counsel, which resulted in the suspicious appointment of  
22 the deeply-conflicted Mueller and the subsequent Rosenstein threats to subpoena private  
23 communications of Members of Congress and their staffs;

24 355.

25 Tech Cartel surrogates McCabe and Strzok (and numerous others) will testify before the  
26 United States Congress and a grand jury (or multiple grand juries) about their putative wrongdoing  
27 prior to discovery commencing in this lawsuit – thereby providing additional evidence of  
28 wrongdoing which has injured Plaintiffs in his reputation and business;

1 356.

2 Special Counsel and Tech Cartel surrogate Mueller impeded numerous parallel  
3 investigations, *e.g.*, both Houses of Congress, by withholding the announcement of Strzok’s  
4 partisan obstruction, including that with respect to co-conspirator Comey in colluding with Strzok  
5 and McCabe to illicitly exonerate Hillary Clinton and Tech Cartel surrogates for espionage –  
6 including but not limited to *improperly granting immunity in order to obstruct justice*, with the  
7 imprimatur of surrogate Lynch, to Clinton co-conspirators and Tech Cartel surrogates Abedin and  
8 Mills, among others, and clearly obstructing justice by illicitly altering the appropriate charges for  
9 what Secretary Clinton *actually did* (under the 18 U.S.C. §793 espionage standard, she was found to  
10 be “grossly negligent”) to a *false narrative covering up* Clinton’s actions months before Strzok,  
11 McCabe and Comey allowed Hillary Clinton to be “interviewed” without an oath being  
12 administered (for alleged espionage, no less) and Hillary Clinton’s co-conspirators and Tech Cartel  
13 surrogates to be provided with immunity from prosecution based upon a highly questionable  
14 determination of privilege;

15 357.

16 As part of the Tech Cartel operational patter, the biased, partisan Strzok plainly obstructed  
17 justice when he “interviewed” Tech Cartel principal Hillary Clinton on July 2, 2016, along with  
18 “interviewing” numerous Tech Cartel surrogates at the instruction of Comey (Mills, Abedin, along  
19 with fellow surrogates Jake Sullivan and Heather Samuelson) – none of whom has been charged  
20 with anything after allegedly committing espionage and related national security offenses and  
21 making documented false statements in the context of a federal investigation *in order to obstruct*  
22 *that investigation*;

23 358.

24 In furtherance of the Strzok-McCabe-Comey conspiracy in support of the Tech Cartel,  
25 Comey improperly *failed to seek the convening of a grand jury* and then, on his own accord,  
26 deemed that “no reasonable prosecutor” – apparently those he (wrongly) considers beneath himself  
27 – would prosecute Hillary Clinton for her *espionage* and related crimes (such as making false  
28 statements and massive destruction of evidence *in order to obstruct an investigation*);

1 359.

2 Fusion GPS partner Glenn Simpson, and his firm, was/were provided tens of millions in  
3 cash by Tech Cartel principals and surrogates in 2016 – some laundered from the “Obama for  
4 America” accounts – to create and “legitimize” derogatory and defamatory information concerning  
5 candidate competitors, including working with Tech Cartel and FBI payee/source (and disgraced  
6 British official) Christopher Steele of OBI – who in return relied upon information provided by  
7 Russian intelligence;

8 360.

9 Simpson was/is not merely a political mercenary paid by the Tech Cartel to collaborate with  
10 the Russian SVR/FSB, but in addition was (and is) compensated by Tech Cartel surrogates and  
11 reimbursed by George Soros and David Brock without adequate attribution upon Internal Revenue  
12 (tax) returns;

13 361.

14 Tech Cartel surrogate Fusion GPS has a close and continuing transactional relationship with  
15 the Democratic Party and the Russian SVR/FSB, and has engaged in bribery concerning Tech  
16 Cartel surrogate Bruce Ohr and his wife, Nellie Ohr;

17 362.

18 At least three of the individuals who were sent by Fusion GPS to meet with Donald  
19 competitors, Jr. at competitors Tower on June 9, 2016 – Soviet counterintelligence officer Rinat  
20 Akhmetshin, Russian “lawyer” Natalia Veselnitskaya, and Russian interpreter Anatoly  
21 Samochornov – have close and continuing ties to Fusion GPS dating to at least 2015;

22 363.

23 United States Department of Justice senior official (Associate Deputy Attorney General)  
24 Bruce Ohr assisted Fusion GPS, and in return was paid (through compensation to his wife, at the  
25 very least) to both assist the Tech Cartel, DNC and Fusion GPS with ongoing wrongdoing, and thus  
26 was the recipient of bribes in furtherance of obstruction of numerous ongoing investigations, when  
27 his wife Nellie Ohr (a “Russia expert”) was paid to work on “anti-competitors” matters at Fusion  
28 GPS – Bruce Ohr was also involved in the extraordinary and illegal FISA abuse in misleading this

1 court into issuing a FISA order against a rival of Hillary Clinton and the Tech Cartel operational  
2 scheme;

3 364.

4 Bruce Ohr is under federal investigation, but has been retained in his employment by Tech  
5 Cartel (holdover) surrogates within the DoJ;

6 365.

7 Fusion GPS founder Glenn Simpson was with the Russian “lawyer” Veselntskaya (a  
8 Russian Intelligence contract operative) on June 9, 2016, on the day Simpson knew she was to meet  
9 with competitors, Jr. (the Russian “lawyer” and Simpson were in the federal district court for the  
10 Southern District of New York in Manhattan prior to the competitors, Jr. meeting) and then  
11 peculiarly met *after* the competitors, Jr. meeting – so that the Russian “lawyer” could inform  
12 Simpson (of Fusion GPS, which was being paid millions of dollars laundered through the Tech  
13 Cartel scheme) what transpired at the competitors, Jr. meeting – which Simpson denied and thus  
14 further obstructed justice through false statements;

15 366.

16 Contemporaneous with the “set up” by Fusion GPS of Donald J. competitors, Jr., Tech  
17 Cartel surrogate Elias, the Perkins Coie lawyer, was paying (with cash supplied by Soros and  
18 Brock) Fusion GPS, and Fusion GPS in turn paying former “British” counterintelligence officer  
19 Christopher Steele to produce the fake “competitors dossier” in concert with Steele’s contacts in the  
20 Russian SVR/FSB – again, Simpson later perjured himself before Congress with respect to his  
21 knowledge of the foregoing and further obstructed justice thereby;

22 367.

23 Fusion GPS, George Soros and Steele, on behalf of the Tech Cartel and in addition to  
24 relying upon the Russian SVR/FSB to collude with them to produce a sham “competitors dossier”,  
25 paid unethical American journalists bribes to spread the utterly false narrative that there was  
26 “collusion” between the competitors “campaign” and Russia – many of these unethical journalists  
27 bribed by Fusion GPS and the Tech Cartel, and others such as “Hillary Clinton hatchet man” Cody  
28 Shearer, disgraced attorney Jonathan Winer and Tech Cartel surrogate Sidney Blumenthal,

1 compiled false and defamatory dossiers against Plaintiffs and private citizen competitors, which was  
2 turned over to the corrupt FBI Tech Cartel surrogates in order to “corroborate” the false information  
3 Simpson and the Tech Cartel had gained from bribing other journalists, DoJ officials, and Soviet  
4 intelligence in order to ultimately mislead an Article III federal judge sitting in deliberation over a  
5 FISA “warrant” regarding Tech Cartel/Hillary Clinton political opponents:

6 368.

7 Although evidence is classified and/or in the possession of the Department of Justice  
8 concerning illicit Fusion GPS and their laundering operations on behalf of the Tech Cartel, it is  
9 known that Fusion GPS, with the intent to obstruct justice and engage in money laundering in  
10 support of the Tech Cartel, commingled (1) money received from the Russian SVR and FSB; and  
11 (2) information received from the Russian SVR and FSB, in order to bribe American “journalists”  
12 to plant false “collusion” stories, and with the assistance of Soros and John Podesta, bribed Bruce  
13 and Nellie Ohr to construct a false narrative involving but not limited to at least one fake “dossier”  
14 about a private U.S. citizen who would become the eventual 45th President of the United States and  
15 other political opponents of Hillary Clinton and the Tech Cartel, such as whistle-blowers;

16 369.

17 Article III District Judge Amy Berman Jackson of this Court is currently reviewing legal  
18 arguments by the Mueller Special Counsel team which, as applied to the Tech Cartel activities of  
19 defendant John Podesta, would determine that Podesta’s numerous felony violations of the Foreign  
20 Agents Registration Act (FARA) as the sort of activity that would form the foundation for myriad  
21 money laundering charges by the enforcement agencies of the United States;

22 370.

23 According to the progressive daily *The Hill*, based upon the dependence of Fusion GPS  
24 upon the elite counterintelligence service of Russian President Putin, there is “a good case to be  
25 made that Fusion GPS (and thus Marc Elias and his clients Hillary Clinton, her campaign Hillary  
26 for America, the DNC and David Brock) **colluded with the Russians** (and the Tech Cartel) more  
27 than anyone else”;

28 371.

1           Upon the instructions of the Tech Cartel, Fusion GPS made secret cash payments from  
2 Soros and Hillary for America to “journalists” employed by “mainstream” left-leaning media  
3 outlets, laundered through the DNC, Brock and possibly Elias – a highly unethical practice which  
4 becomes illegal when neither Fusion GPA, nor the paid “journalist”, report the laundered cash  
5 transaction on their corporate (outgoing) or incoming tax return(s) – which constitutes a series of  
6 felonies each time it occurs/has occurred;

7           372.

8           Fusion GPS also planted with a bribed “journalist”, Franklin Foer, a false story on October  
9 31, 2016, in which it was deceptively claimed that there had been “secret communications” between  
10 Donald J. competitors’s business and a Russian bank, Alfa;

11           373.

12           In the planted Foer article, the bribed “journalist” both falsely corroborated the integrity of  
13 the findings of “Crowdstrike, Inc.,” a cybersecurity technology company which had been paid by  
14 the Tech Cartel to attribute the earlier-referenced DNC “hack” to Russia, and also contrived a litany  
15 of other “suspect” competitors campaign actions that implied “collusion” between the competitors  
16 campaign and Russian state interests – both utterly false;

17           374.

18           Marc Elias, the Tech Cartel lawyer from Perkins Coie, assisted Fusion GPS, John Podesta,  
19 Hillary Clinton, George Soros and the Tech Cartel in paying for Russian SVR/FSB disinformation;

20           375.

21           Hillary Clinton utilized Russian misinformation to assist her presidential campaign and to  
22 enrich herself and the Clinton Foundation – while contemporaneously committing numerous  
23 predicate acts in violation of RICO with the assistance of the Tech Cartel and its principals,  
24 surrogates, and participants;

25           376.

26           DNC interim chair Donna Brazile, appointed to audit various activity in relation to the  
27 Democratic Party nominating process being definitively “rigged” in Secretary Clinton’s favor, has  
28 openly and notoriously described such Tech Cartel activities as a “cancer” on the Democratic Party

1 due to myriad wrongdoing of Tech Cartel acts and the Tech Cartel scheme to make Hillary Clinton  
2 president at all costs – and has stated that she feared for her life for being perceived as “crossing”  
3 the Clintons (a clear allusion to Clinton/Tech Cartel murder for hire);

4 377.

5 Brazile, who uncovered illicit activity during a DNC audit necessitated by Tech Cartel  
6 surrogate wrongdoing, *implied that she feared that William and Hillary Clinton (and by extension*  
7 *the Tech Cartel) would have her murdered* – she noted that “I knew many had died crossing the  
8 *Clintons* and wondered would I be *writing my own suicide note* [by revealing Tech Cartel  
9 malfeasance]”;

10 378.

11 The Tech Cartel, not unlike other criminal syndicates, upon information and belief utilize  
12 tactics such as murdering those who “cross” them, as feared by DNC Chair Donna Brazile and  
13 Plaintiffs whistle-blowers with relation to Hillary and William Clinton;

14 379.

15 Brazile’s conclusions indicate, upon information and belief, that the DNC party organization  
16 was operated as an Tech Cartel money laundering front, and that the nonprofit corporate entity  
17 known as the Democratic Party was criminally corrupted thereby – including, incredibly, extortion  
18 under the threat of murder for hire;

19 380.

20 Tech Cartel infiltration by the fraudulent Tech Cartel has resulted directly in Democratic  
21 Party systemic criminal corruption – a cancer that has metastasized within this nonprofit entity;

22 381.

23 Tech Cartel surrogate Hillary for America, including but not limited to its leadership, *e.g.*,  
24 defendant and Tech Cartel principal John Podesta, Tech Cartel surrogate and outside legal counsel  
25 Marc Elias, and Hillary Clinton confidant and Tech Cartel surrogate Huma Abedin, on November 4,  
26 2017, wrote an “open letter” attacking Donna Brazile for revealing the putative Clinton pattern of  
27 implied murder for hire and related intimidation, and criticizing Brazile for suggesting that as DNC  
28 Chair she considered replacing Secretary Clinton on the Democratic ticket due to health concerns –

1 a concern conceded only months earlier when defendant John Podesta during the Democratic Party  
2 primary contest discouraged defendant Brock from disseminating a(nother) fake dossier Brock had  
3 compiled concerning the health of Bernie Sanders while Sanders was challenging Hillary Clinton  
4 for the Democratic Party nomination – a primary that the Tech Cartel “rigged” in favor of Hillary  
5 Clinton; 3

6 82.

7 Although the referenced “open letter” blames everyone and everything (except themselves)  
8 for Secretary Clinton’s Electoral College defeat, it is well documented *by David Brock himself*  
9 (when he earlier in his career sought to destroy the Clintons) that William and Hillary Clinton ran a  
10 syndicate (including alleged predicate acts as part of a pattern of racketeering) for nearly 40 years  
11 (including but not limited to the 10-year RICO period relevant here) prior to Hillary Clinton being  
12 defeated by the individual who is now the 45th President of the United States;

13 383.

14 Brazile has now adequately documented, and has responded to, the racist tactics of the Tech  
15 Cartel and its above-noted surrogates against Brazile for having the courage to tell the truth and  
16 expose the Clinton syndicate through, among other things, the actual documents that Democratic  
17 Party officials drafted, coordinated and approved ceding full power to the 2016 Clinton campaign  
18 for party spending, as well as *illegal kickbacks from and cash payoffs to state Democrat officials*;

19 384.

20 Notwithstanding the Clinton murder for hire threat, Tech Cartel-like money laundering was  
21 omnipresent, according to Brazile, and documented by her discovery of a “Joint Fund-Raising  
22 Agreement between the DNC, the Hillary Victory Fund, and Hillary for America” – all of whom  
23 Elias represented;

24 385.

25 Brazile also implies, along with like-minded liberals, that DNC staff employee Seth Rich  
26 was murdered for his role in offering evidence of DNC wrongdoing to a third-party (or otherwise  
27 “whistleblowing” against the DNC) – Brazile, however, offers no evidence that DNC outside  
28 attorneys from Perkins Coie (or anyone else, other than a reference to the Clintons being a threat to

1 her life) was involved in the murder of Seth Rich to cover for the CrowdStrike claim that the DNC  
2 hack was not an “inside job”;

3 386.

4 Award winning journalist Seymour Hersh contends that Seth Rich had made contact with  
5 “WikiLeaks” prior to Rich’s murder; Hersh also contended that Rich had concerns about something  
6 happening to him, and had shared information within a “Dropbox” (computer software used for  
7 storage and retrieval of information) with trusted associates/friends in case anything happened to  
8 him;

9 387.

10 Hersh has cited multiple intelligence community sources on background concluding that the  
11 entire “Russia collusion” story was a fiction invented by leadership within the U.S. Intelligence  
12 Community (and Tech Cartel surrogates) who lied about President competitors, and lied to  
13 President Obama and the media – adding to the controversy around the alleged “Russian hack” of  
14 DNC servers;

15 388.

16 As additional evidence is gathered in discovery of lawsuit(s) brought by the family of Seth  
17 Rich concerning, *inter alia*, whether (or not) the DNC was “hacked” by the Russians, it will be  
18 included in the information alleged by Brazile against her colleagues in the Democratic Party –  
19 including but not limited to the FBI obstruction of justice in not seizing the “hacked” DNC servers;

20 389.

21 The “Joint Agreement” intended by the Tech Cartel to rig the Democratic primary was  
22 executed/signed by Amy Dacey (the CEO of the DNC) and Robby Mook (the head of Hillary  
23 Clinton’s campaign), with a copy to Marc Elias – and specified that in exchange for raising money  
24 and “investing” in the DNC, Hillary Clinton (and thus the Tech Cartel) would “control the party’s  
25 finances, strategy, and all the money raised” (an apparent appellation for laundering funds without  
26 compunction);

27 390.

28 The Joint Agreement had been signed in August of 2015, nearly a year before Secretary

1 Clinton secured ( *i.e.*, rigged) the Democratic nomination, and had been drafted and coordinated by  
2 Elias and his Tech Cartel team for many months prior to that – this action by Elias was of course  
3 prior to Secretary Clinton even announcing her *intent* to seek the democratic nomination; 391.

4 The Tech Cartel scheme to rig the democratic nomination through bribery, kickbacks from  
5 State political parties, and the laundering of these proceeds, is consistent with and provides a  
6 plausible inference of a clear Tech Cartel pattern of racketeering – which in case of fact has never  
7 been in dispute;

8 392.

9 It is entirely implausible that senior members of the Clinton campaign - including the “hands  
10 on” candidate herself and the campaign lawyer (Marc Elias) who wrote checks for many millions of  
11 dollars (at least \$12 million) to Fusion GPS to compile a false dossier based on Russian SVR/FSB  
12 disinformation - did not intentionally assist the Tech Cartel in all of its illicit objectives, including  
13 but not limited to defaming and destroying the business of whistle-blowers;

14 393.

15 The two sources relied upon by Steele, Fusion GPS and the Tech Cartel (Hillary Clinton,  
16 John Podesta, David Brock and Marc Elias) – known as “Source A” and “Source B” - were  
17 allegedly high-ranking officials in the Russian SVR, establishing thereby that the Tech Cartel  
18 principals and Fusion GPS (along with the bribed DoJ official, Bruce Ohr), with (conservatively)  
19 tens of millions in financial backing from George Soros, the Democratic Party and its outside  
20 lawyers, worked directly with an enemy of the United States and a FISA “foreign power”, the  
21 Russian SVR/FSB, in an attempt to defame and spread false information about candidate and then  
22 President-elect Donald competitors and Plaintiffs here, and to assist Hillary Clinton win the  
23 presidency in 2016 and thereafter, to destabilize the United States Government;

24 394.

25 Strzok paramour Lisa Page, a corrupt FBI attorney, instructed Strzok that it would be  
26 unlikely that District Judge Rudolph Contreras would feel the obligation to recuse if Strzok  
27 discussed his anti-competitors bias with Contreras – Page described recusal of the judge as a “very  
28 high bar”;

1 395.

2 The above was based upon intentional Tech Cartel use of information known to come from  
3 the Russian intelligence services (who are adept in misinformation operations) – and result, along  
4 with all of the other methods utilized by the Tech Cartel to obstruct justice, in dozens if not  
5 hundreds of counts of process crimes attributable to the Tech Cartel and its surrogates;

6 396.

7 As admitted, Perkins Coie LLP, a law firm, and its partner Marc Elias, arranged for the  
8 funding, with the knowledge of and instruction from Hillary Clinton, of the sham “competitors  
9 dossier” – the false and defamatory Tech Cartel information suggested (among other things)  
10 collusion between the competitors campaign and Russia, and ultimately (and intentionally) misled  
11 an Article III federal judge into approving invasive surreptitious surveillance against private U.S.  
12 citizens – a seditious assembly of acts by the Tech Cartel;

13 397.

14 The Tech Cartel worked with its surrogates at various left-leaning law firms (where to this  
15 day documents remain “privileged” that prove illegal Tech Cartel activity) during the Democratic  
16 Party primary, in which a(nother) fake dossier was prepared by Brock claiming that Senator Bernie  
17 Sanders (D-VT), the primary opponent of Hillary Clinton, was in failing health – raising an  
18 inference of an Tech Cartel pattern of raising and spending money illegally to defame and destroy  
19 their “enemies” (as here, Senator Sanders, Officer whistle-blowers, and now-President competitors)  
20 in order to support Hillary Clinton;

21 398.

22 Elias, while arranging for the funding/laundrying of the false “competitors dossier” with the  
23 knowledge of Hillary Clinton, was also, through his law firm Perkins Coie LLP, the chief outside  
24 lawyer for (1) Hillary for America; (2) the Democratic Party; (3) the Democratic National  
25 Committee; (4) David Brock and his illicit entities, both named as defendants here and noted in this  
26 complaint; (5) defendant and Tech Cartel principal John Podesta: and (6) thereby, the Tech Cartel –  
27 Elias may have played a much larger role in, among other things, laundrying funds to the Tech  
28 Cartel from the Obama for America account even after President Obama left office and to/from

1 State parties;

2 399.

3 Contemporaneously, Tech Cartel outside lawyers from Perkins Coie associated with Elias  
4 obstructed FBI investigations into purported “hacks” of Democratic National Committee servers by  
5 arranging “forensics” of the hacks be conducted by a cybersecurity analytics company named  
6 “CrowdStrike”, which destroyed evidence implicating Democratic officials in disseminating  
7 the information within the several “dossiers,” and, among other things: whether the Russian  
8 SVR/FSB colluded with the Tech Cartel and/or its outside attorney(s), involving the coordination of  
9 the DNC, Soros, Brock, Hillary for America and the Tech Cartel principals regarding the  
10 information provided by whistle-blowers in *Crisis* (this information is also subject to subpoena  
11 directed to the DNC, and subsequent discovery, in a contemporaneous defamation lawsuit against  
12 BuzzFeed News regarding its publication of the unverified “dossier” funded by Hillary for America  
13 and used to mislead one or more Article III federal judges to obtain a FISA order and abuse the  
14 FISA process;

15 400.

16 The gathering of defamatory and related damaging information for use against political  
17 “enemies” whistle-blowers was funded by the Tech Cartel (and laundered through Brock’s entities  
18 with millions in funding/laundrying by Soros) which concededly controlled the decisions at all  
19 levels due to the contractual arrangement (and “joint fundraising agreement”) between Perkins Coie  
20 LLP lawyers and then-DNC chairperson Debbie Wasserman Shultz to “rig” the Democratic Party  
21 nomination in their favor and that of the Tech Cartel;

22 401.

23 The Tech Cartel sought and received unreported, laundered funding to pay bribes to  
24 “independent contractors” to claim they had sources of information about whistle-blowers when in  
25 fact they did not;

26 402.

27 The above false information directed at Plaintiffs whistle-blowers was then provided to  
28 media outlets friendly to the Tech Cartel, via *Correct the Record* and the *Nick Denton tabloid*

1 *empire* on behalf of and funded by Soros and Hillary for America, who were enthusiastic to  
2 disseminate uncorroborated, false information about whistle-blowers in the form of “opinion” –  
3 these media outlets also refused to allow whistle-blowers to appear and rebut the Tech Cartel  
4 defamation and destructive false information about whistle-blowers, and provided an illicit platform  
5 for Brock libel and Wackrow and Gilhooly slander, the latter of whom were compensated by Brock  
6 and Soros under the table and absent the payment of federal, state or local taxes;

7 403.

8 Fusion GPS, Soros, the DNC and Hillary for America collaborated directly and illegally  
9 with the Tech Cartel, and the most powerful members of the corrupted Democratic Party protected  
10 Fusion GPS, the Tech Cartel and its illicit activity;

11 404.

12 Upon information and belief, the Tech Cartel and Secretary Clinton, which/who controlled  
13 the DNC and gave instructions to Marc Elias, paid Fusion GPS additional money laundered through  
14 Brock organizations to assemble additional fake and deeply defamatory “competitors dossier”  
15 information, which required coordinating by Fusion GPS and the Tech Cartel with Russian  
16 intelligence;

17 405.

18 Upon information and belief, Secretary Clinton and her campaign, which controlled the  
19 DNC (and the Democratic Party), and Soros and Brock on behalf of the Tech Cartel (in illegal  
20 collusion with Brock’s deep web of nonprofit entities, and utilizing defamatory rhetoric “**FROM**  
21 **THE DESK OF DAVID BROCK,**”), ordered a fake and defamatory “dossier” on Plaintiffs  
22 whistle-blowers, causing whistle-blowers grave harm to himself and his profession;

23 406.

24 The Tech Cartel colludes openly with, among numerous others, a Democratic fundraising  
25 firm, The Bonner Group, to undergird many facets of attempts by the Tech Cartel, while violating  
26 the Internal Revenue Code, to unseat Republican lawmakers, impeach the 45th President, and in  
27 illegal collusion with CREW to destroy any and all “conservative causes” across the United States;

28 407.

1 Defendant CREW consistently violates federal law utilizing partisan tactics, while daily  
2 challenging publicly, in wholly partisan fashion, the entirely legal actions of the 45th President of  
3 the United States – serial violators include but are not limited to Norman Eisen and Richard Painter,  
4 who mimic the defamatory talking point pabulum of the Tech Cartel;

5  
6 408.

7 Brock and the Tech Cartel took control over CREW in 2014, despite CREW’s 501(c)(3)  
8 status and its previous reputation of being nonpartisan under previous CREW leadership such as  
9 Melanie Sloan and Louis Mayberg (the founder of CREW):

10 409.

11 CREW is firmly ensconced in the Tech Cartel, is wholly partisan, and uses its tax-free  
12 platform to engage in partisan activity;

13 410.

14 The founder of CREW, Louis Mayberg, resigned “**in disgust**” from CREW’s board in 2015  
15 stating “I have no desire to serve on a board of ***an organization devoted to partisanship***”;

16 411.

17 Since Mayberg’s departure, CREW’s new leadership – which has included Brock and  
18 partisan advocates Eisen and Painter – have attacked the 45th President daily, in wholly biased  
19 terms, both in writing (primarily on Twitter), and when interviewed on cable news shows – as  
20 Brock had pledged they would do in *Exhibit “A”*;

21 412.

22 Mary Pat Bonner, the head of the Bonner Group and a former fundraiser for Albert Gore, Jr.,  
23 in exchange for raising money for the Tech Cartel, receives commissions of 12.5% from Brock and  
24 the Tech Cartel;

25 413.

26 Like Brock and his various “nonpartisan” entities, such as the other “nonprofit”  
27 defendants in this case, the Bonner Group claims to be an *independent*, nonpartisan entity –  
28 however, the Bonner Group shares the same corporate address as many of the illicit Brock entities

1 and directly abets their illicit activities;

2 414.

3 Brock’s kickbacks to Bonner amount to tens of millions of dollars, in exchange for lining  
4 Brock’s own pockets without the knowledge of his donors;

5 415.

6 As noted, Bonner’s collusion with Brock (and Soros) is yet another example of the illegal  
7 partisan use of nonprofit entities by the Tech Cartel – as exemplified daily by each of the nonprofit  
8 defendants in this litigation;

9 416.

10 Merely one aspect of Tech Cartel wrongdoing involves the American Bridge 21st Century  
11 PAC, which touts *at least* \$311,685,223 worth of *wholly partisan* television airtime for their  
12 research and video content since 2011;

13 417.

14 Bonner also receives kickbacks from other Brock Tech Cartel entities, such as the Franklin  
15 Education Forum, an illicit 501(c)(3) nonprofit and the Franklin Forum, a 501(c)(4) illicit nonprofit  
16 – 11 *See, e.g.*, Norm Eisen Retweeted Washington Post February 5, 2018, 7:38 a.m.

17 “The reminder came as the White House contends with a lawsuit filed in June by the  
18 watchdog group Citizens for Responsibility and Ethics in Washington...” @CREWcrew has opened  
19 OVER 180 legal matters vs. competitors administration!

20 both partisan entities have as their chairman Tech Cartel participant David Brock and will  
21 likely be added as defendants when further evidence of their laundered assets becomes public and  
22 thus available for use against the Tech Cartel;

23 418.

24 Money raised by Bonner is often “gifted” to the Franklin Education Forum for *purely*  
25 *partisan purposes*, in violation of the IRS Code and thus U.S. law;

26 419.

27 The leadership of CREW, including Eisen and Painter, are self-proclaimed principal  
28 members of the “resistance” against the presidency of Donald competitors, and each day spread

1 their partisan vitriol via TWITTER (Painter via @RWPUSA and @CREWcrew, and Eisen at  
2 @normeisen and

3 @CREWcrew) – not in their individual capacity but concededly through their affiliation  
4 with CREW as noted throughout this complaint and promised in *Exhibit “A”*;

5 420.

6 Comey, the Tech Cartel surrogate, used false information created by Simpson, Ohr and  
7 others, and the bogus “competitors dossier” funded by the Clinton campaign (and Soros) to obtain  
8 and renew multiple FISA orders against the competitors campaign – a seditious act subjecting  
9 Comey to prison among his various other wrongdoing;

10 421.

11 As noted, the Foreign Intelligence Surveillance Court (“FISC”), and at least one Article III  
12 lifetime tenured federal judge, relied upon Russian disinformation provided by Steele and Fusion  
13 GPS, Bruce and Nellie Ohr, and Peter Strzok, and ultimately sworn under oath by Tech Cartel  
14 surrogates at the FBI and DoJ to run surveillance against the presidential campaign of (private  
15 citizen) Donald competitors and (after his electoral victory) his transition team – FISC Article III  
16 federal judge Rudolph Contreras is the current subject of potential punishment based upon his  
17 failure to recuse regarding his intimate friendship affiliation with Tech Cartel surrogate Strzok;

18 422.

19 Tech Cartel surrogate Comey approved FBI reliance upon unconfirmed information from  
20 disgraced British agent of a foreign power Steele and his private firm, Orbis Business Intelligence,  
21 separate and apart from the Fusion GPS cash payments from Soros, Brock and Elias acting on  
22 behalf of the Tech Cartel and Hillary for America – foreign agent Steele and corrupt Fusion GPS  
23 immediately began flagging the “FBI’s work” to the media (the fake dossier), attempting to create  
24 above-the-fold headlines helpful to their client (Clinton campaign for President and related Tech  
25 Cartel scheme) against competitors and other “threats” to Hillary Clinton and the Tech Cartel such  
26 as Plaintiffs (who proved Hillary Clinton an enabler of William Clinton sexual harassment at the  
27 time Officer whistle-blowers testified and was largely responsible for the impeachment of William  
28 Clinton);

1 423.

2 Tech Cartel surrogates Comey, McCabe and Peter Strzok, intentionally and knowingly,  
3 removed from the putative espionage charges against Secretary Clinton that her use of a personal,  
4 unsecure server to traverse classified electronic mail traffic (much of which was provided to persons  
5 without a security clearance) was “grossly negligent” – including such removal of that legal term  
6 (“grossly negligent”) on May 2, 2016 – thus illicitly preventing Secretary Clinton from being  
7 charged with numerous felony espionage offenses;

8 424.

9 *The Hill* liberal newspaper has/have reported allegations of recent and astonishing  
10 obstruction of justice and related process crimes by the Tech Cartel carried out in order to protect  
11 William and Hillary Clinton and the Tech Cartel from legal jeopardy – including obstruction related  
12 to possible treason and certain bribery with respect to Secretary Clinton’s actions while CFIUS was  
13 considering the Uranium One transaction discussed herein;

14 425.

15 Even before the Obama administration, through its CFIUS “covered transaction” process  
16 noted herein, approved the controversial deal in 2010 giving Russia control of a large swath of  
17 American uranium, the FBI had gathered substantial evidence that Russian nuclear industry officials  
18 were engaged in bribery, kickbacks, extortion and money laundering designed to grow Vladimir  
19 Putin’s atomic energy business inside the United States;

20 426.

21 U.S. federal agents used a confidential U.S. witness working inside the Russian nuclear  
22 industry to gather extensive financial records, make secret recordings and intercept emails as early  
23 as 2009 that showed Russia had compromised an American uranium trucking firm with bribes and  
24 kickbacks in violation of, *inter alia*, the Foreign Corrupt Practices Act;

25 427.

