1  
2  
3 **THE BIGGEST POLITICAL CORRUPTION CASE IN**  
4 **HISTORY!**

5  
6 What would make a lawsuit "*The Biggest Political Corruption Case In History?*"

7  
8 It would rope in two Presidents of the United States, their staff, their covert political  
9 financiers, global energy and internet markets and dangle a few murders and hookers to boot!

10 It would affect nearly a TRILLION dollars of political cronyism, get people killed for  
11 talking about it, determine the fate of over 80% of the federal treasury for one, or another, group of  
12 insiders and change American history; when all of the facts are exposed!

13  
14 That might do it.

15  
16 In fact a suite of such lawsuits have already been filed in Washington DC, San Francisco  
17 Superior Court, Federal Northern District Court and other Courts. Plaintiffs already won one of  
18 them. They have case numbers, FBI agents on speed-dial, Inspector General files and whistle-  
19 blowers "out-the-ying-yang".

20 Plaintiffs have now contacted every known intelligence agency, law enforcement agency,  
21 regulatory agency, inspector general and government attorney known to mankind. Every one of  
22 them points the finger to another agency and says "this is their problem..". The entire government  
23 law enforcement process now seems to be based on finger-pointing, stone-walling and deferring to  
24 someone else!

25  
26 Why haven't you heard about these lawsuits? Because White House and Court officials have  
27 issued orders to the "main stream" news media to hide any stories about the matters. Court officials  
28 have been ordered to delay, defer, obfuscate, blockade and keep these cases "under wraps". Of

1 course such orders are a FELONY violation of the law and the Plaintiffs human rights. Such  
2 obfuscation orders, by public officials, are a Constitutional violation of the law and proof that the  
3 very political corruption being alleged is fully underway.

4  
5 The amount of money, in damages, being sought by the Plaintiffs are relatively small.  
6 Google and government officials make that much in a few hours each day. The dollar amount is no  
7 skin off the Defendants backs.

8 The Team doing the suing knew, from the Watergate and other scandals, that huge cover-  
9 ups take place over huge scandals. They got their ducks in line, for these cover-up tactics, long ago.

10  
11 They arranged to hide all of the evidence and lawsuit materials **in plain sight** in front of all  
12 8 billion citizens on Earth.

13  
14 They uploaded one set of the encrypted evidence files to satellite SSD's already circling the  
15 Earth, to be downloaded on command. Plaintiffs refused to confirm or deny that they had even  
16 installed copies on Elon Musk's own satellites. While you might think that satellites are secure, you  
17 might have noticed that a group of 20 year old hacker's just hacked into all of Russia's spy satellites,  
18 the most massively defended space technologies in history, during the Ukraine war... so much for  
19 satellite security...

20 Plaintiffs also emailed encrypted file sets to every investigative reporting outlet from  
21 ICIJ.ORG, to wikileaks to NY Times to you name it. Those files will open globally with a single  
22 web command.

23  
24 Plaintiffs also posted all of the files on every server in the world, on free public space, that  
25 their bots found, as "torrent" files that appear to be movies. They are not movies, though. On  
26 command, the torrent slices assemble themselves back into the evidence files for anyone on Earth to  
27 call together via simple internet "drawstring" download command. Plaintiffs have offered the  
28 evidence files to anyone to post anywhere. The shame factor, if the entire file sets are released, will

1 make history. None of the evidence was acquired illegally and it is 100% legal to publicly report  
2 crimes, corruption and illicit deeds.

3  
4 So much for the cover-up! The "insurance" plan for the Plaintiffs have already been  
5 distributed around the globe. There is no entity on the planet that can now find and delete it all.

6 So if the Plaintiffs are killed, Seth Rich-like: Everything opens up for the whole world to  
7 see.

8  
9 If the Plaintiffs get pissed off enough: Everything opens up for the whole world to see.

10 Russia just got a taste of what that might be like when a certain spy agency leaked 800GB of  
11 secret Moscow files and got spy bosses and their hookers, yachts, jet planes and lives messed up.

12  
13 Information is truly power!

14  
15 What would an America be like that could no longer run it's government like a garage sale?  
16 Better!

17  
18 What would an America be like that no longer had it's White House controlled by insane  
19 billionaires like Musk, Page and Schmidt? Better!

20  
21 What would happen if every citizen saw the results of a cross database cull from the  
22 XKEYSCORE, FINCEN, SEC, ICIJ, IRS and GLX searches on every rich family in Washington  
23 DC and Silicon Valley? CHANGE!

24  
25 Thus the lawsuits were put forward, on behalf of the American public through an example  
26 Plaintiffs filing of a civil complaint against Defendants, a representative entity which has a  
27 command-and-control, financing and management influence over it's own deep state sub-group, an  
28 agency operation of Defendant, known, in the media, as '*The Silicon Valley Oligarchs*', AKA, '*The  
Paypal Mafia*', AKA '*The NVCA Blacklisting Group*', AKA '*The Deep State*', and alleges as  
follows, based on law enforcement agency evidence and eye-witness experience. This report, that

1 you are reading, has now been filed with every law enforcement agency, regulatory agency,  
2 Inspector General, Attorney General, news organization and community group in America and  
3 Europe.

4  
5 The cover-ups and finger-pointing from one agency-to-another is endless.

6 Political operative/lobbyists like David Plouffe, Steve Westly, Jay Carney, Steve Spinner,  
7 John Podesta, David Axelrod spend their days running between rich people like Elon Musk, Eric  
8 Schmidt, Laurene Jobs, et al, convincing them that they must control public discourse and media,  
9 energy policy and most politics. These political operatives rake in a skim of 10%, or more, of the  
10 cash they can guilt trip the oligarchs into barfing into the operatives thousands of shell corporations,  
11 fake charities and “social trusts”. They use the same social engineering tricks that the Nazi’s, the  
12 CIA and Chinese secret police use to start, or block, social revolutions: ***Contrived emotional trigger***  
13 ***facades that sucker in the oligarchs.***

14 The best way to separate a stupid rich person from their money is to make the oligarch  
15 believe they are fighting a fake war against the “satanic forces” of the opposing political party.

## 17 **DURHAM CRACKED THE SEAL**

18 THE DURHAM INVESTIGATIONS TEAM HAVE ***MUCH MORE*** IN HAND THAN  
19 THE GENERAL PUBLIC HAS HEARD ABOUT:

# Afghanistan: The Saudi Arabia of Lithium?

**Lithium, which is from mobile phone nation's economy.**

portion of Potash's interest in taking over SQM. The Chilean company gets 58% of its revenue from fertilizers, compared to 11% from lithium. But it's clear that investors are intrigued by SQM's rapidly expanding operations in the Atacama desert. Chile boasts at least ten more salars that have yet to be explored for lithium reserves. If GM is right and drivers are willing to pay a steep premium for lithium-powered cars, SQM could be poised for a windfall.

The gas engine made petroleum the world's biggest commodity. The electric car could do the same for the third element on the periodic table.

Mounds of magnesium chloride ring SQM's mine, creating the illusion of snow in the ultra-arid salar.

The gas engine made petroleum the world's biggest commodity. The electric car could do the same for the third element on the periodic table.

Nothing grows in the heart of the Salar de Atacama, this ancient Chilean lake bed 700 miles north of Santiago may be the driest place on Earth, a wasteland

This is the Tesla battery inside the MILITARY-GRADE BLAST CHAMBER that it must be used in at the Tesla Factory because of the EXTREME EXPLOSION DANGER of the Tesla Battery

## NATIONAL POST

Friday, May 1, 2009

### The problem with lithium

Iavid Booth, National Post

Presented by National Post Podcasts

Pierre Verdy, AFP, Getty Images

How quickly we have forgotten. Yesterday's front-page headline is today's page 13 filler, consigned to the back of the newspaper as something sexier or more pressing forces its way to page one--above the fold.

The subject I'm talking about is oil, the pressing story before all the world's stock markets decided to simultaneously implode. We used to worry about the price of oil and when it would run out, and even non-petrochemical engineers understood the concept of "peak oil." But, whether alternative energy is still big news or not, this much is clear: The world's oil supply is finite, fossil-fuelled vehicles pollute and the public outcry for an alternative is strong.

The leading alternative right now -- if you judge technology by the amount of press generated -- is electric cars. Electric cars don't pollute, electrons are relatively cheap and, perhaps most importantly, these vehicles seem to have captured the imagination of the American consumer, still the greatest economic engine in the world.

1  
2 THE STOCK MARKET SCAM USING ENERGY AND BIG TECH STOCKS TO PAY  
3 BRIBES:

4 The SEC said:

5 “Thank you for contacting the U.S. Securities and Exchange Commission (SEC) Office of Inspector General  
6 (OIG). We received your email. We will evaluate the information provided and take appropriate action. Options  
7 include opening an OIG review; referring the matter to a SEC Division or Office for review, if warranted; or taking no  
8 action (allegations that do not involve a potential violation of law, rule, regulation, or policy as well as allegations with  
9 limited specificity or merit may be closed with no further action). In this regard, please note the following:

10 • The OIG is an independent office within the SEC that primarily audits internal SEC operations and  
11 investigates alleged SEC staff misconduct. The OIG derives its authority from the Inspector General Act of  
12 1978, as amended. In accordance with that statute, the OIG cannot perform SEC operating responsibilities,  
13 such as investigation of alleged securities law violations.

14 • The OIG only has the authority to address allegations or complaints that relate to SEC programs,  
15 operations, and personnel.

16 • The OIG has no authority to direct the SEC to take action with regard to SEC operations, such as (1)  
17 change its policies, (2) commence or conclude any particular investigation, (3) implement new securities rules  
18 for market participants, or (4) initiate administrative disciplinary action.

19 • Due to privacy interests we do not provide complainants with updates on, or the results of, a  
20 complaint or investigative matter.

21 • General questions about the Federal securities laws can be directed to the SEC’s Office of Investor  
22 Education and Advocacy at [sec.gov/oiea/QuestionsAndComments.html](http://sec.gov/oiea/QuestionsAndComments.html), [help@sec.gov](mailto:help@sec.gov) or 202-551-6500 or 1-  
23 800-732-0330.

24 • Allegations of Federal securities law violations should be reported using the online Web form located  
25 at [sec.gov/tcr](http://sec.gov/tcr). Tips, Complaints, and Referral Filing Guidance is available at [www.sec.gov/complaint/info](http://www.sec.gov/complaint/info).  
26 SEC investigations are conducted confidentially. As a result, the SEC generally will not confirm or deny the  
27 existence of an investigation unless and until it becomes a matter of public record.  
28 [www.sec.gov/answers/investg.htm](http://www.sec.gov/answers/investg.htm).

**To:** OIG <OIG@SEC.GOV>

**Cc:** KGimre@perkinscoie.com

**Subject:** Fwd: LITHIUM ION BATTERIES”

If your complaint relates to alleged SEC employee misconduct, please provide specific information or evidence to the OIG as follows:

(1) the identity of the employee(s) involved; **## SEC employees and contractors at SEC from 2007 to today who read the newspapers or the common news stories about the Silicon Valley and energy industries scandals and who held stock, or future jobs with the charged perpetrators**

(2) the approximate date of the alleged misconduct; **## From Aug. 15, 2007 to today**

(3) the specific nature of the alleged misconduct; **## In exchange for bribes SEC employees avoided investigations of Google, Facebook, Tesla and other members of a Cartel-based RICO-violating Big Tech 'Enterprise'.**

(4) the rules, regulations, or statutes that you allege the employee violated; **## ALL rules, regulations, or statutes relative to the exchange for bribes SEC employees avoided investigations of Google, Facebook, Tesla and other members of a Cartel-based RICO-violating Big Tech 'Enterprise'.**

1 (5) the identity of other persons who might be aware of this alleged misconduct; **## White**  
2 **House staff during this period, Washington Post and CBS news investigators, ourselves and**  
3 **FINCEN.**

4 (6) the basis for your knowledge of the alleged misconduct; **## First hand knowledge**

5 (7) any documentary evidence of the alleged misconduct; and **## See the EVIDENCE AND**  
6 **WEB REPOSITORY links in the attached DISCLOSURE DOCUMENT**

7 (8) a statement regarding whether you (a) request confidentiality or (b) waive confidentiality  
8 (your name may be released to non-OIG personnel if an investigation is needed). **## Our**  
9 **confidentiality and protection per ongoing attacks and death threats, is requested**

## Biden Administration Secures Supply Chains of Strategic and Critical Minerals for Clean Energy Economy

04.11.2022 | UPDATES

President Biden, on March 31, 2022, invoked the Defense Production Act to secure reliable supply chains for minerals essential to a clean energy transition, including lithium, nickel, cobalt, graphite, and manganese. These minerals are required for the production of large-capacity batteries. The memorandum for the secretary of defense found that a consistent and sustainable supply chain for these minerals was "essential" to the national defense and cited the need "to rebuild and maintain American expertise and productive capacity in these critical sectors." President Biden further noted that "action to expand the domestic production capabilities for such strategic and critical materials is necessary to avert an industrial resource or critical technology item shortfall," directing the secretary of defense to "create, maintain, protect, expand, or restore" domestic production.

### Recent World Events Exacerbated Supply Chain Disruptions

Since Russia's invasion of Ukraine, the price of metals has skyrocketed as uncertainty looms over sanctions and impacts to the supply chain. For instance, the price of nickel, which is key for electric vehicle batteries, has risen 9% this year, and the price of palladium, used in catalytic converters and semiconductors, is up 73%. Prices have increased because many of the raw materials used in commerce are produced in Russia, Ukraine, or other areas affected by the conflict. One Russian company alone is responsible for 5% of the world's annual production of nickel, and 40% of the world's annual production of palladium. In response to the invasion, many companies are trying to diversify their sourcing away from Russian producers. But giving up the Russian supply of raw materials requires sufficient production from other sources to replace it. Not coincidentally, the administration has recently stepped up its efforts to secure the supply chain, announcing a plan in February 2022 to "Revitalize American Manufacturing and Secure Critical Supply Chains in 2022."

The concern over the supply chain is not new. In 2017, the Trump administration expressed concern over the supply chains for critical minerals, and issued Executive Order 13817, requiring that the secretary of the interior identify critical minerals and making it a policy of the federal government to "reduce the Nation's vulnerability to disruptions in the supply of critical minerals." The order also defined "critical minerals" as those minerals the secretary identifies as "(i) a non-fuel mineral or mineral material essential to the economic and national security of the United States, (ii) the supply chain of which is vulnerable to disruption, and (iii) that serves an essential function in the manufacturing of a product, the absence of which would have significant consequences for our economy or our national security." In September of 2020, during the height of the COVID-19 pandemic and peak

### JURISDICTION REGIONS AFFECTED

1. Defendants resided and /or transacted business in the relevant counties which are within the authority of the Courts. Defendants operated their scams in America, Bolivia, China, Afghanistan, The Congo and other foreign regions, thus, international Courts and investigative inquiries are also applicable. For example, The Hunter Biden hard drives reveal a deep Chinese and Ukrainian scam, for Cobalt and Lithium that runs cross-border. Matters were conducted in California, Michigan, Texas, Washington, DC and other domestic regions.
2. Plaintiffs have been blockaded from suing other affiliated insiders due to threats from affiliated insiders, previous attacks by affiliated insiders, blockaded lack of legal representation, lack of funds and the administrative limits of a single individual engaging in battle with trillions of dollars of hostile and corrupt entities at the same time.

1           3.       Federal law enforcement and regulatory officials shall testify in this trial to assist in  
2 the correct identification of the DOE and ROE co-conspirators, thought to be the officers,  
3 executives and investors involved in VALIC/AIG, Tesla Motors, In-Q-Tel, Facebook, SpaceX,  
4 Google, Alphabet, YouTube, Instagram, Netflix, Linkedin or related NASDAQ ‘FANG’ stocks and  
5 they shall disclose leaked information about the family financial records and relationships of those  
6 parties. UNITED STATES OF AMERICA, via it’s employees, contractors and all of it’s hired  
7 politicians, Congress-people and agency staff own the stocks of the stated corrupt companies and  
8 provide command-and-control and a favored-nations status beneficiary sets of perks and favors to  
9 those companies as well as a damaging set of harms to the competitors of those companies, such as  
10 Plaintiffs. Conspirators shall be called to testify, at trial, wherein they will claim to not be part of  
11 **UNITED STATES OF AMERICA** and it’s government, yet Plaintiffs will prove that they indeed,  
12 covertly, actually are, and they are a very large part of it.

13           4.       This complaint covers issues which the Court has the power to decide, such as  
14 RICO, Anti-trust monopoly violations, 28 U.S.C. &1331; 18 U.S.C. §§ 1961(5), 1962(c), 18 U.S.C.  
15 §§ 1961(5), 1962(d) 773. ; and many other matters which attorney-less, pro-se, low-income, senior,  
16 disabled Plaintiffs are not skilled enough to properly cite, at this time, but could cite, with  
17 perfection, with a great court-appointed lawyer. Court has subject matter jurisdiction over this  
18 action pursuant to 28 U.S.C. § 1331, as Plaintiffs claims arise under the Constitution and laws of the  
19 United States. This Court has jurisdiction to grant relief in this action pursuant to 28 U.S.C. §  
20 1346(b), as Plaintiffs brings claims under the Federal Tort Claims Act. This case also presents a  
21 federal matter within this Court’s jurisdiction under Article III of the United States Constitution, 28  
22 U.S.C. § 1331, and the Administrative Procedure Act, 5 U.S.C. § 702, and under other related law  
23 acts and precedents.

24 This Court has authority to grant declaratory relief under the Declaratory Judgment Act, 28 U.S.C. §  
25 2201 et seq., and to award damages, costs, and attorneys’ fees under 28 U.S.C. § 2412, and under  
26 other related acts and precedents. Venue is proper in this district under 28 U.S.C. § 1391(e), and  
27 under other related acts and precedents. The venue is proper in this district pursuant to 28 U.S.C. §  
28 1391(b), because a substantial part of the acts or omissions that give rise to the Plaintiffs’ claim

1 occurred or will occur in the area. RICO charges by Plaintiffs, against Defendant are verified as  
2 valid by Plaintiffs and by reviewing third parties. Plaintiffs are also requesting relief under the  
3 United States Constitution, the Federal Tort Claims Act (“FTCA”), 28 U.S.C. §§ 1346(b), 2672 and  
4 related jurisdictions and applicable rights.

## 5 6 **PARTICIPANTS**

7  
8 5. At all times relevant herein, Plaintiffs, (hereafter “Plaintiffs”) was, and are, native  
9 born American citizens. Plaintiffs income, housing, brand and businesses were attacked and cut-off  
10 in reprisal for their aid to the government in criminal ‘*stimulus*’ scam investigations involving  
11 profiteering with the Afghanistan war, the energy industry and the stock market. Defendants spent  
12 over \$60 million dollars (proven by their own banking records and opposition research group’s past  
13 billings) using spy agency-type dirty tricks to harm Plaintiffs as revenge/vendetta/reprisal because  
14 Plaintiffs testimony and case-support terminated so many of Defendants corruption-based crimes,  
15 payola, bribes and illicit profiteering loopholes.

16  
17 6. On information and belief, always relevant herein, the **UNITED STATES OF**  
18 **AMERICA government officials and their covert business partners**, which includes those  
19 entities that are financier/beneficiary oligarchs and tech companies and is, a USA and California  
20 governmental entity, doing business in the State of California, both, legitimately, and, covertly with  
21 an organized crime ‘*enterprise*’ operating within our Government that makes over a trillion dollars  
22 a day in revenue, as reported in SEC, OPM and Budget agencies, partially derived from **Plaintiffs**  
23 **patents, research work, trade secrets and past work which UNITED STATES OF AMERICA**  
24 **owes Plaintiffs money for**. The co-conspirators agency is known as ‘*The Silicon Valley Oligarchs*’,  
25 ‘*The Paypal Mafia*’ and/or ‘*The NVCA Blacklisting Alliance*’ ( sometimes referred to by the press as  
26 ‘*The Deep State*’) (“The Deep State” is defined as “*A non-governmental body of conspirators who*  
27 *manipulate the official government*” ), and will be identified by name by federal officers during  
28 Trial before a Jury. They include a cartel-based set of the same team of investment bankers, CPA’s

1 (think PANAMA PAPERS), lobbyists, middlemen, crooked law firms, government officials and  
2 hit-jobbers that keep the whole scam going year-after-year as an ‘enterprise’ as defined under  
3 RICO.

4 7. The U.S. has sued the portion of itself that is known as “the deep state”, in particular  
5 in the “[SILICON VALLEY NO POACHING CLASS ACTION LAWSUIT](#)”, Case # **11-CV-2509**  
6 **and related cases** (Which proves, along with the [AngelGate Scandal](#), that the stated Defendants do  
7 conspire to manipulate the government and society), a lawsuit which Plaintiffs helped stimulate to  
8 fruition yet never received a dime of money from, yet. Many consider these tech insiders to be  
9 organized crime sub-Cartels under the the master RICO “Enterprise” which members of the U.S.  
10 government participate in. The U.S. government has many civil and criminal suits and a huge  
11 number of active investigations against their members. The most illicit specific names, as potential  
12 suspects, have always existed in the filed **EXHIBITS** with this complaint. There are, shockingly,  
13 large number of network TV shows and films on the air, today, about how sociopathic and law-  
14 breaking these people are. (Ie: **Billions; Uber; We Crashed; The Social Network; Silicon Valley;**  
15 **Bad Blood – The Theranos Story; The Circle**, etc. ) In his Case # **1:12-CV-00774-mms**, and the  
16 related case numbers, Plaintiffs and their peers, acting as agents of the public, and in the public-  
17 interest, proved to Judge [Ketanji Brown Jackson](#), that government officials infected with corruption  
18 harmed Plaintiffs in reprisal and he won his remand. As of today, the case issue of a Department of  
19 Energy, EPA, SSA, HUD and other agencies infected with corruption has been reviewed in a record  
20 volume of government hearings that validate Plaintiffs charges of a crony-based sub-government  
21 operating within the main government. There can now be no argument that the U.S. government is  
22 infected with corruption. It is proven that it is. There is a record amount of evidence documents in  
23 those court records which Plaintiffs refers this Court to in addition to the new evidence provided  
24 herein at the weblinks posted above. That case was presented by Plaintiffs on **behalf of the public**  
25 to expose political corruption. Plaintiffs was defrauded by the U.S. Government out of years of his  
26 life and all of his life savings by the government lies that the process was fair. The world now  
27 knows that the government decision process involved officials who hold stock, revolving door jobs,  
28 and other payola in the “winners” and the agency funding decisions are entirely rigged and ‘hard

1 *wired*’ for the deciders personal friends and financiers. It was rigged for Elon Musk, by his  
2 investors Dianne Feinstein and Nancy Pelosi and other government officials. Plaintiffs work with  
3 the Department of Energy labs since 2000, and his tips led to the FBI raid of Solyndra and a huge  
4 number of Federal investigations, his blood poisoning caused by the DOE lab work and other  
5 related claims are raised in this litigation. Plaintiffs letter to Senator Bingham and the Energy and  
6 Commerce Committee began the Solyndra and Cleantech Crash investigations as shown on the  
7 referenced 60 MINUTES segments and other documents in the attached and linked **EXHIBITS**,  
8 and created the ‘**The Stop Trading on Congressional Knowledge (STOCK) Act**’ which Senator  
9 Bingham and Plaintiffs both aggressively pushed to create.

10 8. **To be clear: *The United States Government, through its employees and contractors, and***  
11 ***via orders from White House and other senior officials, caused Google, Facebook, Tesla,***  
12 ***Linkedin, YouTube, Kleiner Perkins and other Silicon Valley entities to covertly become part of***  
13 ***the U.S. Government. They exchanged monies, through bank and wire transfers, surveilled***

20 9. For example, Google’s Eric Schmidt funded the US. Governments operations, funded the  
21 President’s election campaign, worked for U.S. military operations, coordinated the  
22 global manipulation of internet systems from the basement of the President’s campaign  
23 office during the elections, ran massive tax evasion ops, had a “sex penthouse” for  
24 himself and government officials (as is widely reported in the news) and “controlled the  
25 U.S. White House”. The United States of America was fully aware of all of Mr.  
26 Schmidt’s illicit, perverse and possibly criminal actions from 2006 forward through FBI,  
27 FTC, SEC, FINCEN, Interpol, CIA, NSA and other investigations yet he was protected  
28 from the law because he was “part of the government of The United States Of America”.

1 That was a “false immunity” or “contrived immunity” which was not legally valid. Over  
2 120 other tech oligarchs, listed in the attached EXHIBITS, became part of the UNITED  
3 STATES GOVERNMENT, committed heinous crimes, perversions, bribery,  
4 embezzlement and other horrors, yet were never prosecuted, on orders from the White  
5 House and Agency bosses because it would be “embarrassing”. Apparently, in 2022, it is  
6 “embarrassing” to allow the police to arrest the army of people gang robbing all of the  
7 drugstores or the oligarchs raping our Democracy in plain site. As recently as today,  
8 Hunter Biden’s multiple lost laptop computers have become the biggest joke in the world  
9 as it has now been revealed that Hunter Biden, just as with Eric Schmidt, Larry Page,  
10 Mark Zuckerberg, Elon Musk, et al, while not being an “official” part of the government  
11 ARE actually a covert part of the government. **The Google billionaire that has people**  
12 **“killed” runs the Obama and Biden White House.** Eric Schmidt has long sought  
13 influence over U.S. science policy. Under Biden’s former science chief, Eric Lander,  
14 Schmidt’s foundation helped cover officials’ salaries, even as the office’s general counsel  
15 raised ethical flags. In an investigation by Politico and [Alex Thompson](#) it was just  
16 revealed that As President Joe Biden granted his science office unprecedented access and  
17 power, one outside adviser to that office has attained what staffers describe as an unusual  
18 level of influence.

19 A foundation controlled by Eric Schmidt, the multi-billionaire former CEO of Google, has  
20 played an extraordinary, albeit private, role in shaping the White House Office of Science and  
21 Technology Policy over the past year.

# REVEALED: Google billionaire Eric Schmidt PAID the salaries of staff inside Biden's science office and has been quietly lobbying on policy since Obama administration

Google's former CEO Eric Schmidt channeled money into the White House science office through his foundation, according to a report. Schmidt, who stepped down in his role at Google's parent company Alphabet in 2020, now serves on the board of numerous tech companies, including some focused on artificial intelligence (AI). The Office of Science and Technology Policy (OTSP) helps formulate AI policy and steer funding toward the technology. Former OTSP general counsel Rachel Wallace repeatedly raised concerns over Schmidt's influence, which she believes was the source of the wrath she faced from the OTSP's former head Eric Landers, who stepped down recently for bullying women in the office. Landers and Schmidt are close associates. Wallace filed a whistleblower complaint and is now being represented by the Government Accountability Office.

Figure 2: PROFESSIONAL SOCIOPATHIC ASSHOLES?

1 More than a dozen officials in the 140-person White House office have been associates of  
2 Schmidt’s, including some current and former Schmidt employees, according to interviews with  
3 current and former staff members and internal emails obtained by POLITICO.

10 sets from that forthcoming project: one on the number of White House meetings attended by  
11 **Google...**

12  
13  
14 Schmidt maintained a close relationship with the president’s former science adviser, Eric  
15 Lander, and other Biden appointees. And his charity arm, Schmidt Futures, indirectly paid the  
16 salaries of two science-office employees, including, for six weeks, that of the current chief of staff,  
17 Marc Aidinoff, who is now one of the most senior officials in the office following Lander’s  
18 resignation in February. The chief innovation officer at Schmidt Futures, OSTP alum Tom Kalil,  
19 also remained on Schmidt’s payroll while working as an unpaid consultant at the science office for  
20 four months last year until he left the post following ethics complaints.

21 Schmidt has long sought to influence federal science policy, dating back to his close ties to  
22 the Obama administration. While his spokespeople presented his efforts to help Biden as part of  
23 Schmidt Futures’ mission to “focus and mobilize these networks of talent to solve specific problems  
24 in science and society,” his foundation’s involvement in funding positions for specific figures raised  
25 repeated red flags from internal White House watchdogs. It appears that Schmidt runs “The Deep  
26 State” inside the White House.

27  
28 The science office’s efforts to arrange for Schmidt Futures to pay the salaries of Lander’s

1 staff sparked “significant”ethical concerns, given Schmidt’s financial interests in areas overlapping  
2 with OSTP’s responsibilities, according to the scienceoffice’s then-general counsel, Rachel  
3 Wallace, in internal emails obtained by POLITICO.

4  
5 Schmidt sits on the boards of a wide variety of technology companies, particularly those  
6 focused on artificial intelligence. He maintains a 20 percent stake in the [hedge fund DE Shaw](#) that  
7 boasts over \$60 billion in investments and committed capital, sits on the board of the AI-focused  
8 defense contractor Rebellion Defense, is [an investor in Abacus.AI](#) and this month invested in and  
9 became chair of Sandbox AQ – a new company that is a spin-off of an internal Google software  
10 team that [says it will combine](#) “AI + Quantum tech to solve hard problems impacting society.” (It  
11 will likely just rig elections like Schmidt always does...)

12 He [also helped launch and is on the board of Civis Analytics](#), a data science company that  
13 has helped Democratic campaigns, including Biden’s 2020 effort, target consumers and voters.

14  
15 Over the past year, internal emails show that Wallace and other members of the science  
16 office’s legal team regularly flagged potential conflicts of interests related to Schmidt and Schmidt  
17 Futures.

18  
19 Last fall, Wallace lodged a formal complaint about Lander’s treatment of her as an  
20 employee. Landler resigned Feb. 18 after [POLITICO reported that the White House had found](#)  
21 “credible evidence” that he bullied Wallace and violated workplaces standards with otherstaffers.

22  
23 Wallace says she thinks Lander’s bullying was in response to her consistently raised ethical  
24 objections to Lander’s plans, including the office’s solicitation of funding from Schmidt-connected  
25 organizations for extra staff.

26  
27 “I and others on the legal team had been noticing a large number of staff with financial  
28 connections to Schmidt Futures and were increasingly concerned about the influence this  
organization was able to have through these individuals,” Wallace, who is now being represented by

1 the Government Accountability Project as a whistleblower, told POLITICO. GAP and Wallace  
2 formally [filed a whistleblower complaint in early March.](#)

3  
4 A spokesperson for Lander declined to address specific issues but said: “Throughout his  
5 tenure, Dr. Lander strictly adhered to all White House ethics policies.”

6 The White House said there was nothing unusual about its ties to Schmidt and that ethical  
7 issues were promptly and properly handled.

8  
9 A foundation controlled by Eric Schmidt, the multi-billionaire former CEO of Google, has  
10 played an extraordinary, albeit private, role in shaping the White House Office of Science and  
11 Technology Policy over the past year. | AP Photo/Lee Jin-man

12 Some of the Schmidt-affiliated money came in the form of Schmidt Futures fellowships,  
13 which pay for people’s travel and expenses to science conferences. Last July, OSTP legal analyst  
14 Min Hee Kim wrote to one OSTP employee asking her to withdraw from the fellowship because her  
15 White House position and Schmidt Futures’ “strong interest in scientific discoveries and innovative  
16 technologies,[which] poses a very significant conflict of interest.” After Kim and other legal  
17 officials raised concerns, two employees withdrew from such arrangements.

18  
19 Two other OSTP officials continued to work part-time at the Broad Institute of Harvard and  
20 MIT in Cambridge, Mass., a leading biotech facility that had been headed by Lander and where  
21 Schmidt chairs the board. The White House had approved the arrangement in advance, according to  
22 both the Broad Institute and OSTP. Both employees have since left OSTP.

23  
24 Two more staffers also had their salaries paid through a fund with the Federation of  
25 American Scientists that Schmidt Futures pays into. The chair of FAS, Gilman Louie, is also an  
26 associate of Schmidt’s who most recently served with him on the National Security Commission on  
27 Artificial Intelligence, which Schmidt chaired from 2018 to 2021. Gilman Louie founded In-Q-  
28 TEL, the CIA operation.

1 Spokespeople for Schmidt said that the gift to FAS was “unrestricted” and did not direct  
2 funding for any specific fellowship at OSTP.

3  
4 FAS spokesperson Dan Correa said in a statement that “Like many other scientific  
5 organizations, we offer pathways for scientists and technologists to engage in public service and  
6 deeply value their important contributions.”

7 Schmidt, who is estimated [to be worth \\$23 billion](#), founded Schmidt Futures with his wife  
8 Wendy to support and promote emerging technologies such as a [recently announced \\$125 million](#)  
9 [fund for artificial intelligence](#).

10  
11 Schmidt also has very close ties to Lander, the founding director and president of the Broad  
12 Institute, whose prodigious fund-raising and scientific oversight turned the institute into a biotech  
13 behemoth.

14 Schmidt has served on the board of the Broad Institute since 2012 and served with Lander  
15 on the President’s Council of Advisors on Science and Technology during the Obama  
16 administration. They also served together on the Pentagon’s Defense Innovation Board,  
17 which Schmidt chaired, from 2016 to 2020.

18  
19 Shortly after Biden nominated Lander to head OSTP, Broad announced that Schmidt and his  
20 wife had given a \$150 million endowment gift to the Broad Institute to “catalyze a new scientific  
21 discipline at the intersection of biology and machine learning,” [according to a March 2021 press](#)  
22 [release](#). In April 2021, before Lander’s confirmation, the Broad Institute announced that [Schmidt](#)  
23 [would become chair of the board of directors](#) of the Institute.

24  
25 Through spokespeople, the Broad Institute and Schmidt said that the \$150 million gift had  
26 been in the works since early 2020.

27 “The timing allowed us to recruit leadership for the new center and gave the new leaders  
28 time to build a research plan prior to the formal launch,” said a Broad Institute spokesperson.

1           **A focus on spy AI and spying on users 5G**

2           Schmidt has made the development of 5G technology and artificial intelligence key aspects  
3 of his post-Google work and has advocated for a stronger federal role in funding both, along with  
4 biotech initiatives.

5           The White House science office sets strategic priorities for the nation’s more than \$1.4  
6 trillion in annual health and science spending. It has also been increasingly focused on federal  
7 policy on artificial intelligence.

8           A spokesperson for the science office disputed the idea that its work dovetailed with  
9 Schmidt’s priorities and pointed to its efforts to regulate the use of AI.

10           “You’re trying to tell a story of agency capture — that one philanthropy has influence over  
11 policy outcomes,” the spokesperson said in a statement. “And yet, OSTP is executing on an  
12 aggressive agenda to protect the civil rights of all Americans impacted by algorithmic  
13 discrimination in the use of artificial intelligence and automated systems, is working across  
14 government to gather data that will help ensure that government delivers services more equitably,  
15 and is evaluating the mental health harms caused by social media platforms. We are proud to be  
16 defined by our work.”

17           As for the number of personnel connected with Schmidt Futures, the spokesperson  
18 explained: “As a small office with a \$5 million annual budget that had just become cabinet level and  
19 was charged with addressing huge issues like the climate and future pandemics, OSTP senior staff,  
20 including Eric Lander, pushed to find ways to quickly bring on subject matter experts. As part of the  
21 onboarding process, OSTP’s legal counsel reviews potential ethical conflicts and directs remedial  
22 actions or recusals.”

23           The spokesperson added: “Furthermore, consistent with Congress’s statutory direction,  
24 OSTP works with numerous outside groups on a variety of important and critical science and  
25 technology matters, and staff come to OSTP from many different federal agencies, universities, and  
26  
27  
28

1 outside entities.”

2  
3 Indeed, OSTP’s founding statute in 1976 states that the director shall “utilize the services of  
4 consultants” to help fulfill the office’s mission. OSTP ethics officials were alarmed, however, by the  
5 extent to which Schmidt Futures was involved in the hiring and use of consultants and fellows,  
6 according to their internal emails.

7 **OBAMA AND BIDEN ARE OWNED CONTROLLED AND PUPPETEER-ED BY ERIC  
8 SCHMIDT, LARRY PAGE, MARK ZUCKERBERG AND THEIR CARTEL**

9 [White House](#)

10 [Biden’s top science adviser bullied and demeaned subordinates, according to White](#)  
11 [House investigation](#)

12 By Alex Thompson

13  
14 Norm Eisen, who served as the White House ethics chief early in the Obama administration,  
15 said of Schmidt Futures: “You might say that the desire of a philanthropy to support government is  
16 noble, but at least the appearance question that is raised is whether government should be making its  
17 own determinations about that. There should not be the appearance that perhaps outside actors are  
18 unduly shaping that policy.”

19 Of the concerns raised by internal ethics officials, Eisen added, “it’s not all appearances  
20 issues here. There are some significant challenges that were identified. I do think that those are  
21 meritorious and the White House came out in the right place in the end. The ethics sausage making  
22 isn’t always pretty.”

23 **A foray into politics**

24 Schmidt’s relationship with powerful Democrats dates from the 1990s. [As CTO of Sun](#)  
25 [MicroSystems, he helped develop Bill Clinton’s first White House website](#) at WhiteHouse.gov in  
26 1994.

27  
28 When Schmidt was CEO of Google, he hit [the campaign trail for Obama in October of 2008](#)

1 but explained he was “doing this personally” since “Google is officially neutral.”

2  
3 During the Obama administration, while Schmidt served as Google CEO and later executive  
4 chair, company representatives attended White House meetings more than once a week, on average,  
5 from 2009 to 2015, [according to an analysis by The Intercept and the Campaign for Accountability](#).

6 During Obama’s 2012 election reelection campaign, while he was still Google’s executive  
7 chairman, Schmidt helped recruit talent and advise on technology and [was among senior staffers and](#)  
8 [volunteers in the campaign’s “boilerroom” on election night](#).

9  
10 He went all-in for Hillary Clinton in 2016. In April 2014, a year before Clinton announced  
11 her candidacy, he sent her senior aide Cheryl Mills a long memo entitled “Notes for a 2016  
12 Democratic Campaign.” At her election night party in 2016, he was photographed wearing a “staff”  
13 badge.

14 After Donald Trump beat Clinton, Schmidt sought to smooth the waters with the incoming  
15 administration. He concentrated on developing ideas for artificial intelligence policy while also  
16 strengthening his relationships with Democratic officials seen as likely to join the next Democratic  
17 administration.

18  
19 In 2018, Congress created the National Security Commission on Artificial Intelligence to “to  
20 consider the methods and means necessary to advance the development of artificial intelligence,  
21 machine learning, and associated technologies to comprehensively address the national security and  
22 defense needs of the United States.” Schmidt became the chair, nominated by then-chair of  
23 the House Armed Services Committee, Republican Mac Thornberry of Texas.

24  
25 Schmidt [told The New York Times in 2020](#) that “the way to understand the military is that  
26 the soldiers spend a great deal of time looking at screens. And human vision is not as good as  
27 computer vision,” he said, explaining why AI should be used for functions currently handled by  
28 humans. “It’s insane that you have people going to service academies, and we spend an enormous

1 amount of training, training these people, and we put them in essentially monotonous work.”

2  
3 While he had left Google’s board by 2019, he still retained \$5.3 billion in shares of Google’s  
4 parent, Alphabet, while chairing the NSCAI.

5 Schmidt Futures also set about establishing relationships with the next Democratic  
6 administration-in-waiting. When now-Secretary of State Antony Blinken co-founded the consulting  
7 firm West Exec Advisors in 2017 along with Michèle Flournoy, who was then seen as a frontrunner  
8 to be secretary of Defense, Schmidt Futures became one of their clients. Flournoy participated in a  
9 2020 Biden fundraiser [with Schmidt that was billed](#): “Virtual Conversation on Technology and  
10 National Security.”

11  
12 West Exec was also the professional home to several additional people who are now high-  
13 ranking officials in the Biden administration, including Director of National Intelligence Avril  
14 Haines and Deputy Attorney General Lisa Monaco, both of whom were West Exec employees.

15 In July of 2021, at the “Global Emerging Technology Summit” hosted by the NSCAI, which  
16 has since been disbanded by statute, [Blinken thanked Schmidt and referred to him](#) as a “friend.”

17  
18 The State Department declined to comment.

19  
20 **Driven to shape federal policy**

21 People in the technology space say Schmidt’s efforts to cultivate leading Democrats have  
22 been motivated largely by his genuine concerns about the focus of federal science policy. Detractors  
23 portray him as an unelected billionaire favoring policies that could further enrich and empower  
24 himself and the organizations in which he’s involved. But those more sympathetic to him say  
25 that, even if he occasionally enters ethical gray zones, Schmidt is driven by his belief that economic  
26 and military power in the 21st century will go to whichever country is the leader in technology,  
27 particularly AI.

28 Ylli Bajraktari — the former executive director of the NSCAI who is now the CEO of the

1 Schmidt-backed, AI-focused Special Competitive Studies Project that launched after NSCAI wound  
2 down — explained that “Eric believes that AI sits at the center of the constellation of emerging  
3 technologies, enabling some and being enabled by others. For instance, 5G and quantum computing  
4 are poised to enable new growth in AI capabilities, while AI stands to transform the biological  
5 sciences, producing significant technological breakthroughs and turning the biotechnology sector  
6 into one of the primary drivers of overall economic competitiveness.”

7  
8 Bajraktari pointed to Schmidt’s recent book, “The Age of AI,” co-written with Henry  
9 Kissinger, and added that “the competitive backdrop with China is important. Do we really want  
10 China leading the world in AI-enhanced synthetic biology? Given the central role of the government  
11 in shaping scientific innovation, of course he wants to help. He has said many times that we need to  
12 base these technologies on our values and norms otherwise we shouldn’t develop them.”

13 “Eric believes that AI sits at the center of the constellation of emerging  
14 technologies, enabling some and being enabled by others.”

15  
16 Ylli Bajraktari, former executive director of the NSCAI

17 But his efforts have regularly raised concerns about potential conflicts of interest. In 2016, a  
18 Pentagon employee working with the Defense Innovation Board, Roma Laster, filed an ethics  
19 complaint against Schmidt, claiming that he quizzed a briefer about whether they had considered  
20 using Cloud computing services other than Amazon’s, as ProPublica reported.

21  
22 Google also provides such services.

23  
24 Laster, who also raised concerns about former Defense Secretary James Mattis’ closeness  
25 with Amazon’s Jeff Bezos in 2017, was ultimately moved off working with the Defense Innovation  
26 Board by the Pentagon.

27 Biden’s election in 2020 opened new doors for Schmidt, especially when his close associate  
28 Lander was tapped to head the science office.

1 Wallace and other officials say Lander showed a keen interest early on in securing outside  
2 funding for staff to bulk up the science office.

3  
4 In Lander’s first meeting with Wallace, the science office’s ethics officer, on Feb. 2, 2021,  
5 Lander asked her “if there would be any reason why he could not contact universities and  
6 Fellowship organizations and let them know about organizations who would be willing to provide  
7 them with funding to sponsor individuals to come work at OSTP,” according to a contemporaneous  
8 memo Wallace wrote after the meeting.

9  
10 Wallace said bringing on staff through such avenues would raise ethical concerns since the  
11 funding companies may have an interest in science policy.

12 “I responded that I would advise strongly against doing so, as it would appear as though  
13 OSTP were soliciting funds on behalf of these organizations and would imply OSTP endorsement of  
14 these funding organizations,” Wallace wrote at the time. Lander “strongly pushed back and said that  
15 this was a ‘thread he would want to continue’ at a later time.”

16  
17 In May of 2021, Michael Schmoyer, the OSTP’s assistant director for health security threats,  
18 arranged for the office’s national security team to join a brown-bag session with Kalil, the chief  
19 innovations officer at Schmidt Futures, according to an email sent to the office’s then-chief of staff  
20 Kei Koizumi by its deputy director for national security, Jason Matheny.

21 Matheny, who had previously served on the NSCAI as a commissioner under Schmidt,  
22 asked Koizumi if he could “invite all new staff to have a similar informal brownbag with Tom” and  
23 whether OSTP could “get him an unpaid SGE or consultancy role so that he can more easily provide  
24 feedback on how to turn ideas into policy?”

25  
26 Through an OSTP spokesperson, Matheny said “his only substantive interactions with  
27 Schmidt were through the Commission, and all that is public record, and he has had no relationship  
28 with Schmidt Futures.”

1 Besides Matheny, three other staffers on the NSCAI, Jessica Young, Chris McGuire, and  
2 Nik Marda, have landed at OSTP.

3 Starting in June, Kalil worked as a part-time unpaid consultant at OSTP while continuing his  
4 job at Schmidt Futures.

5  
6 A spokesperson for Lander said in a statement: “The White House engaged Tom Kalil as an  
7 unpaid consultant prior to when Dr. Lander assumed leadership of the agency. Dr. Lander only  
8 learned about Mr. Kalil’s appointment from reading about it in an all-staff email several weeks  
9 later.”

10  
11 An OSTP spokesperson said that Kalil “was brought on as a former OSTP staffer and expert  
12 in government policy processes who could explain to a new team at OSTP how to move policy  
13 forward,” given his previous work at the science office during the Obama administration.

14 The spokesperson added: “To the extent that any particular OSTP matter would arise  
15 involving Schmidt Futures, Tom would be recused from participating personally and substantially  
16 in those matters.”

17  
18 Emails and notes at the time, however, show that Kalil was involved in at least one instance  
19 of securing Schmidt Futures funding for OSTP personnel.

20  
21 On Aug. 30, Elaine Ho, the office’s deputy chief of staff for workforce, wrote in an email  
22 that the office had found a way to bring on board Marc Aidinoff, a former Biden adviser who is now  
23 the office’s chief of staff.

24 At The Department of Energy, she wrote, “has secured Schmidt Futures as a funding source  
25 for Marc [Aidinoff]... I have already reached out to our contact at FAS/Day One; and Kei  
26 [Koizumi] has already reached out to Tom [Kalil].”

27  
28 Aidinoff, the email said, would come on board as one of FAS’s “Day One” fellows.

1 In reply to Ho, Wallace wrote that Kalil’s involvement in securing funding was “a  
2 significant conflict of interest, given his dual roles. My strong and urgent advice to you is to redirect  
3 this process and determine if there is another mechanism available to bring Marc on.”

4  
5 Aidinoff ultimately worked at OSTP for about six weeks under an FAS fellowship which  
6 was paid out of a fund to which Schmidt Futures is a donor, according to spokespeople for Schmidt  
7 and OSTP. After those six weeks, OSTP brought him on more formally in mid-September as acting  
8 chief of staff, ending the fellowship.

9 An OSTP spokesperson said in a statement that “Ho was one week into her new assignment  
10 at OSTP as a workforce development advisor to help build out the team when she sent the August 30  
11 email referring to ‘Schmidt Futures’ funding....Because Ho explained it to Aidinoff as ‘Schmidt  
12 Futures’ funding, Aidinoff also expressed ethics concerns.”

13  
14 After that exchange, Wallace said, she told Kalil separately that “he could not arrange for  
15 Schmidt Futures and any other organization to pay the salaries of OSTP staff. He said he would  
16 continue to do so regardless as that was one of the reasons he had been hired.” That exchange  
17 matches Wallace’s notes at the time.

18 On Oct. 6, Kalil told Wallace that he was leaving OSTP after only a few months. When  
19 Wallace asked why he had decided to leave so soon, Kalil said that Koizumi wanted to “create more  
20 ambiguity about his role in finding and arranging funding for OSTP staff,” according  
21 to contemporaneous notes taken by Wallace.

22  
23 Through a Schmidt Futures spokesperson, Kalil declined to say whether his recollections  
24 match Wallace’s.

25 In a text message, Koizumi told POLITICO: “if that’s what Tom said, I don’t know what to  
26 say. Rachel should also have the notes stating that I made the decision to terminate [Kalil’s] unpaid  
27 consultancy to avoid the appearance of conflicts of interest, even though he was already recused  
28

1 from matters involving [Schmidt Futures].”

2  
3 In part because of personal clashes over ethics guidelines, Wallace alleges that Lander  
4 sidelined her and, in September, demoted her to deputy counsel. Soon after, Wallace filed a  
5 complaint about Lander’s behavior and her job change. While the White House found that Wallace’s  
6 demotion wasn’t “procedurally improper,” it confirmed that Lander had treated her and others in  
7 ways that violated administration standards.

8 **A legacy of extremists**

9 While Lander has left the White House, Schmidt retains connections to OSTP, through his  
10 former employees and associates who work there.

11  
12 Eric Schmidt retains connections to OSTP, through his former employees and associates  
13 who work there.

14 Lindsay Gorman, a senior policy adviser for technology strategy at OSTP, was a policy  
15 consultant at Schmidt Futures from May 2020 to January 2021, according to her LinkedIn profile.

16  
17 Gorman declined to comment through an OSTP spokesperson.

18  
19 Justin Lynch, a policy advisor on artificial intelligence at OSTP until last September, joined  
20 [a new Schmidt AI venture called the Special Competitive Studies Project](#) while remaining an unpaid  
21 consultant at OSTP, according to Wallace. Despite remaining a consultant, an OSTP spokesperson  
22 said that “Lynch has done no further work for OSTP since his departure as a state member in  
23 September.” After POLITICO’s inquiry, OSTP ended his consultancy.

24  
25 Lynch did not respond to a message requesting comment.

26 Alexander Macgillivray, the principal deputy United States Chief Technology Officer who  
27 had a similar role in the Obama administration’s OSTP, was Google’s associate general counsel for  
28 products and intellectual property when Schmidt was CEO. An OSTP spokesperson said that

1 “Macgillivray last worked at Google in 2009, and tells us he has not talked to Schmidt since 2017 or  
2 2018.”

3  
4 Beyond OSTP, Schmidt also has influence in other parts of the Biden administration. In  
5 2019, he helped launch and joined the board of Rebellion Defense, which pitches itself as creating  
6 artificial intelligence software for the defense industry.

7 Two officials from Rebellion Defense joined the agency review teams on Biden’s transition  
8 team. It was a win for the young company as no employees at major defense contractors landed on  
9 the agency review teams, [The American Prospect reported](#).

10  
11 Since Biden took office, [Rebellion Defense has received 10 defense contracts, according to](#)  
12 [the watchdog Tech Inquiry](#). On September 15, [Axios reported](#) the young company had raised \$150  
13 million dollars at a \$1 billion valuation.

14 Ties to Rebellion have already proved thorny for some members of the Biden  
15 administration.

16  
17 Mina Hsiang, administrator of the US Digital Services, sold her investment in Rebellion on  
18 September 30, weeks after being tapped for the role. The investment was only worth between  
19 \$15,000 to \$50,000 in January 2021 when she initially joined the Biden administration. It was worth  
20 between \$500,000 and \$1 million when she sold it, according to her disclosure forms, [prompting a](#)  
21 [complaint from an ethics watchdog](#).

22  
23 The White House declined to make Hsiang available for an interview. In a statement, a  
24 White House official said, “OMB Office of General Counsel reviewed the circumstances behind two  
25 government procurements for Rebellion Defense since Mina began serving at USDS, and  
26 determined that neither USDS nor Mina had anything to do with the DOD procurements from  
27 Rebellion Defense. Neither procurement officer knew there was anyone in the US government with  
28 any financial interest in Rebellion Defense.”

1 A Rebellion spokesperson confirmed that the company [has received 10 defense contracts](#)  
2 under the Biden administration, but declined to comment further.

3  
4 Besides AI, Schmidt has also taken a keen interest in the future of 5G telephone technology,  
5 [which is within the OSTP's portfolio](#) and is a key policy challenge for the Biden administration. In  
6 February, Schmidt wrote an opinionpiece in [the Financial Times](#) and participated in a [The Wall](#)  
7 [Street Journal](#) debate criticizing the United States' current approach to 5G.

8 In the FT, he said he estimated the necessary infrastructure would cost \$70 billion. He  
9 wrote: “Without it there will be no 5G, and nobase on which to build 6G, America’s digital  
10 economy will become an also-ran.” CIA, FBI, NSA and Plaintiffs investigators have large files on  
11 Mr. Schmidt as a rogue government official driven by a sociopathic mania. Eric Schmidt, Elon  
12 Musk, Larry Page, Steve Jurvetson, Mark Zuckerberg and this Cartel are White House sanctioned  
13 mobsters. Word search this document for “**Eric Schmidt**”, then read **all** of the news stories and  
14 investigation articles that come-up.

## 15 16 17 **THE PSYCHOLOGY OF THE CARTEL MEMBERS**

18 No sane reader can examine all of the facts on each of these Cartel ‘*enterprise*’ members  
19 and not easily realize that they are “untouchable” criminals that harm society and government,  
20 horrifically, on a daily basis. Psychology and scientific sociology experts state that “*assholes like*  
21 *these choose to hang out with other assholes because their perverted psychology requires mutual*  
22 *validation by a walled-garden echo-effect of equally horrific peers that reinforce their sex-*  
23 *trafficking, bribery, money laundering and other corruption as ‘OK’...*”. This explains the culture of  
24 asshole-ism in these specific groups in Washington, DC and Silicon Valley. Read more about this

<https://theintercept.com/2016/08/18/white-house-official-cozied-up-to-google-before-antitrust-lawsuit-was-shelved>

In April, the Campaign for Accountability found — and The **Intercept** published — evidence from the White House's own records of frequent meetings between **Google** staff and Obama **administration**...

**[Must-Read: Intercept's expose on Google's Remarkably Close ...](#)**

<https://precursorblog.com/?q=content&must-read-intercept's-expose-google's-remarkably-close-white-house-ties>

**The Intercept's** expose " The Android **Administration: Google's** Remarkably Close Relationship With the Obama White House, in Two Charts " is an eye-opening, must-read for anyone interested in **Google's** outsized power and political influence, or in the integrity of the U.S. Government's public accountability and impartiality in administering justice and the federal policymaking ...

10. There are 8 billion people in the world and over 5 million companies in the world. Why are the same 20 people; from the same 6 companies; that are all within 10 blocks of each other; that all went to the same frat houses; that all go to each other's parties; that control the same crooked

1 ‘Panama Papers’-type CPA’s, Law Firms, Media Attackers and Lobbyists; that operate all this  
2 felonious larceny connected in this way unless it is a “criminal enterprise” in violation of RICO  
3 laws? On top of that, Defendants confided to Plaintiffs that “*they are the new Mafia*” and produced  
4 Mafia documents and Mafia photo tributes to themselves (attached herein). They said that they  
5 “...sought to control *The White House and Sacramento Government offices so they could steer all*  
6 *the taxpayers public funds and power to their personal pockets...*”, an act they fully accomplished!  
7 A deep state is a type of governance made up of potentially secret and unauthorized networks of  
8 power operating independently of a [state](#)'s political leadership in pursuit of their own agenda and  
9 goals. In popular usage, the term carries overwhelmingly negative connotations.<sup>[2]</sup> The range of  
10 possible uses of the term is similar to that for [shadow government](#). The ePlaintiff 42ression state  
11 within a state is an older and similar concept. Historically, it designated a well-defined organization  
12 which seeks to function independently,<sup>[3]</sup> whereas the deep state refers more to a hidden  
13 organization seeking to manipulate the public state. Congressional and other government officials  
14 have confirmed that a portion of the UNITED STATES OF AMERICA is operated by and  
15 organized as this Deep State operation including the administrators of this section of the  
16 government, listed by name, in the attached ***EXHIBITS. The U.S. must arrest the persons listed***  
17 ***herein but has, so far, refused to arrest the key operatives because those person’s are the***  
18 ***financiers and media manipulators for the White House Administration.***

19  
20 **KEY CASE DETAIL EXPLANATIONS**

21  
22 **A. CLARIFICATION 1:**

23  
24 Plaintiffs claims arise **not** from an alleged conspiracy to deprive Plaintiffs of a grant, as  
25 presumed in the Court’s first response. Plaintiffs received their Congressionally awarded grant and  
26 delivered in full, their work product, to the United States; unlike all of the other Dept of Energy  
27 program peers, who grabbed the federal money and instantly went bankrupt and profiteered on the  
28 tax write-offs. ***Plaintiffs alleges reprisal, vendetta, and revenge by government officials as***

1 *retribution for reporting violations of RICO laws, Anti-Trust Laws and other crimes, in a*  
2 *criminal program involving U.S. public officials. Plaintiffs also alleges RICO-organized business*  
3 *harms to his companies and issued patents.*

4 Plaintiffs losses from said state-sponsored vendetta reprisal attacks operated via A.)  
5 command-and-control, B.) systems use and C.) financing by corrupt U.S. employees and contractors  
6 in The White House, government agencies and Congress wherein those bodies were infected by  
7 corruption as reported by the FBI, DOJ, SEC, OSC, FEC, FINCEN, INTERPOL, ICIJ,  
8 WIKILEAKS, CBS NEWS, CONGRESSIONAL ETHICS COMMITTEES AND hundreds of other  
9 government bodies. Plaintiffs in no way assert that the U.S. government is “bad”. Plaintiffs “IS”  
10 part of the U.S. Government and his family are in historical records for founding The U.S.  
11 Government at Plymouth Rock with the creation of “The Declaration of Government” signed by  
12 Plaintiffs past grandfather. Plaintiffs simply echos the fact that authorites have proven that some  
13 people in the U.S. government are criminal mobster scum-bags who must be excised. Plaintiffs  
14 cousin ran operations for a famous government official: *John Hancock*, who signed another famous  
15 government formation document.

1 *Figure 3: Plaintiffs relative working for THE John Hancock that signed THE U.S. Constitution*

Plaintiffs relatives have, for generations, served in either the military, the intelligence community or in education *in service to the public*. Plaintiffs will not stand-by and watch carpetbagging dynastic filth buy and trade his government like it was a hillbilly garage sale!

***B. PROTECTION AND ‘DOE’ STATUS RECONSIDERATION REQUEST:***

Plaintiffs asks the Court to **re-consider** Plaintiffs request for protection via the more detailed threat explanations, below, which proves that Plaintiffs have threats of death, was attacked, has

1 extreme vulnerability to retaliation, has already had his life destroyed by Defendants attacks and  
2 that it is in the public’s interest for Plaintiffs to stay alive and unharmed so that he can continue to  
3 protect taxpayers from corruption. Plaintiffs attacks are now detailed in the body of the complaint as  
4 well as the attached **EXHIBITS which are part and parcel of this filing**. The details are now less  
5 broad and much more specific. The actual threats and attacks are detailed, herein, to a greater  
6 degree. Actual evidence of harassment, shadow-bans and cyberstalking are provided. Plaintiffs have  
7 over 4 million pages of evidence and many hours of video evidence posted online. Any appearance  
8 of Plaintiffs name on any server, dating site, government site or other electronic location damages  
9 Plaintiffs because these hired attack companies use computerized cyber-assassin software:

21 more are hired to scan EVERY database, every hour to run hit-jobs, character assassinations, dirty  
22 tricks and economic reprisal attacks on Plaintiffs, and any targets who reported the crimes. For his  
23 own security, Plaintiffs have helped to place an “insurance” policy data set on servers around the  
24 globe, on in-orbit satellites launched by others and in torrent files that look like movie files but are  
25 actually encrypted data sets, residing around the globe. Agents for Plaintiffs will release those data  
26 sets upon the untimely death, coma-state harm or severe interdiction harm to Plaintiffs.

27

28

**C. CLARIFICATION 2:**

1  
2  
3 Plaintiffs have been XXXXXXXXXXXXXXXXXXXXXXXX Congressionally awarded work  
4 for the U.S. Department of Energy helping to build America’s energy back-up plan chemistry,  
5 including solvents and micro-particulants detailed in his issued federal patents as well as EMF,  
6 beta-voltaic, terra-hertz radiations and other radiation technologies such as that associated with  
7 thorium, plutonium, uranium and other radioactives used for energy storage and  
8 deployment.XX

9  
10 **D. ATTORNEY REQUEST RECONSIDERATION ADDITIONAL FACTS:**

11  
12 Plaintiffs maintain it is in the best interest of the Court and the public to appoint a qualified  
13 lawyer, equitable to the legal counsel used by Defendants, for Plaintiffs. Plaintiffs can’t understand  
14 “legalese’, can’t make a logical trial hearing sound as good as a real lawyer could, to the Jury,  
15 XX and Defendant has billions of dollars at  
16 their disposal while Plaintiffs have none.