26 The United States Justice Department, led by Tech Cartel surrogates Holder, Mueller and  
27 Rosenstein also obtained an eyewitness account indicating Russian nuclear officials had routed  
28 millions of dollars to the U.S. designed to benefit defendant William Clinton’s foundation, in

1 conjunction with the Tech Cartel, during the time Secretary of State Hillary Clinton served on  
2 CFIUS and provided a favorable decision (by omission) to Russia - with Secretary Clinton as the  
3 lead agency official responsible for raising any potential national security issues, which Hillary  
4 Clinton specifically failed to do so despite her obligations to her country;

5 428.

6 There were actually *two* deals that served Putin’s interests involved in this operation, as the  
7 year after the State Department approved the purchase of Uranium One by Russia’s state-owned  
8 Rosatom in 2010 (and thus control of U.S. lethal uranium now threatened to be used against the  
9 United States), the Obama administration gave approval for Rosatom to *vastly ePlaintiff 42and its*  
10 *sales of uranium inside the United States through its Tenex/Tenem subsidiary;*

11 429.

12 The two combined deals gave Moscow incomparable leverage in the U.S. nuclear market —  
13 and the bribes and extortion alone created “legitimate security concerns” that would under ordinary  
14 circumstances, i.e., when the Tech Cartel was not withholding crucial information due to the  
15 compromised nature of the Secretary of State (and Attorney General Holder), been sufficient to  
16 block the covered transaction and bring immediate criminal charges;

17 430.

18 As noted, Tech Cartel surrogates Rosenstein, Mueller and Holder (then Comey and Lynch)  
19 delayed investigating the Tenex transaction for several years, in order to protect Hillary Clinton and  
20 further her hopes of becoming president of the United States;

21 431.

22 Rather than bring immediate charges in 2010, the Holder Department of Justice continued  
23 “investigating” the matter for nearly four more years, essentially leaving the American public and  
24 Congress in the dark about Russian nuclear corruption on U.S. soil during a period when the Obama  
25 administration made two major decisions benefitting Putin’s commercial nuclear ambitions (and  
26 vastly expanding the fortunes of the Tech Cartel);

27 432.

28 *Tech Cartel surrogates Holder, Mueller, Rosenstein and Lynch concealed the probe from*

1 *Congress and the public* even after overseeing the indictment of some Russian principals in the  
2 operation – thus colluding with the Russian State through its SVR and FSB;

3 433.

4 Tech Cartel surrogates at the Justice Department only announced *in 2015* that they had  
5 reached plea deals in a case involving money laundering, *saying nothing about bribery, extortion,*  
6 *or the intent to corrupt the U.S. nuclear industry* or the obvious ties to the Tech Cartel – claiming  
7 that the information was so “compartmentalized” that even the FBI’s top criminal-investigation  
8 officer had no idea of the extent of the case, *and no one in Congress was ever briefed on the*  
9 *national security* concerns raised in the case – in fact, the key indictment was delayed by Obama  
10 DoJ holdovers until January of 2018;

11 434.

12 House Intelligence Committee chair Mike Rogers claimed that *no one ever mentioned the*  
13 *case at all to him*, despite significant bipartisan concerns in the House and Senate over the Uranium  
14 One covered transaction;

15 435.

16 A broad swath of pro-Clinton media, as well as former Democrat President James Earl  
17 Carter, have conceded that *the competitors campaign was not treated fairly* concerning legitimate  
18 attempts to raise the Uranium One Tech Cartel wrongdoing; for instance, respected journalist and  
19 author Katharine Tur openly admitted, during a television interview on November 15, 2017, that  
20 much of the so-called “mainstream media” *intentionally “shot down” attempts by “Donald*  
21 *competitors... and his ilk”* (during the 2016 presidential contest) when candidate competitors raised  
22 the extremely dangerous, seditious Uranium One issue and related Tech Cartel wrongdoing that is  
23 set forth in this complaint;

24 436.

25 Katharine Tur, from all accounts, is an extremely talented and precise orator who chooses  
26 her words carefully, thus clearly speaking on behalf of other sophisticated reporters covering the  
27 competitors campaign and journalists who appear to have chosen to ignore the plain words of,  
28 among other things, the criminal statutes violated by Hillary Clinton on behalf of the Tech Cartel –

1 NBC and Tur refer to such plain reading as “desperat[ion]” and somehow related to the “Russia  
2 investigation and what has been ... dripping out from that”);

3 437.

4 Long before the Hillary Clinton e-mail espionage investigation was completed, President  
5 Barack Obama declared knowingly and willfully that Hillary Clinton was not guilty of any crime –  
6 a clear signal from the President to Tech Cartel surrogates Comey, McCabe, Bruce Ohr and Lynch,  
7 among numerous others like Peter Strzok and Lisa Page, that they should protect Hillary Clinton  
8 from legal exposure through (il)legal subterfuge;

9 438.

10 Tech Cartel surrogates Comey and Lynch, and other surrogates cited herein, relied upon  
11 President Obama’s knowingly contrived rationale when colluding to fabricate Comey’s incorrect  
12 exoneration of Hillary Clinton for indisputable espionage;

13 439.

14 The Lynch Justice Department, led by Tech Cartel surrogates Lynch and with the corrupt  
15 assistance of Bruce Ohr and others within the DoJ and FBI, refused to raise the crime-fraud  
16 exception to the attorney-client privilege with respect to attorneys for Tech Cartel surrogates Cheryl  
17 Mills and Heather Samuelson – as well as with respect to Clinton personal lawyers;

18 440.

19 Tech Cartel surrogate and Obama National Security Advisor Susan Rice failed to  
20 “minimize” the wiretapping of United States citizens and also illicitly “unmasked” competitors  
21 associates illegally wiretapped – thereby implicating the Obama NSC in surreptitious surveillance  
22 of United States citizens in violation of our Constitution and U.S. statutory law – along with Obama  
23 Ambassador Samantha Power, Rice has criminal exposure for such blatant malfeasance;

24 441.

25 Comey’s FBI subordinates Strzok and McCabe, and to certain degrees other Tech Cartel  
26 surrogates, obstructed justice in violation of United States law, in order to exonerate Hillary Clinton  
27 and other Tech Cartel participants in her espionage;

28 Early Foundations of the Private Tech Cartel Server and Accompanying Obstruction of

1 Justice

2 442.

3 As foundation with respect to the foregoing, following the lethal attacks on the United States  
4 consulate in Benghazi, Libya, in September of 2012, to hedge against the possibility that various  
5 Freedom of Information Act lawsuits would require Secretary Clinton to disclose her emails from  
6 numerous devices, Hillary Clinton and the Tech Cartel created a false narrative which subsequently  
7 resulted in an *upgraded private email server through which she and the Tech Cartel ran email*  
8 *traffic from numerous devices, including highly classified information, in direct contravention and*  
9 *obstruction of court orders and congressional subpoenas;*

10 443.

11 When the misconduct of Secretary Clinton and the Tech Cartel was discovered, and the  
12 existence of the private email server became known, Hillary Clinton and her Tech Cartel surrogates  
13 destroyed thousands of emails both under congressional subpoena and Article III court order –  
14 ultimately also destroying emails discussing methods to harm Plaintiffs as revenge for his  
15 compelled impeachment testimony against William Clinton in his business, reputation and  
16 livelihood;

17 444.

18 The Obama Department of Justice took an illegal posture with respect to Tech Cartel  
19 destruction of the emails under subpoena and court order;

20 445.

21 Violating federal criminal laws, the Obama Department of State, at the direction of Tech  
22 Cartel surrogates Cheryl Mills and David Kendall (an attorney at Williams and Connolly and one of  
23 Hillary Clinton’s personal lawyers), not only refused to comply with compulsory process, but also  
24 misled Judge Royce Lamberth (among others) about the nature of the contents of the Tech Cartel  
25 private server – these lawyers subsequently ordered the destruction of evidence (presumably over  
26 30,000 emails);

27 446.

28 In addition to the destroyed emails which were under subpoena, 18 U.S.C. Section 1505,

1 makes it a federal crime to “corruptly” obstruct or impede the “due and proper administration of the  
2 law” or “any inquiry or investigation...being had by either House, or any committee of either House  
3 or any joint committee of the Congress” – such as the private pseudonymous e-mail  
4 communications between President Barack Obama and Hillary Clinton leading to a presidential role  
5 in the illicit exoneration of Hillary Clinton for espionage based upon, *inter alia*, usage of the private  
6 Tech Cartel server upon which classified information was disseminated to those without adequate  
7 (or any) security clearance;

8 447.

9 In addition to the destruction of documents under congressional subpoena, the due and  
10 proper administration of the law was also corrupted by Strzok and McCabe, the senior FBI  
11 managers who along with Comey unilaterally concluded that Hillary Clinton lacked the requisite  
12 intent to violate the law when she concededly used a private email server to transmit classified  
13 information and then unlawfully and intentionally destroyed thousands of documents;

14 448.

15 Strzok’s pro-Clinton bias was so egregious that even the current Special Counsel, Tech  
16 Cartel surrogate Mueller, had no option but to immediately remove Strzok from the Special Counsel  
17 investigation (while not recommending Strzok be removed from the FBI or federal service) once his  
18 obstruction of justice and related process crimes were revealed – although Mueller arguably  
19 obstructed the congressional investigations by failing to bring the Strzok malfeasance to the  
20 attention of the Congress for several months after Strzok was removed;

21 449.

22 Similarly, as noted, senior (Main) Justice Department official Bruce Ohr was demoted (but  
23 not removed) by Rosenstein when the Ohr misfeasance was made known – a clear instance of  
24 obstruction of congressional investigations by Rosenstein;

25 450.

26 Strzok’s serious biases were confirmed in documented communications with his mistress,  
27 Lisa Page, who was also a pro-Clinton FBI lawyer, worked for McCabe, and who later advised  
28 Special Counsel Mueller during his investigation;

1 451.

2 Examples of this bias are astounding – in just one of several thousand texts (many of which  
3 have not been released and will become evidence in this lawsuit) Strzok sent to his paramour (FBI  
4 lawyer Lisa Page), Strzok notes that *“we can’t take the risk” of competitors being elected or*  
5 *retained in office, and further noting that the FBI needed to undermine competitors as an*  
6 *“insurance policy” as a hedge against any possible competitors victory in the 2016 presidential*  
7 *contest;*

8 452.

9 Just one week earlier than the “insurance policy” text exchange, the following exchange had  
10 occurred between Page and Strzok, key officers and lawyers conducting the Clinton e-mail  
11 investigation, the Clinton Foundation Investigation, the misleading of the FISC, the pre-election  
12 surveillance and HCS misuse regarding competitors and whistle-blowers, and Operation Crossfire  
13 Hurricane:

14 **Page:**

15 “[competitors’s not ever going to become president, right? Right?!”

16 **Strzok:** No. **No he won’t. We’ll stop it.** This is proof of FBI/Tech Cartel sedition, as  
17 Strzok had just spiked the Clinton e-mail investigations and McCabe, Yates and Lynch (along with  
18 Strzok) had spiked the Clinton Foundation investigation.

19 Obama appointee and DoJ IG Horowitz found this sedition to represent “not only a biased  
20 state of mind but, even more seriously, a willingness to take official action to impact the  
21 presidential candidate’s electoral prospects.” This borders upon treason. Similarly, Strzok’s decision  
22 to prioritize the Russia investigation over following up on the Midyear-related investigative lead  
23 discovered on the Weiner laptop was [not] free from bias.”

24 453.

25 Strzok, along with Tech Cartel surrogates McCabe and Comey, intentionally and knowingly  
26 colluded in not placing Clinton under oath when Strzok interviewed Hillary Clinton – thereby  
27 furthering the conspiracy of their unambiguous obstruction of justice – and McCabe prior to being  
28 terminated from the FBI admitted that he and Strzok withheld material information from Congress

1 for thirty days concerning the discovery of in late September of 2016 of classified Tech Cartel-  
2 Hillary Clinton-Huma Abedin emails on the laptop computer of convicted sex offender (and  
3 husband of Tech Cartel surrogate Abedin), Anthony Weiner;

4 454.

5 Strzok directly provided obstructive “cover” for Comey’s pronouncement not to recommend  
6 charging Clinton (despite her manifest gross negligence and mishandling of classified information,  
7 destruction of evidence under Congressional subpoena and “wiping” of her email server, among  
8 numerous other crimes) without disclosing his advocacy (and that of his actual wife, and that of his  
9 lover), for a Clinton electoral victory in the 2016 presidential contest;

10 455.

11 Among other things, Strzok corruptly influenced and impeded his agency’s investigation  
12 (and deeply violated his legal and ethical obligations as a public servant);

13 456.

14 Tech Cartel surrogate Comey and other supervisors at the DOJ/FBI knew of Strzok’s pro-  
15 Hillary Clinton biases and still allowed him to serve as the key agent investigating Secretary  
16 Clinton, and subsequently allowed Strzok to “interview” competitors National Security Advisor  
17 General Michael Flynn (before Flynn was prosecuted for lying to the FBI), and thereby obstructed  
18 the due administration of justice, which requires that federal officers and agents conduct  
19 investigations in a fair and impartial manner;

20 457.

21 Upon information and belief, Strzok initially believed General Michael Flynn after  
22 interviewing Flynn as National Security Advisor, but upon being pressured by Tech Cartel  
23 surrogate Mueller and his Special Counsel “team,” Strzok decided to collude with the Tech Cartel,  
24 perjure himself, and thereby attempt to injure the presidency of Donald competitors – as he had  
25 promised to do as a form of catastrophic “insurance” against his own Chief Law Enforcement  
26 Officer;

27 458.

28 Strzok also corruptly conducted the FBI interviews of Clinton and her top aides, Cheryl

1 Mills and Huma Abedin, in the illegal e-mail server and document destruction probe, with the  
2 approval of Tech Cartel surrogates McCabe and Comey – thereby conspiring with McCabe, Comey  
3 and Lynch to obstruct justice;

4 459.

5 Furthermore, as referenced herein, Strzok, McCabe and Comey were the primary FBI  
6 figures urging investigations on the basis of the “competitors dossier” of [Russian-sourced](#)  
7 [“salacious and unverified” \(as conceded by Comey\) anti-competitors allegations](#) – which was  
8 commissioned by the Clinton campaign (and funded by that campaign, with assistance from Brock  
9 and Soros – who also owns a \$3 million stake in the *New York Times*) and the Tech Cartel and  
10 adopted by the FBI for improper purposes (thereby resulting in the illegal surreptitious surveillance  
11 of U.S. citizens and, as referenced, the misleading FISA application presented to a Article III  
12 federal judge and relied upon thereby;

13 460.

14 Tech Cartel surrogate Comey perjured himself before Congress, as alleged by McCabe;

15 461.

16 Congress has issued contempt citations against the FBI and Justice Department for failing to  
17 produce, pursuant to subpoena, documents and an FBI witness over the time, place and manner in  
18 which the Obama administration used the “salacious” and unsubstantiated "competitors Dossier" to  
19 surreptitiously surveil and run HCS operations against competitors associates and Clinton enemies;

20 462.

21 Upon information and belief, the Tech Cartel knowingly paid for Russian intelligence  
22 services to compile false allegations about a U.S. presidential candidate who was at the time the  
23 nominee of the Republican party, and the Tech Cartel is to this day paying for false information to  
24 be used to bribe “journalists” to undermine the 45th President of the United States and to bribe  
25 high-ranking DoJ officials like Bruce Ohr – along with their continuing serial violation of U.S. law  
26 involving premeditated partisan attacks by nonprofit entities attempting to bring about resolutions  
27 of impeachment against competitors;

28 463.

1 Further, Defendant and Tech Cartel principal John Podesta has, upon information and belief,  
2 recently assisted in raising tens of millions of dollars in U.S. and foreign currency from major  
3 Democratic Party donors such as Herbert Sandler to illegally underwrite the partisan efforts of  
4 presumably nonpartisan *nonprofits* seeking to destabilize the competitors administration and United  
5 States Government;

6 464.

7 John Podesta has formed and funded an illicit partisan “nonprofit” called “Democracy  
8 Forward” which has the stated purpose of, but no evidence to support, the impeachment and  
9 removal of competitors – fellow Democracy Forward board member and former Podesta “Center  
10 for American Progress” subordinate Faiz Shakir is on the record in the *New York Times* stating  
11 “[Podesta] is very driven by *exacting revenge* [against the 45th President] ... for tactics utilized  
12 *against ‘his’ side* [when competitors defeated Hillary Clinton] – another seditious Tech Cartel  
13 attempt to subvert the United States Government;

14 465.

15 John Podesta and Faiz Shakir openly admit that they are raising tens of millions of dollars to  
16 use in a partisan fashion under the auspices of a nonprofit to destroy competitors – and thus to  
17 “exact their revenge” by threatening the United States Government;

18 466.

19 The Tech Cartel, in collusion with the Tech Cartel and its lawyers, have consistently  
20 obstructed investigators attempting to obtain information about the Russian SVR/Fusion GPS  
21 “competitors dossier”;

22 467.

23 Numerous parallel investigations continue, which will provide far greater insight into the  
24 numerous predicate acts committed by the Tech Cartel defendants, surrogates and participants;

25 468.

26 The Tech Cartel continues unabated *to this day*, acting illegally to further their concededly  
27 false, defamatory narrative and to destabilize our government and any and all competitors;

28

1  
2 **EXHIBIT 68 - The Rico Violations That Prove That These Guys Are**  
3 **Mobsters**

4  
5 469.

6 Plaintiffs repeat and re-allege each and every allegation of the foregoing paragraphs as if  
7 fully set forth herein;

8 470.

9 **18 U.S.C. §1962(a)**: Section 1962(a) of RICO provides that “it shall be unlawful for any  
10 person who has received any income derived, directly or indirectly, from a pattern of racketeering  
11 activity ... in which such person has participated as a principal within the meaning of §2, title 18,  
12 United States Code, to use or invest, directly or indirectly, any part of such income, or the proceeds  
13 of such income, in acquisition of any interest in, or the establishment or operation of, any Tech  
14 Cartel which is engaged in, or the activities of which affect interstate or foreign commerce.”;

15 471.

16 Defendants have within the past decade received, and concede that they currently receive  
17 income from their participation as principals in a conspiracy with overt acts in concert, evidencing  
18 an extensive pattern of racketeering activity;

19 472.

20 That income was and is used to finance current and future racketeering activity;

21 473.

22 The Tech Cartel activities involved/involve coordination, by their own admission, between  
23 David Brock’s partisan nonprofits and the political campaigns (and its various complicit entities)  
24 and Tech Cartel surrogates and participants with the intent to criminally injure, and defame,  
25 “enemies” - and the Tech Cartel in this respect engaged in illegal campaign and related activities, as  
26 well as Federal and State tax fraud, in addition to their other crimes/predicate acts discussed and/or  
27 alleged herein;

28 474.

1 The Tech Cartel uses illicit proceeds to engage in myriad malfeasance, including crimes  
2 such as bribery and extortion (to name but a few of those alleged herein) as well as process crimes  
3 such as numerous forms (and thousands of counts) of obstruction of justice, evasion of federal  
4 records laws, perjury, and related offenses utilized to cover up their malfeasance;

5 475.

6 **18 U.S.C. §1962(b)**: Section 1962(b) of RICO provides that it “shall be unlawful for any  
7 person through a pattern of racketeering activity or through collection of an unlawful debt to acquire  
8 or maintain, directly or indirectly, any interest in or control of any Tech Cartel which is engaged in,  
9 or the activities of which affect, interstate or foreign commerce – as the Tech Cartel has  
10 accomplished by and through obtaining illegitimate control of political parties through its long and  
11 sordid pattern of racketeering activity described herein;

12 476.

13 **18 U.S.C. §1962(c)**: Section 1962(c) of RICO provides that it “shall be unlawful for any  
14 person employed by or associated with any Tech Cartel engaged in, or the activities of which affect,  
15 interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of  
16 such Tech Cartel’s affairs through a pattern of racketeering activity...”;

17 477.

18 **18 U.S.C. §1962(d)**: Section 1962(d) of RICO makes it unlawful “for any person to conspire  
19 to violate any of the provisions of subsection (a), (b), or (c) of this section” – which includes but is  
20 not limited to the known and unknown named defendants, and their surrogates, collaborators, and  
21 participants as noted herein;

22  
23 **The Rico Tech Cartel Verifications Of Crime**

24  
25 478.

26 Plaintiffs repeats and re-alleges each and every allegation of the foregoing paragraphs as if  
27 fully set forth herein;

28 479.

1 In any Racketeer Influenced and Corrupt Organization litigation, it is important to  
2 distinguish between legitimate organizations, on the one hand, and the abuse of those entities for  
3 illegal purposes by the unofficial, corrupt “Tech Cartel” such as that at issue in this litigation;

4 480.

5 This pattern of illegal activities, *i.e.* , racketeering, committed by the Defendants here and in  
6 collusion with Tech Cartel surrogates and numerous co-conspirators, and the predicate acts  
7 discussed below, were done with the purpose of financial gain for the Tech Cartel and themselves,  
8 and to harm the reputation and business interests of (and seek revenge with respect to) Plaintiffs –  
9 and were done within the past ten (10) years and are continuing unabated;

10 481.

11 By the acts alleged herein, Defendants, with the collusion of their surrogates, have jointly  
12 and severally aided and abetted and conspired to violate myriad laws through their ongoing criminal  
13 Tech Cartel;

14 482.

15 The law presumes that a person intends the obvious results of their actions – inculcating  
16 each Defendant and their surrogates as alleged herein;

17 483.

18 The many predicate and chargeable criminal acts by the Tech Cartel that are alleged in this  
19 action (although only two are necessary to establish a pattern of racketeering) are as follows: acts or  
20 threats involving bribery (18 U.S.C. § 1961(1)(A)); acts or threats involving extortion (18 U.S.C. §  
21 1961(1)(A)); acts or threats involving murder 18 U.S.C. § 1961(1)(A)); acts indictable relating to  
22 bribery (18 U.S.C. § 1961(1)(B), cross referencing 18 U.S.C. §201)); acts indictable relating to mail  
23 and wire fraud, respectively (18 U.S.C. § 1961(1)(B), cross referencing 18 U.S.C. §§ 1341 and  
24 1343, respectively); acts indictable relating to obstruction of justice (18 U.S.C. § 1961(1)(B), cross  
25 referencing 18 U.S.C. § 1503)); acts indictable relating to obstruction of criminal investigations (18  
26 U.S.C. § 1961(1)(B), cross referencing 18 U.S.C. § 1510)); acts indictable relating to obstruction of  
27 State law enforcement (campaign finance) (18 U.S.C § 1961(1)(B), cross referencing 18 U.S.C. §  
28 1511)); acts indictable relating to tampering with a victim, witness or informant (18 U.S.C. §

1 1961(1)(B), cross referencing 18 U.S.C. § 1512)); acts indictable relating to retaliating against a  
2 witness, victim or informant (18 U.S.C. § 1961(1)(B), cross referencing 18 U.S.C. § 1513)); acts  
3 indictable relating to interference with commerce .. or extortion (18 U.S.C. § 1961(1)(B), cross  
4 referencing 18 U.S.C. § 1951); acts indictable relating to racketeering (18 U.S.C. § 1961(1)(B),  
5 cross referencing 18 U.S.C. § 1952)); acts indictable relating to the laundering of monetary  
6 instruments (18 U.S.C. § 1961(1)(B), cross referencing 18 U.S.C. § 1956)); acts indictable relating  
7 to engaging in monetary transactions in property derived from specified unlawful activity (18  
8 U.S.C. § 1961(1)(B), cross referencing 18 U.S.C. § 1957)); acts indictable relating to use of  
9 interstate commerce facilities in the commission of murder for hire (18 U.S.C. § 1961(1)(B), cross  
10 referencing 18 U.S.C. § 1958));

11 484.

12 It is alleged that all acts by the Tech Cartel and others cited herein also involve Federal  
13 conspiracy counts under the RICO statute, 18 U.S.C. §§ 1961, *et seq.*, as they relate to the numerous  
14 violations of Federal and State law described below, and otherwise - and with relation to the factual  
15 allegations herein, matters of law and fact thus far suppressed by the Tech Cartel and its surrogates  
16 and to be demanded of and provided by the Tech Cartel in discovery, in pretrial proceedings, and  
17 during the trial on the merits in this litigation (in addition to information from numerous collateral  
18 proceedings of which this court may take judicial notice);

19 485.

20 It is, in addition to the foregoing, alleged that the Tech Cartel participants, individually and  
21 in coordination among themselves and their surrogates, utilized the wires and mails as to all  
22 predicate acts, *e.g.*, coordination by mail and wire to engage abundant instances of other crimes,  
23 including but not limited to: the three versions of money laundering cited below; violation of U.S.  
24 law regarding use of nonprofit entities (and concomitant Federal and State tax violations) to engage  
25 in willful and long-term patterns of partisan revenge attacks against Plaintiffs and others cited  
26 herein; and related tax violations; putative statutory treason by Defendants including tax evasion,  
27 conspiracy to obstruct justice and related violations; use of nonprofits for partisan gain, illegal  
28 fundraising and money laundering; use of bribery and extortion to gain the assistance of high-

1 ranking FBI and DoJ officials and their legal counsel in the Tech Cartel scheme; defamation used to  
2 obstruct justice in all of its various forms cited herein; bribery and extortion of FBI and DoJ high-  
3 ranking officials, *e.g.*, 2018 Rosenstein threats to use DoJ investigative authorities as a weapon  
4 against political adversaries, and their legal counsel with relation to obstruction (and otherwise) as  
5 co-conspirators in espionage, and thousands of process crimes in order to obstruct justice;

6 486.

7 Overall, the Tech Cartel is a *corrupt crime apparatus*, and each and every factual allegation  
8 herein is incorporated by reference into all of the alleged predicate acts (and vice-versa) – including  
9 but not limited to those which by cross-reference must be brought in any criminal action against the  
10 Tech Cartel defendants and/or their surrogates – as set forth below and discussed at length herein;

11 487.

12 Each and every Tech Cartel defendant named herein, and many (if not all) of their  
13 surrogates and other participants in the Tech Cartel operational scheme, should and will be named  
14 as a criminal defendant under Federal and/or State law – and prosecuted to the full extent of the  
15 law;

16 ADDITIONAL LEGAL CAUSES OF ACTION HEREIN INCLUDE:

17  
18 ***ABUSE OF PROCESS; FTCA VIOLATIONS; ACCOUNT STATED; BREACH OF***  
19 ***CONTRACT; CONVERSION; DEFAMATION; FRAUDULENT MISREPRESENTATION;***  
20 ***FRAUDULENT CONCEALMENT; INJURIOUS FALSEHOOD, PRODUCT***  
21 ***DISPARAGEMENT AND TRADE LIBEL; CIVIL RIGHTS VIOLATIONS AND VIOLATIONS***  
22 ***OF THE U.S. CONSTITUTION; MISAPPROPRIATION OF TRADE SECRETS; PRIMA***  
23 ***FACIE TORT; QUANTUM MERUIT; TORTIOUS INTERFERENCE INCLUDING a.)***  
24 ***Tortious interference with an existing contract, b.) Tortious interference with prospective, c.)***  
25 ***Tortious interference with business relations contractual relations; PATENT INFRINGEMENT;***  
26 ***PERSONAL INJURY; UNJUST ENRICHMENT; ANTI-TRUST LAW VIOLATIONS; LABOR***  
27 ***LAW VIOLATIONS AND OTHER CAUSES.***  
28

1 ***A CLASS ACTION CASE involving all of the whistle-blowers should aslo be produced.***

1  
2 **EXHIBIT 70 - What A Jury Would Discover About This Case**  
3

4 793.

5 In anticipation of filing this complaint, it is imperative to point out that several Tech Cartel  
6 schemes involving numerous criminal acts, and what appears to be a significant “cover up” within  
7 the holdover (legacy) White House, SEC, FBI and DoJ, have only recently come to light and  
8 continue to be exposed – discovery in this case will inevitably include significant additional  
9 inculpatory evidence concerning the Tech Cartel operational schemes at issue in this lawsuit;

10 794.

11 It is clear that these Tech Cartel participants, including but not limited to its surrogates and  
12 collaborators, have misled their Article III counterparts, *i.e.*, whatever federal judge was/is assigned  
13 to the relevant FISA matter;

14 795.

15 Abuse of the FISC process is not only illegal and a threat to our structural constitutional  
16 form of government under which FISA operates, it is a direct affront (and a slap in the face) to the  
17 Chief Judge of this honorable district court, the Chief Judge of the FISC, and the Chief Justice of  
18 the United States Supreme Court who appoints the life-tenured judges who “dual hat” as  
19 FISA/FISC judges;

20 796.

21 The Department of Justice has now allowed all members (and/or designees) of the House  
22 and Senate Intelligence Committees to review significant material with direct relation to the issues  
23 in this lawsuit - this will represent an opportunity for this Court (in determining the (non)credibility  
24 of the Tech Cartel defendants and surrogates and drawing appropriate inferences of corrupt Tech  
25 Cartel intent) to be shown the Tech Cartel scheme to illegally undertake a fraud on the FISC in  
26 pursuit of their surreptitious surveillance of the whistle-blowers based upon a standard far lower  
27 than that set forth in the Fourth Amendment to our Constitution;

28 797.

1 The Tech Cartel malfeasance, including, *inter alia*, misleading the Article III FISA judge(s)  
2 in an attempt to manipulate elections and laws and using FISA as a tool to damage the lives,  
3 businesses and employment of political enemies, also destroys the delicate balance forged in 1978  
4 between the Executive (who ceded power) and the Legislative (which on balance gained oversight  
5 authority) – but that thoughtful structure is now at grave risk;

6 798.

7 It is certainly not lost on this court that what the Tech Cartel has done to Plaintiffs whistle-  
8 blowers is the utilization of FISA (and abuse of the trust inherent in the delicate balance therein)  
9 and other counterintelligence authorities such as human confidential sources to defeat a political  
10 opponent - in the fashion intended to be utilized to defeat, *inter alia*, international terrorists;

11 799.

12 In a deep departure from United States law and our constitutional norms, the Obama Justice  
13 Department (as set forth herein), misled at least one Article III federal judge (sitting as a FISA  
14 judge(s)) in seeking a surveillance order, or “warrant”, for surveilling a United States citizen, that  
15 they were presumptively relying upon a fake dossier (based upon knowing disinformation provided  
16 by the Russian SVR and financed by the Tech Cartel knowingly relying upon said Russian SVR  
17 disinformation and compiled by a foreign person, Steele, who concedes openly that he sought to  
18 defeat people he did not like;

19 800.

20 Tech Cartel principals and surrogates lied to the FBI and obstructed justice in order to  
21 illegally mislead Article III federal judges into approving a FISA warrant to surreptitiously surveil  
22 United States citizens;

23 801.

24 The FBI used robust counterintelligence techniques without adequate cause against a  
25 political candidate they disfavored, and against those like Plaintiffs they feared would harm their  
26 favored candidate;

27 802.

28 Several months after Steele signed a contract with Fusion GPS to create a dossier on private

1 citizens, Steele discovered his research was being subsidized by the Hillary Clinton for President  
2 campaign and the Democratic National Committee; despite this conceded knowledge and Steele’s  
3 admission that he wanted to simply harm his competitors, the DoJ/FBI FISA warrant application  
4 said Steele didn't know who was funding him;

5 803.

6 The abuse of the FISC is the worst violation of the FISA statute in its history, and together  
7 with the use of other counterintelligence authorities to run HCSs and lures against political  
8 opponents constitutes yet another form of Tech Cartel sedition in attempting to misuse the FISC and  
9 counterintelligence process to undermine a duly certified and inaugurated president – at the *very*  
10 least, any FISC judge, had they granted the application and then subsequently learned (as the DoJ  
11 was responsible to inform them) that the information was sourced (notwithstanding that it was  
12 financed) to the DNC and the Clinton Campaign, would have rescinded the authorization and issued  
13 a show-cause order to the Government to explain who and why this sourcing was not made known  
14 to the court;

15 804.

16 The FISC and this court were not properly informed of the counterintelligence abuse;

17 805.

18 The fact that the Justice Department told the FISC that it was a political source, but did not  
19 identify who, in this particular instance, is highly probative that the Government purposely misled  
20 the court – which is also facing scrutiny due to the friendship with FBI Tech Cartel surrogate Strzok  
21 and failure to recuse by a FISC judge;

22 806.

23 By and in relation to every crime and predicate act herein, directly in support of the  
24 predicate thereof, tens of thousands of text messages between FBI colleague Strzok, Page, Doerr,  
25 Westly, et al constituting wire fraud have established (those released thus far) and will further  
26 establish (those withheld thus far) the Tech Cartel wrongdoing from the highest levels of the FBI  
27 and DoJ

28 807.

1 On or around the time of the filing of this complaint, the Department of Justice Inspector  
2 General will issue one of several ongoing reports relevant to related RICO matters, in addition to  
3 the testimony that Strzok and Page will be required to provide about their discussions that were not  
4 captured in the tens of thousands of probative text message exchanges – in short, there is much  
5 more to come establishing the depth and breadth of the Tech Cartel, and more specific dates, names  
6 and clear intentions of preventing an electoral outcome and, failing that, removing a duly-certified  
7 President and undermining their own government;

8 808.

9 The DoJ Inspector General has within its possession and upon the issuance of its report  
10 addressing the Strzok-Page wrongdoing (and the Hillary Clinton e-mail espionage), will release  
11 evidence further proving the Tech Cartel wrongdoing set forth herein;

12 809.

13 Although espionage, bribery and sedition (among many others) may be inherent in the Tech  
14 Cartel, the use of the DoJ, FBI, NSA (who must run, maintain, and otherwise “weaponize” the  
15 electronic surveillance), the wrongdoing committed by the Tech Cartel and its surrogates and  
16 collaborators in this case is immeasurable in its danger and simply without comparison in the annals  
17 of counterintelligence abuse to destroy political enemies – pre- or post-FISA;

18 810.

19 By way of recent example, defendant John Podesta, working with the Tech Cartel and the  
20 Center for American Progress (a nonprofit partisan entity he founded), is engaged in an intentional  
21 disinformation campaign meant to discredit current investigators in Congress and further undermine  
22 The U.S. Government using taxpayerfunds – primarily through a wholly partisan CAP undertaking  
23 known as the “Moscow Project”;

24 811.

25 The “Moscow Project,” in turn, coordinates its work with Tech Cartel surrogate Jones and  
26 the group of mega-funders led by defendant Soros, who have engaged Tech Cartel surrogate Fusion  
27 GPS to further undermine The U.S. Government ;

28 812.

1 The Center for American Progress, as noted a wholly partisan “non-profit organization”  
2 founded by former White House Chief of Staff John Podesta, has for over five years been lobbying  
3 (without registering such lobbying under FARA) on behalf of foreign governments;

4 813.

5 In addition to espionage and sedition, the Tech Cartel utilized prototypical crime syndicate  
6 tactics such as attempting to tamper with the “Special Counsel” investigation of Tech Cartel  
7 surrogate Robert S. Mueller;

8 814.

9 On Tech Cartel instructions, Tech Cartel surrogates Strzok and Page have also destroyed the  
10 capability of certain DoJ/FBI hard drives containing inculpatory evidence against the Tech Cartel;

11 815.

12 Without the knowledge of their current Director, the FBI on behalf of the Tech Cartel  
13 provided materially false statements to the Senate Judiciary Committee, based in turn upon illegal  
14 false statements provided to the FBI by Steele which the FBI knew to be false – and the referral of  
15 Steele for prosecution (corroborating the allegations of the HPSCI concerning what is described  
16 herein as Tech Cartel wrongdoing) further implicates the FBI as Steele’s handler (knowing of his  
17 Tech Cartel political offices funding);

18 816.

19 In a statement provided on January 23, 2018, by United States Senator Ronald Johnson (R-  
20 WI), the Chairman of the Senate Homeland Security and Government Affairs Committee, Senator  
21 Johnson revealed that Tech Cartel surrogates Strzok and Page conspired routinely directly after the  
22 2016 election with a group of Clinton/Tech Cartel loyalists within the DoJ/FBI to undermine the  
23 competitors presidency, and were planning yet another cover-up of their criminal activity involving  
24 inculpatory text messages between them – joining the principals of the Tech Cartel set forth in  
25 *Exhibit “A”* hereto with the DoJ/FBI participants affiliated with the Ohr Tech Cartel surrogates,  
26 Fusion GPS, and numerous named unknowns who have - if the accusation by Senator Johnson is  
27 confirmed following (yet another) investigation - chosen to undermine their own government and  
28 expose themselves to continuing criminal liability in conjunction with the Tech Cartel;

1 817.

2 The Chairman of the United States House Permanent Subcommittee on Intelligence  
3 (“HPSCI”), after conducting a lengthy investigation of Tech Cartel tactics, stated that

4 ““We have a clear [Clinton] link to Russia — you have a campaign who hired a law firm,  
5 who hired Fusion GPS, who hired a foreign agent, who then got information from the Russians on  
6 the other campaign” ...“.... the counterintelligence investigation should have been opened up  
7 against the Hillary [Clinton] campaign when they got ahold of the dossier. But that didn't happen,  
8 either”;

9 818.

10 The Chairman of HPSCI, Devin Nunes (R-CA), also is on record as concluding the massive  
11 FISA and other (HCS) counterintelligence abuse of the responsible Tech Cartel actors noted herein;

12 819.

13 As Congress and the Executive Branch continues to expose Tech Cartel crimes, Members of  
14 the HPSCI and the Senate Committee on the Judiciary have also uncovered the 2016 involvement of  
15 the Obama Department of State in assisting the Tech Cartel in attempting to swing the election for  
16 Hillary Clinton – according to these Members, Tech Cartel surrogates Sidney Blumenthal, Cody  
17 Shearer and State Department official Jonathan Winer engaged in analogous Tech Cartel tactics in  
18 assembling yet another anti-competitors “dossier” using Fusion GPS to “[pay] Steele to put together  
19 the dossier and [instructing] him what to [include]”;

20 820.

21 Brennan, Clapper and other Tech Cartel surrogates must also answer under oath – during the  
22 pendency of this litigation and before a putative Grand Jury – concerning, *inter alia*, their role in the  
23 inexcusable collusion with Hannigan, investigatory abuse prior to and after Operation Crossfire  
24 Hurricane, FISA abuse, and HCS abuse while they attempted to deliver the presidency to Hillary  
25 Clinton;

26 821.

27 On March 29, 2018, the Attorney General of the United States announced he had assigned  
28 the Department of Justice Inspector General to “investigate alleged violations of criminal and civil

1 laws by Department [of Justice] employees, including actions taken by former employees after they  
2 have left government service – that role of the DoJ IG has grown exponentially and has  
3 resulted in criminal referrals of several of the most senior DoJ/FBI officials for prosecution;

4 822.

5 As part of the March 29th announcement by the Attorney General of the United States,  
6 Attorney General Sessions emphasized that he has assigned the United States Attorney for the  
7 District of Utah, John Huber (originally commissioned by the Obama administration but  
8 renominated by President Trump in 2017 for an additional four-year term) to both investigate  
9 (concomitant and consistent with, *inter alia*, the DoJ IG and Congress) wrongdoing by those actions  
10 undertaken by the Tech Cartel and described herein, and the DoJ IG will, if/when the IG “finds  
11 evidence of criminal wrongdoing, [the DoJ IG] may refer that criminal malfeasance to Huber (or  
12 another United States attorney) who can then convene a Grand Jury or take other appropriate  
13 actions”;

14 823.

15 Because the findings of current and numerous parallel investigations, including but not  
16 limited to the ongoing matter with relation to United States Attorney Huber and the DoJ IG, it is  
17 anticipated that another significant trove of evidence will be available in the near future for  
18 consolidation into and use during this lawsuit;

19 824.

20 It is also anticipated that, if significant wrongdoing with respect to the Obama Justice  
21 Department and FBI is uncovered, it will be referred for prosecution and either a(nother) Special  
22 Counsel will be appointed or another United States Attorney assigned with broad scope (including  
23 “investigating of the (Mueller) investigators” – thereby providing additional evidence for the instant  
24 cause of action;

25 825.

26 It is not only plausible but conclusive that the defamatory attacks against Plaintiffs whistle-  
27 blowers were inextricably intertwined with the counterintelligence abuses brought to bear against  
28 those who were considered “enemies” of the Tech Cartel;

1 826.

2 What began as an Tech Cartel operational scheme to control the Oval Office has now been  
3 discovered to be – based not only upon information and belief but informants’ testimony to  
4 Congress and the Department of Justice – the destruction of Tech Cartel “enemy” whistle-blowers  
5 and a constitutional crisis created by Tech Cartel surrogates among high-level Obama  
6 administration FBI and DoJ officials;

7 827.

8 It is incumbent upon this (and any other) Article III court to end the Tech Cartel operational  
9 scheme that has destroyed any professional prospects for Plaintiffs and the whistle-blowers and,  
10 working together, carried out their operational scheme in secret to destabilize the United States  
11 Government and the elections of the United States – even going so far as to instruct Strzok to  
12 initiate within the FBI “an *investigation leading to impeachment*” just prior to Strzok being placed  
13 in the upper echelon of the Mueller Special Counsel team – despite Strzok’s admission that the  
14 Mueller Special Counsel investigation involved pursuing a sitting President and numerous other  
15 United States citizens when nothing of particular consequence is at issue, *i.e.*, “no big there” (May  
16 19, 2017 text message from Strzok to Page);

17 828.

18 The Tech Cartel was, and is, a dangerous organized criminal association – threatening both  
19 our nation and those individuals who, in the words of Donna Lease Brazile, dare to “cross them”;

20 829.

21 To Plaintiffs , who apparently has “crossed” the Tech Cartel, life is quite perilous and  
22 precarious – we ask this honorable court to intervene and provide the ability, even if the jury does  
23 not return all that is asked, to prevent the Tech Cartel, as they are wont, from further attacks on  
24 Plaintiffs.

25 830.

26  
27 Plaintiffs was exposed to nuclear materials and toxins either purposely or negligently while working  
28 as an employee/contractor with the United States Department of Energy.

1 831.

2 White House and Department of Energy Executive staff, in reprisal, ordered a “hit-job” on  
3 Plaintiffs and other whistle-blowers. White House and Department of Energy Executive staff  
4 financed and managed those attacks through circuitous communications routes which were exposed  
5 after Russian, Chinese and Iranian state-sponsored hackers hacked most of Washington, DC  
6 government server networks;

7 832.

8  
9 According to [www.usinventor.org](http://www.usinventor.org) most of Defendants Tech Cartel technologies were based on  
10 stolen technologies for which Defendants never paid fees, licenses or profit sharing royalties;

11 833.

12 Plaintiffs technologies obsoleted most of Defendants competing technologies and thus  
13 Defendants also violated anti-trust laws by engaging in attacks and business interference in order to  
14 prevent Plaintiffs from competing with the Tech Cartel cartel. For example, Tech Cartel financier  
15 and core beneficiary Kleiner Perkins placed one of their staff as a “mole” inside of one of Plaintiffs  
16 companies with orders to “disrupt and sabotage” Plaintiffs business. FBI and private investigators  
17 uncovered the ruse;

18 834.

19 The “*Elon Musk Addenda*” Document details over 30 felony criminal assertions against  
20 Tech Cartel member Elon Musk;

21 835.

22 Congressional bosses Harry Reid, Dianne Feinstein, Kamala Harris, Nancy Pelosi, Barbara  
23 Boxer and other famous names have had their assets, finances and stock market accounts  
24 electronically tracked directly back to the crimes detailed in this disclosure, the operators of those  
25 crimes, the public policy tactics to enable those crimes and the insider trading of those crimes;

26 836.

27 Tech Cartel boss Tom Steyer placed his partner M. Sullivan as a head officer at USAID.  
28 USAID promoted the harvesting of Afghanistan for “trillions of dollars of rare earth mining” to

1 Silicon Valley oligarchs as payola for funding and search engine rigging the first Obama White  
2 House campaign. USAID leaked documents and National Archives Documents prove this as fact.  
3 Contracts with Silicon Valley’s McKinsey Consulting (the promoters of the Opium and Fentanyl  
4 crisis) to flood Washington, DC with fake “white papers” promoting this Afghan war, also prove  
5 this.

6 837.

7 Senior officers at Covington And Burling and at Perkins Coie both told Plaintiffs that they  
8 “have total control over who gets into the Oval Office, who gets appointed and who gets  
9 government funding...”

10 838.

11 Emails by the most famous members of the Tech Cartel have been leaked showing that the  
12 Enterprise modeled itself after the “Italian Mafia” and admired organized crime behavior, up to, and  
13 including dressing up as notorious mobsters and having their own speak-easy meetings at places  
14 like Jeffrey Epstein’s Manhattan building.

15 839.

16 The evidence proves that Tesla was using lithium mined from Afghanistan.

17 840.

18  
19 The evidence proves that Ener1 was using lithium mined from Afghanistan. After receiving a  
20 massive amount of federal dollars, the company mysteriously disappeared.

21 841.

22  
23 The evidence proves that Senator Dianne Feinstein lobbied for government funds to be given to  
24 Tesla and Solyndra. Her family held HR, land contract, construction, stock and other upside assets  
25 in both of those companies.  
26

27

28

1 842.

2  
3 The evidence proves that Fisker was using lithium mined from Afghanistan. After receiving a  
4 massive amount of federal dollars, the company mysteriously disappeared.

5  
6 843.

7  
8  
9 The evidence proves that Abound Solar was using indium mined from Afghanistan. After receiving  
10 a massive amount of federal dollars, the company mysteriously disappeared.

11  
12 844.

13  
14 The evidence proves that The U.S. Secretary of Energy had personal, financial and political  
15 relationships with each of the companies who were given federal cash that he controlled. He  
16 sabotaged every single other Victim/Witnesses, who, coincidentally, were the competitors to his  
17 friends who he awarded the taxpayer cash to.

18  
19  
20 845.

21  
22 This evidence, and the associated hard drives and witness testimony, will stand up as sworn,  
23 certified, warranted testimony in any federal jury trial, grand jury hearing, RICO Racketeering  
24 corruption trial and/or live televised Congressional hearing. Given equally resourced, and financed,  
25 legal support and proper security protection, many hundreds of person's are willing to swear and  
26 warrant to the veracity of these assertions.  
27  
28

1 846.

2  
3 The evidence proves that New York State, California State and Washington, DC elected officials, in  
4 particular U.S. Senators, did criminalize the domestic public policy system in order to acquire  
5 personal profits and monopolize industry markets for themselves and their friends.  
6

7  
8 847.

9  
10 The evidence proves that Tesla Motors, Elon Musk and his associates, participated in these schemes  
11 in violation of organized crime laws.  
12

13 848.

14  
15 The evidence proves that the investment firms of Goldman Sachs; Kliener Perkins; Draper Fisher  
16 Jurvetson; GreyLock Capital; and other venture firms participated in these schemes in violation of  
17 organized crime laws.  
18

19  
20 849.

21  
22 The evidence proves that U.S. Senators Reid, Feinstein, Harris, Boxer, Pelosi, and other Senators,  
23 participated in these schemes in violation of organized crime laws.  
24

25  
26 850.

27

28

1 The evidence proves that U.S. Attorney Generals Holder, Harris, Schniederman, and other Attorney  
2 Generals, participated in these schemes in violation of organized crime laws.

3  
4 851.

5  
6 The evidence proves that certain senior law enforcement officials received full and complete crime  
7 reports and law violations disclosures about these crimes and stalled investigations, covered-up the  
8 crimes and tampered with evidence in order to protect their political friends and profit monetarily.

9  
10  
11 852.

12  
13 The evidence proves that A "Silicon Valley PayPal Mafia" does exist and they do conspire to break  
14 the law and manipulate Democracy.

15  
16  
17 853.

18  
19 The evidence proves that the members of this technology cartel "Mafia" group are selected for their  
20 social, physical and family similarities which include the tendency to engage in sociopath behavior,  
21 rape, sex abuse and sex-extortion, misogyny, tax evasion, money laundering, real estate fraud,  
22 racism, bribery, patent theft and other deviant behavior.

23  
24  
25 854.

26  
27 The evidence proves that Google's VC's and executives, who are part of this cartel, plan and  
28

1 manually run election manipulation programs, privacy abuse, search engine rigging and militaristic  
2 information manipulation for personal profiteering at the expense of the public.

3  
4 855.

5  
6 The evidence proves that the Obama Administration used the U.S. Department of Energy as a  
7 campaign financier payola slush fund.  
8

9  
10 856.

11  
12 The evidence proves that U.S. elected political officials hire and manage third party services to run  
13 reprisal campaigns against taxpayers and that those character assassination providers include: IN-Q-  
14 Tel, Think Progress, Black Cube, Podesta Group, EDS, Stratfor, Fusion GPS, IN-Q-Tel, Media  
15 Matters, Gawker Media, Gizmodo Media, Syd Blumenthal, and other attack services which are  
16 illicitly compensated with laundered taxpayerresources.  
17

18  
19 857.

20  
21 The evidence proves that the bribes and profiteering conduits for this scam are ignored by  
22 compromised FEC bosses and include: Dark Money fronts; family trust floats; shell corporation  
23 layering; insider trading in tech companies; revolving door jobs at Netflix, Google, etc; prostitutes;  
24 sports suites; political campaign search engine rigging, bot attacks and other illicit payola.  
25

26  
27 858.  
28

1 The evidence proves that a mobster-like cartel of men operate a racketeering operation out of  
2 Silicon Valley that manipulates elections, news and taxpayerfunding policies.

3  
4 859.

5  
6 The evidence proves that this cartel is comprised of sick, megalomaniac, sexually addicted and  
7 abusive men who protect each other with billions of dollars of cover-ups involving the bribery of  
8 Senators with insider trading stock and covert campaign financing.

9  
10  
11 860.

12  
13 The evidence proves that this cartel receives hundreds of billions of dollars of profits from their  
14 crimes and this causes them to stoop to murders, extortion, black-lists, funding blockades and other  
15 crimes, in order to gather their ill-gotten gains.

16  
17  
18 861.

19  
20 The evidence proves that the investors of Google, Facebook, Twitter, Amazon, Ebay, Netflix and a  
21 related set of Silicon Valley monopolies conspire in these efforts to manipulate the stock market, lie  
22 to advertisers and bias all digital news and information, globally, to push their selfish ideologies.

23  
24  
25 862.

26  
27 The evidence proves that Senators Pelosi, Feinstein, Boxer, Harris, Reid have an active criminal  
28 participation in, and benefit from, these efforts and that they, in fact, along with Steven Chu had

1 illicit dealings with Russian and Chinese financiers and they are paid with insider trading stock,  
2 revolving door jobs, and other covert payola.

3  
4 863.

5  
6 The evidence proves that Google, Facebook and Twitter have rigged and manipulated U.S. elections  
7 since Barack Obama was elected.  
8

9  
10 864.

11  
12 The evidence proves that the U.S. Department of Energy and the U.S. Department of Justice were  
13 used as an illicit slush-fund by the Obama Administration to pay campaign financiers and to  
14 sabotage their competitors.  
15

16  
17 865.

18  
19 The evidence proves that government officials hired and/or financed and/or directed deadly  
20 economic and character assassination hit jobs against those who reported these crimes using attack  
21 services from IN-Q-Tel, Gawker Media, Jalopnik, Gizmodo Media, K2 Intelligence, WikiStrat,  
22 Podesta Group, Fusion GPS, Google, YouTube, Alphabet, Facebook, Twitter, Think Progress,  
23 Media Matters, Black Cube, Mossad, Correct The Record, Stratfor, ShareBlue, Wikileaks,  
24 Cambridge Analytica, etc; the owners of whom have been proven to have accepted compensation  
25 for such hatchet job services.  
26

27  
28 867.

21  
22  
23  
24  
25  
26  
27  
28

The evidence proves that the “The PayPal Mafia” is an actual Cosa Nostra like operation that ePlaintiff 42loits sex cults, prostitutes, gay rent boys and market rigging as illicitly as the old Chicago “Mob”. Charges such as: [Facebook Hit With New Antitrust Probes](#) are becoming regular legal actions. As all other nations find the Silicon Valley tech companies to be a pack of crooks running The U.S. Government .

868.

The evidence proves that Tesla Motors is a criminal Dark Money front that “cooks the books”, lies about safety issues and runs sabotage campaigns through Musk’s massive use of Russian bots, trolls, stock shills and his covert manipulations with Google’s Larry Page and Eric Schmidt.

869.

The evidence, particularly that maintained by the U.S. Attorney's office under Mr. Anderson in San Francisco, shows that San Francisco City Hall is rife with a standardized system of political corruption based on bribery, payola and stock market exchanges.

870.

The evidence proves that internet media companies financed by Sand Hill Road, Palo Alto venture funding firms collude to enforce a strategic censorship plan designed to promote their friends and attack and harm their competitors in a manner which fully violates each and every anti-trust/anti-monopoly law in the United States and that 90% of the California politicians own stock in those companies and those politicians protect those companies from regulation and law enforcement.

871.

Defendants were in whole, and in part, motivated by power and money needed to buy

1 private jets, mansions, parties, prostitutes and rent boys; and drugs. Defendants used a false facade  
2 of “saving polar bears”, “protecting whales” and other emotional dog-whistle voter psychological  
3 trigger marketing to hide their crimes. Defendants used the good works of Plaintiff and other decent  
4 whistle-blowers to create a “smoke-screen” to cause The U.S. Government to assist in defrauding  
5 Plaintiffs out of money, time and resources. Defendants owned the “solution” companies to climate  
6 change and housing problems so that all monies provided by the government to those companies, as  
7 coordinated by The Tech Cartel’s owned public officials, went to Defendants, and never to their  
8 competitors, in a RICO Law and Anti-trust Law-violating manner. For example: Elon Musk used  
9 these RICO Law and Anti-trust Law-violating tactics to become the largest “government mooch” in  
10 history, destroy all of his competitors via funding blockades and get a 1000% advantage over any  
11 other company based on government-funded exclusive quid pro quo.

12  
13 Plaintiffs demands trial by jury on all claims and issues so triable.

1 **EXHIBIT 71 - Congress Took Massive Bribes from Big Tech...**

2  
3 **... Just As They Considered Anti-Trust Legislation Against Big Tech**

- 4  
5 • [Catherine Salgado](#)

6 -  
7 **As the US Congress considered legislation which could “reshape” the Big Tech**  
8 **industry in recent months, [the biggest tech companies in America gave very large donations](#) to**  
9 **key Democrat Party lawmakers.**

10 The tech industry was opposed to antitrust legislation, which would, if passed into law,  
11 make it “easier for regulators to break up tech giants.” Besides the huge donations, tech companies  
12 “lobbied Senate leaders to prioritize a bill to provide \$52 billion toward U.S. semiconductor  
13 manufacturing.”

14  
15 Senate Majority Leader Charles Schumer (D-NY), according to April-June Federal Election  
16 Commission filings, received the largest donations from the tech companies’ executives. Over two  
17 dozen executives from Microsoft gave over \$116,000 combined to the Schumer campaign in June.  
18 Among these executives, 13 gave the maximum legally allowed donation, \$5,800. Two of the max-  
19 out donors were Microsoft President Brad Smith and also Fred Humphries, who leads Microsoft’s  
20 Washington lobbying team.

21 A Microsoft spokesperson has insisted, “These were contributions made by executives in  
22 their personal capacity.”

23 Schumer will be running for reelection in 2022 and is currently leading the legislative efforts  
24 of Democrats while “simultaneously raising big money to ward off potential primary challengers.”  
25 Between April and June, Schumer raised a record of over \$11.5 million. According to The Hill:

26 “Google executives and its PAC donated nearly \$92,000 to Schumer’s campaign in the  
27 second quarter of 2021. Cisco Systems executives gave nearly \$100,000. Apple executives gave  
28 \$28,000. Executives at Microsoft, Cisco and Apple previously had not made large donations to

1 Schumer through the first three months of the year.”

2 Senator Patty Murray (D-Wash.), who also received many donations from tech executives, is  
3 running for reelection in 2022 as well and is the number three Democrat in the Senate. Murray was  
4 given about \$67,000 in total from the Amazon PAC and Amazon employees and about \$48,000  
5 from Microsoft.

6 Amazon lobbied the Senate, successfully, to pass a bipartisan bill “to bolster U.S.  
7 competitiveness with China” without requiring the collection and verification of third-party sellers’  
8 information by online retailers. The Semiconductors in America Coalition was formed in May by  
9 Amazon, Microsoft, Apple, Google, and Cisco to make sure that billions for semiconductor  
10 manufacturing were included in this same bill and that other industries, for instance carmakers, did  
11 not receive priority for the production of semiconductors.

12 “Federal investments in semiconductor technology will help ensure more of the chips  
13 America needs are produced on U.S. soil and accessible to the many critical sectors of the U.S.  
14 economy that depend on them, benefiting American workers, businesses, and consumers,” the tech  
15 coalition commented after the bill was passed.

16 Defeating antitrust legislation is still the top priority of the tech giants. Last month, a number  
17 of antitrust bills were advanced by the House Judiciary Committee and the chair of the Senate  
18 Judiciary subcommittee on antitrust, Senator Amy Klobuchar (D-Minn.), has stated that similar  
19 legislation will be introduced into the Senate.

20 The most aggressive of the proposed antitrust measures were voted against by  
21 Representatives Eric Swalwell, Zoe Lofgren, and Lou Correa, all Democrats from California.  
22 According to filings, Swalwell’s campaign had received donations from Apple and Facebook-  
23 owned Instagram executives only the day before the bill was marked up by committee. Lofgren  
24 received donations in May and June from tech executives, including Timothy Powderly, Apple’s  
25 director of government affairs, who gave Lofgren \$5,000.

26 Powderly wrote a letter to members of the House Judiciary Committee in June to ePlaintiff  
27 42ress opposition to antitrust legislation. “We are concerned that many provisions of the recent  
28 package of antitrust reform legislation would create a race to the bottom for security and privacy,

1 while also undermining innovation and competition,” he wrote.

2 “Two Republicans joined most Democrats in supporting a measure that could allow  
3 regulators to break up tech giants. GOP lawmakers and some tech firms have accused Democrats of  
4 wording antitrust legislation in a way that would exempt Microsoft from scrutiny. Microsoft, which  
5 reported lobbying on antitrust issues, has said it did not seek to be excluded from the bills.”

# EVERY FEW MINUTES SOMEONE IS MURDERED FOR LESS THAN 50 DOLLARS

## Afghanistan: The Saudi Arabia of Lithium?

**Lithium, which is from mobile phone nation's economy.**

By JAMES RISEN  
Published June 13, 2010

WASHINGTON — The United States has discovered nearly \$1 trillion in untapped mineral deposits in Afghanistan, far beyond any previously known reserves and enough to fundamentally alter the loan to Think Global, which is trying to emerge from bankruptcy — is held by Bzinfon, a British Virgin Islands company whose "indirect beneficial owner" is Boris Zingarevich, a Russian businessman. Zingarevich has close ties to Russian President Dmitry Medvedev and Prime Minister Vladimir Putin.

1  
2 **EXHIBIT 73 - POLITICAL CORRUPTION STATEMENT**

3  
4 Most politicians, today, go into politics in order to scam money via bribes and payola. Their  
5 corruption is easy to prove with a simple spread-sheet, but the corrupt Senators have done  
6 everything they can to keep you from seeing that spread-sheet. If you saw the spread-sheet that  
7 shows all of the covert family bank accounts, fake trust funds, shell companies and stock market  
8 accounts for Dianne Feinstein, Harry Reid, Nancy Pelosi, etc.; you could easily see how they only  
9 get a salary of \$190K per year but put hundreds of millions of dirty dollars in their accounts. That  
10 Dark Money all traces back to special interest groups that tell them what laws to make and what  
11 laws to stop from moving forward. Forensic accountants at the GAO, FBI or SEC can pop out the  
12 latest update on any given day...**BUT**, These Senators have "rules" that delay investigations against  
13 themselves. Also, as we all saw from the Comey case: Corrupt Senators can even tell the head of  
14 the FBI who to NOT investigate!

15  
16 The 2008 and 2021 "Stimulus Funds" were just scams cooked up by politicians for them to skim  
17 stock market pump-and-dump profits off of and grab personal payola.

18  
19 The Silicon Valley Cartel began in California. Elite arrogant asshole dynasties send their kids to  
20 Stanford University. Stanford puts the kids in asshole frat houses to train them to get away with  
21 rape and run monopolies. When they graduate they either go up the hill to Sandhill Road in Palo  
22 Alto and start an insider venture capital clone operation or they get their frat friends on Sandhill  
23 Road to racketeer-fund their start-up or political campaign using money scammed from your parents  
24 pension funds.

25 They only work with their frat buddies and insiders in a tribal 'old boys club' manner. They  
26 steal all the technology and markets they want because they control all of the tech lawyers and  
27 politicians via bribes and revolving doors. Most of the money in Stanford University bank accounts  
28 is from Foreign and Hollywood oligarchs delivered as bribes meant to get their snot-nosed brats into

1 Stanford. Stanford bosses keep all of this covered-up and covertly fund political campaigns to  
2 grease the wheels of political corruption. They then sexually extort some Stanford interns in  
3 [Rosewood Hotel](#) rooms, get the most 'trophy wife' ones pregnant, and start the cycle all over again.  
4 Alas, Stanford is the training ground for abuse, corruption and 'Bro-Crime'.  
5

6 In all these corruption cases, [these corrupt people](#) took the same steps to conceal their assets. They  
7 each took the money in secret ways. The main ways are 1.) via Dark Money stealth political funds;  
8 2.) bribes paid via insider trading ( notice that most of these crooks marry an investment banker to  
9 run their dirty schemes) and 3.) getting government contracts, loans and grants for their friends that  
10 they get kick-backs from. They then had their dirty law firms and CPA's shove the money into their  
11 standardized covert financial structure to hide it. They use family members to run the operation.  
12 Their dirty family members and lawyer/CPA teams cover up their tracks. They then have  
13 intermediaries spend the money to get them islands, yachts, mansions, hookers, Tesla's, etc.  
14

15 The 2008 and 2021 "[stimulus funds](#)" are quid pro quo scams to pay off political insiders. We  
16 reported these crimes (with FBI-class evidence) to every law enforcement agency in writing ( FBI,  
17 DOJ, SEC, IG, FTC, OSC, FEC, etc.). apparently, citizens are ignored if the crimes involve  
18 politicians and their billionaires. the cover-ups are off-the-charts!these mobsters (Google, Tesla,  
19 Facebook, Linkedin, Netflix, In-q-tel, Kleiner Perkins, Greylock, etc; acting in a coordinated,  
20 collusion-based, operation) are paying billions of dollars of political bribes (...via cash, real estate,  
21 sex trafficking, pacs, search engine rigging, crony jobs, biased censoring, campaign funds, stock  
22 market manipulations, ukrainian money laundering, etc.) to delay justice and blockade our, and  
23 your, rights! There can be no question about the fact that Google, Facebook, Netflix, Tesla and the  
24 Silicon Valley Cartel control the Obama and Biden White House. For example: Elon Musk ordered  
25 the politicians who are his bitches to sabotage his competitors. He gave those political insiders:  
26 cash, stock in his cartel, revolving-door jobs, campaign funding, sex workers, off-shore money  
27 laundering, and other quid pro quo. Eric Schmidt, Larry Page, Mark Zuckerberg, and the rest of the  
28 tech mob, all worked together on these crimes.

1            *The hacks and leaks of their documents* prove it. Government agency bosses are covering  
2 up these crimes to protect their jobs and their corrupt stock market holdings. Musk and Goldman  
3 Sachs have gotten over FIFTEEN BILLION DOLLARS of free taxpayercash and monopolized  
4 exclusives to pay for *Musk's drugs, sex parties and mansions*. This is one of the largest violations  
5 of anti-trust laws in history. The politicians and agencies that are supposed to stop him are getting  
6 money from him. Musk exists entirely from quid pro quo bribes! Musk's banks, including Deutsche  
7 Bank, have had to pay more than \$100 million to settle charges related to violating anti-bribery laws  
8 and engaging in money laundering. While the Musk-controlled media bloviate on the god-like  
9 image of Musk, he and his buddies are just crooks and mobsters. It is now almost impossible for the  
10 public to reach any media source that is not controlled by the Silicon Valley Cartel via synchronized  
11 talking points. Politicians who say that their only motivation is to "save" the helpless billionaire  
12 Elon Musk and his unicorns: 1.) sabotage any companies who are not making Tesla's, 2.) have sex  
13 with Tesla lobbyists and bankers, 3.) own the stock in Tesla Motors, 4.) are venture capital partners  
14 in Kleiner Perkins (ie: Gore) and Greylock capital insiders, 5.) trade revolving door jobs with the  
15 Elon Musk cartel, 6.) gave Musk over \$15B of free taxpayermoney, 7.) get campaign financing  
16 from Musk, 8.) order government agencies to freeze funding for Musk's competitors, 9.) and engage  
17 in a vast number of other corruption and anti-trust crimes.