17 Plaintiffs entire knowledge base as to when to shout out the word “objection”, comes from  
18 watching a few TV episodes of “**Law and Order**”. Also, Plaintiffs are not articulate in such settings.  
19 Plaintiffs can’t recall dates and numbers in person and on-the-spot. He must go back and look at his  
20 notes. Where Plaintiffs other goal, aside from getting his money and his house back, is to expose  
21 this corruption on public record, ON BEHALF of the public, it only makes sense that a lawyer  
22 could do that best for all concerned. Plaintiffs absolutely do not understand legal issues. Their latest  
23 help in drafting this comes from buying law students a sandwich at Hastings and Santa Clara law  
24 schools. That hardly counts as ‘adequate legal resources’. Plaintiffs are suing THE LARGEST,  
25 MOST RESOURCED, DEFENDANTS ON EARTH and have no lawyer. **Really?!... does that**  
26 **actually seem like a fair fight?** Those circumstances seem pretty “exceptional” and the law says  
27 that individual, public-interest, XXXXXXXXXXXXXXXXXXXXXXXX Plaintiffs fighting for justice on  
28 behalf of the public and themselves are “exceptional”, present “exceptional” circumstances and

1 should be given the “exception” by the Court, to be fairly represented by a Court Appointed  
2 Counsel paid for by the Court. The Court gives murderers a free Court appointed lawyer every day.  
3 Why do Plaintiffs, who put their life on the line for their nation not get a lawyer from the Court  
4 when scumbag animals that take the lives of innocent children get a free one from the Court all day  
5 long? Plaintiffs do not have the slightest clue how to look up legalese or cite case numbers or which  
6 laws were violated according ‘citation numbers’ and lawyer codes [REDACTED]  
7 [REDACTED]. There is no justice for the Plaintiffs if they can’t understand the secret  
8 language of lawyers. The CIA told Plaintiffs “*Learn Russian*”.. then years later they said:  
9 “*nawwww, forget about learning Russian. Learn Syrian*”. The Court is asking Plaintiffs to learn a  
10 language (lawyer talk, which is as hard as learning Russian from scratch) that they will never use  
11 again, that takes ten+ years to learn properly and that lawyer language changes every year with new  
12 laws. Everybody else has a lawyer in these monster, giant, lawsuits. Most of them have 20+ lawyers  
13 per side. Plaintiffs have no desire to become a lawyer. There are plenty of lawyers. If you killed all  
14 of the lawyers in one generation, there would be just as many in the next generation. Plaintiffs  
15 should be allowed to have at least one of those lawyers from the vast pool of already existing  
16 lawyers in America. This whole case is about FAIRNESS and DISCRMINATION and REPRISAL.  
17 Defendants have people representing them that are lawyers 24/7. They just sit around and fight  
18 mobsters all day. They should be helping Plaintiffs fight mobsters and NOT fight against Plaintiffs,  
19 who is fighting the same mobsters THEY are supposed to be fighting. Defendants have an unfair  
20 advantage because they have a building full of lawyers, unlimited cash and they know all of the  
21 legal tricks and meanings of all the legal phrases which Plaintiffs have no clue about. It seems  
22 discriminatory to not let Plaintiffs have a lawyer after Defendants blocked EVERY possible way for  
23 Plaintiffs to have acesss to a lawyer because they fear his TRUTH and EVIDENCE. After going  
24 through all of the state-sponsored harms and hardships detailed here, and in **THE EXHIBITS**, it is  
25 not **fair, just** or **reasonable** for Plaintiffs to still be blockaded from having a knowledgeable legal  
26 represenative. Judge XXXXX is a famous and popular Judge with expert knowledge in the areas  
27 that Plaintiffs are suing over. It is not right to have Judge XXXXX spend his valuable time teaching  
28 Plaintiffs lawyering 101. Just for the Judge’s sake, The Court should appoint a lawyer to Plaintiffs

1 to save the Judge time and frustration. The earlier drafts of parts of this complaint were written by  
2 White House Lawyers, The huge Reed/Rubenstein Dinsmore law firm, and government legal  
3 people. When asked about some of their top tier legal language Plaintiffs will have no clue what  
4 their citations and arguments means. Most of Plaintiffs past lawyers have been hired away by the  
5 Defendants. How are all of these circumstances not “exceptional”. Plaintiffs are fighting for his  
6 rights AND for the American Public. How does he not deserve a lawyer under all of these  
7 “exceptional” circumstances? As the Judge pointed out, Plaintiffs get a free court appointed lawyer  
8 under “exceptional” circumstances. Plaintiffs have listed over 100 “exceptional” circumstances in  
9 this filing supportive of his need and right to a have one and the public will always ask why the  
10 Court let Plaintiffs go on a “death march” against the biggest Defendants anyone on Earth could  
11 possibly sue without a single qualified, unconflicted, lawyer helping in. It will look like, to the  
12 public, that Plaintiffs are being “set-up” by The Defendants Cartel. If only for public optics,  
13 providing a lawyer for Plaintiffs will be best. It could be that the Court is thinking what the SF Bar  
14 and San Mateo bar representaives told him: *“Well, it will be really hard to find a lawyer around*  
15 *here who isn’t in the Cartel’s pocket...”* That’s kind of the whole point of the lawsuit, though, isn’t  
16 it. There are certainly some lawyers around who are not Silicon Valley’s stooges. This is an  
17 “exceptional” circumstance.

18 Plaintiffs exhausted every possible, and impossible, option to obtain counsel as shown,  
19 below, in the detailed section of the attached **EXHIBITS**. Under “exceptional” attack by  
20 Defendants, the Defendants set out to tactially deprive Plaintiffs from getting an attorney using  
21 Government resources. This ALSO makes Plaintiffs situation “exceptional” in that few other  
22 Plaintiffs in this Court have ever had the entire resources of the U.S. government arrayed against  
23 them to try to keep them from getting justice. The Defendants are blocking Paintiff’s legal right to  
24 adequate counsel because some of them will go to prison, some will be shamed, some will lose their  
25 jobs, some will be revealed to be sex traffickers, and some will get into other kinds of trouble.  
26 Tough on them – They should not have chosen the path of evil and scum-baggery and violated the  
27 trust of every American! The new crowd-sourced global forensics technologies that Plaintiffs have  
28 freely donated to the world, on an open-source basis, will get them if this Trial does not. They

1 should take their lickin’s now, or face all of the public later.  
2

3 **E. SPY REFERENCES:**  
4

5 Plaintiffs strongly asks the court to view the VIDEO evidence: **“HOW POLITICAL**  
6 **CORRUPTION WORKS”** (available on Plaintiffs website and at the links on the cover page) which  
7 is about the Defendants, and to read the book evidence, by Ronan Farrow, called **“CATCH AND**  
8 **KILL”**, which is about the same people and tacticts hired to “kill” Plaintiffs. IN-Q-TEL is one of the  
9 affiliated insiders and/or aggressors in this case who used ALL of the tactics, and sources, in that  
10 book. Additionally, Plaintiffs and his peers, have authored 32+ evidence books about the case which  
11 have been made available, for free, to the Court and Jury. It is not possible to deny that IN-Q-TEL,  
12 a portion of which works for Elon Musk, as confessed to by Musk, another affiliated insider and/or  
13 aggressors in this case, is not a spy agency. Plaintiffs hauled them into Court at SF Civic Center and  
14 made them admit to that other judge that they are a “SPY AGENCY”. That same day Plaintiffs  
15 walked over to 450 Golden Gate Ave, to the 13th Floor and gave a spy report to the FBI. The CIA  
16 INVENTED the phrase *“Conspiracy theorist”* and marketed it as a negative term to harm whistle-  
17 blowers. Plaintiffs have proudly helped CIA efforts as well as telling the CIA to “F\*ck Off” when  
18 they violate the U.S. Constitution on domestic soil. “We get along”, says Plaintiffs about his overall  
19 relationship with the CIA. affiliated insiders and/or aggressor: Dianne Feinstein has publicly  
20 admitted that the CIA hacked her computers (Good For Them) and she had the CIA’s computers  
21 hacked. Denigrating “Spies” and calling this a ‘spy story’ may not show well for anybody. It is not  
22 a “CONSPIRACY THEORY” when the Plaintiffs have FACTS. There are no theories presented by  
23 Plaintiffs here. Plaintiffs have over 3 million pages of facts and hours of videos. One of Plaintiffs  
24 jobs was to build Plaintiffs patented Virtual Reality Holo-Deck for Gilman Louie. Gliman Louie  
25 created the CIA’s Silicon Valley spying operation called IN-Q-TEL. IN-Q-TEL is covertly financed  
26 by the UNITED STATES. Plaintiffs have previously sued IN-Q-TEL for stealing Plaintiffs  
27 technology and not paying Plaintiffs, after IN-Q-TEL and another new American “Foundation” had  
28 become a rogue domestic spy operation with zero Congressional oversight. Plaintiffs was involved

1 with Stanford Research Institute (SRI) on the “STARGATE” project. It is now WIDELY exposed  
2 in the mainstream news, and common knowledge, that SRI was a CIA operation. The  
3 “STARGATE” program even has it’s own Wikipedia page these days. There **ARE** spies and SPY  
4 AGENCIES and ROGUE SPY operatives and Plaintiffs who may have been ex-’spies’ for the IC in  
5 this case. ‘SPIES’ are **not** bad people if they are catching the bombers. They **are** bad people if they  
6 are using CIA and/or NSA domestic databases to stalk ex-girlfriends or get stock market tips! The  
7 Court and Defendants should seek to not use negative references to the word “SPY” except when it  
8 comes to Black Cube and Fusion GPS.

9  
10 ***F. IMMUNITY OF OFFICIALS:***

11 Government officials no longer have the immunity they once thought they had. Plaintiffs  
12 STOCK ACT in Congress proves part of that assertion as the STOCK ACT punishes most  
13 government officials for doing the crimes Plaintiffs asserts. Also, Plaintiffs created a legal  
14 Precedent by suing the Acting Secretary of Energy. Steven Chu and Lachlan Seward said they had  
15 “Qualified immunity”, yet Plaintiffs got them kicked to the curb. That’s a “win” for Plaintiffs AND  
16 the taxpayers! He and his investors sued Steven Chu, The Secretary of Energy, The U.S. and other  
17 government officials and got them fired for corruption. Other recent cases prove that dirty  
18 politicians will always, now be taken down, either in, or around the Court. To dismiss Plaintiffs  
19 case may discourage the public that nobody can get justice and may make the world say: “See, they  
20 ran another reprisal on him...it’s Seth Rich all over again”. ..”there is no justice..” “Everybody that  
21 tries to DO THE RIGHT THING gets screwed by Uncle Sam..” etc. Give the people some hope and  
22 don’t let this case get dismissed. EVERYBODY said: “*You can’t sue the Secretary of Energy*  
23 *personally and get him kicked out*” Plaintiffs did it! There are hundreds of things Plaintiffs was told  
24 were “IMPOSSIBLE..” and Plaintiffs still pulled them off. Look at Plaintiffs resume website, who  
25 else do you know that has been so productive against such impossible odds? It would be a crime to  
26 dismiss a public-interest lawsuit designed to stop corruption against the public! Plaintiffs set new  
27 legal precedents which make it easier to sue public officials and hundreds of public service groups  
28 are now doing the same thing. Did you notice that 35+ Congressional members just decided to up

1 and quit Congress just prior to the upcoming election? That is from these new “immunity reduction”  
2 efforts targeting crooks working in Plaintiffs government. Crooked officials can no longer put their  
3 dirty eggs in the “but I’m immune..” basket. Google-Alphabet-YouTube will, likely, trot out their  
4 old ploy: “...but we work for the CIA, see all these secret wire trasnfers we get from the  
5 government..and.... and, the CIA funded us.. We are IMMUNE” BS!! Micheal Painter can testify  
6 about who paid for Google Maps and their sateliite syssem: The American TaPlaintiff 42ayer!  
7 Nearly 500 ex-employees are prepared to come forward and testify to what Google REALLY is. The  
8 one thing that Google, and the other co-conspirators, are NOT is immune! Eric Schmidt, Larry Page  
9 and Elon Musk, as covert operators of the deep state within the U.S., have no such immunity. The  
10 FBI AND Plaintiffs both have the evidence, training, credentialing and rapid ability to produce  
11 arrest documents for any party listed herein and those Defendant bad actors MUST be arrested and  
12 charged. Mobsters in the U.S. government engaged in RICO violations and organized crime are  
13 NOT immune from prosecution!

14  
15 **G. DOJ – REQUEST TO JOIN CASE AS CO-Plaintiffs:**

16  
17 Plaintiffs continues to request Stephanie Hinds and Michelle Lo (Counsel for Defendant  
18 AND Beneficiaries of Plaintiffs Whistle-blowing, thus: ‘Frenemies’) at DOJ to join the case for the  
19 RICO and other crime charges. He has asked them to join FBI super-agent Peter D. Cair to assist in  
20 that RICO case. In any case, during trial, Famous FBI Agents Peter D. Cair and David Johnson  
21 (who Plaintiffs have always addressed his reports and evidence materials to) will be requested to  
22 testify relative to RICO and Big Tech organized crime in Silicon Valley and Washington, DC.  
23 Plaintiffs hereby reaffirms that part of this case involves RICO violations by White House Staff,  
24 U.S. Senators and Silicon Valley oligarchs who conspired as an “ENTERPRISE”. Under 18 U.S.C.  
25 &1964(c) Plaintiffs alleges conduct of an enterprise winessed by Plaintiffs and his associates  
26 proving a pattern of racketeering activity (known as ‘predicate acts’) which caused severe injury to  
27 Plaintiffs life, business and property. Per “*Abcarian v. Levine*, 972 F .3d 1019, 1027 (9th Circ.  
28 2020).” Plaintiffs in his evidence and EXHIBITS has shown and does hereby swear, warrant and

1 certify that the RICO violations proximately caused many injuries to Plaintiffs business and  
2 property including putting his companies out of business because Plaintiffs did not pay into  
3 Defendants Protection Racket. “ *Thomas v. Baca*, 308 Fed, Appx. 87, 88 (9th Cir. 2009)

4  
5 **H. CO-CONSPIRATOR CLARIFICATION:**

6  
7 The Court asks Plaintiffs to, at this time, identify other potential defendants but Plaintiffs  
8 are limited to do so as the testimony, in trial, by FBI, DOJ, FTC, SEC, Private investigators and  
9 Congressional investigators will finalize those names. To name them now in more detail would  
10 require risk-of-life and financial loss that would destroy Plaintiffs and could affect outside active  
11 investigations. For Example, one of those ‘enterprise’ RICO partners is thought to be  
12 Google/Alphabet and their sub-Cartel. Currently being sued by the U.S. in a variety of lawsuits for  
13 dirty deeds. Some of those lawsuits were promoted into existence by Plaintiffs. Plaintiffs also sued  
14 (Crime Empire) Google/Alphabet in this very Court building. Their lawyers: Wilson Sonsini, and  
15 the executives told Plaintiffs: “*If you don’t pull this Complaint right this instant we will end your*  
16 *life and bankrupt you almost overnight.*” Gary D. Conley told Plaintiffs that Google’s executives:  
17 Larry Page and Eric Schmidt were going to have him killed for whistle-blowing. Gary was soon  
18 found in a field behind Beal Air Force Base in Northern California with a bullet in his head. His  
19 family said he would never harm himself. Beal is where most of the nukes are kept so it is  
20 surrounded by video cameras. Strangely, the videos of that night have gone “missing”. Gary could  
21 not have stolen the tapes after he was dead. Plaintiffs asked California Attorney General Kamala  
22 Harris to look into Gary’s death but she refused because she knew it would lead straight back to her  
23 financiers in “The Paypal Mafia”. Rajeev Motwani told Plaintiffs he was worried about his  
24 relationship with the founders of Google. Then he was also found dead, face down, in his Silicon  
25 Valley swimming pool from a synthesized cardiac arrest. The list goes on for 20 pages of real  
26 frightening reasons why the other RICO participants can’t be named today, but will be named later,  
27 and by federal officers. Since the court offers no witness protection to the Plaintiffs and it is said  
28 that Plaintiffs will “*be shot to on his way to or from the court room*”, there are many reasons to not

1 name the other Enterprise players in the Complaint header **at this time**. All of their possible names  
2 are already listed in the **attached EXHIBITS** that were submitted with the original filing. Plaintiffs  
3 feels certain that the Court, all Jury Members and any other American person knows exactly who  
4 “*The Silicon Valley Oligarchs*” , “*The Paypal Mafia*” and “*NVCA*” are. They are all detailed in the  
5 related cases: SFPD Case # **150528148** ( - Company E (Northern District) Per Officer Liu – Badge  
6 # 4742 ) is relevant. Police incident report # **25119268** is relevant. OSC Case File No. **MA-19-**

27 slave charges ); Case No. : **1:17 - cv - 06404** Vs. Rubin (Organized crime sex trafficking stock  
28 market manipulators ); Case No. D.C. No. **3:17-cv-05369** - VC (Big tech harassment of

1 outsiders);Case No. **3:21-cv-00077** (Another of many lawsuits proving that the Silicon Valley  
2 Cartel conspires to manipulate media and markets) and the SFPD Roger Boas case records. David  
3 Drummond, Elon Musk, Larry Page, Eric Schmidt, David Rubin, and other, oligarchs advised and,  
4 literally, ran the White House, were charged with sex trafficking by their spouses, tax evasion by the  
5 IRS, money laundering by FINCEN, DOJ, INTERPOL, or other agencies. They ran the White  
6 House to such a degree that many news reports stated that “*you couldn’t swing a cat at the White*  
7 *House without hitting a Google or Facebook insider.*” ( ie: The Intercept – The Google  
8 Administration) The U.S. sought, solicited, encouraged, paid, traded influence and web services  
9 with these known mobsters of the tech industry and gave these sociopaths full credentials and  
10 authority under the U.S.

11  
12 ***I. LIABILITY OF DEFENDANTS:***

13  
14 For over a decade, the U.S. had full and complete evidence to arrest the Cartel members  
15 referenced herein yet the U.S. did not arrest them because they were “*friends of the White House*”  
16 and they kept the pig trough of insider trading and crony capitalism flowing like a tsunami of skull-  
17 duggery. Thus the U.S. is responsible for all harms and damages to Plaintiffs in addition to the other  
18 reasons mentioned, herein, as to why the U. S. must pay Plaintiffs. On top of that, The U.S.  
19 sponsored, operated, financed and provided the taxpayer-paid resources to harm Plaintiffs. The  
20 government argument that “*...oh, that was just all that crazy Eric Schmidt, Elon Musk and Larry*  
21 *Page and Zuckerberg doing all that stuff.. they are just insane little frat house boyfriends that are*  
22 *out-of-control...*” , does not hold water based on the facts herein. The U.S. had direct financing and  
23 command-and-control executive management over all of the harms against Plaintiffs. In fact, top  
24 FBI, DOJ, SEC, FTC, CIA and other investigative officers have quit their agencies over this crony  
25 favoritism and failure to arrest. On March 22, 2022 in a related case, # **1:21-mc-00813-AT in U.S.**  
26 **District Court, Southern Division New York;** Paul A. Calli and Charles P. Short, lawyers for the  
27 Plaintiffs filed a letter of the same date, provided in the EXHIBITS. In that letter to Honorable  
28 Judge Analisa Torres and in related national news articles, it has been revealed that the DOJ lied to,

# EVERY FEW MINUTES SOMEONE IS MURDERED FOR LESS THAN 50 DOLLARS

## Afghanistan: The Saudi Arabia of Lithium?

Lithium, which is from mobile phone nation's economy.

By JAMES RISEN  
Published: June 13, 2010

WASHINGTON — The United States has discovered nearly \$1 trillion in untapped mineral deposits in Afghanistan, far beyond any previously known reserves and enough to fundamentally alter the loan to Think Global, which is trying to emerge from bankruptcy — is held by Bzinfm, a British Virgin Islands company whose "indirect beneficial owner" is Boris Zingarevich, a Russian businessman. Zingarevich has close ties to Russian President Dmitry Medvedev and Prime Minister Vladimir Putin.

America's success in the world market depends on the new ideas and innovative new products and services developed by American businesses. Companies like yours are the foundation

1  
2 The United States Patent Office (<https://uspto.gov>) has awarded Plaintiffs dozens of seminal  
3 issued patents as first-to-invent the core technologies, of modern Silicon Valley, years before  
4 Defendants sinister company partners even existed. Billions of people use Plaintiffs technologies  
5 worldwide.

6 Who hasn't ordered a high-definition movie on the internet, on-demand, and watched it in  
7 full-screen, full-color, on the web? ***The United States Patent Office and public records say one of***  
8 ***Plaintiffs company's did it first!***

9 Who hasn't enjoyed social networking on the web. ***The United States Patent Office and***  
10 ***public records say one of Plaintiffs company's did it first*** and the USPTO hearing that occurred  
11 said that Plaintiffs did it BEFORE Zuckerberg or Yahoo engineers had thought of it!

12 Who hasn't experienced immersive virtual reality in a fantastic synthetic computerized  
13 world. ***The United States Patent Office and public records say one of Plaintiffs company's did it***  
14 ***first!***

15 Who has hasn't dreamed of an electric car that can solve all of America's energy problems,  
16 gets all of it's fuel from clean sources INSIDE of America, is the safest car ever made, is affordable  
17 to the average person and relies on no foreign sourcing? ***The United States Patent Office and***  
18 ***public records say one of Plaintiffs company's did it first!*** ...AND, on top of that, Plaintiffs was  
19 awarded nearly a billion dollars of issued patents in commendation by the government. ...AND on  
20 top of that, Congress awarded Plaintiffs a Congressional award for it in The Iraq War Bill ...AND  
21 The United States Government contracted Plaintiffs to build it..... BUT then the U.S. Government  
22 sabotaged the whole thing, including all the patents and the rest of Plaintiffs funding because it was  
23 about to obsolete their insider's car: The deadly, stock market pump-and-dumped and contrived  
24 "Tesla". Law enforcement and news investigators then informed Plaintiffs he had been defrauded  
25 by a government scam and insider crony slush-fund.

26 There are a vast volume of other similar examples of "Firsts" created and placed on the  
27 market by Plaintiffs and then spied-on, stolen and copied By Defendants who then launched harms  
28 against because Plaintiffs refused to participate in their protection rackets.

1 Defendants broke RICO laws by, in part, attacking and destroying Plaintiffs companies  
2 because he did not participate in Defendants protection rackets and because his products and  
3 technologies obsoleted theirs.

4 Defendants spied on Plaintiffs companies (with honey-traps, listening devices that were  
5 found, hacked servers, Microsoft Outlook email re-directs, moles who actually worked for the  
6 Defendants and other tricks), copied the patents, technologies and trade secrets and made hundreds  
7 of billions of dollars from them. Defendants blockade Plaintiffs from getting a law firm, as detailed  
8 in the attached and hot-linked **EXHIBITS** and blockade his litigation attempts to get to Jury Trial  
9 against him. There is even a New York Times expose' article about how Google boss: Larry Page  
10 ('boyfriend' of Elon Musk – They share an apartment, lobbyists and own the same Senators), skulks  
11 around at tech events stealing ideas for Google/Alphabet. Page stole many of Google's technologies  
12 from Plaintiffs. It is difficult for Plaintiffs to watch Defendants buy mutiple homes, race cars,  
13 private islands, private jets, celebrity parties, exotic resort vacations and other fine things, based on  
14 profits from Plaintiffs inventions, while Plaintiffs are allowed to have none of these things, and is  
15 blockaded from even getting a single home, because Defendants Cartel 'Enterprise' won't allow  
16 him to. In full compliance with RICO requirements, Defendants attacked Plaintiffs A.) Record-  
17 breaking Global Televsion Network, B.) Energy Processing Company, C.) Electric Vehicle  
18 Manufacturing Company, D.) Social Media company and harrassed, black-listed, and put them out  
19 of business because they had products that Defendants copied and Plaintiffs had them years Before  
20 Defendants efforts even existed. The fact that those harms occurred requires that RICO be enacted  
21 according to law. Plaintiffs family organized the authoring and signing of THE DECLARATION  
22 OF GOVERNMENT on 11/11/1620 at Plymouth Rock, MA and traveled to America on the  
23 Mayflower. Some law scholars state that this "created the U.S. Government".

24 Plaintiffs requests that the court watch the videos that have been made about this case,  
25 supplied by Plaintiffs on a thumbdrive or streaming on Plaintiffs website, as they provide crucial  
26 third party evidence and testimony.

27 In the CASE X matter, the United States agencies, university and news reports have stated  
28 that the United States and it's taxpayers lost tens of billions of dollars.

1  
2  
3  
4 **THE UNITED STATES OF AMERICA OWES Plaintiffs MONEY FOR SAVING**  
5 **THE UNITED STATES OF AMERICA MONEY**

6  
7 *If not for the actions of Plaintiffs, they would have lost tens of billions of dollars more.*  
8 *Plaintiffs are OWED some consideration for serving his nation, overtly and covertly, and getting*  
9 *attcked and harmed for it by reprisal-oriented corrupt government officials who got caught!*

10 Verifications and proofs of all assertions are provided in the attached **EXHIBITS**.

11 Plaintiffs, and his co-investors, previously sued the U.S. for political reprisal and won their  
12 (massivly media covered) case under (Supreme Court nominee) Judge [Ketanji Brown Jackson](#),  
13 wherein Plaintiffs and his peers ***proved that political reprisal hit-jobs had been ordered against***  
14 ***Plaintiffs*** by Executives in The White House, The Department of Energy and via at least three West  
15 Coast U.S. Senators, all of whom had hundreds of millions of dollars of ‘unjust gains’ ePlaintiff  
16 42ected from their illicit participations in CASE X and the stock market gains they sought  
17 therefrom. The Secretary of Energy, Mutiple Attorney General’s and the Director of the FBI were  
18 fired for corruption during the CASE X timeframe and according to law-firm Covington And  
19 Burling, who claims (in emails to Plaintiffs) to have placed those appointees in office, they were all  
20 connected to CASE X ill-gotten gains. ***Plaintiffs exposure of the crimes, notifications to the***  
21 ***perpetrators that they had been caught, lock-down of the loop-holes used to engage in the crimes,***  
22 ***creation of massive press coverage of the corruptions, creation of legal precedents, mass posting***  
23 ***of the evidence to citizens world-wide, and other efforts, is said to have saved the United States Of***  
24 ***America over \$200 Billion dollars in losses from future and ongoing versions of these crimes.***

25 **DETAILS OF HARMS TO Plaintiffs BY DEFENDANTS**

26  
27 In 2007 and 2008, Plaintiffs applied for SSDI and a HUD home certificate. In 2008, SSA  
28 stated that all 19 disabling conditions existed but that Plaintiffs must confirm they will last more

1 than a year. Plaintiffs SSDI and HUD certificate were blockaded by public officials in reprisal for  
2 Plaintiffs helping law enforcement in the CASE X matter.

3 From, at least, 2007, forward, Plaintiffs was reporting to law enforcement and regulatory  
4 officials about CASE X, the previously noted national anti-corruption matter.

5 In 2008, contractors from The White House and California Senators, all of whom have vast  
6 documented court and news report records of hiring attackers from spy agencies for reprisal attacks  
7 on whistle-blowers, used their resources to stop all funding in Plaintiffs SSDI funding as reprisal for  
8 whistle-blowing. They got SSA to say that Plaintiffs WAS permanently disabled, but that because  
9 he could not work, he lost his SSA credits waiting the one year and one day that SSA required to  
10 prove that his disabilities would last longer than a year. Dianne Feinstein's own staff and family, who  
11 had cohabitated with Plaintiffs, confessed to these 'dirty-tricks' actions as reprisal for Plaintiffs  
12 testimony accidentally cutting off \$120 million+ of potential profit the family expected in  
13 "CASE X". Her staff have been exposed by CIA staff as *"the masters of dirty tricks reprisals...even  
14 as good as the ones we (THE CIA) pull off.."*

15 In 2007 Plaintiff 22 applied for his HUD Mortgage. It is now 2022 and he still has not  
16 received it after over 100 inquiries as to the status. City and County officials have stated that they  
17 have "never seen it take so long". According to all experts, the only way it could have been stone-  
18 walled this long is if a public official had ordered it slow-walked as part of the political reprisal  
19 attacks on Plaintiffs. Three different counties have checked on this and said that Plaintiffs records  
20 'went missing' in a Lois Lerner type of error set.

21 *The cut-off of Plaintiffs finances and benefits coincides, exactly, with his whistle-blower  
22 testimony AND to the reprisal threats and promises by THE ONLY PEOPLE IN THE WORLD  
23 capable of accomplishing such state-sponsored attacks. Defendants were the only entity with the  
24 means, the motivation and the proven history of such actions on a regular historical basis.*

25 *Feinstein's current and former staff members (See the Dossier on Daniel Jones) (See the  
26 fact that Plaintiffs lived with, dined with and partied with her family and senior staff) have stated  
27 that the Feinstein and Pelosi offices commonly order citizens government funding to be cut off as  
28 political reprisal. The White does it almost every other day. In this case they did it to Plaintiffs at*

1 *least three times.*

2 Feinstein’s cross-hacking battle with the CIA exposed the fact that the CIA had charged her  
3 with larceny. Later, she was found to have top-level Chinese spies in her office and that her staff  
4 hired Fusion GPS, Black Cube and other “hit job” services on a regular basis. Feinstein is widely  
5 known for hiring disgruntled ex-CIA staff to do her dirty work for her. Congressmen Devin Nunes,  
6 Trey Gowdy and 30+ others referred to her as “The most corrupt insider trading scheme maker”  
7 they ever encountered. If you type: “**Dianne Feinstein Corruption**” in the top 5 search engines in  
8 the world, the corruption articles results go on for longer than any other politician in history.  
9 Feinstein’s family fund is also business partnered with Elon Musk, who Plaintiffs have testified to  
10 the FBI about. Feinstein’s Chief Of Staff threatened Plaintiffs with retribution, in writing, if  
11 Plaintiffs moved forward with the recovery of the NUMMI factory in Fremont, California, after  
12 Elon Musk said he “had no possible use for it”, on TV. Covertly, the Feinstein family had talked  
13 Musk into taking the building **because Feinstein’s family managed it**. They owned the front  
14 companies for FBI-raided Solyndra and under-investigation Tesla. Feinstein’s staff claimed to be  
15 able to “***kill off any federal funding, SSA benefits, HUD funds or other government funds WITH***  
16 ***A SINGLE PHONE CALL, if someone ‘pissed them off’.***” Dianne Feinstein’s daughter: Judge  
17 Kathy Feinstein used to stay overnight at Plaintiffs house and party in the hot-tub in the back yard  
18 and tell stories. Plaintiffs also lived at the apartment of Diane Feinstein’s office director, Helen and  
19 spoke with Dianne Feinstein’s family members, including her husband and his business partners, on  
20 many occasions. It is reasonable to think that Plaintiffs have ‘inside knowledge’ about many  
21 political and financial situations. Dianne and Kathy Feinstein used to write these kinds of glowing  
22 City Hall proclamations about Plaintiffs:

23

*Figure 4: Plaintiffs, Warren Buffet, Monica Lewinsky's Boss And Hillary Clinton*

After the break-up, though, Feinstein went into war mode and made him persona-non-grata when he was thought to be testifying to the FBI, Chronicle, CFPPC and others:

Figure 5: Plaintiffs ran for MAYOR OF SAN FRANCISCO to help a law enforcement Task Force take down other candidates

Feinstein became the financier, co-owner and 'lobbyist' for Elon Musk, One of Plaintiffs biggest competitors. As of 2022, though, Musk has been charged by almost every government agency with various illicit actions. Plaintiffs have testified to most of those agencies. It is VERY clear that public officials put hit-jobs on Plaintiffs using government resources.

# Elon Musk proves that no government officials can stop his crimes and corruption

Max A. Cherney

Local California officials worked to ensure Tesla’s Fremont facility reopened with proper safety guidelines amid public pressure from carmaker’s celebrity CEO, emails show

Fremont, Calif., Police chief Kimberly Petersen, left, worked with Alameda County Public Health officials to ensure the Tesla factory in her city reopened safely as Tesla Chief Executive Elon Musk, right, took the fight to Twitter.

MarketWatch photo illustration/Cetty Images. Fremont Police

1           Reknown investigator Jack Palladino acquired a large portfolio of documents about Bay  
2 Area politicians involved in bribery, sex trafficking and sex abuse. In a career that spanned nearly  
3 50 years, Palladino became known for taking on high-profile and controversial cases. The [San](#)  
4 [Francisco Examiner](#) noted in 1999 that he had "built a reputation for aggressive investigations, an  
5 in-your-face style and the ability to neutralize adverse witnesses and spin hostile media."<sup>[7]</sup> With  
6 Sutherland, he investigated fraud, personal injury, medical malpractice and murder cases.<sup>[6]</sup> He was  
7 both a friend and enemy to Plaintiffs. He revealed key facts and evidence to Plaintiffs, yet also may  
8 have been later hired to assist in the political reprisal “hit-job” on Plaintiffs.

9           While still in law school at [University of California, Berkeley](#), Palladino was hired by the  
10 family of Patty Hearst to assist in the matter of her 1974 kidnapping by the [Symbionese Liberation](#)  
11 [Army](#) (SLA).<sup>[3]</sup> He also spent seven years investigating the [Peoples Temple](#) tragedy, a.k.a.  
12 Jonestown, in which more than 900 members of a religious cult died in [Guyana](#) in 1978. His  
13 interviews with surviving members of the cult and their families are now part of the definitive  
14 history of that event.<sup>[4]</sup> When Plaintiffs worked for the Hearst’s at the San Francisco Examiner, he  
15 often visited the small building, across the alley from the main San Francisco Examiner building  
16 where all of the Patty Hearst file boxes and FBI documents were kept.

17  
18           In 1982, [John DeLorean](#), a former [General Motors](#) executive who had formed the  
19 independent [DeLorean Motor Company](#), was charged with engaging in a cocaine trafficking deal to  
20 fund his company. Palladino & Sutherland interviewed more than two hundred witnesses in a  
21 defense that convinced the jury to acquit DeLorean based on entrapment by government agents.<sup>[3]</sup>

22           Palladino was perhaps best known for being hired by the [Bill Clinton](#) presidential election  
23 committee to challenge a campaign intended to deny Clinton the Democratic nomination.  
24 Palladino's work included discrediting women with whom Clinton supposedly had been intimate,  
25 according to [Newsweek](#) magazine.<sup>[8]</sup> The Clinton election committee reportedly paid Palladino  
26 more than \$100,000 over several years to investigate two dozen women in a damage control  
27 inquiry. [Michael Isikoff](#) claimed the Clinton campaign used deception regarding the payments. He  
28 said the payouts came from campaign funds, but were listed as legal fees paid to a Denver law firm

1 rather than payments to Palladino. He further claimed that Clinton's chief of staff [Betsey Wright](#)  
2 later told him the funds were for "controlling bimbo eruptions".[\[9\]](#)

3  
4 Palladino was also employed by singer [Courtney Love](#) to talk to journalists investigating  
5 whether she was involved in the 1994 death of her husband, singer [Kurt Cobain](#). Palladino insisted  
6 he was never involved in "fear and intimidation" in his investigations and production of dossiers on  
7 such journalists.[\[10\]](#)

8  
9 When former tobacco executive [Jeffrey Wigand](#) began cooperating with [60 Minutes](#) on  
10 insider revelations of tobacco company manipulations designed to increase smoker addiction, the  
11 industry launched a million dollar public relations campaign to discredit him. Palladino engaged in  
12 a counter-investigation that turned the spotlight onto this smear campaign and preserved Wigand's  
13 credibility as an expert witness in a lawsuit that subsequently resulted in a more than two hundred  
14 billion dollar settlement, in the first successful litigation against Big Tobacco.[\[2\]](#) This effort is  
15 chronicled in [Marie Brenner](#)'s May 1996 [Vanity Fair](#) article "The Man Who Knew Too Much"[\[11\]](#)  
16 and in the 1999 [Michael Mann](#) film [The Insider](#). In that movie, Palladino appeared as himself,[\[12\]](#)  
17 and his partner, Sandra Sutherland, was played by actress Megan Odebash.[\[13\]](#)

18  
19 In 2002, singer, songwriter, and record producer [R. Kelly](#) was charged with videotaping  
20 himself having sex with an underage teenage girl. An investigation by Palladino that lasted six years  
21 culminated in Palladino's testimony at trial challenging the principal prosecution witness, and the  
22 acquittal of Kelly in less than a day.[\[14\]](#)

23  
24 In April 2009, Australian businessman [Peter Holmes à Court](#) admitted in the [Supreme Court](#)  
25 [of New South Wales](#) that the Hollywood actor [Russell Crowe](#) had hired Palladino & Sutherland to  
26 investigate opposition to the planned takeover of the [South Sydney Rabbitohs](#).[\[15\]](#) Crowe had first  
27 gotten to know Palladino and his Australian wife and partner, Sandra Sutherland, when all three  
28 worked on the film [The Insider](#).[\[16\]\[17\]](#)

[Ronan Farrow](#) reported in November 2017 that [Harvey Weinstein](#) had, through the lawyer

1 [David Boies](#), employed the private intelligence agencies [Kroll Inc.](#), [Black Cube](#) and private  
2 investigator Jack Palladino to spy on and influence Weinstein's [alleged victims](#) as well as reporters  
3 who were investigating Weinstein, in order to prevent his conduct from becoming public.[\[18\]](#)[\[19\]](#)

4  
5 Other notable clients included [Don Johnson](#), [Kevin Costner](#), [Robin Williams](#), [Huey P.](#)  
6 [Newton](#), the [Hells Angels](#) and [Snoop Dogg](#).[\[20\]](#) . Palladino acquired the following documents. The  
7 validity of these documents must be verified by SFPD and the FBI:

PAGE 1 OF 2 ICSS ENTRY BY: 8 SFPD 377 (11-

1 Molinari was designated to be Dianne Feinstein’s ‘replacement’. Roger Boas, in the same  
2 election, was arrested for an under-age sex brothel operation for City Hall elites. Palladino later died  
3 after being attacked. Molinari threatened Plaintiffs on at least 5 occasions, at least once on network  
4 TV.

5 Forensic auditing of the Pelosi family, Feinstein family, Reid Household, Harris household  
6 and other Defendants show that from 2007 to today hundreds of millions of dollars, acquired  
7 through CASE X were deposited in their accounts. It was still less than they wanted, and they blame  
8 Plaintiffs, for reporting the crime to law enforcement and regulatory agencies, for their reduced  
9 unjust gain.

10 In addition to cutting off all means of funds, in reprisal, these vendetta-focused government  
11 officials caused Plaintiffs to lose his house.

12 Over 400 other whistle-blowers have the same attacks undertaken against them in a  
13 formulaic “hit-job” playbook set of attack tactics.

14 Plaintiffs, had an industry standard pay rate of \$10,000.00 per month, based on Salary.com,  
15 his patent issuances and accomplishment records in Silicon Valley contrasted with the salaries of  
16 less experienced executives at Google, Facebook, Netflix and Tesla. The U.S. Government states,  
17 via all of its agencies, that the minimum survivable cost-of-living in the Bay Area is \$3200.00 per  
18 month. By intentional actions of government officers, in reprisal, Plaintiffs income was reduced to  
19 \$300.00 per month for most of the past decades. Two SSA officials confessed to assisting in hit jobs  
20 on him including Mario U from the San Mateo SSA office and an official who worked at the San  
21 Francisco SSA office and who then went to work for a Senator who assisted in the attacks on  
22 Plaintiffs. When asked for Plaintiffs medical records SSA sent a huge number of medical records  
23 for two strange women in massive violation of federal medical privacy rights. The SSA Inspector  
24 General has shown Plaintiffs thousands of cases of politicians using SSA for political reprisal  
25 punishments. FBI IT experts and ‘Black Hat’ hackers can hack into every SSA server in minutes  
26 and change records, files and decisions. Rahm Emanuel, Nancy Pelosi and Dianne Feinstein can do  
27 it with a single phone call. It should be noted by the Court that EVERY background check file in  
28 AMERICA was hacked and stolen by China within a few hours and that every hacking tool of the

1 NSA and CIA was hacked by Russia and posted on the internet. It is IMPOSSIBLE for anyone to  
2 ever assert that “nobody can hack SSA”. That would be a remarkable lie. In fact, Plaintiffs have  
3 agency confirmation that 95% of the Silicon Valley oligarchs entire family tax records, stock  
4 accounts, political payments and payola and pretty much everything that would destroy them, has  
5 been hacked and is in the hands of ICIJ (Panama Papers investigators), Propublica, FINCEN and  
6 pretty much everybody they would not want to have it.

7 ***Plaintiffs demands that the Court order SSA to award Plaintiffs his full SSDI backpay***  
8 ***from 2007 to today, with interest, based on the fact that SSA was used to harm Plaintiff as a***  
9 ***reprisal tool. The Inspector General has proven this happens regularly and hundreds of other***  
10 ***whistle-blowers are prepared to confirm this fact.***

11 Plaintiffs have received multiple threats of death, personal, resource or physical harm.

12  
13  
14 **HARM: THREATS OF DEATH AND ACTUAL MURDERS OF PEERS**

15 Plaintiffs have actually been attacked as enumerated below and has active cases with SFPD,  
16 FBI, OSC and other agencies. Twice Plaintiffs car was rammed. The first time the attacker  
17 performed a PIT maneuver, flipping Plaintiffs car onto the concrete median wall on the Freeway  
18 across from Marin Joe’s restaurant in Marin County, causing massive damage. The attacker sped  
19 away. A car next rammed Plaintiffs parked car on Wildomar in Mill Valley and, at the same  
20 location, a man tried to drive his car through the fence into Plaintiffs cottage. Two other times,  
21 strangers pulled up along Plaintiffs, pointed at him and yelled “you are dead”. Plaintiffs have  
22 received threats by email and voicemail and had dead animals tossed over his fence. Further  
23 proving the at-risk claims of Plaintiffs. Plaintiffs, and his peers, had contact with the following  
24 persons in CASE X: ***Rajeev Motwani; Gary D. Conley; Seth Rich; Philip Haney; David Bird;***  
25 ***Doug Bourn; Misti Epstein; Joshua Brown; Kenneth Bellando; Moritz Erhardt; Imran Aliev;***  
26 ***Kate Matrosova; David Drye; Vincent Foster; Kathy Ferguson; Duane Garrett; Eric S. Fox; Judi***  
27 ***Gibbs; Berta Caceres; Suzanne Coleman; L.J. Davis; John Hillyer; Stanley Huggins; Sandy***

8 **more connected to this case who suddenly, and strangely, turned up dead in this case and,**  
9 **ironically, their deaths all benefit the suspects in this case....Rajeev Motwani** taught Google  
10 how to Google. Suddenly, in perfect health, he was found floating face-down, dead, in his Silicon  
11 Valley swimming pool. It helps certain people that he can no longer talk. **Gary D. Conley** was the  
12 CleanTech competitor to, and whistle-blower on, the suspects. He was suddenly found with a bullet  
13 in his head behind Beale Air Force base. It helps certain people that he can no longer talk. He  
14 TOLD Plaintiffs that someone from Google was going to kill him. Google programmer **Forrest**  
15 **Hayes**, who worked on Google search engine rigging, was suddenly found dead with the story that  
16 "he was overdosed by a Google hooker on his sex yacht". Google associate and Tesla Investments  
17 founder **Ravi Kumar** was also killed by his hooker. Deep Google investor VC liason and husband  
18 of Facebook executive **Cheryl Sandberg** was suddenly found dead with a hole in his head. The  
19 "official" story is that he was the first person in history to be killed by his treadmill. **David Bird**  
20 was the Wall Street Journal energy reporter who was working on a story that involved Cleantech  
21 energy connections of some of the suspects. He was working on a story about who controlled the  
22 modern energy industry and cleantech. He went for a walk and was found a long time later, dead,  
23 floating in a pond. It helps certain people that he can no longer talk. One **Mr. Breitbart** was a  
24 famous blogger, who railed on the web about the political manipulations of the suspects. Suddenly,  
25 he had a "heart attack" in his shower and died. It helps certain people that he can no longer talk on  
26 the blogs. Mr. **Karl Slym** , with Tata Motors was involved in a car deal with some of the suspects  
27 for one of the biggest Indian auto-makers. Suddenly he was a stain on the sidewalk, accomplished  
28 by his fall from the top of a skyscraper hotel. It helps certain people that he can no longer talk.

1 **Doug Bourn**, The senior electrical engineer at Tesla (Google's covert partner), **Andrew Ingram** of  
2 Palo Alto, a top systems electrical engineer at Tesla; and **Brian M. Finn** the senior manager of  
3 interactive electronics, at Tesla, had deep knowledge of financial misdeeds and technical cover-ups  
4 at Tesla Motors. They were key parts of the Tesla operation. For some reason, they all got into a  
5 private airplane, in perfect health, and then the airplane plowed into the ground, killing all three at  
6 once. It helps certain people that they can no longer talk. They wrote, and helped describe, in Tesla's  
7 own federal patent filings, the fact that Tesla's batteries would kill you, maim you and/or burn your  
8 house down. Tesla did not realize this when they paid the federal patent filing fees. When Tesla,  
9 later realized this, they were forced to give all of their patents away for free. These three senior  
10 engineers had deep inside knowledge of the Tesla Motors operations. Their aircraft suffered an  
11 "Engineering failure". This case involves potential crimes by two Presidents of The United States,  
12 their staffs, U.S. Senators and the Silicon Valley oligarchs that financed and controlled them, two  
13 wars and trillions of dollars of manipulated U.S. Treasury monies and stock market monies. How  
14 could anyone think this was NOT a life-endangering situation for the Plaintiffs?

15 The other attacks, which only state-sponsored attackers would seem to be capable of, were:

16  
17 **HARM: THE GOVERNMENT DEFRAUDED Plaintiffs OVER AND OVER:**

18 Government agency bosses solicited Plaintiffs with false promises of future loans, carbon  
19 credit sales, billions of dollars of stock market valuation profits, contracts and/or grants from  
20 their agencies and caused the Plaintiffs and his associates to spend millions of  
21 dollars and years of their time for projects which those government bosses had covertly  
22 promised to their friends. They used Plaintiffs 'nice guy' brand as a "smokescreen" to cover  
23 their illegal government slush-funds for Plaintiffs competitors and personal enemies who  
24 were OWNED by government officials. By using this tactic, the attackers drained the  
25 Plaintiffs funds and forced Plaintiffs into an economic disaster, without the government  
26 bosses fearing any reprisal for their scam. The crony insiders made hundreds of billions of  
27 dollars in profit in the notorious Solyndra-type scandals as seen in the CBS 60 Minutes  
28 episode: "**The Cleantech Crash**", thousands of TV news segments and the related GAO and

1 Congressional corruption reports.

2  
3 **HARM: THE PLACING OF MOLES AND SPYING ON Plaintiffs:**

4 White House financier Kleiner Perkins placed moles inside of Plaintiffs companies in order  
5 to sabotage, delay and misdirect operations. The moles were discovered to be staff of  
6 Kleiner Perkins. The main offices of Kleiner Perkins were broken into, per San Mateo  
7 County police reports, and records of corruption copied or duplicated by a state-sponsored  
8 intelligence agency entity, which provided further proof that Kleiner Perkins and the White  
9 House were exchanging Quid Pro Quo. Tom Perkins, one of the founders of Kleiner Perkins  
10 told Plaintiffs that he was on “A government hit-list” for exposure the corruption of Silicon  
11 Valley titans and government executives. John Doerr, another partner, told Plaintiff 22at a,  
12 VC conference, that he will make sure the government kills of any effort to support fuel  
13 cells (which compete with his and Elon Musk’s lithium batteries)

14  
15 **HARM: BLOCKADES OF Plaintiffs ACCESS TO LEGAL COUNSEL:**

16 - *Detailed further in the EXHIBITS, below*, Defendants used every trick in the book to  
17 keep Plaintiffs from gaining equitable legal justice or representation because exposure of  
18 Defendants crimes would shame them Government officials and the federal agency: Legal  
19 Services Corporation (LSC corporation -A federal agency dedicated to providing legal  
20 services to citizens) blockaded Plaintiffs rights to legal representation in order to prevent  
21 Plaintiffs from personally suing the attackers because such a lawsuit would have  
22 embarrassed corrupt public officials. High tech law firms that were discussing a services  
23 agreement with Plaintiffs were threatened and ordered to not help Plaintiffs or “*they would*  
24 *be black-listed or be cut-off from tens of millions of dollars of Google, Netflix, Facebook*  
25 *and government contracts*”. Individual lawyers were threatened with black-listing and  
26 getting “*flooded with more filings than you could ever respond to in your life-time...*” LSC  
27 officials, who were almost entirely Obama Administration associates, refused to assist with  
28 lawyer referrals. That is a violation of their federal contract with The U.S. Government .

**HARM: HIRED CHARACTER ASSASSINATION AND DEFAMATION SERVICES THAT DEFENDANTS USED TO DESTROY Plaintiffs LIFE**

Defendants purchased over \$30 Million dollars of attacks against Plaintiffs with Media Matters, The Gawker/Gizmodo Tabloid empire and Google. This attack is detailed in the attached EXHIBITS. It was equal in scope and cost to an attack on a Presidential candidate by another Presidential candidates opposition research task force. A sophisticated animated attack film was produced by Google/YouTube and Nicholas Denton attacking Plaintiffs. An animated film is an ePlaintiff 42ensive effort involving considerable time and expense. An attacker must be well financed to undertake such an effort. The film was published on YouTube and locked onto the very top search result line on every YouTube search in front of 7.5 billion internet users for over a decade. The damage to Plaintiffs reputation is estimated in the tens of millions of dollars. YouTube steadfastly refused to remove or adjust the search results even though YouTube executives knew Plaintiffs and knew that the video represented a character assassination attempt against Plaintiffs because YouTube owners finance the political campaigns of the public officials who ordered the attacks. While Google/YouTube stated to Congress that all of it's search results are arbitrary, the never-moving search result of this attack video proved that Google's and YouTube's search results are manually manipulated by human maintained black-lists. The corrupt officials hired Nicholas Guido Denton and his character-assassination-for-hire sleazy tabloid publication empire known as Gawker Media AKA Gizmodo Media. They own Gawker, Gizmodo, Jalopnik and a number of fake news sites based in the USA and near-Russian regions. The offshore sites are used for money laundering and tax evasion. The FBI has been asked to interview and financially trace the payments and command-and-control orders back and forth between Nicholas Guido Denton and his attacker/operatives: Ian Fette, Adrian Covert, Nick Cook, Gabrielle Darbyshire, John Hermann, Patrick George, et al and Google. All of whom transferred payments and communications between each other to conspire, operate, produce and publish the articles, videos, blogs and server manipulations for the attacks against the victims around the world. These attacks resulted in billions of dollars of damages to the victims. The orders for these attacks can be traced back to The White House. This

1 ended Plaintiffs life but created an enemy for the DOES and ROES that has lots of of  
2 investigator contacts and nothing to lose. The Defendants have caused the deaths of more  
3 children than any other entities. Harassment is harassment - whether it happens at school, at  
4 the playground, on the job, or on the internet. But online bullying is downplayed. Victims  
5 are stigmatized, mocked as oversensitive snowflakes who can't take a joke. Plenty of people  
6 are unwilling to accept that victims can be seriously hurt by this behavior. Internet  
7 harassment is not only real and damaging, it represents a threat to the most vulnerable  
8 among us: children. Cyberbullying statistics show the high cost of online harassment. From  
9 increased depression and suicide rates to social anxiety and alienation, the pain and  
10 consequences of online harassment are as severe as they are undeniable.

11 Cyberbullying Statistics - Key Findings:

12 90% of teens in the US believe cyber harassment is a problem.

13 15% of young cyberbullying victims would prefer to keep the issue a secret.

14 Students are almost twice as likely to attempt suicide if they have been cyberbullied.

15 80% of teens say that others cyberbully because they think it is funny.

16 37% of bullying victims develop social anxiety.

17 59% of US teenagers have experienced bullying or harassment online.

18 14.5% of children between the ages of 9 and 12 have been cyberbullied.

19 66.3% of tweens tried to help the victim of cyberbullying.

20 The largest number of suicides from cyberbullying occurred in the last 12 months.

21 Imagine every new friend, potential date, your fiance', your bank, anybody.. typing your  
22 name on the internet and seeing that Google says that you are a scumbag. Nobody will ever talk to  
23 you, hire you or help you ever again. Google, Gawker and Gizmodo are now known to partner  
24 together on character assassination efforts. One of their bloggers hired to "kill" Plaintiffs even  
25 advertises himself on Facebook, globally, as an assassin-for-hire. Plaintiffs have acquired the  
26 banking records of these Co-conspirators showing that they, and the U.S. government wired  
27 millions and millions of dollars between each other for these "spy agency" dirty tricks hit jobs.

28 Google knows Plaintiffs personally. Plaintiffs went to school and events with the founders.

1 It was a lie for Google and YouTube to say over-and-over that they never heard of Plaintiffs so they  
2 “can’t remove the attacks because it is ‘just how their algorithm works’...” The founder’s teacher:  
3 Rajeev Motwani, revealed to Plaintiffs that Google manually sets all of their key search results BY  
4 HAND. Rajeev died ~~was murdered~~ for telling the truth about Google’s insidious plans and internet  
5 manipulations. Investigators suspect shell fish toxin or a reverse taser-like electronic heart-attack  
6 inducing defib device was used to kill him.

7 Plaintiffs charges proved that Google manually rigs search results based on cronyism and  
8 that Google/YouTube lied to Congress about not doing so. This allowed Plaintiffs to drive U.S.  
9 agencies and State AG’s to sue Google/Alphabet/Youtube for being lying, manipulate, society-  
10 abusing, child-killing, monopolistic monsters.

11 Take note of this letter from one of Plaintiffs past lawyers to those attackers:

1  
2  
3  
4 Even though the Google/Gawker/Gizmodo produced and hosted attack articles and animated  
5 videos were completely discredited as a “*character assassination hatchet job paid for by*  
6 *politicians*”; by every known expert, Defendants still post them on their servers with hidden “P8”  
7 codes covertly embedded in the search engines to trick the public, in front of 7 billion internet  
8 readers as “payback”, in order to operate their reprisal attacks. No other servers or publishers in the  
9 world host and lock this attack media on their search results EXCEPT DEFENDANTS MEDIA  
10 COMPANIES. This ALONE would seem to prove that Defendants did the harms that they are  
11 charged with doing as Defendants are the only ones running, hosting and operating the attacks on  
12 Plaintiffs on all of Earth!  
13

14 Plaintiffs have, over and over, demanded that the FBI, POLICE, FINCEN and other  
15 enforcement investigators reveal what they discovered when they traced the compensation routes  
16 and command-and-control management of these attackers. ***Plaintiffs demands that this Court order***  
17 ***the FBI, FINCEN and the NSA to reveal those compensation path records on the attackers from***  
18 ***their investigations.***  
19

20 One might wonder why it has been so hard to get this information from the authorities. If the  
21 FBI reveals that the path-of-compensation goes from Adrian Covert, Nicholas Guido Denton and  
22 John Herrman right to the Oval Office in the White House, then the question is asked and answered.  
23 White House staff members Jay Carney, David Axelrod and Robert Gibbs have said “maybe”.  
24 White House staff insider Jofi Joseph has said “without a doubt”. Rahm Emanuel’s White House  
25 staff say that, while in the White House, Rahm ordered all kinds of hit-jobs on whistle-blowers.  
26

27 Gawker Media and Gizmodo Media have engaged in the origination of, production of and  
28 global broadcast of compensated character assassination videos and articles as a reprisal-service-

1 for-hire (like Fusion GPS, Black Cube, Black Water and other related services) because we were  
2 FBI and GAO witnesses against Gawker and Gizmodo financiers. As 1.) the only publishing group  
3 on Earth to have engaged in such attacks and 2.) since the attacks were financed by complainants  
4 business competitors and 3.) since adversaries own staff have admitted to the scheme and 4.) since  
5 communications, FBI records and previous litigation records prove complainants assertions,  
6 complainants are justified in their demands.  
7

8 The attacks and broadcast of multiple defamation attack articles and videos by Gawker  
9 Media, Google, YouTube and Gizmodo Media has been operating as recently as this today, thus the  
10 statutes of limitations are not exceeded. Well known U.S. government political figures and political  
11 financiers hired Gawker Media, Gizmodo Media and “Nick” Denton to undertake these ongoing  
12 attacks and to manipulate web servers to operate those attacks globally and permanently. The  
13 attackers hired Gawker Media, Gizmodo Media, “Nick Guido Denton”, Univision/Unimoda,  
14 Google and YouTube (essentially all the same people) to engage in reprisals because of the  
15 Plaintiffs testimony against the Cartel in federal investigations and because the Plaintiffs had  
16 superior technologies that the attackers could not compete with. Transaction documents showing  
17 payments between the “bad guys” in this case, were recently uncovered in other court cases.

18 Defendant adversaries produced a series of videos and defamation articles and used internet  
19 server technology tricks to place those attack materials in front of 7.5+ billion people day after day,  
20 year after year, refreshing the attack daily. This is, essentially, a “hit-job” service that Univision  
21 provides as a side gig through it’s TV networks and it’s offensive tabloid brands of: Gizmodo,  
22 Jalopnik, Jezebel, Gawker and other Univision/Unimoda assets along with it’s partnership with  
23 Google for the operation of such attacks. “Univision uses this service as a political-payback tool for  
24 politicians as well as an anti-trust violating anti- competition tool for its clients”, claim Plaintiffs.  
25 The Plaintiffs are informed and believe and, based on that information and belief, allege that the  
26 named Defendants herein and each of the parties designated as a “DOE” and every one of them, are  
27 legally responsible jointly and severally for the Federal RICO Statute violating events and  
28 happenings referred to in the within Complaint for Intentional Interference with Contractual

1 Relations, Intentional Interference with Prospective Economic Advantage, Cyberstalking, Fraud,  
2 Invasion of Privacy, Unfair Competition and Theft of Intellectual Property and RICO statute  
3 violations. In particular, Defendants took compensation for, and engaged in, malicious and  
4 coordinated tactics to seek to destroy, damage, harm and ruin Plaintiffs via an illicit media “hit-job”  
5 service which Defendants regularly offered in covert commerce and engaged in regularly against  
6 targets that Defendants were hired to seek to ruin as part of reprisal, vendetta, retribution programs  
7 operated for business and political competitors of the targets. Historical facts and other history-  
8 making lawsuits by third parties, has proven Defendants to be the single largest core violator of  
9 human rights, in this manner, in the world. Defendants offer the service of creating and publishing  
10 contrived “hatchet job” movies, fake news articles, faked comments and repercussion backlinks  
11 describing the Plaintiffs in horrific descriptors. Defendants media holdings manipulate national  
12 elections.

13 Let’s be clear on this: Plaintiffs does swear, warrant and certify that Google, Facebook,  
14 YouTube, The Elon Musk Group, Twitter and LinkedIn plan and operate the conscious and manual  
15 manipulation of national American elections and international elections.

16 The attack material is reposted, “impression accelerated”, “click-farm fertilized” and  
17 Streisand array cloned over-and-over by Defendants massive character assassination technology via  
18 servers, algorithms and technical internet manipulation, daily, as recently as yesterday. Defendants  
19 also embed the article in job hiring databases on Axciom, Palantir, Taleo and other databases used  
20 by all hiring and recruiting services in order to prevent Plaintiffs from ever receiving income for  
21 W2 or 1099 work ever again. Defendants own staff then post thousands of fake comments, below  
22 each attack item, under fake names, designed to make it appear as if a broad consensus of the public  
23 agreed with the defamation messages by Defendants. Almost all of the fake comments were created  
24 by a handful of Defendants own staff pretending to be a variety of outside voices. Defendants  
25 provide the service of delivering “weaponized text and media to corporate clients”. Defendants  
26 replicated various versions of these attack items across all of their different brands and facade front  
27 publications and added additional fake comments to each on a regular basis.

1 A. Defendants have formed a business and political and industry manipulation “Cartel”  
2 intended to inflict corruption upon the United States Federal Government, The State Government  
3 and the California State authorities, as defined by law under RICO Racketeering Statutes for the  
4 purpose of manipulating the value of stock market holdings and controlling political policy  
5 decisions.

6  
7 B. In exchange for financing, Defendants Clients gave Defendants Associates business  
8 monopolies and government contract monopolies and media distribution exclusives worth trillions  
9 of dollars. This was an illegal quid-pro-quo arrangement. Plaintiffs designed, produced, received  
10 patent awards on, received federal commendations for, received federal funding for and first  
11 marketed the very products which Defendants copied and made billions of dollars on and which  
12 Defendants felt might beat them in hundreds of billions of dollars of competitive market positions  
13 and stock market trades. Companies operated by Plaintiffs included automobile design and  
14 manufacturing companies, global television broadcasting companies and energy companies which  
15 are commonly known to have generated hundreds of billions of dollars in profits, revenue and stock  
16 market transactions for Defendants competing holdings at Plaintiffs expense. Defendants operated a  
17 criminal CARTEL as defined by RICO LAWS and that Cartel ran an an anti-trust market rigging  
18 and crony political payola operation. Defendants spent tens of millions of dollars attacking  
19 Plaintiffs because Defendants were not clever enough to build better products. Defendants chose to  
20 “CHEAT RATHER THAN COMPETE” and to try to kill Plaintiffs lives, careers, brands, revenues,  
21 assets, businesses and efforts via malicious and ongoing efforts.

22  
23 C. The U.S. Attorney General has been informed, in writing, of these charges and Plaintiffs  
24 understand that DOJ officials have an ongoing investigation into these matters. Under investigation  
25 for these crimes, New York State attorney general Eric Schneiderman was recently forced to quit over  
26 corruption and sexual cult charges involving the NXIUM group and related matters.

27  
28 D. Due to Defendants fears of the loss of up a trillion dollars of crony payola from their

1 illegal abuse of taxpayer funds, Defendants engaged in felonious actions in order seek to intimidate  
2 others.

3  
4 E. Just as, over time, the Watergate crimes are now intimately documented and detailed;  
5 over time The “Cleantech Crash Scandal” as featured on CBS News 60 MINUTES TV Show, has  
6 been detailed and exposed in numerous federal, news media and public investigations. Significant  
7 barriers to justice were illicitly placed in front of Plaintiffs by Defendants.

8 F. Defendants organized and operated a series of malicious attacks and thefts against  
9 Plaintiffs as reprisals and competitive vendettas. Defendants report to the FBI, GAO, FTC, SEC,  
10 Congressional Ethics Committees, The White House and other entities on a regular basis.

11  
12 G. Defendants and their associates Elon Musk, Jon Doerr, Eric Schmidt, Larry Page, Steve  
13 Jurvetson, Vinod Khosla and other members of the “Silicon Valley Cartel” are documented in tens  
14 of thousands of news reports, federal law enforcement reports and Congressional reports in their  
15 attempts to infiltrate and corrupt the U.S. Government in an attempt to route trillions of tax dollars  
16 to Defendants private accounts. Defendants perceived Plaintiffs as a threat to their crimes. Federal  
17 investigators, news investigators and whistle-blowers have reported to Plaintiffs that Defendants  
18 were the financiers and/or beneficiaries and/or command and control operatives for the crimes and  
19 corruption disclosed in the CBS NEWS 60 Minutes investigative reports entitled: “The Cleantech  
20 Crash”, “The Lobbyists Playbook” and “Congress Trading on Insider Information”; The Feature  
21 Film: “The Car and the Senator” Federal lawsuits with case numbers of: USCA Case #16-5279; and  
22 over 50 other cases including the ongoing “Solyndra” investigation and federal and Congressional  
23 investigations detailed at:

28

1 ... and thousands of other documentation sites. Plaintiffs are charged with engaging in these crimes  
2 and corruptions against Plaintiffs and financing and ordering attacks on Plaintiffs. Plaintiffs  
3 engaged in U.S. commerce and did everything properly and legally. Unlike Defendants, Plaintiffs  
4 did not steal technology. Unlike Defendants, Plaintiffs did not bribe elected officials in order to get  
5 market exclusives. Unlike Defendants, Plaintiffs did not poach Defendants staff. Unlike Defendants,  
6 Plaintiffs were the original inventors of their products. Unlike Defendants, Plaintiffs did not operate  
7 “AngelGate Collusion” schemes and “High Tech No Poaching Secret Agreements” and a Mafia-  
8 like Silicon Valley exclusionary Cartel. Unlike Defendants, Plaintiffs did not place their employees  
9 in the U.S. Government, The California Government, The U.S. Patent Office and The U.S.  
10 Department of Energy in order to control government contracts to Defendants exclusive advantage.  
11 Unlike Defendants, Plaintiffs did not place moles inside of competitors companies. Unlike  
12 Defendants, Plaintiffs did not hire Gawker Media and Think Progress to seek to kill Plaintiffs  
13 careers, lives and brands. Unlike Defendants, Plaintiffs did not rig the stock market with “pump-  
14 and-dump”, “Flash Boy” and “Google-stock/PR-pump” schemes. Plaintiffs engaged in hard work  
15 every day of their lives for the time-frame in question under the belief that the good old American  
16 work ethic and just rewards for your creations was still in effect in the U.S.A., and that the thieves  
17 and criminals that attempted to interdict Plaintiffs would face Justice. In a number of circumstances  
18 Defendants took advantages of Plaintiffs hard work via come-ons; Defendants then made billions of  
19 dollars from Plaintiffs work at Plaintiffs expense and attacked Plaintiffs in order to reduce Plaintiffs  
20 competitive and legal recovery options.

21  
22 H. Defendants exchanged payments for services via cash, stock warrants, illicit personal  
23 services, media control and a technology known as a “Streisand Effect Massive Server Array”  
24 which can control public impressions for, or against a person, party, ideology or issue. Defendants  
25 StreisandEffect internet system was used to destroy Plaintiffs in reprisal, retribution, and vendetta  
26 for Plaintiffs help with law enforcement efforts in the case and because Plaintiffs companies competed  
27 with Defendants companies with superior technologies.

1 I. Defendants have used their Streisand Effect technology to build a character assassination  
2 ring of bloggers and hired shill “reporters” who engage in a process called a “Shiva”. This process  
3 is named after a Plaintiffs in a similar case named: Shiva Ayyadurai, the husband of Actress Fran  
4 Drescher. Shiva Ayyadurai holds intellectual property rights to part of Defendants email  
5 technology. In fact, the people most threatened by the Shiva Ayyadurai patent right claims,  
6 ironically turn out to be Defendants and, in particular, Defendants associates Elon Musk, Jon Doerr,  
7 Eric Schmidt, Larry Page, Steve Jurvetson, Vinod Khosla and other members of the “Silicon Mafia”  
8 who own most of the main companies ePlaintiff 42loiting email technology. Were Shiva Ayyadurai  
9 to prevail in his claims, Defendants would owe him billions of dollars. “Running A Shiva” involves  
10 the production of a series of Defamation articles by bloggers who act asif they are independent from  
11 Defendants but are in fact, not. Defendants used “the Shiva” to attack and seek to destroy Donald  
12 Trump, Shiva Ayyadurai, Plaintiffs, and numerous political figures. Univision, Unimoda,Jalo pnik,  
13 Gawker Media, Gizmodo and over a hundred stealth-ed, and overt, assets of Defendants have been  
14 using “The Shiva” network to attack Donald Trump, Shiva Ayyadurai, Plaintiffs, and numerous  
15 political figures as recently as this morning, thus, the time bar restarts every day. Plaintiffs have  
16 pleaded with Defendants to cease their attacks but Defendants have refused to comply. Even with  
17 Fran Drescher’s ongoing royalty payments from her popular television series, friends have reported  
18 that the attacks on the Ayyadurai family have been devastating and have caused massive damages  
19 and personal and emotional devastation.

20  
21 J. Defendants produced animated movies, attack articles, fake blog comments, DNS routes,  
22 “Shiva” Campaigns, and other attack media against Plaintiffs and ePlaintiff 42ended over \$30  
23 million dollars in value, as quantified by Defendants partner: Google, in placing the attack material  
24 in front of 7.5 billion people on the planet for the rest of Plaintiffs lifetime. No person could survive  
25 such an attack and in the case of Plaintiffs, lives were destroyed and multiple companies invested  
26 into by Plaintiffs, which Defendants made over \$50B off of the copies of, were destroyed because  
27 they competed with Defendants.

1 8. The Plaintiffs are informed and believe, and based on that information and belief allege  
2 that at all times mentioned in the within Complaint, all Defendants were the agents, owners and  
3 employees of their affiliated insiders and, in doing the things alleged in this Complaint, were acting  
4 within the course and scope of such agency and employment.  
5

6 9. As to any corporate employer specifically named, or named as a “DOE” herein, the  
7 Plaintiffs are informed and believe and therefore allege that any act, conduct, course of conduct or  
8 omission, alleged herein to have been undertaken with sufficient, malice, fraud and oppression to  
9 justify an award of punitive damages, was, in fact, completed with the advance knowledge and  
10 conscious disregard, authorization, or ratification of and by an officer, director, or managing agent  
11 of such corporation. The Statute of Limitations and time bar on this case has not ePlaintiff 42ired.  
12 Plaintiffs only became aware of **all** of the facts recently due to the FBI, Congressional and hacker-  
13 exposed investigation data on Defendants operating and receiving cash, rewards and assets from an  
14 illegal and illicit set of political slush-funds established to compensate them for financing political  
15 campaigns. The Sony, Clinton, DNC, HSBC, Panama Papers and other hacks and publication of all  
16 of the relevant files and the Congressional investigation of illicit activities and the continuing  
17 issuance of federal documents to Plaintiffs confirming Plaintiffs intellectual property areall vastly  
18 WITHIN the statutes of limitations to allow this case to proceed to Jury Trial. Plaintiffs have had a  
19 long, ongoing and high-level interaction with Defendant in both the work effort and the  
20 monetization and collection effort. Plaintiffs have been continually interactive with Defendant in  
21 order to try to collect his money. Attacks and interference with Plaintiffs have occurred as recently  
22 as this week by Defendants. The Plaintiffs, whose multiple businesses ventures had already suffered  
23 significant damage as the result of the online attacks of the Defendants, contacted renowned  
24 experts, and especially Search Engine Optimization and forensic internet technology (IT) experts, to  
25 clear and clean the internet of the false, defamatory, misleading and manufactured information  
26 belittling the Plaintiffs, attacking them and discrediting their reputation as an inventor, product  
27 developer and project director from their websites.

28 None of the technology experts hired by the Plaintiffs, at substantial expense, were

1 successful in their attempts to clear, manage or even modify the false, defamatory, misleading and  
2 manufactured information belittling the Plaintiffs, attacking him and discrediting their reputation as  
3 an inventor, product developer and project director which only Defendants, the controlling entity of  
4 the internet, refused to remove. In fact, those experts were able to even more deeply confirm, via  
5 technical forensic internet analysis and criminology technology examination techniques that  
6 Defendants was rigging internet search results for its own purposes and anti-trust goals.

7 All efforts, including efforts to suppress or de-rank the results of a name search for  
8 “Plaintiffs” failed, and even though tests on other brands and names, for other unrelated parties did  
9 achieve balance, the SEO and IT tests clearly proved that Defendants was consciously, manually,  
10 maliciously and intentionally rigging its search engine and adjacent results in order to “mood  
11 manipulate” an attack on Plaintiffs.

12 In fact, the experts and all of them, instead, informed the Plaintiffs, that, not only had  
13 Defendants locked the false, defamatory, misleading and manufactured information belittling the  
14 Plaintiffs, attacking them and discrediting their reputation as an inventor, project developer and  
15 project director into its search engine so that the information could never be cleared, managed or  
16 even modified, Defendants had assigned the false, defamatory, misleading and manufactured  
17 information belittling the Plaintiffs, attacking them and discrediting their reputation as an inventor,  
18 project developer and project director “PR8” algorithmic internet search engine coding embedded in  
19 the internet information-set programmed into Defendantsinternet architecture. [See, Information  
20 received from one of over 30 IT, forensic network investigators and forensic SEO test analysts, a  
21 true and correct copy of which is attached hereto in the Exhibits.]

22  
23 Per the many world-wide search engine results forensic analysis experts Plaintiffs hired –  
24 They had never seen search engines results that were locked so maliciously, manually and  
25 unmovably into Google’s and YouTube’s search results. “It was as if the CIA, or Larry Page  
26 himself, was doing this”, said one. Plaintiffs placed associates inside of Google and, among other  
27 things, acquired bank records proving Google and the attackers were exchanging millions of dollar  
28 with each other.

1 Plaintiffs even went to the effort of placing nearly a thousand virtual forensic test servers  
2 around the globe, using empty space on third-party existing servers owned by hundreds of other  
3 people, in order to monitor and metricize the manipulations of search results of examples of the  
4 Plaintiffs name in comparison to the manipulations for PR hype for Defendants financial partners,  
5 for example: the occurrence of the phrase "Elon Musk", Defendants business partner and  
6 beneficiary, over a five year period. The EU, China, Russia, and numerous research groups (ie:  
7 [http://www.politico.com/magazine/story/2015/08/how-google-could-rig-the-2016-election-](http://www.politico.com/magazine/story/2015/08/how-google-could-rig-the-2016-election-121548)  
8 [121548](http://www.politico.com/magazine/story/2015/08/how-google-could-rig-the-2016-election-121548) By Robert Epstein ) have validated these forensic studies of Defendants architect-ed  
9 character assassination and partner hype system .

10 The "PR8" codes are hidden codes within the Defendants software and internet architecture  
11 which profess to state that a link is a "fact" or is an authoritative factual document per Defendants  
12 research. By placing "PR8" codes in the defamatory links that Defendants was manipulating about  
13 Plaintiffs, Defendants was seeking to tell the world that the links pointed to "Facts" and not  
14 "Opinions". Defendants embedded many covert codes in their architecture which marketing the  
15 material in the attack links and video as "facts" according to Defendants.

16 The "PR8" codes are a set of codes assigned and programmed into the internet, by the  
17 Defendants to matters it designates as dependable and true, thereby attributing primary status as the  
18 most Defendants is known to have provided tens of millions of dollars to this tabloid chain per  
19 Defendants financial staff, SEC filings and disclosures in other legal cases.

20 Plaintiffs also used CIA technology call "Steganography" to embed text-based messages and  
21 codes into photos and videos in order track Google and YouTube's global impression manipulations  
22 and create a significant and important link to be viewed by online researchers regarding the subject  
23 of their search.

24 Defendants were fully aware that all of the information in the attack articles against  
25 Plaintiffs was false, Defendants promo ted these attacks as vindictive vendetta-like retribution  
26 against Plaintiffs.

27 At all times Defendants maintained it had no subjective control or input into the rankings of  
28 links obtained by online researchers as the result of a search on its search engines and that its search

1 engine algorithms and the functions of its media assets were entirely “arbitrary” according to the  
2 owners and founders of Defendants.

3 In or about April 15, 2015, The European Union Commission took direct aim at Defendants  
4 charging the their Internet-search giant with skewing and rigging search engine results in order to  
5 damage those who competed with Defendants business and ideological interests.

6 In those proceedings, although Defendants continued to maintain that it has no subjective  
7 control or input into the rankings of links obtained by online researchers as the result of a search  
8 on its search engines and that its staff had no ability to reset, target, mood manipulate, arrange  
9 adjacent text or links, up-rank, down-rank or otherwise engage in human input which would change  
10 algorithm, search results, perceptions or subliminal perspectives of consumers, voters, or any other  
11 class of users of the worldwide web, also known as The Internet, the court, in accord with evidence  
12 submitted, determined that Defendants, **does** in fact have and does in fact exercise, subjective  
13 control over the results of information revealed by searches on its search engine.

14 Defendants has a variety of such hidden codes and has various internal names for such codes  
15 besides, and in addition to, “PR8”. Defendants has been proven to use these fact vs. fiction  
16 rankings to affect elections, competitors rankings, ie: removing the company: NEXTAG from  
17 competing with Defendants on-line; or removing political candidates from superior internet  
18 exposure and it is believed by investigators and journalists, that Defendants are being protected  
19 from criminal prosecution by public officials who Defendants have compensated with un-reported  
20 campaign funding. As a result of receiving this information, the Plaintiffs became convinced of the  
21 strength and veracity of their original opinion that the Defendants, had, in fact posted the false,  
22 defamatory, misleading and manufactured information belittling the Plaintiffs, attacking them and  
23 discrediting Plaintiffs reputation as inventor, project developer and project designer had been  
24 intentionally designed, published, orchestrated and posted by them in retaliation to the true  
25 testimony provided by the Plaintiffs, to the Government Office of Accountability of the United  
26 States in May of 2005, and to the Securities and Exchange Commission, The Federal Bureau of  
27 Investigation, The United States Senate Ethics Committee and other investigating parties, and had  
28 been disseminated maliciously and intentionally by them in an effort to do damage to their

1 reputation and to their business prospects and to cause him severe and irremediable emotional  
2 distress.

3  
4 In fact, the Plaintiffs, has suffered significant and irremediable damage to their reputation  
5 and to their financial and business interests. As a natural result of this damage, as intended by the  
6 Defendants, Plaintiffshas also suffered severe and irremediable emotional distress.

7  
8 To this day, despite the age of the false, defamatory, misleading and manufactured  
9 information belittling the Plaintiffs, attacking him and discrediting their reputation as an inventor,  
10 project developer and project director, in the event any online researcher searches for information  
11 regarding the Plaintiffs, the same information appears at the top of any list of resulting links.

12  
13 In addition, due to their control of all major internet database interfaces, Defendants have  
14 helped to load negative information about Plaintiffs on every major HR and employment database  
15 that Plaintiffs might be searched on, thus denying Plaintiffs all reasonable rights to income around  
16 the globe by linking every internal job, hiring, recruiter, employment, consulting, contracting or  
17 other revenue engagement opportunity for Plaintiffs back to false “red flag” or negative false  
18 background data which is designed to prevent Plaintiffs from future income in retribution for  
19 Plaintiffs assistance to federal investigators.

20  
21 ***HARM: DEFENDANTS USED FACTORY-PROCESSED SOCIAL MEDIA ATTACKS  
AGAINST Plaintiffs:***

22 In the attached book: “**ATTACKED**”, the Court will see the CIA, FSB and MI6 tactics and  
23 techniques that are trained and practiced, illicitly, by political officials. Social networking  
24 sites including MeetUp, Match, Facebook, etc. and all other IAC-owned, or similar, sites  
25 (IAC is managed by Hillary Clinton's daughter, whose Mother knew Plaintiffs) have had  
26 their profiles, texts, and inter-member communications, since those companies were started,  
27 hacked or purchased. The financiers of almost everyone of these sites are also the financiers  
28 of the suspects. The attack service providers use Palantir, Acronym, In-Q-Tel financed data

1 analysis software to analyze every activity in those services in order to find honey-trap,  
2 blackmail and social conflict exploitation opportunities. Your social life will, essentially,  
3 end. Every photo on every social site is cross checked with every other photo on the internet  
4 in order to cull your Facebook, LinkedIn, Snapchat and other social media together to create  
5 a total manipulation profile data file on you. New contacts on these sites were contacted by  
6 the attackers and told to “avoid” the Plaintiffs in order to damage Plaintiffs. These attacks  
7 were all documented and operated against Plaintiffs as detailed in the **EXHIBITS** and  
8 evidence repositories. Defendants bought these services from Eastern Bloc nations, China  
9 and South America. “The Agency”, in Russia does much of this work. They are hard at  
10 work, even as recently as today according to the CIA, pushing a “positive spin” on Russia’s  
11 invasion of the Ukraine based on Hunter Biden’s computer leaks.

12  
13 ***HARM: GOVERNMENT OFFICIALS CAUSED SSA AND HUD BENEFITS BLOCKADES  
AND MANIPULATIONS AS REPRISAL AGAINST Plaintiffs:***

14 Social Security, SSI, SDI, Disability and other earned benefits were stone-walled.  
15 Applications for benefits for the Plaintiffs were intentionally “lost” like a “Lois Lerner hard  
16 drive”. Files in the application process “disappeared”. A U.S. Senator ordered Plaintiffs  
17 benefits to “never be approved” even though Plaintiffs worked 60 hour+ weeks for decades  
18 in service to their nation and their community. A SSA official in the local SSA office, who  
19 had a devout expressed hatred against one United States President ordered a benefits  
20 blockade against Plaintiffs because he found out that Plaintiffs ex-lawyer now worked in the  
21 White House. Forensic evidence and backgrounders on every person who worked on, or had  
22 access to, Applicants files, records, benefits decisions and related data sets shows that a  
23 number of those employees and contractors were members, financiers, web promoters or  
24 supporters of ANTIFA anarchy groups or KKK or Proud Boys related political activist-type  
25 groups. In San Francisco and Marin Counties SSA offices, in employees workspaces and on  
26 their Facebook and MySpace sites, many employees proudly display pictures of themselves  
27 wearing their pink "pussy hats", black riot gear and sporting political tattoos. FBI records  
28 and IG investigations show that SSA has the highest percentage of political activist

1 employees of any federal agency. Such persons are inclined to become drunk with power  
2 when allowed access to the trillions of dollars of government technology on the SSA file and  
3 decisions systems. A number of these persons have worked for, or with, U.S. Senators and  
4 other politicians who targeted Applicant in political reprisal. At least 3 persons in the San  
5 Francisco SSA office, at least 2 persons in the San Mateo SSA office and at least 2 persons  
6 in Marin SSA office are known to have engaged in such actions. Applicants funding and  
7 benefits were manipulated, so as to harm Applicant, as political reprisal as vendetta for his  
8 provision of testimony to federal investigators in a trillion dollar political corruption matter  
9 involving famous political figures featured in global news coverage. A vast number of  
10 agency abuse cases and lawsuits are now on public record in the Inspector General's offices  
11 and federal courts. It is an indisputable fact that some government agencies run "hit-jobs" on  
12 citizens on orders from certain corrupt politicians.

13 These actions are felony violations of the law. Federal and State Agencies including SSA,  
14 FEC, GOVT, HHS, VA, CIA, HUD, SA, SEC, FBI, DOJ and many others, have been  
15 charged, and found guilty, in these crimes against citizens. In the Congressional  
16 investigation published by the United States Congress in review of the U.S. Department of  
17 Energy LGP/ATVM programs, it is clearly proven that the U.S. Department of Energy was  
18 used as a slush-fund by some GOVT executives in order to pay off campaign financiers by  
19 attacking and sabotaging their competitors. The GOVT Paducah Gaseous Diffusion Plant  
20 under contracts with The U.S. Government and the government-owned U.S. Enrichment  
21 Corp paid \$5M whistle-blower awards to those whistle-blowers who were attacked, using  
22 government agency resources, for reporting a crime. Dept. of Energy Hanford URS has  
23 agreed to settle a lawsuit brought by former employee Walter Tamosaitis for \$4.1 million.  
24 The settlement in the whistle-blower case comes almost one year before the case was set for  
25 a jury trial in federal court in Richland and compensates Tamosaitis for attacks against him,  
26 by GOVT officials, in retribution for reporting a crime. VA officials attacked hundreds of  
27 citizens who reported corruption, ie:

[facing-retribution](https://www.pogo.org/analysis/2018/08/new-report-confirms-whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-affairs/). As shown in this report: <https://www.pogo.org/analysis/2018/08/new-report-confirms-whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-affairs/>, Agencies attack often and harshly. CIA and NSA executives have been widely shown to use spy tools to attack domestic citizens they don't like, ie: <https://www.dailymail.co.uk/news/article-2435011/NSA-employees-used-phone-tapping-tools-spy-girlfriends-cheating-husbands.html> , and hundreds of other news links that can be provided. Elon Musk and Tesla, as well as Eric Schmidt and Larry Page at Google, have been proven to use the CIA group: IN-Q-TEL, to run government sponsored/financed attacks on business competitors. In Civil Action No. 1:13-cv-00777-RBW GOVERNMENT AGENCIES WERE CAUGHT BEING USED FOR ATTACKS AGAINST CITIZENS AND PUNISHED IN THE COURT AND THE MEDIA! The IRS, and hordes of other government agencies have been caught and proven, IN COURT, to target and attack people for presumed political differences.

Why should we assume that the Social Security Administration is not ALSO doing this too to harm citizens who speak out? The Lois Lerner IRS attacks took many years to resolve. In an unprecedented victorious conclusion to a four year-long legal battle against the IRS, the bureaucratic agency admitted in federal court that it wrongfully targeted citizens, during the Obama Administration, because of their political viewpoints and issued an apology to those people for doing so. In addition, the IRS is consenting to a court order that would prohibit it from ever engaging in this form of unconstitutional discrimination in the future. In a proposed Consent Order filed with the Court, the IRS has apologized for its treatment of U.S. citizens including organizations from 20 states that applied for 501(c)(3) and (c)(4) tax-exempt status with the IRS between 2009 and 2012 -- during the tax-exempt determinations process. Crucially, following years of denial by the IRS and blame-shifting by IRS officials, the agency now ePlaintiff 42ressly admits that its treatment of our clients was wrong and a total violation of our Democracy. As set forth in the proposed Order: “The IRS admits that its treatment of Plaintiffs during the tax-exempt determinations process, including screening their applications based on their names or policy positions, subjecting those applications to

27  
28

heightened scrutiny and inordinate delays, and demanding of some Plaintiffs’ information that TIGTA determined was unnecessary to the agency’s determination of their tax-exempt status, was wrong.

For such treatment, the IRS ePlaintiff 42resses its sincere apology.” Throughout litigation of this case, activists have remained committed to protecting the rights of the public who faced unlawful and discriminatory action by the IRS and other agencies. The objective from the very beginning has been to hold agencies accountable for corrupt practices.

This Consent Order represents a historic victory for the public and sends the unequivocal message that a government agency’s targeting of citizens organizations, or any organization, on the basis of political viewpoints, will never be tolerated and that revenge will be swift and vast. The Order will put an end, once and for all, to the abhorrent practices utilized against citizens, as the agreement includes the IRS’s ePlaintiff 42ress acknowledgment of – and apology for – its wrongful treatment of the public. While this agreement is designed to prevent any such practices from occurring again, rest assured that all public interest lawyers will remain vigilant to ensure that the IRS, SSA, DOJ or SEC does not resort to such tactics in the future. Per detailed reports, in March of 2012 lawyers began being contacted by literally dozens of citizens and groups who were being harassed by the Obama IRS after submitting applications for tax-exempt status. Their tax-exempt applications were held up for years (over seven years in some cases), and they began receiving obtrusive and unconstitutional requests for donor and member information. That began a now more than five and a half year fight with the burgeoning bureaucracy at the IRS. Then on May 10, 2013, Lois Lerner, the then head of the IRS Tax Exempt Organizations Division, publicly implicated the IRS in one of the worst political targeting scandals of the century.

This is an extraordinary victory against government agency abuse. It sends a powerful warning to the deep state bureaucracy that it will not be allowed to violate the Constitution in order to silence and shut down the whistle-blowers. In addition to the IRS’s admissions of and apology for its wrongful conduct, the Consent Order would specifically award Plaintiffs

the following: - A declaration by the Court that it is wrong to apply the United States tax code to any tax-exempt applicant or entity based solely on such entity’s name, any lawful positions it espouses on any issues, or its associations or perceived associations with a particular political movement, position or viewpoint; - A declaration by the Court that any action or inaction taken by the IRS must be applied evenhandedly and not based solely on a tax-exempt applicant or entity’s name, political viewpoint, or associations or perceived associations with a particular political movement, position or viewpoint; and - A declaration by the Court that discrimination on the basis of political viewpoint in administering the United States tax code violates fundamental First Amendment rights.

Disparate treatment of taxpayers based solely on the taxpayers’ names, any lawful positions the taxpayers espouse on any issues, or the taxpayers’ associations or perceived associations with a particular political movement, position or viewpoint is unlawful. In the Order, the IRS has also agreed that (unless ePlaintiff 42ressly required by law) certain actions against the Plaintiffs– i.e. the sharing, dissemination, or other use of information unnecessarily obtained by the IRS during the determinations process (such as donor names, the names of volunteers, political affiliations of an organization’s officers, etc.) – would be unlawful. In addition, the IRS promises not to take any retaliatory action against our clients for ePlaintiff 42osing the targeting scheme. Finally, and of crucial significance, the IRS admits it targeted persons and groups based on their viewpoints (i.e., “policy positions”) and that such viewpoint discrimination violates fundamental First Amendment rights. This is the first time the IRS has admitted that its targeting scheme was not just “inappropriate” – as TIGTA found – but, as alleged, blatantly unconstitutional. To ensure consistency and uniformity within the agency’s operations going forward, the IRS is required, pursuant to the Order, to inform all employees within the Exempt Organizations Division, as well as the Commissioners and Deputy Commissioners within other divisions, of the Order’s terms. This Order not only validates allegations about their treatment at the hands of the corrupt Obama-era IRS but also provides important assurances to the American public that the agency understands its obligation to refrain from further such discriminatory conduct. As

1 Attorney General Sessions acknowledged in this regard, “[t]here is no excuse for [the IRS’s]  
2 conduct,” as it is “without question” that the First Amendment prohibits the conduct that  
3 occurred here, i.e., subjecting American citizens to disparate treatment “based solely on their  
4 viewpoint or ideology.” Sessions further confirmed his Department’s commitment to  
5 ensuring that the “abuse of power” in which the IRS engaged here “will not be tolerated.” It  
6 is impossible to overstate the importance of this victory.

7 This marks a years-long fight for justice in defense of the constitutional rights of the public.  
8 This is an extraordinary victory against abuse of power and corruption. It sends a powerful  
9 warning to the deep state bureaucracy that it will not be allowed to violate the Constitution  
10 and manipulate the IRS, SSA and other agencies in order to silence and shut down those  
11 who speak out about political corruption crimes. In the wake of Wisconsin Watchdog’s  
12 investigation into SSA staff allegations of incompetence, misconduct, and retaliation in  
13 Social Security disability appeals offices, several employees have taken their complaints to a  
14 Senate committee led by Wisconsin Sen. Ron Johnson.

15  
16 An official with knowledge of the complaints said the Senate Homeland Security and  
17 Governmental Affairs Committee, chaired by the Oshkosh Republican, has received emails  
18 and other contacts from “certain people” inside the Social Security Administration’s Office  
19 of Disability Adjudication and Review. The initial complaints came from an employee  
20 inside the Milwaukee office following Wisconsin Watchdog’s opening investigative report  
21 that found some claimants waiting more than 1,000 days for an appeals decision on their  
22 disability benefits claim. Following Wednesday’s story of a whistle-blower in the Madison  
23 ODAR office, the committee has received more specific complaints about retaliation against  
24 employees, the source said. Committee staff members sent the latest Watchdog piece to SSA  
25 administrators hoping they will “cooperate,” the source said. To date, the agency has been  
26 less than cooperative. “This is an ongoing process, and they are not always as forthcoming  
27 as we’d like them to be,” the source said. “Hopefully with your continued reporting, this is  
28 an issue they can’t duck.” A Senate committee member said officials there are working with

1 the Office of Special Counsel on “multiple whistle-blower retaliation claims.” The  
2 committee continues to request information from the SSA. The whistle-blower in the  
3 Madison office claims management retaliated against her after she was called to testify in a  
4 misconduct case.

5 The incident involved “inappropriate behavior” by an administrative law judge, she said.  
6 “They are so corrupt. It’s absolutely horrible,” said the woman, a lead case technician in the  
7 Madison Office of Disability Adjudication and Review. She spoke on condition of  
8 anonymity, fearing more retribution from her supervisors. While she said recounting her  
9 particular experiences will more than likely betray her identity anyway, the ODAR case  
10 worker insisted she has had enough. “I’m at point where they don’t care about me, I don’t  
11 see why I’m protecting them. This is my last resort,” she said. “I want to do my work  
12 without fear of retaliation.” She said she has contacted the Senate committee. “I forwarded  
13 my information to them and I got an email back from them. See these reports:

- 22 • They said people are coming out of the woodwork with their complaints (about ODAR)  
23 following your story,” the whistle-blower said. Ronald Klym, a long-time senior legal  
24 assistant in the Milwaukee ODAR office, alleges he has been retaliated against by  
25 supervisors for going public with his charges of incompetence and misconduct in the  
26 agency. The federal employee, who has worked for SSA for 16 years, provided Wisconsin  
27 Watchdog with documents showing extremely long wait times for claimants appealing their  
28

1 denied applications for benefits. Doug Nguyen, SSA regional spokesman, in a previous story  
2 said the agency acknowledges that Milwaukee ODAR has a “high average processing time  
3 for disability appeal hearings, and we are working to address the issue.” Beyond the delays  
4 is what Klym calls the “shell game,” the wholesale transferring of cases to other parts of the  
5 country by administrators to make the Milwaukee office’s numbers look better than they are.  
6 The Madison office whistle-blower confirmed Klym’s allegations, saying at one point she  
7 saw 2,000 cases from the Milwaukee office handed off to the Oak Brook operation. There  
8 are over 10,000 SSA disability manipulation charges against SSA executives and staff.  
9

10 **HARM: DEFENDANTS USED BLACKLISTING AGAINST Plaintiffs:**

11 ie: [The U.S. Stops Silicon Valley's 'No Poaching' Deals. . . a ...](#)

12 [Aol. https://www.aol.com](https://www.aol.com) > 2010 > 09 > 26 > [doj-stops-silicon-valleys-no-poaching-deals-a-few-](#)  
13 [years-t](#)

14 DOJ Stops **Silicon Valley's 'No Poaching'** Deals. ... But anyone on the ground in **Silicon**  
15 **Valley** knows that a full-blown war for talent is under way, with checkbooks blazin.

- 16
- 17 • Government officials and tech oligarchs contacted members of the National Venture Capital  
18 association (NVCA) and created national “black-lists” to blockade Plaintiffs from receiving  
19 investor funding. This was also confirmed in a widely published disclosure by Tesla Motors  
20 Daryl Siry and in published testimony. If Silicon Valley political campaign finance oligarchs  
21 black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action  
22 Lawsuit" cases) you will never get investor funding again.  
23

24 **HARM: DEFENDANTS ORDERED FOIA OBFUSCATION OF Plaintiffs FOIA AND**  
25 **STILL HAVE NOT RESPONDED TO MANY FOR YEARS BECAUSE THEY SHAME**  
26 **DEFENDANTS:**

27 Federal FOIA requests were hidden, frozen, stone-walled, delayed, lied about and only  
28 partially responded to in order to seek to hide information and run cover-ups. In once  
instance, even though GOVT FOIA staff had the requested FOIA files in their top desk

1 drawers, they delayed handing the FOIA copies over for nearly a decade in order to run a  
2 cover-up.

3  
4 ***HARM: DEFENDANTS ENGAGED IN ARBITRARY DEADLINE MANIPULATION:***

5 Crony state and federal officials play an endless game of Catch-22 by arbitrarily determining  
6 that deadlines had passed that they, the government officials, had stonewalled and  
7 obfuscated applications for, in order to force these deadlines that they set, to appear to be  
8 missed.

9  
10 ***HARM: POLITICAL POISONING & TOXIC exposure BY DEFENDANTS HARMED***  
11 ***Plaintiffs:***

12 Plaintiffs were found to be strangely poisoned, not unlike the Alexander Litvenko case, The  
13 Salisbury Case and hundreds of other political poisoning cases. Heavy metals and toxic  
14 materials were found right after Plaintiffs work with The U.S. Government weapons and  
15 energy facilities. Many wonder if Plaintiffs was intentionally exposed to toxins in retribution  
16 for their testimony. The federal MSDS documents clearly show that a number of Plaintiffs  
17 were exposed to deadly compounds and radiations, via GOVT, without being provided with  
18 proper HazMat suits which GOVT officials knew were required. Plaintiffs was awarded an  
19 exceptional number of issued patents on the energy technologies he had developed for the  
20 Dept of Energy. 3rd Party outside legal valuation experts appraised the value of these  
21 patents at over \$200,000.000.00. The patents, clearly visible in full detail, on the US Patent  
22 office website, list many of the chemicals and compounds Plaintiffs was working with  
23 without adequate hazmat resources of Sandia, Argonne or other National Labs safety  
24 oversight.

25 ***HARM: WORKPLACE SABOTAGE AND OBSTRUCTION OF Plaintiffs RIGHT TO***  
26 ***WORK:***

27 Plaintiffs contacts at ARTECH and KAISER PERMANENTE were called, and faxed, and  
28 ordered to fire target Plaintiffs from their places of employment, in the middle of the day,

1 with no notice, as a retribution tactic.

2  
3 ***HARM: MEDIA ASSASSINATION PROGRAMS WERE CONTRACTED BY DEFENDANTS TO HARM Plaintiffs:***

4 On orders from Obama White House officials Google, YouTube, Gawker Media and  
5 Gizmodo Media produced attack articles. Google locked these contrived attack articles from  
6 the Nicholas Guido Denton tabloid empire on the top line, of the front page of all Google  
7 searches for a decade in front of 7.5 billion people, around the world. This attack-type uses  
8 over \$40 million dollars in server farms, production costs and internet rigging. The forensic  
9 data acquired from tracking some of these attacks proves that Google rigged these attacks  
10 against Plaintiffs on the internet and that all of Google’s “impressions” are manually  
11 controlled by Google’s executives who are also the main financiers and policy directors of  
12 the Obama Administration. This data was provided to the European Union for it’s ongoing  
13 prosecution of Google’s political manipulation of public perceptions. Hired attackers  
14 Nicholas Guido Denton, John Herman, Adrian Covert, Ian Fette, Patrick George, Gabrielle  
15 Darbyshire and John Cook have been referred to the FBI for surveillance, tracking and  
16 interview relative to the command, control and compensation for those attacks.

17  
18 ***HARM: COMMERCIAL EMPLOYMENT DATABASE POISONING AND RED-FLAGGING OF Plaintiffs HR DATABASE REFERENCES WERE CREATED TO HARM Plaintiffs INCOME POTENTIAL:***

19 Plaintiffs HR and employment records, on Taleo, Palantir and EVERY recruiting and hiring  
20 database, was embedded with negative keywords and “flags” in order to prevent the  
21 Plaintiffs from ever gaining future employment.

22  
23  
24 ***HARM: ATTEMPTS ON THE LIVES OF WHISTLE-BLOWERS BY DEFENDANTS WERE MEANT TO FRIGHTEN Plaintiffs:***

25 Gary D. Conley, Seth Rich, Rajeev Motwani who Plaintiffs knew, and many other whistle-  
26 blowers in these matters, turned up dead under strange circumstances. Plaintiffs have  
27 received ongoing death threats for his help to federal investigations in the larger organized  
28

1 crime investigation relative to this matter. See the list of over 120 dead victims, lower down  
2 in this document, 1/3 of whom worked with Plaintiffs and were threatened in advance of  
3 their deaths.

4  
5 ***HARM: DEFENDANTS ENGAGED IN REVENUE BLOCKADES AND INTERNET***  
6 ***INCOME RE-DIRECTION TO MINIMIZE Plaintiffs RESOURCES SO HE COULD NOT***  
7 ***FIGHT BACK:***

8 Paypal (A DNC-biased operation owned and operated by White House political campaign  
9 financiers) and other on-line payments for on-line sales by Plaintiffs are de-platformed,  
10 delayed, hidden, or re-directed in order to terminate income potential for target who  
11 competed with the attackers interests and holdings. This further denied Plaintiffs income. As  
12 a test, Plaintiffs built an online store with hundreds of thousands of products and marketed it  
13 globally. Trackers, placed by Plaintiffs technicians, on servers, discovered that Paypal and  
14 an outside “Virginia-based system” were DNS and payment re-directed all traffic away from  
15 the store so that Plaintiffs received no traffic and no income. In DNS redirection, "website  
16 spoofing" sends target Plaintiffs websites to dead ends where no sales orders or customer  
17 inquiries actually get back to the target. These internet revenue activity manipulations are  
18 conducted using outside covert servers operated by the attackers and revealed in the  
19 Snowden Leaks. All commercial storefronts and on-line sales attempts by target Plaintiffs,  
20 had their sites hidden, or search engine de-linked by a massively resourced facility located in  
21 Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the  
22 Plaintiffs.

23 ***HARM: DEFENDANTS USED THE TROLL FARM DEPLOYMENTS AGAINST Plaintiffs***  
24 ***THAT THEY USE AGAINST PRESIDENTIAL OPPOSITION CANDIDATES:***

25 Contracted trolls, shells, botnets and synth-blog deployments are deployed to place  
26 defamatory statements and disinformation about Plaintiffs in front of 7.5 billion people  
27 around the world on the internet in order to seek to damage their federal testimony  
28 credibility by a massively resourced facility. Some of these troll farms were uncovered in  
Russia, Ukraine, Israel and Brazil. Renown author Farrow writes about this technique in his

28

book: **“Catch And Kill”**. **FUSION GPS, BLACK CUBE and MEDIA MATTERS** Brand, Reputation and Credibiity **“KILL” CONTRACTS** were executed by Defendants targeting Plaintiffs. Campaign finance dirty tricks contractors were hired by campaign financiers to attack the friends and family members of the target Plaintiffs in order to create low morale for the target Plaintiffs psyche and motivation. The Fusion GPS Scandal implicates Gawker and Gizmodo Media In Pay-To-Publish Scheme. A court filing from the U.S. district court for DC shows that Fusion GPS paid several journalist to run hit jobs on political adversaries and was paid by a media organization. All of those players were attackers hired to attack Plaintiffs. FBI interviews can verify this.

***HARM: MANUAL SEARCH ENGINE LOCK-IN ATTACKS WERE CONTRACTED FROM GOOGLE AND YOUTUBE, BY DEFENDANTS, TO HARM Plaintiffs:***

In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Plaintiffs by many magnitudes.

***HARM: THE U.S. PATENT OFFICE MANIPULATION WAS USED TO BLOCKADE REVENUE FROM Plaintiffs INVENTIONS:***

Facebook and Google executives sit on the boards and run The United States Patent Office. That fact alone says it all. For details see <https://www.usinventor.org>

- Covert Cartel financier: Google, placed Google’s lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Google’s operations as “Racketeering”, “Monopolistic Cartel” and “Government Coup-like” behaviors. Thousands of articles and investigations detail the fact that Google, “essentially” ran the Obama White House and provided over 80% of the key

1 White House staff. A conflict-of-interest unlike any in American history. Google’s investors  
2 personally told Plaintiffs they would “kill him”. Google and the Obama Administration were  
3 “the same entity”. Plaintiffs testified in the review that got Michelle Lee terminated and  
4 uncovered a tactical political and social warfare group inside Google who were financed by  
5 Federal and State funds. For additional proof, SEE THE VIDEO at:

6 [The Battle to Save Inventing.m4v](#)

7  
8 Silicon Valley has taken over the U.S. Patent Office with lobbyists and influence payments.  
9 Per Randy Landreneau, the President the U.S. Inventor guild: “ *Independence Day is that*  
10 *special time when we Americans remember and celebrate our country's freedom. While it*  
11 *may mean different things to many people, suffice to say, it is the reason we are Free, we*  
12 *have Liberty.* Founder, writer, statesman and inventor Benjamin Franklin wrote, "On  
13 Historical occasions, Questions of Right and Wrong, Justice and Injustice, will naturally  
14 arise." Here, on this honored day, we take a quick look at Invention and our Independence.  
15 Towards the beginning of the Declaration of Independence, whose principal author was our  
16 eventual third president, Thomas Jefferson, the very purpose of our Founders' quest was  
17 established. It is stated: "We hold these truths to be self-evident, that all men are created  
18 equal, that they are endowed by their Creator with certain unalienable Rights, that among  
19 these are Life, Liberty and the pursuit of Happiness." These were men and women of  
20 incredible vision, of intense courage, and they succeeded in accomplishing their seemingly  
21 insurmountable task, rising up and defeating perhaps the most powerful global Empire of the  
22 time, Great Britain. The United States of America eventually became the beacon of hope  
23 and individual freedom around the world. People from virtually every land came to this  
24 country to seek the American Dream, which ideals include individual and property rights,  
25 religious freedom, liberty, equality and the opportunity for upward mobility, achieved  
26 through dedication and hard work. One of the reasons America became the world leader in  
27 nearly all categories is due, in no small part, to how our Founders recognized and  
28 encouraged invention and innovation. They understood what builders, creators and designers

28

could mean to a small, fledgling country with such a noble purpose. After declaring our independence and fighting a long and bloody war to establish it, our Founders gathered once again in Philadelphia for the Constitutional Convention to form a government that would embody those ideals embodied in our Declaration of Independence. The Father of our Constitution and eventual fourth President, James Madison wrote, in Federalist 43 (January 23, 1788): "A power 'to promote the progress of science and useful arts, by securing, for a limited time, to authors and inventors, the exclusive right to their respective writings and discoveries.' "The utility of this power will scarcely be questioned. The copyright of authors has been solemnly adjudged, in Great Britain, to be a right of common law. The right to useful inventions seems with equal reason to belong to the inventors. The public good fully coincides in both cases with the claims of individuals. The States cannot separately make effectual provisions for either of the cases, and most of them have anticipated the decision of this point, by laws passed at the instance of Congress." Thus, within our U.S. Constitution is that short item, located in Article I Section 8 as Clause 8: "To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries." That clause is, in reality, a significant and powerful part of the American Dream, allowing people from all walks of life who have a bright and useful idea to capitalize on their innovations and creations. For more than two centuries that which our Founders established for inventors and patent holders held true, for the most part. However, the biggest blow to true Independence for Inventors came with passage of the America Invents Act of 2011 (AIA). Due to ambiguous language and loopholes in that piece of legislation, multinational conglomerates and Big Tech have all but wiped out what our Founders had set up, which they hoped would endure - patent holder property rights. When any form of poor legislation is passed and enacted we are reminded of what Samuel Adams, Sons of Liberty founder and a leader of the Boston Tea Party, said; "The grand end of civil government, from the very nature of its institution, is for the support, protection, and defense of those very rights; the principal of which, as is before observed, are Life, Liberty, and Property."

Indeed, Jefferson states it quite succinctly, “Our legislators are not sufficiently apprized of the rightful limits of their power; that their true office is to declare and enforce only our natural rights and duties, and to take none of them from us.” Madison adds to that, “A Government is instituted to protect property of every sort...This being the end of government, that alone is a just government, which impartially secures to every man, whatever is his own.” As we celebrate Independence Day, and all that our Founders provided for our great country, we at US Inventor are working to correct the wrongs and injustices that have befallen inventors, particularly since the AIA was enacted, by revitalizing the spirit of our Declaration of Independence (“...Life, Liberty and the pursuit of Happiness.”) through restoration of patent rights and protection as guaranteed in Article I Section 8 Clause 8 of our United States Constitution (“securing, for a limited time, to ... inventors, the exclusive right to their respective ... discoveries.”). We will not rest until the rights of inventors have been restored. We're gaining ground, but our enemies are powerful. We need your help in forwarding our cause and becoming involved when it matters. This isn't just for us, it's for our children, our grandchildren, and the future existence of the American Dream.”

Silcon Valley oligarchs have spent billions of dollars to put their people inside the United States Patent Office and to manipulate patent rulings in order to harm WITNESS and his peers for the purposes of: 1.) cheating instead of competing by stealing technologies and not paying for them and, 2.) operating reprisal, vendetta, retaliation campaigns against competitors and political enemies. Plaintiffs was awarded an exceptional number of issued patents on the energy technologies he had developed for the Dept of Energy. 3rd Party outside legal valuation experts appriased the value of these patents at over \$200,000.000.00. By it’s actions, The U.S. Government made Plaintiffs patents unusuable for monetization by causing black-listing of those patents with NVCA investors and by using online trolls to make the marketing for those patents close off. Plaintiffs demands that the U.S. Government now purchase ALL of Plaintiffs patents at fair market value to partially offset his loss.

1 **HARM: HONEY-TRAPS WERE PLACED ON SOCIAL MEDIA SITES BY DEFENDANTS**  
2 **SPY OPERATIVES TO HARM Plaintiffs:**

3 “Honeytraps” and moles were employed by the attackers. In this tactic, people who covertly  
4 worked for the attackers were employed to approach the “target” in order to spy on and  
5 misdirect the subject. Match.com and other dating sites are owned by famous politicians and  
6 election campaign financier involved with Jeffrey Epstein and those sites were used to  
7 source girls for Epstein and Honey-traps to lure political adversaries.

8 **HARM: A FAKE NEWS TABLOID EMPIRE WAS CREATED JUST FOR DEFAMATION**  
9 **ATTACKS, BY DEFENDANTS, AND USED TO HARM Plaintiffs:**

10 Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins were  
11 retained to produce "hatchet job" character assassination articles about Plaintiffs. Then those  
12 articles were faxed, mailed and emailed to Kaiser Permanente and investors with a note  
13 saying: "You don't want to have anything to do with this person, do you..?" in order to get  
14 Plaintiffs fired from their job and get Plaintiffs loans or financing pulled. The attackers use  
15 their round one attack media, that they authored, to create a round two second wave attack  
16 designed to end Plaintiffs life status via economic warfare. All of the other attack victims  
17 received between \$100,000.00 to \$75,000,000.00 but Plaintiffs received ZERO DOLLARS  
18 because the Judge was friends with the Defendants.

19 **HARM: HOUSING BLOCKADES WERE DEPLOYED BY DEFENDANTS TO HARM**  
20 **Plaintiffs:**

21 Mortgage and rental applications had red flags added to them in databases to prevent the  
22 targets from getting homes or apartments. HUD applications were manipulated or stalled  
23 from 2007 to today, as reprisal.

24 **HARM: HACKING OF Plaintiffs DEVICES OCCURRED ON ORDERS OF**  
25 **DEFENDANTS:**

26  
27 Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT  
28 publications have reported that hundreds of spy "back-doors" have been found on every

25  
26  
27  
28

Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. This means that the attackers used a "key" code can open any of Plaintiffs computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on devices at any time from any location on Earth. This has been widely reported on by Glenn Greenwald, Edward Snowden, Scahill, Cheryl K of CBS News and others. Plaintiffs was hacked at least 10 times. In a number of instances, people, who Plaintiffs had been communicating with online, were mysteriously contacted by a third party who sent them the Gizmodo attack article or phoned them with warnings to avoid Plaintiffs. These kinds of Man-In-The-Middle interceptions would only have been possible from hacking and MITM surveillance tactics.

***HARM: TECH INDUSTRY BLACK-LIST COORDINATION AGAINST Plaintiffs HAD COMMAND-AND-CONTROL OUT OF DEFENDANTS OFFICES:***

McCarthy-Era "Black-lists" were created and employed against target Plaintiffs who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future employment. This White House process is known as "RatFucking", a tactic that is documented in a variety of published reports and on Wikipedia. Using Gust, Google Docs, Dropbox and secret meetings, a black-list has been maintained to attack Plaintiffs for whistle-blowing. Plaintiffs have named specific individuals to this court and demanded that the Court request the FBI 302 reports on those individuals. Additional, Plaintiffs demands the FINCEN financial mapping records for those Defendant parties. That data, cross referenced in the XKEYSCORE database, provides indisputable, fully incriminating, follow-the-money evidence about every single party mentioned in this complaint.

***HARM: HUD AND USDA MORTGAGE RIGHTS BLOCKADES TO HARM Plaintiffs HOUSING IN REPRISAL AS DIRECTED BY DEFENDANTS VIA THEIR 'DIRTY TRICKS' TEAM:***

The housing rights of Plaintiffs were stalled in reprisal. Public records show that tens of thousands of other Plaintiffs were moved ahead of Plaintiffs even though Plaintiffs

1 validation metrics exceeded those of almost every other Plaintiffs. Plaintiffs was “black-  
2 listed”.

## 14 15 16 JUDICIAL CONFLICT OF INTEREST NOTICE

17 Be it hereby known that any Judge, Magistrate or Court officer who owns, or has family who owns,  
18 stock market securities in VALIC/AIG, Tesla Motors, Facebook, SpaceX, Google, Alphabet,  
19 YouTube, Netflix, Linkedin or NASDAQ ‘FANG’ stocks shall be disqualified from this case per  
20 FINCEN, FTC, DOJ and case investigations and the financial and political conflicts of interest in  
21 those pending Defendants and their RICO law and Anti-Trust law violating schemes.  
22

23 **Plaintiffs hereby also pleads with the Court for:**

24 **(B) Plaintiffs requests verification that no judge or magistrate holds tock ownership, or**  
25 **personal relationships, in Valic/AIG or the Silicon Valley Cartel companies who are**  
26 **DOE and ROE affiliated insiders;**  
27  
28

1 Plaintiffs hereby places a motion before the Court to request multi-Court official public review for  
2 non-bias of judiciary personnel involved in this case. Plaintiffs have dated sitting judges in the  
3 regional courts and sitting judges have dated Plaintiffs ex-girlfriend. A well known sitting judge  
4 used to spend many nights at Plaintiffs home. Additionally, trillions of dollars of conflict-of-interest  
5 government funds and high tech stock market funds are involved in the Master Complaint which,  
6 obviously, opens the door for bribery. Additionally, America is currently in a political civil war and  
7 many of the judicial officers have friends who are either friends or co-investors of the Defendants  
8 for political or financial reasons. Thus, conflicts of interest are rife in this case. Hence, the demand  
9 for a Jury Trial. Court examples of these concerns include a previous case where Plaintiffs was  
10 forced to seek to move the court for an order transferring a cause and all of its pending and future  
11 motions to an unbiased and disinterested Judicial Officer for the Court. Ie: this text from DOJ and  
12 the previous case matters:

- 13  
14 1. *This motion is filed pursuant to C.R.C.P. 97, the Canons of Judicial Conduct, and state and*  
15 *federal constitutional guarantees to due process of law, equal protection of the law, and a*  
16 *fair hearing and trial.*
- 17 2. *There is sufficient evidence to prove that Judge XXXX is not an impartial or qualified judge*  
18 *in this case. The facts to support this motion are stated in the attached affidavit.*
- 19 3. *The framers of the Fourteenth Amendment stressed that the due process and equal*  
20 *protection clauses created a right to a fair and impartial hearing and trial. Courts have*  
21 *repeatedly held that an impartial judge is an indispensable element of that right. The*  
22 *attached Affidavit shows both bias and prejudice in fact and in appearance, and a lack of*  
23 *legal qualification and temperament to preside in this case. Each alone is sufficient to*  
24 *require the judge's disqualification and recusal.*
- 25 4. *Due process demands a fair and impartial hearing by a neutral and detached magistrate.*  
26 *Gerstein v. Pugh, 420 U.S. 103 (1975); Ward v. Village of Monroe, 409 U.S. 57, 62*  
27  
28

1 (1972). A right to an impartial judge is so basic to due process that courts can never treat its  
2 infraction as a harmless error. Chapman v. California, 386 U.S. 18, 23 (1967). "...the  
3 tribunals of the country shall not only be impartial in the controversies submitted to them  
4 but shall give assurance that they are impartial..." Berger v. the United States, 255 U.S. 22,  
5 35-6 (1921).

6 5. Rule 1.2 states "Promoting Confidence in the Judiciary - A judge shall act at all times in a  
7 manner that promotes public confidence in the independence, integrity, and impartiality\* of  
8 the judiciary, and shall avoid impropriety and the appearance of impropriety."  
9

10 6. Judge XXXX has a duty to promote confidence in the judiciary.

11 7. Plaintiffs does not feel that the present judge will act independently, with integrity and  
12 impartiality regarding the present case of Plaintiffs.

13 8. Actual improprieties include violations of law, court rules or provisions of this Code. The  
14 test for appearance of impropriety is whether the conduct would create in reasonable minds  
15 and a perception that the judge violated this Code or engaged in other conduct that reflects  
16 adversely on the judge's honesty, impartiality, temperament, or fitness to serve as a judge  
17

18 9. Rule 1.3 provides the standard. Rule 1.3 states that "Avoiding Abuse of the Prestige of  
19 Judicial Office - A judge shall not abuse the prestige of judicial office to advance the  
20 personal or economic interests\* of the judge or others or allow others to do so."  
21

22 10. The presiding judge as a judicial office has an economic interest in this matter. It would be  
23 unfair and unreasonable if this Judge would be allowed to preside over this case matter.

24 11. Rule 2:2 provides:

25 **Impartiality and Fairness.** A judge shall uphold and apply the law and shall perform  
26 all duties of judicial office fairly and impartially.

27 12. Pursuant to Rule 2.2, the judge should not give self-represented litigants an unfair  
28 advantage or create an appearance of partiality to the reasonable person; however, in the

1  
2

19  
20  
21  
22  
23  
24  
25  
26  
27  
28

*interest of ensuring fairness and access to justice, judges should make reasonable accommodations that help litigants who are not represented by counsel to understand the proceedings and applicable procedural requirements, secure legal assistance, and be heard according to law.*

13. *The Plaintiffs are representing himself. Plaintiffs are disabled and blind but seeks to have his rights adjudicated because of the unfair advantage of the judge along with the actual possible actions of impartiality.*
14. *The rules for disqualification for a judge are set out in Rule 2:11 for Disqualification.*
15. *Rule 2:11(A). A judge shall disqualify himself or herself in any proceeding in which the judge’s impartiality\* might reasonably be questioned, including but not limited to the following circumstances.*
16. *Rule 2:11 (A)(1) The judge has a personal bias or prejudice concerning a party or a party’s lawyer or personal knowledge\* of facts that are in dispute in the proceeding.*
17. *Under this Rule, a judge is disqualified whenever the judge’s impartiality might be questioned, regardless of whether any of the specific provisions of paragraphs (A)(1) through (6) apply. (Rule 2:11 -Comment 1)*
18. *This Judge should be disqualified because his impartiality is reasonably questioned. Plaintiffs will not receive a fair trial under his jurisprudence*
19. *Comment 2 in Rule 2:11 states “a judge’s obligation not to hear or decide matters in which disqualification is required applies regardless of whether a motion to disqualify is filed.”*
20. *At least by the time of his failure to follow the mandamus of the D.C. Circuit panel and his decision regarding the Plaintiffs case. The Court for **In re Al Nashin** stated that \_ “it cast an intolerable cloud of partiality over his subsequent judicial conduct” and “risk[ed] [] undermining the public’s confidence in the judicial process.” **In re Al Nashiri**, 921 F.3d 224, 237, 239 (D.C. Cir. 2019)*

- 1 21. “[A]ll that must be demonstrated to compel recusal,” then, is “a showing of an appearance  
2 of bias...sufficient to permit the average citizen reasonably to question a judge’s  
3 impartiality.”” *Id.* at 234
- 4 22. The circumstances of this case lead any reasonable observer to believe that the current  
5 judge has a personal interest in the outcome, is irreparably biased against the Plaintiffs. His  
6 continued presence in the case may become a national scandal undermining confidence in  
7 the impartiality of the judicial system and faith in the rule of law writ large.
- 8 23. The Constitution compels, and all statutory bases require (“shall recuse”), that Judge  
9 Sullivan recuse himself from any further proceeding
- 10 24. Even more fundamentally, due process guarantees “an absence of actual bias” on the part  
11 of a judge. *In re Murchison*, 349 U.S. 133, 136 (1955). Because bias is “easy to attribute to  
12 others and difficult to discern in oneself,” the Supreme Court has imposed an objective  
13 standard here, too, that asks whether “as an objective matter, the average judge in his  
14 position is ‘likely’ to be neutral, or whether there is an unconstitutional ‘potential for  
15 bias.’” *Williams v. Pennsylvania*, 136 S. Ct. 1899, 1905 (2016)
- 16 25. Notably, if Plaintiffs case goes forth in the presiding court, it is very possible that he will  
17 receive a biased and unfair judgment.
- 18 26. In order for the wheels of justice to be maintained at all levels, it is imperative that this  
19 Judge be removed.
- 20 27. Recusal is required whenever there exists a genuine question concerning a judge’s  
21 impartiality,” regardless of whether the question arises from an extrajudicial source. *Id.*,  
22 citing *Berger v. United States*, 255 U.S. 22, 28 (1921)
- 23 28. Judges are to decide cases based solely upon the facts and arguments presented by the  
24 parties’ counsel through the judicial process
- 25  
26  
27  
28

1 29. Plaintiffs will not give a fair trial because it is quite possible that the judge will not decide  
2 the case solely upon the facts. The Judge makes take his own self-interest in the case.