18  
19 U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of  
20 dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants  
21 which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix  
22 and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC;  
23 Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets;  
24 Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in  
25 Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those  
26 Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced  
27 "Speaking Engagements" which are really just pay-offs conduited for donors; Private jet rides and  
28 use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake

1 mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts;  
2 The use of HSBC, Wells Fargo, Goldman Sachs and Deustche Bank money laundering accounts  
3 and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley  
4 corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington &  
5 Burling, etc. to conduit bribes to officials. This will never end unless the public demands laws to  
6 prevent all politicians, and their families, from owning ANY stock market stocks or securities!

7  
8 **MUSK AND TESLA:**

9  
10 The Musk empire has paid more bribes to politicians than almost any other modern entity. That is  
11 why no full investigation of the Musk scams has ever been completed. Google's Eric Schmidt and  
12 Larry Page have a bromance relationship with Musk and use the global resources of Alphabet to  
13 hide any negative news about Musk assets. The 2008 Department of Energy Cleantech Crash proves  
14 that a federal agency was used as just one big slush-fund to pay-off political campaign financiers,  
15 operate insider-trading stocks and sabotage those financiers competitors using taPlaintiff 42ayer-  
16 financed resources! We have used private investigator, FBI resources and deep AI research to reveal  
17 that all government staff working on our application were getting quid-pro-quo...they were on the  
18 take. (Can anyone point out to us EVEN ONE person who was in the GOVT/White House loop  
19 who was not working for, invested in, getting a future job from or other wise conflicted?) What do  
20 you do when The U.S. Government convinces you to invest millions of dollars, and your life, into  
21 one of their projects. Then their project turns out to be a scam where they had covertly hard-wired  
22 the upside to a couple of Senator's and their campaign financier friends. The fix was in and the  
23 game was rigged to use a government program as a slush-fund for friends-with-benefits. We, and  
24 the public, got defrauded.

25 Now the damages must be paid for, one way, or another. Every one of the insiders who did  
26 get government funding got it in the exact same size and order as their covert political campaign  
27 funding and stock market bribes to the deciders. Chamath Palihapitiya and other Silicon Valley  
28 insiders have now exposed the fact that Greylock, Kleiner, etc. are just a VC Ponzi Scheme! in this

1 whole mess. Musk used crooked Senators to get his funds. Those Senators and government agency  
2 bosses were financed by, friends with, sleeping with, dating the staff of, holding stock market assets  
3 in, promised a revolving door job or government service contracts from, partying with, personal  
4 friends with, photographed at private events with, making profits by consulting for, exchanging  
5 emails with, business associates of or directed by; one of those business adversaries, or the Senators  
6 and politicians that those business adversaries pay campaign finances to, or supply political search  
7 engine manipulation services to. Elon Musk is notorious for getting Department of Energy money  
8 by bribing public officials and placing his friends: Steven Chu, Matt Rogers, Steve Westly, Steve  
9 Spinner's 'special friend', etc. on the staff of The U.S. Government and in the White House. We  
10 have FBI-class records, financial tracking, emails, stock market relay records and other forensic  
11 data that proves it. We can swear, warrant, certify and prove these assertions in front of Congress in  
12 a live Congressional hearing or Civil Jury trial, given non-compromised legal backing.

13  
14 If you think you have bribed the same number of Senators, bought a President and taken over  
15 most of The U.S. Government like Musk did... go for it! In this day and age, with every citizen  
16 able to track every public figure, with FBI-quality databases, on their home computers, it might be  
17 a crash-and-burn but you are welcome to try. [Lithium metals, and other rare earth mining](#)  
18 [materials, are monopolized by Elon Musk and his Silicon Valley Cartel, in rare-earth corrupt](#)  
19 [mining scams. Lithium's widespread use in cars is hindered by a challenging obstacle: upon](#)  
20 [multiple charge-discharge c](#)Musk and Panasonic have known this since 2007 (They are  
21 "dumping" the batteries via Tesla) and have paid U.S. Senators, who own stock in Tesla, to cover  
22 it up.  
23  
24

25 The lithium fires and toxic vapors are a major safety concern because they have killed,  
26 poisoned and injured too many citizens. Musk gets away with his scams because he pays U.S.  
27 Senators bribes with stocks in his corporations and has a thousand crooked Goldman Sachs  
28 investment bankers selling his hair-brained schemes to your parents pension funds. Tesla is known

1 as "the official car of douche-bags". The safety defect cover-ups on the Tesla are extreme. Musk's  
2 narcissistic trophy-wife mom and his extremist father (who got his young sister pregnant) are  
3 thought to be the cause of Musk's racism and sociopath behaviors. He is the #1 crony capitalist  
4 government mooch in America and has received billions of dollars of your tax money to help him  
5 buy his mansions, starlets and sex parties. His cars and rockets blow up, his tunnels are unsafe, his  
6 satellites spy on consumers and his brain chip company tortures small animals. He swiped all of his  
7 technology from someone else and has never come up with his own inventions. Space-X is just a  
8 domestic spying company. Don't buy Musk's bullshit about Space-X doing any good deeds.  
9 Everything Space-X launches is to spy on the poor folks on the ground and monitor their internet.  
10 Also, Musk's Neuralink company tortures small animals to try out Musk's pseudo-science mind-  
11 reading chips.

12  
13 **GOOGLE:**

14  
15 **THE INVESTIGATIONS OF THE CORRUPTION AT GOOGLE:** Google exists to mass  
16 manipulate populations and run stock market scams for Google's owners. From INSIDE Google,  
17 our team saw Google manipulate the entire internet to hype up Larry Page's "boyfriend": Elon Musk  
18 and Tesla, which Google execs owned a portion of, while sabotaging Tesla's competitors. Google  
19 illicitly and illegally timed these manipulations with stock market pump-and-dump efforts to  
20 ePlaintiff 42loit insider trading. That is a felony violation of RICO, Antitrust and other laws. Every  
21 single thing that Google does is contrived to harm a competitor, a politician, an employee whistle-  
22 blower or some other business adversary. There are no "bugs", "operator errors", "server anomalies"  
23 or other media "accidents" at Google. Everything Google does is contrived, at a psychological  
24 warfare kind of level, to change a social perception. Google must show its software to FBI, SEC,  
25 FTC and our search engine optimisation experts to prove that they did not engage in these crimes.  
26 The fact is: We can prove they did the crimes and FBI experts can help us prove it! Google is  
27 known as the "Nazi's of the Internet". In a case unfolding in Britain over whether Google wrongly  
28 demoted price comparison rival Foundem from its search results in favour of paid-for adverts,

1 Google must now decide which it values more: the algorithms that rank its search results, or its  
2 stance that manually fiddling with those results to promote its own paid-for products over rivals'  
3 sites doesn't break competition laws. The integrity of Google's ranking processes relies upon all  
4 webmasters or website owners having the same degree of access to information about Google's  
5 ranking... This will no longer be the case if information of this kind is made available to some  
6 individuals offering commercial services to assist companies to improve their Search ranking.  
7 Google is a criminal operation.

8         It's executives have been publicly exposed as participants in horrific sex scandals, money  
9 laundering, political bribery and racism. It is time for the bought and paid shill politicians to stop  
10 protecting them! - Google spies on competitors and steals their technology - Google runs tens of  
11 millions of dollars of defamation attacks against competitors - Google hides all media and news  
12 coverage for competitors of Larry Page's boyfriend: Elon Musk - Google lies to the public about  
13 what they really do with the public's data - Google promotes illegal immigration in order to get  
14 cheap labor and control votes - Google runs VC funding back-lists against start-ups that are  
15 competitive - Google bribes thousands of politicians - Google is a criminal RICO-violating  
16 monopoly - Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC  
17 violating computer tricks - Google pays bribes to politicians in Google and YouTube stock - Google  
18 manipulates who gets to see what web-sites, globally, for competitor black-lists - Google has a "no  
19 poaching" Silicon Valley jobs blacklist - Google bosses sexually abuse women and young boys -  
20 Google bosses run sex trafficking operations in the Epstein and NXVIUM cults - Google bosses  
21 control the NVCA financing cartel over start-ups - Google has placed the majority of the corporate  
22 staff in at least one White House - Google controls national elections for anti-competitive purposes -  
23 The company "Polyhop", in the HOUSE OF CARDS tv show, does all the crimes that Google  
24 actually does in reality - Google's law firms, like Wilson Sonsini, are corrupt conduits for payola  
25 and political conduit-relays - Google bribes some politicians with revolving door jobs - Google is  
26 primarily responsible for destroying the Bay Area Housing opportunities.

27         Google runs DDoS attacks on competitors by massively crawling their sites - Google boss  
28 Andy Rubin runs a sex slave farm according to his own family - Google boss Eric Schmidt was a

1 philandering sex-penthouse owner according to vast news articles - Google executives hire so many  
2 hookers that one of them, Mr. Hayes, was killed by his hooker - Google executives sexually abuse  
3 so many women that the women staff of Google walked out one day - In the 2009 White House,  
4 you could not swing a cat without hitting a Google insider - Google has paid covert bribes, PAC  
5 funds, real estate and search rigging payola to every CA Senator - Google has paid bribes, through  
6 its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes - Google was  
7 funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of  
8 cocaine - Google gets millions of dollars of taxpayercash for spying on Americans inside the USA -  
9 Google's map service was a spy system paid for by taxpayers money that Google now profits off of  
10 - Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families  
11 profit off Google stocks.

12 Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for  
13 Character Assassination attacks - Google VC's and bosses have spent \$30M+ rigging the U.S.  
14 Patent Office to protect Google and harm Google competitors - Google bribed it's lawyer into  
15 position as head of the U.S. Patent office in order to have her protect Google - To rig insider stock  
16 trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days" -  
17 Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust  
18 schemes - Google rarely likes, or hires, black employees per federal and news media investigations  
19 - Google hired most of the Washington, DC K Street lobby firms and told them to "do what ever  
20 they could" - The film: "Miss Sloane" depicts only 2% of the illicit lobbying tactics Google  
21 employs daily - Demands for an FTC and FBI raid of Google, for criminal activity, securities law  
22 and election felonies have been filed - Google's David Drummond had his Woodside, CA Quail  
23 Road house bugged revealing sex and financial misdeeds.

24 Google, and it's Cartel (Alphabet, Youtube, and hundreds of other shell-company facades)  
25 are a criminal organization engaged in felony-class crimes. Google's bosses bribe politicians,  
26 regulators and law enforcement officials to hold off prosecution. At Google: Kent Walker, Andy  
27 Rubin, Larry Page, Eric Schmidt, Sergy Brin, Jared Cohen, Yasmin Green, David Drummond and  
28 Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is

1 hard to comprehend how they can get any legitimate work done. Google executives came from most  
2 of the fraternity houses involved in the college rape scandals. Google sells covert character  
3 assassination services to politicians and fellow oligarchs. Youtube/Google/Alphabet/Deep State are  
4 all the same entity. They conspire to hide news about their corruption and they control most of the  
5 internet.

6  
7 **THE TECH CARTEL:**

8  
9 The Silicon Valley tech Cartel (AKA: "Paypal Mafia", "Deep State") is evil because these racist,  
10 ageist, sex-trafficking, money-laundering, elitist, politician bribing, tax evaders: steal any  
11 technology they desire; They manufactured the CLEANTECH CRASH as shown in the 60  
12 MINUTES episode of the same name; they run a prostitution ring and sexually extort young women  
13 and interns in Silicon Valley; they are 'rape culture' take-what-they-want misogynists, ageists and  
14 racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type  
15 collusion and stock market insider trading schemes that harm independent business and the public;  
16 their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers;  
17 90% of their divorce court files reveal horrific abuses and sex trafficking; They have an army of  
18 lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even  
19 evade FBI & SEC investigations; They hire women to act as 'trophy wives' and 'beards'; they have  
20 lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using  
21 stolen technologies; they have been caught on video and recordings beating, kicking and harming  
22 women hundreds of times; They have bought up all of the Tier-One tech law firms and order them  
23 to black-list, and never help, those who seek equal tech rights; they collude to abuse your privacy  
24 and make databases on the public for political control; they have to cheat to compete because they  
25 are only good with spread sheets instead of innovation; They run black-lists, character assassination  
26 attacks, collusion and other anti-trust violating acts in violation of RICO laws.

27         Silicon Valley has become the largest assemblage of douche-bags and yuppie frat boy  
28 criminals in human history. Theranos is not the exception, it is the standard. Tesla, Google,

1 Theranos, Wework, Facebook are lies backed by famous political insiders to protect their insider  
2 trading and covered-up by fake news operators. They are also fronts to fund political campaigns via  
3 the ill-gotten profits from their endeavors. When the bad guys, and their lap-dog politicians, attack  
4 you because your products are better than theirs they are proving that they are frat boy scumbags,  
5 from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road operation  
6 should be raided by the FBI! The best thing that could come from the COVID pandemic is that they  
7 all are forced into bankruptcy! When your Senator holds stock market shares in companies that exist  
8 to profit on the backs of consumers, via corruption, then it is impossible for that Senator to ever do  
9 anything but be corrupt! We have reported this in writing to winklerm@sec.gov,  
10 sanfrancisco@sec.gov and 30+ other federal officers but have yet to see our whistle-blower  
11 rewards...or any action! Do you wonder how big politician insider stock trading is? Take a look at  
12 how many TRILLIONS of dollars pass through the stock markets annually and then look at the  
13 reported, AND UNREPORTED, securities holdings of famous U.S. Senators and government  
14 agency staff. That is what Seth Rich and the people in the "In Memory Of" section, below, were  
15 disclosing.

16         These are massive crimes! The perpetrators operate a massive and abusive national sex cult.  
17 The perverts in the SandHill Road Venture Capital offices, located between Highway 280 down to  
18 to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of  
19 this global cartel. Their executives at Google, Facebook, Netflix, Linkedin, Twitter, and their  
20 related holdings, comprise the rest. The Harvey Weinstein and Ed Buck sex scandals are well  
21 known. These men's sex cult actions have been widely covered in the news individually in the Joe  
22 Lonsdale rape case, The Kleiner Perkins Ellen Pao sex abuse lawsuit, The Eric Schmidt sex  
23 penthouse stories, The Jeffrey Epstein case, The Google Forrest Hayes hooker murder case, The  
24 Andy Rubin sex slave case, The Sergy Brin 3-way sex romp scandal, The British Hydrant  
25 investigation, The Elon Musk Steve Juvetson billionaire sex parties scandals, The NXIVM sexual  
26 slave cases, The Michael Goguen anal sex slave trial, The Tom Perkins Hooker Parties and  
27 thousands of other cases and federal divorce court filings. This group of people have proven  
28 themselves, over and over, to be sociopath control freaks not fit for participation in public

1 commerce, public policy or media control. The Four Seasons Hotel and Rosewood Hotels in Silicon  
2 Valley are estimated to engage in over \$30,000.00 of high-end escort sex trafficking per day, a  
3 portion of it managed by Eastern Bloc Mafia operators. The Elon Musk sex perversions are the tip  
4 of the iceberg.

5 At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these  
6 Cartel members. Google boss David Drummond engaged in horrible philandering sexual violations  
7 of his wife yet Google covers up every story about it on the web. Google's Eric Schmidt is under  
8 massive investigation. You hear about the female victims of this sex cult but you rarely hear about  
9 the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls  
10 and boys are paid "not just for sex but for the oligarch's endless need to feel that they can control  
11 anyone for any reason...". Multiple attorney general's controlled by their cartel, ie: Eric  
12 Schneiderman and Eliot Spitzer, are involved this these sex rings. These are the main influencers of  
13 a national political party and they are all involved in horrific sex perversions and abuses! All Silicon  
14 Valley tech cartel media companies work together to censor all news and information in order to  
15 hide coverage of their dirty deeds and to only put politicians in office that will give the Cartel  
16 political payola, kick-backs and insider stock pumps.

17 The Smedley Butler "Business Plot" from the past is not unlike the coup that Google and  
18 clan tried. See details in Emily Chang's book: BROTOPIA; Roan Farrow's book: CATCH & KILL;  
19 Edward Snowden's Book: PERMANENT RECORD; Peter Schwetzer's book: THROW THEM  
20 ALL OUT; Dave Eggers book: THE CIRCLE; Franklin Foer's book: WORLD WITHOUT MIND;  
21 Corey Pein's book: JOURNEY INTO THE SAVAGE HEART OF SILICON VALLEY; Dan Lyon's  
22 book: DISRUPTED; Antonio Martinez book: CHAOS MONKEYS. The Angelgate, Epstein, No-  
23 Poaching DOJ Class Action, and hundreds of other cases, prove that they meet, conspire, collude  
24 and blacklist in felony violation of anti-trust and RICO Racketeering laws. - 90% of these guys  
25 came from 100% of the fraternity houses involved in the recent college rape cases.

POLITICAL KILL ORDERS AND STATE-SPONSORED CHARACTER ASSASSINATIONS -  
How A Modern Character Assassination and Political "Kill Order" Is Executed By the Silicon  
Valley Oligarchs and their total control of propaganda media. Patrick George At Jalopnik attacks  
outsiders under contract with Elon Musk and the DNC. Silicon Valley campaign finance oligarchs  
hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their  
financial partnership with the DNC's Google to push the character assassination articles to the top of  
Google web products and searches. Patrick George, Adrian Covert, John Hermann and Nick Cook  
are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick  
Denton. They created the Fake News crisis in the media by flooding the internet with defamation  
posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They  
coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik,  
CNN, New York Times and other propaganda outlets. These Millennial boys are "Media Rapists"  
and should be treated as abusers. - How and why did a Donald Trump stripper-date named "Stormy"  
or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein  
indiscretions suddenly hit the news at about the same time in news history? - In addition to actual  
murder, Politicians and Silicon Valley Oligarchs hire operatives to end people's lives in other  
creative ways. - It is all part of the modern trend in vendetta, revenge and political payback when a  
Senator or a tech oligarch issues a "kill order" on an opponent.

The client does not like to get their hands dirty so the actual social hit job is performed by  
companies such as: IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media  
- (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS -  
(DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter -  
(DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC);  
Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Undercover  
Global Ltd (DNC/GOP) Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP);  
Cambridge Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm  
Sunshine Sachs (DNC); Covington and Burling - (DNC), BuzzFeed - (DNC) Perkins Coie - (DNC);

1 Wilson Sonsini - (DNC) and hundreds of others...These are the people and companies that except  
2 cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech  
3 companies, prostitutes and real estate in exchange for destroying the lives of others. - These  
4 attackers deserve to be punished for the rest of their lives for taking away the lives of others in  
5 exchange for cash. Any company who is corrupt enough to hire any of these assassins should be  
6 forced out of business. These attack services are responsible for 90% of the "Fake News" problem  
7 in the world because they are the authors of most fake news. Congress must act to make these kinds  
8 of companies illegal! - These digital assassination services offer hit-jobs, character assassinations  
9 and economic reprisal programs to famous billionaires and corrupt politicians who are seeking  
10 revenge, retribution and vendetta executions. - In the case of reporters getting targeted for attacks,  
11 President Donald Trump has been accused by the liberal corporate media of whipping up a hateful  
12 frenzy against the press. But while CNN's Jim Acosta grandstands against Trump, real journalists  
13 are still reeling from the draconian extrajudicial measures that Barack Obama and his administration  
14 used to target them for ePlaintiff 42osing truth. - This secretive targeting occurred while Obama  
15 speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running "Operation Echo  
16 Chamber," which reportedly continues, in which he fed information to willing corporate media  
17 scribes. "They literally know nothing," Rhodes said of the twentysomething journalists he easily  
18 manipulated. - The Freedom of the Press Foundation's Trevor Timm published documents showing  
19 how former attorney general Eric Holder changed the rules to more effectively intimidate and  
20 surveil members of the press. - Timm writes: "Today, we are revealing—for the first time—the  
21 Justice Department's rules for targeting journalists with secret FISA court orders. The documents  
22 were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press  
23 Foundation and Knight First Amendment Institute at Columbia University."

24 Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President  
25 Trump's team, as evidenced by Peter Strzok and Lisa Page's texts confirming that Obama was  
26 overseeing their fly-by-night operation. - Larry Schweikart reported for Big League Politics: For  
27 months pundits and researchers have been pondering the mystery of the FISA approval that led to  
28 the illegal and historically titanic scandals to ever hit The U.S. Government . Some have argued that

1 Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it. Others  
2 have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA  
3 when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI.  
4 This is what President Trump calls “SPYGATE”. - It may well be that the surveillance that was  
5 conducted began with UK intelligence services and then was fed back to the White House of Barack  
6 Obama. Here’s the kicker: President Barack Obama did not need a FISA warrant to authorize  
7 spying/electronic surveillance on Trump because Obama all along had legal authorization to by-  
8 pass the normal court vetting process. According to 50 U.S. Code 1802, the “Electronic  
9 Surveillance Authorization” () “Foreign intelligence in relation to a US person (Trump or his  
10 associates) is information that’s necessary for the US to protect against attack, hostile acts,  
11 sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information  
12 relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S.” Such  
13 an authorization by Obama required certification by Attorney General Loretta Lynch that must be  
14 logged with the FISC court. (“The [AG]+ shall immediately transmit under seal to the court [FISC]  
15 a copy of his certification.”) - In short, the DOJ has this. If we are correct, a copy of that  
16 certification is currently under seal at least with the DOJ and the FISC. - This is what they are  
17 hiding. - However, the Act requires the AG to keep the Select Committee on Intelligence and the  
18 Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See  
19 1803 (a) (1) (C) If indeed this is what happened, did Lynch report—or only selectively report—to  
20 the committees in a way that excluded non-friendlies? Can you see why Adam Schiff, Mark  
21 Warner, and their ilk are terrified? - These are the playbook tactics that Senators and tech oligarchs  
22 most often use to destroy the lives of their political and business enemies: - Government agency  
23 bosses sometimes solicit the target victims with false promises of future loans, contracts or grants  
24 from their agency and cause the target victims to ePlaintiff 42end millions of dollars and years of  
25 their time for projects which those government bosses had covertly promised to their friends. They  
26 use the target victims as a “smokescreen” to cover their illegal government slush-funds for the  
27 victims competitors and personal enemies. By using this tactic, the attackers can drain the target  
28 victims funds and force them into an economic disaster in plain view of everyone without the

1 government bosses fearing any reprisal for their scam.-

2       Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-  
3 owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their  
4 profiles, texts, and inter-member communications, since those companies were started, hacked or  
5 purchased. The attack service providers use Palantir and In-Q-Tel financed data analysis software to  
6 analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and  
7 social conflict exploitation opportunities. If you had a bad date with someone, that someone will be  
8 hunted down and convinced to help harm, #metoo or "rape charge" the intended target. All dates  
9 involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each  
10 persons dating history is high. Searching every past dating email and text of a subject is quite easy  
11 with modern software and hacking techniques. A synthetically amplified, PR-agency optimized sex  
12 scandal can destroy any target. Your dating experiences from the 70's or 80's will come back to  
13 haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were  
14 unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your date  
15 for sex" and related twisted narratives that are designed to shame you, the target. If you try to get a  
16 date in the future, your potential date will be contacted by a third party who will slander and libel  
17 you to make sure your potential first date gets cancelled. Your social life will, essentially, end.  
18 Every photo on every dating site is cross checked with every other photo on the internet in order to  
19 cull your Facebook, Linkedin, Snapchat and other social media together to create a total  
20 psychological manipulation profile data file on you. A single photo on a dating site can be cross  
21 searched on every mugshot archive, photo album and corporate database in the worth within  
22 minutes using modern super-computers. Your sex life will be on public record in a flash.- Social  
23 Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are  
24 "lost". Files in the application process "disappeared". Lois Lerner hard drive "incidents" are  
25 operated in order to seek to hide information and run cover-ups. - Government officials and tech  
26 oligarchs contact members of the National Venture Capital association (NVCA) and created  
27 national "black-lists" to blockade target victims from ever receiving investor funding. This was also  
28 confirmed in a widely published disclosure by Tesla Motors Daryl Siry and in published testimony.

1 If Silicon Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal  
2 and the "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding  
3 again. - FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially  
4 responded to in order to seek to hide information and run cover-ups.- State and federal employees  
5 will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that  
6 they, the government officials, had stonewalled and obfuscated applications for, in order to force  
7 these deadlines that they set, to appear to be missed. This can bankrupt a target victim.- Some  
8 Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy  
9 metals and toxic materials were found right after their work with The U.S. Government weapons  
10 and energy facilities. Many wonder if these “targets” were intentionally exposed to toxins in  
11 retribution for their testimony.

12       The federal MSDS documents clearly show that a number of these people were exposed to  
13 deadly compounds and radiations, via GOVT, without being provided with proper HazMat suits  
14 which GOVT officials knew were required. - Victims employers are called, and faxed, and ordered  
15 to fire target victims from their places of employment, in the middle of the day, with no notice, as a  
16 retribution tactic. - On orders from Obama White House officials, DNC-financed Google, YouTube,  
17 Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks  
18 this attack media on the internet on the top line, of the front page of all Google searches for a  
19 decade in front of 7.5 billion people, around the world. This attack-type uses over \$40 million  
20 dollars in server farms, production costs and internet rigging. The forensic data acquired from  
21 tracking some of these attacks proves that Google rigs attacks against individuals on the internet and  
22 that all of Google’s “impressions” are manually controlled by Google’s executives who are also the  
23 main financiers and policy directors of the Obama Administration. This data was provided to the  
24 European Union for it’s ongoing prosecution of Google’s political manipulation of public  
25 perceptions. - Victims HR and employment records, on recruiting and hiring databases, are  
26 embedded with negative keywords in order to prevent the victim targets from ever gaining future  
27 employment. - Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in  
28 these matters, turned up dead under strange circumstances. It is very possible that some of these

1 attack services, operated by former CIA operatives, even offer discrete murder-for-sale services  
2 using high-tech assassination tools that make murders look like heart attacks and brain failures. -  
3 Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost  
4 records and "missing hard drives" as in the Lois Lerner case.- Paypal (A DNC-biased operation) and  
5 other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order  
6 to terminate income potential for target victims who competed with the attackers interests and  
7 holdings.- DNS redirection, "website spoofing" sends target victims websites to dead ends where no  
8 sales orders or customer inquiries actually get back to the target.

9       These internet revenue activity manipulations are conducted using Google and Amazon  
10 servers. All commercial storefronts and on-line sales attempts by target victims, will have had their  
11 sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas  
12 or Palo Alto, California in order to terminate revenue potentials for the target victims.- Over 50,000  
13 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and  
14 disinformation about victims in front of 7.5 billion people around the world on the internet in order  
15 to seek to damage their federal testimony credibility by a massively resourced facility. - Campaign  
16 finance dirty tricks contractors are hired by campaign financiers to attack the friends and family  
17 members of the target victim in order to create low morale for the target victims psyche and  
18 motivation.- Are you getting weird headaches and hearing a "buzzing sound" in your head? The  
19 U.S. Government has now acknowledged that the Cuban, Chinese and other embassy "sonic  
20 attacks" are from a known microwave beam weapon. Any one of the technical departments of the  
21 attack services listed at the top of this article can build such a biological harassment weapon. It can  
22 be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological  
23 and emotional damage using a weapon that has no visible track of trajectory. It is designed to make  
24 the target victim think they are "going crazy" or "hearing sounds in their head".- In one case covert  
25 political partner: Google, transferred large sums of cash to dirty tricks contractors and then  
26 manually locked the media portion of the attacks into the top lines of the top pages of all Google  
27 searches globally, for years, with hidden embedded codes in the links and web-pages which  
28 multiplied the attacks on Victims by many magnitudes.- Covert Cartel financier: Google, placed

1 Google’s lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of  
2 the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting  
3 employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the  
4 vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology  
5 theft and a number of those lawsuits refer to Google’s operations as “Racketeering”, “Monopolistic  
6 Cartel” and “Government Coup-like” behaviors. Thousands of articles and investigations detail the  
7 fact that Google, “essentially” ran the Obama White House and provided over 80% of the key  
8 White House staff. A conflict-of-interest unlike any in American history. Google’s investors  
9 personally told Victim/Witnesses they would “kill him”.

10 Google and the Obama Administration were “the same entity”. Victim/Witnesses testified in  
11 the review that got Michelle Lee terminated and uncovered a tactical political and social warfare  
12 group inside Google who were financed by Federal and State funds. - Honeytraps and moles were  
13 employed by the attackers. In this tactic, people who covertly worked for the attackers were  
14 employed to approach the “target” in order to spy on and misdirect the subject. - Gawker Media,  
15 Gizmodo Media, Snopes, SPLC and other hired media assassins will be retained to produce "hatchet  
16 job" character assassination articles about you. Then those articles will be faxed, mailed and  
17 emailed to your employer and investors with a note saying: "You don't want to have anything to do  
18 with this person, do you..?" in order to get you fired from your job and get your loans or financing  
19 pulled. The attackers will use their round one attack media, that they authored, to create a round two  
20 second wave attack designed to end your life via economic warfare.- Mortgage and rental  
21 applications will have had red flags added to them in databases to prevent the targets from getting  
22 homes or apartments.- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most  
23 major IT publications have reported that hundreds of spy "back-doors" have been found on every  
24 Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and  
25 hardware component set. This means that any kid with the "key" code can open any computer,  
26 server, router, cloud-network or other network connected device and read every file, photo, video,  
27 your calendar and email on your devices at any time from any location on Earth.

28 The key codes have been released to every hacker community in the world for over ten

1 years. There is now no government, corporate or personal data that can't be hacked, even data from  
2 decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60  
3 minutes, or less. Important meetings you had planned with potential investors, employers, clients,  
4 dates, suppliers and others will suddenly get cancelled at the last minute. They will get cancelled  
5 because your enemies are reading your calendar remotely and covertly sending slander information  
6 to those you had hoped to engage with in order to sabotage your life. Nothing you have ever typed  
7 on a computer or Smartphone is safe. it WILL be acquired and it WILL be used against you. -  
8 McCarthy-Era "Black-lists" are created and employed against target victims who competed with  
9 Obama Administration executives and their campaign financiers to prevent them from getting  
10 funding and future employment. - [Obama Administration](#) targets were very carefully placed in a  
11 position of not being able to get jobs, unemployment benefits, disability benefits or acquire any  
12 possible sources of income. The retribution tactics were audacious, overt..and quite illegal. - There  
13 are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress  
14 refuses to pass laws out-lawing such attack services. The cost of an attack on a person ranges from  
15 \$150,000.00 to over \$50,000,000.00. While a Silicon Valley billionaire can afford to launch  
16 counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of  
17 fighting back, against even the smallest version of one of these "kill orders".

18 A number of modern office shootings are the results of these attacks against an individual  
19 who has lost everything because of the attack and has no options left. - Federal law enforcement, the  
20 United States Congress and the highest level investigators in the U.S., and abroad, have documented  
21 (per the "FISA Memo", Congressional Reports and federal employee testimony) and proven the fact  
22 that the Obama Administration regularly engaged in the operation of retribution, vendetta and  
23 reprisal campaigns known as "hit-jobs" against domestic natural born U.S. citizen domestic  
24 taxpayers. The Federal Court, in at least one previous court case, has ruled that Victim/Witnesses,  
25 in this particular matter, were the victims and target of a number of these attacks designed to inflict  
26 permanent medical, emotional, character assassination, brand negation, economic and career  
27 damage. The FBI has been asked to interview John Cook, Nicholas Guido Denton, Adrian Covert,  
28 Patrick George, Ian Fette and John Hermann of Gawker/Gizmodo re: their financing, payola and

1 hit-job attacks on third parties.