3 30. Even appearance of bias or prejudice is sufficient grounds for disqualification. It is an  
4 abuse of discretion and reversible error if that judge does not withdraw from the case even  
5 though he believes the statements are false or that the meaning attributed to them by the  
6 party seeking justice.

7 31. A judge should “recuse himself whenever...he believes his impartiality can reasonably be  
8 questioned.” A.B.A. Standards, *The Function of the Trial Judge*, 1.7. Departure from this  
9 principle shocks the sense of justice  
10

11 Plaintiffs would respectfully request that this Court recuse the present judge presiding  
12 and assign the Plaintiffs case before another Court. The transfer of Plaintiffs case will  
13 ensure the integrity of the Court. Foremost, a reassignment of the case by this Motion to  
14 Recuse will assist in promoting equity and justice.  
15

16  
17 **Facts Of The Bias Concern Matter:**

18  
19 Whereas White House executives, U.S. Senators, and Government agency executives colluded with  
20 Silicon Valley oligarchs, operating, together, as an “Enterprise”, to coordinate insider stock  
21 market ‘Stimulus Scams’ that involved funding blockades, blacklists, contracted tabloid media  
22 assassinations and RICO Racketeering law violations, Anti-trust law violations, IP law violations,  
23 lobbying law violations and various civil and criminal acts that harmed domestic citizens and  
24 Democracy. This case matter is well known to Courts, media, federal law enforcement and in nearly  
25 a million news articles. It is not possible for this Judge, who knows many of the participants in this  
26 case, to not have seen the conflict of interest herein, at first blush. A simple cross-comparison of the  
27 ICIJ, FINCEN, Interpol, SEC, GAO forensic accounting and XKEYSCORE, et al, databases proves  
28

1 the illicit financial interactions between Defendants. Such a check can be technically accomplished  
2 within 60 minutes, or less, according to federal IT experts. Almost every single investor of Elon  
3 Musk is also the primary financier and beneficiary of the politicians, and their Congressional  
4 shenanigans, that used taxpayer money and resources to give Musk's companies all that free money.  
5 For example, Dianne Feinstein's family run the HR service (Herb Newman), the construction  
6 company, the railroads, the building leases (CBRE), the China funds (Mart Bailey, Steve Westly,  
7 Steve Spinner, et al) and swap staff members for Tesla and Solyndra. Feinstein and Pelosi blocked  
8 funding for all Tesla competitors for the same State and Federal cash and tax waivers and for the  
9 NUMMI factory. The California and Washington, DC politicians, personally, made billions off  
10 insider trading, pump-and-dumps and payola. Felonies? You Bet! Valic, who the Judge invests  
11 massively, with, runs part of the Tesla and Elon Musk cash.  
12

13  
14 Reporters and family members of California politicians, including U.S. Senators, **who Plaintiffs**  
15 **have a personal relationship with and knows the staff of**, have contacted Plaintiffs. Based on  
16 current investigative information, federal finance reports on the Judge's sources of income from  
17 stock market investments, speakers fees and other sources and social media postings, photographs  
18 and social photography archives from Getty, Drew Altizer and related Washington, DC 'high-  
19 society' photographers there appears to be conflicts of interest between Chief Judge XXXX D XXXX  
20 and this case. Senators Dianne Feinstein, Nancy Pelosi, Kamala Harris, Harry Reid (Deceased, but  
21 records acquired), White House staff, and other related parties, appear to have given orders to the  
22 Judge's office to "Stop this case no matter what.." stating that "This will cut off the stock market  
23 income of 90% of the DNC..". As Chief Judge XXXX D XXXX is a renown spokesperson and  
24 speaker for the DNC and this case has the potential to cause the arrest, indictment, censure,  
25 Congressional charges of Contempt, and other hardships for "90% of the DNC", there is a  
26  
27  
28

1 reasonable assumption, that any person of average intelligence could make, that this Judge is  
2 overly conflicted in this matter.

3  
4 As one of the founders of the “Anti-corruption Party”, there are also basic conflicts of interest  
5 between the “Anti-corruption Party’s” : “NO Public Official, or their family, should own stock  
6 market assets because that is how bribes are paid” stance and the DNC’s stance, per Nancy Pelosi,  
7 that: “All public officials and judges should get stock market perks”. The Plaintiffs are an active  
8 proponent of the EPlaintiff 42ansion, FBI enforcement and application of the federal STOCK ACT,  
9 which most of the opposition are in violation of.

10  
11  
12 Facebook, Google, Alphabet, Tesla Motors, SpaceX and other Big Tech companies as well as the  
13 Senators mentioned, co-partnered in the government criminal endeavors mentioned in this case.  
14 Reporters have stated to Plaintiffs that financial disclosures indicate that those who own direct, or  
15 mutual funds, together, in this entities are Defendants and ‘enemies’ of the Plaintiffs. Plaintiffs and  
16 advisors request that the Judge Swear, Warrant and Certify that they, or their partner own no  
17 stocks or interests in any “Big Tech” companies and that the points in the affiliated insider  
18 Senator’s financial disclosures (Per <https://www.openthebooks.com>,  
19 <https://sunlightfoundation.com/>, and Senate Investigators) do not cross over in the Judge’s finance  
20 disclosure in any non-coincidence manner.  
21

22       The federally documented reports, below, prove that the number one way to bribe Judges  
23 and public officials is via Dark Money stock market transactions and covert Mutual Funds  
24 ‘packing’.

25  
26       Such conflicts cannot even have a hint of possibility in a case this important to every  
27 American citizen.

28       How can you ever trust a single judge to rule fairly on a case involving famous politicians

1 and notorious millionaires that the Judge knows, parties with, co-invests with and gets political  
2 perks from?

3 *There is a pandemic of crooked, bribed, judges in America as the following evidence shows.*

4 *We must not give leverage to ANY possibility that a Judge could be influenced.*

5 *The Judge has confirmed, herself, extensive investments in: Valic Large Cap Investment Fund,*  
6 *Valic Mid Cap Investment, Fund, Valic Small Cap Investment Fund, Valic Global & Internat'l*  
7 *Equity Fund, Valic Specialty Fund, Valic Fixed Income which are investment fronts for Google,*  
8 *Alphabet, Tesla and the other corrupt companies who are DOE/Defendants in this case and are*  
9 *under federal criminal investigations and those companies are regulated by the Senators and White*  
10 *House officials charged in these crimes. The United States Government has sued 'Valic', over and*  
11 *over, for a variety of misdeeds and dirty financial tricks. 'Valic' recently had to change their name*  
12 *in order to try to ward off more bad press, just like crooked 'Facebook' changed it's name to*  
13 *'Meta' in order to try to ward off more bad press from Facebook being outed as a corruption*  
14 *empire. The new name of Valic is "AIG Retirement Serices".*

15  
16  
17  
18 *Readers will recall that in the 2007-2008 "stimulus scam" a certain contingent of Congress people*  
19 *insisted that a company called AIG should get handed a massive load of free taxpayercash. As we*  
20 *all know by now, insurance giant AIG sparked national outrage by paying more than \$165 million*  
21 *in executive bonuses after receiving a \$170 billion taxpayerbailout in the last "Stimulus Scam".*

22 *What fewer people know is that AIG gave more than \$9 million in campaign contributions to*  
23 *Congress and the Congress People that lobbied FOR the AIG give-away were the people who AIG*  
24 *gave political resources to. Valic/AIG is suspected to be a money-laundering Dark Money route*  
25 *between Big Tech and members of Congress.*

26  
27  
28 *Plaintiffs provided information and research to Robert Simon, the Producer for CBS News 60*

1 *Minutes TV investigative show. 60 Minutes produced segments deeply relevant to this case*  
2 *including: Congress Trading On Insider Information; The Lobbyists Playbook; The Cleantech*  
3 *Crash; The Data Brokers and others. The pertinent sections of those news items can be viewed in*  
4 *the film: How Political Corruption Works.*

5 *Robert (Bob) Simon, the producer of this report, was killed in a suspicious car crash.*  
6 *Bystanders described someone leaning into the car, at the crash, and spraying something.*

7 *This information was publicly available to The Judge, for years, prior to this case and was*  
8 *publicly discussed among the Judges peers and associates, to this day:*

9 *Washington, D.C. is a town that runs on inside information - but should our elected officials*  
10 *be able to use that information to pad their own pockets? As Steve Kroft, Bob Simon's peer at 60*  
11 *Minutes, reports, members of Congress and their aides have regular access to powerful political*  
12 *intelligence, and many have made well-timed stock market trades in the very industries they*  
13 *regulate. For now, the practice is perfectly legal, but some say it's time for the law to change.*

14 *Even if a Judge or Senator denies that they could be influenced by personal favorites or by*  
15 *stocks that all of their friends own, Psychology proves that assertion to be virtually impossible to be*  
16 *believed. Judges, or public officials would not deny that they subconsciously assert influence in a*  
17 *school to make sure their child has the best treatment and that kids that bully their child get the*  
18 *most punishment. Why should anyone think a Judge or Senator would not consciously, or*  
19 *subconsciously, assert influence over something that buys them mansions, trips to the Virgin Islands*  
20 *and sexy parties?*

21 *Judges and Senators in this case are either financed by, friends, with, sleeping with, dating*  
22 *the staff of, holding stock market assets in, promised a revolving door job or government service*  
23 *contracts from, partying with, personal friends with, photographed at private events with,*  
24 *exchanging emails with, business associates of or directed by; our business adversaries, or the*  
25 *Senators and politicians that those business adversaries pay campaign finances to, or supply*  
26  
27  
28

1 political digital search manipulation services to. Criminal U.S. Senators coordinated and profited  
2 in these schemes. Their own family members, who Plaintiffs, and his peers know personally, have  
3 now supplied evidence against them.

4 In one published report where Steve Kroft was the correspondent, with Ira Rosen and  
5 Gabrielle Schonder as producers, it was shown that, for national elections, public officials,  
6 including congressmen and senators are ePlaintiff 42ending much of their time and their energy  
7 raising the millions of dollars in campaign funds they'll need just to hold onto a job that pays  
8 \$174,000 a year.  
9

10 Few of them are doing it for the salary and all of them will say they are doing it to serve the  
11 public. But there are other benefits: Power, prestige, and the opportunity to become a Washington  
12 insider with access to information and connections that no one else has, in an environment of  
13 privilege where rules that govern the rest of the country, don't always apply to them.

14 Most former congressmen and senators manage to leave Washington - if they ever leave  
15 Washington - with more money in their pockets than they had when they arrived, and as you are  
16 about to see, the biggest challenge is often avoiding temptation. Judges lives are set according to  
17 which Senators, and other public officials are in office, Judges have even more incentive to rig  
18 political decisions because most of them own mansions they can't pay for with the speaker fees and  
19 stock perks their office provides.  
20

21 Renown anti-corruption investigative reporter and witness: Peter Schweizer, was asked to  
22 comment:  
23

24 Peter Schweizer: "This is a venture opportunity. This is an opportunity to leverage your  
25 position in public service and use that position to enrich yourself, your friends, and your family."

26 Peter Schweizer is a fellow at the Hoover Institution, a conservative think tank at Stanford  
27 University. A year ago he began working on a book about soft corruption in Washington with a  
28 team of eight student researchers, who reviewed financial disclosure records. It became a jumping

1 off point for our own story, and we have independently verified the material we've used.

2 Schweizer says he wanted to know why some congressmen and senators managed to  
3 accumulate significant wealth beyond their salaries, and proved particularly adept at buying and  
4 selling stocks.

5 Schweizer: “There are all sorts of forms of ‘honest’ grafts that congressmen engage in that  
6 allow them to become very, very wealthy. So it's not illegal, but I think it's highly unethical, I think  
7 it's highly offensive, and wrong.”

8 Steve Kroft: “What do you mean honest graft?”

9  
10 Schweizer: **“For example insider trading on the stock market. If you are a member of  
11 Congress, those laws are deemed not to apply.”**

12 Kroft: “So congressman get a pass on insider trading?”

13 Schweizer: “They do. The fact is, if you sit on a healthcare committee and you know that  
14 Medicare, for example, is-- is considering not reimbursing for a certain drug that's market moving  
15 information. And if you can trade stock on-- off of that information and do so legally, that's a great  
16 profit making opportunity. And that sort of behavior goes on.”

17  
18 Kroft: “Why does Congress get a pass on this?”

19 Schweizer: “It's really the way the rules have been defined. And the people who make the  
20 rules are the political class in Washington. And they've conveniently written them in such a way that  
21 they don't apply to themselves.”

22  
23 The buying and selling of stock by corporate insiders who have access to non-public  
24 information that could affect the stock price can be a criminal offense, just ask hedge fund manager  
25 Raj Rajaratnam who recently got 11 years in prison for doing it. But, congressional lawmakers  
26 have no corporate responsibilities and have long been considered exempt from insider trading laws,  
27 even though they have daily access to non-public information and plenty of opportunities to trade  
28 on it.

1           Schweizer: “We know that during the health care debate people were trading health care  
2 stocks. We know that during the financial crisis of 2008 they were getting out of the market before  
3 the rest of America really knew what was going on.”

4           In mid September 2008 with the Dow Jones Industrial average still above ten thousand,  
5 Treasury Secretary Hank Paulson and Federal Reserve Chairman Ben Bernanke were holding  
6 closed door briefings with congressional leaders, and privately warning them that a global  
7 financial meltdown could occur within a few days. One of those attending was Alabama  
8 Representative Spencer Bachus, then the ranking Republican member on the House Financial  
9 Services Committee and now its chairman.  
10

11           Schweizer: “These meetings were so sensitive-- that they would actually confiscate cell  
12 phones and Blackberries going into those meetings. What we know is that those meetings were held  
13 one day and literally the next day Congressman Bachus would engage in buying stock options  
14 based on apocalyptic briefings he had the day before from the Fed chairman and treasury  
15 secretary. I mean, talk about a stock tip.”  
16

17           While Congressman Bachus was publicly trying to keep the economy from cratering, he was  
18 privately betting that it would, buying option funds that would go up in value if the market went  
19 down. He would make a variety of trades and profited at a time when most Americans were losing  
20 their shirts.

21           Congressman Bachus declined to talk to us, so we went to his office and ran into his Press  
22 Secretary Tim Johnson.  
23

24           Kroft: “Look we're not alleging that Congressman Bachus has violated any laws. All...the  
25 only thing we're interested in talking to him is about his trades. “

26           Tim Johnson: “Ok...Ok that's a fair enough request.”

27           What we got was a statement from Congressman Bachus' office that he never trades on non-  
28 public information, or financial services stock. However, his financial disclosure forms seem to

1 indicate otherwise. Bachus made money trading General Electric stock during the crisis, and a  
2 third of GE's business is in financial services.

3       During the healthcare debate of 2009, members of Congress were trading health care  
4 stocks, including House Minority Leader John Boehner, who led the opposition against the so-  
5 called public option, government funded insurance that would compete with private companies. Just  
6 days before the provision was finally killed off, Boehner bought health insurance stocks, all of  
7 which went up. Now speaker of the House, Congressman Boehner also declined to be interviewed,  
8 so we tracked him down at his weekly press conference.

9  
10       Kroft: “You made a number of trades going back to the health care debate. You bought  
11 some insurance stock. Did you make those trades based on non-public information? “

12       John Boehner: “I have not made any decisions on day-to-day trading activities in my  
13 account. And haven't for years. I don't-- I do not do it, haven't done it and wouldn't do it.”

14       Later Boehner's spokesman told us that the health care trades were made by the speaker's  
15 financial adviser, who he only consults with about once a year.

16  
17       Peter Schweizer: “We need to find out whether they're part of a blind trust or not.”

18       It turns out you CAN pay bribes, though, through Mutual Funds AND Blind Trusts.

19       Peter Schweizer thinks the timing is suspicious, and believes congressional leaders should  
20 have their stock funds in blind trusts.

21       Schweizer: “Whether it's uh-- \$15,000 or \$150,000, the principle in my mind is that it's  
22 simply wrong and it shouldn't take place.”

23  
24       But there is a long history of self-dealing in Washington. And it doesn't always involve stock  
25 trades.

26       Congressmen and senators also seem to have a special knack for land and real estate deals.  
27 When Illinois Congressman Dennis Hastert became speaker of the House in 1999, he was worth a  
28 few hundred thousand dollars. He left the job eight years later a multi-millionaire.

1           Jan Strasma: “The road that Hastert wants to build will go through these farm fields right  
2 here.”

3           In 2005, Speaker Hastert got a \$207 million federal earmark to build the Prairie Parkway  
4 through these cornfields near his home. What Jan Strasma and his neighbors didn't know was that  
5 Hastert had also bought some land adjacent to where the highway is supposed to go.

6           Strasma: “...And five months after this earmark went through he sold that land and made a  
7 bundle of money.”

8           Kroft: “How much?”

9           Strasma: “Two million dollars.”

10          Kroft: “What do you think of it?”

11          Strasma: “It stinks.”

12          We stopped by the former speaker's farm, to ask him about the land deal, but he was off in  
13 Washington where he now works as a lobbyist. His office told us that property values in the area  
14 began to appreciate even before the earmark and that the Hastert land was several miles from the  
15 nearest exit.  
16

17          But the same good fortune befell former New Hampshire Senator Judd Gregg, who helped  
18 steer nearly \$70 million dollars in government funds towards redeveloping this defunct Air Force  
19 base, which he and his brother both had a commercial interest in. Gregg has said that he violated  
20 no congressional rules.  
21

22          It's but one more example of good things happening to powerful members of Congress.  
23 Another is the access to initial public stock offerings, the opportunity to buy a new stock at insider  
24 prices just as it goes on the market. They can be incredibly lucrative and hard to get.  
25

26          Schweizer: “If you were a senator, Steve, and I gave you \$10,000 cash, one or both of us is  
27 probably gonna go to jail. But if I'm a corporate executive and you're a senator, and I give you IPO  
28 shares in stock and over the course of one day that stock nets you \$100,000, that's completely

1 legal.”

2 *Plaintiffs had a social relationship with the staff of former House Speaker Nancy Pelosi. She*  
3 *and her husband have participated in at least eight IPOs. One of those came in 2008, from Visa,*  
4 *just as a troublesome piece of legislation that would have hurt credit card companies, began*  
5 *making its way through the House. Undisturbed by a potential conflict of interest the Pelosis*  
6 *purchased 5,000 shares of Visa at the initial price of \$44 dollars. Two days later it was trading at*  
7 *\$64. The credit card legislation never made it to the floor of the House.*

8  
9 *Congresswoman Pelosi also declined our request for an interview, but agreed to call on us*  
10 *if we attended a news conference.*

11 *Kroft: “Madam Leader, I wanted to ask you why you and your husband back in March of*  
12 *2008 accepted and participated in a very large IPO deal from Visa at a time there was major*  
13 *legislation affecting the credit card companies making its way through the-- through the House.”*

14 *Nancy Pelosi: “But--”*

15 *Kroft: “And did you consider that to be a conflict of interest?”*

16  
17 *Pelosi: “The-- y—uh--, errr-- I-- I don't know what your point is of your question. Is there*  
18 *some point that you want to make with that?”*

19 *Kroft: “Well, err...uhm...I-- I-- I guess what I'm asking is do you think it's all right for a*  
20 *speaker to accept a very preferential, favorable stock deal?”*

21 *Pelosi: “Well, we didn't”, she lied*

22 *Kroft: “You participated in the IPO. And at the time you were speaker of the House. You*  
23 *don't think it was a conflict of interest or had the appearance--”*

24 *Pelosi: “No, it was not--”*

25 *Kroft: “--of a conflict of interest?”*

26  
27 *Pelosi: “--it doesn't-- it only has appearance if you decide that you're going to have--*  
28 *elaborate on a false premise. But it-- it-- it's not true and that's that.”*

1 Kroft: “I don't understand what part's not true.”

2 Pelosi: “Yes sir. That-- that I would act upon an investment.”

3 Congresswoman Pelosi pointed out that the tough credit card legislation eventually passed,  
4 but it was two years later and was initiated in the Senate.

5 Many believe that, even though they are older than the hills, Nancy Pelosi and Dianne  
6 Feinstein never retire because they are they key conduits to the West Coast controlled Big Tech  
7 stock market payola bribes. The “Enterprise” won't allow them to retire because it would break the  
8 whole Big Tech stock market bribery cycle. While it is unlikely that they are “drinking baby blood  
9 from Chinese labor camp work prison babies to stay alive so long”, as activists have claimed, these  
10 two are not allowed to retire by the “Enterprise” that profits from the Big Tech stock market bribes.

11 Pelosi: “I will hold my record in terms of fighting the credit card companies as speaker of  
12 the House or as a member of Congress up against anyone.”

13 Corporate executives, members of the executive branch and all federal judges are subject to  
14 strict conflict of interest rules. But not the people who write the laws.

15 Pelosi and Feinstein put laws in the operation of America, and Democracy, that specifically  
16 exclude THEM from the law...only them! Everyone knows that it is bad to rape sheep on the front  
17 steps of City Hall. Imagine how you would feel if you found out that fine print had been quietly  
18 added to The Constitution that said “No citizen may rape sheep in public....Except Nancy Pelosi  
19 and Dianne Feinstein!”. That is essentially what happened with the law around public officials and  
20 stock market payola! When Google, Elon Musk and Facebook are paying Senators off via the stock  
21 market, justice has fallen off a cliff!

22 Schweizer: “If you are a member of Congress and you sit on the defense committee, you are  
23 free to trade defense stock as much as you want to if you're on the Senate banking committee you  
24 can trade bank stock as much as you want and that regularly goes on-- in-- in all these  
25 committees.”  
26  
27  
28

1 Brian Baird: “There should only be one thing in your mind when you're drafting legislation,  
2 ‘Is this good for the United States of America?’ That's it. If you're starting to say to yourself 'how's  
3 this going to affect my investments,' you've got-- you've got a mixed agenda and a mixed purpose for  
4 being there.”

5 Brian Baird is a former congressman from Washington state who served six terms in the  
6 house before retiring last year. He spent half of those 12 years trying to get his colleagues to  
7 prohibit insider trading in Congress and establish some rules governing conflicts of interest.

8 Baird: “One line in a bill in Congress can be worth millions and millions of dollars. There  
9 was one night, we had a late, late night caucus and you could kind of tell how a vote was going to  
10 go the next day. I literally walked home and I thought, 'Man, if you-- if you went online and made--  
11 some significant trades, you could make a lot of money on this.' You-- you could just see it. You  
12 could see the potential here.”

13  
14 So in 2004, Baird and Congresswoman Louise Slaughter introduced the Stock Act which  
15 would make it illegal for members of Congress to trade stocks on non-public information and  
16 require them to report their stock trades every 90 days instead of once a year.

17  
18 Kroft: “How far did you get with this?”

19 Baird: “We didn't get anywhere. Just flat died. Went nowhere.”

20 Kroft: “How many cosponsors did you get?”

21 Baird: “I think we got six.”

22 Kroft: “Six doesn't sound like a very big amount.”

23  
24 Baird: “It's not, Steve. You-- you could have-- 'National Cherry Pie Week' and get 100  
25 cosponsors.”

26 When Baird finally managed to get a congressional hearing on the Stock Act, almost no one  
27 showed up. It's reintroduced every session, but is buried so deep in the Capitol we had trouble  
28 finding congressmen who had even heard of it.

28

*Kroft: "Have you ever heard of the Stock Act?"*

*Steve Palazzo: "The what?"*

*Kroft: "The Stock Act. Do you know anything about it?"*

*Congressman: "No."*

*Kroft: "Congressman. Congressman. Congressman."*

*Congressman Quayle: "I haven't heard about that one yet."*

*Kroft: "Have you ever heard of something called the Stock Act?"*

*Congressman Watt: "No."*

*Male voice: "I've heard about, but not. I can't say it's an issue I've spent a lot of time on."*

*Male voice: "I would have no problem with that."*

*Kroft: "Okay."*

*Male voice: "But then again I am a big fan of, you know, instant disclosure on almost everything."*

*Kroft: "They're looking for co-sponsors."*

*Male voice: "And yet, I've never heard of it."*

*Baird: "When you have a bill like this that makes so much sense and you can't get the co-sponsorships, you can't get the leadership to move it, it gets tremendously frustrating. Set aside that it's the right thing to do, it's good politics. People want their Congress to function well. It still baffles me."*

*But what baffles Baird even more is that the situation has gotten worse. In the past few years a whole new totally unregulated, \$100 million dollar industry has grown up in Washington called political intelligence. It employs former congressmen and former staffers to scour the halls of the Capitol gathering valuable non-public information then selling it to hedge funds and traders on Wall Street who can trade on it.*

*Baird: "Now if you're a political intel guy. And you get that information. Long before it's*

1 public. Long before somebody wakes up the next morning and reads or watches the television or  
2 whatever, you've got it. And you can make real-- real-time trades before anybody else.”

3 Baird says “its taken what would be a criminal enterprise anyplace else in the country and  
4 turned it into a profitable business model.”

5 Baird: “The town is all about people saying-- what do you know that I don't know. This is  
6 the currency of Washington, D.C. And it's that kind of informational currency that translates into  
7 real currency. Maybe it's over drinks maybe somebody picks up a phone. And says you know just to  
8 let you know it's in the bill. Trades happen. Can't trace 'em. If you can trace 'em, it's not illegal. It's  
9 a pretty great system. You feel like an idiot to not take advantage of it.” Public figures trading and  
10 manipulating the stock market are an “Enterprise” operating a Racketeering scam at the expense  
11 of citizens like Plaintiffs.  
12

13 **The fact remains: Judges and public officials get paid political bribes, in the modern**  
14 **world, not with manila envelopes under a table at a bar but with COVERT DARK MONEY**  
15 **STOCK MARKET ASSETS!** Recently the Supreme Court’s Roberts said “Judges Must be Ethical”  
16 after **Over 100 U.S. Judges Were Caught Violating Ethics Rules** (  
17 [https://www.theepochtimes.com/supreme-courts-roberts-says-judges-must-be-ethical-after-over-](https://www.theepochtimes.com/supreme-courts-roberts-says-judges-must-be-ethical-after-over-100-caught-violating-rule_4188383.html)  
18 [100-caught-violating-rule\\_4188383.html](https://www.theepochtimes.com/supreme-courts-roberts-says-judges-must-be-ethical-after-over-100-caught-violating-rule_4188383.html) )  
19

20  
21 The chief justice of the Supreme Court in his year-end report called on federal judges to **work hard**  
22 **to adhere to ethics rules after over 100 were caught violating a rule that requires judges recuse in**  
23 **any matter in which they have a personal financial interest.**  
24

25  
26 Chief Justice [John Roberts](#) cited ([pdf](#)) a Wall Street Journal investigation that uncovered violations  
27 by 131 federal judges across 685 cases between 2010 and 2018.  
28

1 The George W. Bush nominee portrayed the number of violations as small, noting that they  
2 represented less than three-hundredths of one percent of the 2.5 million civil cases filed in the  
3 district courts in years studied.

4  
5 “Let me be crystal clear: the Judiciary takes this matter seriously. We expect judges to  
6 adhere to the highest standards, and those judges violated an ethics rule. But I do want to put these  
7 lapses in context,” he said.

8  
9  
10 The wording drew a response by James Grimaldi, one of the Journal investigators, who said his  
11 team investigated tens of thousands of cases, not 2.5 million.

12  
13 “The Journal’s initial tally was an undercount; it was impossible because of the peculiarities of the  
14 judiciary’s financial-disclosure process and incomplete information available on case litigants,”  
15 Grimaldi wrote on Twitter, adding that Roberts’ comment “is technically accurate, the suggestion  
16 that we could review millions of cases is misleading.”

17  
18  
19 The Journal said Friday that subsequent reporting raised the tally to at least 950 violations.  
20 Roberts also pointed out that most of the judges involved only had one or two identified violations,  
21 painting those instances as likely “unintentional oversights” while singling out judges who had  
22 more violations or said they didn’t know of the ethics rule. Each judge is schooled on ethical duties,  
23 Roberts noted.

24  
25  
26 **“This context is not excuse. We are duty-bound to strive for 100% compliance because**  
27 **public trust is essential, not incidental, to our function. Individually, judges must**  
28 **be scrupulously attentive to both the letter and spirit of our rules, as most are. Collectively,**

our ethics training programs need to be more rigorous. That means more classtime, webinars, and consultations. But it also requires greater attention to promoting a culture of compliance, even when busy dockets keep judicial calendars full,” he added.

**(C) The appointment of Counsel by the Court;**

**MORE DETAILS RE: COURT APPOINTED ATTORNEY REQUEST**

NOW Plaintiffs JOHN DOE, *in pro per*, a non-lawyer, and files this REQUEST FOR **COURT APPOINTED ATTORNEY**. As the Plaintiffs in the above-captioned matter, I respectfully ask the Court to APPOINT AN ATTORNEY for me, the non-lawyer, Pro Se Plaintiffs in this case. I hereby affirm that: The Court has authority to appoint an attorney for the appellant. The appointment of legal counsel is not new to the judicial system. As this case represents a matter of legal rights for, not only, the Plaintiffs, but the public interest of the entire nation, against political corruption, it is in the best interest of all that it be properly represented on all sides. The Constitution has provided authority for the appointment of legal counsel by the Fifth and Sixth Amendment. For example, in *United States v. Dillon*,<sup>32</sup> the Court of Appeals for the Ninth Circuit upheld the appointment of an attorney against a constitutional challenge because the attorney "performs an obligation imposed upon him by the ancient traditions of his profession and as an officer of the court assisting the court in the administration of justice." *United States v. Dillon*, 346 F.2d, 633, 635 (9th Cir. 1965), cert. denied, 382 U.S. 1978 (1966); W 33 The court considered the duty to accept an appointment to be "a condition under which lawyers are licensed to practice" and to which "[a]n applicant for admission to practice law may justly be deemed [to have consented]." ' Id. at 636.

The Plaintiffs presents a Constitutional challenge before the Court. The Plaintiffs have a disability because the Social Security Administration says he does. In spite of his medical handicapped and

1 indigence, he is seeking the appointment of legal counsel. This court has the discretion to appoint  
2 legal counsel to represent the Plaintiffs.

3  
4 The appointment of counsel in both civil and criminal cases furthers the administration of justice by  
5 enhancing the fairness of judicial proceedings.<sup>53</sup>Diaz v. Chatterton, 229 F. Supp. 19, 23 (S.D. Cal.  
6 1964). Therefore, it is within the state's broad power There is no basis for distinguishing  
7 appointments in criminal cases from those in civil cases. In each situation, the fairness of the  
8 proceeding is promoted by the involvement of the attorney. Id.

9  
10 The appointment of counsel in both civil and criminal cases furthers the administration of justice by  
11 enhancing the fairness of judicial proceedings. The Plaintiffs are seeking justice and fairness in his  
12 judicial proceeding. The overall goal of the Plaintiffs are so that he can receive a fair and impartial  
13 trial against Defendants.

14  
15 Regardless of the nature of the case, the substantial state interest in assuring fairness in the  
16 administration of justice 120 would justify the states in providing legal assistance to litigants. The  
17 existence of state and federally funded programs to provide legal assistance to the poor in civil  
18 cases " affirms that such assistance serves a public purpose. If it did not, such ePlaintiff 42enditures  
19 would be improper exercises of governmental spending powers., in the main case filings, it is  
20 deeply discussed how Plaintiffs have been blockaded from access to legal support, by Defendants,  
21 who fear shame in the exposure of their crimes.

22  
23  
24 An affirmative finding that assistance of counsel will advance the fairness of the proceeding  
25 might be necessary, at least in civil cases, to ensure the applicability of the public service  
26 exception. See note 116 See Helvering v. Davis, 301 U.S. 619 (1937).

1 ***(D) Fee Waivers have been filed with the Court by Plaintiffs proving Plaintiffs full right to waiver***  
2 ***of all court fees;***

3  
4 ***(E) Plaintiffs requests Court-ordered demand to the FBI to provide the ‘FBI 302’ reports on***  
5 ***each of the named attackers, listed below;***  
6

7 Plaintiffs have had a multi-decade relationship as a credentialed investigator working with three  
8 letter agencies and has provided such proof in the supplied evidence packages.

9 Plaintiffs are aware of the FBI procedure of the filing of FBI ‘302’ Reports on subjects.

10 Plaintiffs have, on multiple occasions, via the DC and SFO FBI offices, requested that the FBI  
11 interview, observe and track the attackers and confirm the command and control communications  
12 authority authorizing, managing and financing their attacks and the paths of compensation of those  
13 attacks.  
14

15  
16 The FBI has had the full capacity and resources to easily confirm who ordered and operated the  
17 attacks on Plaintiffs via an interview and investigation of the Defendants hired attackers,  
18 specifically ***Nicholas Guido Denton, John Herrman, Gabriel Darbyshire, Patrick George, Jay***  
19 ***Carney, Robert Gibbs, Adrian Covert, Eric Schmidt, Larry Page, Perkins Coie, John Cook, Elon***  
20 ***Musk, The Secretary of Energy Jennifer Granholm***, et. al; and those other parties listed within the  
21 main complaint. The FBI ‘302’ reports on those attackers is hereby requested, and a request for the  
22 Court to demand those reports is hereby requested for review by all parties concerned.  
23

24 Plaintiffs are aware of the FBI procedure of the filing of FBI ‘302’ Reports on subjects.

6 main complaint..

7  
8 The FBI ‘302’ reports on those attackers is hereby requested, and a request for the Court to  
9 demand those reports is hereby requested for review by all parties concerned.

10 **(G) Court ordered back payments from SSA from 2007 to today because public**  
11 **officials ordered blockade of Plaintiffs SSDI payments as political reprisal for whistle-**  
12 **blowing in 2007 as proven by Inspector General and attached Exhibits:**

14 Plaintiffs hereby places a plea before the Court for the Court to order the Social Security  
15 Administration to pay Plaintiffs back payments from SSA for SSDI from 2007 to today because, as  
16 proven in the Master Complaint, public officials, including White House staff and California  
17 Senators with intelligence agency access to government ‘dirty tricks’ teams, ordered the blockade of  
18 Plaintiffs SSDI payments as political reprisal for whistle-blowing in 2007 as proven by Inspector  
19 General and attached Exhibits in the Master Complaint. Some SSA officials now work for the  
20 charged Defendants. This illicit federal reprisal circumvention of Plaintiffs income cost him his  
21 house and all many of the damages listed, in detail, in the Master Complaint. It has been proven, in  
22 the evidence, that Senator’s Pelosi, Harris, Reid, Feinstein, and other senior public officials  
23 regularly order hacking, data manipulation and de-funding of political whistle-blowers. Dianne  
24 Feinstein’s staffer: Daniel Jones, is world known as the ‘CIA Master of Dirty Tricks’. In fact,  
25 Plaintiffs and his peers, previously won federal lawsuits, as detailed in the Master Complaint,  
26 proving that, “government agencies infected by corruption use their resources to put reprisal hit-  
27 jobs on citizens”. Any Senate aide can hack or manipulate SSA, DOE, HUD and other agency  
28 decision files within minutes and order ANY citizen to have their funds cut-off with a single phone

1 call. That happened in this case, as Plaintiffs, and federal evidence has sworn, certified and verified  
2 as to the veracity of such dirty tricks operations within the Government. Senator’s staff and family  
3 cohabited with Plaintiffs and revealed such tactics.

4  
5 **CLAIMS AND LIST OF CAUSES OF ACTION**

6  
7 **ALLEGATIONS COMMON TO ALL CAUSES OF ACTION**

8  
9 11. Plaintiffs are a law-abiding U.S Citizen of the United State of America.

10 12. Plaintiffs have worked as a Business Consultant for over 10 years.

11 13. Plaintiffs experience and expertise have allowed him to work for a variety of clients,  
12 including the U.S. federal government, the California State government, the New York  
13 State government, and several Fortune 100 corporations.

14 14. Defendant, the U. S. Government, and DOES 1-20, who are big tech oligarchs that  
15 are their political financier/beneficiaries, formed an organized crime, quid-pro quo, insider trading  
16 RICO violating, anti-trust law violating criminal “enterprise”. The Defendants are all entities that do  
17 business in, and engage in corruption in, the state of California.

18 15. The Plaintiffs have suffered emotional and financial distress including, but not  
19 limited to, emotional pain, suffering, mental anguish, humiliation, and hopelessness from  
20 the coordinated attacks and income blockades produced by the Defendants in reprisal for  
21 whistle-blowing, assisting law enforcement and placing superior products in the  
22 marketplace. ***Defendants are an illicit organized crime, felony-grade, covert market  
23 manipulation entity whose participants and ‘made members’ are named, individually,  
24 in the attached exhibits.***  
25  
26  
27  
28

1 16. The Plaintiffs seeks fair and equal justice in the Court of law and from Jury members  
2 considering the facts stated in this complaint and on the facts which will be discovered  
3 during the due process of civil discovery and the trial process.

4 **CAUSE OF ACTION FOR**  
5 **INTENTIONAL FRAUD**

6  
7 17. Plaintiffs repeats the allegations contained in Paragraphs 1 through 13 this compliant,  
8 by  
9 incorporation of and reference to said allegations, as if they were set forth in full herein.

10 18. Defendant committed Intentional Fraud under the laws of the state of California and the  
11 United States against Plaintiffs by their actions as detailed in this full document including  
12 it's attached EXHIBITS.

- 13  
14 A. There was a misrepresentation which was false, concealment, or nondisclosure:  
15 B. There was knowledge of the falsity.  
16 C. There was an intent to defraud.  
17 D. There is justifiable reliance.  
18 E. Damages

19 19. Defendant has harmed Plaintiffs because there was a false misrepresentation which was  
20 false, and they concealed and failed to disclose the true facts.

21 20. Defendant had knowledge of the falsity.

22 21. There was an intent by Defendant to defraud Plaintiffs.

23 22. Plaintiffs was justified in relying upon the information of Defendant.

24 23. Plaintiffs are entitled to damages.

55. Plaintiffs repeats the allegations contained in Paragraphs 1 through 20 this compliant, incorporation of and reference to said allegations, as if they were set forth in full herein under the laws of the state of California and the United States against Plaintiffs by the following actions:.

Sandia National Labs, A U.S. Government facility, showed Plaintiffs a secret display inside of Sandia National labs that duplicated Plaintiffs federal government patent issued energy technology. The copy cat device had been built by General Motors, who had gotten the Technology from Plaintiffs application data to the U.S. Department of Energy. On another occasion, Ford Motor Company’s director of Technology contact Plaintiffs to say that she was leaving Ford and wanted to “help” Plaintiffs with his Energy Dept and DOT funding applications. Afterwards, her Linkedin in profile and co-workers revealed that she had been working for Ford Motor Company the whole time as a government advisor. The CIA’s In-Q-Tel asked Plaintiffs to “help” them and then copied his technology, gave it to their Commotion group and hacked Plaintiffs servers to shut off his version and ePlaintiff 42and theirs.

21 **Representative (Albeit not Exclusive) Predicate Acts**

22 67. The following predicate acts, described in brief below, are each alleged as if set forth  
23 above and otherwise incorporated fully therein under the laws of the state of California and  
24 the United States against Plaintiffs as detailed in this full document including it's attached  
25 EXHIBITS.  
26

27  
28 **CAUSE OF ACTION FOR**

**Acts or Threats Involving Bribery**

1  
2  
3 68. Plaintiffs repeats and re-alleges each and every allegation of the foregoing paragraphs as  
4 if fully set forth herein under the laws of the state of California and the United States  
5 against Plaintiffs as detailed in this full document including it's attached EXHIBITS.

6 69. Bribery, as applied to the Tech Cartel here, involves both acts and threats, and implicates  
7 those bribing as well as those defendants being bribed;

8 70. In the context of ongoing investigations with respect to the Tech Cartel, Defendants  
9 exchanged influence for self-enrichment for themselves, their family, their fake  
10 "Foundations", and to seek revenge against whistle-blowers and, thereby, further their  
11 deviant ambitions;

12 71. A number of Defendants were "public officials" at the time(s) they were bribed, in that  
13 they were an officer acting on behalf of the United States and performing "official acts"  
14 in their official capacity as United States officials who engaged in insider trading and  
15 stock bribes;

16 72. The Tech Cartel, primarily through front entities directly and indirectly, corruptly gave,  
17 offered or promised money and in-kind assistance during Defendants tenure as  
18 government officials with the intent to influence myriad official acts or omissions by  
19 those officials;

20 73. The Tech Cartel, primarily through fake charities and surrogates, directly and indirectly,  
21 corruptly gave, offered or promised money and in-kind assistance during Defendants  
22 tenure as public officias, to influence them to commit or aid in committing, or collude in  
23 or allow, myriad fraud, or provide the opportunity for the commission of massive fraud  
24 upon the United States;

25 74. All transactions of or involving the fake Foundations alleged above, and in particular that  
26 involving Uranium One and litium mines and those officials intentional omission in not  
27 bringing the grave danger to the national security caused by Russian bribery in order to  
28 stockpile uranium when the Defendants were engaging with Russia in a *quid pro quo*, are

27  
28

acts involving bribery directly attributable to the Tech Cartel;

75. The Tech Cartel directly and indirectly, corruptly gave, offered or promised money and in-kind assistance to induce Public officials to do or omit acts in violation of their lawful duty;

76. Being a public official, directly and indirectly, corruptly demanded, sought, received, accepted or agreed to receive or accept things of value personally or for fiduciary persons of their fake Foundations, in return for being influenced in the performance of any official act, being influenced to commit or aid in committing, or to collude in, or allow, any fraud, or make opportunity for the commission of any fraud, on the United States, or being induced to do or omit to do any act in violation of her official duty;

77. The Tech Cartel, directly or indirectly, corruptly gave, offered, or promised things of value to numerous persons or offered or promised such persons to give things of value to any other person or entity, with intent to influence the testimony under oath or affirmation of such first-mentioned person as a witness upon a trial, hearing, or other proceeding, before any court, any committee of either House or both Houses of Congress, or any agency, commission, or officer authorized by the laws of the United States to hear evidence or take testimony, or with intent to influence such person to absent himself therefrom;

78. Numerous Tech Cartel surrogates named herein, directly or indirectly, corruptly demanded, sought, received, accepted or agreed to receive or accept anything of value personally or for any other person or entity in return for being influenced in testimony under oath or affirmation as a witness upon any such trial, hearing, or other proceeding, or in return for absencing himself therefrom;

1 79. Tech Cartel surrogates Holder, Comey, Mueller, Rosenstein, Lynch, Mills, Abedin,  
2 Strzok, Blumenthal, and other government officials so cited herein, it is alleged, are  
3 responsible as if they were named defendants as they actively participated in and  
4 furthered the objectives and financial gain of the Tech Cartel, while injuring Plaintiffs in  
5 their business through their participation as surrogates in the Tech Cartel;  
6

7 80. Public official Defendants otherwise than as provided by law for discharge of official  
8 duty, and during the time they were “former public officials”, directly or indirectly  
9 demanded, sought, received, accepted or agreed to receive or accept things of value  
10 personally for or because of any official act to be performed by them;  
11

12 81. Defendants Brock and the Tech Cartel, directly or indirectly gave, offered or promised  
13 things of value to public officials, *both* as a public official and as a former public official,  
14 because of official acts to be performed by those officials;  
15

16 82. Defendants Brock, Soros and the Tech Cartel, directly or indirectly, gave, offered or  
17 promised things of value to Hillary Clinton, Cheryl Mills, Huma Abedin, John Podesta  
18 and others who have lied under oath, for or because of their testimony under oath or  
19 affirmation given or to be given by such person as a witness upon a trial, hearing, or other  
20 proceeding, before any court, any committee of either House or both Houses of Congress,  
21 or any agency, commission, or officer authorized by the laws of the United States to hear  
22 evidence or take testimony, or for or because of such person’s absence therefrom;  
23

24 83. The Tech Cartel was aided and abetted by the Obama FBI in assisting Russia in obtaining  
25 *control* of the U.S. lethal uranium market, to this day, in exchange for a currency transfer  
26 laundered through Russian intelligence to the Clinton Foundation while Hillary Clinton  
27 was Secretary of State;  
28

1 84. William Clinton, on behalf of the Tech Cartel, and aiding his family and Hillary Clinton’s  
2 presidential aspirations, held secret talks with Arkady Dvorkovic – a leading consigliere  
3 to then-Russian President (and Putin puppet) Medvedev, in order to further the Uranium  
4 One *quid pro quo* bribery and fund the Tech Cartel into perpetuity;

5  
6 85. Hillary Clinton, Cheryl Mills, Huma Abedin, John Podesta and others who have lied  
7 under oath, directly or indirectly, have demanded, sought, received, accepted, or agreed to  
8 receive or accept things of value personally for or because of their testimony under oath  
9 or affirmation given or to be given by such person as a witness upon any such trial,  
10 hearing, or other proceeding, or for or because of such person’s absence therefrom;

11  
12 86. Tech Cartel participants and surrogates violating the bribery provisions of federal law did  
13 so knowing and intending to use extortion to achieve their illicit goals – by among other  
14 things threatening to reveal the prior acceptance or solicitation of bribes – and thus form  
15 of conspiracy (often involving Tech Cartel collaboration in facilitating these threats  
16 against those whose entire careers and lives would be impacted) constitutes another form  
17 of Tech Cartel predicate wrongdoing, as set forth below, in the form of acts or threats  
18 involving extortion;

19  
20 87. With relation to other acts of obstruction of justice contained herein, the Tech Cartel used  
21 bribery in order to obstruct justice;

22  
23 88. With relation to bribery, the Tech Cartel also committed commercial bribery on the State  
24 level in States in which bribery of public officials constitutes a violation;

25  
26 89. The court and jury must also consider certain “special” bribery statutes applicable to this  
27 Tech Cartel, *e.g.*, bribery incident to appointment to public office, and with regard to  
28 William and Hillary Clinton, George Soros and David Brock bank transactions;

90. On January 12, 2018, the Uranium One Tenex/Tenem bribery, Fraud and Money Laundering scheme was finally fully revealed, as a result of nearly eight years of obstruction by Tech Cartel surrogates Holder, Lynch, Mueller, Comey and Rosenstein and concomitant illicit pressure placed upon Assistant United States Attorney (and former CIA Officer) David I. Salem;

91. Also, with respect to bribery – especially that involving an officer of the United States or the special case of a former officer who is anticipated to ascend to the presidency – the federal Travel Act provides that whoever travels in interstate or foreign commerce with the intent to promote, establish, carry on or facilitate the promotion, establishment, or carrying on of any unlawful activity and thereafter performs or attempts to perform *any unlawful activity* (including bribery in violation of U.S. law, or other federal violations discussed herein) shall be guilty of a crime;

92. The Tech Cartel also bribed, or attempted to bribe, members of the Obama administration, and Obama himself, utilizing collusion between Hillary Clinton, Hillary for America, Soros and the DNC spending in excess of \$10,000,000.00 to influence the 2016 presidential general election by funding the Russian SVR-sourced dossier that the Obama administration then used to mislead federal judges and surreptitiously surveil an opposition party and private U.S. citizens – which upon information and belief included but was certainly not limited to Plaintiffs whistle-blowers;

**CAUSE OF ACTION FOR**

**Acts or Threats Involving Extortion**

93. Plaintiffs repeats and re-alleges each and every allegation of the foregoing paragraphs as if fully set forth herein as detailed in this full document including it’s attached EXHIBITS.

21  
22  
23  
24  
25  
26  
27  
28

94. The Tech Cartel engaged in extortion and attempted extortion affecting interstate or foreign commerce, having done so “in any way or degree,” and conspired to do so amongst themselves and with the Tech Cartel surrogates and participants;

95. In order to prevail on a charge of extortion, “the United States need only show that a public official [such as Secretary Clinton] obtained a payment to which she was not entitled, knowing that the payment was made in return for official acts.”;

96. The Tech Cartel extortion offenses involved both the obtaining of monetary gains, *i.e.*, property, “under color of official right” by Defendants as well as the obtaining of property by numerous Tech Cartel participants with the victim’s “consent, induced by wrongful use of threatened force, violence or fear” – the extortion of others by Defendants, in order for her to be charged, does not require that she took steps to induce the extortion;

97. “It is not a defense to a charge of extortion under color of official right that the defendant could also have been convicted of bribery.” *Evans v. United States*, 504 U.S. 255 (1992);

98. Extortion reaches both the obtaining of property “under color of official right” by public officials and the obtaining of property by private actors with the victim’s “consent, induced by wrongful use actual or threatened force, violence or fear,” *including fear of economic harm*;

99. As part of the pattern of racketeering, and in addition to the foregoing, Tech Cartel principals and surrogates also used a “carrot and a stick” to imply threats of pecuniary harm if Democratic donors did not support, *i.e.*, max out contributions including to Brock entities and to be laundered through State party organizations, to Hillary Clinton’s

1 presidential bid in 2016 – while holding out the prospect of favors and access “once  
2 Hillary Clinton became president”;

3  
4 100. Similarly, the Hobbs Act, 18 U.S.C. §1951, prohibits actual or attempted extortion  
5 affecting interstate or foreign commerce, and also standing alone proscribes conspiracy to  
6 commit extortion without reference to the federal conspiracy statute; further, while proof  
7 of racketeering as an element of Hobbs Act offenses is not required, any violation of the  
8 Hobbs Act, as here, is part of a “pattern of racketeering activity” for purposes of  
9 prosecution under the RICO statute;

10  
11 101. Others involved in extortion include Tech Cartel surrogates Comey who while he  
12 was FBI Director, along with former FBI Deputy Director McCabe, with assistance from  
13 Yates, Brennan and Clapper, attempted to blackmail new competitors by subtly  
14 threatening him and inferring that the fake “competitors dossier” contained information  
15 that had some basis in fact;

16  
17 **CAUSE OF ACTION FOR**

18 **Acts or Threats Involving Murder**

19  
20 102. Plaintiffs repeats and re-alleges each and every allegation of the foregoing  
21 paragraphs as if fully set forth herein as detailed in this full document including it’s  
22 attached EXHIBITS.

23  
24 103. According to former Democratic National Committee Chairperson (acting) Donna  
25 Brazile, she felt threatened by the Clintons, implying they would have her murdered if  
26 she revealed the any involvement in the hack of DNC servers that did not fit the Tech  
27 Cartel narrative of “Russian involvement” prior to the 2016 presidential election;

28

1 104. Brazile apparently felt further threatened that the Clintons might subject her to  
2 bodily harm (or have her murdered) if she revealed the Tech Cartel role in “rigging” the  
3 Democratic Party primary in favor of Secretary Clinton;

4  
5 105. Brazile’s fear was rationalized, according to her, by the murder of DNC employee  
6 Seth Rich, whose murder is to this day unresolved. In addition, this document, above, as  
7 well as the document: [THE MURDERS AND SUSPICIOUS DEATHS](#)  
8 [IN THIS CASE.html](#) list a number of other suspected murders by Tech Cartel  
9 operatives;

10  
11 106. In an unrelated lawsuit, it is alleged but strongly contested that the parents of Seth  
12 Rich knew that their son downloaded 44,053 inculpatory Tech Cartel emails and 17,761  
13 email attachments from the DNC server and “sold them to Wikileaks”, prior to the  
14 murder of Seth Rich;

15  
16 107. Upon information and belief, computer forensics from July 5, 2016 indicate that  
17 DNC emails implicating the Tech Cartel were copied by an insider (someone affiliated  
18 with the DNC) via USB and not hacked via external actors; DNC professional staff  
19 member Seth Rich was murdered five days later on July 10, 2016;

20  
21 108. In late July of 2016, the FBI announced it would investigate the DNC emails  
22 revealed by Wikileaks, and that Tech Cartel surrogate Peter Strzok would lead the  
23 investigation;

24  
25 109. On or around August 15, 2016, FBI investigator and Tech Cartel surrogate Strzok  
26 texted his paramour, FBI senior lawyer and Tech Cartel surrogate Lisa Page, about  
27 needing an "insurance policy" against a competitors presidency;

28

1 110. On June 15, 2017, Obama DHS Secretary Jeh Johnson testified under oath before  
2 Congress that the DNC refused to turn over its server as demanded so the United States  
3 Government could investigate whether the recently-murdered Seth Rich may have  
4 provided evidence of Tech Cartel malfeasance to Wikileaks;

5  
6 **CAUSE OF ACTION FOR**

7 **Acts Indictable Relating to Bribery**

8  
9 111. Plaintiffs repeats and re-alleges each and every allegation of the foregoing  
10 paragraphs as if fully set forth herein; as detailed in this full document including it's  
11 attached EXHIBITS.

12  
13 112. Bribery, as applied to the Tech Cartel here, involves both acts and threats, and  
14 implicates those bribing as well as those defendants being bribed;

15  
16 113. Many Defendants were “public officials” at the time(s) they were bribed, in that they  
17 were an officer acting on behalf of the United States and performing “official acts” in  
18 their official capacity;

19  
20 114. In the context of ongoing investigations with respect to the Tech Cartel, Defendant  
21 public officials exchanged influence for self-enrichment for themselves and their family,  
22 to seek revenge against their enemies such as whistle-blowers, and to further their  
23 political ambitions;

24  
25 115. The Tech Cartel directly and indirectly, corruptly gave, offered or promised money  
26 and in-kind assistance during Defendant public officials tenure with the intent to  
27 influence myriad official acts or omissions by Defendant public officials;

28

1 116. The Tech Cartel, through Defendant public officials, directly and indirectly,  
2 corruptly gave, offered or promised money and in-kind assistance during Defendant  
3 public officials tenure , to influence Defendant public officials to commit or aid in  
4 committing, or collude in or allow, any fraud or make the opportunity for the commission  
5 of massive fraud upon the United States Government;

6  
7 117. The Tech Cartel, through Defendant public officials, directly and indirectly,  
8 corruptly gave, offered or promised money and in-kind assistance during Defendant  
9 public officials tenure to induce Defendant public officials to do or omit acts in violation  
10 of their lawful duty;

11  
12 118. Being a public official, directly and indirectly, corruptly demanded, sought, received,  
13 accepted or agreed to receive or accept things of value personally or for Defendant public  
14 officials in return for being influenced in the performance of any official act, being  
15 influenced to commit or aid in committing, or to collude in, or allow, any fraud, or make  
16 opportunity for the commission of any fraud, on the United States, or being induced to do  
17 or omit to do any act in violation of their official duty;

18  
19 119. The Tech Cartel, directly or indirectly, corruptly gave, offered, or promised things of  
20 value to numerous persons – including Defendant public officials– or offered or promised  
21 such persons to give things of value to any other person or entity, with intent to influence  
22 the testimony under oath or affirmation of such first-mentioned person as a witness upon  
23 a trial, hearing, or other proceeding, before any court, any committee of either House or  
24 both Houses of Congress, or any agency, commission, or officer authorized by the laws of  
25 the United States to hear evidence or take testimony, or with intent to influence such  
26 person to absent himself therefrom;

27  
28 120. Myriad Tech Cartel surrogates named herein, directly or indirectly, corruptly

1 demanded, sought, received, accepted or agreed to receive or accept anything of value  
2 personally or for any other person or entity in return for being influenced in testimony  
3 under oath or affirmation as a witness upon any such trial, hearing, or other proceeding,  
4 or in return for absenting himself therefrom;

5  
6 121. Tech Cartel surrogates Holder, Comey, Mueller, Rosenstein, Lynch, Mills, Abedin,  
7 McCabe, Strzok, Blumenthal, and other government officials so cited (and unknown  
8 named) herein, it is alleged, are responsible as if they were named defendants as they  
9 actively participated in and furthered the objectives and financial gain of the Tech Cartel,  
10 while inalterably injuring Plaintiffs in his business through their participation as  
11 surrogates in the Tech Cartel;

12  
13 122. William and Hillary Clinton, otherwise than as provided by law for discharge of  
14 official duty, and during the time they were “former public officials”, directly or  
15 indirectly demanded, sought, received, accepted or agreed to receive or accept things of  
16 value personally for or because of any official act to be performed by Hillary Clinton  
17 were she to be elected President;

18  
19 123. Defendants Brock and the Tech Cartel, directly or indirectly gave, offered or  
20 promised things of value to Hillary Clinton, as a former public official, for of because of  
21 official acts to be performed by Hillary Clinton were she to be elected President – many  
22 such things of value were derived from other illegal activities of the Tech Cartel  
23 defendants, surrogates, and participants – and in the process conspired to misuse for illicit  
24 Tech Cartel purposes the Democratic Party and by and through its putative president,  
25 Hillary Clinton;

26  
27 124. Defendants Brock and the Tech Cartel, directly or indirectly, gave, offered or  
28 promised things of value to Hillary Clinton, Cheryl Mills, Huma Abedin, John Podesta

1 and others who have lied under oath, for or because of their testimony under oath or  
2 affirmation given or to be given by such person as a witness upon a trial, hearing, or other  
3 proceeding, before any court, any committee of either House or both Houses of Congress,  
4 or any agency, commission, or officer authorized by the laws of the United States to hear  
5 evidence or take testimony, or for or because of such person’s absence therefrom;

6  
7 125. Hillary Clinton, Cheryl Mills, Huma Abedin, John Podesta and others who have lied  
8 under oath, directly or indirectly, have demanded, sought, received, accepted, or agreed to  
9 receive or accept anything of value personally for or because of their testimony under  
10 oath or affirmation given or to be given by such person as a witness upon any such trial,  
11 hearing, or other proceeding, or for or because of such person’s absence therefrom;

12  
13 126. The Tech Cartel and Clintons were aided and abetted by the Obama FBI and DoJ in  
14 assisting Russia in obtaining control of the U.S. lethal uranium market, in exchange for a  
15 currency transfer laundered through the Russian SVR/FSB to the Clinton Foundation  
16 while Hillary Clinton was Secretary of State;

17  
18 127. Neither Mueller, Holder nor Rosenstein have ever taken any action to unveil the  
19 Clinton/Tech Cartel cover-up of Tech Cartel attempts to provide worldwide control of  
20 lethal uranium to Russia and their known illicit end users;

21  
22 128. William Clinton, on behalf of the Tech Cartel, and aiding his family and Hillary  
23 Clinton’s presidential aspirations (including revenge against Plaintiffs whistle-blowers,  
24 his business and life), held secret talks with Arkady Dvorkovic – a leading consigliere to  
25 then-Russian President (and Putin “puppet”) Medvedev, in order to further the seditious  
26 Uranium One *quid pro quo* bribery and subsidize the Tech Cartel into perpetuity;

27  
28 129. Tech Cartel participants and surrogates violating the bribery provisions of federal

1 law did so knowing and intending to use extortion and obstruction of justice to achieve  
2 their illicit goals and thus formed a conspiracy (often involving Tech Cartel collaboration  
3 in facilitating these threats against those whose entire careers and lives would be  
4 impacted negatively) – this in and of itself constitutes another vicious form of Tech Cartel  
5 predicate wrongdoing in the form of acts or threats involving extortion;

6  
7 130. The Tech Cartel principals may be indicted for numerous State offenses, as well,  
8 including acts or threats involving, as alleged here, bribery, extortion, murder – including  
9 their attempts, conspiracies, and solicitations to commit any of these offenses (as is the  
10 case with similar Federal offenses);

11  
12 131. Such Tech Cartel State statutory offenses may constitute a proper RICO predicate  
13 provided it substantially conforms to the essential elements under the prevailing  
14 definition for the offense when RICO was enacted in 1970 – virtually all Tech Cartel  
15 State offenses meet the essential element threshold even though the State statute used as a  
16 predicate need not use the same labels or titles as the listed predicate offenses, but still  
17 may be an offense as described in Section 1961(1)(A);

18  
19 132. It is alleged here and can easily be proven that for each Federal predicate offense, the  
20 Tech Cartel has committed myriad counts of State offenses containing the essential  
21 elements of the Federal predicate act;

22  
23 133. The Tech Cartel has committed thousands of Federal and State predicate acts, and  
24 Plaintiffs alleges that this paragraph applies as if incorporated directly therein to each and  
25 every other paragraph and any other section of this complaint;

26  
27 134. For purposes of this complaint, it is alleged that each State predicate offense as  
28 described above was committed in each of the fifty United States, and U.S. territories,

1 during the duration of three national presidential campaigns, and involving use of the  
2 mail and wires;

3  
4 **CAUSE OF ACTION FOR**  
5 **Acts Indictable Relating to Mail Fraud**  
6

7 135. Plaintiffs repeats and re-alleges each and every allegation of the foregoing  
8 paragraphs as if fully set forth herein; as detailed in this full document including it's  
9 attached EXHIBITS.

10  
11 136. Senior leadership of the FBI and DoJ criminally mishandled the content of the  
12 "competitors dossier", thereby obstructing justice in all manners set forth herein, and  
13 engaging in mail and wire fraud, in all manners set forth herein – in so doing, the Tech  
14 Cartel and its surrogates engaged in a corrupt conspiracy involving commissioned  
15 officers of the United States including the misleading of at least one Article III federal  
16 judge;

17  
18 137. The Defendants will be charged and convicted of multiple related violations of law  
19 which form a pattern and practice and which violations are each potentially punishable as  
20 a felony constituting mail fraud;

21  
22 138. Defendants acted in criminal violation of the federal mail fraud statute under 18  
23 U.S.C. § 1341 which provides "whoever, having devised or intending to devise any  
24 scheme or artifice to defraud, or for obtaining money or property by means of false or  
25 fraudulent pretenses, representations or promises, or to sell, dispose of, loan, exchange,  
26 alter, give away, distribute, supply, or furnish or procure for unlawful use any counterfeit  
27 or spurious coin, obligation, security, or other article, or anything represented to be or  
28 intimated or held out to be such counterfeit or spurious article, for the purpose of

1 executing such scheme or artifice or attempting so to do, *places in any post office or*  
2 *authorized depository for mail matter, any matter or thing whatever to be sent or*  
3 *delivered by the Postal Service, or deposits or causes to be deposited any matter or thing*  
4 *whatever to be sent or delivered by any private or commercial interstate carrier, or takes*  
5 receives therefrom, any such matter or thing, or knowingly causes to be delivered by mail  
6 or such carrier according to the direction thereon, or at the place at which it is directed to  
7 be delivered by the person to whom it is addressed, any such matter or thing, shall be fine  
8 under this title or imprisoned not more than 20 years, or both [...];  
9

10 139. There are two essential elements in mail fraud under Section 1341, both of which the  
11 Tech Cartel has satisfied tens of thousands of times – (1) having devised or intending to  
12 devise a scheme to defraud (or to perform specified fraudulent acts), and (2) use of the  
13 “mail” for the purpose of executing, or attempting to execute, the scheme (or specified  
14 fraudulent acts);  
15

16 140. The above-noted co-conspirators further obstructed justice via mail and wire by  
17 instructing competitors dossier author Steele to publicly claim that said competitors  
18 dossier established “collusion” between the campaign of private citizen Donald J.  
19 competitors and the “Russian Government” – these co-conspirators also obstructed justice  
20 via mail and wire in furthering collusion between Fusion GPS and the Russian SVR/FSB;  
21

22 141. Libertarian U.S. Senator Rand Paul has confirmed that this conspiracy by wire and  
23 mail is “worse than Watergate” – citing “high-ranking” Obama officials (and Tech Cartel  
24 surrogates) who colluded to prevent the election of competitors;  
25

26 142. The Tech Cartel participants often communicated via Federal ePlaintiff 42ress, UPS,  
27 and similar commercial mail delivery carrier, and Tech Cartel surrogate Strzok arranged  
28 to mislead federal judge Rudolph Contreras by mail, wire and in private settings generally

1 reserved for close, intimate friends;  
2

3 143. Tech Cartel surrogate Brennan, in order to swing the 2016 election to Hillary  
4 Clinton, and in concert with Clapper, Comey and other surrogates, used the international  
5 mails (and wires) to communicate with co-conspirators in the British intelligence  
6 services;

7  
8 144. Tech Cartel surrogates Sally Caroline Yates (former Deputy Attorney General),  
9 Loretta Elizabeth Lynch (former Attorney General) and Samantha Jane Power (former  
10 United States Ambassador to the United Nations) also conspired with senior FBI officials  
11 and Tech Cartel surrogates Strzok, Comey and McCabe in use of the mails and wires to  
12 further a criminal conspiracy to obstruct justice – Power also utilized Twitter to threaten  
13 competitors;

14  
15 145. Attorney General Lynch conspired via mail and wire with Tech Cartel surrogate  
16 Comey to mislead nationwide law enforcement that the espionage investigation of Hillary  
17 Clinton was to be referenced only as a “matter”;

18  
19 146. As is the case with wire fraud, RICO has always had a relaxed standard with respect  
20 to the particularity requirements of Tech Cartel mail and wire fraud – especially when the  
21 Tech Cartel, as here, has engaged in a massive cover up (revealed only in small part by  
22 “Wikileaks”) and where there are tens (if not hundreds) of thousands of putative counts of  
23 mail fraud by the Tech Cartel and its surrogates;

24  
25 147. Relevant Tech Cartel principals not only can be, but will be, indicted for thousands  
26 of counts of mail fraud;

27  
28 148. Defendants devised or intended to devise a scheme or artifice meant to defraud

1 and/or for obtaining money or property from illicit payments disguised as “donations”;

2  
3 149. Defendants utilized false or fraudulent pretenses, representations, and/or promises in  
4 order to defraud and/or obtain money from illicit payments disguised as “donations”

5  
6 150. In order to achieve or attempt to achieve the fraud described in the preceding  
7 paragraphs, Defendant sent correspondence and other documents that were sent or  
8 delivered by the Postal Service and by email (or by private service such as UPS, Federal  
9 ePlaintiff 42ress, and the like);

10  
11 151. Hillary Clinton and the Tech Cartel, delivered by mail and wire to the United States  
12 Senate Foreign Relations Committee, the CFIUS, and to the Federal Bureau of  
13 Investigation in 2017, as herein noted and otherwise, make false statements under oath  
14 and penalty of perjury, concerning bribery committed by herself, William Clinton and the  
15 Tech Cartel, concerning companies (foreign and domestic) and foreign countries with  
16 direct connections to the Clinton Foundation, CGI, and CGEP, and in relation to the  
17 corrupt and ongoing Uranium One transactions directly enabled by the Clinton Tech  
18 Cartel bribery, did thereby obstruct justice as the United States attempted (and attempts)  
19 to determine the Tech Cartel role in providing U.S. lethal uranium stocks to hostile  
20 foreign actors;

21  
22 152. Secretary Clinton withheld vital information for which she was responsible for  
23 providing to the chief law enforcement officer of the United States, President Barack  
24 Obama, thereby obstructing justice, and furthered such obstruction by wire and mail in  
25 covering up such malfeasance and endangering the security of the United States with  
26 respect to lethal uranium being provided to hostile actors in exchange for bribes;

27  
28 153. Each violation of 18 U.S.C. § 1341, as aggravated here, is a felony punishable by 30

1 years of imprisonment and a fine of \$1,000,000 United States dollars; 6. Acts Indictable  
2 Relating to Wire Fraud

3  
4 154. Plaintiffs repeats and re-alleges each and every allegation of the foregoing  
5 paragraphs as if fully set forth herein;

6  
7 155. The elements of wire fraud under Section 1343 directly parallel those of the mail  
8 fraud statute, but require the use of an interstate phone call or electronic communication  
9 made in furtherance of the scheme – all of which the Tech Cartel has satisfied tens (if not  
10 hundreds) of thousands of times during the relevant period;

11  
12 156. The elements in this Circuit require proof that the wire fraud (1) involves a scheme  
13 to defraud; and (2) the use of an interstate wire communication to further the scheme;

14  
15 157. Each and every time any member of the Tech Cartel used any interstate wire  
16 communication in furtherance of their scheme, the statute at issue was violated – and at  
17 the core of this Tech Cartel operational scheme is collaboration among Tech Cartel  
18 principals and surrogates using the telephone, emails (millions of which remain to be  
19 discovered, according to a subpoena for documents issued by the United States House of  
20 Representatives Committee on the Judiciary to the United States Department of Justice on  
21 or around March 21, 2018), text messages, and similar electronic communications – there  
22 are 2.1 million potentially inculpatory and discoverable communications currently under  
23 subpoena relating to Tech Cartel principals, surrogates, and participants;

24  
25 158. As is the case with wire fraud, RICO has always had a relaxed standard with respect  
26 to the particularity requirements of Tech Cartel mail and wire fraud – especially when the  
27 Tech Cartel, as here, has engaged in a knowing, immense cover-up (revealed only in  
28 small part by “Wikileaks” based upon a “hack” and/or insider theft of the indiscrete,

1 inculpatory emails of Tech Cartel principal John Podesta and Tech Cartel surrogates) and  
2 where there are tens (if not hundreds) of thousands of putative counts of wire fraud by the  
3 Tech Cartel and its surrogates;

4  
5 159. Relevant Tech Cartel principals not only can be, but will be, indicted for thousands  
6 of counts of wire fraud;

7  
8 160. The Defendants will be charged and convicted of multiple, related violations of law  
9 which form a pattern and practice and which violations are each potentially punishable as  
10 a felony constituting wire fraud;

11  
12 **CAUSE OF ACTION FOR**

13 **Defendants acted in criminal violation of the federal wire fraud statute under 18 U.S.C. §1343**  
14 ...which provides “whoever, having devised or intending to devise any scheme or artifice to defraud,  
15 or for obtaining money or property by means of false or fraudulent pretenses, representations, or  
16 promises, transmits or causes to be transmitted by means of wire, radio, or television  
17 communication in interstate or foreign commerce, any writings, signs, signals, pictures, or sounds  
18 for the purpose of executing such scheme or artifice, shall be fined under this title or imprisoned not  
19 more than 20 years, or both. [...]; Proof is provided as detailed in this full document including it’s  
20 attached EXHIBITS.

21  
22 161. Defendants devised or intended to devise a scheme or artifice meant to defraud  
23 and/or obtain money or property from illicit payments disguised as donations and other  
24 forms of gratuities;

25  
26 162. Defendants utilized false or fraudulent pretenses, representations, and/or promises in  
27 order to defraud and/or obtain money from illicit payments disguised as donations and  
28 other forms of gratuities;

1  
2  
3  
4  
5  
6  
7  
8  
9  
10  
11

24  
25  
26  
27  
28

163. The Tech Cartel also uses surrogates such as Brennan to openly prevaricate on traditional and new media platforms: for example, Brennan has openly and repeatedly, at the instruction of the Tech Cartel, shown his prejudice toward the current President of the United States through Twitter, such as the following vitriol on March 17, 2018: “When the full extent of your venality, moral turpitude, and political corruption becomes known, you will take your rightful place as a disgraced demagogue in the dustbin of history”, and on March 21, 2018, Brennan implied on MSNBC’s “Morning Joe” that he (Brennan) has knowledge that the President is being blackmailed by a foreign sovereign – Brennan also is a paid contributor of MSNBC, raising the plausible inference of Tech Cartel wire fraud and obstruction of justice when Tech Cartel surrogate Brennan knowingly and willfully prevaricates about these and related topics;

164. Brennan has been accused of unconstitutional behavior, and of lying under oath, by Senate Democratic leadership during the presidency of Barack Obama – entirely undermining the credibility of Tech Cartel surrogate John Brennan;

165. As an example, Brennan’s misleading briefing of then-Senate Minority Leader Harry Reid (D-NV), on behalf of the Tech Cartel scheme of undermining competitors and committing fraud to the FISC, was contemporaneously portrayed by Reid as Brennan “having an ulterior motive” – this has led, in turn, to several separate ongoing investigations of Brennan by congressional oversight committees and the United States Department of Justice (and a great deal of curiosity by the United States District Court and Court of Appeals for the District of Columbia and District of Columbia Circuit, respectively, as to Brennan’s Tech Cartel role in committing fraud upon the FISC);

166. Brennan’s misleading briefing of Minority Leader Reid, as the Tech Cartel intended, provided cover for Christopher Steele’s false and unconfirmed reporting on competitors

1 to leak into public narrative by and through Reid’s demands placed upon Tech Cartel  
2 surrogates Comey, McCabe and Strzok to investigate, and led separately and directly to  
3 the DoJ committing a fraud upon the FISC;

4  
5 167. Tech Cartel surrogate Brennan, at the instigation of the Tech Cartel, provided the  
6 pretense predicate for the corrupt investigation when he carried out the above-noted fraud  
7 upon all three branches of government despite his May 23, 2017 testimony, under penalty  
8 of perjury, to the House Permanent Subcommittee on Intelligence that “I don’t know  
9 whether such collusion [or any cooperation] existed.”;

10  
11 168. On Tuesday, March 11, 2014, the then-chairwoman of the Senate Select Committee  
12 on Intelligence, Dianne Feinstein (D-CA), accused Brennan and the Central Intelligence  
13 Agency of a *catalog of cover-ups, intimidation and smears* aimed at investigators probing  
14 its role in a “un-American and brutal” program of post-9/11 detention and interrogation;

15  
16 169. Feinstein, an Obama administration loyalist, accused Brennan and the CIA of  
17 violating the United States Constitution and of criminal activity in its attempts to obstruct  
18 her committee’s investigations into the agency’s use of torture – Feinstein described the  
19 Brennan crisis as the “defining moment” for political oversight of the U.S. intelligence  
20 service. Feinstein and her family owned stock, services, suppliers, buildings and other  
21 profiteering resources in Tesla and Solyndra;

22  
23 170. Feinstein’s open public assault on Brennan and the CIA was “unprecedented”, based  
24 upon the unconstitutional and criminal behavior she and myriad Democrats lodged  
25 against John Brennan – who was openly accused of war crimes and surreptitiously spying  
26 without a warrant on Members of Congress and their staff(s);

27  
28 171. Feinstein was supported after her speech by the most senior Democrat and Chair of

1 the Senate Committee on the Judiciary, Senator Patrick Leahy (D-VT) and Mark Udall  
2 (D-CO) – who had

3 172. “directly pushed CIA director Brennan” to tell the truth about “misrepresentations  
4 about the CIA’s brutal and ineffective detention and interrogation program”, to no avail;

5  
6 173. Former CIA Chief of Station in Moscow, Daniel Hoffman, believed so strongly in  
7 the corruption of Tech Cartel surrogate Brennan that Hoffman conceded within  
8 competitors antagonist “The Cipher Brief” (led by CNN and Washington Post veterans)  
9 on Thursday, April 5, 2018 that Brennan’s attempts to undermine the government of  
10 competitors “played right into the hands of an adversary [Putin]” and that the Tech Cartel  
11 “partisanship [of Brennan] reached a new low ... and were shocking to intelligence  
12 officers” and Brennan caused “collateral damage” to the security of the United States;

13  
14 174. Tech Cartel surrogate Brennan, in order to swing the 2016 election to Hillary  
15 Clinton, and in concert with Clapper, Comey and other surrogates, used the international  
16 mails (and wires) to communicate with co-conspirators in the British intelligence  
17 services;

18  
19 175. Like Tech Cartel surrogate Brennan, defendants in the immediate matter transmitted  
20 or caused to be transmitted by means of wire, radio, or television communication in  
21 interstate or foreign commerce, writings, signs, signals, pictures, or sounds for the  
22 purpose of executing such scheme or artifice when they transmitted telephone and  
23 cellular telephone calls, documents, facsimiles, emails, instant messages, and other form  
24 of communications on behalf of the Tech Cartel operational scheme;

25  
26 176. Hillary Clinton and the Tech Cartel, by mail and wire to the United States Senate  
27 Foreign Relations Committee, the CFIUS (by commission and omission), and to the  
28 Federal Bureau of Investigation in 2016 and 2017, did as herein noted and otherwise,

1 make false statements under oath and penalty of perjury (and false statements when  
2 improperly not placed by Tech Cartel surrogate Strzok under oath concerning her  
3 violation of the espionage statutes), concerning bribery committed by herself, William  
4 Clinton and the Tech Cartel, concerning companies (foreign and domestic) and foreign  
5 countries with direct connections to the CF, CGI, and CGEP, and in relation to the  
6 corrupt and ongoing Uranium One transactions directly enabled by the Clinton Tech  
7 Cartel bribery, did thereby obstruct justice as the United States attempted (and attempts)  
8 to determine the Tech Cartel role in providing U.S. lethal uranium stocks to hostile  
9 foreign actors;

10  
11 177. The Tech Cartel also conspired with surrogates Comey, Strzok, McCabe, Page,  
12 Brennan and Clapper, among numerous other unknown named surrogates, to abuse the  
13 FISA surreptitious wire surveillance process to fraudulently deny one political party (the  
14 Republican Party, a nonprofit entity) the honest opportunity to prevail in a structured  
15 presidential political contest, and to use that fraud – by and through the most fraudulent  
16 political process on record – to further a significant objective of the Tech Cartel, *i.e.*,  
17 assure that Hillary Clinton became President of the United States in order to continue  
18 their Tech Cartel into perpetuity, and to destroy her “enemies” such as Officer whistle-  
19 blowers;

20  
21 178. Tech Cartel surrogate Brennan was particularly illicit in his desire to engage in Tech  
22 Cartel activity pursuant to the myriad scheme, having been involved in FISA abuse and  
23 malfeasance to assist Tech Cartel principal Hillary Clinton from the outset;

24  
25 179. A senior Obama State Department official, Victoria Nuland, by her own admission  
26 gave the “green light” to an FBI agent in 2016 to meet with dossier writer Christopher  
27 Steele, when the group met in Steele’s London office, touching off an illicit relationship  
28 that would fuel the ongoing investigation into possible Donald competitors-Russia

1 election collusion and intentionally leading to the Democratic Party-financed dossier to  
2 mislead judge into approving a year of counterintelligence, surreptitious and illegal  
3 surveillance in 2016 and 2017 – and to add oxygen to the nascent flames of this Tech  
4 Cartel treasonous scheme, John O. Brennan, Mr. Obama’s CIA director, worked behind  
5 the scenes before the 2016 presidential election to get his apprehensions about  
6 competitors (who was opposing Brennan’s chosen political candidate) and Russia (which  
7 Brennan knew could blackmail Hillary Clinton for eight years were she to become  
8 president) into the news media via illegal leaks;

9  
10 180. These disclosures, including that Victoria Nuland, then at State, started the FBI-  
11 Steele marriage is contained in “Russian Roulette.”

12  
13 181. The FISA abuse set forth herein was illicitly utilized by Tech Cartel surrogates to  
14 obstruct justice – namely but not exclusively to obstruct the investigations (or refusal to  
15 investigate by Tech Cartel surrogates) the malfeasance of Hillary Clinton and related  
16 Tech Cartel surrogates (and their operational schemes) – and is thus alleged and  
17 incorporated into all Tech Cartel acts sounding in obstruction of justice and related  
18 process crimes as noted herein;

19  
20 182. The Tech Cartel also bribed, or attempted to bribe, by use of mail and wire, members  
21 of the Obama administration utilizing collusion between Hillary Clinton, Tech Cartel  
22 political offices and the DNC spending in excess of \$10,000,000.00 to influence the 2016  
23 presidential general election by funding the Russian SVR-sourced dossier that the Obama  
24 administration then used to mislead federal judges and surreptitiously surveil an  
25 opposition party and private U.S. citizens:

26  
27 183. Tech Cartel surrogate Huma Abedin intentionally copied State Department emails to  
28 convicted sex offender Weiner laptop and lied to the FBI about that fact – a significant

1 series of felony offenses by means of wire to further Tech Cartel obstruction of justice  
2 and related wrongdoing;

3  
4 184. On November 17, 2016, National Security Agency Director Mike Rogers, fearing  
5 that competitors Tower has been placed under illicit surreptitious electronic surveillance  
6 without a showing of probable cause (but rather based upon Tech Cartel fallacious  
7 information used to misinform an Article III federal judge), informed President-elect  
8 Donald J. competitors that various methods of such surveillance were being used by the  
9 Obama Intelligence Community upon the instructions of, among others, Tech Cartel  
10 surrogate James Clapper, against the President-elect;

11  
12 185. On or around March 5, 2017, perjuring himself in order to obstruct justice by means  
13 of wire, Obama DNI James Clapper stated that “he knows of no FISA warrant ever  
14 approved of competitors and his associates”;

15  
16 186. On January 12, 2018, the Uranium One Tenex/Tenem bribery, Fraud and Money  
17 Laundering scheme by mode of wire was finally fully revealed, after being unduly  
18 delayed as a result of nearly eight years of obstruction by Tech Cartel surrogates Holder,  
19 Mueller and Rosenstein and concomitant illicit pressure on Assistant United States  
20 Attorney (and former CIA Officer) David I. Salem – this obstruction is alleged to be  
21 worse than Mueller had employed while earlier protecting mass-murderer mafia member  
22 James “Whitey” Bulger;

23  
24 187. As to all Tech Cartel principals, surrogates and participants, it is without question  
25 that all of the illicit acts carried out in pursuit of the Tech Cartel malfeasance were at  
26 some juncture carried out by way of the wires and within the auspices of the federal wire  
27 fraud statute – each time they carried out such covered act(s);  
28

1 188. It is also without question that any Tech Cartel State or international act or  
2 conspiracy, such as the Hillary Victory Fund kickbacks and/or the Brennan  
3 communications with Great Britain, involved wire fraud and thus must be charged for  
4 such against those blameworthy parties; 166  
5

6 189. Each violation of 18 U.S.C. § 1343, as aggravated here, is a felony punishable by  
7 between 20 and 30 years of imprisonment and a fine of \$1,000,000 United States Dollars.  
8  
9

10 **CAUSE OF ACTION FOR**

11 **Acts Indictable Relating to Obstruction of Justice**  
12

13 190. Plaintiffs repeats and re-alleges each and every allegation of the foregoing  
14 paragraphs as if fully set forth herein; as detailed in this full document including it's  
15 attached EXHIBITS.  
16

17 191. The Tech Cartel is a virtual obstruction of justice machine, and as part of their  
18 mission have on innumerable occasions “corruptly ... influenced, obstructed, or impeded,  
19 or endeavored to influence, obstruct, or impede, the due administration of justice”;  
20

21 192. As relevant here, *inter alia*, conduct within the purview of the obstruction of justice  
22 statute, as here, also violates the following statutes: 18 U.S.C. § 201(a), (b), and (c) –  
23 bribery of Federal public officials and witnesses (see relevant proscribed acts, herein, for  
24 overlap with 18 U.S.C. §§ 1503 and 1505 (public officials) and 18 U.S.C. § 1512  
25 (witness) – although subsection (e) of § 201 provides that the offenses and penalties are  
26 separate from and in addition to those in §§ 1503-1505;  
27

28 As relevant here, *inter alia*, conduct within the purview of the obstruction of justice

1 statute, as here, also violates the following statute: 18 U.S.C. § 241, a conspiracy to injure  
2 or intimidate any citizen on account of his or her ... possibility of exercise of a Federal  
3 right, *e.g.*, appropriate donations under First Amendment rights; one other such right is  
4 the right to be a truthful witness in a Federal court (which, as set forth herein, the Tech  
5 Cartel would not tolerate);

6  
7 193. As relevant here, *inter alia*, conduct within the purview of the obstruction of justice  
8 statute, as here, also violates the following statutes: 18 U.S.C. § 371 and 372, involving  
9 conspiracies to commit any offense against the United States, or to prevent or retaliate in  
10 response to the lawful discharge of the duties of Federal officers;

11  
12 194. As relevant here, *inter alia*, conduct within the purview of the obstruction of justice  
13 statute also violates the following statute: 18 U.S.C. § 1001, involving false statements  
14 and concealment of material facts before Federal departments and agencies (Justice  
15 Department will charge, *inter alia*, as overlap with 18 U.S.C. § 1505);

16  
17 195. As relevant here, *inter alia*, conduct within the purview of the obstruction of justice  
18 statute also violates the following statutes: 18 U.S.C. § 1621-1623, involving perjury,  
19 subornation of perjury, and false declarations before grand juries and courts (Justice  
20 Department will charge, *inter alia*, as overlap with 18 U.S.C. §§ 1503, 1505, and 1512);

21  
22 196. Further, and as relevant here, evasive testimony, such as a false denial of knowledge  
23 or memory, will be charged on its own and to the omnibus clause of 18 U.S.C. §1503 –  
24 and will also be charged when this proscribed activity interferes with other witnesses or  
25 documentary evidence;

26  
27 197. Suborning perjury, 18 U.S.C. § 1622, may also be an 18 U.S.C. § 1503 omnibus  
28 clause offense, even where perjury was in fact not committed, as the predicate of the

1 omnibus clause of 18 U.S.C. §1503 is fully satisfied and will be used to prosecute when  
2 *attempts* to suborn perjury are at issue, as herein;

3  
4 198. Also, and as prevalent throughout the Brock entities and other nonprofit partisan  
5 entities like them affiliated with the Tech Cartel, 26 U.S.C. § 7212, directly involving  
6 these entities and involving interference with or endeavoring to interfere with the due  
7 administration of the Internal Revenue laws (Justice Department will charge, *inter alia*,  
8 the overlap with 18 U.S.C. § 1505);

9  
10 199. Upon information and belief, each of the predicate acts – in addition to standing on  
11 their own as part of a pattern of racketeering – were committed with the intent to obstruct  
12 justice – with intent being inferred from the illegal use of a private email server as well as  
13 the other methods of obfuscation used by the Tech Cartel and its principals and  
14 surrogates;

15  
16 200. Upon information and belief, the Tech Cartel has so obstructed justice hundreds of  
17 thousands of times within the relevant statutory period;

18  
19 201. Hillary Clinton and the Tech Cartel, by mail and wire to the United States Senate  
20 Foreign Relations Committee, the CFIUS (by commission and omission), and to the  
21 Federal Bureau of Investigation in 2017, did as herein noted and otherwise, make false  
22 statements under oath and penalty of perjury, concerning bribery committed by herself,  
23 William Clinton and the Tech Cartel, concerning companies (foreign and domestic) and  
24 foreign countries with direct connections to the CF, CGI, and CGEP, and in relation to  
25 the corrupt and ongoing Uranium One transactions directly enabled by the Clinton Tech  
26 Cartel bribery, did thereby obstruct justice as the United States attempted (and attempts)  
27 to determine the Tech Cartel role in providing U.S. lethal uranium stocks to hostile  
28 foreign actors;

28

202. Competitors, on the other hand, has not only blocked 18 foreign acquisitions which pose a risk to United States national and economic security, he has worked with Congress to assist him in this task;

203. At the instructions of the Tech Cartel, Tech Cartel surrogates Holder and Mueller, knowingly and contrary to DoJ Guidelines, failed to interview informants regarding their knowledge of Tech Cartel criminal collusion with the Russian Federation;

204. The Tech Cartel and Clintons were aided and abetted by the Obama FBI in assisting Russia in obtaining control of the U.S. lethal uranium market, to this day, in exchange for a currency transfer laundered through the Russian SVR to the Clinton Foundation while Hillary Clinton was Secretary of State;

205. Just as the Tech Cartel undermined the truthful disclosures of Officer whistleblowers, which tended to infer malfeasance attributable to Hillary Clinton, Tech Cartel surrogates Comey, Strzok, Lynch, Yates and their various sycophants conspired with the Tech Cartel, via wire and mail, to “insure” – including but not limited to knowing obstruction of justice in collusion with the Russian SVR and FSB to control political power;

206. Upon information and belief, on April 9, 2016, senior FBI manager Peter Strzok interviewed Tech Cartel surrogate Cheryl Mills and, thereby, by omission and commission, sought to and did interfere with the investigation into the Tech Cartel Clinton e-mail servers in exchange for lenient treatment of Secretary Clinton; In these exchanges, the examples of bias are astonishing for two senior officials who had just spiked the Clinton email espionage investigation and, along with Attorney General Loretta Lynch and her Deputy, Sally Yates, had spiked the Clinton Foundation corruption

1 investigation (thus obstructing justice in myriad ways, including obstruction of a criminal  
2 investigation), while instigating an official investigation against the competitors  
3 campaign (Crossfire Hurricane), Strzok notes that “*we can’t take the risk*” of competitors  
4 *being elected or retained in office, and further noted that the FBI needed to undermine*  
5 *competitors as an “insurance policy” as a hedge against any possible competitors victory*  
6 *in the 2016 presidential contest.* If that were not shocking enough, just one week earlier  
7 than the “insurance policy” text exchange, the following exchange had occurred between  
8 Page and Strzok, key officers and lawyers conducting the Clinton e-mail investigation,  
9 the Clinton Foundation Investigation, the misleading of the FISC, the pre-election  
10 surveillance and HCS misuse regarding competitors and whistle-blowers, and Operation  
11 Crossfire Hurricane: **Page:** “[competitors’s not ever going to become president, right?  
12 Right?!” (August 9, 2016) **Strzok:** No. **No he won’t. We’ll stop it.**” This is proof of  
13 FBI/Tech Cartel sedition, as Strzok had just spiked the Clinton e-mail investigations and  
14 McCabe, Yates and Lynch (along with Strzok) had spiked the Clinton Foundation  
15 investigation. This seditious exchange was 9 days after Operation Crossfire Hurricane  
16 started and 6 days before the “insurance policy” text;

17  
18 **CAUSE OF ACTION FOR**

19 **Acts Indictable Relating to Obstruction of Criminal Investigations**

20  
21 207. Plaintiffs repeats and re-alleges each and every allegation of the foregoing  
22 paragraphs as if fully set forth herein; as detailed in this full document including it’s  
23 attached EXHIBITS.

24  
25 208. Whoever willfully endeavors, as the Tech Cartel has since its inception, by means of  
26 bribery to obstruct, delay, or prevent the communication of information relating to a  
27 violation of any criminal statute of the United States by any person to a criminal  
28 investigator is subject, per count, to a five-year prison sentence and substantial criminal

1 fine;

2  
3 209. Upon information and belief, each of the predicate acts – in addition to standing on  
4 their own as part of a pattern of racketeering – were committed with the intent to obstruct  
5 justice and obstruct criminal investigations – with criminal intent being inferred from the  
6 illegal use of a private email server, admitted destruction of evidence, discussions among  
7 surrogates Strzok and Page, John Podesta admissions, the admissions in *Exhibit “A”*  
8 hereto, as well as the myriad other methods of criminal obfuscation used by the Tech  
9 Cartel and its principals and surrogates;

10  
11 210. As relevant here, *inter alia*, conduct within the purview of the obstruction of justice  
12 statute also violates the following statutes: 18 U.S.C. § 371 and 372, involving  
13 conspiracies to commit any offense against the United States, or to prevent or retaliate in  
14 response to the lawful discharge of the duties of Federal officers – thereby aggravating  
15 Tech Cartel wrongdoing significantly;

16  
17 211. As relevant here, *inter alia*, conduct within the purview of the obstruction of justice  
18 statute, as here, also violates the following statute: 18 U.S.C. § 1001, involving false  
19 statements and concealment of material facts before Federal departments and agencies  
20 (Justice Department will charge, *inter alia*, as overlap with 18 U.S.C. § 1505) - thereby  
21 aggravating Tech Cartel wrongdoing significantly;

22  
23 212. As relevant here, *inter alia*, conduct within the purview of the obstruction of justice  
24 statute, as here, also violates the following statutes: 18 U.S.C. § 1621-1623, involving  
25 perjury, subornation of perjury, and false declarations before grand juries and courts  
26 (Justice Department will charge, *inter alia*, as overlap with 18 U.S.C. §§ 1503, 1505, and  
27 1512) - thereby aggravating Tech Cartel wrongdoing significantly;

28

1 213. Further, and as relevant here, evasive testimony, such as a false denial of knowledge  
2 or memory, will be charged on its own and to the omnibus clause of 18 U.S.C. §1503 –  
3 and will also be charged when this proscribed activity interferes with other witnesses or  
4 documentary evidence - thereby aggravating Tech Cartel wrongdoing significantly;

5  
6 214. Suborning perjury, 18 U.S.C. § 1622, may also be an 18 U.S.C. § 1503 omnibus  
7 clause offense, even where perjury was in fact not committed, as the predicate of the  
8 omnibus clause of 18 U.S.C. §1503 is fully satisfied and will be used to prosecute when  
9 *attempts* to suborn perjury are at issue, as herein - thereby aggravating Tech Cartel  
10 wrongdoing significantly;

11  
12 215. Also, and as prevalent throughout the Brock entities and other nonprofit partisan  
13 entities like them affiliated with the Tech Cartel, 26 U.S.C. § 7212, directly involving  
14 these entities and involving interference with or endeavoring to interfere with the due  
15 administration of the Internal Revenue laws (Justice Department will charge, *inter alia*,  
16 the overlap with 18 U.S.C. § 1505) - thereby aggravating Tech Cartel wrongdoing  
17 significantly;

18  
19 216. As noted, upon information and belief, each of the predicate acts – in addition to  
20 standing on their own as part of a pattern of racketeering – were committed with the  
21 intent to obstruct justice with intent being inferred from the illegal use of a private email  
22 server as well as the other methods of obfuscation used by the Tech Cartel and its  
23 principals and surrogates;

24  
25 217. On January 29, 2016, FBI director James Comey named disgraced and putative felon  
26 Andrew McCabe deputy director, with responsibility for oversight of Clinton  
27 investigation with covert instructions to “spike” the espionage aspects for which  
28 Secretary Clinton was particularly vulnerable after, on January 15, 2016, John Giacalone,

1 head of the FBI's National Security Division, retired after observing that the Clinton/Tech  
2 Cartel email probe was being undermined from within the FBI by Tech Cartel surrogates  
3 Comey and McCabe (with illegal assistance from Strzok and Page);  
4

5 218. In early May of 2016, directly contemporaneous with the provision of Tech Cartel  
6 surrogate Comey's "coordination" with his top FBI staff that Secretary Clinton would be  
7 exonerated despite having committed espionage, Nellie Ohr, wife of DOJ executive  
8 Bruce Ohr, was hired by Fusion GPS to work on competitors "Dossier" – Bruce Ohr's  
9 failure to report this employment on mandatory government ethics forms represents  
10 obstruction of an ongoing criminal investigation and must be charged, in addition, in  
11 conjunction with the obstruction corollary offenses set forth in the preceding paragraphs  
12 of this section; Upon information and belief, \$84 million was funneled illegally from the  
13 DNC through state party chapters and back into the accounts of the Clinton campaign.

**CAUSE OF ACTION FOR**  
**Acquisition and Maintenance of an Interest in and Control of a Tech Cartel**  
**Engaged in a Pattern of Racketeering Activity: 18 U.S.C. §§1961(5), (1962)(b)**

219. Plaintiffs repeats and re-alleges each and every allegation of the foregoing paragraphs as if fully set forth herein; as detailed in this full document including it’s attached EXHIBITS.
220. During the ten calendar years preceding, all Defendants did cooperate jointly and severally in the commission of two or more of the RICO predicate acts that are itemized in the RICO statute codified at 18 U.S.C. §§ 1961(1)(A) and (B), and did so in violation of the RICO law at 18 U.S.C. § 1962(b) (prohibited activities);
221. Non-sovereign Defendants are each “persons” within the meaning of the Racketeer Influenced and Corrupt Organizations Act;
222. Defendants operate as an “Tech Cartel” within the meaning of RICO, the activities of which effect interstate and foreign commerce;
223. Defendants, by virtue of the predicate acts described in this Complaint, including but not limited to: laundering of monetary instruments, engaging in monetary transactions improperly derived from unlawful activity, transferring, receiving, furthering, and supplying financing and income that was derived, both directly and indirectly, from a pattern of racketeering activity in which each of them participated as a principal and used and invested, both directly and indirectly, such income and the proceeds of such income, in establishing, operating and furthering terrorist and other illegal Tech Cartels in violation of 18 U.S.C. § 1962(a);
224. As a direct and proximate result of Defendant’s violation of 18 U.S.C. § 1962(a), Plaintiffs suffered the loss of valuable property, financial services and support, and suffered other business and pecuniary damages;

225. Plaintiffs further allege that all Defendants did commit two or more of the offenses itemized above in a manner which they calculated and premeditated intentionally to threaten continuity, i.e., a continuing threat of their respective racketeering activities, also in violation of the RICO law at 18 U.S.C. § 1962(b);

226. 18 U.S.C. § 1964(c) defines “racketeering activity” as (A) “any act or threat involving murder, kidnapping, gambling, arson, robbery, bribery, extortion, dealing in obscene matter, or dealing in a controlled substance or listed chemical [...], which is chargeable under State law and punishable by imprisonment for more than one year; (B) any act which is indictable under any of the following provisions of title 18, United States Code: Section 201 (relating to bribery), sections 471, 471 and 473 (relating to counterfeiting), section 659 (relating to theft from interstate shipment) if the act indictable under section 659 is felonious, section 664 (relating to embezzlement from pension and welfare funds), sections 891-894 (relating to extortionate credit transactions), section 1028 (relating to fraud and related activity in connection with access devices), section 1084 (relating to the transmission of gambling information), section 1341 (relating to mail fraud), section 1343 (relating to wire fraud), section 1344 (relating to financial institution fraud), section 1425 (relating to the procurement of citizenship or naturalization unlawfully), section 1426 (relating to the reproduction of naturalization or citizenship papers), section 1427 (relating to the sale of naturalization or citizenship papers), section 1503 (relating to obstruction of justice), section 1510 (relating to obstruction of criminal investigations), section 1511 (relating to the obstruction of State or local law enforcement), section 1512 (relating to tampering with a witness, victim, or an informant), section 1513 (relating to retaliating against a witness, victim, or an informant), section 1546 (relating to fraud and misuse of visas, permits, and other documents), sections 1581-1592 (relating to peonage, slavery, and trafficking in persons), section 1951 (relating to interference with commerce, robbery, or extortion), section 1952

1 (relating to racketeering), section 1956 (relating to the laundering of monetary  
2 instruments), section 1957 (relating to engaging in monetary transactions in property  
3 derived from specified unlawful activity), section 1958 (relating to use of interstate  
4 commerce facilities in the commission of murder-for-hire), sections 2251, 2251A, 2252,  
5 and 2260 (relating to sexual exploitation of children), sections 2314 and 2315 (relating to  
6 interstate transportation of stolen property), section 831 (relating to nuclear materials); or  
7 any act which is indictable under the Immigration and Nationality Act, section 274  
8 (relating to bringing in and harboring certain aliens), section 277 (relating to aiding or  
9 assisting certain aliens to enter the United States), or section 278 (relating to importation  
10 of alien for immoral purpose) if the act indictable under such section of such Act was  
11 committed for the purpose of financial gain;

12  
13 227. Plaintiffs demand that judgment be entered against Defendants for no less than  
14 \$3,000,000,000, jointly and severally, including an award of trebled damages as  
15 consistent with 18

16 228. U.S.C. § 1964(c), compensatory and actual damages, reasonable attorneys' fees, pre-  
17 judgment interest, post-interest costs, and an award that this Court deems just and proper.

18  
19  
20 **CAUSE OF ACTION FOR**

21 **Conduct and Participation in a RICO Tech Cartel through a Pattern of**  
22 **Racketeering Activity: 18 U.S.C. §§ 1961(5), 1962(c)**

23  
24 229. Plaintiffs repeats and re-alleges each and every allegation of the foregoing  
25 paragraphs as if fully set forth herein, and specifically repeat and re-allege the allegations  
26 under the First Cause of Action concerning RICO liability; as detailed in this full  
27 document including it's attached EXHIBITS.  
28

1 230. All defendants did associate with a RICO Tech Cartel of individuals who were  
2 associated in fact and who engaged in, and whose activities did affect, interstate and  
3 foreign commerce;

4  
5 231. All Defendants did conduct and/or participate, either directly or indirectly, in the  
6 conduct of the affairs of said RICO Tech Cartel through a pattern of racketeering activity,  
7 all in violation of 18 U.S.C. §§ 1961(4), (5), (9), and 1962(c);

8  
9 232. During the ten calendar years preceding June 15, 2018, all Defendants did cooperate  
10 jointly and severally in the commission of two or more of the RICO predicate acts set  
11 forth in the RICO laws at 18 U.S.C. §§ 1961(1)(A) and (B), and did so in violation of the  
12 RICO law at 18 U.S.C. §1962(c);

13  
14 233. Plaintiffs further allege that all Defendants did commit two or more of the offenses  
15 set forth above in a manner which they calculated and premeditated intentionally to  
16 threaten continuity, *i.e.* a continuing threat of their respective racketeering activities, also  
17 in violation of the RICO law at 18 U.S.C. § 1962(c);

18  
19 234. Plaintiffs demand that judgment be entered against Defendants for no less than  
20 \$3,000,000,000, jointly and severally, including an award of trebled damages as  
21 consistent with 18 U.S.C. § 1964(c), compensatory and actual damages, reasonable  
22 attorneys' fees, pre-judgment interest, post-interest costs, and an award that this Court  
23 deems just and proper.

24  
25

235. Plaintiffs repeats and re-alleges each and every allegation of the foregoing paragraphs as if fully set forth herein, and specifically repeat and re-allege the allegations under the First Cause of Action concerning RICO liability as detailed in this full document including it's attached EXHIBITS.

236. All defendants conspired to acquire and maintain an interest in a RICO Tech Cartel engaged in a pattern of racketeering activity, in violation of 18 U.S.C. §§ 1962(b) and (d).

237. During the ten calendar years preceding, all Defendants did cooperate jointly and severally in the commission of two or more of the predicate acts that are set forth at 18 U.S.C. §§ 1961(1)(A) and (B), in violation of 18 U.S.C. § 1962(d).

238. Plaintiffs further alleges that all Defendants did commit two or more of the offenses itemized above in a manner which they calculated and premeditated intentionally to threaten continuity, i.e., a continuing threat of their respective racketeering activities, also in violation of 18 U.S.C. § 1962(d).

239. Plaintiffs demand that judgment be entered against Defendants for no less than \$3,000,000,000, jointly and severally, including an award of trebled damages as consistent with 18 U.S.C. § 1964(c), compensatory and actual damages, reasonable attorneys' fees, pre-judgment interest, post-interest costs, and an award that this Court deems just and proper.

**CAUSE OF ACTION FOR**  
**Pendant Defamation Claim Under Arkansas Law**

240. Plaintiffs repeats and re-alleges each and every allegation of the foregoing

1 paragraphs as if fully set forth herein; as detailed in this full document including it's  
2 attached EXHIBITS.

3  
4 241. Plaintiffs, and in particular whistle-blowers, were defamed by all defendants under  
5 Arkansas Code, Title 16, Subtitle 5, Chapter 63, Subchapter 2, §16-63-207 – Libel and  
6 Slander;

7 242. ARKANSAS CODE §16-63-207(a)(1) (2012) states: “In an action for libel or  
8 slander, it shall not be necessary to state in the complaint any extrinsic facts for the  
9 purpose of showing the application to the Plaintiffs of the defamatory matter out of which  
10 the cause of action arose. It shall be sufficient to state generally that the defamatory  
11 matter was published or spoken concerning the Plaintiffs.”

12  
13 243. In Arkansas, the ostensible “home” of the Tech Cartel wrongdoing, legal precedent  
14 requires only that “a substantial and respectable minority” of the Plaintiffs community  
15 would consider the Tech Cartel slurs to be defamatory; the so-called “majority  
16 sentiment”, a far higher standard, *cannot* be considered by either the Arkansas judge or  
17 jury;

18  
19 244. Plaintiffs whistle-blower was defamed when accused by *Correct the Record and the*  
20 *Nick Denton tabloid empire*, on behalf of the Tech Cartel this defamation was repeated  
21 each day since publication as set forth in *Exhibit* .

22  
23 245. Plaintiffs/Whistle-blowers suffered extraordinary reputational injury and, as noted  
24 throughout this complaint, devastating monetary damage to his business as an author and  
25 commentator;

26  
27 246. Plaintiffs/whistle-blower is not a “public figure”, in any sense of that term of art;  
28

1 247. Printed publications, images and online states, *e.g.*, “***Correct the Record and the***  
2 ***Nick Denton tabloid empire FROM THE DESK OF DAVID BROCK***”, all may  
3 constitute libel in Arkansas – even if they were repeated millions of times on social  
4 media, weblog commentary, and related defamatory missives;

5  
6 248. Slander, which occurred repeatedly in this case, is spoken or transitory defamation;  
7 whistle-blowers were slandered repeatedly by Defendants owned and controlled  
8 publishing vehicles;

9  
10 249. In several separate appearances the Tech Cartel provided wholly and intentionally  
11 false renditions, set forth as fact, of whistle-blowers’s job responsibilities in an attempt to  
12 discredit whistle-blowers’s observations.

13  
14 250. All defendants, individually and collectively, attempted to destroy the reputation and  
15 business of whistle-blowers and other Plaintiffs with false statements in writing and on  
16 television.

17  
18 251. Hillary Clinton and David Brock ordered that whistle-blowers be defamed and  
19 destroyed, because Plaintiffs told the truth about organized crime within government  
20 bodies;

21  
22 252. The Tech Cartel used the same corrupt intimidation tactics, including surveillance  
23 and illegal leaks, against whistle-blowers that they are now using against competitors;

24 253. As a result of defendant’s defamation, Plaintiffs are entitled to \$50.5 million in  
25 damages;

26  
27 254. Plaintiffs will prevail as a matter of law, as the Defendant’s libel and slander was  
28 entirely and intentionally false and made with the purpose of damaging Plaintiffs, who must be

1 awarded treble damages of \$151.5 million, jointly and severally;  
2

3 **DEMANDS AND PRAYER FOR RELIEF**  
4 **(As to All Causes of Action)**

5 **DEMAND A.** For general damages, including emotional distress damages, according to the proof  
6 of each cause of action for which such damages are available.  
7

8 **DEMAND B.** For a Court order to the Social Security Administration ordering SSA to pay  
9 Plaintiffs SSDI payments, plus interest, from Jan. 1, 2007 to today as they were with-held or  
10 blockaded in reprisal for Plaintiffs assistance to the authorities. The SSA’s Mario U. , a hostile  
11 witness, and other officials have acknowledge and confirmed these attacks. The referenced reports  
12 by the Inspector General have confirmed that such abuses of the SSA being “*weaponized for*  
13 *political reprisals*” are now commonplace.  
14

15 **DEMAND C.** For special damages, according to proof on each cause of action for which such  
16 damages are available.  
17

18 **DEMAND D.** For punitive damages, according to proof on each cause of action for which such  
19 damages are available.  
20

21 **DEMAND E.** For income losses from 2007 to today based on the profits from Cartel members  
22 Netflix, Google/Alphabet, LinkedIn, Instagram, Tesla as averaged by their combined annual profits  
23 which were derived from Applicants patents, companies, trade secrets, business intelligence and  
24 work using well-known and standard court metrics for business income loss based on RICO  
25 interference and attacks by Defendants.  
26

27 **DEMAND F.** For prejudgment interest and post-judgment interest according to the law.  
28

1 **DEMAND G.** For the cost of suit incurred in this action, including attorney’s fees (for such time as  
2 Plaintiffs are no longer blockaded from having counsel and retains an attorney to assist in this case  
3 rather than representing himself *pro per*).

4  
5 **DEMAND H.** For such other and further relief that the Court deems proper and just.

6  
7 **DEMAND I.** For a Court order to Google and YouTube to delete all of their server held digital  
8 attack materials on Plaintiffs produced and directed by Defendants.

9  
10 **DEMAND J.** Compensation for each of Plaintiffs patents, Per Patent Cafe, and other third party  
11 patent valuation services, and the loss of all revenue from monetization of those patents by  
12 Defendants. All of the patents having been RICO, Anti-Trust and interference blockaded and  
13 interfered with by Defendants and their control of the NVCA and Defendants executive positions  
14 within the United States Patent office and such other interferences as described at  
15 <http://www.usinventor.org>. The Court can easily look at the Patents the U.S. Government has  
16 awarded Plaintiffs as the seminal first inventor of common technologies ePlaintiff 42loited by  
17 Defendants for billions of dollars of annual revenue, at <http://www.uspto.gov>. The Court can then  
18 allocate a portion of revenues from Defendants operational years from 1978 to today, to Plaintiffs,  
19 due to Defendant’s RICO and Anti-trust violating attacks on Plaintiffs because he refused to join  
20 their mob empire. In any case, the Court must order Defendants to pay for Plaintiffs un-sold and/or  
21 un-monetized issued and pending patents which were blockaded, black-listed and anti-trust  
22 interfered with by Defendants. Payments to Plaintiffs to be, at least, at fair market rates per  
23 comparable transactions over the last ten years.

24  
25 **DEMAND K.** For witness fees, informant fees, whistle-blower fees for investigative case support  
26 to the U.S. Government. For example, the FBI and SEC have been billed \$5,000,000.00 for these  
27 amounts and the case evidence files show that Plaintiffs was FIRST to provide said evidence to U.S.  
28 agencies.

1  
2 **DEMAND L.** For back-pay owed Plaintiffs, in particular for W2 payments owed Plaintiffs by  
3 companies that were attacked and put out of business, by Defendants, before they could complete  
4 all of the payments to Plaintiffs.

5  
6 **DEMAND M.** For a Court order to Gawker/Gizmodo Media to delete all of their server held attack  
7 materials on Plaintiffs which they partnered with Google/Youtube to produce and manually place at  
8 the top of their search results for years at the behest, command and control of Defendants.

9  
10 **DEMAND N.** For a Court Order to HUD and all Bay Area Counties to, today, issue Plaintiffs HUD  
11 Home Ownership certificate that Plaintiffs have waited for since 2007, but that has been with-held  
12 in reprisal or blockaded in reprisal for Plaintiffs assistance to the authorities. The Court will note,  
13 that during the period from 2007, to today, over 30,000 other Applicant's, the majority of whom  
14 were less-qualified per the HUD metrics and federal laws, for the certificate, which they all received  
15 with little effort. Defendants took Plaintiffs 2 bedroom home from him in Noe Valley, San  
16 Francisco, by blockading all his SSA funds and then blockaded him from getting a home by  
17 blockading all of his HUD funds.

18  
19 **DEMAND O.** A declaration pursuant to 28 U.S.C. §§ 2201 and 2202 and 5 U.S.C. § 706(2)(B) that  
20 the denial of 'Plaintiffs funding and benefits applications was unlawful, and compensatory and  
21 injunctive relief directing GOVT to approve same.

22  
23 **JURY TRIAL DEMAND**

24 Plaintiffs, Plaintiff 22DOE, demands trial of this matter by jury. The amount demanded exceeds  
25 \$25,000.00 (Government Code § 72055). Damages claim dollar amount of \$300,000,000.00 is equal  
26 to only three hours of income for Defendants.

27  
28 DATED this day of the filing of 2022

Respectfully submitted,

---

**ADDITIONAL DETAILS**

1 NOTE: As part of his demands, Plaintiffs are requesting relief under the United States Constitution,  
2 the Federal Tort Claims Act (“FTCA”), 28 U.S.C. §§ 1346(b), 2672 and related jurisdictions and  
3 applicable rights.

4  
5 NOTE: Plaintiffs hereby also pleads with the Court for: (A) A “JOHN DOE’ filing status; (B) A  
6 judge or magistrate who holds no stock ownership, or personal relationships, in Valic/AIG or the  
7 Silicon Valley Cartel companies; (C ) The appointment of Counsel by the Court; (D) Fee Waivers;  
8 (E) the right to EFILE. (F) a Court-ordered demand to the FBI to provide the ‘FBI 302’ reports on  
9 each of the named attackers, listed below and (G) damages as specified.  
10

11  
12 NOTE: As hundreds of investigations, (from Durham, to FBI, To SEC, To Congress, To  
13 Propublica, et al) have now revealed: Standard operating procedure for government officials  
14 involves the hiring of spy of agency operatives to attack competing, or whistle-blowing, citizens  
15 with spy agency tools and ‘dirty tricks’ tactics. These United States Government politicians  
16 exchange payola, bribery and other compensation in these schemes via stock market securities and  
17 rigged insider trading. Investment banker husbands often stage their spouses to be ‘Senators’ or  
18 other political high-end functionaries and then get them to make laws that benefit their investment  
19 bank ownerships.  
20

21  
22 NOTE: While Plaintiffs damages amount may seem to be a large amount to the naive and unaware,  
23 the Defendants make that amount every day EACH FEW HOURS, from corruption-based gains.  
24 Much of that profit was made off the work of Plaintiffs by copying his patents, trade secrets,  
25 business models, start-up companies and innovations, which Plaintiffs deployed years before any of  
26 the Defendants, and by engaging in Racketeering, RICO violations, bribery, monopolies and ant-  
27 competitive and reprisal attacks to prevent Plaintiffs from competing and from whistle-blowing.  
28

1  
2 Many billions of dollars of illicit ‘unjust gains’ have been transacted this way by Defendants.  
3 Plaintiffs are suing the United States Government because that body: financed, operated, provided  
4 the tools for, staffed, manipulated policy for, created unique exclusions for the Defendants of,  
5 ignored police reports about, and otherwise, operated command and control of the attacks, anti-  
6 competitive actions, IP violations and harms to Plaintiffs which Plaintiffs shall prove in this trial  
7 with first-hand knowledge and internal eye-witness testimony already filed with federal law  
8 enforcement, Congress and regulatory agencies. Plaintiffs reported information to Federal law  
9 enforcement and Congressional committees which, if properly acted upon by authorities, would  
10 have removed a seated President and Vice President from office. The President and the Vice  
11 President steer trillions of dollars to political campaign financiers, particularly those in Silicon  
12 Valley. This was the reason Defendants used such extreme spy tactics, opposition research attacks  
13 and Fusion GPS/Black Cube-type ‘hit-jobs’ on Plaintiffs, using government resources.  
14  
15

16  
17 NOTE: Plaintiffs have been a multi-decade resident of San Francisco since he moved there to  
18 continue his education in criminology and media documentation via local universities. Plaintiffs  
19 superlative law enforcement and state licensing credentials go back to this period. His residences at  
20 20<sup>th</sup> Street, Vallejo Street, Green Street and Chenery Street were visited by, and cohabited, with  
21 “famous” political figures. Plaintiffs are featured in ‘hug’ photos and videos with the most senior  
22 White House insiders. The daughter of a Mayor of San Francisco and a Bay Area Senator stayed  
23 overnight at the residence, often, and partied and enjoyed the backyard hot-tub. The senior staff  
24 member of Nancy Pelosi dated Plaintiffs. Plaintiffs lived in the home of Dianne Feinstein’s office  
25 coordinator.  
26

27 Major City Hall figures kept dating Plaintiffs and revealing all of the inside dirt to Plaintiffs because  
28 they wanted Plaintiffs to run for office. Regional Congressional officials, Judges and Magistrates,

1 agency officials and other public officials have attempted to stall, delay or obfuscate this filing  
2 because they hold stock market securities ( through which bribes are paid ) and other financial,  
3 political and personal interests in the Defendants companies. This fact is easily confirmed, by any  
4 party, via a simple forensic database cross-comparison analysis between the FINCEN, DOJ,  
5 XKEYSCORE, FBI, INTERPOL, ICIJ, SEC and GAO financial crimes databases. Federal law  
6 enforcement criminal referrals have been, and will be, filed for each person confirmed to be so  
7 doing.  
8

9  
10 High-level City Hall family members helped Plaintiffs, with support from the regional Universities,  
11 produce a 10 segment documentary film series called: “*City Circus – The Insiders*”, which featured  
12 everyone from Melvin Belli, to James Bronkema to George Moscone revealing, on camera, how  
13 payola corruption works from SFO to DC. Plaintiffs have received multiple Mayoral, White House  
14 and State proclamations and written commendations and has been awarded, by the United States  
15 federal government, many seminal patents as First *Inventor-Of-Record* of the core technologies and  
16 business models which support over 50% of Silicon Valley ‘Big Tech’ . It is well proven that  
17 Plaintiffs had ‘superior knowledge’ of political corruption in San Francisco and has so testified  
18 regarding ongoing, active, investigation matters to the FBI, DOJ, FinCen, Interpol, EU, GAO, IG,  
19 AG, SEC, FTC, Congressional Ethics teams, the Durham investigations and other high-level law  
20 enforcement and regulatory officials.

22  
23  
24

25  
26 Plaintiffs provided tips which resulted in the FBI raid of Solyndra and is a major promoter of the  
27 U.S. JOBS ACT and the Congressional STOCK ACT. Plaintiffs was encouraged to run for Mayor  
28 of San Francisco as part of a multi-agency anti-corruption taskforce effort to beak up an organized

1 corruption “*Enterprise*” which had permeated City government and was based around an ongoing  
2 and massive sex-trafficking operation for San Francisco “elites”. The successful effort indicted one  
3 City Hall executive, who ran a City Hall brothel for public officials, detailed in police reports and  
4 arrest records, and indicted another for abuse of his daughter and corruption. FBI staff have referred  
5 to San Francisco as “*one of the most corrupt cities in America*”, San Francisco’s local anti-  
6 corruption lawyer: Harmeet Dhillon is constantly on national TV disclosing epic corruption in San  
7 Francisco. Renown anti-corruption reporters: Tim Plaintiff 22, Phil Matier and Andy Ross have  
8 found that they have so many corruption and bribery stories to report on that they can barely catch  
9 their breath. Senior San Francisco FBI agent Peter D. Cair, known as “*The Elliot Ness of San*  
10 *Francisco*” has been plowing through corruption at Netflix, and other bay area political financiers  
11 and business partners of White House senior executives and Congress members, with arrest after  
12 arrest. The Daily Mail global news outlet, with one of the largest news readerships in the world,  
13 reports on San Francisco corruption almost daily. The endless, ongoing, tsunami of corruption  
14 arrests of San Francisco political figures validates the assertion of endemic organized corruption  
15 and quid pro quo being the soul of government operations between SFO and Washington, DC.  
16  
17 Plaintiffs finds it sad that, these days, the name of his friend: *George Moscone* is not as well known  
18 nationally as “*Shrimp Boy*”.

20 Some major public officials, and their family members, invited Plaintiffs to join the corrupt  
21 enterprise wherein, to this day, Defendants employ a layered and tentacular stock market covert  
22 bribery scheme to funnel payola through securities transactions. Plaintiffs did not comply with  
23 Defendants enterprise participation request but did provide information to federal law enforcement.  
24 Major regional law firms and former regional and Washington, DC law enforcement officials held  
25 these corrupt stocks and participated in ‘unjust gains based on criminal corruption’ according to the  
26 U.S. Treasury. Law firms Latham Watkins, Perkins Coie and Wilson Sonsini are now under federal  
27 and international investigation for corruption, spying and other manipulations via Durham, FBI,  
28

1 FinCen, FTC and other entities. This clearly shows that nearly every law firm related to this effort  
2 has been compromised with conflicts of interest, making it impossible for Plaintiffs to acquire  
3 qualified legal representation.

4  
5 Plaintiffs are, **BOTH**, a litigant against the United States and a provider of law enforcement  
6 specialty services TO The United States and Congress, at the same time.