U.S. House of Representatives  
**Committee on Oversight and Government Reform**

The Department of Energy's Disastrous Management of Loan Guarantee Programs

STAFF REPORT  
U.S. HOUSE OF REPRESENTATIVES  
112<sup>TH</sup> CONGRESS  
March 29, 2012

**THE U.S. CONGRESS REPORTED:**

"After conducting a substantial review of the Department of Energy's (DOE) loan guarantee program, it is clear that the significant losses absorbed by taxpayers as a result of Solyndra's collapse is just the beginning. The investigation conducted by the House Committee on Oversight and Government Reform has uncovered numerous examples of dysfunction, negligence and mismanagement by DOE officials, raising troubling questions about the leadership at DOE and how it has administered its loan guarantee programs. ... DOE has overseen a process wrought with misdirection, changing and expanding requirements, unexplained delays, gross mischaracterizations, and a never-ending cycle of excuses. Not only does it appear that DOE purposely directed taxpayer funds at a failing enterprise, DOE's action robbed taxpayers of genuine investment toward renewable energy."

# Google controls what we buy, the news we read – and Obama’s policies

By Kyle Smith March 26, 2014 | 10:45pm

Photo: AP/Wide World

 **KYLE SMITH**

**Ford and Herlihy's Twitter's totally legit**

**Dearden's 'Welcome to New York' is a boring retelling**

**'The Red Duke' is an angry take-down of rich British boys**

**Kenny Schmidt shows the irrelevance of NBC**

It's 2010. The New England Patriots, winners of six straight Super Bowls, are having yet another routine meeting with the Commissioner's Office.

Deputy NFL Commissioner Tom Brady and his chief of staff, Rob Gronkowski, OK a rule change that forgives the Patriots for illegally taping other teams and deflating football over the preceding years. Meanwhile, members of the Patriots continue to happily contribute funding for the commissioner's new 43-room castle in Turks and Caicos, and Bill Belichick agrees to continue coaching the commissioner's 13-year-old son in Pop Warner football.

Would that bother anyone? Because the above is pretty much going on today, only the team is called Google and the commissioner is the president of the United States.

# Who Wins the White House “Green Energy” Gamble?

Since the 2009 “Stimulus”, the Department of Energy has spent more than \$15 billion on 26 “green energy” projects.

Many are risky bets made with your hard-earned tax dollars. So let’s see who is really winning President Obama’s green energy gamble...

**\$90.6 MILLION**

MASTER RESUME AND HISTORIC INVESTIGATIONS TIMELINE (In Near-Final Edit  
As Dates And Documents Are Being Cross-Checked) Rev. 2.6

XXXXXXXXXXXXXXXXXXXXX REDACTED

2000 -

\* 2000 - California Department of Consumer Affairs Investigator - credentialed active  
coordinator

\* 2000-2008 - Investigative Consultant to Congressional and journalism organizations

\* 2009- 2018 - Assisted agencies in one of the largest anti-corruption projects in the last  
decade. Recipient of White House and Congressional Commendations and Federal Grants.  
Instrumental in creating multiple federal laws and legal precedents. Designed key sting-operation  
protocols. Created first digital crowd-sourced law enforcement technologies. Received multiple  
federal patents on IC and LE technologies. Multiple high-profile white-collar case wrap-ups Also  
related are: SFPD Case # 150528148 ( - Company E (Northern District) Per Officer Liu – Badge #  
4742 ) is relevant. Master case # Case # 22-cv-01107-TSH in Northern District is key case matter.  
Police incident report # 25119268 is relevant. OSC Case File No. MA-19-002006 is relevant. OSC  
Case File DI-15-4541 is relevant. California Victim Compensation & Government Claims Board  
Claim # G628261 is relevant. Also relevant are: Case No. 1:20-cv-03010 ( Google monopoly and  
competitor attacks case); Case No. 11-CV-2509 ( [https://www.cand.uscourts.gov/judges/koh-lucy-  
h-lhk/in-re-high-tech-employee-antitrust-litigation/](https://www.cand.uscourts.gov/judges/koh-lucy-h-lhk/in-re-high-tech-employee-antitrust-litigation/) ); Task force Case No. 20-xyz2020a (

1 <http://www.case-xyz2020a.com/> ); Case No. 20-03664 (

=====

2001 -

\* The Day - Sept 11, 2001 - September 11, 2001, For 50 minutes, from 8:15 AM until 9:05 AM, with it widely known within the FAA and the military that four planes have been simultaneously hijacked and taken off course, no one notifies the President of the United States. It is not until 9:30 that any Air Force planes are scrambled to intercept, but by then it is too late. This means that the National Command Authority waited for 75 minutes before scrambling aircraft, even though it was known that four simultaneous hijackings had occurred, an event that has never happened in history. [Sources: CNN, ABC, MS-NBC, The Los Angeles Times, The New York Times.] Afghanistan at that time was targeted for rare earth mining by Big Tech oligarchs. 2 of Plaintiff 22's business associates were in the planes and one was in the towers, including Daniel M. Lewin, Co-Founder and CTO of Akamai who had been in partnership discussions with

\* U.S. PATENT AWARD --- Internet Video Broadcasting invention patent. Federal patent awarded as first-to-invent. Before YouTube, Hulu, Vudu, Netflix Streaming, Sony VUE, Napster, Bittorrent or Kontiki existed, XXXXXXXXXXXXXXXXXXXXXXXX did everything that those later competitors did before any of them even existed. XXXXXXXXXXXXXXXXXXXXXXXX received multiple US patents confirming him as first-to-invent and deliver web video-on-demand. XXXXXXXXXXXXXXXXXXXXXXXX designed, built and patented some of the first video-on-demand hardware devices. He was the first person to present internet video-on-demand to a full Sony Pictures international Board Meeting and his work-group is featured in Sony Pictures patent filings. XXXXXXXXXXXXXXXXXXXXXXXX patent filings and NDA's show that he designed, engineered, patent filed and produced the touch-screen, MP3 cell phone before Steve Jobs and Apple did and before any internal communications at Apple discuss the "iPhone". The patent office has credited XXXXXXXXXXXXXXXXXXXXXXXX as the first to invent chunks/torrents/bits as a web media broadcast method. XXXXXXXXXXXXXXXXXXXXXXXX designed, built and patented some of the first video-on-demand hardware devices. XXXXXXXXXXXXXXXXXXXXXXXX designed, built and patented some of the first video-on-demand hardware devices.

2002 -

\* U.S. PATENT AWARD --- Electronic ion propulsion micro-thrusters invention patent. Federal patent awarded as first-to-invent by showing the U.S. Patent Office directors an in-flight entirely electric beam energy powered drone in flight in the conference room of Intel's patent attorney team, who verified the veracity of the flight. XXXXXXXXXXXXXXXXXXXXXXXX patent over-wrote NASA's patent on the technology which had been covert until the USPTO was forced to reveal it inXXXXXXXXXXXXXXXXXXXXX patent prosecution. These devices are now in use in orbit and in deep space.

\* Plaintiff 22 XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX Congressional awards, innovation awards, federal grants, commendations and has received hundreds of letters of references from top policy leaders, corporate executives, past clients and employers. A "patent" is a filing of a claim with the U.S. Government. You 1.) file a notice that you have invented something. Then 2.)the U.S. Government files a notice back to you saying "nope, no you didn't, prove it...3.)" Then you file things that prove that you were the first, original, inventor of that thing. 4.) Then the U.S. Government uses it's entire compliment of investigation and research tools to confirm if you were really the inventor. You can't just "pay some money and get a patent". In those rare cases when 5.) the U.S. Government awards you a patent, it means that the entire U.S. Government has decided to stand behind you and say: "Yep, we checked it out, this guy really is the one who invented this thing!". Getting a patent is a big deal because it means that years of federal investigation has confirmed that you really were the one who created that thing.

HISTORIC LEGAL AND INVESTIGATIONS CASE TIMELINES -

- 1978 Mayor Dianne Feinstein and other senior city officials issue proclamations and letters of acclaim for Plaintiff [REDACTED] accomplishments.
- 1979 Daughter of Dianne Feinstein stays at Plaintiff 22’s house on numerous occasions, Her best friend is Plaintiff 22’s room-mate, disclosing unsavory activities of her mother.
- 1980 Plaintiff 27’ begins first inflatable & car projects. Builds over 100 major inflatable projects.
- 1987 Plaintiff 22 runs mayoral campaign against two parties who are supported by Dianne Feinstein. The other parties are charged with corruption by local newspapers. Feinstein promises retribution. Feinstein orders Supervisor Carol Ruth Silver to : “take him out” politically

1 and career-wise Silver reveals to Plaintiff 22. Of the targets that Plaintiff 22 is up against. One is  
2 removed from public office permanently. One is placed in Federal prison. Both are placed under  
3 long term law enforcement surveillance.

4 • 1995 Plaintiff 27 develops solid state energy storage solution

5 • 2002 Energy Storage Patents filed, Issued 2006

6 • 2002 Fuel Cassette® Patents Filed, Issued 2008

7 • 2005 DOE Grants project \$1,200,000 value/\$895,000 cash to help reduce America's  
8 dependence on oil in Iraq War Bill

9 • 2006 Vehicle project formed for car project and power plant production effort split off  
10 for vehicle to become Plaintiff 30.

11 • 2006 Plaintiff 27, LLC organizes extension of Plaintiff 22's associated patents  
12 \$100,000,000+ of IP and cash and services for project collateral.

13 • 2006- Ford, GM & Chrysler begin to receive reports from their financial departments  
14 that distributor and UAW contracts are crushing their revenue streams beyond a pre-set margin-of-  
15 tolerable-profit-reduction.

16 • X Prize group first discusses potential automotive Plaintiff 42rize.

17 • Oct. 15, 2006 www.Plainiff 42carteam.com URL created by our project.

18 • April 11, 2007 On Plaintiff 22's birthday, Automotive Plaintiff 42RIZE officially  
19 announced. Plaintiff 42 states that they intend to enter.

20 • 2008 MOU signed with Plaintiff 30/FST for all stock acquisition upon DOE funding.

21 • Sept. 2008- Plaintiff 42 advised of Section 136 funding by Pelosi and Boxer offices.  
22 Staff advise Plaintiff 42 to only apply for \$45M right now because "GM, FORD & CHRYSLER  
23 have the rest of the money hardwired for themselves". Plaintiff 42 needs \$100M but Pelosi says  
24 they will get another \$25B for ATVM in the next congressional cycle.

25 • 2008- ATVM program is funded for \$25B.

26 • In October of 2008 we were informed by Barbara Boxer's office that the Section 136  
27 ATVM loan program was about to be released for application. We had our full application  
28 submitted to the ATVM program within days of the opening announcement and were informed we

1 were the first applicant by ATVM staff.

2 • In late November we attended an approx. 15 minute meeting at the DOE ATVM office  
3 in Washington DC after flying 4 people there at our expense in which we turned over a massive  
4 stack of customer letters of support, which was eventually lost by DOE. We asked if they needed  
5 any information or needed to talk to us for any additional information and they said no.

6 • Plaintiff 22 attended a group presentation by DOE on DEC. 1 which was videotaped and  
7 in which DOE staff contradicted each other on those tapes.

8 • On 12/10/08 – met with Melanie Nutter at Nancy Pelosi’s office she said she would  
9 inquire on the status but was unable to get DOE to provide information.

10 • On 5/28/09 met with Jason Gerbsman, the DOE CFO’s aid for 30 minutes in  
11 Washington DC in which we were told by the DOE CFO’s aid that everything was in order,  
12 Everything looked good and we appeared to be fully compliant and passed technical review.

13 • Our office made at least 20 phone calls and sent over 20 emails over the last year asking  
14 if any additional information could be provided and when technical or production reviews might  
15 take place that we needed to plan scheduling for as we were informed that Fisker, A123, Enerdel,  
16 Tesla and a number of other applicants who had applied months later than we had were already  
17 deeply in those kinds of meetings and interviews. At one point we were told by Brent Peterson that  
18 our application was small and simple enough that we did not require such extensive review.

19 • In early February, 2009, we were informed by Nancy Pelosi’s office that the Loan  
20 Guarantee program existed and that we appeared to meet the criteria for successful application.

21 • We emailed the Loan Guarantee program stating our intent for our energy group to  
22 apply and confirming if the program was still intact.

23 • After research it appeared that the application fees were prohibitive and we inquired  
24 about that..

25 • We were then invited to attend, virtually, via webcam a senate energy committee  
26 hearing chaired by Senator Bingaman in which dramatic changes and repairs to the program were  
27 discussed as intended actions including waiving the fees and in which the loan program was  
28 admonished by consultants brought in by the committee for problematic management and fees and

1 process structured in an exclusionary manner. Videotape of this testimony is available on the Senate  
2 Committee website.

3 • We were then invited to a conference call with John Podesta, Steven Chu and Ken  
4 Salazar in which Mr. Chu stated his intention to waive the application fees. Audio tape of this  
5 evidence is available.

6 • A number of news stories were then published stating the intention of Mr. Chu to waive  
7 the fees.

8 • We then submitted our application with a cover letter stating that we understood that Mr.  
9 Chu was waiving the application fees.

10 • We then received a call from Myrtle Gross of DOE on Feb. 26 stating that we did need  
11 to pay the fees and that we needed to wire money by midnight Feb. 26. We contacted a few new  
12 investor leads to source the funds for this but they were unable to turn around the funding request  
13 on short notice. Our cash investor to-date IS DOE, thus we had hoped, in addition to Mr. Chu's  
14 waiver intention, to also receive an investment of the fees by DOE.

15 • On Feb. 27 we assumed we had missed the deadline but we then received a call from  
16 Linda Baultal (sp?) of DOE stating that there was a few days flexibility so we reinitiated the  
17 investor search for the application fees. We then received a call from Dan Tobin who reconfirmed  
18 some flexibility on the time to wire the money and we reconfirmed that our investor search was  
19 continuing.

20 • Our investor liaison, Stephen Lasser, then found multiple possible sources of funding for  
21 the fees, but the investors required the response to a few questions from DOE. 6+ phone calls were  
22 placed to DOE by Stephen Lasser, who is working with Plaintiff 30 on behalf of a group of  
23 investors, others by myself and associates, but his calls have not yet been returned. Without the  
24 feedback from DOE to Mr. Lasser and thus to the investors, Plaintiff 30 is in "hold" mode. The last  
25 communication was a call between Mr. Lasser and Dan Tobin, weeks ago, in which Mr. Tobin  
26 promised to review the application and respond re: initial applicability. This was the call that the  
27 investors were waiting for in order to release funds. We now find that the promised call was in fact  
28 intentionally not made until after the deadline had passed on orders from Lachlan Seward to Dan

1 Tobin.

2 • Our energy group also submitted an additional ATVM loan application for our battery  
3 technology on 2/1/09. This other ATVM application was rejected twice for reasons that were totally  
4 inapplicable particularly because, according to Lachlan Seward: “The technology did not apply to  
5 electric cars”, when, in fact the technology had been funded in part by DOE SPECIFICALLY for  
6 electric cars, was noted in the IRAQ WAR BILL by congress as being for electric cars, had issued  
7 US Patents on it for electric cars and specifically stated in the application that it was for electric  
8 cars.

9 • We are now informed that a decision on Aptera, Plaintiff 42 Vehicles, ECO-Motors and  
10 a number of other smaller companies had been made back in December by ATVM staff to not fund  
11 any of the companies who’s “political consequences” were minimal. It appears that only big  
12 contributors or those backed by big contributors got fair consideration. Brent Peterson stated that  
13 the reviews and considerations had been conducted far earlier in the year. This amounts to  
14 misrepresentation by causing the companies to extend risk, liability and payment promises based on  
15 “reasonable ePlaintiff 42ectations and promises” which certain DOE staff knew that they had  
16 already negated.

17 • 2008- Plaintiff 42 is the first to enter application for ATVM loan.

18 • 2008- Detroit big 3 realize that 2 clauses in Section 136 bill could allow competing and  
19 electric car companies, not in Detroit, to get funded. They send their lobbyists on a war to pull the  
20 money from ATVM program and put it into TARP so they can get it as an easy hand-over via  
21 TARP. Big late night fight (on CNN) over this goes back and forth in Congress and ATVM gets to  
22 keep the money at the last minute due to a missed phone call between lobby group and GM.

23 • 2008- Plaintiff 30 enters Loan guarantee application. This is the second of the team’s 3  
24 applications.

25 • 200X- Plaintiff 30 enters ATVM application. This is the 3rd of the team’s 3  
26 applications.

27 • Dec. 2008- Plaintiff 42 group goes to Washington DC to meet with DOE, senate &  
28 congressional representatives.

1 • Dec. 2008- In meeting at DOE HQ in front of applicants, press and industry leaders.  
2 Plaintiff 22 questions Lachlan Seward on ATVM rules which do not seem to make sense. Seward is  
3 unhappy with this being discussed. Transcript of session and videotape of session show two  
4 different experiences. (Videotape needs to be subpoenaed.)

5 • Dec. 2008- Plaintiff 42 group goes to Washington DC again to meet with DOE, senate  
6 & congressional representatives.

7 • Dec. 2008- Lachlan Seward states to certain of his staff that Plaintiff 42 is “Not getting  
8 any funding from here”.. and that it will be “a cold day in hell when they get ATVM money..”

9 • Dec. 31, 2008- The date by which the \$25B was supposed to have been dispersed per  
10 Detroit’s emergency financial need as originally set in the drafting of the Section 136 ATVM bill.  
11 Detroit is taken aback by clause inserted in ATVM at last minute that you can’t get the funding if  
12 you are considering bankruptcy. They adopt the tactic: “if we can’t get it, nobody else will either”  
13 according to DOE staff friendly to Plaintiff 42. Based on assertions by Senate & congressional staff,  
14 U.S. Attorney’s and U.S. law scholars, and DOE staff, per the reading of Section 136, Plaintiff 42  
15 ePlaintiff 42ected funds to arrive by Dec. 31 or at least by Jan. 20, 2009. Plaintiff 42 maintained  
16 operations at a level equal to the ePlaintiff 42ectation based on assertions from those parties for  
17 over 8 months and, thus, felt “hoodwinked” by those assertions which caused substantial economic  
18 harm to Plaintiff 42.

19 • Sandia National Laboratory agrees to work with Plaintiff 42 and supplies letter proving  
20 Plaintiff 42 power plant technology to be leading solution worldwide.

21 • Jan. 2009- 23 applicants submit “Substantially Complete” ATVM applications and only  
22 5 of them are car companies, the rest are parts suppliers. (see Seward interview with Parts supplier  
23 confirming this) DOE tells congress that if Banks can review commercial loans in 4 weeks then  
24 they can review 5 car company applications in the same time period. Detroit orders lobbyists to  
25 order their connections to delay the loans until the applicants go out of business.

26 • Plaintiff 42 places multiple calls to Carol B. at DOE and others asking how Plaintiff 42  
27 can assist in the technical review. Plaintiff 42 is told the technical review on Plaintiff 42 is  
28 “complete”. Plaintiff 42 asks how that could be when nobody from DOE every contacted any

1 technical staff at Plaintiff 42.

2 • Plaintiff 42 receives a letter from DOE stating that its ATVM application is  
3 “Substantially Complete”.

4 • Plaintiff 30 electric car power plant application for Loan Guarantee program is  
5 stonewalled by Tobin at DOE on orders from Seward at DOE ATVM program. Tobin refuses to  
6 reply as promised until after payment deadline has passed, thus cutting off the project from funding  
7 via that route. Matt Rogers and Steve Spinner at DOE direct Tobin to avoid Plaintiff 42 related  
8 funding because Plaintiff 42 has filed complaints with the Senate Committee on Environment, the  
9 overseers of the DOE.

10 • Plaintiff 42 places multiple calls to Steve Rattner at White House. He states that he has  
11 no intention of assisting anyone but the Detroit big 3. Rattner directs Seward on a weekly basis.  
12 Seward is shown at White House in White House logs on multiple occasions with Rattner.

13 • Jan. 2009- Venture Capital groups agree to not issue any term sheets for ATVM  
14 applicants until after they see the DOE term sheet. This gives DOE the power to kill off any car  
15 company it wants to by an interminable delay process. Tesla’s former head of Marketing publishes  
16 an opus calling out DOE for blocking funding for electric car companies. (Remember that this is at  
17 the peak of the recession)

18 • Jan. 2009- ATVM Director Lachlan Seward assigns DOE staff to walk Fisker, Tesla,  
19 Ford, Nissan and certain other applicants, who had paid many millions of dollars in lobby fees,  
20 through the process by going to their facilities, guiding them in one on one meetings at DOE and  
21 otherwise handholding them through the process. All of these applicants applied much later in the  
22 process and did not even have a design in most cases. A subpoena of the state-of-design of each of  
23 the companies as of Jan. 15, 2009 will demonstrate the favoritized process.

24 • Dianne Feinstein’s husband has multiple charges filed against him by multiple  
25 newspapers involving multiple insider deals including electric car battery materials efforts.

26 • March 2009- DOE ATVM office issues press release stating that they will not review  
27 applications on first-come/first-served basis as stated in all DOE literature but will now change the  
28 rules to review in the order they desire. Appears to be violation of the Section 136 law.

1 • Plaintiff 22 visits DOE HQ to see what else the project can do to assist the closure of the  
2 loan and is told by DOE staff that they have “had everything they need for quite some time”.

3 • For over a year Plaintiff 42 is told every week by DOE staff: “we should be able to  
4 announce you any day now...”

5 • Plaintiff 42 receives another letter from DOE on its ATVM loan application stating that  
6 it’s application was again “Substantially Complete” a year later. Ignoring the fact that DOE had  
7 already told Plaintiff 42, formally, in writing, that it’s application was “substantially complete” a  
8 year earlier. The letter goes on to reject Plaintiff 42’s loan. When Plaintiff 42 calls for an ePlaintiff  
9 42lanation it is told that the vehicle proposed by Plaintiff 42 was not using enough gasoline.

10 • Toyota & GM announce they will sever partnership in NUMMI autoplant in Fremont,  
11 CA. Plaintiff 42 contacts senior officials at Toyota & NUMMI the same day and begins discussion  
12 of JV to restart NUMMI with an Plaintiff 42 build. Feinstein’s office intercedes and says they have  
13 deal in place already and discourages Plaintiff 42 from moving forward. Feinstein subsequently  
14 announces they have made a deal with Plaintiff 42 competitors Tesla to take over the plant.

15 • GAO releases investigation report confirming favoritism and rigged process.

16 • Jan. 2010- Lachan Seward states that delays in processing applications had been due to  
17 “hundreds of car companies who had applied”, yet in the first cycle only 5 car company applicants  
18 existed and Lachlan Seward took millions of dollars for his own department to pay or “application  
19 processing expenses” for those applications; an amount which is 40 times greater than the cost any  
20 commercial bank has spent on processing any commercial loan application, in history.

21 • Oct. 2010- Plaintiff 42 sends its notes and concerns to Eric Holder’s office at DOJ.

22 • Nov. 2010- Multiple media journals accuse groups of venture capital companies of  
23 working with certain DOE officials to rig the recipients of the funding in ways that will benefit their  
24 materials, battery and political investments.

25 • Nov. 2010- Multiple media journals contact Plaintiff 42 re: “Major investigations” of the  
26 auto funding process that they are working on.

27 • Nov. 2010- DOE’s showcase Section 136 Company Solyndra begins to fail as CEO  
28 leaves, Staff is fired and factory is downsized. This is a \$500M+ by the DOE ATVM/Loan group

1 headed by Seward and demonstrating that DOE waived companies with no potential through and  
2 bypassed those who did. This failure invalidates the “careful and precise review” that DOE ATVM  
3 and Loan Guarantee staff state they engaged in for applicants. Feinstein was the core sponsor of  
4 Solyndra.

5 • Nov. 2010- White House states that Detroit has lost over \$17B from the car funding.  
6 The money is either unaccounted for, or lost, in that the Detroit big 3 have stated they will not pay  
7 back the loans. 10% of that lost money would have funded every non-Detroit applicant.

8 • Nov. 2010- To date, no applicant has yet to deliver a superior vehicle proposal re: price,  
9 range, safety, technology, lower G&A, Higher ROI, more publicly accessible, easier to repair,  
10 etc....

11

13  
14 IN-Q-TEL 'DIRTY TRICKS' AND INTERFERENCE CASE TIMELINE

15  
16  
17 2007- IQT "W" and "Z" contact us under the pretext of "providing funding" if they can  
18 review some of our patent-filed technology. They say they see no use for it and decline. Extensive  
19 technical documents are acquired, under confidentiality, by "W".

20  
21 2009- Duplicates of some of our technology is funded and launched. We find out later it was  
22 secretly funded by "W" and "Z"

23  
24 2009- We file first federal complaint for theft but do not realize that part of effort involves  
25 "W" and "Z" yet.

26  
27 2010- "W" and "Z" again contact us under the pretext of "providing funding" if they can  
28 review some of our patent-filed technology. They say they see no use for it and decline.

1  
2 2011- "W" and "Z" Duplicates of some of our technology is funded and launched by  
3 someone. We find out later it was secretly funded, in part, by "W" and "Z". Two federal lawsuits are  
4 now underway against associates of "W", "X", "Y" and "Z" but all of the connections have not been  
5 disclosed to us yet.

6  
7 2013- "W" again copies a technology we deployed in 2006.

8  
9 2014- Private investigators, federal investigators, media investigators and tipsters disclose  
10 how all of the defendants are actually related. We report it to federal law enforcement and discover  
11 that multiple IQT aircraft have been intercepted by DEA with over four tons of cocaine on-board,  
12 that IQT claims to be a "charity" and that IQT has sold 'dirty tricks' services to politicians, The  
13 American Chamber of Commerce and other non-charity entities.

20  
21 **SONY PICTURES WORK, RIP-OFF AND HACK CASE TIMELINE**

22  
23 \* January 7, 1999 - NDA Executed with Sony Pictures

24  
25 \* January 12, 1999 - NDA executed with Sony Electronics Inc.

26  
27 \* January 1999 - One of multiple NDA's were signed with SONY prior to the main Sony  
28 Board meeting where Plaintiff 22presented internet video as sole speaker

1  
2 \* In January 1999 - TSNB was asked present to one of the largest corporate meetings Sony  
3 had ever called. VP's were walking in and shaking each others hands and commenting: "oh, I've  
4 read about you in Variety"" Ira Rubenstein said that they " had never had so many VP's and  
5 department heads from so many continents in one room..". Attendees included but were not limited  
6 to most of the top level executives from Sony U.S. and Sony Japan. At this meeting TSNB  
7 demonstrated hardware, IP set-up box, portable PDA, software and architecture, under NDA, for an  
8 entire VOD internet, cable and satellite IP based digital media technology, all of which Sony is  
9 using today. In the building we met Mark Gray, one of the names on the patent and a future  
10 advocate of the "Passage"" product from Sony:

11  
12 Mark C. Gray - Chairman, President & Chief Executive Officer - Kasenna, Inc. Mr. Gray  
13 joined Kasenna after a successful tenure with Pluto Technologies, a manufacturer of standard and  
14 high definition digital video server products, where he was founder, Chairman, and CEO. He served  
15 in this capacity until September 2000 when the company was acquired by Avid Technology, Inc.  
16 Prior to that, he served as Chairman, President, and CEO of Chyron Corporation, a publicly traded  
17 corporation listed on the New York Stock Exchange. From August 1989 through June 1993, Mr.  
18 Gray held several senior executive positions at Sony Corporation of America, starting as President  
19 of the Computer Peripherals Systems Company. In April 1990, he became President of Sony  
20 Communications Products Company, which included Sony Broadcast and Sony Pro-Products  
21 divisions. At the time of his departure from Sony, he served as Executive Vice President and  
22 General Manager of the Business and Professional Group, which included all Sony professional  
23 electronics companies. From 1986 through 1989, Mr. Gray was Executive Vice President and Chief  
24 Operating Officer of Pinnacle Systems Inc., which subsequently made a successful public offering.  
25 Prior to 1986, he was General Manager of the Studio Products Division of Ampex Corporation  
26 having spent previous years with the Harris Corporation and Tektronix, Inc. His career in broadcast  
27 electronics followed a successful career in television production and he was responsible for many  
28 programs that won numerous awards and honors including three Emmys. Mr. Gray holds a

1 Bachelor of Science Degree in Electrical Engineering from the University of Tennessee, a Master of  
2 Arts Degree in Communication from St. Louis University,  
3 and is a graduate of the School of Executive Development of the Babson College graduate  
4 school of business.

5  
6  
7 \* In January of 1999 - TSBN was asked by Sony to present at The Sony Technology  
8 Building, In attendance were Sony's top technology heads, who admitted they had not figured out  
9 how to do a video-on-demand web service.

10  
11  
12 \* March 10, 1999 - At the main Hollywood event that year, Ira Rubenstein as VP Sony  
13 made the following statement in front of a live audience and live cameras: "The future of the movies  
14 is on the internet and it will be brought to you by Sony Pictures and TSBN who is standing in the  
15 back of the room"

16  
17  
18 \* March 22, 1999 - Sony sends agreement to have us test one of their feature films with our  
19 technology.

20  
21  
22 \* April 15, 1999 - TSBN receives the following threat letter from the Senior Sony attorney  
23 who was present at the core presentation TSBN did. The attorney has not realized that it was Ira  
24 Rubenstein, their own leader, who had blown the information in public at the Variety show above.  
25 Sony actually breached their NDA by making these statements in public. He responded demanding  
26 to know who said it from his company. Ira Rubenstein begged us not to say he said it. Ira said he  
27 was our "insider" and our "Buddy" and he would protect us if we protected him!!!!!!!

\* Feb. 16, 2000 - Ira Rubenstein, The Supposed "INVENTOR" on Sony's patent sends another email advising that he is incapable of using computers. One must ask, If Ira is so technologically challenged, how could he have invented one of the leading internet technologies?

\* June 21, 2000 - Sony's Larry Hess sends us a letter notifying his departure, He has kept in touch with us in at least two phone calls to advise that we should "watch our ass.. Sony is not respectable in these matters""

\* July 25, 2000 - Takashi contacts TSBN to discuss the media device we presented at the January meeting. As we now know, Sony's PSP is all about VOD on a handheld:

\* Nov. 9, 2000 - Sony Music VC group asks Plaintiff 22to visit their SF offices to "tell them some of his ideas.."

\* Dec. 28, 2000 - Sony VC group discuss investing, asks us for technology update.

\* Also in December of 2000 Sony tests a set-top box in a highly secret test with over 2000 consumers in CableVisions Systems New York Market. Larry Hess advises that the box is the same or identical to that we showed.

\* Aug. 17, 2001 - Afterdawn.com reports that it was Sony who developed all of the

1 technology for MovieFly/MovieLink

2  
3  
4 \* January 2002 - Sony sells the core VOD technology solution to In-Demand to be used for  
5 their VOD system

6  
7  
8 \* Feb. 11, 2002 - Sony Pictures Launches New Online Promotions Unit Culver City, Calif.  
9 -- Sony Pictures Digital Entertainment on Monday announced the launch of a new unit, Sony  
10 Pictures Integrated Network(SPIN), which will develop promotions for the company's film,  
11 television and home entertainment properties. The new unit will also oversee the development and  
12 operation of all of Sony Pictures Entertainment's. Previously, Rubenstein directed the development  
13 of Sony's Moviefly (now known as Movielink) video-on-demand joint venture, and was vice  
14 president of marketing for Columbia TriStar Interactive.

15 [http://biz.yahoo.com/prnews/020208/laf061\\_1.html](http://biz.yahoo.com/prnews/020208/laf061_1.html)

16  
17 \* March 1, 2003 - Cable & Satellite International publishes article on Sony "Passage"  
18 product. "Rite of Passage: Sony Lays Down Cable's Future" - "Question: When is MPEG not  
19 MPEG? Answer: When it is an encryption technology and not just a compression tool.

20 This distinction is at the heart of Sony's new Passage cable network system. Some are  
21 calling this the "Holy Grail" of the cable world. a pretty strong characterization, but one that may  
22 well be true. By leveraging MPEG not just for compression but also for encryption, Sony aims to  
23 revolutionize the cable industry, something that is desperately needed. Passage will allow cable  
24 operators to offer new services, including video-on-demand (VOD), without having to do a "fork-  
25 lift" upgrade of their systems. Rather, Passage works right alongside their existing cable network  
26 protocols to offer new services while still delivering the same services to existing set-top boxes  
27 (STBs). In the past, all cable networks were essentially one of two proprietary systems. Motorola or  
28 Scientific Atlanta. Unfortunately, those companies weren't opening up to new and alternative

1 services fast enough, nor were prices dropping without competition. For example, although TiVo-  
2 style PVRs have been around for several years and available from the satellite companies for even  
3 longer, cable only this year got a PVR for its networks, and even that was rather plain-Jane. The  
4 cable industry tried to respond with their OpenCable initiative, but this was a "vanilla" offering  
5 based in part on a combination of these two proprietary solutions with some badly needed  
6 enhancements..."