7  
8  
9 ***To be clear: Public officials including Mayors, Members of Congress, White House Executives***  
10 ***and agency bosses own and operate Plaintiffs competitors, de-funded Plaintiffs in political and***  
11 ***anti-competitive reprisal and hired political dirty tricks operatives (as exposed in the Durham and***  
12 ***ICIJ reports) to run ‘hit-jobs’ against Plaintiffs as detailed in the evidence attached! Government***  
13 ***officials decided to help themselves instead of helping the citizens that hired them!***

14  
15  
16 Other major public officials, and their family members, revealed the operations of the enterprise and  
17 told Plaintiffs: “*My Mom can have her people get into any HUD, SSA, DOE, or other government*  
18 *database and cut off all the funding and benefits for any person that she does not like and nobody*  
19 *can trace those moves...*”. ***In fact the government officials did just that*** in reprisal for Plaintiffs  
20 assistance to law enforcement. Government officials used tricks and manipulations as described in  
21 Ronan Farrow’s popular book: ***Catch And Kill***, to open, hack, manipulate, change, alter, delay and  
22 affect Plaintiffs SSA, HUD and DOE funding in an effort to “*...totally ‘kill him’. Cut off every*  
23 *possible source of funding he can get. Wipe him off the planet by destroying all of his cash*  
24 *options...*”, per one party who is a family member of a famous politician. This was done in reprisal  
25 because of Plaintiffs whistle-blowing and law enforcement efforts and because the U.S. Patent  
26 office had stated that Plaintiffs had invented, and was first to operate in commerce as the technology  
27 operating Facebook, YouTube, Google/Alphabet, Tesla: The very companies covertly, anti-trust  
28

1 violation, owned by the public figures in question and the very companies that pay for those public  
2 figures political campaigns are also the very companies charged with corruption by FTC, SEC,  
3 FEC, DOJ, etc. That would seem to be a vast violation of the RICO Laws. The Inspector General  
4 and the Courts have documented thousands of such cases where public officials used government  
5 resources, and spy agencies, for reprisal attacks on citizens who told the truth about crime.

6 Plaintiffs, and his peers, filed lawsuits against the ex-spy agency hired attack services (some of  
7 whom were charged when DEA found 4+ tons of cocaine on their airplanes), The U.S. Government  
8 and The Department of Energy. Plaintiffs won his remand case, proving that his funding was cut off  
9 by crony government officials infected by corruption, he got the AG and the Secretary of Energy  
10 fired for corruption and cronyism and created new anti-corruption legal precedents.

11 Whereas White House executives, U.S. Senators, and Government agency executives colluded with  
12 Silicon Valley oligarchs, operating, together, as an “*Enterprise*”, to coordinate insider stock market  
13 ‘*Stimulus Scams*’ that involved funding blockades, blacklists, contracted tabloid media  
14 assassinations and RICO Racketeering law violations, Anti-trust law violations, IP law violations,  
15 lobbying law violations and various civil and criminal acts that harmed domestic citizens and  
16 Democracy. This case matter is well known to Courts, media, federal law enforcement and in nearly  
17 a million news articles. It is not possible for this Judge, who knows many of the participants in this  
18 case, to not have seen the conflict of interest herein, at first blush.

19  
20  
21  
22 A simple cross-comparison of the ICIJ, FINCEN, Interpol, SEC, GAO forensic accounting and  
23 XKEYSCORE, et al, databases proves the illicit financial interactions between Defendants. Such a  
24 check can be technically accomplished within 60 minutes, or less, according to federal IT experts.  
25 For example: Almost every single investor of Elon Musk is also the primary financier and  
26 beneficiary of the politicians, and their Congressional shenanigans, that used taxpayer money and  
27 resources to give Musk's companies all that free money. For example, Dianne Feinstein's family run  
28

1 the HR service (Herb Newman), the construction company, the railroads, the building leases  
2 (CBRE), the China funds (Mart Bailey, Steve Westly, Steve Spinner, et al) and swap staff members  
3 for Tesla and Solyndra. Feinstein and Pelosi blocked funding for all Tesla competitors for the same  
4 State and Federal cash and tax waivers and for the NUMMI factory. The government politicians,  
5 personally, made billions off insider trading, pump-and-dumps and payola. Have you ever  
6 wondered how Congress could have FIVE YEARS of a huge number of hearings about Facebook's,  
7 Google's, Tesla's and Alphabet's crimes against society, tax evasions, money-laundering and other  
8 evils... and YET..NEVER BE ABLE TO ENACT ANY REGULATIONS ON THOSE  
9 COMPANIES!!??  
10

11 It is because half of Congress owns, and gets paid by Facebook's, Google's, Tesla's and Alphabet's  
12 crimes against society... See how that works? Parents are still sickened by the horrific things that  
13 Big Tech does to our kids We can thank our Senators that own those tech companies and do their  
14 bidding like obedient little dogs!

15 Felonies? You Bet!

16  
17 Plaintiffs lived with, worked with and was invited into their crimes by these official representatives  
18 of the United States Government. Defendants used the United States Government, The White House  
19 and various government agencies to engage in their crimes and to harm Plaintiffs in reprisal for  
20 whistle-blowing and for competing with them. The United States Patent Office has issued thousands  
21 of pages of validated research proving that Plaintiffs was the first to invent, found and operate the  
22 very business technologies and business models that were copied and now owned by United States  
23 Government officials including those senior members of Congress, The White House and various  
24 agencies. Plaintiffs are a key promoter of THE STOCK ACT, in Congress, which is a law seeking  
25 to cut off all politicians and government employees, and their families, from owning any stock,  
26 because that is how all modern bribes have been paid, and were paid, in this case.  
27  
28

1 Plaintiffs timely filed administrative complaint with multiple complaints, on a weekly basis,  
2 for the last six months, updated weekly as federal and news investigators supply new evidence of  
3 harms and crimes to Plaintiffs. Plaintiffs have filed multiple federal STANDARD FORM 95  
4 Complaints on a regular basis and has filed regularly updated 1000+ page complaints as attached to  
5 this complaint. Plaintiffs have had a 24 hour, around the clock online data service operated FOR the  
6 FBI, The DOJ, The FTC, The SEC and Congressional Investigators so that each of those parties can  
7 receive evidence updates on an immediate basis and those agency IP Addresses, IMEI Codes and  
8 Domains have regularly visited the site, proving that had complaint knowledge. Additionally, every  
9 day, including today, informants, whistle-blowers, investigators and others provide new and  
10 confirming data. Additionally, at least 60% of the reprisal attacks listed in the attached evidence are  
11 ongoing, as recently as the day of this filing, a fact proving that there has been no exclusion by any  
12 statute of limitations. Additionally, Plaintiffs have had daily and/or weekly communication, so  
13 stating the reasons for his complaint to over 200 senior government officials including:

41. Plaintiffs have met with the FBI on numerous occasions but was told: “..we take years to investigate anything involving big shots in Washington, DC..” to “We can’t comment on an active investigation (which means that there IS an active investigation)..”related to  
42. By letters and emails dated across the course of the last year, the DEFENDANT denied Plaintiffs administrative claim. In the denial notification, GOVT. advised Plaintiffs that if Plaintiffs disagreed with the denial, Plaintiffs had the right to file suit in federal district court “no later than six months after the date  
43. This instant suit is timely filed under the FTCA, 28 U.S.C. § 2401(b), as it is being filed within six months of the date of the mailing of the denial of the administrative claim. Federal courts are courts of limited jurisdiction (limited power). Under 28 U.S.C. § 1332, federal courts may hear cases in which a citizen of one State sues a citizen of another State or nation and the amount at stake is more than \$75,000. In that kind of case, called diversity of citizenship case, no defendant may be a citizen of the same State as any Plaintiffs,  
44. Plaintiffs demands a jury trial.  
45. Plaintiffs have obtained a GOVERNMENT (“GOVT”) award grant from the United States Congress, under the Iraq War Bill, has received

1 commendations from the Congress and from the federal government’s  
2 various premier high technology research organizations.

3 46. Plaintiffs have been associated with the White House and government agency  
4 projects, in technology development and law enforcement investigation, since  
5 1978.

6 47. Plaintiffs are a disabled, senior who is on a fix income from social security  
7 which validates the reason for him to receive all fee waivers and ePlaintiff  
8 42editing in this case matter.

9 48. Plaintiffs have been a victim of disabling attacks, media hit-jobs, and  
10 defunding reprisals were launched against Plaintiffs by DEFENDANT, who  
11 were both government employees and contractors AND owners of Plaintiffs  
12 competitors AND, stock market profiteering beneficiaries.

13 49. The Plaintiffs have been subjected to the malicious attacks of the operator,  
14 black-lists, and reprisal defunding attacks on Plaintiffs.

15 50. The Plaintiffs have been victimized based on a vendetta for reporting crimes  
16 that resulted in indictments, arrests, and terminations of DEFENDANT and  
17 their associates.

18 51. This can be considered as an action of an “Enterprise,” a RICO law violating,  
19 anti-trust law which is done in the violating scheme to steal stimulus funds  
20 that continue to this day.

21 52. DEFENDANT is the U.S. Government (“GOVT”), a government body.  
22 Plaintiffs have reported to, and interacted with, said entity through various  
23 agencies such as the DOE, DOJ, FBI, SEC, FTC, OPM, GAO, FEC, FERC,  
24 HUD, SSA. The White House and related agencies, all have and participated  
25  
26  
27  
28

1 in cover-ups, attacks, reprisals, defunding, defamation, RICO violations, and  
2 related crimes and abuses.

3 53. Pursuant to §136 of the Energy Independence and Security Act of 2007, 42  
4 U.S.C. § 17013, the U.S. Department of Energy (“GOVT”) administers the  
5 Advanced Technology Vehicle Manufacturing (ATVM) loan program to  
6 support the manufacture of advanced technology vehicles and components in  
7 the United States. In 2008, Congress authorized the GOVT to make \$25  
8 billion in ATVM loans. GOVT currently has over \$16 billion of unused  
9 lending authority. Congress-people, GOVT agency executives and their  
10 Silicon Valley financiers invested in stock ownerships of the upside collateral  
11 profits from the manipulation of the Department of Energy and foreign  
12 mining benefits from Iraq, Afghanistan, and other foreign mining regions.

13  
14 54. The public officials operated a profiteering swindle based on the exploitation  
15 of stocks from government policy financed energy and mining deals and they  
16 operated this scheme in violation of RICO, anti-trust, civil rights, and other  
17 law violations. The perpetrators ‘before’ and ‘after’ stock market account  
18 records and leaked private emails and phone calls prove this. DOJ, FTC, and  
19 SEC are strongly encouraged to ePlaintiff 42 and their criminal investigation  
20 into short selling by hedge funds and research firms benefiting politicians as  
21 bribery payola. Federal law enforcement must more deeply scrutinize the  
22 symbiotic covert relationships between Senators and tech companies and hunt  
23 for signs that improperly coordinated trades broke laws to create profiteering  
24 schemes for corrupt U.S. Senators. ie:

28

55. The federal probes have revealed significant and pertinent information. Currently, the federal probe ran by the DOJ fraud section with federal prosecutors in Los Angeles. They are digging into how hedge funds tap into research and set up their bets, especially in the run-up to the publication of reports that move stocks. For example, in the “Fake McKinsey White Papers” created by Kleiner Perkins, Draper Fisher, Greylock, et al is a classic example. These publications were used to manipulate energy markets for Tesla, batteries, solar and etc.
56. McKinsey produced and released hundreds of biased reports for the Obama financiers to push “Cleantech” and lithium-ion batteries which Obama’s financiers exclusively owned. McKinney’s founder is quoted as promoting “monopolies” and “competitor destruction via lies.”
57. “While one is prying into financial relationships between hedge funds and researchers, and hunting for signs that money managers sought to engineer startling stock drops or engaged in other abuses, such as insider trading, the California politicians must not be ignored, protected, or given a pass because they are friends with some DOJ officials or because it is “politically embarrassing” for certain elitists social lives...”
58. Plaintiffs have sworn, warranted, and certified that these West Coast politicians are engaging in felony organized crime using the stock market to receive bribes from companies that they favor, and, or own.
59. Tellingly, in this inquiry’s sweep means federal investigators are examining trading in at least several dozen stocks, including well-known short targets

1 such as Luckin Coffee Inc., Banc of California Inc., Mallinckrodt Plc and  
2 GSX Techedu Inc.

3 60. All reporters are watching to see if they hear that any federal investigators are  
4 ignoring the SpaceX, Tesla, Netflix, Google, Instagram, Facebook, etc. stock  
5 market payola to politicians because there will be hell to pay.

6 61. Peter D. Cair is referred to as the FBI’s “Elliot Ness” in San Francisco. He  
7 busted one of the early NETFLIX stock swindles. More recently, Other  
8 Netflix engineers were caught in stock frauds. Plaintiffs have asked why did  
9 the investigations not, though, go all the way up to Obama and Susan Rice  
10 and their Netflix “trades”?

11 62. The federal investigators must scrutinize over one hundred tech firms WITH  
12 the help of unbiased SEC and FTC investigators and those investigations are  
13 underway.

14 63. Toronto-based Anson Funds and anonymous researcher Marcus Aurelius  
15 Value are among the firms involved in the inquiry.

16 64. Other prominent firms that circulated research on stocks under scrutiny  
17 include Carson Block’s Muddy Waters Capital and Andrew Left’s Citron  
18 Research. The investigations, though, **MUST** look at the deeply  
19 compromised McKinsey Consulting, which the Silicon Valley oligarchs  
20 lobby the feds to avoid looking.

21 65. The U.S. probe finally opens yet another front in an already treacherous era  
22 for those who try to profit on stock drops. Some bearish funds gave up as  
23 government stimulus buoyed prices during the pandemic. That pressure  
24 intensified as retail investors organized counterattacks on popular short  
25 targets, bidding up shares to inflict losses on hedge funds, this year. By late  
26  
27  
28

1 January, Citron vowed to give up short-selling research and focus on long  
2 bets.

3 66. Meanwhile, companies criticized by short-sellers have become increasingly  
4 bold in firing back, sometimes launching legal battles even as they face  
5 government probes that support short-sellers such as theses. Several  
6 corporate executives have been hoping U.S. authorities might help to further  
7 shift the focus to investors' tactics. Some examples of companies in which  
8 there are government probes are Eric Schmidt, Larry Page, Elon Musk, Mark  
9 Zuckerberg, Steve Jurvetson, Goguen, et al.

10  
11 67. Government attorneys are trying to determine whether short-sellers engaged  
12 in some form of deception -- say, by misleading the public about their  
13 financing of independent research, violating confidentiality agreements with  
14 authors, or orchestrating stock plunges to panic shareholders and exacerbate  
15 selling. The reality is that THEY DID and West Coast politicians' profit from  
16 those crimes as payola.

17  
18 68. DOJ has a database to look at every cent that moved in and out of various  
19 accounts of members of Congress. Nancy Pelosi's has over twenty-two and  
20 more family trusts, bank accounts, and investment bank funds for the last 20  
21 years. The evidence is overt and tracks straight back to the "Enterprise," but  
22 it is DEEPLY covered up by those who are friends with Pelosi at DOJ and  
23 other agencies. These crimes have been covered up. These blatant acts are in  
24 themselves a felony. If it were the average person, criminal charges would  
25 have been filed. Not in this case, instead, these criminal acts are swept under  
26 the rug. There is no harm or damage to these parties only that the parties are  
27  
28

getting richer without the public knowing what really is going on behind the silent curtain.

69. Hedge funds are known to strike a wide variety of deals with researchers, sometimes paying handsome subscription fees for fresh insights into possible corporate trouble, or even becoming an author’s primary source of funding. In one example, prominent financial investigator Harry Markopolos, who normally makes money from whistle-blower awards, said he partnered with a hedge fund to share profits when he released a report on General Electric Co. Politicians get the profits from such deals in exchange for keeping competitors to Tesla and SpaceX from getting funded.

70. Some hedge funds have been known to suggest targets to researchers, who then deliver scathing reports that harm companies that Senators own the stocks in.

71. One cautionary tale emerged in court after Dallas-based Sabrepoint Capital agreed to pay a short-selling researcher a monthly retainer of \$9,500 in 2018. Sabrepoint encouraged him to dig into real estate company Farmland Partners Inc. The researcher, who also wrote publicly under a pseudonym, later published an article on Seeking Alpha, setting off a 39 percent drop in Farmland’s share price. The company sued and used a judge’s order to force him to reveal his identity: Quinton Mathews

72. The entire stock market just is a well-oiled fraud that only profits a few oligarchs and most West Coast Senators.

73. Mathews later said in a statement that he subsequently “learned” his article “contained inaccuracies and false allegations” and retracted it. He and

25  
26  
27  
28

1 Farmland reached a settlement. Sabrepoint has said it did not know about the  
2 Seeking Alpha article.

3 74. Farmland also is on the list of stocks that the Justice Department is  
4 examining. Lawyers for Sabrepoint and Mathews declined to comment.

5 75. The Justice Department unit managing the inquiry already has a formidable  
6 reputation on Wall Street. It recently brought several cases against global  
7 banks and traders for illegal spoofing of precious metals and Treasury  
8 futures. As part of that probe, JPMorgan Chase & Co. paid more than  
9 US\$900 million in penalties after its traders placed and canceled orders for  
10 commodities to benefit positions held by the bank or prized hedge fund  
11 clients. Those cases were brought by analyzing trading data for suspicious  
12 patterns and then attributing it to individual traders. The DOJ must GO TO  
13 THE TOP of these mobsters and take out Goldman Sachs bosses and U.S.  
14 Senators that run this MAFIA and the Elon Musk's and Eric Schmidt's that  
15 are their operatives.  
16

17  
18 76. While prosecutors in the short-selling investigation issued subpoenas as  
19 recently as October, the effort has been underway much longer. It is time for  
20 perp walks of Senators and not just the low-level flunkies. The DOJ will find  
21 out the truth and end fracas.

22  
23 77. These inquiries gained momentum after U.S. lawmakers called for more  
24 scrutiny of short-sellers following the so-called meme-stock trading frenzy  
25 that erupted in January. In a single week that month, retail investors sent the  
26 price of GameStop Corp. soaring more than 700 percent before brokerages  
27 began limiting bets. Some organizers of the buying spree claimed hedge  
28 funds had been unfairly using their market influence to drive down stocks.

78. The compromised Senators have held multiple hearings on the fracas, at times discussing whether to force short sellers to boost disclosures but their hand-wringing is all for show. There is no real intent to expose or show what is really going on. These Senators fear that if the truth comes out. It will have a devastating impact on not only them personally but all those associates as well.

79. Academics have been encouraging U.S. authorities to address the possibility that short sellers are laying out their cases against stocks, then using the impact of that news to quickly reap gains and quietly move on.

80. Early last year, Mitts and about a dozen other prominent securities-law professors urged the SEC to write rules requiring that short sellers who voluntarily reveal bets against a stock be required to disclose when they have exited the position. The professors also asked the regulator to write a new rule that would make closing a short position immediately after disseminating a negative report -- with an intent to do so upon publication -- constitute market manipulation.

81. One of the most powerful lawmakers in the U.S. defended the right of congresspeople to trade stocks. Pelosi, Feinstein, Reid, Harris, and other California politicians own Silicon Valley companies Google, Facebook, Netflix, Apple, Facebook, Tesla, SpaceX, and YouTube which provides them funds and cash. They defund their competitors and put hit-jobs on those competitors, who are their own constituents. These politicians block government actions that would regulate these companies and laws designed to control the corruption and public safety hazards of these companies.

83. When asked about the issue during a press conference, House Speaker Nancy Pelosi (D-Calif.) said that "We're a free market economy" and lawmakers "should be able to participate in that." That reply was an insincere, pandering, smokescreen of a lie!

84. For example, Pelosi's own stock portfolio, which gained over \$65 million in value between 2019 and 2021, has often been the subject of scrutiny. The Stop Trading on Congressional Knowledge (STOCK) Act, which was passed in 2012, is designed to combat insider trading by lawmakers, who many across the spectrum argue have too much access to inside information to be able to trade stocks ethically. In October, the Federal Reserve banned its officials from owning individual stocks. In March 2020, four senators were accused of insider trading and investigated by the Justice Department when they sold off stocks ahead of the COVID-19-induced economic downturn.

85. Voices across the spectrum, especially on the right but also on the left, criticized Pelosi's comments and questioned her position. Many argue that lawmakers since have access to information that the public does not, and because they also can write and pass policy, they should not be allowed to buy and sell individual stocks and other assets. Some on the right highlighted silence from other progressives in response to Pelosi's statement despite their previous opposition to the practice.

28

86. Nancy Pelosi owns more than \$500,000 in Apple stock, according to her financial disclosure reports. Pelosi is also the speaker of the House. Congressional Democrats and Republicans alike have introduced multiple antitrust bills that would affect Big Tech companies.
87. The CEO of Apple, Tim Cook, called Pelosi personally in June and told her not to move ahead on these bills. The House Judiciary Committee passed six of these bills in June. Not one of them has seen movement on the House floor in six months, with some reports pinning the inaction on the speaker.
88. In January of 2021, Pelosi’s husband, Paul, bought at least a quarter million in “call” options for Apple, which is a more sophisticated way of betting on a stock going up in value. Paul Pelosi also bought at least half a million in call options for Tesla, which stood to get subsidized by the Build Back Better bill his wife shepherded through the House.
89. Pelosi and her family are already extraordinarily rich, and nobody but the Pelosi’s. themselves knows the motivations of Nancy Pelosi or the calculations of Paul Pelosi. But still, it ought to raise eyebrows that the speaker of the House keeps taking actions that benefit her stock portfolio and not the public. The leader of the House such as Pelosi should not take advantage of the public trust.
90. Yet. Pelosi has stated that there should be no restrictions on her ability to buy and sell stocks in the companies Plaintiffs are regulating, subsidizing, protecting, and taxing. Pelosi, says lawmakers/Capitol staff should not be prohibited from trading stock: "This is a free market, we are a free-market economy, they should be able to participate in that."

26  
27  
28

91. Pelosi has a long history of entangling her policymaking with her families profit-making. Peter Schweizer, in his book, *Throw Them All Out*, documented how Pelosi and her husband have gained insider status and made millions betting on companies that were directly involved in pending legislation.
92. Plaintiffs have attempted hundreds of “proper procedure” efforts to resolve this matter in writing but government officials either: 1.) Stonewall any response, or 2.) Get fired or transferred if they investigate the matter, or 3.) Send a generic non-responsive form letter, or 4.) Finger point to another agency in an endless runaround.
93. Plaintiffs was attacked by government-financed, directed, and resourced hired attack services that had command-and-control operated by government officials.
94. The GOVT has spent over ten times more money on delaying the payment of funds to the Plaintiffs than if they had just settled with Plaintiffs in the first place. The GOVT has exacerbated the case to the point that it has gained thousands of times more media coverage than if it had just settled with Plaintiffs in the first place. The GOVT has wasted vast amounts of taxpayermoney and created an international media incident when those losses could have been entirely avoided if they had just settled with Plaintiffs and been responsive to the Plaintiffs, in the first place.
95. Many government officials, up to and including the U.S. Attorney General, The Secretary of Energy, The Director of the FBI, etc., have been fired over this case and related matters, due to their attempts to manipulate government funds and resources to inure to a cartel of insiders who backed those officials’

1 appointments to those positions. (i.e.: The Covington & Burling files)  
2 LDLinsiders who backed those officials’ appointments to those positions.  
3 (i.e.: The Covington & Burling files) LDLinsiders who backed those  
4 officials’ appointments to those positions. (i.e.: The Covington & Burling  
5 files)

6 96. Plaintiffs became a government witness and reported on crimes by  
7 government officials. In reprisal, revenge, vendetta, retaliation, and  
8 retribution, Plaintiffs have been severely harmed. The angry government  
9 officials took away the Plaintiffs QUALITY OF LIFE. Plaintiffs have lost  
10 everything which includes his house, fiance, income, job, life savings, brand,  
11 and every source of income because of the use, by Defendants of their  
12 sophisticated spy-craft type attacks. They attacked him as reprisal/vendetta  
13 because he reported an organized crime activity involving famous U.S.  
14 Senators and their billionaire sex-addict financiers. (i.e.: for context, look up  
15 the court cases of Jeffrey Epstein, Andy Rubin, Howard Rubin, Ed Buck, and  
16 the hundreds of other related sex cult cases in the federal courts on  
17 <http://www.pacer.gov>).

18  
19  
20 97. The Plaintiffs served the public, only to have the criminals they investigated  
21 get hundreds of billions of dollars, at the expense of the Plaintiffs and public  
22 tax dollars, while Plaintiffs got nothing and lost everything.

23  
24 98. It is now well documented in court records and in federal investigations that  
25 over 120 companies (listed by name, below, in the Exhibits) sell attack  
26 services (“hit-jobs”) to well-known politicians.

27 99. The Plaintiffs investigators have proven that kill services (like Gawker-  
28 Gizmodo, Black Cube, Fusion GPS, etc.) were hired by public officials and

1 aimed at one the victims because of their effective law enforcement cases.  
2 Police records prove that the arrested and/or charged financiers of these  
3 public officials (i.e.: Howard Rubin, Ed Buck, Roger Boas, Jeffrey Epstein,  
4 Joe Lonsdale, Eric Schmidt, Andy Rubin, Sergy Brin, Steve Bing, Michael  
5 Goguen, Forrest Hayes, Tom Perkins, etc.) ran a national executives-only sex  
6 cult in which some victims were murdered, and many were underage. The  
7 depth of their sick depravity proves that the perpetrators will stoop to any  
8 crime, using the highest levels of government resources, to cover-up their  
9 crimes. Plaintiffs helped investigate some of these perverted perpetrators and  
10 has had government agencies deployed to attack him in reprisal, retribution,  
11 retaliation efforts as payback. The FBI has the full capacity and resources to  
12 easily confirm this via an interview and investigation of the Defendants hired  
13 attackers, specifically Nicholas Guido Denton, John Herrman, Gabriel  
14 Darbyshire, Patrick George, Jay Carney, Robert Gibbs, Adrian Covert, John  
15 Cook, Elon Musk, and those other parties listed herein, and, in fact, may have  
16 already done so. The FBI will be subpoenaed in this matter.

17  
18  
19 100. Plaintiffs investigators have proven that kill services (like Gawker-  
20 Gizmodo, Black Cube, Fusion GPS, etc.) were hired by public officials and  
21 aimed at one the victims because of their effective law enforcement cases.  
22 Police records prove that the arrested and/or charged financiers of these  
23 public officials (i.e.: Howard Rubin, Ed Buck, Roger Boas, Jeffrey Epstein,  
24 Joe Lonsdale, Eric Schmidt, Andy Rubin, Sergy Brin, Steve Bing, Michael  
25 Goguen, Forrest Hayes, Tom Perkins, etc. were responsible for running a  
26 national executives-only sex cult in which some victims were murdered, and  
27 many were underage. The depth of their sick depravity proves that the  
28

1 perpetrators will stoop to any crime, using the highest levels of government  
2 resources, to cover up their crimes. Plaintiffs helped investigate some of these  
3 perverted perpetrators and has had government agencies deployed to attack  
4 him in reprisal, retribution, retaliation efforts as payback. The FBI has the full  
5 capacity and resources to easily confirm this via an interview and  
6 investigation of the Defendants hired attackers, specifically Nicholas Guido  
7 Denton, John Herman, Gabriel Darbyshire, Patrick George, Jay Carney,  
8 Robert Gibbs, Adrian Covert, John Cook, Elon Musk, and those other parties  
9 listed herein, and, in fact, may have already done so. The FBI will be  
10 subpoenaed in this matter.  
11

12 101. The Silicon Valley tech oligarchs from Tesla, Google, Facebook,  
13 Kleiner Perkins, etc., manage a large part of these crimes. For example, one  
14 applicant's Senators have made many tens of millions of dollars in profits  
15 and bribes off (hidden in real estate (i.e.: [https://www.wsj.com/articles/big-  
16 tech-companies-amass-property-holdings-during-covid19-pandemic-  
17 11632821401..](https://www.wsj.com/articles/big-tech-companies-amass-property-holdings-during-covid19-pandemic-11632821401..)  
18

19 102. Plaintiffs was specifically and illegally excluded from participation in  
20 funding, benefits, jobs, and income by major political figures, including U.S.  
21 Senators and White House executives who he knew personally, and their  
22 Silicon Valley oligarch financiers. They attacked him as reprisal because he  
23 would not cooperate with their sex trafficking, tax evasion, off-shore money  
24 laundering, political bribery quid-pro-quo, revolving door payola frauds,  
25 foreign nation-sponsored domestic manipulations, stock market rigging,  
26 internet censorship, and search engine manipulation, and other crimes.  
27  
28

1  
2  
3  
4  
5  
6  
7  
103. The perpetrators attacked the Plaintiffs in retaliation because they reported their crimes to federal police. They attacked him as revenge because his products obsoleted their products. They attacked him using taPlaintiff 42ayer-funded state resources. That is a felony violation of the law. The ongoing cover-up of these crimes and attacks is also a felony violation of the law. Plaintiffs are owed damages compensation, witness fees, and back-pay.

23  
104. In 1988 The Federal Office of Personnel Management ranked this victim, known herein as Plaintiffs”, with a top eighty-five percentile ranking as a Criminal Investigator in the 1811-C nationals when he was being solicited by the government for cross-border casework as a Federal Criminal Investigator (See OPM documents, attached). In other words, he placed top-in-the-nation when the government assessed his criminal investigation skills. His father, an electronics signals intelligence analyst specialist with the U.S. Army and grandfather, a U.S. Air Force Colonel had both been federal intelligence specialists in a portion of their careers. By 1988, Plaintiffs had already been working on organized crime and corruption matters since 1978. His white-collar and corruption cases were under-cover and sting operations and were side projects keyed off his public work as a private sector management and technology specialist for corporations and community programs.

24  
25  
26  
27  
28  
105. The Plaintiffs attended many social affairs with some of the politicians. Many of the events were in public but some were in Plaintiffs private home. Some of those figures informed Plaintiffs of their organized crime scheme, the participants, and the operators. They invited Plaintiffs to become part of their scheme

106. As a White House and City Hall commended Federal patent-awarded inventor/CEO, Plaintiffs have been government, and network newscast, documented as the first to invent, launch, operate, and deliver the companies and technology that Google, Facebook

107. Plaintiffs have been covertly reporting to GAO, FBI, FTC, SEC, FEC, IG OSC, California Fair Political Practices officials and Senators and others for decades

108. Plaintiffs cases included notorious subjects that most people have seen in the news headlines. Lately, by partnering with the messaging, media outreach, investigations and demands of <https://socialsecurityworks.org>, <https://seniorsleague.org>

109. AARP, ICIJ, and other related organizations, and using Streisand Effect amplifiers, torrents and mass social media processing, the Plaintiffs, and his peers were able to get the heads of the Social Security Administration, the heads of The U.S. Government and the Attorney General fired from their jobs for corruption and abuse of public funds.

110. Due to the effectiveness of the Plaintiffs associate’s anti-corruption efforts, public officials have engaged in reprisal/retaliation attacks on the Plaintiffs and those officials engaged in felonies by doing that.

111. In the Solyndra/Silicon Valley Cartel matter, Plaintiffs did “too good a job” and broke up one of the largest corruption matters in America with roots that ran all the way to the Oval Office. The FBI raid on Solyndra was only the beginning. Energy and Media Industry crimes like these have a SIX TRILLION DOLLAR upside if the crooks can pull them off.

112. The United States Congress had awarded Plaintiffs, and his team, a commendation, and a multi-million-dollar federal contract to build America’s energy “back-up” plan should the Middle East oil interests ‘go sideways,’ as they, indeed, have.

113. Plaintiffs and his engineering team, as early as 2005, had informed the Department of Energy, in writing that, as Lithium-ion batteries age, the ‘dendrite defects’ in their internal chemistry cause the batteries to constantly increase their tendency to blow up. This was proven via x-ray analysis of lithium-ion batteries, particularly those from Panasonic that are used by Tesla Motors. This data was intentionally covered up by White House and Department of Energy executives because they wanted those “trillions” of dollars of profits in their pockets from the fabled Afghanistan mining fields

114. External forces, moisture, ambient energy waves and other factors, increase their tendency to self-ignite. Department of Energy Secretaries of Energy, their staff, White House, and CIA executives have been proven, via their public stock brokerage records, to own lithium-ion battery companies and child labor rare earth mining interests.

115. That is why they cover up the dangers of toxic lithium ion (the burning smoke of which causes cancer, brain, and fetus damage) and sabotage domestic efforts to market competing energy storage like fuel cells, ultra-capacitors, alkali metal-chlorine batteries, in-car batteries, beta-voltaic batteries, tritium batteries and competing alternative energy storage: in violation of anti-trust laws

116. The Secretary of Energy Jennifer Granholm’s Proterra Buses is now blowing up, Tesla is known for blowing up, Bolt and Volt cars are now

blowing up and under massive recall. Ener1 batteries destroyed millions of dollars of Fisker’s when they got wet... The U.S. Government has hundreds of reports proving this to be a fact

117. The victim has, for years, filed all the proper forms, gone “through proper channels” and inquired as to next steps from officials at the highest levels. For his efforts he has been rewarded with cover-ups, lies, obfuscation, stonewalling and avoidance. The victim now has one of America’s largest collections of “Finger-Pointing” letters from government agencies and officials, each correspondence, essentially, saying: “Oh, it’s not us go try DOJ or... (FBI, SEC, GAO. ....” No government body will step up to resolve the issue or allow their IG to investigate or let “302 reports” be written for interviews that never happen. It is the RUN-AROUND on an epic scale

118. Today, on the other hand, Plaintiffs, has had every source of income (See reprisal attack details, below) blockaded by the government as reprisal for whistleblowing.

119. Ninety percent of the public officials with authority own stock market assets in, or are financed by, Plaintiffs competitors. Workers at government agencies serving Plaintiffs have been exposed as extreme ANTIFA-type biased activists in their leaked emails, social media postings, web photos, and recorded conversations.

120. Plaintiffs are a claimant making claims for witness fees, informant fees, rewards, whistle-blower fees, legal fees, and damages caused by this matter.

121. Plaintiffs demands legal counsel be provided by your office, for the claimant, because his rights to fair legal representation, his civil rights, and

27  
28

1 Constitutional rights have been blockaded by these reprisal attacks, in  
2 violation of the law.

3 122. Plaintiffs have asked for a grant. After being previously awarded a  
4 multi-million dollar valued, fully executed contract in 2005; On or about  
5 November 10, 2008, Plaintiffs at the request of U.S. Senators and Department  
6 of Energy officials applied for a \$40 million ATVM loan to build a scalable,  
7 innovative, and efficient electric car for government agencies including the  
8 Pentagon. The GOVT’s own Sandia National Laboratory (“Sandia”) was  
9 identified as a project subcontractor.  
10

11 123. This application was in response to a GOVT solicitation. GOVT was  
12 supposed to evaluate loan applications on a “first-in, first-out” basis and to  
13 make ATVM loan funds available in January 2009 for successful applicants.  
14

15 124. Plaintiffs car design used advanced “hot-swap cartridges” to provide a  
16 nearly unlimited range, cost less than \$20,000 in the base configuration,  
17 required no gasoline or extension cords to charge, required no garage, could  
18 be used by apartment dwellers, was easy to repair and build, and used “damp  
19 down” crash effect reduction materials.

20 125. Plaintiffs had operations in Detroit, the Midwest, and the San  
21 Francisco Bay area. A critical Plaintiffs innovation, based on a decade of  
22 research, was the use of next-generation polymer plastics in the automotive  
23 body. By replacing metal doors, body panels, hoods, and roofs with  
24 lightweight polymer plastics on a carbon fiber frame and lightweight alloy  
25 chassis, Plaintiffs build a four-seat, SUV-format vehicle with a curb weight  
26 of less than 1,400 pounds, or approximately one-third the weight of a Toyota  
27 Prius. This, in turn, enhanced vehicle efficiency and performance.

126. PLAINTFF’s pressure membrane technology was well proven and widely used in a variety of applications, including zodiac (inflatable) boats used in leisure, commercial and military applications, airbags, Mars landing equipment, and even buildings and arenas with polymer membrane coverings.

127. Plaintiffs car’s key parts were built and evaluated, or already existed in off-the-shelf components proven in the industry for over a decade. Autodesk and other engineering software allowed for full virtual prototyping and operational testing of the design

128. Plaintiffs products were the top of the line for their precision and design. For consideration of Plaintiffs ATVM loan application, Defendants promised to protect Plaintiffs technical and business. The DEFENDANT used the products and information of the Plaintiffs without his permission or consent

129. Plaintiffs financial and technical partners included Ranson Green Community Development Foundation (a 501(c)(3) nonprofit), ZAP and Detroit Electric, major automobile manufacturers and national laboratories.

130. Plaintiffs offered GOVT asset collateral of over \$100 million to secure the ATVM loan.

131. Plaintiffs loan application revealed sensitive and confidential technical and business information as defined by 10 CFR §§ 1004.10(b)(4), 11 and 5 U.S.C. § 552(b)(4) to GOVT. This information included fuel cell and hydrogen storage technologies, fuel cassettes, and pressure membrane body parts.

132. Plaintiffs also disclosed his issued patents for a solid-state energy storage system and an electric and hybrid vehicle system with an estimated 3rd party appraised value of \$17,291,568.64; another U.S. Patent with an estimated 3rd party appraised value of \$10,524,792.26; another U.S. Patent with an estimated 3rd party appraised value of \$5,607,695.94; another U.S. Patent with an estimated 3rd party appraised value of \$104,072,538.36; and other trade secrets, trademark, and intellectual property assets. These IP assets were offered as collateral to GOVT.

133. In consideration of Plaintiffs ATVM loan application, Defendants promised to protect Plaintiffs technical and business secrets and not to infringe its patents. and requesting certain additional information. **See Exhibits where** Plaintiffs provided this information and <http://www.uspto.gov>

134. On December 31, 2008, Seward informed Plaintiffs that its application was complete and that GOVT would advise Plaintiffs if it needed additional information during the application review process. **See Exhibits.** Upon information and belief, Plaintiffs ATVM loan application was the first to be deemed complete.

107. Always relevant, Plaintiffs qualified for the ATVM loan under GOVT’s published underwriting criteria. For example:

Plaintiffs was an “automobile manufacturer” that demonstrated “improved fuel economy” as defined at 10 C.F.R. § 611.100(a)(1).

o Plaintiffs was “financially viable” as defined at 10 C.F.R. § 611.100(a)(2).

o Plaintiffs application satisfied all GOVT’s requirements under 10 C.F.R. § 611.101 et seq.

1 o Plaintiffs product satisfied all GOVT’s evaluation criteria under 10 C.F.R. §611.103(b). Among  
2 other things, Plaintiffs car used no gasoline and traveled over 125 miles on a single charge.

3 o Plaintiffs met all GOVT’s environmental requirements under 10 C.F.R. § 611.106 et seq.

4 o Plaintiffs was a “covered firm” as defined by GOVT at 10 C.F.R. § 611.207(a), and eligible for  
5 the set aside specified at 10 C.F.R. § 611.207(b).

6 o GOVT internal staff Excel comparison matrices placed Plaintiffs in the top 5% in overall  
7 comparison metrics of all applicants.

8  
9 108. GOVT began processing Plaintiffs ATVM loan application in or about January 2009. This  
10 process should have taken no more than several weeks.

11 109. However, GOVT did not promptly underwrite Plaintiffs application.

12 110. Plaintiffs was unaware that Defendants had “fixed” the ATVM loan process to benefit political  
13 donors. Plaintiffs also was unaware that Defendants had no intention of approving Plaintiffs ATVM  
14 loan application under any circumstances as a matter of reprisal for whistle-blowing and unfair  
15 business practices to avoid competition against Tesla and other Congressional stock holdings.

16  
17 111. Therefore, Plaintiffs repeatedly contacted GOVT to provide engineering, financial and other  
18 information in support of its application.

19 112. On April 23, 2009, Jason Gerbsman, the Chief of Staff and Senior Investment Officer, at the  
20 Loan Programs Office, Automotive Division, of GOVT, notified Plaintiffs that: Plaintiffs have  
21 submitted a complete application and has been assigned to both a technical eligibility and merit  
22 review team, as well as a financial viability analysis team. The technical team is close to finishing  
23 their evaluations on both eligibility and project merit, and the financial team will be launching a  
24 more detailed and interactive due diligence phase of the Plaintiffs application review very soon.

25  
26 Following the technical and financial evaluation under the second stage of the process, we will  
27 move into the underwriting phase where our goal is to negotiate a conditional commitment,  
28

1 including a detailed term sheet. This will be followed by the fourth phase of the loan process where  
2 the final details will be negotiated, and the loan will be close

3 113. On May 26, 2009, Gerbsman offered an in-person meeting to discuss “Plaintiffs next steps.”

4 114. On May 28, 2009, Plaintiffs flew a delegation from California to meet with Gerbsman, who  
5 said that GOVT had determined “everything was in order” with Plaintiffs ATVM loan application,  
6 that “everything looked good” and that Plaintiffs “appeared to be fully compliant and passed  
7 technical review.”

8 115. Shortly thereafter, Plaintiffs discovered that Tesla Motors, Inc. (“Tesla”) and Fisker Motors,  
9 Inc. (“Fisker”) had received and were receiving special assistance from GOVT staff with the  
10 ATVM loan application process. Fisker even had a business office in GOVT’s headquarters.  
11

12 116. On or about June 22, 2009, GOVT advised Plaintiffs that a Northern California solar energy  
13 company had requested a copy of Plaintiffs ATVM loan application from GOVT through the  
14 Freedom of Information Act (“FOIA”). Plaintiffs contacted this company to see why it was  
15 interested in Plaintiffs ATVM loan.  
16

17 117. Plaintiffs spoke with the company’s principal, who said that he had been “screwed over” by  
18 GOVT and wanted to know if others had a similar experience. He said that the company had  
19 suffered “bad dealings” with Matt Rogers, a “stimulus advisor” to the Chu from McKinsey &  
20 Company, and Steven Spinner, a key player in GOVT’s loan program office. Spinner, an Obama  
21 campaign bundler who raised millions for the President and who had been appointed to his  
22 government position in exchange for his fundraising, also had worked at McKinsey & Company  
23 and, according to his biography posted by the Center for American Progress, had served as an active  
24 advisor and investor to Tesla.  
25

26 118. Plaintiffs was told that Rogers and Spinner were “rigging the game.” It was given Spinner’s  
27 phone number and told to call Spinner and ask him why Plaintiffs ATVM loan application was not  
28 moving forward.

1 119. Plaintiffs texted Spinner and then called him. Spinner answered the phone and told Plaintiffs  
2 words to the effect of “Do not ever call me again. The awards have already been decided.”

3 120. On June 24, 2009, GOVT announced \$8 billion in ATVM loans to Ford Motor Company  
4 (“Ford”), Nissan North America, Inc. (“Nissan”) and Tesla. Tesla was the Plaintiffs competitor --  
5 received an ATVM loan of \$465 million at a rate of 1.6% from GOVT to manufacture an ePlaintiff  
6 42ensive electric car.

7 121. On June 29, 2009, Plaintiffs wrote to Gerbsman again asking for action on its ATVM loan  
8 application, pointing out that other lenders were hanging back until after GOVT issued its term  
9 sheets, the offering document issued by GOVT that specifies the detailed terms and conditions  
10 under which GOVT may enter a Conditional Commitment with the Applicant.

11 122. In the following weeks, authorized GOVT representatives repeatedly assured Plaintiffs that  
12 “everything was fine”, “everything is on-track”, and “you [WITNESS] appear to meet every  
13 criterion” with respect to an ATVM loan. Plaintiffs was even told that “we [GOVT] should be able  
14 to announce [an approved ATVM loan] any day now...”  
15

16 123. However, on August 21, 2009, Seward denied Plaintiffs ATVM loan application. **See Exhibit**

17 124. In an email to GOVT’s Chris Foster, Plaintiffs requested GOVT’s merit review documents and  
18 asked how GOVT technical evaluators could conduct a ten-month comparative merit review of  
19 Plaintiffs ATVM loan application without speaking to any single company engineer or senior  
20 project staff member for more than 1% of the time that GOVT staff addressed Tesla, Nissan Ford,  
21 and Fisker during the same review period.  
22

23 125. On or about August 26, 2009, Plaintiffs called Foster. Foster said GOVT had denied the  
24 application because Foster said Plaintiffs “electric car did not use E85 gasoline, Plaintiffs was not  
25 planning on building “enough” cars, Plaintiffs was not planning on selling cars to the government,  
26 Plaintiffs electric motors t and batteries were too futuristic and not developed for commercial use,  
27  
28

1 Plaintiffs car was a “hydrogen car,” and Plaintiffs had underestimated the cost of metal body  
2 fabrication.”

3 126. The reason given for the denial of the loan was based on false pretense.

4 127. These “reasons” were baseless pretexts to protect Tesla, and other insider stock holdings, that  
5 U.S. Senators and DOE executives held.

6 o None of the Plaintiffs competitors that were given ATVM loans to build electric cars used E85  
7 gasoline in their vehicles.

8 o Plaintiffs car was designed to be easily scalable, using “off the shelf” parts from existing  
9 commercial sources with multiple points of supply.

10 o Plaintiffs business plan specifically provided for large government and fleet sales. Plaintiffs  
11 “futuristic” electric motor and battery configuration had been in commercial and government use  
12 for decades.

13 o Plaintiffs car was an electric car, not a hydrogen car.

14 o Plaintiffs scar body contained minimal amounts of metal, using safer and easier to source and  
15 fabricate polymers and plastics.

16 128. Foster never provided Plaintiffs with GOVT’s merit review documents or described the  
17 applicable evaluation criteria. On September 21, 2009, Plaintiffs wrote to the Chu requesting  
18 reconsideration of GOVT’s ATVM loan denial. See Exhibit s.

19 129. Plaintiffs demonstrated that the stated reasons for GOVT’s denial were false. It asked Chu to  
20 explain why GOVT staff repeatedly assured Plaintiffs that approval would be forthcoming and that  
21 no additional information was necessary (leading Plaintiffs and its principals to ePlaintiff 42end  
22 huge sums of money in reliance thereon), and why government-crony companies that applied after  
23 Plaintiffs were reviewed earlier, given the benefit of extensive access to and interaction with GOVT  
24 staff (a benefit denied to Plaintiffs), and then awarded funds.  
25  
26  
27  
28

1 130. On October 23, 2009, Seward replied to Plaintiffs. **See Exhibit 5.** He did not answer Plaintiffs  
2 questions. Instead, he backfilled with new but equally baseless reasons for Plaintiffs rejection.

3 131. The reason given for the denial was unreasonable. To begin with, Seward said that Plaintiffs  
4 application was “deemed Substantially Complete on November 10, 2009.” In fact, Plaintiffs  
5 application had been deemed complete on December 31, 2008.

6 132. Seward said that the “proposed technology appeared to be at a development stage and not yet  
7 ready for commercialization” and that the “assumption that the vehicle concept would be ready for  
8 production in three years” was a “significant weakness” due to the “high level of risk associated  
9 with the design.” In fact, the Plaintiffs vehicle’s technology had been in use commercially for years  
10 by the U.S. Department of Defense, NASA, and the automobile industry; the politically connected  
11 companies that were awarded ATVM loan funds were no further ahead in production than  
12 Plaintiffs, and elements of Plaintiffs “elevated risk design” were already in use by Toyota and  
13 Nissan.  
14

15 133. The second reason given by Steward was baseless. Seward said, “the proposed project’s  
16 impact on fuel economy...was determined to be weak.” In fact, non-gasoline-powered automobiles  
17 are uniformly recognized to offer the most significant impact on fuel economy performance. The  
18 Plaintiffs vehicle promised even better fuel economy than any of the ATVM loan “winners” (Tesla,  
19 Nissan, Ford or Fisker) proposed or offers to this day.  
20

21 134. The third reason given by Steward was groundless. Seward said, “A review of the advanced  
22 fuels in your project and the feasibility of that energy source...was [sic] questionable.” In fact, the  
23 fuels, products, and subparts of the “questionable” energy source are readily available to consumers  
24 at REI Sporting Goods, Amazon.com and Safeway supermarkets.  
25

26 135. The fourth justification given by Steward for the denial was it was unrealistic. Seward said, “A  
27 review of the calculations and assumptions supporting your claims for reductions in petroleum use  
28 were deemed to be unrealistic.” In fact, over two hundred institutional research and white papers

1 from respected government and university agencies from around the world supported Plaintiffs  
2 claimed reductions.

3 136. Seward’s letter was the first time any of these issues had been raised by GOVT with the  
4 Plaintiffs, notwithstanding ten months of “underwriting,” and multiple meetings, phone calls, and  
5 emails. Incomprehensibly, GOVT had refused to consult with any of Plaintiffs engineers and denied  
6 Plaintiffs the “interactive” review that had been promised in April and had in fact been provided to  
7 Tesla, Fisker, Nissan, and Ford.

8  
9 137. DEFENDANTS did not review Plaintiffs ATVM loan application in good faith and in  
10 accordance with its regulations, policies, and promises. Instead, it stonewalled Plaintiffs.

11 138. Each application that the Plaintiffs presented was denied.

12 139. Or about February 1, 2009, Plaintiffs (through Plaintiff 30) applied for a \$15 million ATVM  
13 loan to help fund work with GOVT’s own Sandia National Laboratories (“Sandia”) to produce a  
14 “best of breed and state of the art” automobile energy storage system using Plaintiffs patented fuel  
15 cell technology.

16  
17 140. On April 10, 2009, Seward denied this application on the grounds that it “[did] not appear to  
18 be designed for installation in an advanced technology vehicle...” **See Exhibit 6.** At all times  
19 relevant, DEFENDANT knew Seward’s claim was false and a mere pretext to preserve ATVM loan  
20 funds for government-favored companies.

21 141. On April 11, 2009, Plaintiffs requested reconsideration, reminding Seward that the relevant  
22 patents provided the technology was for use in advanced technology vehicles, that Sandia’s vehicle  
23 technologies group was the prime subcontractor for the project, and that GOVT had funded the  
24 technology specifically for use in advanced technology vehicles. **See Exhibit s.**

25  
26 135. GOVT had funded the technology specifically for use in advanced technology vehicles. **See**  
27 **Exhibits.**

28

1 142. On May 13, 2009, Seward again denied the application because the technology was “not  
2 installed in the advanced technology vehicle.” This time, though, he asked for more information.

3 **See Exhibits.**

4 143. On June 3, 2009, Plaintiffs again requested reconsideration, pointing out that the device “must  
5 be installed prior to use in an advanced technology vehicle and are, accordingly, designed for such  
6 installation, and therefore... ‘qualifying components’” and answering Seward’s other questions. **See**

7 **Exhibits.**

8  
9 144. On or about February 1, 2009, Plaintiffs participated in a conference call with John Podesta,  
10 Chu, and Interior Secretary Kenneth Salazar during which Chu promised to waive the application  
11 fee.

12 145. On or about February 10, 2009, Plaintiffs (through Plaintiff 30) filed a LGP application with a  
13 cover letter stating that it was Plaintiffs understanding that GOVT had waived the application fee.

14 146. On February 26, 2009, GOVT’s Myrtle Gross called and said that the application fee of  
15 \$18,000 had to be paid and that funds needed to be wired by midnight for the LGP application to be  
16 considered. This was Plaintiffs first notice from GOVT that the agency had reneged on its promise  
17 to waive the LGP application fee.

18 147. Plaintiffs had access to the funds to make payment but could not complete the transaction by  
19 the midnight deadline.

20 148. On February 27, 2009, Daniel Tobin, GOVT’s Loan Programs Office Senior Investment  
21 Officer, called and said that there were “a few days of flexibility” to send in the application fee and  
22 promised to provide wire instructions.

23 149. Tobin also promised to “pre-review” the application and to call back with feedback. The  
24 Plaintiffs never heard back from Tobin or anyone else at GOVT. WITNESS repeatedly contacted  
25 Tobin by email, phone call and messenger, but neither he nor anyone else at GOVT would respond  
26 or provide wire instructions.  
27  
28

1 150. Instead, on April 9, 2009, Tobin dismissed Plaintiffs from the LGP without recourse, writing  
2 Plaintiffs that “due to non-remittance of the required application fee, your application will not be  
3 reviewed.” **See Exhibit**

4 151. GOVT ignored Plaintiffs request for reconsideration.

5 152. The Defendants did not use the loan program for the intended use. Instead, the loan program  
6 was done by a selection process that intentionally eliminate all those viable candidates for a loan  
7 such as a Plaintiffs.

8 153. GOVT’s ATVM loan program and LGP were not transparent, and GOVT’s underwriting  
9 criteria were easily skewed and manipulated by political officials, these programs became cash  
10 cows for government cronies.  
11

12 154. Plaintiffs discovered in or about the end of Dec. 2008 that Seward angered at Plaintiffs public  
13 complaints about GOVT’s ATVM loan and LGP administration told his staff in 2009 that it would  
14 be “a cold day in hell before I let [Plaintiffs] get any money.” Seward used his power to exclude  
15 ATVM loan PLAINTIF’s arbitrarily, intentionally, and wrongly and LGP applications.  
16

17 155. In February 2011, GAO issued an investigative report on GOVT’s ATVM program. See  
18 Exhibit s “Advanced Technology Vehicle Loan Program Implementation Is Under Way, but  
19 Enhanced Technical Oversight and Performance Measures Are Needed,” GAO-11-145 (Feb 28,  
20 2011) (the “GAO ATVM Loan Report”). It found that GOVT had made billions in loans without  
21 engaging “engineering expertise needed for technical oversight.... As a result, GOVT cannot be  
22 assured that the projects will be delivered as agreed. [Furthermore], GOVT has not developed  
23 sufficient performance measures that would enable it to fully assess the extent to which it has  
24 achieved its...program goals.”  
25

26 156. In truth, GOVT’s ATVM loan program was nothing more than a veil for political officials to  
27 steer hundreds of millions of taxpayerdollars to government cronies, including Tesla and Fisker.  
28

1 157. For example, Tesla’s loan of \$465 million was announced on June 24, 2009. This loan was  
2 obtained in material part through the efforts and influence of Steven Westly who had “bundled”  
3 hundreds of thousands of dollars in political contributions. Westly sat on Tesla’s board from March  
4 2007 to December 2009, the time in which GOVT made the ATVM loan.

5 158. In consideration for his financial contributions, Westly was given unusual Executive Branch  
6 access privileges and an appointment on a key advisory board counseling Chu. This allowed Westly  
7 to help shape GOVT policy to advance his personal business interests.

8 159. GOVT’s Spinner, who played a key role in the ATVM loan program, was also a political  
9 “bundler,” and a former Tesla investor and advisor. Additionally, Tesla’s founder and CEO also  
10 made large political contributions to Democrats, including President Obama, in or about 2008.

11 160. On November 12, 2012, Tesla notified the Securities and Exchange Commission that: On  
12 January 20, 2010, we entered a loan facility with the Federal Financing Bank (FFB), and The U.S.  
13 Government (GOVT), pursuant to the Advanced Technology Vehicles Manufacturing (ATVM)  
14 Incentive Program. This loan facility was amended in June 2011 to ePlaintiff 42and our cash  
15 investment options, in February 2012 to modify the timing of certain future financial covenants and  
16 funding of the debt service reserve account, and in June 2012 to allow us to effect certain initiatives  
17 in our business plan. We entered another amendment with the GOVT in September 2012 to remove  
18 our obligation to comply with the current ratio financial covenant as of September 30, 2012 and  
19 amend the timing of pre-funding the principal payment due in June 2013. Under the GOVT Loan  
20 Facility, the FFB has made available to us two multi-draw term loan facilities in an aggregate  
21 principal amount of up to \$465.0 million. Up to an aggregate principal amount of \$101.2 million  
22 had been made available under the first term loan facility to finance up to 80% of the costs eligible  
23 for funding for the powertrain engineering and the build out of a facility to design and manufacture  
24 lithium-ion battery packs, electric motors, and electric components (the Powertrain Facility). Up to  
25 an aggregate principal amount of \$363.9 million has been made available under the second term  
26  
27  
28

1 loan facility to finance up to 80% of the costs eligible for funding for the development of, and to  
2 build out the manufacturing facility for, our Model S sedan (the Model S Facility). Under the  
3 GOVT Loan Facility, we are responsible for the remaining 20% of the costs eligible for funding  
4 under the ATVM Program for the projects as well as any cost overruns for each project. As of  
5 August 31, 2012, we have fully drawn down the facilities.

6 161. Also on November 12, 2012, with \$465 million of taxpayer money spent, Tesla reported  
7 delivering a grand total of 256 vehicles for sale to customers.

8 162. Fisker's ATVM loan of \$528.7 million was announced on September 22, 2009, a month after  
9 Seward rejected Plaintiffs application for a \$40 million ATVM loan.

10 163. This loan was obtained in material part through the efforts and influence of John Doerr, a  
11 major political contributor and government crony. At all times relevant, Doerr was a partner in the  
12 investment firm of Kleiner, Perkins, Caufield & Byers, along with former Vice President Al Gore,  
13 among others.

14 164. Kleiner, Perkins was a major Fisker investor. Doerr and his partners donated millions to the  
15 2008 Obama campaign and related political causes, obtaining in exchange preferential access and  
16 treatment for their business interests. Among other things, Doerr's political contributions produced  
17 high-level Executive Branch access and a seat on the President's Council on Jobs and  
18 Competitiveness.

19 165. When GOVT announced Fisker's half-a-billion-dollar loan facility, it claimed that Fisker's  
20 ATVM loan would "create or save about 5,000 jobs for domestic parts suppliers" by funding "two  
21 lines of plug-in hybrids." Approximately \$169.3 million of taxpayer funds were for "engineering  
22 integration" need for final assembly of a high-cost electric luxury car in Finland. Approximately  
23 \$359 million of taxpayer funds was for manufacturing a low. cost plug-in hybrid sedan in the U.S.  
24 through "Project Kx." See Exhibit Conditional Commitment Letter by and between United States  
25 Department of Energy and Fisker Automotive, Inc. – Execution Copy (September 18, 2009).

1 166. When GOVT approved Fisker’s loan, the Project Kx car did not exist, not even in prototype.  
2 Upon information and belief, GOVT lacked even detailed engineering and production specifications  
3 for the car. Nevertheless, Defendants parroted Fisker’s claim that “up to 75,000-100,000 [Project  
4 Kx] vehicles will roll off assembly lines in the U.S. every year beginning in late 2012” to justify the  
5 Kx loan.

6 167. In 2011, Fisker promised that the Kx vehicle, which had yet to be publicly show, would be in  
7 mass production by the end of 2012.

8 168. On or about 2011, Fisker promised that the Kx vehicle, which had yet to be publicly show,  
9 would be in mass production by the end of 2012.

10 169. On or about February 2012, after Fisker had borrowed over \$170 million, GOVT froze  
11 Fisker’s ATVM loan credit facility because Fisker missed key production milestones.

12 170. On or about June 2012, Fisker finally revealed the Project Kx prototype, a “low cost” \$55,000  
13 auto called the “Atlantic.”

14 171. On or about October 18, 2012, Fisker reported that Atlantic production would be delayed until  
15 2014 or 2015.

16 172. Since 2008, Fisker has sold approximately 1,500 vehicles world-wide.

17 173. Upon information and belief, the over \$170 million in taxpayermoney GOVT has given to  
18 Fisker has “saved or created” fifty or fewer jobs.