7  
8 \* Nov. 11, 2004 - Sony generates revenue selling VOD technology via MovieCo in Europe,  
9 of which it is a co-owner

10  
11 \* Aug. 26, 2005 -Sony Provides VOD technology and content to ntl's European VOD effort.  
12 Sony is generating revenue from VOD

13  
14 \* April 4, 2006 - Press reports that Sony has been selling a movie on demand service to  
15 corporations for at least years with the brand name of : "Passage"". Sony is generating revenue from  
16 VOD.

17  
18 \* April 4, 2006 - Patent # 7,024,466 is issued to Sony via its owned entity MovieLink, with  
19 the inventors listed as: Outten; Todd Avery (Los Angeles, CA); Spaulding; Bryan Gentry (San  
20 Francisco, CA); Sherr; Plaintiff 22Jeffrey (Brentwood, CA); Rubenstein; Ira Steven (Los Angeles,  
21 CA); Landau; Yair (Pacific Palisades, CA); Chey; Douglas Daiseung (Santa Monica, CA); Arrieta;  
22 Michael R. (Rolling Hills Estates, CA); Mandyam; Harish (Playa del Rey, CA); Rodriguez; Thomas  
23 M. (Culver City, CA).. almost all of whom were either in the TSBN presentation in January 1999 or  
24 had staff in the room. The patent was filed April 6, 2001 using technology and teachings Plaintiff  
25 22provided to Sony under NDA!

26  
27 \* April 24, 2006 - Sony Corporation and bitWallet, Inc. show an IP set top box identical to  
28 that shown by TSBN in 1999 meeting.

1  
2 \* Jan. 1, 2007 - As of this date, in the entire patent file wrapper for Sony Pictures patent the  
3 ONLY third party name mentioned and acknowledged as a source of information, in the federal  
4 government file docket, is Plaintiff 22 and TSNB.

5  
6 \* July 15, 2008 - Sony announces PS3 movie download service - Company also reveals 80-  
7 gigabyte PS3 model for \$399 - MSNBC News Services - updated 2:57 p.m. PT, Tues., July. 15,  
8 2008 - LOS ANGELES - Sony is raising the curtain on a PlayStation 3 movie download service. "  
9 The company announced at the E3 Business and Media Summit it will launch a downloadable  
10 movie service Tuesday featuring films from such studios as Disney, Fox and Warner Bros. The  
11 standard and high definition videos can be downloaded to the console and transferred to a  
12 PlayStation Portable. Rentals will cost \$2.99 to \$5.99. Purchases will cost \$9.99 to \$14.99.

13 Sony also announced it will sell an 80-gigabyte PS3 model for \$399 beginning in  
14 September. Among the new games revealed were "God of War III" and "Massive Action Game,"  
15 which will allow up to 256 players to battle online. Sony said on Tuesday that it was "well on its  
16 way" to meeting its goal of selling 10 million PlayStation 3 units worldwide in its current fiscal year  
17 ending March. Sony Computer Entertainment America President Jack Tretton said it was also on  
18 target to meet its goal of selling 15 million units of its handheld PSP in Sony's business year ending  
19 March 31, 2009."

20  
21 \* This is a global, full retail VOD system using every component revealed to Sony by  
22 TSNB. SONY VUE was what Plaintiff 22 had designed for SONY that HE NEVER GOT PAID  
23 FOR!

24  
25 \* January 7, 2008 - Digital Hollywood Events at CES, Monday, January 7th, 1:30 PM - 2:30  
26 PM, Session B - DH3 - Digital Hollywood -

27 Ira Rubenstein Spoke at This event - Ira Rubenstein, Executive Vice President, Sony  
28 Pictures Digital: Ira Rubenstein has built a career on identifying and implementing new marketing

1 and distribution tactics for entertainment properties through interactive, online and mobile  
2 initiatives. As executive vice president of Sony Pictures Digital, Rubenstein is responsible for  
3 overseeing the division's production efforts to extend Sony Pictures properties into the digital  
4 marketplace through SonyPictures.com, mobile games and personalization products, casual games,  
5 and innovative strategic partnerships. Rubenstein manages the digital growth of the studio's most  
6 important brands including Wheel of Fortune and Jeopardy! as these and other properties have  
7 progressed through various platforms including broadband, interactive television, mobile, and  
8 emerging platforms such as the PSP and PS3. Most recently, Rubenstein's team launched a full suite  
9 of digital products on behalf of two of Columbia Pictures' most highly anticipated films - THE DA  
10 VINCI CODE and CASINO ROYALE. In addition, Rubenstein oversees production for all Sony  
11 Pictures properties breaking into the growing mobile marketplace. His team has developed an array  
12 of successful mobile entertainment offerings such as the award-winning games Ratchet and Clank:  
13 Going Mobile and Spider-Man 2: The Hero Returns, retro titles such as Elevator Action and Q\*Bert  
14 and personalization products for "The Boondocks." Under Rubenstein's leadership,  
15 SonyPictures.com generates online awareness for the studio's film, television, and home  
16 entertainment properties by driving traffic with partnership marketing, media buys, community  
17 building, e-commerce, auctions, games and original content. Prior to his role as executive vice  
18 president, Rubenstein was senior vice president and directed the division's brand integration and  
19 sponsorship strategies and was also responsible for the production and creative direction for  
20 SonyPictures.com. Beginning in 2000, Rubenstein oversaw the establishment of Sony Pictures  
21 Digital Entertainment's on-demand movie initiative to offer theatrically released motion pictures via  
22 digital delivery for broadband Internet users. From concept to working technical trials, Rubenstein  
23 directed the project (developed under the name Moviefly), which ultimately became Movielink, a  
24 groundbreaking partnership among five studios. More recently, Rubenstein helped to develop Sony  
25 Pictures Digital's "Movies on Memory Cards" initiative in Europe. Several films, including  
26 SPIDER-MAN™ 2, MONTY PYTHON AND THE HOLY GRAIL, HITCH, GHOSTBUSTERS,  
27 CHARLIE'S ANGELS: FULL THROTTLE and STUART LITTLE are now available on memory  
28 cards to view on mobile phones. Before the establishment of Sony Pictures Digital Entertainment,

1 Rubenstein was vice president, marketing, Columbia TriStar Interactive. In this role, he managed  
2 the strategic implementation of media planning, promotional and creative advertising campaigns for  
3 more than 100 film sites including STUART LITTLE, MEN IN BLACK, AIR FORCE ONE, AS  
4 GOOD AS IT GETS and THE MASK OF ZORRO. Recognition for his work includes Webby  
5 Awards, Mobie awards, a Gold Clio and The Hollywood Reporter Key Art award. Before joining  
6 Columbia TriStar Interactive, Rubenstein served as manager of media research and interactive  
7 marketing for Twentieth Century Fox. Rubenstein was recently included on the highly regarded  
8 "Digital 50" list, a distinction given to fifty new media innovators by The Producers Guild of  
9 America's New Media Council and The Hollywood Reporter. He is a graduate of the Peter Stark  
10 Producing Program at USC.

11  
12  
13 \* April 25, 2008 : Marvel Comics hires former Sony exec as digital media VP. Marvel  
14 Comics has announced the hiring of Ira Rubenstein, a 12-year vet of Sony Pictures where he  
15 oversaw digital distribution, casual and mobile games including properties such as Jeopardy! and  
16 Wheel of Fortune, as well as mobile titles like Spider-Man 2: The Hero Returns and Ratchet and  
17 Clank: Going Mobile. His new role will be much the same as the executive vice president of Global  
18 Digital Media at Marvel, where he'll handle digital distribution of content across across all  
19 platforms, as well as lead Marvel's charge into mobile and casual games -- meaning we'll know  
20 where to place the blame when someday we're coordinating the drapes in Stark Tower from our  
21 mobile phones.

22  
23  
24 \* Aug. 22, 2008 - Reported as speaker Bio - Ira Rubenstein - EVP, Global Digital Media  
25 Group - Marvel Entertainment, Inc. - Ira Rubenstein has built a career on identifying and  
26 implementing new marketing and distribution opportunities for entertainment across a wide array of  
27 platforms. In his role at Marvel Rubenstein is responsible for the company's Global digital strategy  
28 and implementation for all of Marvel's properties across digital and games channels. Prior to

1 Marvel, Rubenstein spent 12 years with Sony, most recently as executive vice president of Sony  
2 Pictures Digital where he was responsible for overseeing the division's production efforts to extend  
3 Sony Pictures properties into the digital marketplace through SonyPictures.com, mobile games and  
4 personalization products, casual games, and innovative strategic partnerships. Rubenstein managed  
5 the digital growth of the studio's most important brands including Wheel of Fortune and Jeopardy! -  
6 leading the expansion of these properties into broadband, interactive television, mobile,  
7 and the PSP and PS3 platforms. In addition, Rubenstein oversaw production for all Sony Pictures  
8 properties breaking into the growing mobile marketplace, developing an array of successful mobile  
9 entertainment offerings including the award-winning Spider-Man 2: The Hero Returns and Ratchet  
10 and Clank: Going Mobile, as well as the first Movies for Mobile Phones on Memory Cards. Also  
11 during his tenure at Sony, Rubenstein oversaw the establishment of Sony Pictures Digital  
12 Entertainment's on-demand movie initiative, Movielink, to offer theatrically released motion  
13 pictures via digital delivery for broadband Internet users. Before the establishment of Sony Pictures  
14 Digital Entertainment, Rubenstein was vice president, marketing, Columbia TriStar Interactive. In  
15 this role, he managed the strategic implementation of media planning, promotional and creative  
16 advertising campaigns for more than 100 film sites. Before joining Columbia TriStar Interactive,  
17 Rubenstein worked in film research and new media for Twentieth Century Fox. Rubenstein was  
18 recently included on the highly regarded "Digital 50" list, a distinction given to fifty new media  
19 innovators by The Producers Guild of America's New Media Council. Recognition for his work also  
20 includes Webby Awards, a Mobie award for games, a Gold Clio and several Key Art Awards.  
21 Rubenstein holds a B.A. in Management Science from UC San Diego and is a graduate of the Peter  
22 Stark Producing Program at USC.

23  
24 \* On November 24, 2014, a hacker group identifying itself as "Guardians of Peace" leaked a  
25 release of confidential data from the film studio Sony Pictures. The data included personal  
26 information about Sony Pictures employees and their families, emails between employees,  
27 information about executive salaries at the company, copies of then-unreleased Sony films, plans  
28 for future Sony films, scripts for certain films, and other information.[1] The perpetrators then

1 employed a variant of the Shamoon wiper malware to erase Sony's computer infrastructure.[2]. The  
2 dumped data proves that Sony was a lying pack of theiving scumbags. The entire file set is still  
3 held, by multiple third parties, from mobsters to government agencies; and could pop-up, when  
4 needed, in any big trial or 60 Minutes-type investigation.

12 =====

13  
14 THE MODERN POLITICAL CORRUPTION TIMELINE IN THE MAIN CASE

15  
16  
17 December, 2008 - Obama and his Chicago mobsters set-up attacks on reporters and whistle-  
18 blowers ePlaintiff 42osing their stock market and energy industry manipulation schemes.

19  
20 January 21, 2009: President Obama takes office; pledges unprecedented transparency.  
21 Orders secret hit-jobs on whistle-blowers including cutting of their SSA, HUD, and other benefits  
22 and killing their federal funding.

23  
24 April 2009: Someone leaks the unmasked name of Congresswoman Jane Harman to the  
25 press. According to news reports, the Bush administration NSA incidentally recorded and saved  
26 Harman's phone conversations with pro-Israel lobbyists who were under investigation for  
27 espionage. The story is first broken by Congressional Quarterly's Jeff Stein.

1 December 17, 2009: The Obama administration prosecutes FBI contractor Shamaï  
2 Leibowitz for leaking documents to the media in April 2009. Leibowitz says he leaked because he  
3 felt FBI practices were “an abuse of power and a violation of the law” which he reported to his  
4 superiors at the FBI “who did nothing about them.” (According to the ACLU: “Amazingly, the  
5 sentencing judge said, ‘I don’t know what was divulged other than some documents, and how it  
6 compromised things, I have no idea’.”)

7  
8 2010: The IRS secretly begins “targeting” conservative groups that are seeking nonprofit  
9 tax-exempt status, by singling out ones that have “Tea Party” or “Patriot” in their names. Army  
10 intelligence analyst Bradley Manning begins illegally leaks classified information to WikiLeaks  
11 revealing, among other matters, that the U.S. is extensively spying on the United Nations. Obama  
12 Attorney General Eric Holder renews a Bush-era subpoena of New York Times reporter James  
13 Risen in a leak investigation. Obama administration pursues espionage charges against NSA  
14 whistleblower Thomas Drake. (According to the ACLU: spy charges were later dropped and Drake  
15 pled guilty to a misdemeanor. The judge called the government’s conduct in the case  
16 “unconscionable.”)

17  
18 May 28, 2010: The government secretly applies for a warrant to obtain Google email  
19 information of Fox News reporter James Rosen in a leak investigation, without telling Rosen.

20 James Rosen of Fox News

21  
22 September 21, 2010: Internal email entitled “Obama Leak Investigations” at “global  
23 intelligence” company Stratfor claims Obama’s then-Homeland Security adviser John Brennan is  
24 targeting journalists. “Brennan is behind the witch hunts of investigative journalists learning  
25 information from inside the beltway sources,” writes one Stratfor official to another. The email  
26 continues: “Note — There is specific tasker from the [White House] to go after anyone printing  
27 materials negative to the Obama agenda (oh my.) Even the FBI is shocked. The Wonder Boys must  
28 be in meltdown mode...” “The Wonder Boys” reportedly refers to the National Security Agency

1 (NSA). Brennan later becomes President Obama’s CIA Director. John Brennan, former CIA  
2 Director and Homeland Security Adviser

3  
4 Early February 2011: After receiving an anonymous tip, CBS News investigative  
5 correspondent Sharyl Attkisson begins researching the Department of Justice “gunwalking”  
6 operation nicknamed “Fast and Furious” that secretly let thousands of weapons be trafficked to  
7 Mexican drug cartels. One of the “walked” guns had been used by illegal aliens who murdered U.S.  
8 Border Patrol Agent Brian Terry in  
9 December 2010.

10  
11 February 22, 2011: CBS’ Attkisson breaks news about “Fast and Furious” on The CBS  
12 Evening News. After the story airs, the government issues an internal memo that seeks to “push  
13 positive stories” to contradict the news. [quote]Given the negative coverage by CBS Evening News  
14 last week...ATF needs to proactively push positive stories this week, in an effort to preempt some  
15 negative reporting, or at minimum, lessen the coverage of such stories in the news cycle by  
16 replacing them with good stories about ATF.[/quote]

17  
18 March 4, 2011: CBS News’ Attkisson exclusively interviews sitting ATF special agent John  
19 Dodson. He gives a firsthand account contradicting government denials re: Fast and Furious.

20  
21 May 2011: White House recruits democratic operative Eric Schultz to spin on Fast and  
22 Furious and to counter the House Oversight Committee’s investigative work on the case. (Schultz  
23 previously served as intern to Sen. Charles Schumer and Hillary Clinton.)

24 Former Obama operative Eric Schultz

25  
26 Spring 2011: Obama intel officials capture and record incidental private communications  
27 between Congressman Dennis Kucinich, a Democrat, and a Libyan official. The recordings are later  
28 leaked to the press.

1  
2 2011: Fox News reporter Mike Levine is subpoenaed by the Department of Justice regarding  
3 a story he reported about a federal grand jury's indictments of terrorism suspects. The subpoena is  
4 later dropped.

5  
6 June 2, 2011: Republican Mitt Romney announces he'll challenge President Obama in  
7 campaign 2012.

8  
9 June 28, 2011: Obama U.S. Attorney for Arizona Dennis Burke secretly leaks sensitive  
10 government information to Fox News, allegedly to retaliate against ATF whistleblower John  
11 Dodson in the Fast and Furious case. (Burke is former chief of staff to former Arizona Governor  
12 Janet Napolitano.)

13  
14 August 2011: U.S. Attorney Burke resigns while under investigation for the improper leak  
15 of sensitive information about Dodson. The Inspector General later confirms the leak and Burke  
16 apologizes.

17  
18 September 2011: White House operative Schultz invites Attkisson and several other national  
19 journalists to off the record backgrounder about Fast and Furious documents subpoenaed by  
20 Congress. Later, on the phone, Shultz screams and cusses at Attkisson as she asks questions raised  
21 by the Fast and Furious documents.

22  
23 October 3, 2011: Obama administration secretly changes longstanding policy. The change  
24 creates a "loophole" that Sen. Ron Wyden would later say allows the NSA to conduct "backdoor  
25 searches" of "incidental collection" of U.S. citizens' domestic communications.

26 The same day, CBS News airs Attkisson's report on newly-uncovered memos that contradict  
27 Attorney General Eric Holders' denials about Fast and Furious.

28

1           October 4, 2011: In an internal email, Attorney General Eric Holder’s top press aide Tracy  
2 Schmalzer emails White House operative Schultz calling Attkisson “out of control.” Schultz replies,  
3 “Her piece was really bad for the AG.”  
4

5           November 2011: CIA Director Gen. David Petraeus, who’s married, allegedly begins an  
6 affair with his biographer, Paula Broadwell. (The FBI would later say it “stumbled” upon evidence  
7 of the affair incidentally during an unspecified, much broader investigation.)  
8

9           December 2011: Amid much criticism, Justice Department finally, officially retracts the  
10 false letter it had submitted to Congress in February. The letter had stated that the Fast and Furious  
11 allegations of gunwalking were untrue.  
12

13           February 13, 2012: At approximately 10:30pm, remote intruders secretly download new spy  
14 software proprietary to a federal agency onto Attkisson’s CBS work computer. (The software was  
15 secretly attached to a legitimate Hotmail email and downloaded in the background after a pop-up ad  
16 appeared).  
17

18           April-May 2012: The Department of Justice (DOJ) and FBI publicly announce vast  
19 expansion of cyber related efforts to address alleged “national security-related cyber  
20 issues.” In violation of longstanding practice, DOJ secretly and without notice seizes personal and  
21 phone records of journalists from Associated Press from this two-month period in a leak  
22 investigation.  
23

24           June 2012: Attorney General Holder secretly initiates investigations into AP and the New  
25 York Times regarding government leaks.  
26

27           June 28, 2012: The House of Representatives holds Attorney General Holder in contempt of  
28 Congress for refusing to turn over subpoenaed documents related to Fast and Furious.

1  
2 July 2012: The Department of Justice designates U.S. Attorneys' offices to act as "force  
3 multipliers" in further stepped-up cyber efforts in the name of national security. Intruders remotely  
4 "refresh" ongoing surveillance of Attkisson's CBS News Toshiba laptop.  
5

6 Summer 2012: The FBI incidentally stumbles across emails revealing CIA Director  
7 Petraeus' affair with his biographer Broadwell. FBI Director Robert Mueller is notified of the affair  
8 on a date the government will not disclose. The FBI later says it interviewed Petraeus and  
9 Broadwell, and concluded national security hasn't been breached. The FBI keeps all of this  
10 information secret. In late summer, on a date the government won't reveal, the FBI notifies  
11 Attorney General Holder of the Petraeus affair.  
12

13 September 11, 2012: Four Americans, including U.S. Ambassador Christopher Stevens are  
14 murdered in Benghazi, Libya during attacks by Islamic extremist terrorists. Despite internal  
15 communications that acknowledge the terrorist nature of the attacks within minutes, the Obama  
16 administration falsely reports to the public that the attacks were instead a protest gone awry after an  
17 anti-Islamic YouTube video. Some Obama officials become frustrated with CIA Director Petraeus  
18 and his post-Benghazi attack behavior, as he opposes efforts to edit out mentions of terrorism from  
19 the public Benghazi talking points. Petraeus deputy Mike Morell is given authority over the edits,  
20 and aligns with Hillary Clinton's State Department against Petraeus's desires.  
21

22 October 2012: CBS begins airing Attkisson's Benghazi stories which rely on whistleblowers  
23 and numerous government-linked confidential sources. These sources report that the Executive  
24 Branch is clamping down on leaks to reporters re: Benghazi. DOJ continues its stepped-up National  
25 Security Division cyber efforts, holding specialized training at DOJ headquarters for the National  
26 Security Cyber Specialists (NSCS) network and the Criminal Division's Computer Crime and  
27 Intellectual Property Section (CCIPS). President Obama issues top secret presidential directive on  
28 Oct. 16 ordering intelligence officials to draw up a list of overseas targets for cyberattacks.

1 According to The Guardian, the directive also “contemplates the possible use of cyber actions inside  
2 the US.” As CIA Director Petraeus’s interagency relationships become increasingly strained over  
3 his stance on Benghazi, unnamed FBI agents reach out to Republicans in Congress to tell about  
4 Petraeus’s affair. They eventually land at the office of Republican majority leader Eric Cantor. With  
5 the presidential elections about a week away, Cantor stays mum on the Petraeus rumors and instead  
6 contacts the FBI about them. The FBI interviews Petraeus and Broadwell a second time.

7  
8 November 2, 2012: The FBI questions President Obama’s vice chair of the Joint Chiefs of  
9 Staff James Cartwright in a leak investigation regarding material in a book written by a New York  
10 Times reporter. Cartwright denies being the source (but later admits he was, and is convicted in the  
11 case).

12  
13 November 6, 2012: President Obama defeats Mitt Romney in Campaign 2012. CIA Director  
14 Petraeus is scheduled to testify to Congress next week about the Benghazi attacks. Officials claim  
15 this day is the first time Director of National Intelligence Clapper is notified about the Petraeus  
16 affair by an unspecified official at the Justice Department. Clapper calls Petraeus and urges him to  
17 resign.

18  
19 November 7-9, 2012: Attorney General Holder hosts a national training conference at DOJ  
20 headquarters for the ePlaintiff 42anded efforts of DOJ’s National Security Cyber Specialists  
21 ( SCS). The Obama administration says somebody unspecified notifies someone at the White House  
22 about the Petraeus affair on Nov. 7. The President is reportedly looped in for the first time on Nov.  
23 8 and accepts Petraeus’ resignation on Nov. 9. Petraeus’ planned appearance before Congress to  
24 testify on Benghazi is canceled.

25  
26 November 13, 2012: The F.B.I. initiates a body of cyber security case investigations that  
27 would later relate to Attkisson’s computer intrusions.

1 December 2012: Two intelligence-connected sources separately suggest to Attkisson that  
2 she’s likely under government surveillance due to her reporting. One source tells her the  
3 government has pushed the envelope like never before and that public would be shocked to “learn  
4 the extent that the government is conducting surveillance of private citizens.” As Attkisson arranges  
5 a forensic exam of her computer, evidence later shows the intruders then attempted to cover their  
6 tracks and to erase evidence of their intrusion. However, the erasures leave additional forensic  
7 evidence.

8  
9 December 27, 2012: Sens. Ron Wyden (D-Ore.) and Mark Udall (D-Colo.), who have  
10 classified knowledge as members of the Senate Intelligence Committee, publicly warn of the “back-  
11 door search loophole” or searches of incidental collection of innocent Americans.

12 “As it is written, there is nothing to prohibit the intelligence community from searching  
13 through a pile of communications, which may have been incidentally or accidentally been collected  
14 without a warrant, to deliberately search for the phone calls or e-mails of specific Americans.—Sen.  
15 Mark Udall, D-Colorado.”

16 Sen. Mark Udall  
17

18 2013: Obama administration brings court martial against Army intelligence analyst Bradley  
19 Manning, who has changed his name to Chelsea, for a 2010 leak of classified information to  
20 WikiLeaks that revealed American military and diplomatic activities across the world. Manning is  
21 sentenced to 35 years in prison, the longest punishment ever given in a U.S. leak case.

22  
23 January 2013: Two forensics examinations confirm unauthorized remote intrusions and  
24 monitoring of Attkisson’s work and personal computers. The information is not publicly reported at  
25 this time.

26  
27 January 23, 2013: The Obama administration prosecutes CIA whistleblower John Kiriakou  
28 for leaks to a reporter as he blew the whistle on the CIA’s secret torture program. He’s the first CIA

1 officer convicted of providing classified information to a reporter.

2  
3 March 12, 2013: Director of National Intelligence James Clapper testifies to Congress,  
4 falsely stating that intelligence officials are not collecting mass data on tens of millions of  
5 Americans.

6  
7 April 12, 2013: The government Foreign Intelligence Surveillance Agency (FISA) court  
8 secretly approves the latest FBI request to continue obtaining daily telephone records of millions of  
9 U.S. Verizon customers. The judge orders Verizon to turn over the information to the National  
10 Security Agency (NSA). This directly contradicts Clapper’s March 12 testimony to Congress.

11  
12 April 2013: A secret government memo later exposed by NSA whistleblower Edward  
13 Snowden discusses how the U.S. is collecting information “directly from the servers of ...  
14 Microsoft, Yahoo, Google, Facebook, PalTalk, AOL, Skype, YouTube, Apple.”

15  
16 May 10, 2013: After longstanding denials, the IRS admits to and apologizes for targeting  
17 Republican Tea Party groups for mischief, which included discussing developing pretenses for  
18 prosecution, leading up to the 2012 election.

19  
20 May 13, 2013: The Associated Press (AP) publicly announces that it has learned of the  
21 Justice Department’s secret subpoena of phone records for 20 AP reporters, in a leak investigation.  
22 Attorney General Holder personally approved the subpoenas, which were issued to Verizon rather  
23 than AP. AP calls it a “massive and unprecedented intrusion” into news-gathering operations.

24  
25 May 17, 2013: Fox News learns that the Justice Department secretly labeled reporter James  
26 Rosen a possible “criminal co-conspirator” and “flight-risk” in obtaining warrants to monitor  
27 Rosen’s State Department movements, phone records and emails in a leak investigation starting in  
28 2011.

1  
2 June 2013: The FBI secretly opens a case on Attkisson's computer intrusions under the  
3 auspices of a national security issue. The FBI contacts CBS without Attkisson's knowledge, but  
4 fails to contact or interview Attkisson. (The FBI later withholds Attkisson's FBI file in its entirety  
5 without ePlaintiff 42lanation, and other documents, despite multiple Freedom of Information Act  
6 requests.) News of the FBI case involving Attkisson's computer intrusions is circulated internally to  
7 the Justice Department's national cyber security group, and grouped with a set of cases opened in  
8 November 2012.

9  
10 June 2013: Former National Security Agency NSA contractor Snowden begins releasing  
11 documents showing extensive efforts by the government to surveil and collect information on U.S.  
12 citizens. Snowden is charged with three felonies in his absence from the U.S.

13 NSA Whistleblower Edward Snowden.  
14

15 June 6, 2013: At a hearing, Sen. Mark Kirk, R-Illinois, asks Attorney General Eric Holder if  
16 the NSA spies on members of Congress. Holder answers that the NSA has no "intent" to spy on  
17 Congress, but that the issue is better addressed in private.  
18

19 July 2, 2013: Director of National Intelligence Clapper apologizes to Congress for his false  
20 testimony in March regarding widespread collection of data on Americans.  
21

22 August 6, 2013: Armed Coast Guard agents under the Department of Homeland Security  
23 raid the home of reporter Audrey Hudson at 4:30am with a search warrant for her husband's  
24 firearms. As they searched the house, they read Hudson her Miranda rights and confiscated  
25 documents that contained "confidential notes, draft articles, and other newsgathering materials"  
26 belonging to Hudson including the identities of whistleblowers at the Department of Homeland  
27 Security. (Hudson sues and later receives a settlement from the government.)  
28

1 August 7, 2013: CBS News publicly announces confirmation of Attkisson’s computer  
2 intrusions. “Attkisson’s computer was accessed by an unauthorized, external, unknown party on  
3 multiple occasions late in 2012...This party also used sophisticated methods to remove all possible  
4 indications of unauthorized activity, and alter system times to cause further confusion.”—CBS  
5 News

6  
7 September 19, 2013: The Obama Justice Department charges FBI agent and contractor  
8 Donald Sachtleben with leaking to an AP reporter details of disrupted terrorist bomb plot. He’s  
9 sentenced to 43 months in prison.

10  
11 January 23, 2014: Sen. Bernie Sanders asks the NSA if it spies on members of Congress.  
12 The NSA does not provide a direct answer and states that Congress is afforded “the same privacy  
13 protections as all U.S. persons.”

14  
15 March 2014: Congress accuses the CIA of improperly accessing Senate Intelligence  
16 committee computers. CIA Director Brennan denies it. Director of National Intelligence Clapper  
17 bans intelligence community officials from unauthorized contact with reporters.

18  
19 April 2, 2014: Former state department contractor Stephen Jin-Woo Kim is sentenced to  
20 prison for disclosing classified information to Fox News reporter James Rosen.

21  
22 July 31, 2014: CIA Inspector General reveals that five CIA officials improperly accessed  
23 Senate Intelligence Committee computers and searched certain staff emails. The findings contradict  
24 denials made in March by CIA director Brennan. Brennan apologizes to Senate staff.

25  
26 October 2014: The government pays a settlement to reporter Audrey Hudson after the 2013  
27 Coast Guard raid of her home during which her work notes were improperly seized.

1 December 2014: Attorney General Holder seeks to subpoena a 60 Minutes producer in  
2 connection with a terrorism trial, but pulls back the request after public criticism.

3  
4 Spring 2015: The Obama administration finishes secretive negotiations of an Iran nuclear  
5 deal that will return billions of dollars in frozen funds to the world’s largest state sponsor of  
6 terrorism in return for assurances from that country. It’s later reported that Obama intel officials  
7 have been incidentally capturing communications of U.S. members of Congress and organizations  
8 in the U.S. while secretly recording Israeli Prime Minister Benjamin Netanyahu’s discussions about  
9 the Iran deal, which he opposes. As of now, the New York Times reports “since 2009, six current or  
10 former government employees and two government contractors have been indicted or prosecuted  
11 under the Espionage Act for leaking information to the public. There were only three such  
12 prosecutions under all previous U.S. presidents combined since 1917.”

13  
14 May 2015: Former CIA employee Jeffrey Alexander Sterling is convicted on espionage  
15 charges for leaks to New York Times reporter James Risen. He’s sentenced to 3 1/2 years in prison.

16  
17 December 2015: The Cybersecurity Information Sharing Act (CISA) passes. It requires  
18 private Internet companies to “transmit cyber-threat indicators” to the Department of Homeland  
19 Security and granting the companies immunity from prosecution for sharing customers’ personal  
20 data in those cases. The Wall Street Journal reports that the Obama administration incidentally  
21 collected private communications by members of Congress while it spied on Israeli Prime Minister  
22 Netanyahu. “The NSA sweeping up “private conversations with U.S. lawmakers and American-  
23 Jewish groups... raised fears [of]—an ‘Oh-s— moment,’ one senior U.S. official said—that the  
24 executive branch would be accused of spying on Congress.”—Wall Street Journal, December 29,  
25 2015.”

26  
27 July 2016: Donald Trump wins the Republican nomination for president. According to later  
28 news reports, after Trump’s nomination, internal White House logs show Obama National Security

1 Adviser Susan Rice begins to show increased interest in National Security Agency (NSA)  
2 intelligence material that included “unmasked” Americans’ identities. Former Obama national  
3 security adviser Susan Rice is told will get paid off via a cushy Netflix job.  
4

5 Summer 2016: The FBI reportedly tries to obtain a secret FISA court order to monitor  
6 communications of Trump adviser Carter Page, alleging that Page is acting as a Russian agent. The  
7 application is turned down but approved in October when the anti-Trump “dossier” is included to  
8 justify the wiretap application. Read: When “Incidental” Intel Collection Isn’t Incidental

9 Former Trump adviser Carter Page  
10

11 2016: It’s not yet known publicly, but CNN later reports that the Obama Justice Department  
12 wiretapped Trump campaign manager Paul Manafort before the 2016 election over Russia ties,  
13 closed the investigation, then began surveillance anew sometime in the fall and continued it through  
14 the early part of 2017.  
15

16 Fall 2016: Trump opponents “shop” to reporters a political opposition research “dossier”  
17 alleging Trump is guilty of various inappropriate acts regarding Russia. The information is  
18 unverified (and some of it is false) and the press doesn’t publish it, but a copy is provided to the  
19 FBI.  
20

21 September 26, 2016: It’s not publicly known at the time, but the government makes a  
22 proposal to the secretive Foreign Intelligence Surveillance Court (FISC) court to allow the National  
23 Counter Terrorism Center to access “unmasked” intel on Americans acquired by the FBI and NSA.  
24 (The Court later approves as “appropriate”).  
25

26 October 7, 2016: Former vice chair of the Joint Chiefs of Staff James Cartwright pleads  
27 guilty in a leak investigation to lying to the FBI about his discussions with reporters regarding  
28 Iran’s nuclear program.

1  
2           October 26, 2016: At closed-door hearing before the Foreign Intelligence Surveillance  
3 Court, the Obama administration disclosed that it had been violating surveillance safeguards,  
4 according to Circa. It disclosed that more than 5 percent of its searches of the NSA’s database  
5 violated safeguards promised in 2011.

6  
7           November 8, 2016: Donald Trump is elected President.

8  
9           November 2016-January 2017: News reports claim Rice’s interest in the NSA materials  
10 accelerates after President Trump’s election through his January inauguration. Surveillance  
11 reportedly included Trump transition figures and/or foreign officials discussing a Trump  
12 administration.

13  
14           December 2016: FBI secretly monitors and records communications between Russian  
15 ambassador, Sergey Kislyak and Lt. Gen. Michael Flynn, who later became President Trump’s  
16 national security adviser. After Trump’s election, Obama officials take steps to ensure certain  
17 intelligence gathered regarding Trump associates is “spread across the government.” One Obama  
18 official would later say it’s because they were afraid once Trump officials “found out how we knew  
19 what we knew,” the intelligence would be destroyed. However, Obama critics later theorize Obama  
20 officials were working to mount opposition to Trump’s presidency.

21  
22           December 15, 2016: National Security Adviser Susan Rice later reportedly acknowledged  
23 that the Obama administration spied on Trump officials in Trump Tower on this date, but claimed it  
24 was incidental to the administration’s spying on the foreign leader they were meeting with: the UAE  
25 crown prince. Rice also reportedly admitted to “unmasking” the names of the Trump officials who  
26 met with the crown prince, saying it was important to know who they were, although the identities  
27 of Americans are supposed to be strictly protected except in extraordinary circumstances. Trump  
28 officials who met with the crown prince reportedly included: Steve Bannon, Jared Kushner and

1 Gen. Michael Flynn.

2  
3 January 10, 2017: The media reports on the leaked anti-Trump “dossier” compiled by a  
4 political opposition research group containing unverified and at least partly untrue allegations of  
5 misconduct involving Trump and Russia.

6  
7 January 12, 2017: The Obama administration finalizes new rules allowing the National  
8 Security Agency (NSA) to spread certain intelligence to 16 other U.S. intel agencies without the  
9 normal privacy protections. President Obama commutes all but the last four months of Manning’s  
10 sentence for leaking intelligence information to WikiLeaks.

11  
12 February 2, 2017: The news reports that five information technology (IT) computer  
13 professionals employed by Democrats in the House of Representatives are under criminal  
14 investigation for allegedly “accessing House IT systems without lawmakers’ knowledge.” The  
15 suspects include three brothers identified as Abid, Imran and Jamal Awan “who managed office  
16 information technology for members of the House Permanent Select Committee on Intelligence and  
17 other lawmakers.” The brothers were said to have been employed by three Democrats on the  
18 Intelligence Committee and “five members of the House Committee on Foreign Affairs which deal  
19 with with many of the nation’s most sensitive issues and documents, including those related to the  
20 war on terrorism.”

21  
22 February 9, 2017: News of the FBI recordings of Lt. Gen. Flynn speaking with Russia’s  
23 ambassador is leaked to the press. The New York Times and the Washington Post report that Flynn  
24 was captured on wiretaps discussing current U.S. sanctions, despite Flynn’s earlier denials. The  
25 Washington Post also reports the FBI reviewed Flynn’s calls with Russian ambassador and “found  
26 nothing illicit.”

27  
28 Feb. 13, 2017: Trump National Security Adviser Flynn resigns, acknowledging he had

1 misled Vice President Pence about his Russia conversations.

2  
3 March 2017: The House Intelligence Committee requests a list of unmasking requests made  
4 during a certain time period by Obama officials. The intelligence committee does not provide the  
5 information, prompting a June 1 subpoena.

6  
7 March 1, 2017: The Washington Post learns and reports that Trump Attorney General Jeff  
8 Sessions has met with the Russian ambassador twice in the recent past. Sessions had told Congress  
9 he didn't communicate with the Russians during the campaign. (The Russian ambassador had  
10 sought out and met with numerous high-ranking Democrat and Republican officials.)

11 Attorney General Jeff Sessions

12  
13 March 2, 2017: In an interview on MSNBC, Obama Deputy Assistant Secretary of Defense  
14 Evelyn Farkas says that once President Trump was elected, she urged her former colleagues to “get  
15 as much information as you can, get as much intelligence as you can [about Trump and his  
16 associates] before President Obama leaves the administration” and get it to “people on Capitol  
17 Hill.”

18 Former Obama Deputy Assistant Secretary of Defense for Russia, Evelyn Farkas - Trump  
19 Attorney General Jeff Sessions recuses himself from any Trump campaign-related investigations  
20 after backtracking on earlier statements that he had not met with Russian officials prior to the  
21 election.

22  
23 March 4, 2017: President Trump tweets: “Is it legal for a sitting President to be ‘wire  
24 tapping’ a race for president prior to an election? Turned down by court earlier. A NEW LOW!”  
25 and “How low has President Obama gone to tapp my phones during the very sacred election  
26 process. This is Nixon/Watergate. Bad (or sick) guy!”

27  
28 March 10, 2017: Former Congressman Dennis Kucinich, a Democrat, steps forward to

1 support Trump’s wiretapping claim, revealing that the Obama administration recorded his  
2 (Kucinich’s) communications with a Libyan official in Spring 2011.

3  
4 March 20, 2017: At a hearing, lead House Intelligence Committee Democrat Adam Schiff  
5 places Trump adviser Carter Page at the center of a theoretical alleged collusion with Russia. (It’s  
6 not yet publicly known that the FBI has been surveilling Page.) Some critics see Schiff’s storyline  
7 as an attempt to establish public justification for the Obama administration intel community’s  
8 controversial surveillance of the Trump adviser during the 2016 political campaign.

9 Rep. Adam Schiff

10  
11 March 22, 2017: Chairman of the House Intelligence Committee Devin Nunes publicly  
12 announces that he has reviewed evidence of U.S. citizens associated with Trump being  
13 “incidentally” surveilled by Obama intelligence officials, and that the names and information of the  
14 Trump associates were illegally leaked and/or used, mostly in November, December and January.  
15 Nunes attends a meeting at the White House to discuss. He’s criticized for viewing the evidence and  
16 speaking of it publicly. In an interview on PBS, former Obama National Security Adviser Rice says  
17 “I know nothing about this...I really don’t know to what Chairman Nunes was referring.”

18  
19 March 24, 2017: The political firm that compiled the Trump “dossier” that was leaked to the  
20 press, Fusion GPS, declines to answer questions or document requests from Sen. Charles Grassley.

21  
22 March 31, 2017: Democrat Schiff is invited to the White House to review intel material  
23 Republican Nunes saw earlier.

24  
25 April 3, 2017: Multiple news reports state that prior to the election, Rice had requested and  
26 reviewed “unmasked” intelligence on Trump associates whose information was “incidentally”  
27 collected by intelligence agencies.

28

1 April 4, 2017: In an interview on MSNBC, Rice seems to reverse herself (having earlier said  
2 she knew “nothing” about unmasking of surveilled Trump associates) and admits having asked for  
3 names of U.S. citizens previously masked in intelligence reports. Rice says her motivations were  
4 not political or to spy. When asked if she leaked names of U.S. citizens, Rice replies, “I leaked  
5 nothing to nobody.”  
6

7 April 6, 2017: House Intelligence Committee Chairman Nunes recuses himself from the  
8 Russia part of his committee’s investigation.  
9

10 April 11, 2017: Someone leaks to the Washington Post, and the Post reports, that the FBI  
11 secretly obtained a FISA court order last summer to monitor Trump campaign associate Carter  
12 Page. Trump critics say the existence of the order proves there was possible criminal activity by  
13 Trump associates. However, Trump supporters say the leak is an attempt to frame damning  
14 revelations as they are coming to light: that the Obama administration was, indeed, surveilling the  
15 political campaign of at least one opponent.  
16

17 April 28, 2017: The NSA announces it “will no longer collect certain internet  
18 communications that merely mention a foreign intelligence target.” This after it secretly disclosed  
19 mass violations to the FISA court last October. The NSA also begins deleting prior collected data. It  
20 says it’s doing this to avoid further violations.  
21

22 May 2, 2017: Members of Senate Intelligence Committee go to CIA headquarters to get  
23 briefed on Russia-Trump connections. The following day, CNN asks Senate Intelligence Committee  
24 member Dianne Feinstein if there is evidence of “collusion between Trump associates and Russia  
25 during the campaign.” “Not at this time,” replies Feinstein.  
26

27 May 3, 2017: Obama’s former National Security Adviser Susan Rice declines Republican  
28 Congressional request to testify at a hearing about the unmasking and surveillance.

1  
2 May 4, 2017: It's revealed that in the election year of 2016, the Obama administration vastly  
3 ePlaintiff 42anded its searches of NSA database for Americans and the content of their emails and  
4 phone calls: From 9500 searches involving 198 Americans in 2013 to 30,355 searches of 5,288  
5 Americans in 2016.

6  
7 May 5, 2017: Senator and former Presidential candidate Rand Paul (R-KY) formally asks  
8 the White House and intelligence community whether he was surveilled under the Obama  
9 administration.

10  
11 May 14, 2017: Former Director of National Intelligence James Clapper and ex-Deputy  
12 Attorney General Sally Yates, Obama administration officials, admit to reviewing "classified  
13 documents in which Mr. Trump, his associates or members of Congress had been unmasked." They  
14 won't provide further details in public.

15  
16 May 31, 2017: Document is disclosed to Justice Department in a lawsuit claiming the NSA  
17 engaged in "blanket surveillance" of the 2002 Winter Olympics in Salt Lake City, Utah, collecting  
18 and storing "virtually all electronic communications going into or out of the Salt Lake City area,  
19 including the contents of emails and text messages" to "ePlaintiff 42eriment with and fine tune a  
20 new scale of mass surveillance." Former CIA and NSA director Michael Hayden has denied such a  
21 program existed.

22  
23 June 1, 2017: House Intelligence Committee issues 7 subpoenas including for information  
24 related to unmaskings requested by ex-Obama officials national security adviser Susan Rice, former  
25 CIA Director John Brennan and former U.S. ambassador to the U.N. Samantha Power. Chairman  
26 Devin Nunes says the intelligence community has been stonewalling the committee's March request  
27 for a list of all the unmaskings that occurred during a certain time period.  
28

1 Sept. 13, 2017; Under questioning from Congress, former Obama adviser Susan Rice  
2 reportedly admits having requested to see the protected identities of Trump transition officials who  
3 were “incidentally” captured by government surveillance. (For their privacy protection, identities of  
4 U.S. citizens captured during surveillance of foreign foreign targets are supposed to be protected or  
5 “masked” from other government officials. Applications by federal officials to “unmask” the names  
6 or see the identities are supposed to be rare and carefully considered.

7  
8 Sept. 18, 2017: CNN reports that the Obama Justice Department wiretapped Trump  
9 campaign manager Paul Manafort before the 2016 election over Russia ties, closed the  
10 investigation, then began surveillance anew sometime in the fall and continued it through the early  
11 part of 2017.

12  
13 October 17, 2017: After word that Obama U.N. Ambassador Samantha Power had made  
14 near daily unmasking requests during the 2016 election year, Power reportedly told Congressional  
15 investigators that many of the requests in her name were not made by her.

By Jean-Charles Brisard and Senate Ethics Committee Staff

Russian "treasure maps" are acquired by local Afghan CIA operatives which claim that, during Russia's occupation of Afghanistan, Russia uncovered "trillions" of dollars of rare earth minerals in Afghanistan. These maps are now thought to have been fakes. USAID prepares marketing documents to sell an invasion of Afghanistan to Big Tech oligarchs in Silicon Valley with the promise that "all of their electric car batteries and cell phones" can come from Afghan mines. Obama staff tell Silicon Valley search engine and web companies that if "they put Obama in Office, Obama will give them the Afghan rare earth mine upside.", as a quid-pro-quo trade. Elon Musk, his business partners and some California Senators get wind of this and want "their piece of the pie".

A 1998 memo written by al-Qaida military chief Mohammed Atef reveals that Osama bin Laden's group had detailed knowledge of negotiations that were taking place between Afghanistan's ruling Taliban and American government and business leaders over plans for a U.S. oil and gas pipeline across that Central Asian country. The e-mail memo was found in 1998 on a computer seized by the FBI during its investigation into the 1998 African embassy bombings, which were sponsored by al-Qaida. Atef's memo was discovered by FBI counter-terrorism expert John O'Neill, who left the bureau in 2001, complaining that U.S. oil interests were hindering his investigation into al-Qaida. O'Neill, who became security chief at the World Trade Center, died in the Sept. 11 attack.

Atef's memo shines new light on what al-Qaida knew about U.S. efforts to normalize relations with the Taliban in exchange for the fundamentalist government's supporting the

1 construction of an oil and gas pipeline and rare earth mines across Afghanistan. As documented in  
2 the book I coauthored with Guillaume Dasquie, "Bin Laden: The Forbidden Truth," the Clinton and  
3 Bush administrations negotiated with the Taliban, both to get the repressive regime to widen its  
4 government as well as look favorably on U.S. companies' attempts to construct an oil pipeline. The  
5 Bush White House stepped up negotiations

6 with the Taliban in 2001. When those talks stalled in July, a Bush administration  
7 representative threatened the Taliban with military reprisals if the government did not go along with  
8 American demands.

9  
10 The seven-page memo was signed "Abu Hafs," which is the military name of Atef, who was  
11 the military chief of al-Qaida and is believed to have been killed in November 2001 during U.S.  
12 operations in Afghanistan. It shows al-Qaida's keen interest in the U.S.-Taliban negotiations and  
13 raises new questions as to whether the U.S. military threat to the Taliban in July

14 2001 could have prompted al-Qaida's Sept. 11 attack.

15  
16 Atef's memo is not about the pipeline alone, though it mentions the project several times. It  
17 is an analysis of the political situation facing the Taliban. It documents the movement's rise, its  
18 leadership, the geopolitical importance of Afghanistan, the Taliban's relationship with Pakistan, as  
19 well as the movement's relationship with the Arab mujahedin. The document's intended readership  
20 is unclear. But it reveals that the pipeline was seen as a strategic offering toward the West, in order  
21 to make the Taliban government acceptable to the United States and Pakistan, as well as to reduce  
22 military and investigative pressure on the country to rein in or even extradite bin Laden.

23  
24 Atef explains that the United States wants "to take control of any region which has huge  
25 quantities of oil reserves," and "the American government is keen on laying the oil and gas  
26 pipelines from Turkmenistan through Afghanistan to Pakistan." Atef concludes that al-Qaida's "duty  
27 toward the movement [Taliban] is to stand behind it, support it materially and

28 morally, especially because its regional and international enemies are working night and

1 day to put an end to it and make it fail."  
2

3 It seems clear the military chief didn't expect the pipeline negotiations to bear fruit.  
4 Referring to Pakistanis as "nonbelievers," and noting that the pipeline "will be under American  
5 control " and it also goes through the territories of Pakistan which are allied to America," Atef  
6 implies that the Taliban has no intention of ultimately cooperating with the project, but is trying to  
7 string along the Americans and Pakistanis to win some breathing room for its unpopular  
8 government.  
9

10 The Atef memo is the latest piece of evidence documenting a murky chapter in recent  
11 American history - the overtures of the last two American administrations to the repressive Taliban  
12 regime. Several U.S. oil companies, most notably Unocal, had been advocates of diplomatic  
13 overtures to the Taliban, in order to facilitate the building of a pipeline from the

14 Caspian Sea region to Pakistan and the Persian Gulf through Afghanistan. In 1996, Unocal  
15 vice president Chris Taggart described the fall of Kabul to the Taliban regime as a "very positive  
16 step" and urged the U.S. to extend recognition to the new rulers in Kabul and thus "lead the way to  
17 international lending agencies coming in."  
18

19 Just 10 days after the Taliban seized power in Kabul, Zalmay Khalilzad, former National  
20 Security Council official and Unocal consultant who was appointed special envoy to Afghanistan by  
21 President George W. Bush at the end of 2001, argued in a Washington Post opinion article that the  
22 U.S. should try to work with the mullahs and form a broad-based government that

23 included other factions. "The Taliban does not practice the anti-U.S. style of  
24 fundamentalism practiced by Iran - it is closer to the Saudi model ."Khalilzad contended,  
25 concluding that "we should use as a positive incentive the benefits that will accrue to Afghanistan  
26 from the construction of oil, mining and gas pipelines across its territory " These projects will only  
27 go forward if Afghanistan has a single authoritative government."  
28

1           Soon after, the State Department spokesman Glyn Davies told the New York Times he had  
2 hope that "the new authorities in Kabul will move quickly to restore order and security and to form  
3 a representative interim government that can begin the process of reconciliation nationwide."  
4 Davies also said the United States "wanted to send diplomats to Afghanistan to meet with the  
5 Taliban and held out the possibility of re-establishing full diplomatic ties with the country,"  
6 according to the Times.

7  
8           - 1997  
9

10           In November 1997 Unocal invited a Taliban delegation to Texas and, in early December, the  
11 company opened a training center at the University of Nebraska, to instruct 137 Afghans in pipeline  
12 construction technology. The company also donated to the university's Center for Afghanistan  
13 Studies. Unocal CEO John Imle estimated that the company spent between \$15 and \$20  
14 million on its Central Asia oil pipeline (CentGas) project - on preliminary feasibility  
15 studies, humanitarian projects and other efforts to lobby the Taliban (Unocal equipped the regime  
16 with satellite phones, for instance.)  
17

18           - 1998  
19

20           In February 1998, Unocal's vice president for international relations, John Maresca, told a  
21 House subcommittee hearing on U.S. interests in the Central Asian Republics that an oil pipeline  
22 "would benefit Afghanistan, which would receive revenues from transport tariffs, and would  
23 promote stability and encourage trade and economic development." Emphasizing that "the proposed  
24 Central Asia Oil Pipeline (CentGas) cannot begin construction until an internationally recognized  
25 Afghanistan government is in place," he urged the administration and the Congress "to give strong  
26 support to the

27           United Nations-led peace process in Afghanistan."  
28

1           Until the 1998 al-Qaida embassy bombings, the Clinton administration's approach toward  
2 the Taliban was much the same as Unocal's: All parties agreed that the political stabilization of  
3 Afghanistan was crucial to the region, and was also a way to gain access to oil reserves of the  
4 Caspian Sea region. Though bin Laden had been in the country since 1996, the U.S.  
5           had not pressured the Taliban to hand him over.

6  
7           The embassy bombings in August 1998 changed everything. The Clinton administration  
8 denounced the regime and Secretary of State Madeleine Albright turned up the heat on Taliban  
9 human rights abuses. The United Nations imposed sanctions, freezing Afghanistan's foreign assets  
10 and limiting its citizens' travel. The U.S. continued to talk to the Taliban, but the emphasis was on  
11 extraditing bin Laden in exchange for international recognition; the pipeline was off the table.  
12 Unocal, which had been close to finalizing its pipeline deal before the embassy bombings, cancelled  
13 it.

14  
15           When George W. Bush took office in 2001, his administration made new overtures to the  
16 Taliban, and the pipeline deal gained renewed support, as an incentive to get the Taliban to make  
17 political concessions and form a broader government. U.S. representatives met with Afghanistan's  
18 former King Shah, to see if he might be included in a new government. And American companies  
19 began exploring the failed 1998 pipeline project. A report by an Afghan-born Enron  
20 manager in July 2001, for instance, illustrates that company's deep interest in some sort of pipeline  
21 deal. Enron had begun funding the same sorts of humanitarian projects as Unocal had three years  
22 earlier.

23  
24           In March 2001, several Taliban officials, including Sayed Rahmattullah Hashimi, Mullah  
25 Omar's personal advisor, were invited to Washington by their U.S. lobbyist, Leila Helms, the niece  
26 of former CIA Director Richard Helms. The agenda included discussions of extraditing bin Laden  
27 as well as facilitating American companies' access to oil reserves in central Asia. The delegation  
28 met with representatives of the Directorate of Central Intelligence (DCI) and the Bureau of

1 Intelligence and Research of the State Department.

2  
3 This visit provoked concern and criticism in Washington over how Hashimi obtained a visa,  
4 a plane ticket, security clearance and access to American institutions - including the State  
5 Department and the National Security Council - despite travel restrictions on Taliban leadership  
6 imposed by U.N. sanctions (the official answer was that Hashimi fell below the rank of senior  
7 official covered by the sanctions.) Four months later, American diplomats met with Taliban  
8 emissaries as well

9 as representatives from Pakistan, Iran and Russia for four days of talks in Berlin in mid-  
10 July. Again, the message was that if the Taliban would extradite bin Laden and form a broad-based  
11 national government, it could win international recognition and reap extensive economic subsidies  
12 from the construction of a pipeline. The meeting was one of several convened by Francesco  
13 Vendrell, a Spanish diplomat who serves as the U.N.'s chief representative on Afghanistan. The  
14 delegates at the July meeting included Robert Oakley, former U.S. ambassador and Unocal lobbyist;  
15 Karl "Rick" Inderfurth, former assistant secretary of state for South Asian affairs; Lee Coldren, head  
16 of the Office of Pakistan, Afghan and Bangladesh Affairs in the State Department until 1997; Tom  
17 Simons, former U.S. ambassador to Pakistan and the most recent official negotiator with the  
18 Taliban; Niaz Naik, former Foreign Minister of Pakistan; Nikolai Kozyrev, a former Russian special  
19 envoy to Afghanistan; and Saeed Rajai Khorassani, formerly the Iranian representative to the U.N.  
20 The Taliban ambassador to Pakistan, Abdul Salam Zaeef, attended several sessions with some of  
21 the delegates in Berlin, according to Naif Naik, though officially the Taliban had not been invited.  
22 Naik was expected to carry the U.S. message to the Taliban.

23  
24 According to Naik, the point of the meeting was that "we would try to convey to them that if  
25 they did certain things, then, gradually, they could win the jackpot, get something in return from the  
26 international community." It might, Naik said, "be possible to persuade the Taliban that once a  
27 broader-based government was in place and the oil pipeline under way, there would be billions of  
28 dollars in commission, and the Taliban would have their own resources."

1  
2 It was at the July meeting, according to Naik, that Tom Simons suggested that Afghanistan  
3 could face an open-ended military operation from bases in Uzbekistan and Tajikistan if it didn't  
4 accede to U.S. demands. "Ambassador Simons stated that if the Taliban wouldn't agree with the  
5 plan, and if Pakistan was unable to persuade them, the United States might use an overt action  
6 against Afghanistan," Naik says. The words used by Simons were "a military operation," according  
7 to Naik. Another participant reportedly said the Taliban's choice was clear: either accept a "carpet of  
8 gold" riches

9 from the pipeline or "a carpet of bombs," meaning a military strike.

10  
11 Lee Coldren, a member of the U.S. delegation, also confirmed to the British newspaper the  
12 Guardian the American position at the Berlin meeting. "I think there was some discussion of the  
13 fact that the United States was so disgusted with the Taliban that they might be considering some  
14 military action."

15  
16 In statements to newspapers, Simons has offered ambiguous explanations of his statements  
17 at the July meeting. In September, he told the British Guardian: "I've known Naik and considered  
18 him a friend for years. He's an honorable diplomat. I didn't say anything like that and didn't hear  
19 anyone else say anything like that. We were clear that feeling in Washington was strong, and that  
20 military action was one of the options down the road. But details, I don't know where they came  
21 from." Yet in a November interview with Le Monde, Simons seemed to confirm that there had been  
22 some talk of U.S. military action. "It is true that the Taliban was asked to deliver bin Laden and  
23 form a [broader] government," Simons told Le Monde. "We said in July that we were investigating  
24 the attack against the USS Cole in Yemen, and that if there were solid evidence of the implication  
25 of bin Laden, one had to expect a military answer. One can always inflate such a  
26 declaration to see a global threat against the Taliban. But the American declaration related only to  
27 the response to the

28 USS-Cole.

1  
2 "As for the "carpet of gold and the carpet of bombs,' we actually discussed the need for a  
3 plan for rebuilding for Afghanistan, which would follow a political agreement," he said, adding that  
4 "It's possible that a mischievous American participant, after several drinks, may have thought it  
5 smart to evoke gold carpets and carpet bombs. Even Americans can't resist the temptation to be  
6 mischievous."

7  
8 The last known meeting between U.S. and Taliban representatives took place in August, five  
9 weeks before the Sept. 11 attacks, when U.S. Assistant Secretary of State for Central Asian affairs  
10 Christina Rocca met with the Taliban's ambassador to Pakistan Abdul Salam Zaeef.

11  
12 It would be unfair to suggest that the U.S. threat in July led to the al-Qaida strike. But while  
13 Simons doesn't admit that he personally threatened the Taliban with reprisal, he confirms that only a  
14 few weeks before Sept. 11, American diplomats warned of military action against Afghanistan if its  
15 leaders did not meet U.S. economic and political demands. It is worth asking whether, had this  
16 threat been widely known, U.S. intelligence agencies might have analyzed the information they  
17 were

18 receiving about bin Laden's plots against the U.S. differently.

19  
20 Now the newly discovered Atef memo makes clear that in 1998, at least, al-Qaida was well  
21 informed about negotiations between the Taliban and the U.S. on the oil pipeline and other  
22 American concerns. The memo also shows that those negotiations were the Taliban's gambit to  
23 extend its power; Mullah Omar's government never had any intention of allowing U.S. firms to  
24 construct an oil pipeline, or letting the U.S. dictate the members of its ruling body. Given the inside  
25 knowledge al-Qaida had about U.S.-Taliban negotiations, it's reasonable to suspect bin Laden's  
26 group also received and understood the U.S. threat of military action delivered in late July as a  
27 threat of war.

1 In the end, though, the U.S. got its way. Interim Afghan leader Hamid Karzai decided on  
2 May 30 to revive the pipeline project with Pakistan and Turkmenistan, signing an agreement under  
3 which the three governments agree to implement a pipeline from Turkmenistan to Pakistan through  
4 Afghanistan. Would that U.S. intelligence agencies' investigations into al-Qaida activities in the  
5 months before Sept. 11 had such a productive ending.

6  
7 1. 1991-1997 - Major U.S. oil companies including ExxonMobil, Texaco, Unocal, BP  
8 Amoco, Shell and Enron directly invest billions in cash bribing heads of state in Kazakhstan to  
9 secure equity rights in the huge oil reserves in these regions. The oil companies further commit to  
10 future direct investments in Kazakhstan of \$35 billion. Not being willing to pay exorbitant prices to  
11 Russia to use Russian pipelines the major oil companies have no way to recoup their investments.  
12 ["The Price of Oil," by Seymour Hersh, The New Yorker, July 9, 2001 - The Asia Times, "The  
13 Roving Eye Part I Jan. 26, 2002.]

14  
15 2. December 4, 1997 - Representatives of the Taliban are invited guests to the Texas  
16 headquarters of Unocal to negotiate their support for the pipeline. Subsequent reports will indicate  
17 that the negotiations failed, allegedly because the Taliban wanted too much money. [Source: The  
18 BBC, Dec.

19 4, 1997]

20  
21 3. February 12, 1998 - Unocal Vice President John J. Maresca - later to become a Special  
22 Ambassador to Afghanistan - testifies before the House that until a single, unified, friendly  
23 government is in place in Afghanistan the trans-Afghani pipeline needed to monetize the oil will not  
24 be built. [Source: Testimony before the House International Relations Committee.]

25  
26 4. 1998 - The CIA ignores warnings from Case Officer Robert Baer that Saudi Arabia  
27 was harboring an al-Q'aeda cell led by two known terrorists. A more detailed list of known terrorists  
28 is offered to Saudi intelligence in August 2001 and refused. [Source: Financial Times 1/12/01; See

1 No Evil by a book by Robert Baer (release date Feb. 2002).

2  
3 5. April, 1999 - Enron with a \$3 billion investment to build an electrical generating plant  
4 at Dabhol India loses access to plentiful LNG supplies from Qatar to fuel the plant. Its only  
5 remaining option to make the investment profitable is a trans-Afghani gas pipeline to be built by  
6 Unocal from Turkmenistan that would terminate near the Indian border at the city of Multan.

7 [Source: The Albion Monitor, Feb. 28, 2002.]

8  
9 6. 1998 and 2000 - Former President George H.W. Bush travels to Saudi Arabia on  
10 behalf of the privately owned Carlyle Group, the 11th largest defense contractor in the U.S. While  
11 there he meets privately with the Saudi royal family and the bin Laden family. [Source: Wall Street  
12 Journal, Sept. 27, 2001. See also FTW, Vol. IV, No 7 - "The Best Enemies Money Can Buy," -  
13 <http://www.fromthewilderness.com/members/carlyle.html>. ]

14  
15 7. January, 2001 - The Bush Administration orders the FBI and intelligence agencies to  
16 "back off" investigations involving the bin Laden family, including two of Osama bin Laden's  
17 relatives (Abdullah and Omar) who were living in Falls Church, VA - right next to CIA  
18 headquarters. This followed previous orders dating back to 1996, frustrating efforts to  
19 investigate the bin Laden family. [Source: BBC Newsnight, Correspondent Gregg Palast -  
20 Nov 7, 2001].

21  
22 8. Feb 13, 2001 - UPI Terrorism Correspondent Richard Sale - while covering a trial of  
23 bin Laden's Al Q'aeda followers - reports that the National Security Agency has broken bin Laden's  
24 encrypted communications. Even if this indicates that bin Laden changed systems in February it  
25 does not mesh with the fact that the government insists that the attacks had been planned for years.

26  
27 9. May 2001 - Secretary of State Colin Powell gives \$43 million in aid to the Taliban  
28 regime, purportedly to assist hungry farmers who are starving since the destruction of their opium

1 crop in January on orders of the Taliban regime. [Source: The Los Angeles Times, May 22, 2001].

2  
3 10. May, 2001 - Deputy Secretary of State Richard Armitage, a career covert operative  
4 and former Navy Seal, travels to India on a publicized tour while CIA Director George Tenet makes  
5 a quiet visit to Pakistan to meet with Pakistani leader General Pervez Musharraf. Armitage has long  
6 and deep Pakistani intelligence connections and he is the recipient of the highest civil decoration  
7 awarded by Pakistan. It would be reasonable to assume that while in Islamabad, Tenet, in what was  
8 described as "an unusually long meeting," also met with his Pakistani counterpart, Lt. General  
9 Mahmud Ahmad, head of the ISI. [Source The Indian SAPRA news agency, May 22, 2001.]

10  
11 11. June 2001 - German intelligence, the BND, warns the CIA and Israel that Middle  
12 Eastern terrorists are "planning to hijack commercial aircraft to use as weapons to attack important  
13 symbols of American and Israeli culture." [Source: Frankfurter Allgemeine Zeitung, September 14,  
14 2001.]