19 174. In March 2012, and in response to complaints by Plaintiffs and others, GAO issued an  
20 investigative report on GOVT’s LGP performance. See Exhibit s “GOVT Loan Guarantees: Further  
21 Actions Needed to Improve Tracking and Review of Applications,” GAO-12-157 (March 2012).  
22 GAO found that GOVT treated LGP applicants inconsistently, favoring some and disadvantaging  
23 others; lacked systematic mechanisms for LGP applicants to administratively appeal its decisions;  
24 often ignored its own underwriting standards and skipping review steps; and re-reviewed rejected  
25  
26  
27  
28

1 applications on an ad hoc basis. In fact, GOVT’s “Omitting or poorly documenting reviews reduces  
2 LGP’s assurance that it has treated applicants fairly and equitably.”

3 175. In October 2012, emails were released confirming that at least a number of LGP decisions  
4 were based on political factors not GOVT’s stated evaluation criteria. See e.g., Exhibit s (Email  
5 from Jonathan Silver, former Executive Director, GOVT Loan Programs Office, to James C.  
6 McCrea, GOVT LPO credit adviser, dated June 25, 2010, stating “WH wants to move Abound  
7 [project] forward. Policy will have to wait...”); Exhibits (Email from James C. McCrea to B.  
8 Oakley stating “Pressure is on real heavy...due to interest from VP”); Exhibit s (Email from  
9 Monique Fridell to Kimberly Heimert, et al. dated May 25, 2010, stating “GOVT has made a  
10 political commitment to get Unistar through the approval  
11

12 176. The process was by 6/15”; Exhibit 17 (Email from James C. McCrea to Monique Fridell dated  
13 June 1, 2010, stating “Secretary [of Energy] ...is adamant that this transaction is going to OMB by  
14 the end of the day Fri if not sooner. Not a way to do things but a direct order”)

15 177. OVT bent the rules for political allies such as Sen. Harry Reid and Rep. Steny Hoyer, while  
16 government crony companies received special personal access to high-ranking GOVT officials. See  
17 e.g., Exhibit s (Email from James C. McCrea to “barbiar” dated December 5, 2009, stating “[Harry]  
18 Reid may be desperate. WH may want to help. Short term considerations may be more important  
19 than long term considerations and what is a billion anyhow?”); Exhibit s (Email from James C.  
20 McCrea to Julie Stewart dated May 25, 2010, stating “7th Floor has decided mid-June CRB...there  
21 has been a commitment from S1 [Secretary Chu] to Steny Hoyer on this. Nothing like over-  
22 committing and under-delivering;” Exhibit s (Email from BrightSource Chairman John Woolard, an  
23 LGP applicant, to Jonathan Silver, GOVT Loan Office Director dated November 10, 2010, stating  
24 “Thanks for offering to meet at your house tomorrow morning.” Silver replied “Came [sic] anytime.  
25 Guest bedroom is ready.”). Defendants regularly slept with each other and at each other’s homes.  
26  
27  
28

**ADDITIONAL NOTES ON DEFENDANT’S OVERALL CORRUPT CRONY**

**ABUSE OF AND HARM TO Plaintiffs**

178. DEFENDANTS’ actions have consistently abused and caused harm to the Plaintiffs.

179. When DEFENDANTS “fixed” the ATVM loan and LGP programs to benefit government cronies, they knowingly and intentionally rendered the ATVM loan and LGP applications by Plaintiffs and other similarly situated companies futile and meaningless.

180. DEFENDANT intentionally induced Plaintiffs and others similarly situated through multiple written and verbal representations from GOVT officials with actual and apparent authority to bind GOVT, to spend hundreds of thousands of dollars, and invest thousands of hours of engineering and professional time on a meaningless snipe hunt.

181. Defendants’ administration of the ATVM loan program effectively dried up all alternative sources of capital and denied Plaintiffs and others similarly situated access to private financing by delaying term sheets and/or wrongly denying ATVM loans, among other things. Defendants had actual or constructive knowledge that delaying or denying a small company’s ATVM loan application would be as a business death sentence.

182. DEFENDANTS’ administration of the ATVM loan program effectively dried up all alternative sources of capital and denied Plaintiffs and others similarly situated access to private financing by delaying term sheets and/or wrongly denying ATVM loans, among other things. Defendants had actual or constructive knowledge that delaying or denying a small company’s ATVM loan application would be as a business death sentence.

183. Chu and Seward skewed, manipulated, and fixed GOVT’s ATVM loan review process against Plaintiffs and other companies similarly situated to protect and advance the business and political interests of government cronies and caused Plaintiffs ATVM loan and LGP applications to be rejected on false bases and flimsy pretexts.

1 184. Some of the examples of the skewed and manipulated actions of the government officials are  
2 as follows:

3 a. Government cronies who applied for the ATVM loan after Plaintiffs were reviewed earlier,  
4 walked through the “underwriting” process by GOVT staff and given the benefit of unique agency  
5 interaction, and then awarded funds.

6 b. GOVT staff first issued over twenty documents, public statements, policy notices, PowerPoints  
7 and other materials verifying that ATVM loans would be processed on a “first-come, first-served”  
8 basis. Because crony companies did not submit applications in a timely fashion, GOVT  
9 subsequently altered this policy.

10 c. GOVT paid outside, unqualified technical reviewers to conduct pre-textual diligence and  
11 application reviews. Plaintiffs spoke with Carol Battershell, who stated she was the due diligence  
12 technical lead on Plaintiffs application. She said she had gotten everything she needed “off  
13 [PLAINTIF’S] website.” GOVT reviewers never talked to Plaintiffs founder, inventor, engineers,  
14 project leads or primary contractors, and refused to speak with Plaintiffs engineers, even after  
15 Plaintiffs engineers called and visited them to offer data and other information.

16 d. GOVT officials directed Argonne National Laboratory staff to manipulate data to favor certain  
17 applicants.

18 e. GOVT employees were ordered by senior GOVT and Executive Branch political officials to  
19 ignore non-favored applicants until deadlines had passed to shrink the applicant pool.

20 f. GOVT ignored standard commercial bank loan processes, including the use of competent  
21 engineers to conduct technical review and the consistent application of the same underwriting  
22 criteria to each loan application. Instead, the “loan review process” was intentionally manipulated,  
23 bypassed, or stalled, to ensure that funds were given to government favored “winners” but not to  
24 Plaintiffs or other companies that lacked large political contributions and special Executive Branch  
25 access.  
26  
27  
28

1 g. The ATVM loan funds distribution DEFENDANTS repeatedly manipulated date to frustrate  
2 Plaintiffs and other similarly situated companies' efforts to attract private investors, thereby starving  
3 Plaintiffs of capital.

4 h. Political officials made review and "underwriting" decisions.

5 i. GOVT staff told Plaintiffs and others that GOVT was out of money and thus ATVM loan  
6 applications could not advance. However, the ATVM loan fund was never out of money and,  
7 indeed, a "carve out" of appropriated funds was "held" for government cronies who made political  
8 contributions and hired political fixers to obtain "top-tier status" and "special relationships" with  
9 GOVT.  
10

11 j. GOVT eased ePlaintiff 42ectations for projected car sales volume by Fisker, a favored crony  
12 company with close ties to senior political officials in the White House, after GOVT had  
13 conditionally approved an approximate \$560 million loan, and then made allowances for scaling  
14 back projections in the final loan agreement, and then renegotiated loan terms to ameliorate Fisker's  
15 cash flow crisis in the weeks before the 2012 Presidential election.  
16

17 k. GOVT applied different metrics to ATVM loan applicants based on political connections and  
18 contributions.

19 l. GOVT promised to waive the LGP application fee. Within hours of the due date, GOVT reneged.  
20 The next day, GOVT contacted WITNESS promising to accept overdue payment. Again, GOVT  
21 reneged.  
22

23 m. GOVT hid the "merit review" data, reviewer identities, reviewer work histories, and other  
24 information from Plaintiffs, all other ATVM loan applicants and the public. This information, if  
25 disclosed, would have allowed for an open and transparent loan process, and allowed Plaintiffs and  
26 others to evaluate the efficacy of GOVT's merit review.

27 n. GOVT willfully, intentionally, and overestimated government crony company production  
28 capabilities and sales performance to justify its approval of ATVM loans. For example, GOVT

1 promised that Fisker alone would have “75,000 – 100,000” ATVM loan-funded cars rolling off U.S.  
2 assembly lines. In 2012, Ford, Nissan, Fisker, and Tesla (the ATVM loan “winners”) combined sold  
3 fewer than 25,000 ATVM loan-funded vehicles nationwide.

4 o. Plaintiffs 2008 benefits application was hacked and manipulated by public officials to engage in  
5 reprisal, retribution, and revenge against Applicant for reporting about a federal crime involving  
6 public officials. The Plaintiffs have been waiting for his proper benefits payments since 2008.

7 Investigations have proven that government officials were ordered to not approve the Plaintiffs as  
8 reprisal/vendetta punishment for his testimony against public officials with access to government  
9 records operations, records, and determinations.

10 p. Most of the Plaintiffs injuries came from his contractor/employment work for the Government.

11 q. Most of the Plaintiffs injuries were never investigated by government officials in an unbiased or  
12 conclusive manner per word scans of government officials’ records.

13 r. Government officials that met with, or interacted, with Applicant concurrently, or later, ended up  
14 working for his political/business enemies and bragged about that fact in their emails, voicemails,  
15 text messages, social media postings, photo postings and other media. They were biased to harm  
16 Plaintiffs.

17 s. Government officials that met with, or interacted, with Plaintiffs concurrently, or later, ended up  
18 working for his political/business enemies and bragged about that fact in their emails, voicemails,  
19 text messages, social media postings, photo postings, and other media. They were biased toward the  
20 Plaintiffs. The communications between Administration staff and Plaintiffs and their representatives  
21 including minutes of those meetings, or any memorandum written about these meetings by  
22 Administration employees and contractors who were present has been demanded. The FBI, a third  
23 party with a fountain pen video camera and/or a cell phone, in addition to government recordings,  
24 are thought to exist for this CIVIL RIGHTS VIOLATION incident. While there have been a lot of  
25 concerns lately about efforts to misuse "wiretapping" laws that forbid any recordings of people  
26  
27  
28

1 without their knowledge, it appears at least a few courts are recognizing how silly that is. Yet  
2 another court has now said that secretly recording a conversation -- in this case with an iPhone -- is  
3 okay, assuming there was no crime committed with the recording, and the recording was for a  
4 legitimate purpose. As the court noted: "The defendant must have the intent to use the illicit  
5 recording to commit a tort of crime beyond the act of recording itself." That makes sense. The act of  
6 recording alone, should not be a criminal act, as it really depends on what is being done with the  
7 recording. And, in an age where not only is recording everything easier, but for some becoming  
8 standard, requiring permission to record all audio seems like an outdated concept. Using an iPhone  
9 to secretly record a conversation is not a violation of the Wiretap Act if done for legitimate  
10 purposes, a federal appeals court has ruled. "The defendant must have the intent to use the illicit  
11 recording to commit a tort of crime beyond the act of recording itself," (.pdf) the 2nd U.S. Circuit  
12 Court of Appeals ruled. The decision by the 2nd U.S. Circuit Court of Appeals, which involves a  
13 civil lawsuit over a secret audio recording produced from the 99-cent Recorder app, mirrors  
14 decisions in at least three other federal appeals courts. The lawsuit concerns a family dispute over  
15 the making of a dying mother's will. Days before the Connecticut woman died, her son secretly  
16 recorded a kitchen conversation between the son, mother, stepfather, and others over how to  
17 manage her estate after her death. The son, in a probate dispute, turned over the audio file to the  
18 court in 2008 to bolster his position concerning the estate of his late mother, who died without a  
19 will. The stepfather sued him, alleging a privacy breach under the Wiretap Act. A federal judge  
20 dismissed the case, and the stepfather appealed. The appeals court ruled that, even if the son  
21 consented to his own taping, he could be sued for money damages for a breach of the Wiretap Act if  
22 and only if he did so with a nefarious intent. "We affirm, and, in so doing, hold that the exception to  
23 the one-party consent provision of 18 U.S.C. § 2511(2)(d) requires that a communication be  
24 intercepted for the purpose of a tortious or criminal act that is independent of the intentional act of  
25 recording," the New York-based federal appeals court said.

1 t. The Inspector-General has supplied certified federal records of numerous vendetta/reprisal  
2 attacks by government officials against other American citizens as reprisal/vendetta acts.

3 u. All the U.S. Inspector General offices for ALL agencies have documented thousands of  
4 vendetta/reprisal attacks by State and Federal public officials.

5 v. An ongoing practice of vendetta/reprisal attacks by State and Federal public officials exists and  
6 operates within government agencies.

7 w. The volume and scope of vendetta/reprisal attacks by State and Federal public officials  
8 uncovered against Applicant proves that he is a “targeted whistle-blower.”

9  
10 x. The hackers, by name, **(Per Exhibits and at XXXXXXXXXXXXXXXX)** have been identified by  
11 FBI, CIA, DIA, NSA and FinCEN as having hacked and having great ease to hack government  
12 servers and that some of them were employed by Applicant’s enemies including working in the  
13 political offices of public officials (particularly U.S. Senators) who competed with or were  
14 adversarial to the Plaintiffs in there, or their family business dealings.

15  
16 y. Plaintiffs worked over 60 hours per week for many decades based on assurances from the  
17 government that he would receive, at least, \$1400.00 per month upon retirement but the government  
18 assurances, to HIM, were false.

19 z. The government only paid the Plaintiffs \$778.00 per month while Applicant’s peers receive  
20 \$3000.00 per month from the government while his ARRESTED adversaries and competitors  
21 receive over \$10,000.00 per month from the government.

22  
23 aa. All government agencies represent the “United States Government,” and it is a false assertion  
24 for the agencies under the United States Government to have denied responsibility for their actions.

25  
26 bb. The United States Government asked Applicant to invest his life savings in a government  
27 energy program and defrauded Applicant out of his lifesavings, years of his time and his pending  
28 profits while providing those same profits to his competitors and to his elected representatives who  
were financial partners and shareholders with those competitors.

1 cc. The IRS, GOVT, and other agencies were sued in Federal Court and LOST the court hearings as  
2 they WERE found to be engaging the abuse of government offices for vendetta/reprisal attacks.  
3 Those parties were compensated but Plaintiffs have not received his compensation. There was an  
4 ongoing failure to respond to Plaintiffs requests which is damaging Plaintiffs via accruing monetary  
5 harms daily. Plaintiffs and its advocates have provided over two million pages of FBI-quality  
6 evidence, proving all the assertions herein, via hard drives and online file repositories. At no time  
7 has the government ever provided written statements disputing any of the criminal charges in this  
8 matter. The website at XXXXXXXXXXXXXXXXXXXXXXXX is an example of thousands of evidence  
9 repositories posted online about this case.  
10

11 dd. Plaintiffs have filed federal RICO charge referrals in this matter with DOJ

12 ee. By withholding and blockading Plaintiffs funds, SSA and other government agencies have  
13 prevented Plaintiffs from having access to adequate legal representation. In previously provided  
14 documents Plaintiffs advocates have provided extensive legal references and proof that such  
15 blocking of Plaintiffs legal representation via the with-holding of government funds is illegal  
16

17 ff. Plaintiffs have never received a response to his multiple SSA Form 561-U2 or 7008 filings  
18 Applicant has filed multiple letters confirming that there should be no blank years in is earnings  
19 statement and has received no responsive action from SSA on those assertions and the hundreds of  
20 work proof reference letters, videos, and press clippings he provided proving the assertions. SSA  
21 and The U.S. Government owe Plaintiffs monies for damages caused by government actions, harms,  
22 and inaction.  
23

24 gg. The Plaintiffs have provided the government with the medical records of other U.S. citizens that  
25 were sent to the Plaintiffs by the government in violation of federal HIPPA laws. The government  
26 said that the records were the Plaintiffs yet, they had other people's names, SS#s, and medical  
27 information. This is one of many evidence items that clearly prove that the Applicant's records were  
28 manipulated, confused, and mismanaged by government staff. To be clear, government officials

1 sent the medical records of multiple other citizens to the Plaintiffs in violation of HIPPA laws and  
2 those other parties privacy rights.

3 hh. Government officials told Applicant, in meetings at the San Francisco government offices, in  
4 2007 and 2008, that he was fully qualified, with government credits. Applicant demands his funds  
5 for his damages and the back-owed monies.

6 ii. Defendants employed spy agency “dirty tricks” campaigns against Plaintiffs.

7  
8 185. The United States Government has awarded Plaintiffs dozens of issued seminal patents as  
9 first-to-invent original technologies now commercially ePlaintiff 42loited by the U.S. government  
10 and the Silicon Valley Companies who finance the White House and California Senators.

11 186. White House senior staff and California politicians own the stock market shares of the  
12 infringing companies and are politically financed by those infringers.

13 187. The United States took actions to prevent Plaintiffs from fair-market monetization of those  
14 patents. The United States blockaded Plaintiffs ability to profit from his inventions by its directives  
15 to the National Venture Capital Association, and related parties, and through communications with  
16 such NVCA bosses as Gilman Louie, James Breyer, Jeffrey Epstein, John Doer, and related  
17 persons.  
18

19  
20 188. Plaintiffs was blockaded using the tactics described at <http://www.usinventor.org> and  
21 via the use of "The Enterprise" to protect the Silicon Valley political financiers and White  
22 House stock market holders of those Big Tech political campaign financiers.

23 189. Plaintiffs demands that the United States purchase Plaintiffs Patents at reasonable value based  
24 on third party appraisals and the published prices of recent similar patents that were purchased in  
25 the intellectual property market.  
26

27 190. Plaintiffs are seeking damages for the injuries that he has suffered because of the

28 DEFENDANT’’s ACTIONS.

**ADDITIONAL CAUSES OF ACTION**

**II. BREACH OF CONTRACT**

191. The Plaintiffs repeats and re-alleges each of the foregoing allegations as though fully set forth herein.

192 Pursuant to §136 of the Energy Independence and Security Act of 2007, 42 U.S.C. § 17013, the U.S. Department of Energy (“GOVT”) administers the Advanced Technology Vehicle Manufacturing (ATVM) loan program to support the manufacture of advanced technology vehicles and components in the United States. In 2008, Congress authorized the GOVT to make \$25 billion in ATVM loans. GOVT currently has over \$16 billion of unused lending authority. Congress-people, GOVT agency executives and their Silicon Valley financiers invested in stock ownerships of the upside collateral profits from the manipulation of Department of Energy and foreign mining benefits from Iraq, Afghanistan, and other foreign mining regions.

193. The parties, for valuable consideration, entered a valid and enforceable contract (with subsequent Work Orders as set forth above) for the performance of services by the Plaintiffs for the Defendant in return for money payments by the Defendant.

194. Plaintiffs have attempted hundreds of “proper procedure” efforts to resolve this matter in writing but government officials either: 1.) Stonewall any response, or 2.) Get fired or transferred if they investigate the matter, or 3.) Send a generic non-responsive form letter, or 4.) Finger point to another agency in an endless runaround.

195. Plaintiffs was attacked by government-financed, directed, and resourced hired attack services that had command-and-control operated by government officials.

1 196. The GOVT has spent over ten times more money on delaying the payment of funds to the  
2 Plaintiffs than if they had just settled with WITNESS in the first place. The GOVT has  
3 exacerbated the case to the point that it has gained thousands of times more media coverage  
4 than if they had just settled with WITNESS in the first place. The GOVT has wasted vast  
5 amounts of taxpayer money and created an international media incident when those losses  
6 could have been entirely avoided if they had just settled with WITNESS, and been responsive  
7 to the Plaintiffs, in the first place.  
8

9 197. The Defendants failed to properly respond to the Plaintiffs by all sorts of avoidance tactics.

10 198. Pursuant to the contract, Project Materials, including all materials, processes, techniques,  
11 and data, including all intellectual property made or conceived or reduced to practice or  
12 learned by DEFENDANT, was owned a duty to the Plaintiffs ONLY.

13 199. DEFENDANT breached the material portion and ePlaintiff 42ress terms of the contract  
14 between Plaintiffs and Defendant.

15 200. Plaintiffs have made various requests for Defendant to comply with the contractual terms,  
16 but Defendant has refused.  
17

18 201. Defendant’s breach of contract has damaged the Plaintiffs in an amount exceeding \$75,000.  
19  
20  
21

22 **III. CONVERSION**  
23

24  
25 202. The Plaintiffs repeats and re-alleges each of the foregoing allegations as thoughtfully set  
26 forth herein.

27 203. Plaintiffs car design used advanced “hot-swap cartridges” to provide a nearly unlimited range,  
28 cost less than \$20,000 in the base configuration, required no gasoline or extension cords to charge,

1 required no garage, could be used by apartment dwellers, was easy to repair and build, and used  
2 “damp down” crash effect reduction materials.

3 204. Plaintiffs had operations in Detroit, the Midwest, and the San Francisco Bay area. A critical  
4 Plaintiffs innovation, based on a decade of research, was the use of next-generation polymer plastics  
5 in the automotive body. By replacing metal doors, body panels, hoods, and roofs with lightweight  
6 polymer plastics on a carbon fiber frame and lightweight alloy chassis, Plaintiffs build a four-seat,  
7 SUV-format vehicle with a curb weight of less than 1,400 pounds, or approximately one-third the  
8 weight of a Toyota Prius. This, in turn, enhanced vehicle efficiency and performance.

9  
10 205. Plaintiffs pressure membrane technology was well proven and widely used in a variety of  
11 applications, including zodiac (inflatable) boats used in leisure, commercial and military  
12 applications, airbags, Mars landing equipment, and even buildings and arenas with polymer  
13 membrane coverings.

14  
15  
16 206. All the Plaintiffs car’s key parts were built and evaluated, or already existed in off-the-shelf  
17 components proven in the industry for over a decade. Autodesk and other engineering software  
18 allowed for full virtual prototyping and operational testing of the design.

19 207. All the Plaintiffs products were the top of the line for their precision and design. For  
20 consideration of Plaintiffs ATVM loan application, Defendants promised to protect Plaintiffs  
21 technical and business. The DEFENDANT used the products and information of the Plaintiffs  
22 without his permission or consent. The DEFENDANT has committed conversion of the Plaintiffs  
23 PROPERTY. The DEFENDANT has committed conversion which is based upon the  
24 DEFENDANT’s unlawful exercise of ownership or control over the personal property of the  
25 Plaintiffs. The exercise of ownership or the control by the DEFENDANT was intentional and have  
26 the effect of denying or repudiating the Plaintiffs rights to the property.  
27

28 208. The Plaintiffs conversion b has damaged the Plaintiffs in an amount exceeding \$75,000.

**IV. UNJUST ENRICHMENT**

1  
2 209. The Plaintiffs repeats and re-alleges each of the foregoing allegations as thoughtfully set forth  
3 herein

4 210. The Defendants promised Plaintiffs a salary of an average of \$200,000.00 per year as  
5 precedent-ed by similar employees and contractors in the same time period, in consideration for her  
6 exclusive work with working with the government. Yet, Plaintiffs did the work but was not  
7 compensated properly.  
8

9 211. Plaintiffs have attempted hundreds of “proper procedure” efforts to resolve this matter in  
10 writing but government officials either: 1.) Stonewall any response, or 2.) Get fired or transferred if  
11 they investigate the matter, or 3.) Send a generic non-responsive form letter, or 4.) Finger point to  
12 another agency in an endless runaround.

13 212. Plaintiffs was attacked by government-financed, directed, and resourced hired attack services  
14 who had command-and-control operated by government officials.  
15

16 213. The GOVT has spent over ten times more money on delaying the payment of funds to the  
17 Plaintiffs than if they had just settled with Plaintiffs in the first place. The GOVT has exacerbated  
18 the case to the point that it has gained thousands of times more media coverage than if they had just  
19 settled with Plaintiffs in the first place. The GOVT has wasted vast amounts of taxpayer money and  
20 created an international media incident when those losses could have been entirely avoided if they  
21 had just settled with Plaintiffs and been responsive to the Plaintiffs, in the first place.  
22

23 214. Many government officials, up to and including the U.S. Attorney General, The Secretary of  
24 Energy, The Director of the FBI, etc., have been fired over this case and related matters, due to their  
25 attempts to manipulate government funds and resources to inure to a cartel of insiders who backed  
26 those officials’ appointments to those positions. (i.e.: The Covington & Burling files), LDL insiders  
27 who backed those officials’ appointments to those positions. (i.e.: The Covington & Burling files)  
28

1 LDLinsiders who backed those officials’ appointments to those positions. (i.e.: The Covington &  
2 Burling files)

3 215. Plaintiffs became a government witness and reported on crimes by government officials. In  
4 reprisal, revenge, vendetta, retaliation, and retribution, Plaintiffs have been severely harmed. The  
5 angry government officials took away the Plaintiffs QUALITY OF LIFE.

6 216. Plaintiffs have lost everything which includes his house, income, job, life savings, brand, and  
7 every source of income using sophisticated spy craft-type attacks. They attacked him as  
8 reprisal/vendetta because he reported an organized crime activity involving famous U.S. Senators  
9 and their billionaire sex-addict financiers. (i.e.: for context, look up the court cases of Jeffrey  
10 Epstein, Andy Rubin, Howard Rubin, Ed Buck, and the hundreds of other related sex cult cases in  
11 the federal courts on <http://www.pacer.gov>.)

12 217. The Plaintiffs served the public, only to have the criminals they investigated get hundreds of  
13 billions of dollars, at the expense of the Plaintiffs and public tax dollars, while Plaintiffs got nothing  
14 and lost everything

15 218. The Defendants deliberately failed to live up to the terms of the agreement and have not paid  
16 the proper wages.

17 219. The Defendants benefitted from Plaintiffs work on numerous occasions but failed to pay  
18 Plaintiffs a just compensation for the work that he performed.

19 220. Thus, the Defendants have been unjustly enriched.

20 221. The Plaintiffs are entitled to damages.

21 **V. FRAUDULENT MISREPRESENTATION**

22 222. The Plaintiffs repeats and re-alleges each of the foregoing allegations as thoughtfully set forth  
23 herein.

24 223. Plaintiffs offered GOVT asset collateral of over \$100 million to secure the ATVM loan.  
25  
26  
27  
28

1 224. Plaintiffs loan application revealed sensitive and confidential technical and business  
2 information as defined by 10 CFR §§ 1004.10(b)(4), 11 and 5 U.S.C. § 552(b)(4) to GOVT. This  
3 information included fuel cell and hydrogen storage technologies, fuel cassettes and pressure  
4 membrane body parts.

5 225. 103. Plaintiffs was unaware that Defendants had “fixed” the ATVM loan process to benefit  
6 political donors. Plaintiffs also was unaware that Defendants had no intention of approving  
7 Plaintiffs ATVM loan application under any circumstances as a matter of reprisal for whistle-  
8 blowing and unfair business practices to avoid competition against Tesla and other Congressional  
9 stock holdings.

10 226. Therefore, Plaintiffs repeatedly contacted GOVT to provide engineering, financial and other  
11 information in support of its application.

12 227. On April 23, 2009, Jason Gerbsman, the Chief of Staff and Senior Investment Officer, at the  
13 Loan Programs Office, Automotive Division, of GOVT, notified Plaintiffs that: Plaintiffs have  
14 submitted a complete application and has been assigned to both a technical eligibility and merit  
15 review team, as well as a financial viability analysis team. The technical team is close to finishing  
16 their evaluations on both eligibility and project merit, and the financial team will be launching a  
17 more detailed and interactive due diligence phase of the Plaintiffs application review very soon.  
18 Following the technical and financial evaluation under the second stage of the process, we will  
19 move into the underwriting phase where our goal is to negotiate a conditional commitment,  
20 including a detailed term sheet. This will be followed by the fourth phase of the loan process where  
21 the final details will be negotiated, and the loan will be close

22 228. On May 26, 2009, Gerbsman offered an in-person meeting to discuss “Plaintiffs next steps.”

23 229. On May 28, 2009, Plaintiffs flew a delegation from California to meet with Gerbsman, who  
24 said that GOVT had determined “everything was in order” with Plaintiffs ATVM loan application,  
25  
26  
27  
28

1 that “everything looked good” and that Plaintiffs “appeared to be fully compliant and passed  
2 technical review.”

3 230. Shortly thereafter, Plaintiffs discovered that Tesla Motors, Inc. (“Tesla”) and Fisker Motors,  
4 Inc. (“Fisker”) had received and were receiving special assistance from GOVT staff with the  
5 ATVM loan application process. Fisker even had a business office in GOVT’s headquarters.

6 231. On or about June 22, 2009, GOVT advised Plaintiffs that a Northern California solar energy  
7 company had requested a copy of Plaintiffs ATVM loan application from GOVT through the  
8 Freedom of Information Act (“FOIA”). Plaintiffs contacted this company to see why it was  
9 interested in Plaintiffs ATVM loan.  
10

11 232. Plaintiffs spoke with the company’s principal, who said that he had been “screwed over” by  
12 GOVT and wanted to know if others had a similar experience. He said that the company had  
13 suffered “bad dealings” with Matt Rogers, a “stimulus advisor” to the Chu from McKinsey &  
14 Company, and Steven Spinner, a key player in GOVT’s loan program office. Spinner, an Obama  
15 campaign bundler who raised millions for the President and who had been appointed to his  
16 government position in exchange for his fundraising, also had worked at McKinsey & Company  
17 and, according to his biography posted by the Center for American Progress, had served as an active  
18 advisor and investor to Tesla.  
19

20 233. Plaintiffs was told that Rogers and Spinner were “rigging the game.” It was given Spinner’s  
21 phone number and told to call Spinner and ask him why Plaintiffs ATVM loan application was not  
22 moving forward.  
23

24 234. Plaintiffs texted Spinner and then called him. Spinner answered the phone and told Plaintiffs  
25 words to the effect of “Do not ever call me again. The awards have already been decided.”

26 235. On June 24, 2009, GOVT announced \$8 billion in ATVM loans to Ford Motor Company  
27 (“Ford”), Nissan North America, Inc. (“Nissan”) and Tesla. Tesla was the Plaintiffs competitor --  
28

1 received an ATVM loan of \$465 million at a rate of 1.6% from GOVT to manufacture an ePlaintiff  
2 42ensive electric car.

3 236. On June 29, 2009, Plaintiffs wrote to Gerbsman again asking for action on its ATVM loan  
4 application, pointing out that other lenders were hanging back until after GOVT issued its term  
5 sheets, the offering document issued by GOVT that specifies the detailed terms and conditions  
6 under which GOVT may enter a Conditional Commitment with the Applicant.

7  
8 237. In the following weeks, authorized GOVT representatives repeatedly assured Plaintiffs that  
9 “everything was fine”, “everything is on-track”, and “you [WITNESS] appear to meet every  
10 criterion” with respect to an ATVM loan. Plaintiffs was even told that “we [GOVT] should be able  
11 to announce [an approved ATVM loan] any day now...”

12 238. However, on August 21, 2009, Seward denied Plaintiffs ATVM loan application. **See**  
13 **Exhibits and evidence websites at XXXXXXXXXXXXXXXX and [http://www.the-truth-about-  
15 the-dept-of-energy.com](http://www.the-truth-about-<br/>14 the-dept-of-energy.com)**

16 239. In an email to GOVT’s Chris Foster, Plaintiffs requested GOVT’s merit review documents  
17 and asked how GOVT technical evaluators could conduct a ten-month comparative merit review of  
18 Plaintiffs ATVM loan application without speaking to any single company engineer or senior  
19 project staff member for more than 1% of the time that GOVT staff attended to Tesla, Nissan Ford,  
20 and Fisker during the same review period.

21 240. On or about August 26, 2009, Plaintiffs called Foster. Foster said GOVT had denied the  
22 application because Foster said Plaintiffs “electric car did not use E85 gasoline, Plaintiffs was not  
23 planning on building “enough” cars, Plaintiffs was not planning on selling cars to the government,  
24 Plaintiffs electric motors t and batteries were too futuristic and not developed for commercial use,  
25 Plaintiffs car was a “hydrogen car,” and Plaintiffs had underestimated the cost of metal body  
26 fabrication.”  
27

28 241. The reason given for the denial of the loan was based on false pretense.

1 242. Defendants made false and misleading statements to Plaintiffs regarding his duties and  
2 application process for the grant application and approval.

3 243. DEFENDANT made false allegations regarding the responsibilities and duties of the  
4 grants/loan and there was no causal connection.

5 244. DEFENDANT made false promises to the Plaintiffs.

6 245. DEFENDANT made false and misleading statements to Plaintiffs regarding his duties and the  
7 responsibilities regarding the application process.

8 246. DEFENDANT made false and misleading statements to Plaintiffs and there was no causal  
9 connection.

10 247. DEFENDANT fraudulently concealed information regarding the grants and the application  
11 process and the final assessment regarding the application process.

12 248. DEFENDANT made false promises regarding the conduct and what is necessary regarding the  
13 loan process.

14 249. DEFENDANT has fraudulently concealed information relating to the issue of the LOAN.

15 250. There is a causal connection between the real reason the loan application was denied because  
16 the DEFENDANTS made false pretenses regarding the loan and applicant process.

17 251. DEFENDANTS have made false promises to conduct and failed to disclose objectives  
18 regarding the LOAN.

19 252. DEFENDANTS have made false and misleading statements and concealed material  
20 information concerning the LOAN.

21 253. In so doing, DEFENDANTS further violated their duties under the law regarding the  
22 application process and approval of the LOAN.

23 254. DEFENDANTS and their co-conspirators have made a material misrepresentation, have  
24 omitted material facts, and have concealed material information concerning the application and loan  
25 process.  
26  
27  
28

1 255. The Plaintiffs have been harmed and is entitled to damages.

2 **VI. FRAUDULENT CONCEALMENT**

3 256. The Plaintiffs repeats and re-alleges each of the foregoing allegations as thoughtfully set forth  
4 herein.

5 257. Foster never provided Plaintiffs with GOVT’s merit review documents or described the  
6 applicable evaluation criteria. On September 21, 2009, Plaintiffs wrote to Chu requesting  
7 reconsideration of GOVT’s ATVM loan denial. **See Exhibit**

8  
9 258. Plaintiffs demonstrated that the stated reasons for GOVT’s denial were false. It asked Chu to  
10 explain why GOVT staff repeatedly assured Plaintiffs that approval would be forthcoming and that  
11 no additional information was necessary (leading Plaintiffs and its principals to ePlaintiff 42end  
12 huge sums of money in reliance thereon), and why government-crony companies that applied after  
13 Plaintiffs were reviewed earlier, given the benefit of extensive access to and interaction with GOVT  
14 staff (a benefit denied to Plaintiffs), and then awarded funds.

15  
16 259. On October 23, 2009, Seward replied to Plaintiffs. **See Exhibits**. He did not answer Plaintiffs  
17 questions. Instead, he backfilled with new but equally baseless reasons for Plaintiffs rejection.

18 260. The reason for the denial was unreasonable. To begin with, Seward said that Plaintiffs  
19 application was “deemed Substantially Complete on November 10, 2009.” In fact,

20 APPLICATION’S application had been given deemed complete on December 31, 2008.

21 261. Seward said that the “proposed technology appeared to be at a development stage and not yet  
22 ready for commercialization” and that the “assumption that the vehicle concept would be ready for  
23 production in three years” was a “significant weakness” due to the “high level of risk associated  
24 with the design.” In fact, the Plaintiffs vehicle’s technology had been in use commercially for years  
25 by the U.S. Department of Defense, NASA, and the automobile industry; the politically connected  
26 companies that were awarded ATVM loan funds were no further ahead in production than  
27  
28

1 Plaintiffs, and elements of Plaintiffs “elevated risk design” were already in use by Toyota and  
2 Nissan.

3 262. The second reason given by Steward was baseless. Seward said, “the proposed project’s  
4 impact on fuel economy...was determined to be weak.” In fact, non-gasoline-powered automobiles  
5 are uniformly recognized to offer the most significant impact on fuel economy performance.

6 Plaintiffs vehicle promised even better fuel economy than any of the ATVM loan “winners” (Tesla,  
7 Nissan, Ford or Fisker) proposed or offers to this day.

8 263. The third reason given by Steward was groundless. Seward said, “A review of the advanced  
9 fuels in your project and the feasibility of that energy source...was [sic] questionable.” In fact, the  
10 fuels, products, and subparts of the “questionable” energy source are readily available to consumers  
11 at REI Sporting Goods, Amazon.com, and Safeway supermarkets.  
12

13 264. The fourth justification given by Steward for the denial as it was unrealistic. Seward said, “A  
14 review of the calculations and assumptions supporting your claims for reductions in petroleum use  
15 were deemed to be unrealistic.” In fact, over two hundred institutional research and white papers  
16 from respected government and university agencies from around the world supported Plaintiffs  
17 claimed reductions.  
18

19 265.. Seward’s letter was the first time any of these issues had been raised by GOVT with the  
20 Plaintiffs, notwithstanding ten months of “underwriting,” and multiple meetings, phone calls, and  
21 emails. Incomprehensibly, GOVT had refused to consult with any of Plaintiffs engineers and denied  
22 Plaintiffs the “interactive” review that had been promised in April and had in fact been provided to  
23 Tesla, Fisker, Nissan, and Ford.  
24

25 266. DEFENDANTS did not review the Plaintiffs ATVM loan application in good faith and in  
26 accordance with its regulations, policies, and promises. Instead, it stonewalled WITNESS.

27 267. Each application that the Plaintiffs presented was denied.  
28

1 268. ON or about February 1, 2009, Plaintiffs (through Plaintiff 30) applied for a \$15 million  
2 ATVM loan to help fund work with GOVT's own Sandia National Laboratories ("Sandia") to  
3 produce a "best of breed and state of the art" automobile energy storage system using Plaintiffs  
4 patented fuel cell technology

5 269. DEFENDANTS and their co-conspirators have made material misrepresentations, have  
6 omitted material facts, and have concealed material information concerning the LOAN.

7 270. DEFENDANT concealed or suppressed a material fact

8 271. DEFENDANT had knowledge of the material fact

9 272. The Plaintiffs f suffered damage because of the DEFENDANT's action.

10 273 The DEFENDANT suppressed or concealed this fact with the intention that the Plaintiffs be  
11 misled as to the true condition

12 274. The Plaintiffs was so misled by the actions of the DEFENDANTS.

13 275. The Plaintiffs suffered damage as a result

14 276. The Plaintiffs repeats and re-alleges each of the foregoing allegations as thoughtfully set forth  
15 herein.

16 277. The acts and events set forth above constitute negligent and wrongful acts and omissions of  
17 agents and employees of the U.S. Government, inter alia, negligent investigation, abuse of process,  
18 conversion of personal property, denial of the right to legal counsel, infliction of emotional distress  
19 and interference with a prospective economic opportunity while acting within the scope of their  
20 offices and employment, under circumstances where the Defendant U.S., if a private person, would  
21 be liable to the Plaintiffs in accordance with the laws of the Washington, D.C.

22 278. The Plaintiffs are entitled to damages to determine by a jury.

23 **VII. INTENTIONAL INFLICTION OF EMOTIONAL DISTRESS**

24 279. The Plaintiffs repeats and re-alleges each of the foregoing allegations as thoughtfully set  
25 forth herein.  
26  
27  
28

1 280. As set forth above, Defendants agreed to participate together in a common scheme to commit  
2 unlawful acts, or to commit lawful acts by unlawful means, including, but not limited to, unlawfully  
3 obstructing federal officials in the performance of their constitutional duties,

4 281. Pursuant to, and in furtherance of that common scheme, Defendants exhibited extreme and  
5 outrageous conduct that went beyond all bounds of decency. This conduct intentionally or  
6 recklessly caused the Plaintiffs to suffer from severe emotional distress, as described supra.

7 282. Based on the foregoing, all Defendants are liable to the Plaintiffs for the resulting damage.  
8

9 **VIII. VIOLATION OF 28 U.S.C. §2680 (h)**

10 283. The Plaintiffs repeats and re-alleges each of the foregoing allegations as though fully set forth  
11 here2in.

12 284. The acts and events set forth above constitute negligent and wrongful acts and omissions of  
13 agents and employees of the U.S. Government, inter alia, negligent investigation, false  
14 imprisonment, abuse of process, conversion of personal property, infliction of emotional distress  
15 and interference with a prospective economic opportunity while acting within the scope of their  
16 offices and employment, under circumstances where the United States, if a private person, would be  
17 liable to the Plaintiffs in accordance with the laws of the State of Oklahoma. Because these acts and  
18 events were undertaken and caused by investigative and law enforcement agents or persons holding  
19 themselves out as law enforcement agents of the Defendant U.S., the U.S. Government is liable for  
20 all damages caused by such acts, as provided by 28 U.S.C. §2680(h).  
21

22 285. The Plaintiffs are entitled to damages  
23

24 **IX. VIOLATION OF FEDERAL TORTS CLAIMS ACT**

25 286.. The Plaintiffs repeats and re-alleges each of the foregoing allegations as thoughtfully set forth  
26 herein.

27 287. The acts and events set forth above constitute negligent and wrongful acts and omissions of  
28 agents and employees of the U.S. Government, inter alia, breach of contract, unjust enrichment,

1 fraudulent misrepresentation, fraudulent concealment, conversion of personal property, , infliction  
2 of emotional distress, and interference with a prospective economic opportunity while acting within  
3 the scope of their offices and employment, under circumstances where the Defendant U.S., if a  
4 private person, would be liable to the Plaintiffs in accordance with the laws of Washington, D, C.  
5 for the District of Columbia.t

6 288. The Plaintiffs are entitled to damages

7  
8 **X. INFRINGEMENT ON PATENT NUMBERS ASSIGNED TO Plaintiffs**

9 289. The Plaintiffs repeats and re-alleges each of the foregoing allegations as thoughtfully set forth  
10 herein.

11 290. The Plaintiffs aresued PATENTS are valid and enforceable.

12 291. DEFENDANT has infringed and continues to infringe the claims of Plaintiffs aresued patents  
13 under 35 U.S.C. § 271(a), either literally or under the Doctrine of Equivalents, by operating and  
14 using the patent process within the United States that is covered by the claims of the patents listed at  
15 <http://www.uspto.gov>.

16  
17 292. DEFENDANT has had knowledge and notice of the Plaintiffs patent,s as well as of its own  
18 infringement of the patents, since the first communications with Plaintiffs and virtue of the present  
19 Complaint.

20 293. On information and belief, DEFENDANT has had knowledge and notice of the patents,  
21 including asking the U.S. Department of Energy to request valuation reports on the Plaintiffs  
22 patents as well as of its own infringement of the ‘patent.

23  
24 294. DEFENDANT has had the knowledge and notice of the patents, as well as of its own  
25 infringement of the patents, since the first communications with Plaintiffs and virtue of the present  
26 Complaint.

27

28

1 295. Plaintiffs have been and continues to be damaged by DEFENDANT’s infringement of the  
2 Plaintiffs patent. On information and belief, a reasonable royalty for infringement of the patents  
3 would be at least \$300,000.000.00 of loss revenue resulting from its infringing activities.

4 296. DEFENDANT’s infringement of the Plaintiffs patents has been and continues to be willful.

5 297. DEFENDANT’s infringement of the Plaintiffs patents renders this case exceptional within the  
6 meaning of 35 U.S.C. § 285.

7 298. Plaintiffs are entitled to damages.

8  
9  
10 A. A declaration pursuant to 28 U.S.C. §§ 2201 and 2202 and 5 U.S.C. § 706(2)(B) that the denial  
11 of Plaintiffs applications was unlawful, and compensatory and injunctive relief directing GOVT to  
12 approve same.

1 **EXHIBIT 1 – Exhibits And Exhibits Summation**  
2  
3

---

4 The evidence herein is relatively indisputable because most of it was cut-and-paste from the files of  
5 the FBI, SEC, OSC, DOJ, FEC, Interpol, FINCEN, ICIJ, Congress and all of the most renown and  
6 respected law enforcement, regulatory and news investigators in the world!

7  
8 Key Plaintiffs personally knew famous politicians, and their Big Tech financiers, (Some even  
9 stayed at his house) who joined forces to manipulate government funds, and stock market rigged  
10 "market pumps" into their own pockets in the last two "stimulus" funds. Plaintiffs was invited into  
11 the scheme but declined and became a federal witness.  
12

13  
14 There has never been so much taxpayercash given to so few people, where each, and every, one of  
15 the recipients was a friend of the politicians. Those who got the cash immediately skimmed "unjust  
16 stock market profits" with it and paid kick-backs to the politicians. Plaintiffs found out that their  
17 political representatives own the stocks and assets of their competitors, have sex with and party with  
18 their competitors, get tens of millions of dollars of election manipulation services from their  
19 competitors and use government spy agencies and public services agencies to screw over  
20 competitors. Most of Plaintiffs political representatives work for corporations who abuse the public  
21 and they do it out of pure mercenary greed and lust for power.  
22

23  
24 'Big Tech' Cartel companies: Google, YouTube, Netflix, Tesla, Facebook, et al, coordinated to hire  
25 the same little organized group of lawyers, CPA's, lobbyists, opposition research attack services,  
26 paid-under-the-table "reporters" and CPAC managers. This created an FBI-prosecutable  
27 "Enterprise" as defined by the RICO Racketeering laws. This 'Enterprise' coordinated political  
28

1 campaign funding and internet manipulation to the exclusive benefit of this 'Enterprise' and paid  
2 payola, in stocks, to corrupted, and famous, political figures who assisted them. In FCC, DOE and  
3 EPA contracts, grants, tax waivers and insider regulation blockades, almost every person at those  
4 agencies held stock in, or was paid and/or hired, by this Cartel. That is a felony abuse of public  
5 resources!

6  
7  
8 Almost every competitor to the insiders, including Plaintiffs, was attacked and sabotaged using state  
9 and federal resources to pay Fusion GPS, Black Cube, The Denton Tabloids, Media Matters, In-Q-  
10 Tel and other attack services. The victims demand justice and restitution for the government  
11 investment fraud, loss of years of their lives under a false federal pretext, harassment and  
12 interference they suffered. The victims seek to be compensated for the malicious, proven,  
13 retribution tactics, lies, toxic exposures, vendetta cut-offs of all earned government funds and  
14 benefits, tort-based interference, "missing hard drives" and interdiction efforts conducted, with  
15 applicants own tax dollars, against the applicants. White House senior executives and California's  
16 most powerful Senators hired a tabloid publisher to seed the internet with self-produced defamation  
17 articles and animated attack videos and paid Google to manually lock those attack media items on  
18 the first line of every Google and YouTube search, around the globe, for over a decade. Orders were  
19 given, BY the Defendants, TO certain federal agencies directing those agencies to with-hold  
20 beneficial actions, FOR Plaintiffs, as reprisal for reporting the crimes.

21  
22  
23  
24 This is a felony-class slush-fund crime that has cost taxpayers trillions of dollars in losses and has  
25 cost Plaintiffs many tens of millions of dollars in damages and losses. The government has lost  
26 billions of dollars from Defendants tax evasions and money laundering and Google, for example,  
27 failed to report over a billion dollars of political campaign contributions.

1 Big investment banks like J.P. Morgan, Goldman Sachs, et al. coordinated these schemes with  
2 money laundering, tax evasion, offshore covert funds and other financial trickery. FinCEN, Interpol,  
3 FBI, GAO, and most other investigators, have proof of these assertions but they have been stalled  
4 from making arrests. The money-tracks go right back to the politicians families from the bank  
5 accounts of Google, Facebook, Tesla, Netflix, Sony Pictures, etc; forensic accounting records.  
6 Government agencies were in charge of making sure these crimes did not happen but they chose to  
7 'steal instead of serve'! They chose to help these crooks 'cheat instead of compete'!

9  
10 The politicians that the taxpayers EMPLOY do not get to make hundreds of millions of dollars in  
11 crooked profits off of government funds that are supposed to help citizens under duress. They won't  
12 let Plaintiffs have a jury trial, or a live Senate hearing, because they know they will lose and they  
13 will be shamed!

14  
15  
16 Defendants are government employees and contractors and their political financier corporations and  
17 individual high net worth oligarch owners.

1  
2 **EXHIBIT 2 - State-Sponsored Reprisal Attacks And Harms Against The**  
3 **Whistle-Blowers:**

4 **- DEFRAUDING Plaintiffs:**

5 Government agency bosses solicited the targets with false promises of future loans, carbon  
6 credit sales, billions of dollars of stock market valuation profits, contracts and/or grants from  
7 their agencies and caused the target Plaintiffs to ePlaintiff 42end millions of dollars and  
8 years of their time for projects which those government bosses had covertly promised to  
9 their friends. They used the target Plaintiffs as a “smokescreen” to cover their illegal  
10 government slush-funds for the Plaintiffs competitors and personal enemies. By using this  
11 tactic, the attackers drained the target Plaintiffs funds and forced Plaintiffs into an economic  
12 disaster, without the government bosses fearing any reprisal for their scam. The crony  
13 insiders made hundreds of billions of dollars in profit in the notorious Solyndra-type  
14 scandals as seen in the CBS 60 Minutes episode: “*The Cleantech Crash*”, thousands of TV  
15 news segments and the related GAO and Congressional corruption reports.

16 **- MOLES AND SPYING:**

17 White House financier Kleiner Perkins placed moles inside of Plaintiffs companies in order  
18 to sabotage, delay and misdirect operations. The moles were discovered to be staff of  
19 Kleiner Perkins. The main offices of Kleiner Perkins were broken into, per San Mateo  
20 County police reports, and records of corruption copied or duplicated by a state-sponsored  
21 intelligence agency entity, which provided further proof that Kleiner Perkins and the White  
22 House were exchanging Quid Pro Quo.

23 **- BLOCKADES OF LEGAL COUNSEL RIGHTS:**

24 - Government officials and the federal agency: Legal Services Corporation (LSC corporation  
25 -A federal agency dedicated to providing legal services to citizens) blockaded Plaintiffs  
26 rights to legal representation in order to prevent Plaintiffs from personally suing the  
27 attackers because such a lawsuit would have embarrassed corrupt public officials. High tech  
28 law firms that were discussing a services agreement with Plaintiffs were threatened and

1 ordered to not help Plaintiffs or “*they would be black-listed or be cut-off from tens of*  
2 *millions of dollars of Google, Netflix, Facebook and government contracts*”. Individual  
3 lawyers were threatened with black-listing and getting “*flooded with more filings than you*  
4 *could ever respond to in your life-time...*” LSC officials, who were almost entirely Obama  
5 Administration associates, refused to assist with lawyer referrals. That is a violation of their  
6 federal contract with The U.S. Government .

7 **- HIRED CHARACTER ASSASSINATION AND DEFAMATION SERVICES:**

8 An sophisticated animated attack film was produced by Google/Youtube and Nicholas  
9 Denton attacking Plaintiffs. An animated film is an ePlaintiff 42ensive effort involving  
10 considerable time and expense. An attacker must be well financed to undertake such an  
11 effort. The film was published on YouTube and locked onto the very top search result line  
12 on every YouTube search in front of 7.5 billion internet users for over a decade. The damage  
13 to Plaintiffs reputation is estimated in the tens of millions of dollars. YouTube steadfastly  
14 refused to remove or adjust the search results even though YouTube executives knew  
15 Plaintiffs and knew that the video represented a character assassination attempt against  
16 Plaintiffs because YouTube owners finance the political campaigns of the public officials  
17 who ordered the attacks. While Google/YouTube stated to Congress that all of it’s search  
18 results are arbitrary, the never-moving search result of this attack video proved that  
19 Google’s and YouTube’s search results are manually manipulated by human maintained  
20 black-lists. The corrupt officials hired Nicholas Guido Denton and his character-  
21 assassination-for-hire sleazy tabloid publication empire known as Gawker Media AKA  
22 Gizmodo Media. They own Gawker, Gizmodo, Jalopnik and a number of fake news sites  
23 based in the USA and near-Russian regions. The offshore sites are used for money  
24 laundering and tax evasion. The FBI has been asked to interview and financially trace the  
25 payments and command-and-control orders back and forth between Nicholas Guido Denton  
26 and his attacker/operatives: Ian Fette, Adrian Covert, Nick Cook, Gabrielle Darbyshire, John  
27 Hermann, Patrick George, et al and Google. All of whom transferred payments and  
28 communications between each other to conspire, operate, produce and publish the articles,

1 videos, blogs and server manipulations for the attacks against the victims around the world.  
2 These attacks resulted in billions of dollars of damages to the victims. The orders for these  
3 attacks can be traced back to The White House.

4 **- FACTORY PROCESSED SOCIAL MEDIA ATTACKS:**

5 Social networking sites including MeetUp, Match, Facebook, etc. and all other IAC-owned,  
6 or similar, sites (IAC is managed by Hillary Clinton's daughter, whose Mother knew  
7 Plaintiffs) have had their profiles, texts, and inter-member communications, since those  
8 companies were started, hacked or purchased. The financiers of almost everyone of these  
9 sites are also the financiers of the suspects. The attack service providers use Palantir,  
10 Acronym, In-Q-Tel financed data analysis software to analyze every activity in those  
11 services in order to find honey-trap, blackmail and social conflict exploitation opportunities.  
12 Your social life will, essentially, end. Every photo on every social site is cross checked with  
13 every other photo on the internet in order to cull your Facebook, Linkedin, Snapchat and  
14 other social media together to create a total manipulation profile data file on you. New  
15 contacts on these sites were contacted by the attackers and told to “avoid” the Plaintiffs in  
16 order to damage Plaintiffs.

17 **- GOVERNMENT BENEFITS BLOCKADES AND MANIPULATIONS:**

18 Social Security, SSI, SDI, Disability and other earned benefits were stone-walled.  
19 Applications for benefits for the Plaintiffs were intentionally “lost” like a “Lois Lerner hard  
20 drive”. Files in the application process “disappeared”. A U.S. Senator ordered Plaintiffs  
21 benefits to “never be approved” even though Plaintiffs worked 60 hour+ weeks for decades  
22 in service to their nation and their community. A SSA official in the local SSA office, who  
23 had a devout expressed hatred against one United States President ordered a benefits  
24 blockade against Plaintiffs because he found out that Plaintiffs ex-lawyer now worked in the  
25 White House. Forensic evidence and backgrounders on every person who worked on, or had  
26 access to, Applicants files, records, benefits decisions and related data sets shows that a  
27 number of those employees and contractors were members, financiers, web promoters or  
28 supporters of ANTIFA anarchy groups or KKK or Proud Boys related political activist-type

groups. In San Francisco and Marin Counties SSA offices, in employees workspaces and on their Facebook and MySpace sites, many employees proudly display pictures of themselves wearing their pink "pussy hats", black riot gear and sporting political tattoos. FBI records and IG investigations show that SSA has the highest percentage of political activist employees of any federal agency. Such persons are inclined to become drunk with power when allowed access to the trillions of dollars of government technology on the SSA file and decisions systems. A number of these persons have worked for, or with, U.S. Senators and other politicians who targeted Applicant in political reprisal. At least 3 persons in the San Francisco SSA office, at least 2 persons in the San Mateo SSA office and at least 2 persons in Marin SSA office are known to have engaged in such actions. Applicants funding and benefits were manipulated, so as to harm Applicant, as political reprisal as vendetta for his provision of testimony to federal investigators in a trillion dollar political corruption matter involving famous political figures featured in global news coverage. A vast number of agency abuse cases and lawsuits are now on public record in the Inspector General's offices and federal courts. It is an indisputable fact that some government agencies run "hit-jobs" on citizens on orders from certain corrupt politicians.

These actions are felony violations of the law. Federal and State Agencies including SSA, FEC, GOVT, HHS, VA, CIA, HUD, SA, SEC, FBI, DOJ and many others, have been charged, and found guilty, in these crimes against citizens. In the Congressional investigation published by the United States Congress in review of the U.S. Department of Energy LGP/ATVM programs, it is clearly proven that the U.S. Department of Energy was used as a slush-fund by some GOVT executives in order to pay off campaign financiers by attacking and sabotaging their competitors. The GOVT Paducah Gaseous Diffusion Plant under contracts with The U.S. Government and the government-owned U.S. Enrichment Corp paid \$5M whistle-blower awards to those whistle-blowers who were attacked, using government agency resources, for reporting a crime. Dept. of Energy Hanford URS has agreed to settle a lawsuit brought by former employee Walter Tamosaitis for \$4.1 million. The settlement in the whistle-blower case comes almost one year before the case was set for

1 a jury trial in federal court in Richland and compensates Tamosaitis for attacks against him,  
2 by GOVT officials, in retribution for reporting a crime. VA officials attacked hundreds of  
3 citizens who reported corruption, ie:

4 [https://www.thenewamerican.com/usnews/health-care/item/18610-va-whistleblowers-](https://www.thenewamerican.com/usnews/health-care/item/18610-va-whistleblowers-facing-retribution)  
5 [facing-retribution](https://www.thenewamerican.com/usnews/health-care/item/18610-va-whistleblowers-facing-retribution). As shown in this report: [https://www.pogo.org/analysis/2018/08/new-](https://www.pogo.org/analysis/2018/08/new-report-confirms-whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-affairs/)

6 [report-confirms-whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-](https://www.pogo.org/analysis/2018/08/new-report-confirms-whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-affairs/)  
7 [affairs/](https://www.pogo.org/analysis/2018/08/new-report-confirms-whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-affairs/), Agencies attack often and harshly. CIA and NSA executives have been widely  
8 shown to use spy tools to attack domestic citizens they don't like, ie:

9 [https://www.dailymail.co.uk/news/article-2435011/NSA-employees-used-phone-tapping-](https://www.dailymail.co.uk/news/article-2435011/NSA-employees-used-phone-tapping-tools-spy-girlfriends-cheating-husbands.html)  
10 [tools-spy-girlfriends-cheating-husbands.html](https://www.dailymail.co.uk/news/article-2435011/NSA-employees-used-phone-tapping-tools-spy-girlfriends-cheating-husbands.html) , and hundreds of other news links that can be  
11 provided. Elon Musk and Tesla, as well as Eric Schmidt and Larry Page at Google, have  
12 been proven to use the CIA group: IN-Q-TEL, to run government sponsored/financed  
13 attacks on business competitors. In Civil Action No. 1:13-cv-00777-RBW GOVERNMENT  
14 AGENCIES WERE CAUGHT BEING USED FOR ATTACKS AGAINST CITIZENS  
15 AND PUNISHED IN THE COURT AND THE MEDIA! The IRS, and hordes of other  
16 government agencies have been caught and proven, IN COURT, to target and attack people  
17 for presumed political differences.

18 Why should we assume that the Social Security Administration is not ALSO doing this too  
19 to harm citizens who speak out? The Lois Lerner IRS attacks took many years to resolve. In  
20 an unprecedented victorious conclusion to a four year-long legal battle against the IRS, the  
21 bureaucratic agency admitted in federal court that it wrongfully targeted citizens, during the  
22 Obama Administration, because of their political viewpoints and issued an apology to those  
23 people for doing so. In addition, the IRS is consenting to a court order that would prohibit it  
24 from ever engaging in this form of unconstitutional discrimination in the future. In a  
25 proposed Consent Order filed with the Court, the IRS has apologized for its treatment of  
26 U.S. citizens including organizations from 20 states that applied for 501(c)(3) and (c)(4) tax-  
27 exempt status with the IRS between 2009 and 2012 -- during the tax-exempt determinations  
28 process. Crucially, following years of denial by the IRS and blame-shifting by IRS officials,

the agency now ePlaintiff 42ressly admits that its treatment of our clients was wrong and a total violation of our Democracy. As set forth in the proposed Order: “The IRS admits that its treatment of Plaintiffs during the tax-exempt determinations process, including screening their applications based on their names or policy positions, subjecting those applications to heightened scrutiny and inordinate delays, and demanding of some Plaintiffs’ information that TIGTA determined was unnecessary to the agency’s determination of their tax-exempt status, was wrong.

For such treatment, the IRS ePlaintiff 42resses its sincere apology.” Throughout litigation of this case, activists have remained committed to protecting the rights of the public who faced unlawful and discriminatory action by the IRS and other agencies. The objective from the very beginning has been to hold agencies accountable for corrupt practices.