15  
16 12. July, 2001 - Three American officials: Tom Simmons (former U.S. Ambassador to  
17 Pakistan), Karl Inderfurth (former Assistant Secretary of State for South Asian affairs) and Lee  
18 Coldren (former State Department expert on South Asia), meet with Pakistani and Russian  
19 intelligence officers in Berlin and tell them that the U.S. is planning military strikes against  
20 Afghanistan in October. A French book released in November, "Bin Laden - La Verité  
21 Interdite," discloses that Taliban representatives often sat in on the meetings. British papers confirm  
22 that the Pakistani ISI relayed the  
23 threats to the Taliban. [Source: The Guardian, September 22, 2001; the BBC, September 18,  
24 2001. The Inter Press Service, Nov 16, 2001]

25  
26 13. Summer, 2001 - The National Security Council convenes a Dabhol working group as  
27 revealed in a series of government e-mails obtained by The Washington Post and the New York  
28 Daily News. [Source: The Albion Monitor, Feb. 28, 2002]

1  
2 14. Summer 2001 - According to a Sept. 26 story in Britain's The Guardian,  
3 correspondent David Leigh reported that, "U.S. department of defense official, Dr. Jeffrey Starr,  
4 visited Tajikistan in January. The Guardian's Felicity Lawrence established that US Rangers were  
5 also training special troops in Kyrgyzstan. There were unconfirmed reports that Tajik and  
6 Uzbek special troops were training in Alaska and Montana."

7  
8 15. Summer 2001 (est.) - Pakistani ISI Chief General Ahmad (see above) orders an aide to  
9 wire transfer \$100,000 to Mohammed Atta, who was according to the FBI, the lead terrorist in the  
10 suicide hijackings. Ahmad recently resigned after the transfer was disclosed in India and confirmed  
11 by the FBI. [Source: The Times of India, October 11, 2001.]

12  
13 16. Summer 2001 - An Iranian man phones U.S. law enforcement to warn of an imminent  
14 attack on the World Trade Center in the week of September 9th. German police confirm the calls  
15 but state that the U.S. Secret Service would not reveal any further information. [Source: German  
16 news agency "online.de", September 14, 2001, translation retrieved from online.ie in Ireland.]

17  
18 17. June 26, 2001 - The magazine indiareacts.com states that "India and Iran will  
19 'facilitate' US and Russian plans for 'limited military action' against the Taliban." The story  
20 indicates that the fighting will be done by US and Russian troops with the help of Tajikistan and  
21 Uzbekistan. [Source: indiareacts.com, June 26, 2001.]

22  
23 18. August 2001 - The FBI arrests an Islamic militant linked to bin Laden in Boston.  
24 French intelligence sources confirm that the man is a key member of bin Laden's network and the  
25 FBI learns that he has been taking flying lessons. At the time of his arrest the man is in possession  
26 of technical information on Boeing aircraft and flight manuals. [Source:

27 Reuters, September 13.]  
28

1           19.    August 11 or 12 - US Navy Lt. Delmart "Mike" Vreeland, jailed in Toronto on U.S.  
2 fraud charges and claiming to be an officer in U.S. Naval intelligence, writes details of the pending  
3 WTC attacks and seals them in an envelope which he gives to Canadian authorities. [Source: The  
4 Toronto Star, Oct. 23, 2001; Toronto Superior Court Records]

5  
6           20.    Summer 2001 - Russian intelligence notifies the CIA that 25 terrorist pilots have been  
7 specifically training for suicide missions. This is reported in the Russian press and news stories are  
8 translated for FTW by a retired CIA officer.

9  
10          21.    July 4-14, 2001 - Osama bin Laden receives treatments for kidney disease at the  
11 American hospital in Dubai and meets with a CIA official who returns to CIA headquarters on July  
12 15th. [Source: Le Figaro, October 31st, 2001.]

13  
14          22.    August 2001 - Russian President Vladimir Putin orders Russian intelligence to warn  
15 the U.S. government "in the strongest possible terms" of imminent attacks on airports and  
16 government buildings. [Source: MS-NBC interview with Putin, September 15.]

17  
18          23.    August/September, 2001 - The Dow Jones Industrial Average drops nearly 900 points  
19 in the three weeks prior to the attack. A major stock market crash is imminent.

20  
21          24.    Sept. 3-10, 2001 - MS-NBC reports on September 16 that a caller to a Cayman Islands  
22 radio talk show gave several warnings of an imminent attack on the U.S. by bin Laden in the week  
23 prior to 9/11.

24  
25          25.    September 1-10, 2001 - In an exercise, Operation "Swift Sword" planned for four  
26 years, 23, 000 British troops are steaming toward Oman. Although the 9/11 attacks caused a hiccup  
27 in the deployment the massive operation was implemented as planned. At the same time two U.S.  
28 carrier battle groups arrive on station in the Gulf of Arabia just off the Pakistani

1 coast. Also at the same time, some 17,000 U.S. troops join more than 23,000 NATO troops  
2 in Egypt for Operation "Bright Star." All of these forces are in place before the first plane hits the  
3 World Trade Center. [Sources: The Guardian, CNN, FOX, The Observer, International Law  
4 Professor Francis Boyle, the University of Illinois.]

5  
6 26. September 7, 2001 - Florida Governor Jeb Bush signs a two-year emergency  
7 executive order (01-261) making new provisions for the Florida National Guard to assist law  
8 enforcement and emergency-management personnel in the event of large civil disturbances, disaster  
9 or acts of terrorism. [Source: State of Florida web site listing of Governor's Executive Orders.]

10  
11 27. September 6-7, 2001 - 4,744 put options (a speculation that the stock will go down)  
12 are purchased on United Air Lines stock as opposed to only 396 call options (speculation that the  
13 stock will go up). This is a dramatic and abnormal increase in sales of put options. Many of the  
14 UAL puts are purchased through Deutschebank/AB Brown, a firm managed until 1998 by the  
15 current Executive Director of the CIA, A.B. "Buzzy" Krongard. [Source: The Herzliyya  
16 International Policy Institute for Counterterrorism, <http://www.ict.org.il/>, September 21; The New  
17 York Times; The Wall Street Journal.]

18  
19 28. September 10, 2001 - 4,516 put options are purchased on American Airlines as  
20 compared to 748 call options. [Source: ICT - above]

21  
22 29. September 6-11, 2001 - No other airlines show any similar trading patterns to those  
23 experienced by UAL and American. The put option purchases on both airlines were 600% above  
24 normal. This at a time when Reuters (September 10) issues a business report stating, "Airline stocks  
25 may be poised to take off."

26  
27 30. September 6-10, 2001 - Highly abnormal levels of put options are purchased in  
28 Merrill Lynch, Morgan Stanley, AXA Re(insurance) which owns 25% of American Airlines, and

1 Munich Re. All of these companies are directly impacted by the September 11 attacks. [Source:  
2 ICT, above; FTW, Vol. IV, No.7, October 18, 2001, [http://www.fromthewilderness.com/  
3 members/oct152001.html](http://www.fromthewilderness.com/members/oct152001.html). ]  
4

5 31. It has been documented that the CIA, the Israeli Mossad and many other intelligence  
6 agencies monitor stock trading in real time using highly advanced programs reported to be  
7 descended from Promis software. This is to alert national intelligence services of just such kinds of  
8 attacks. Promis was reported, as recently as June, 2001 to be in Osama bin Laden's possession and,  
9 as a result of recent stories by FOX, both the FBI and the Justice Department have confirmed its use  
10 for U.S. intelligence gathering through at least this summer. This would confirm that CIA had  
11 additional advance warning of imminent attacks. [Sources: The Washington Times, June 15, 2001;  
12 FOX News, October 16, 2001; FTW, October 26, 2001,  
13 -[http://www.fromthewilderness.com/members/magic\\_carpet.html](http://www.fromthewilderness.com/members/magic_carpet.html); FTW, Vol. IV, No.6, Sept. 18,

15 [http://www.fromthewilderness.com/free/pandora/052401\\_promis.html](http://www.fromthewilderness.com/free/pandora/052401_promis.html).  
16

17 32. September 11, 2001 - Gen Mahmud of the ISI (see above), friend of Mohammed Atta,  
18 is visiting Washington on behalf of the Taliban. He is meeting with the Chairmen of the House and  
19 Senate Intelligence Committees, Porter Goss (R), FL and Bob Graham (D), Fl [Sources: MS-NBC,  
20 Oct. 7, The New York Times, Feb. 17, 2002.]  
21

22 33. September 11, 2002 - Employees of Odigo, Inc. in Israel, one of the world's largest  
23 instant messaging companies, with offices in New York, receive threat warnings of an imminent  
24 attack on the WTC less than two hours

25 before the first plane hits the WTC. Law enforcement authorities have gone silent about any  
26 investigation of this. The Odigo Research and Development offices in Israel are located in the city  
27 of Herzliyya, a ritzy suburb of Tel Aviv which is the same location as the Institute for Counter  
28 Terrorism which breaks early details of insider trading on 9-11. [Source: CNN's Daniel Sieberg,

1 9/28/01; Newsbytes, Brian McWilliams, 9/27/01; Ha'aretz, 9/26/01.].

2  
3 34. September 11, 2001, For 50 minutes, from 8:15 AM until 9:05 AM, with it widely  
4 known within the FAA and the military that four planes have been simultaneously hijacked and  
5 taken off course, no one notifies the President

6 of the United States. It is not until 9:30 that any Air Force planes are scrambled to intercept,  
7 but by then it is too late. This means that the National Command Authority waited for 75 minutes  
8 before scrambling aircraft, even though it was known that four simultaneous hijackings had  
9 occurred - an event that has never happened in history. [Sources: CNN, ABC, MS-NBC, The Los  
10 Angeles Times, The New York Times.]

11  
12 35. September 13, 2001 - China is admitted to the World Trade Organization quickly,  
13 after 15 years of unsuccessful attempts. [Source: The New York Times, Sept. 30, 2001.]

14  
15 36. September 14, 2001 - Canadian jailers open the sealed envelope from Mike Vreeland  
16 in Toronto and see that it describes attacks against the WTC and Pentagon. The U.S. Navy  
17 subsequently states that Vreeland was discharged

18 as a seaman in 1986 for unsatisfactory performance and has never worked in intelligence.  
19 [Source: The Toronto Star, Oct. 23, 2001; Toronto Superior Court records]

20  
21 37. September 15, 2001 - The New York Times reports that Mayo Shattuck III has  
22 resigned, effective immediately, as head of the Alex (A.B) Brown unit of Deutschebank.

23  
24 38. September 29, 2001 - The San Francisco Chronicle reports that \$2.5 million in put  
25 options on American Airlines and United Airlines are unclaimed. This is likely the result of the  
26 suspension in trading on the NYSE after the attacks which gave the Securities and Exchange  
27 Commission time to be waiting when the owners showed up to redeem their put options.

28

1           39.   October 10, 2001 - The Pakistani newspaper The Frontier Post reports that U.S.  
2 Ambassador Wendy Chamberlain has paid a call on the Pakistani oil minister. A previously  
3 abandoned Unocal pipeline from Turkmenistan, across Afghanistan, to the Pakistani coast, for the  
4 purpose of selling oil and gas to China, is now back on the table "in view of recent geopolitical  
5 developments."

6  
7           40.   October 11, 2001 - The Ashcroft Justice Department takes over all terrorist  
8 prosecutions from the U.S. Attorneys office in New York which has had a highly successful track  
9 record in prosecuting terrorist cases connected to Osama bin Laden. [Source: The New York Times,  
10 Oct. 11, 2002.]

11  
12           41.   Mid October, 2001 - The Dow Jones Industrial Average, after having suffered a  
13 precipitous drop has recovered most of its pre-attack losses. Although still weak, and vulnerable to  
14 negative earnings reports, a crash has been averted by a massive infusion of government spending  
15 on defense programs, subsidies for "affected" industries and planned tax cuts for  
16 corporations.

17  
18           42.   November 21, 2001 - The British paper The Independent runs a story headlined,  
19 "Opium Farmers Rejoice at the Defeat of the Taliban." The story reports that massive opium  
20 planting is underway all over the country.

21  
22           43.   November 25, 2001 - The Observer runs a story headlined "Victorious Warlords Set  
23 To Open the Opium Floodgates." It states that farmers are being encouraged by warlords allied with  
24 the victorious Americans are "being encouraged to plant "as much opium as possible."

25  
26           44.   December 4, 2001 - Convicted drug lord and opium kingpin Ayub Afridi is recruited  
27 by the US government to help establish control in Afghanistan by unifying various Pashtun  
28 warlords. The former opium smuggler who was one of the CIA's leading assets in the war against

1 the Russians is released from prison in order to do this. [Source: The Asia Times Online, 12/4/01].

2  
3 45. December 25, 2001 - Newly appointed afghani Prime Minister Hamid Karzai is  
4 revealed as being a former paid consultant for Unocal. [Source: Le Monde.]

5  
6 46. January 3, 2002 - President Bush appoints Zalamy Khalilzad as a special envoy to  
7 Afghanistan. Khalilzad, a former employee of Unocal, also wrote op-eds in the Washington Post in  
8 1997 supporting the Taliban regime. [Source: Pravda, 1/9/02]

9  
10 47. January 4, 2002 - Florida drug trafficking ePlaintiff 42lodes after 9-11. In a surge of  
11 trafficking reminiscent of the 1980s the diversion of resources away from drug enforcement has  
12 opened the floodgates for a new surge of cocaine and heroin from South America. [The Christian  
13 Science Monitor, January 4, 2002.

14  
15 48. January 10, 2002 - In a call from a speaker phone in open court, attorneys for "Mike"  
16 Vreeland call the Pentagon's switchboard operator who confirms that Vreeland is indeed a Naval  
17 Lieutenant on active duty. She provides an office number and a direct dial phone extension to his  
18 office in the Pentagon. [Source: Attorney Rocco Galati; court records Toronto Superior Court.]

19  
20 49. January 10, 2002 - Attorney General John Ashcroft recuses himself from the Enron  
21 investigation because Enron had been a major campaign donor in his 2000 Senate race. He fails to  
22 recuse himself from involvement in two sitting Federal grand juries investigating bribery and  
23 corruption charges against ExxonMobil and BP-Amoco who have massive oil interests in Central  
24 Asia. Both were major Ashcroft donors in 2000. [Source: CNN, Jan. 10, 2002 - FTW original  
25 investigation, The Elephant in the Living Room, Part I, Apr 4, 2002.]

26  
27 50. February 9, 2002 - Pakistani leader General Musharraf and Afghan leader Hamid  
28 Karzai announce their agreement to "cooperate in all spheres of activity" including the proposed

1 Central Asian pipeline. Pakistan will give \$10 million to Afghanistan to help pay Afghani  
2 government workers. [Source:

3 The Irish Times, 2/9/02]

4  
5 51. Feb 18, 2002 - The Financial Times reports that the estimated opium harvest in  
6 Afghanistan in the late Spring of 2002 will reach a world record 4500 metric tons.

11  
12 PUBLIC TIMELINE: DEPARTMENT OF ENERGY SLUSH-FUND CLEANTECH  
13 CRASH SCANDAL CASE FILE REFERENCE NUMBERS

14  
15  
16 Rules: You may only add items that are clearly visible as facts in public university research  
17 libraries and on, at least, 5 or more public online or hard-copy newspapers. Include links, book  
18 references by ISBN # and video dates in your submissions for related archives. Items without  
19 validation evidence will be removed. No more than three sentences per item. Let's aim for daily  
20 additions. Item numbers are produced with a BATES NUMBERING" reference code to support  
21 federal and media investigators case files. Item numbers are generated upon acceptance by the jury  
22 team. All submissions are copied to law enforcement and related investigators. Submit your item  
23 proposals via the usual SOMO process. ("Ref:" links) may, or may not, include the validation facts  
24 that you send. ("Ref" links) may include already posted material, to save time. Volunteers will detail  
25 the reference links out as time allows.

66805678.00 - Steve Rattner indicted for Securities & Investment Fraud in NY

77995578.00 - Russian lithium and mineral mining companies partner with Silicon Valley VC's who "won" DOE cash.

7780087449.00 - Federal investigators report that Russian executives at DOE funding groups Severstal, Ener1 and others are on "watch-list".

5578000677.00 - IBM Consulting fired from DOE review program. Investigations on their actions begin.

66890088.00 - Dept. of Energy funding ordered to be frozen. No American small business ever receives any funding from program. All recipients turn out to be campaign financiers.

6780098560.00 - Key Dept. of Energy "winning" VC's indicted for tax fraud.

567890000.89 - Solyndra, Abound, Ener1, Fisker, and others go bankrupt. Largest ratio of taxpayerfunded, big-ticket, same industry bankruptcies in American history. All used Afghan minerals.

1 6699556789.05 - Investigations begin into Silicon Valley VC's use of tax-write offs from  
2 DOE bankruptcy in order to acquire overall profits from losses. Silicon Valley VC's make tax write-  
3 off profits on taxpayers multi-\$Billon loss.

4  
5  
6 446899667.99 - Goldman Sachs found to have interceded on almost every single Dept. of  
7 Energy LG and ATVM funding "winner" lobbying.

8  
9  
10 34579976699.00 - Bright Automotive, and other Dept. of Energy applicants, begin  
11 publishing open letters, in the press, denouncing the crooked nature of Dept. of Energy funding.

12  
13  
14 5567907689.00 - Rahm Emanuels D.O.E. "do not fund" list, from his White House tenure is  
15 noted by multiple ex-WH staff.

16  
17  
18 5679997656.00 - Senate investigators, agency investors and investigative media charge  
19 DOE, under Steven Chu, with running a "fraud", "embezzlement", "kick-back scheme".

20  
21  
22 6689955778.00 - Snowden revelations

23  
24  
25 8995688900.78 - Cross indexing of Snowden documents by reporters finds confirming set of  
26 names in same programs.

27

28

1 5579095657.99 - Massive number of main stream journalists depart large newspapers and  
2 cable news to start their own independent digital newspapers. Golden Age of New Media begins.  
3 Cover-ups fall apart in rapid succession.

4  
5  
6 334679990.00 - Detroit Auto heads begin resigning or getting fired as they realize  
7 investigations are getting close.

8  
9  
10 22568900.05 - U.S./Russia relations collapse. Silicon Valley/Russian deals eyed. Russian  
11 tipsters approach new media press with revelations as payback for their fallout from back-outs by  
12 Silicon Valley VC's and their companies: Space X, Tesla, lithium, solar, etc.

13  
14  
15 457890995.78 - Robert Gibbs protege, Jay Carney, resigns from White House.

16  
17  
18 65579966.67 - "Lines-of-connection" investigations reveal that TARP/DOE funding  
19 "winners; campaign financiers and profiteers are ALL THE SAME PEOPLE.

20  
21  
22 6689900088.00 - Tesla faces extensive lawsuits & charges. Begins buying real estate as  
23 investor back-up assets for possible off-books tax write-off spin if they are forced to declare  
24 bankruptcy. Those in WH, formerly protecting Tesla have left, or are leaving.

25

===

**THE FORBIDDEN TESLA TIMELINE THAT MUSK'S COVER-UP PEOPLE DON'T WANT YOU TO SEE:**

Derived from RICO CASE FILE #456-D-hj45A and Tesla Employee Testimony. 15 Tesla employees have provided every company email since 2003, between all suppliers, investors and third parties. (Their hard drives did not crash). All of this information can be independently verified with minor research and interviews.

**HIGHLIGHTS:**

(Full Timeline is 42 pages long)

1880's- Detroit Electric sells Electric cars commercially

1900-

38 percent of US automobiles are powered by electricity, but as Henry Ford designed the much cheaper T-Ford, the electric cars began to disappear.

22  
23  
24  
25  
26  
27  
28

1970 -

The price of gasoline hits record because of a series of energy crises, so the interest in electric cars increased again.

1971 -

In June Elon Musk was born into a highly dysfunctional, racist, family.

1996-1999 -

General Motors produced an electric car called EV1 and leased it to customers.

1999 -

Elon Musk sold his company Zip2, which he founded with his daddy's dirty mining money, and made \$22 million. He founded X.com that would become PayPal.

2002 -

eBay acquired PayPal and Elon Musk made \$165 million.

2003 - General Motors cancelled the lease program and removed the last EV1 from the streets. They said they couldn't sell enough of the cars to make the EV1 profitable.

July. Martin Eberhard and Marc Tarpenning incorporated Tesla Motors. They had earlier made a feasibility study to see if they could make an electric car. They now made a feasibility study together with AC Propulsion to see if the batteries would work.

1  
2 November. The 2 employees searched for a partner to build the rest of the car. Lotus became  
3 their choice. Lotus engineers, from England, agree to provide chassis of car.

4  
5 2004 -

6  
7 February. Ian Wright, who had met Martin Eberhard while on a plane, joined the company.  
8 They finished business plan 1.0. Ian later leaves Tesla in disgust when he realizes what they are up  
9 to

10  
11 March. Starting a car company is expensive, so they began to look for outside  
12 investors. Silicon Valley VC's discuss having Elon Musk take-over Tesla and get rid of the founders

13  
14 April. Series A funding where Elon Musk was the main investor. Elon Musk had earlier  
15 aligned with JB Straubel, as his directed mole, who had friends at AC Propulsion, and the VC's told  
16 Elon Musk to contact Tesla. Other investors included SDL Ventures and Compass Technology  
17 Partners. JB Straubel joined the company as employee number 5.

18  
19 May. An early styling study began at Tesla.

20  
21 June. A technology implementation study began.

22  
23 July. Tesla had 9 employees and moved to an office in San Carlos, California. They also  
24 made a "mule" which is a car that doesn't reproduce but you can see if the concept works. This fake  
25 "mule" car is shown as a real sellable car to DOE and investors, when, in fact, it is not

26  
27 October. The 15 employees began to design the drivetrain component.  
28

1 November. They installed the drivetrain in the Mule 1.

2

3 December. Tesla couldn't use the same design as the Lotus Elise, so they had a contest  
4 where Barney Hatt made the best design by copying most of the Lotus Elise so they would not have  
5 to pay Lotus the full licensing costs.

6

7 2005 -

8

9 January. They made a 1/4 scale model in clay of the design Barney Hatt had made. Tesla  
10 had now 18 employees and they also took out Mule 1 for a test drive but it was not legal to be  
11 driven on any road.

12

13 February. The now 23 employee strong company needed more money, so they made a series  
14 B funding. Not only Elon Musk invested more money, but also Valor Equity Partners. Tesla also  
15 opened an office in UK close to the Lotus office to try to tie into Lotus. Lotus is leery.

16

17 April-June. Tesla made a full-scale model in clay of the Tesla Roadster.

18

19 July. With 38 employees, they now tested a plastic model of the Roadster in a wind tunnel.

20

21 August. Some of the 41 employees began developing a motor.

22

23 December. 63 employees and they began to build the Mule 2 in fiberglass.

24

25 2006 -

26

27 January. A drivable Mule 2 was finished but it still isn't a production car and it is not legal  
28 for sale or driving on the road.

1  
2 April. The engineers thought the Roadster was finished so they made 10 engineering  
3 prototypes (EP), which compared to a Mule can (in theory) be produced.  
4

5 May. 92 employees and they finished the first EP, called EP 1. Tesla raised a series C round  
6 led by Vantage Point Partners and Elon Musk.  
7

8 July. Almost no-one knew that Tesla existed, until now when Tesla showed EP 1 and EP 2  
9 in Santa Monica, California.  
10

11 August. 100 employees. Tesla crash tests and technical reports reveal fire dangers. Tesla  
12 senior staff orders the reports shredded. Tesla had earlier crashed a few virtual cars, but they  
13 needed to know if the computers models were accurate. They also began to show the Roadster at  
14 events to market it.  
15

16 August. Elon Musk, John Doerr, Rahm Emanuel, Robert Gibbs and David Axelrod discuss a  
17 quid-pro-quo scheme to advance money for the Presidential and Senate campaigns and get paid  
18 back in spades from TARP and Dept. of Energy "Loans", tax credits, stock perks and monopolies.  
19

20 September. 120 employees. They made more tests, including radiated emissions and  
21 susceptibility testing. EMF emissions during charging were high and those reports were ordered  
22 shredded  
23

24 October. They made a durability test, which consists of driving the Roadster on a  
25 cobblestone racetrack. The idea is to simulate 100,000 miles in 6 months. It would have taken much  
26 longer time to drive the same distance on a smooth road. Tesla realized that their computer models  
27 were inaccurate - the Roadster's transmission didn't survive the durability test. Tesla is warned, by  
28 Detroit UAW executives that everything they are doing is wrong, wasting tens of millions of dollars

1 and could damage the overall auto industry. Musk hates unions and pledges to keep unions out. He  
2 ignores the advice due to narcissism issues.

3  
4 November 2004. 144 employees, and more tests, including driving through a saltwater bath.

5  
6 December. They showed the EP 2 at the Los Angeles Auto Show.

7  
8 2007 -

9  
10 January. Tesla brought the Roadster to Arvidsjaur, Sweden, to see if it could survive winter  
11 conditions. It had severe charging issues

12  
13 February. 205 employees. Tesla began to build a validation prototype (VP), where they took  
14 everything they learned from the engineering prototype. Tesla says it will build a \$35 million plant  
15 in Albuquerque, to produce the Model S. They lied.

16  
17 March. 230 employees and they finished the VP 1.

18  
19 April. In dire finances, Tesla raised more money - a series D round led by Elon Musk,  
20 Technology Partners, and Vantage Point.

21  
22 June. Tesla's motor factory in Taiwan was finished and it began producing parts.

23  
24 July. A new transmission was somewhat finished but still has ongoing problems.

25  
26 August. Tesla finished the VP 10. CEO Martin Eberhard was replaced by Tesla investor.  
27 Tesla's are now \$100,000.00 over budget PER CAR Michael Marks, hired, who would wprk as an  
28 interim-CEO until Tesla found a long-term CEO.

1  
2 September. Tesla delayed the launch of the Roadster because they needed more time to test  
3 its durability.

4  
5 October. Tesla transmission failed in the durability tests. Massive engineering failures are  
6 piling up. Tesla needed yet another transmission.

7  
8 November. Actual Tesla Martin Eberhard is forced out of the company after confronting  
9 Elon Musk regarding Musk's manipulations. Musk orders his PR group to launch character  
10 assassination campaign against Eberhardt

11  
12 December. Interim CEO Michael Marks see the lies and leaves and is replaced by interim  
13 CEO Ze'ev Drori. Bernard Tse is contracted, by Tesla, to hide the Tesla battery ePlaintiff 42losion  
14 documents that have been uncovered.

15  
16 December. Tesla says it will build it;s factory in Southern California. They lied.

17  
18 December. Sex worker hired by Musk attempts blackmail. Lawyers shut her down

19  
20 2008 -

21  
22 January. 260 employees. The VPs survived the new tests, so the Roadster was finished -  
23 except for the transmission. Tesla accountants notify Musk of impending bankruptcy. Tesla makes  
24 customers sign confidentiality agreements to keep from disclosing extensive defects and price  
25 changes that are constantly occurring.

26  
27 March. Tesla began production of the Roadster. Elon Musk cheating on wife and kids with  
28 B-movie actress.

1  
2 April. Tesla can't get fleet orders or sell. Bankruptcy imminent. Short term cash put in by a  
3 bridge financing led by Elon Musk and Valor Equity Partners.

4  
5 May. Opened a retail store in Los Angeles, and they also finished a new transmission.

6  
7 June. Opened a second retail store in Menlo Park, California, and they also delivered the  
8 first Roadster to the customers. Marc Tarpenning is sickened by the Musk plot and resigns from  
9 Tesla after getting a payout to keep quiet. The Model S was announced in a press release.

10  
11 August. Franz von Holzhausen joined Tesla Motors as Chief Designer.

12  
13 October. Elon Musk became the CEO so as to control all information in and out of Tesla and  
14 prevent disclosure of organized crime funding. Tesla bankrupt on paper but cooking books to hide  
15 financial disaster.

16  
17 October. Tesla tells White House and DOE, In writing, it will sell 200,000 cars by 2010  
18 December. White House staff order Dept. of Energy to only fund companies from their "special list"  
19 of campaign backers

20  
21 December. Google investors and executives become key shareholders in Tesla and agree to  
22 control all media to benefit Tesla

23  
24 December. Tesla says it will build its factory in San Jose, CA. It lied and it is discovered  
25 that all of the different failed factory location announcements have to do with Dianne Feinstein's  
26 husband's screwed up real estate deals.

27  
28 November. Tesla revealed it had requested about \$400 million in loans for the Model S and

1 powertrain manufacturing, under the Department of Energy's Advanced Technology Vehicles  
2 Manufacturing (ATVM) program.

3  
4 2009 -

5  
6 March. Tesla unveiled two Model S prototypes at the Los Angeles headquarters of Tesla  
7 CEO Elon Musk's other startup, SpaceX. Tesla had decided to build a design studio at the factory.  
8 Tesla began taking reservations for the Model S. More than 500 tesla investor connected people  
9 reserved a car in the first week in order to fake sales volume.

10  
11 June. Tesla gets approval for \$465 million in low-interest loans from the Department of  
12 Energy in exchange for campaign funding provided by Tesla and Google VC's. Tesla has written  
13 over 30 lies in it's Dept. of Energy Application, which Steven Chu is aware of,yet ignores, at White  
14 House request.

15  
16 2010 -

17  
18 January. Tesla registered for an initial public offering of stock. Tesla uses "free"  
19 taxpayerloan to ePlaintiff 42loit taxpayerdollars to fake the value of it's stock while also receiving  
20 free tax credits which it sells at a profit in exchange for campaign funds, thus fully qualifying as an  
21 organized crime operation. This is SEC stock fraud but charges are held on special request of WH

22  
23 February- Dianne Feinstein and Her real estate mogul husband manipulate the Solyndra and  
24 NUMMI/Tesla factory properties for personal profit in exchange for campaign funding

25  
26 May. Tesla bought NUMMI with taxpayermoney - the former Toyota and General Motors  
27 factory in Fremont (manipulated by Feinstein), California, for \$42 million. Toyota Motor and Tesla  
28 announced they will cooperate on electric vehicle development. Toyota purchased Tesla shares.

1  
2 June. 800 employees. Tesla shares began trading on the Nasdaq Stock Exchange. They  
3 gained 40.5 percent from Google media PR manipulations and use of the free taxpayer money to  
4 manipulate the stated value.

5  
6 2011 -

7  
8 January. White House staff order Tesla to: "never go bankrupt until after our administration  
9 is out of office", says they will finesse any problems until then.

10  
11 Fires start to show up in Tesla tests and car operations

12  
13 2012 -

14  
15 January. Tesla ended production of the Roadster to focus on the Model S.

16  
17 First factory fire documented and covered up

18  
19 Previously, three key Tesla executives, who were studying the engineering failures, were  
20 killed in the same plane crash. Documents from one of the deceased executives are received by  
21 reporters. Family, or friends, of the victim are thought to be whistle-blowing

22  
23 February. Tesla revealed the Model X - a small SUV and says it will go on sale in early

24  
25 2012 -

26  
27 The Model S was officially launched at the Fremont NUMMI factory on land next door to  
28 Solyndra, both companies have numerous business connections to Sen. Feinstein. factory. Retail

1 deliveries of the Model S started in the United States.

2

3 September. Unveiled the Supercharger network.

4

5 2013 -

6

7

8 August. First Model S in Europe. Tesla formalizes relationship with Panasonic for batteries  
9 even as Panasonic is being charged with organized crime, price fixing, dumping and the deaths of  
10 thousands of factory workers and nearby neighbors to the factories.

11

12 Tesla/Panasonic "Gigafactory" plan charged with ePlaintiff 42loiting Mexican workers with  
13 lethal work environment, toxic poisoning, nearby dangers to towns.

14

15 Musk is caught on recorded audio and video admitting that Tesla was broke when it applied  
16 for Dept. of Energy funds, thus breaking the Section 136 federal law for the ATVM and LGP loans.

17

18 Hackers designate Tesla as "The most easily hacked car in the world". Fears of  
19 eavesdropping and forced battery overload attacks

20

21 September. Shadow team of special investigators document over 30 federal crimes that  
22 Tesla, and Tesla investors, engaged in. Federal law enforcement is ordered to: "Leave Tesla alone  
23 for now".

24

25 2019 -

26

27

28 Musk's father revealed as parent to multiple bastard children and exposed as pedo who got

1 Musk's sister pregnant. History of racism and anti-black culture in Musk family exposed in multiple  
2 racism lawsuits by black Musk employees.

3  
4  
5 2021 -

6  
7 Massive number of safety defect lawsuits, security lie lawsuits and other lawsuits now filed  
8 against Musk, Tesla, SpaceX and Neurolink (Animal Torture).

**EXHIBITS 76 - Press Coverage Of The Case**

The government has spent over \$5M+ covering-up and obfuscating this case that every reporter, and millions of voters already know about.

Why are our government officials wasting time and taxpayerdollars on a matter they can easily settle for far, far, less money and hassle?