This Consent Order represents a historic victory for the public and sends the unequivocal message that a government agency’s targeting of citizens organizations, or any organization, on the basis of political viewpoints, will never be tolerated and that revenge will be swift and vast. The Order will put an end, once and for all, to the abhorrent practices utilized against citizens, as the agreement includes the IRS’s ePlaintiff 42ress acknowledgment of – and apology for – its wrongful treatment of the public. While this agreement is designed to prevent any such practices from occurring again, rest assured that all public interest lawyers will remain vigilant to ensure that the IRS, SSA, DOJ or SEC does not resort to such tactics in the future. Per detailed reports, in March of 2012 lawyers began being contacted by literally dozens of citizens and groups who were being harassed by the Obama IRS after submitting applications for tax-exempt status. Their tax-exempt applications were held up for years (over seven years in some cases), and they began receiving obtrusive and unconstitutional requests for donor and member information. That began a now more than five and a half year fight with the burgeoning bureaucracy at the IRS. Then on May 10, 2013, Lois Lerner, the then head of the IRS Tax Exempt Organizations Division, publicly implicated the IRS in one of the worst political targeting scandals of the century.

28

This is an extraordinary victory against government agency abuse. It sends a powerful warning to the deep state bureaucracy that it will not be allowed to violate the Constitution in order to silence and shut down the whistle-blowers. In addition to the IRS’s admissions of and apology for its wrongful conduct, the Consent Order would specifically award Plaintiffs the following: - A declaration by the Court that it is wrong to apply the United States tax code to any tax-exempt applicant or entity based solely on such entity’s name, any lawful positions it espouses on any issues, or its associations or perceived associations with a particular political movement, position or viewpoint; - A declaration by the Court that any action or inaction taken by the IRS must be applied evenhandedly and not based solely on a tax-exempt applicant or entity’s name, political viewpoint, or associations or perceived associations with a particular political movement, position or viewpoint; and - A declaration by the Court that discrimination on the basis of political viewpoint in administering the United States tax code violates fundamental First Amendment rights.

Disparate treatment of taxpayers based solely on the taxpayers’ names, any lawful positions the taxpayers espouse on any issues, or the taxpayers’ associations or perceived associations with a particular political movement, position or viewpoint is unlawful. In the Order, the IRS has also agreed that (unless ePlaintiff 42ressly required by law) certain actions against the Plaintiffs– i.e. the sharing, dissemination, or other use of information unnecessarily obtained by the IRS during the determinations process (such as donor names, the names of volunteers, political affiliations of an organization’s officers, etc.) – would be unlawful. In addition, the IRS promises not to take any retaliatory action against our clients for ePlaintiff 42osing the targeting scheme. Finally, and of crucial significance, the IRS admits it targeted persons and groups based on their viewpoints (i.e., “policy positions”) and that such viewpoint discrimination violates fundamental First Amendment rights. This is the first time the IRS has admitted that its targeting scheme was not just “inappropriate” – as TIGTA found – but, as alleged, blatantly unconstitutional.

To ensure consistency and uniformity within the agency’s operations going forward, the IRS

1 is required, pursuant to the Order, to inform all employees within the Exempt Organizations  
2 Division, as well as the Commissioners and Deputy Commissioners within other divisions,  
3 of the Order’s terms. This Order not only validates allegations about their treatment at the  
4 hands of the corrupt Obama-era IRS but also provides important assurances to the American  
5 public that the agency understands its obligation to refrain from further such discriminatory  
6 conduct. As Attorney General Sessions acknowledged in this regard, “[t]here is no excuse  
7 for [the IRS’s] conduct,” as it is “without question” that the First Amendment prohibits the  
8 conduct that occurred here, i.e., subjecting American citizens to disparate treatment “based  
9 solely on their viewpoint or ideology.” Sessions further confirmed his Department’s  
10 commitment to ensuring that the “abuse of power” in which the IRS engaged here “will not  
11 be tolerated.” It is impossible to overstate the importance of this victory.

12 This marks a years-long fight for justice in defense of the constitutional rights of the public.  
13 This is an extraordinary victory against abuse of power and corruption. It sends a powerful  
14 warning to the deep state bureaucracy that it will not be allowed to violate the Constitution  
15 and manipulate the IRS, SSA and other agencies in order to silence and shut down those  
16 who speak out about political corruption crimes. In the wake of Wisconsin Watchdog’s  
17 investigation into SSA staff allegations of incompetence, misconduct, and retaliation in  
18 Social Security disability appeals offices, several employees have taken their complaints to a  
19 Senate committee led by Wisconsin Sen. Ron Johnson.

20  
21 An official with knowledge of the complaints said the Senate Homeland Security and  
22 Governmental Affairs Committee, chaired by the Oshkosh Republican, has received emails  
23 and other contacts from “certain people” inside the Social Security Administration’s Office  
24 of Disability Adjudication and Review. The initial complaints came from an employee  
25 inside the Milwaukee office following Wisconsin Watchdog’s opening investigative report  
26 that found some claimants waiting more than 1,000 days for an appeals decision on their  
27 disability benefits claim. Following Wednesday’s story of a whistle-blower in the Madison  
28 ODAR office, the committee has received more specific complaints about retaliation against

1 employees, the source said. Committee staff members sent the latest Watchdog piece to SSA  
2 administrators hoping they will “cooperate,” the source said. To date, the agency has been  
3 less than cooperative. “This is an ongoing process, and they are not always as forthcoming  
4 as we’d like them to be,” the source said. “Hopefully with your continued reporting, this is  
5 an issue they can’t duck.” A Senate committee member said officials there are working with  
6 the Office of Special Counsel on “multiple whistle-blower retaliation claims.” The  
7 committee continues to request information from the SSA. The whistle-blower in the  
8 Madison office claims management retaliated against her after she was called to testify in a  
9 misconduct case.

10 The incident involved “inappropriate behavior” by an administrative law judge, she said.  
11 “They are so corrupt. It’s absolutely horrible,” said the woman, a lead case technician in the  
12 Madison Office of Disability Adjudication and Review. She spoke on condition of  
13 anonymity, fearing more retribution from her supervisors. While she said recounting her  
14 particular experiences will more than likely betray her identity anyway, the ODAR case  
15 worker insisted she has had enough. “I’m at point where they don’t care about me, I don’t  
16 see why I’m protecting them. This is my last resort,” she said. “I want to do my work  
17 without fear of retaliation.” She said she has contacted the Senate committee. “I forwarded  
18 my information to them and I got an email back from them. See these reports:

- 19 • [WSJ: 131 Federal Judges Broke Law by Hearing Cases Where They Had Financial

- 27 • They said people are coming out of the woodwork with their complaints (about ODAR)  
28 following your story,” the whistle-blower said. Ronald Klym, a long-time senior legal

1 assistant in the Milwaukee ODAR office, alleges he has been retaliated against by  
2 supervisors for going public with his charges of incompetence and misconduct in the  
3 agency. The federal employee, who has worked for SSA for 16 years, provided Wisconsin  
4 Watchdog with documents showing extremely long wait times for claimants appealing their  
5 denied applications for benefits. Doug Nguyen, SSA regional spokesman, in a previous story  
6 said the agency acknowledges that Milwaukee ODAR has a “high average processing time  
7 for disability appeal hearings, and we are working to address the issue.” Beyond the delays  
8 is what Klym calls the “shell game,” the wholesale transferring of cases to other parts of the  
9 country by administrators to make the Milwaukee office’s numbers look better than they are.  
10 The Madison office whistle-blower confirmed Klym’s allegations, saying at one point she  
11 saw 2,000 cases from the Milwaukee office handed off to the Oak Brook operation. There  
12 are over 10,000 SSA disability manipulation charges against SSA executives and staff.

13 **- BLACKLISTING:**

14 Government officials and tech oligarchs contacted members of the National Venture Capital  
15 association (NVCA) and created national “black-lists” to blockade Plaintiffs from receiving  
16 investor funding. This was also confirmed in a widely published disclosure by Tesla Motors  
17 Daryl Siry and in published testimony. If Silicon Valley political campaign finance oligarchs  
18 black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action  
19 Lawsuit" cases) you will never get investor funding again.

20 **- FOIA OBFUSCATION:**

21 Federal FOIA requests were hidden, frozen, stone-walled, delayed, lied about and only  
22 partially responded to in order to seek to hide information and run cover-ups. In once  
23 instance, even though GOVT FOIA staff had the requested FOIA files in their top desk  
24 drawers, they delayed handing the FOIA copies over for nearly a decade in order to run a  
25 cover-up.

26 **- ARBITRARY DEADLINE MANIPULATION:**

27 Crony state and federal officials play an endless game of Catch-22 by arbitrarily determining  
28 that deadlines had passed that they, the government officials, had stonewalled and

1 obfuscated applications for, in order to force these deadlines that they set, to appear to be  
2 missed.

3 **- POLITICAL POISONING & TOXIC exposure:**

4 Plaintiffs were found to be strangely poisoned, not unlike the Alexander Litvenko case, The  
5 Salisbury Case and hundreds of other political poisoning cases. Heavy metals and toxic  
6 materials were found right after Plaintiffs work with The U.S. Government weapons and  
7 energy facilities. Many wonder if Plaintiffs was intentionally exposed to toxins in retribution  
8 for their testimony. The federal MSDS documents clearly show that a number of Plaintiffs  
9 were exposed to deadly compounds and radiations, via GOVT, without being provided with  
10 proper HazMat suits which GOVT officials knew were required.

11 **- WORKPLACE SABOTAGE AND OBSTRUCTION:**

12 Plaintiffs employers were called, and faxed, and ordered to fire target Plaintiffs from their  
13 places of employment, in the middle of the day, with no notice, as a retribution tactic.

14 **- MEDIA ASSASSINATION PROGRAMS:**

15 On orders from Obama White House officials Google, YouTube, Gawker Media and  
16 Gizmodo Media produced attack articles. Google locked these contrived attack articles from  
17 the Nicholas Guido Denton tabloid empire on the top line, of the front page of all Google  
18 searches for a decade in front of 7.5 billion people, around the world. This attack-type uses  
19 over \$40 million dollars in server farms, production costs and internet rigging. The forensic  
20 data acquired from tracking some of these attacks proves that Google rigged these attacks  
21 against Plaintiffs on the internet and that all of Google’s “impressions” are manually  
22 controlled by Google’s executives who are also the main financiers and policy directors of  
23 the Obama Administration. This data was provided to the European Union for it’s ongoing  
24 prosecution of Google’s political manipulation of public perceptions. Hired attackers  
25 Nicholas Guido Denton, John Herman, Adrian Covert, Ian Fette, Patrick George, Gabrielle  
26 Darbyshire and John Cook have been referred to the FBI for surveillance, tracking and  
27 interview relative to the command, control and compensation for those attacks.

28 **- COMMERCIAL EMPLOYMENT DATABASE POISONING AND RED-**

1 **FLAGGING:**

2 Plaintiffs HR and employment records, on Taleo, Palantir and EVERY recruiting and hiring  
3 database, was embedded with negative keywords and “flags” in order to prevent the  
4 Plaintiffs from ever gaining future employment.

5 **- ATTEMPTS ON THE LIVES OF WHISTLE-BLOWERS:**

6 Gary D. Conley, Seth Rich, Rajeev Motwani who Plaintiffs knew, and many other whistle-  
7 blowers in these matters, turned up dead under strange circumstances. Plaintiffs have  
8 received ongoing death threats for his help to federal investigations in the larger organized  
9 crime investigation relative to this matter. See the list of over 120 dead victims, lower down  
10 in this document, 1/3 of whom worked with Plaintiffs and were threatened in advance of  
11 their deaths.

12 **- REVENUE BLOCKADES AND INTERNET INCOME RE-DIRECTION:**

13 Paypal (A DNC-biased operation owned and operated by White House political campaign  
14 financiers) and other on-line payments for on-line sales by Plaintiffs are de-platformed,  
15 delayed, hidden, or re-directed in order to terminate income potential for target who  
16 competed with the attackers interests and holdings. This further denied Plaintiffs income. As  
17 a test, Plaintiffs built an online store with hundreds of thousands of products and marketed it  
18 globally. Trackers, placed by Plaintiffs technicians, on servers, discovered that Paypal and  
19 an outside “Virginia-based system” were DNS and payment re-directed all traffic away from  
20 the store so that Plaintiffs received no traffic and no income. In DNS redirection, "website  
21 spoofing" sends target Plaintiffs websites to dead ends where no sales orders or customer  
22 inquiries actually get back to the target. These internet revenue activity manipulations are  
23 conducted using outside covert servers operated by the attackers and revealed in the  
24 Snowden Leaks. All commercial storefronts and on-line sales attempts by target Plaintiffs,  
25 had their sites hidden, or search engine de-linked by a massively resourced facility located in  
26 Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the  
27 Plaintiffs.

28 **- TROLL FARM DEPLOYMENTS:**

1 Contracted trolls, skills, botnets and synth-blog deployments are deployed to place  
2 defamatory statements and disinformation about Plaintiffs in front of 7.5 billion people  
3 around the world on the internet in order to seek to damage their federal testimony  
4 credibility by a massively resourced facility. Some of these troll farms were uncovered in  
5 Russia, Ukraine, Israel and Brazil. Renown author Farrow writes about this technique in his  
6 book: *“Catch And Kill”*.

7 **- FUSION GPS, MEDIA MATTERS BRAND “KILL” CONTRACTS:**

8 Campaign finance dirty tricks contractors were hired by campaign financiers to attack the  
9 friends and family members of the target Plaintiffs in order to create low morale for the  
10 target Plaintiffs psyche and motivation.

11 **- MANUAL SEARCH ENGINE LOCK-IN ATTACKS:**

12 In one case covert political partner: Google, transferred large sums of cash to dirty tricks  
13 contractors and then manually locked the media portion of the attacks into the top lines of  
14 the top pages of all Google searches globally, for years, with hidden embedded codes in the  
15 links and web-pages which multiplied the attacks on Plaintiffs by many magnitudes.

16 **- U.S. PATENT OFFICE MANIPULATION TO BLOCKADE REVENUE:**

17 Covert Cartel financier: Google, placed Google’s lawyer: Michelle Lee, in charge of the  
18 U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE  
19 review boards and offices with Google-supporting employees in order to rig the U.S. Patent  
20 Office to protect Google from being prosecuted for the vast patent thefts that Google  
21 engages in. Google has hundreds of patent lawsuits for technology theft and a number of  
22 those lawsuits refer to Google’s operations as “Racketeering”, “Monopolistic Cartel” and  
23 “Government Coup-like” behaviors. Thousands of articles and investigations detail the fact  
24 that Google, “essentially” ran the Obama White House and provided over 80% of the key  
25 White House staff. A conflict-of-interest unlike any in American history. Google’s investors  
26 personally told Plaintiffs they would “kill him”. Google and the Obama Administration were  
27 “the same entity”. Plaintiffs testified in the review that got Michelle Lee terminated and  
28 uncovered a tactical political and social warfare group inside Google who were financed by

1 Federal and State funds. For additional proof, SEE THE VIDEO at:

2 [http://focus-book.com/public/The\\_Battle\\_to\\_Save\\_Inventing.m4v](http://focus-book.com/public/The_Battle_to_Save_Inventing.m4v)

5 Silicon Valley has taken over the U.S. Patent Office with lobbyists and influence payments.

6 Per Randy Landreneau, the President the U.S. Inventor guild: “ *Independence Day is that*

7 *special time when we Americans remember and celebrate our country's freedom. While it*

8 *may mean different things to many people, suffice to say, it is the reason we are Free, we*

9 *have Liberty.* Founder, writer, statesman and inventor Benjamin Franklin wrote, "On

10 Historical occasions, Questions of Right and Wrong, Justice and Injustice, will naturally

11 arise." Here, on this honored day, we take a quick look at Invention and our Independence.

12 Towards the beginning of the Declaration of Independence, whose principal author was our

13 eventual third president, Thomas Jefferson, the very purpose of our Founders' quest was

14 established. It is stated: "We hold these truths to be self-evident, that all men are created

15 equal, that they are endowed by their Creator with certain unalienable Rights, that among

16 these are Life, Liberty and the pursuit of Happiness." These were men and women of

17 incredible vision, of intense courage, and they succeeded in accomplishing their seemingly

18 insurmountable task, rising up and defeating perhaps the most powerful global Empire of the

19 time, Great Britain. The United States of America eventually became the beacon of hope

20 and individual freedom around the world. People from virtually every land came to this

21 country to seek the American Dream, which ideals include individual and property rights,

22 religious freedom, liberty, equality and the opportunity for upward mobility, achieved

23 through dedication and hard work. One of the reasons America became the world leader in

24 nearly all categories is due, in no small part, to how our Founders recognized and

25 encouraged invention and innovation. They understood what builders, creators and designers

26 could mean to a small, fledgling country with such a noble purpose. After declaring our

27 independence and fighting a long and bloody war to establish it, our Founders gathered once

28 again in Philadelphia for the Constitutional Convention to form a government that would

1 embody those ideals embodied in our Declaration of Independence. The Father of our  
2 Constitution and eventual fourth President, James Madison wrote, in Federalist 43 (January  
3 23, 1788): "A power 'to promote the progress of science and useful arts, by securing, for a  
4 limited time, to authors and inventors, the exclusive right to their respective writings and  
5 discoveries.' "The utility of this power will scarcely be questioned. The copyright of authors  
6 has been solemnly adjudged, in Great Britain, to be a right of common law. The right to  
7 useful inventions seems with equal reason to belong to the inventors. The public good fully  
8 coincides in both cases with the claims of individuals. The States cannot separately make  
9 effectual provisions for either of the cases, and most of them have anticipated the decision of  
10 this point, by laws passed at the instance of Congress." Thus, within our U.S. Constitution is  
11 that short item, located in Article I Section 8 as Clause 8: "To promote the Progress of  
12 Science and useful Arts, by securing for limited Times to Authors and Inventors the  
13 exclusive Right to their respective Writings and Discoveries." That clause is, in reality, a  
14 significant and powerful part of the American Dream, allowing people from all walks of life  
15 who have a bright and useful idea to capitalize on their innovations and creations. For more  
16 than two centuries that which our Founders established for inventors and patent holders held  
17 true, for the most part. However, the biggest blow to true Independence for Inventors came  
18 with passage of the America Invents Act of 2011 (AIA). Due to ambiguous language and  
19 loopholes in that piece of legislation, multinational conglomerates and Big Tech have all but  
20 wiped out what our Founders had set up, which they hoped would endure - patent holder  
21 property rights. When any form of poor legislation is passed and enacted we are reminded of  
22 what Samuel Adams, Sons of Liberty founder and a leader of the Boston Tea Party, said;  
23 "The grand end of civil government, from the very nature of its institution, is for the support,  
24 protection, and defense of those very rights; the principal of which, as is before observed,  
25 are Life, Liberty, and Property."

26 Indeed, Jefferson states it quite succinctly, "Our legislators are not sufficiently apprized of  
27 the rightful limits of their power; that their true office is to declare and enforce only our  
28 natural rights and duties, and to take none of them from us." Madison adds to that, "A

1 Government is instituted to protect property of every sort...This being the end of  
2 government, that alone is a just government, which impartially secures to every man,  
3 whatever is his own.” As we celebrate Independence Day, and all that our Founders  
4 provided for our great country, we at US Inventor are working to correct the wrongs and  
5 injustices that have befallen inventors, particularly since the AIA was enacted, by  
6 revitalizing the spirit of our Declaration of Independence (“...Life, Liberty and the pursuit of  
7 Happiness.”) through restoration of patent rights and protection as guaranteed in Article I  
8 Section 8 Clause 8 of our United States Constitution (“securing, for a limited time, to ...  
9 inventors, the exclusive right to their respective ... discoveries.”). We will not rest until the  
10 rights of inventors have been restored. We're gaining ground, but our enemies are powerful.  
11 We need your help in forwarding our cause and becoming involved when it matters. This  
12 isn't just for us, it's for our children, our grandchildren, and the future existence of the  
13 American Dream.”

14 Silicon Valley oligarchs have spent billions of dollars to put their people inside the United  
15 States Patent Office and to manipulate patent rulings in order to harm WITNESS and his  
16 peers for the purposes of: 1.) cheating instead of competing by stealing technologies and not  
17 paying for them and, 2.) operating reprisal, vendetta, retaliation campaigns against  
18 competitors and political enemies.

19 **- HONEY-TRAPS:**

20 “Honeytraps” and moles were employed by the attackers. In this tactic, people who covertly  
21 worked for the attackers were employed to approach the “target” in order to spy on and  
22 misdirect the subject. Match.com and other dating sites are owned by famous politicians and  
23 election campaign financier involved with Jeffrey Epstein and those sites were used to  
24 source girls for Epstein and Honey-traps to lure political adversaries.

25 **- FAKE NEWS TABLOID EMPIRE CREATED JUST FOR DEFAMATION**  
26 **ATTACKS:**

27 Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins were  
28 retained to produce "hatchet job" character assassination articles about Plaintiffs. Then those

1 articles were faxed, mailed and emailed to Kaiser Permanente and investors with a note  
2 saying: "You don't want to have anything to do with this person, do you..?" in order to get  
3 Plaintiffs fired from their job and get Plaintiffs loans or financing pulled. The attackers use  
4 their round one attack media, that they authored, to create a round two second wave attack  
5 designed to end Plaintiffs life status via economic warfare.

6 **- HOUSING BLOCKADES:**

7 Mortgage and rental applications had red flags added to them in databases to prevent the  
8 targets from getting homes or apartments.

9 **- HACKING OF Plaintiffs DEVICES:**

10 Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT  
11 publications have reported that hundreds of spy "back-doors" have been found on every  
12 Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and  
13 hardware component set. This means that the attackers used a "key" code can open any of  
14 Plaintiffs computer, server, router, cloud-network or other network connected device and  
15 read every file, photo, video, your calendar and email on devices at any time from any  
16 location on Earth. This has been widely reported on by Glenn Greenwald, Edward Snowden,  
17 Scahill, Cheryl K of CBS News and others. Plaintiffs was hacked at least 10 times. In a  
18 number of instances, people, who Plaintiffs had been communicating with online, were  
19 mysteriously contacted by a third party who sent them the Gizmodo attack article or phoned  
20 them with warnings to avoid Plaintiffs. These kinds of Man-In-The-Middle interceptions  
21 would only have been possible from hacking and MITM surveillance tactics.

22 **- TECH INDUSTRY BLACK-LIST COORDINATION:**

23 McCarthy-Era "Black-lists" were created and employed against target Plaintiffs who  
24 competed with Obama Administration executives and their campaign financiers to prevent  
25 them from getting funding and future employment. This White House process is known as  
26 "RatFucking", a tactic that is documented in a variety of published reports and on  
27 Wikipedia. Using Gust, Google Docs, Dropbox and secret meetings, a black-list has been  
28 maintained to attack Plaintiffs for whistle-blowing.

**- HUD AND USDA MORTGAGE RIGHTS BLOCKADES:**

The housing rights of Plaintiffs were stalled in reprisal. Public records show that tens of thousands of other Plaintiffs were moved ahead of Plaintiffs even though Plaintiffs validation metrics exceeded those of almost every other Plaintiffs. Plaintiffs was “black-listed”.

135. Additional ‘dirty tricks’ efforts were used per:

2  
3 **EXHIBIT 3 - An Overview Of The Cover-Up**  
4  
5

6           These documents have been provided to The *FBI – (C. Wray, P. Cair, Bennett, J. Comey, D.*  
7 *Johnson & the IG, et al)*; The *DOJ – (Merrick, S. Hinds, E. Holder, S. Winslow, M. Lo, W. Garbers*  
8 *& the IG, et al)*, The *CFTC – Executive offices)*, The *U.S. Inspector General, The GAO (fraudnet,*  
9 *The IG, et al)*, The *FCC (The IG)*, The *FEC – (The IG)*, The *SEC – (Charman, SF office, et al)*, The  
10 *OGE (The IG)*, The *U.S. Attorney General, The OSC – (Alexander, et al)*, The *DOE – (Secty, The*  
11 *IG, et al)*, The *FTC (The IG, Chairman, et al)* *CONGRESSIONAL ETHICS OFFICES - (Filing*  
12 *Secty, and Senior Members)* ; The *SSA – (Human Rights Complaints Office, The IG, et al)*;  
13 *SPECIAL COUNSEL JOHN W. HUBER – (J. Huber, DOJ-IG) – SENATE COMMERCE*  
14 *COMMITTEE – (Filing Secty)* *SPECIAL COUNSEL JOHN DURHAM - (J. Durham, DOJ-IG, et*  
15 *al)* and related law enforcement and regulatory agencies.

16           We have contacted all law enforcement and regulatory agencies about this matter. Field  
17 agents have informed us that their bosses have ordered them to stone-wall this case, to avoid writing  
18 '302 reports' (because Congress can see them) and to finger point the matter off to "other agencies"  
19 in order to avoid political embarrassment and administrative shame. Such obfuscation is illegal at a  
20 felony-level and at a Constitutional law level.

21           We are now copying these papers to 1.) every member of Congress, 2.) every law  
22 enforcement and regulatory agency in the U.S.A. and EU, over 5000 investigative journalists and  
23 every American citizen.

24           We saw the highest level government officials manipulate government process and Treasury  
25 funds in order to payola themselves, and their friends, and harm their business competitors. We saw  
26 government officials manufacture crisis “stimulus” money for their own pockets!

27           Senior government officials defrauded us in an energy industry stock market scam, and, in  
28 partnership with their Silicon Valley tech financiers, engaged in a RICO law violating organized

1 criminal ‘enterprise’ and also ran over \$30 million of Fusion GPS/Black Cube/Gawker-Gizmodo-  
2 Google attacks against us (Proven by their financial records). The attackers used government  
3 resources, agency staff and government funds. They sought to terminally harm us in retaliation for  
4 competing with Defendants (Defendants = government officials and their Silicon valley oligarch  
5 financiers) and for assisting police with investigations of Defendants. Herein, and via referenced  
6 Congressional and Inspector General investigations, we have provided proof of over 1000 instances  
7 of government officials running retaliation attacks and engaging in an organized pattern of criminal  
8 activity via an organized ‘enterprise’ as defined by RICO and anti-trust laws.

9 We have personally known many of these politicians, their families and their Silicon Valley  
10 financiers since College days. The Defendants invited some of us into their criminal scheme but we  
11 chose to assist law enforcement and public justice instead.

12 While the government is planning to give \$450,000.00 to each illegal immigrant, ((  
13 [https://www.washingtonexaminer.com/news/biden-administration-weighing-450k-a-person-](https://www.washingtonexaminer.com/news/biden-administration-weighing-450k-a-person-compensation-to-migrant-families-separated-by-trump)  
14 [compensation-to-migrant-families-separated-by-trump](https://www.washingtonexaminer.com/news/biden-administration-weighing-450k-a-person-compensation-to-migrant-families-separated-by-trump) ); that same government is with-holding  
15 millions of dollars from us, who saved the government billions of dollars. That same government  
16 hired Fusion GPS, Black Cube, Perkins Coie, Gawker, Gizmodo and other attack services to destroy  
17 us according to federal investigators. We have demanded compensation, back-owed monies and  
18 recovery of our losses. Government agencies responsible for correcting the situation are engaging in  
19 cover-ups and stone-walling. That is why we are forced to release the “whole story”.

20 We have provided the details in electronic evidence repositories as well as a list of public  
21 officials we have reported to who have failed to take action, been non-responsive and who have  
22 operated a cover-up of this matter.

23 Senior government officials defrauded us in an energy industry stock market scam, and, in  
24 partnership with their Silicon Valley tech financiers, engaged in a RICO law violating organized  
25 criminal ‘enterprise’ and also ran over \$30 million of Fusion GPS/Black Cube/Gawker-Gizmodo-  
26 Google attacks against us, their competitors and whistle-blowers. The attackers used government  
27 resources, agency staff and government funds. They sought to terminally harm us in retaliation for  
28 competing with Defendants and for assisting police with investigations of Defendants. Herein, and

1 via referenced Congressional and Inspector General investigations, we have provided proof of **over**  
2 1000 instances of government officials running retaliation attacks and engaging in an organized  
3 pattern of criminal activity via an organized ‘*enterprise*’ as defined by RICO and anti-trust laws.

4 From the OPM and Congressional staff we acquired a list of every person who worked at  
5 The White House and the Department of Energy during the periods in question. We then used  
6 forensic databases and securities industry resources to see which ones owned stock, job promises  
7 and conflict-of-interest assets in our competitors and adversaries. So far, we have not found A  
8 SINGLE ONE of those people who did not have a major conflict-of-interest. We encourage the  
9 public and the press to conduct the same examination, independently, and to have the FBI, The  
10 GAO, DOJ, ICIJ and ProPublica check their work. When you ‘follow-the-money’, the crimes and  
11 the criminals are obvious!

12 **The materials in the referenced documents cover:**

- 13 - The historical background of the perpetrators and their political and business Cartel  
14 actions.
- 15 - Our first-hand interactions with the perpetrators.
- 16 - Related cases and charges against perpetrators by other parties and agencies.
- 17 - The covert financial profit administration/beneficiary web disclosed by ICIJ and federal agency  
18 investigations.
- 19 - The reprisal attacks against us financed, commanded and controlled by the perpetrators.
- 20 - The cover-up, black-listing, stone-walling and obfuscation tactics deployed by major public  
21 officials in order to delay justice in this case.
- 22 - The manipulation of public funds and agencies for the unjust gain of the referenced Cartel and it’s  
23 perpetrator/members at the expense of the public.
- 24 - The ‘convenient’ deaths of a surprising number of individuals involved in this matter.
- 25 - Billions of dollars of political campaign financing deployed by the Defendants in national and  
26 regional elections.
- 27 - Personal communications between White House staff and government agencies.
- 28 - Trillions of dollars of energy industry and media industry profiteering and stock market

1 manipulations.

2 - Billions of dollars of high tech and automobile market anti-trust law violations.

3 Government officials engaged in monopolistic, market-rigging, blacklist-based crimes  
4 which harmed us. Then those officials operated spy-agency-type retaliation/reprisal/revenge attacks  
5 against us in retaliation for: 1.) reporting those crimes, 2.) competing with defendants, and 3.)  
6 assisting in the investigation of those crimes.

7 Every public official who attacked us: A.) held stock and assets in our competitors, B.) was  
8 compensated by our competitors, C.) was a member of organizations who paid news, internet and  
9 information services to manipulate their output for their own unjust gain, D.) knew that their  
10 malicious assertions were false and defamatory, and E.) and otherwise met the legal means test to  
11 qualify as violators of federal RICO laws, Human Rights laws, Civil Rights standards and related  
12 State and Federal Constitutional rights laws.

13 By rigging HUD, SSA, DOE, and other public benefits determinations, to harm the funding,  
14 payments, witness fees, informant fees, whistle-blower awards and stock market profits of  
15 adversaries, the Defendants engaged in felony crime. The purpose of a RICO case against the  
16 Defendants should be to cripple the whole crime organization via numerous charges, which shall  
17 be brought against multiple defendants, under multiple liability, which means that prosecutors will  
18 find the underlying elements of of these acts and then have conspiracy on top of it, and then each  
19 and *every charge* against the perpetrators is *separate* and runs *consecutively* .

20 For example when Elon Musk is charged with bribery and conspiracy that charge may have  
21 led to 10-15 years in prison in the *old days*, now under RICO, when found guilty of racketeering he  
22 can be fined up to \$25,000 and and sentenced to 20 years in prison per *each* of many racketeering  
23 counts.

24 RICO charges, as part of the charge set, will make these *convictions easier*. In many cases,  
25 the threat of a RICO indictment *can force these defendants to plead guilty* to lesser charges, in part  
26 because the seizure of their assets would make it difficult to pay a defense attorney for a case this  
27 large. Racketeering and RICO-related crimes are grave and *require* skilled defense, that is prepared  
28 to face the government-assembled legal teams in federal court. *Essentially, “it means the convicted*

1 would never see the light of day again, they are never getting out. “

2 Despite its harsh provisions, these RICO-related charges are easy to prove in court, as they  
3 focus on patterns of behavior as opposed to criminal acts. The government officials and their tech  
4 oligarch partners were audacious in publicly promoting their crimes and their above-the-law  
5 attitudes. RICO, here, also permits a private individual “*damaged in his business or property*” by a  
6 “*racketeer*” to file a civil suit. The government should, thus, join with us in this case.

7 We have proven the existence of an illegal “*enterprise*“., per the FTC and DOJ legal  
8 meaning of that term.

9 The defendant(s) are *not* the enterprise; in other words, the *defendant(s)* and the *enterprise*  
10 are *not* one and the same.

11 The defendant(s) meet the construct of four specified relationships:

12 1. the defendant(s) and the enterprise: either the defendant(s) invested the proceeds of the  
13 pattern of racketeering activity into the enterprise;

14 2. the defendant(s) acquired or maintained an interest in, or control of, the enterprise through  
15 the pattern of racketeering activity;

16 3. the defendant(s) conducted or participated in the affairs of the enterprise “through” the  
17 pattern of racketeering activity ;

18 4. the defendant(s) conspired to do all of the above crimes.

19 The enterprise, herein, is the ‘prize,’ ‘instrument,’ ‘victim,’ or ‘perpetrator’ of the  
20 racketeers. A civil RICO action for this matter should be filed in state *AND* federal court.

21 We intend that both the *criminal* and *civil* components will allow the recovery of treble  
22 damages (damages in *triple* the amount of actual/compensatory damages) for Plaintiffs.

23 Our evidence has focused on *patterns of behavior AND criminal acts*.

24 We seek multiple liability (charges brought against multiple defendants, which means if  
25 prosecutors now find the underlying elements of of these acts, you have conspiracy on top of it)

26 Each and *every charge* against defendants is *separate* and runs *consecutively*. *Admissible*  
27 hearsay evidence is offered in this case. Associative evidence is allowed ( *guilt by association*  
28 meaning if a defendant profited off the crimes of an organization even if he was not directly

1 involved with the crime himself he shall still be charged as a co-conspirator and go *all the way* up  
2 the chain of command). This case structure will incentivize the operatives (soldati) at the corrupt  
3 law firms, CPA's, lobbyists and media outlets to flip, or roll-over, on the bosses.

4 This case structure allows *both* the government and ourselves to engage in substantial asset  
5 seizure. The owners of the racketeering shell corporations, real estate scams and trusts are well-  
6 known to often abscond with the assets. An injunction and/or performance bond ensures that there  
7 is something to *seize* in the event of a *guilty verdict*. In addition, the racketeers must *forfeit all* ill-  
8 gotten gains and interest in any business gained through a pattern of "*racketeering activity*." Over  
9 1000 false-front shells, trusts, dark money and PAC assets are known to be held by the defendants.

10  
11 The attackers hired, paid, commanded and controlled the attack services: Gawker Media, Gizmodo  
12 Media, Google, YouTube, Media Matters, Black Box, Fusion GPS, Black Cube, PsyOps, Shareblue,  
13 and other brands, and used them to operate retaliation attacks against us and to manipulate  
14 government agency procedures against us in revenge/reprisal procedures. An investor group, which  
15 included us, with support from Congress, ***sued the Department of Energy for corruption and won.***

16 In the course of that case The Secretary of Energy, The U.S. Attorney General, The Director  
17 of the FBI and over 100 other federal employees were fired for cronyism, corruption and insider  
18 trading.

19  
20 The Defendants have been proven to have received bribes from our competitors. For example: the  
21 most senior officials in The U.S. Government are the worshipers of Elon Musk, investor's in Elon  
22 Musk's companies and suppliers, deciders of the financing for Elon Musk, suppliers of staffing to  
23 Elon Musk, recipients of political campaign financing by Elon Musk and Musk's covert Google  
24 And Facebook partnership, social friends of Elon Musk and the attackers of Elon Musk's  
25 competitors. We demand damages payments and monies owed.

26 **The main issues herein include:**

- 27 1.) The creation and operation of the disclosed organized crime entity involving public figures  
28 2.) The methods and tactics of the bribery they employed using the stock market

1 3.) The attacks they operated against whistle-blowers and competitors using government resources,  
2 black-listing, funds blockades and dirty tricks services.

3 4.) The systemized sex trafficking and employee abuse protection scheme they operate

4 5.) The industrialization of political payola that they enforce using corrupt contracted services and  
5 former intelligence agency operatives

6 6.) Their coordinated violations of free speech and their systemized control of all digital news and  
7 information

8 7.) The harms to the public that they caused

9 8.) Judges and regulators who reviewed this case who owned the culprits companies:

10 [https://www.dailymail.co.uk/news/article-10038643/131-federal-judges-broke-law-hearing-cases-](https://www.dailymail.co.uk/news/article-10038643/131-federal-judges-broke-law-hearing-cases-involving-companies-financial-in.html)  
11 [involving-companies-financial-in.html](https://www.dailymail.co.uk/news/article-10038643/131-federal-judges-broke-law-hearing-cases-involving-companies-financial-in.html)

12  
13 **We have disclosed:** Retaliation, discrimination, abuse of process; FTCA violations; account stated;  
14 breach of contract; conversion; defamation; fraudulent misrepresentation; fraudulent concealment;  
15 injurious falsehood, product disparagement and trade libel; civil rights violations and violations of  
16 the U.S. Constitution; misappropriation of trade secrets; prima facie tort; quantum meruit; tortious  
17 interference including a.) Tortious interference with an existing contract, b.) Tortious interference  
18 with prospective, c.) Tortious interference with business relations contractual relations; patent  
19 infringement; personal injury; unjust enrichment; anti-trust law violations; labor law violations and  
20 related causes engaged in by the perpetrators.

21  
22 ***The perpetrators include White House*** officials and their staff, contractors and employees;  
23 ***United States Senators*** and their staff, contractors and employees; ***Department Of Energy*** officials  
24 and their staff, contractors and employees; ***Department of Justice*** officials and their staff,  
25 contractors and employees; ***Social Security Administration*** officials and their staff, contractors and  
26 employees; ***National Highway And Transportation*** Administration officials and their staff,  
27 contractors and employees; and, ***Other government agencies*** and their staff, contractors and  
28 employees as DOES 1 through 20 as proven by their leaked emails, Congressional and FBI

1 investigation records, eye-witness testimony, their banking and stock market records and  
2 recordings. Thus, it is impossible for any agency to say that this is not their concern or jurisdiction.

3  
4 Those of us damaged the the actions of these public officials claim for offsets from corrupt  
5 acts and collusion by government employees and contractors, all of whom engaged in said acts in  
6 order to acquire unjust gain with their stock market holdings and other hidden compensation routes.  
7 All other whistle-blowers and victims are on public, and court record, receiving between  
8 \$300,000.00 and \$150,000,000.00 with an average award of \$25,000,000.00.

9 Our demand includes removal of SSA blockades of funds, removal of blockades of  
10 payments, payments for damages, removal of informant fee blockades, removal of our whistle-  
11 blower fee blockades, payment of back-monies owed, payment for income loss, payment for stock  
12 market insider trading interference by public officials losses and related costs based on court-record  
13 historical precedents and GAAP historical comparative records of competitors who benefited at our  
14 expense via covert relationships with public officials.

1 **EXHIBIT 4 - Public News Coverage Context Of These Crimes And**  
2 **Corruption Activities:**

3  
4 You have heard about this case in the news. Here is some of the main-stream news coverage  
5 of it:

6 Joshua Comins disclosed how Nancy Pelosi's financial dealings gave her \$315 million in  
7 assets on just a government salary. Organized crime is suspected. If Bay Area politicians get mad at  
8 a constituent they can have that constituent “erased” from SSA, HUD and pension benefits, black-  
9 listed, media-attacked and utterly destroyed.

10 Where's the politician’s ‘dirty money’ money coming from?, everyone is asking.

11 House Speaker Nancy Pelosi, D-Calif., has served in Congress for nearly 34 years and  
12 presently presides in a top-tier position as one of the most powerful figures in The U.S. Government

13  
14 Speaker was unable to pass the bipartisan infrastructure bill as progressives in her own party  
15 signaled their disapproval. Many have condemned her policies, saying they're making it "harder and  
16 harder for average Americans to accumulate wealth," shackling them with taxes and "destroying the  
17 dollar with reckless spending."

18 The current salary of a Speaker of the House sits in the low six-figures, yet Pelosi is one of  
19 the richest members of Congress.

20 So what is her secret: "It appears to be her husband, Paul."

21 "After they got married, Paul opened up a real estate and venture capital firm. Through his  
22 connections, he pushed Nancy into the political world, helping her get elected to Congress in  
23 1987,". This is just like how Dianne Feinstein and Richard Blum hooked up their own deal.

24 The couple has timed the market and insider trading perfectly over the years while Nancy's  
25 been a Washington insider. With real estate and stocks, the Pelosis always know what the right  
26 investment is based on her lobbyist deals. The Pelosis own several pieces of real estate including a  
27 mansion in Napa Valley valued up to \$25 million, a DC waterfront condo worth over \$2 million,  
28 and a red brick mansion in California's Pacific Heights.

1 Her husband owns commercial properties in San Francisco "combined, worth up to \$50  
2 million.

3 In 2018, the Pelosis' wealth has skyrocketed. That year, her financial disclosure report  
4 revealed a net worth of over \$114 million. In 2019, Pelosi's assets total up to a whopping \$271  
5 million and in 2020, those numbers went up even more to as high as \$315 million.

6 In 2007, Visa worried the new Democrat Congress would target their swipe fees, costing  
7 them billions. So they hired a team of lobbyists who descended on Pelosi. Visa's CEO personally  
8 met with her. She got donations from them. One of his advisers left and became a VISA lobbyist  
9 himself. Suddenly, Paul Pelosi got a phone call from his broker. He was in luck, Paul was offered a  
10 prescreen-ed invite to get in early on Visa's \$18 billion IPO. Did Nancy and her husband hesitate?  
11 No, they bought between \$1 million and \$5 million worth of Visa stock. But it gets better. While  
12 Pelosi was speaker, bills that would have hurt Visa's stock price were blocked in the House. Visa  
13 shares going up over 200 percent during the time, making the Pelosis a fortune on paper.

14 In January, the Pelosis got a million dollars worth of Tesla stock right before Joe Biden  
15 announced electric car incentives in June. The Pelosi family cashed in big time just before Congress  
16 was set to pounce on Big Tech. Mr. Pelosi exercised options on Google's parent company,  
17 Alphabet, making an easy \$5.3 million.

18 Pelosi, Harris, Feinstein, Google and George Soros own Elon Musk's companies. Could any  
19 competitor to Musk get a fair shake in commerce or government funding? Never!

20 In March, Paul Pelosi exercised \$2 million worth of Microsoft options, just two weeks  
21 before the tech giant got a \$22 billion contract to equip the US Army with high tech headsets. The  
22 Pelosis and the Feinsteins have never been indicted for insider trading, but her marriage investments  
23 and access, combined with extremely fortunate timing, have created a lot of suspicions.

24 FINCEN, GAO, FBI, ICIJ and private investigators are now following the money, and there  
25 sure is a lot of it. There are hundreds of suspected criminal dark money charges that have been  
26 pointed at San Francisco Bay Area politicians.

27 Speaking of COVER-UPS:

28 **1.) Simone Biles, The U.S. Olympic Gymnastics Team and Larry Nasser sex case , 2.)**

1 **The Jeffrey Epstein sex cult case, 3.) The Gov. Gretchen Whitmer kidnapping case, 4.) The 9/11**  
2 **families case, 5.) The Michael Sussmann cover-up, and hundreds of other cases prove that**  
3 government officials cover-up big crimes in order to avoid personal shame. The victims reported to  
4 the FBI, DOJ, GAO, FTC, SEC and Congress in a timely manner and got stonewalled, lied to,  
5 attacked and retaliated against simply because they reported a crime! **THIS CASE** is yet another  
6 such case where the crimes were reported long ago but because it involved famous rich people, it  
7 was covered up by public officials. With modern internet media, though, the truth always finally  
8 comes out. **As an analogy:** If you wanted to plan one of the largest crimes in history, you could use  
9 street 'Stop Signs', for example.

10  
11 You know that the government pays for all of the stop signs. You could have your friends buy all of  
12 the stop sign pole factories, stop sign bolt factories and red reflective paint factories in advance.  
13 You then bribe your politicians and fake news outlets to proclaim that there is a global crisis of  
14 people running stop signs and killing school children. You manufacture this "stop sign running  
15 crisis" that will "kill all of the children within 15 years" if we don't stop it. You claim that the stop  
16 sign running is "man made" and caused by your political opponents because they make whiskey and  
17 that causes stop sign running. You get your politicians to create a giant "stimulus" that ends up  
18 almost exclusively giving all of the stimulus money to you and your corrupt crony friends who own  
19 all of the stop sign pole factories, stop sign bolt factories and red reflective paint factories. There is  
20 no doubt that people run stop signs. The police data proves it. Is stop sign running the biggest crisis  
21 in the nation above Cancer, Housing, Drug Cartels, Political Bribery, Veterans Benefits, hmmm?

22  
23 The people who make yellow warning lights and other traffic control devices are cut-out of those  
24 funds because they are competitors to the insiders who own all of the stop sign pole factories, stop  
25 sign bolt factories and red reflective paint factories. You would hire Gawker, Google, Gizmodo,  
26 Fusion GPS, Black Cube, Media Matters, Cambridge Analytica, Shareblue, IN-Q-Tel and other  
27 attacker-for-hire services to kill those competitors and whistle-blowers ePlaintiff 42osing your  
28 crime.

1  
2 In the pretend "stimulus" the government treasury funds are used to payola your friends monopolies  
3 and cut all of their competitors. If you had done these "stimulus scams" in 2008 and 2021 and  
4 evaded paying taxes like Elon Musk did....you would have pulled off a trillion dollar crime with you  
5 and your friends.

6 FINCEN, The FBI and the GAO have proven that stock ownership by politicians creates  
7 non-contractible quid pro quo relations with firms like Tesla, Google, Facebook and Netflix. The  
8 ownership by US Congress members in these firms contributing to their election campaigns is  
9 higher than in non-contributors. This bias toward contributors depends on the financial incentives of  
10 politicians and the relation's value. Firms with a stronger ownership–contribution association  
11 receive more government contracts, cash and tax waivers, such as Elon Musk's record-breaking  
12 government payola. The financial gains from these contracts are economically large when  
13 politicians buy stocks in covert exchange for contributions to the politicians, via insider  
14 arrangements.

15 In the **"THE FACEBOOK/META FACE-PLANT"** matter, citizens are calling their elected  
16 officials and demanding that the Department of Defense and The Department Of Justice CUT-OFF  
17 **Facebook/WhatsApp/Instagram** from their global DNS servers until they answer to Congress for  
18 their crimes. This Silicon Valley social crime operation has been proven to be a national security  
19 risk, a threat to our youth, **a bribery operator** and a threat to society! The October 3, 2021 CBS  
20 News 60 Minutes story was only part of the facts about the Facebook social crimes. October 4, 2021  
21 was the first day in modern human history that the entire planet was freed from the social stain that  
22 is the Facebook empire. University data scientists and forensic internet analysts were able to  
23 compare traffic manipulations on Oct 1., 2021, by Facebook's web manipulation and privacy  
24 harvesting gang, to the "clean" internet that uniquely existed on Oct. 4, 2021. You can see the  
25 changes. You can see who was controlling what. You can see the fake user data stop...and start.  
26 Congressional Senate Commerce hearing finds that FACEBOOK operates exactly like a Mexican  
27 drug cartel run by 'El Zucko' pushing addictive media and messaging to kids and vulnerable  
28 citizens. FACEBOOK makes over one billion dollars, per day, for each day that they delay

1 Congress from acting! This demonstrates the power that the referenced “Tech Cartel” has and their  
2 ability to “own” Congress.

3 Plaintiffs built and operated one of the first, if not THE first, online social networks not long  
4 after Mark Zuckerberg was born. This claim by Plaintiffs was affirmed in a federal hearing at the  
5 U.S. Patent Office, as the First-To-Invent and operate a social network online years before  
6 Facebook even existed.

7  
8 In actuality, when federal and private investigators traced the instigators and beneficiaries of some  
9 other notorious "crisis" things: they and their politicians turned out to all be the exact same handful  
10 of people who owned all of the exclusive "solutions" to the manufactured "crisis".

13 **How Tesla Became a Trillion-Dollar Company Through Corruption,**  
14 **Bribery And Cronyism - Astonishing story about the rise of green technologies**  
15 **using political payola**

16  
17 [By Ilya Pestov and The Justice Alliance](#)

18  
19  
20 After the news that Hertz [decided](#) to buy 100 000 Tesla cars for more than \$4 billion, Tesla  
21 capitalization has already increased almost by \$200 billion. I am not talking about the market  
22 irrationality anymore, but I feel a bit curious. Hertz has recently emerged from bankruptcy and [has](#)  
23 [not received](#) any wholesale discount from Musk. How and why is Hertz going to buy such ePlaintiff  
24 42ensive cars? The answer is simple — with taxpayers’ money.

25 Apparently, the White House [has recently passed](#) the Budget Reconciliation Bill, which  
26 would cost \$1.75 trillion for US citizens. There are plenty of benefits for the so-called ‘clean  
27 energy’ in it, particularly, 30% of tax deductions for ‘[qualified commercial electric vehicles](#)’. It  
28 means that after buying Tesla cars Hertz will receive \$1.26 billion of tax cashback. In fact, there are

1 also some benefits for the installing of electric vehicle charging stations. Hertz has already  
2 announced plans to make thousands of charging stations.

3 Lithium, Cobalt and rare earth mines are owned by Kleiner Perkins, Goldman Sachs and  
4 Department of Energy/White House insiders. That is what power's Elon Musk's cars. Many say that  
5 Tesla was just a front for invading foreign nations for their lithium batter mines (which are operated  
6 with child labor).

7 It is important to mention that common people have also an access to tax benefits that the  
8 public pays for with their April income taxes and the compensation limits [are increased](#) from \$7500  
9 to \$12 500. As an example, instead of paying \$15 000 income tax you may buy Tesla Model S and  
10 pay just \$2500. It is like a pretty bonus from Tesla or a good discount on electric vehicles. Seems to  
11 be a good motivation to refuse internal-combustion engines, doesn't it?

12 Moreover, Tesla also gets ZEV credits and other benefits for manufacturing its products.  
13 That way, the US government restructures the automotive market literally by hand and picks the  
14 winners and losers. Do you know what I find the most interesting in this story? The fact that the  
15 new bill [was published](#) on October, 28th but Hertz announced buying of Tesla cars on October,  
16 25th. As you can understand, the decision was made much earlier.

17 You may already know that Secretary of Energy Steven Chu, who gave Tesla their money,  
18 and his Silicon Valley friends at McKinsey Consulting, who provided the staff for the Department  
19 of Energy, were all in the pocket of Kleiner Perkins, where Al Gore works. Chu has now been  
20 replaced by an actress named Jennifer, who laughs at any suggestion that her job involves  
21 protecting America by keeping gas prices low and who owns the very companies that she is giving  
22 government funds to.

23 **Advising both Chinese state companies and the Pentagon, McKinsey &**  
24 **Co. exposed as 'private biased CIA-type operation'.**

25 McKinsey in recent years has faced accusations of alleged conflicts of interest in its  
26 bankruptcy work and other fields.

27 McKinsey put Steven Chu and his staff in the Department of Energy and Staffed the Obama  
28 White House. McKinsey flooded Congress, and the world, with biased "white papers" designed to

1 convince everyone that the only solution to climate change were the companies owned by investors  
2 Kleiner Perkins and Greylock Capital, Mckinsey’ Silicon Valley buddies. McKinsey was one of the  
3 biggest perpetrators of the “cleantech crash” because of the vast insider trading schemes they  
4 operated with Goldman Sachs.

5 McKinsey's work with the government gives it insights into U.S. military planning and  
6 weapons. But the firm has advised Chinese firms now on U.S. blacklists. Erik Carter for NBC News

7 By Dan De Luce and Yasmine Salam

8 WASHINGTON — Global consulting giant McKinsey & Co.’s work with both the  
9 Pentagon and powerful Chinese state-owned enterprises poses a potential risk to national security  
10 that federal agencies can no longer ignore, lawmakers and critics say.

11 McKinsey’s consulting contracts with the federal government give it an insider’s view of  
12 U.S. military planning, intelligence and high-tech weapons programs. But the firm also advises  
13 Chinese state-run enterprises that have supported Beijing’s naval buildup in the Pacific and played a  
14 key role in China’s efforts to extend its influence around the world, according to an NBC News  
15 investigation.

16 There is no evidence or allegation that McKinsey has damaged U.S. national security, and  
17 U.S. authorities have not charged the firm with violating federal contracting laws related to its work  
18 with Chinese clients.

19 But with [tensions high](#) between China and the U.S., McKinsey’s business operations in both  
20 countries are coming under growing scrutiny. Critics say the firm, the world’s largest consulting  
21 company, needs to divulge more details about its work in China, particularly amid concerns in  
22 Washington about Beijing’s industrial espionage, [arms buildup](#) and [intellectual property theft](#).

23 Apart from its consulting in China, McKinsey has come under sharp criticism from  
24 lawmakers and faced legal challenges over alleged conflicts of interest in other fields.

25 The company this year agreed to pay \$573 million to settle allegations from 49 states that its  
26 work for opioid manufacturers helped "turbocharge" sales of the drugs, contributing to a deadly  
27 addiction epidemic. At the same time the firm [was working](#) for the pharmaceutical companies,  
28 McKinsey was advising the Food and Drug Administration on its prescription drug policy,

1 according to court documents.

2           Asked about its work in China and the United States, McKinsey told NBC News that it  
3 abides by U.S. laws on federal contracting and that it has extensive internal rules to prevent  
4 conflicts of interest and to protect clients' information.

5           "We follow strict protocols, including staffing restrictions and internal firewalls, to avoid  
6 conflicts of interest and to protect client confidential information in all of our work. When serving  
7 the public sector, we go further: in addition to managing potential staffing conflicts, we are subject  
8 to our Government clients' organizational conflict of interest requirements and comply with these  
9 obligations accordingly," a company spokesperson, Neil Grace, said in an email.

10           The Pentagon and other federal government agencies rely on McKinsey to carry out often  
11 sensitive work touching on national security strategy, cybersecurity and cutting-edge technology,  
12 paying the firm hundreds of millions of dollars for its advice and data-crunching.

13           Since 2008, McKinsey has undertaken over [\\$851 million worth](#) of consultant work for the  
14 federal government, with the Defense Department as the top client, generating nearly a third of the  
15 firm's government revenue.

16           McKinsey has advised senior officials about weapons budgets, the Defense Department's IT  
17 network, modernizing naval shipyards, [developing technology](#) for the Space Force and Air Force  
18 and [evaluating the management of the F-35 fighter jet program](#).

19           "I can't see how you could work in the areas they're working in for the Defense Department  
20 and at the same time have the extensive connections in China, and not be compromised," said  
21 Marianne Jennings, a professor of legal and ethical studies in business at Arizona State University.  
22 "If you just step back objectively, there's a great deal of risk here for the United States."

23           In four federal contracts obtained by NBC News, including with the Defense Department  
24 and the Navy, McKinsey made no mention of its clients in China or any possible conflict of interest.  
25 Under federal law, contractors must disclose any possible conflicts of interest.

26           But McKinsey does not view its consulting for Chinese enterprises as a conflict, and experts  
27 say the federal government often doesn't focus on a contractor's foreign clients. Instead, federal  
28 officials usually look at whether a company has foreign ownership or control, and vet contractors'

1 employees for any security concerns. Still, the burden is on the contractor to divulge even the  
2 appearance of a potential conflict.

3 Lawmakers from both parties and critics of McKinsey worry its work with Chinese state-  
4 owned companies could allow Beijing access to valuable information associated with the firm’s  
5 extensive consulting with U.S. government agencies, possibly giving China an upper hand in its  
6 competition with the U.S. Even if no secret material was obtained by China, McKinsey could  
7 inadvertently provide Beijing with valuable insights into senior leadership and strategic thinking in  
8 the U.S. government, critics say.

9 In the past 13 years, McKinsey has worked on more than 60 contracts for different branches  
10 of the armed services and agencies within the Defense Department and there has been an uptick in  
11 the federal agency’s use of its services in the last five years, according to the federal government  
12 website [USA spending.gov](http://USA.spending.gov).

13 Some of McKinsey’s work in Washington grants employees access to secret information,  
14 requiring a security clearance. A 2015 contract between the Pentagon’s Defense Information  
15 Systems Agency and McKinsey obtained by NBC News gave McKinsey’s team access to classified  
16 information.

17 The CIA hired McKinsey to help with a major reorganization of the agency during the  
18 Obama administration. After the 9/11 attacks, McKinsey [advised](#) the FBI on building its  
19 intelligence-gathering capability.

20 Information about the potential scope of McKinsey’s work with the intelligence community  
21 is not publicly available, as details about the intelligence budget remain classified. But a former  
22 senior U.S. intelligence official told NBC News that McKinsey continues to do consulting work for  
23 the intelligence agencies.

24 The Pentagon’s Defense Counterintelligence and Security Agency (DCSA) vets contractors  
25 before they are given access to classified information. The agency “takes seriously our  
26 responsibility to ensure only trusted personnel — both federal and contract — have access to  
27 classified information,” said spokesperson Christopher Bentley.

28 For contractors, the agency ensures that companies “are not adversely influenced or

1 controlled by foreign interests,” Bentley said.

2 But the agency declined to comment about McKinsey’s work for the federal government.  
3 McKinsey was [awarded](#) a contract this year worth \$1.2 million to advise the DCSA.  
4 [‘Red flag’](#)

5 In China, vast state-owned or controlled enterprises have [sought out](#) McKinsey for  
6 “strategic” advice. Some of McKinsey’s clients were blacklisted in 2019 and 2020 by the U.S.  
7 government as actively undermining U.S. national security interests. (All blacklisting occurred after  
8 McKinsey’s contracts were already in effect.)

9 U.S. authorities [say](#) one of the blacklisted firms, the China Communications Construction  
10 Company (CCCC), and its subsidiaries built a network of artificial islands in the South China Sea, a  
11 project that the U.S. and its allies see as an attempt to intimidate and coerce neighboring countries  
12 that have competing claims in the waterway. CCCC’s dredging fleet constructed more than 3,000  
13 acres worth of islands that have been turned into a string of military bases, with naval ports,  
14 runways, hangars, missile sites and radar, experts say. The Defense Department last year placed the  
15 firm on a list of companies deemed to have ties to the Chinese military.

16 The Commerce Department also placed CCCC on a separate blacklist and warned that  
17 transactions with Chinese firms on the list carry a “red flag,” recommending U.S. companies  
18 “proceed with caution with respect to such transactions.”

19 China Communications Construction Company put out a [press release](#) in 2015 promoting  
20 McKinsey’s role at a conference outlining the firm’s latest five-year plan.

21 McKinsey “made recommendations regarding the company’s overall strategic objectives,  
22 business portfolio strategy, organizational control strategy, strategy implementation path, core  
23 competency development, and other aspects,” it said.

24 McKinsey has acknowledged commercial links to China Ocean Shipping Company  
25 (COSCO), a state-owned conglomerate that has played a key role in China’s naval expansion  
26 and Beijing’s bid to extend its global reach. COSCO has not been blacklisted by the U.S.  
27 government.

28 A Cosco Shipping Lines Co. container ship in the Yangshan Deepwater Port in Shanghai,

1 China, in 2019. Qilai Shen / Bloomberg via Getty Images file

2 In a 2020 [federal court filing](#) related to McKinsey’s advisory role in a bankruptcy case, the  
3 firm cited its connection to COSCO. That same year, the shipping company said in a [press release](#)  
4 that it had received advice from McKinsey.

5 As part of China’s “Belt and Road Initiative,” COSCO has been pouring Chinese  
6 government money into ports around the world and other logistics hubs. COSCO in recent years has  
7 [bought](#) a majority stake in the Greek port of Piraeus, invested in a new container [terminal](#) in the  
8 United Arab Emirates, and purchased a major stake in the Peruvian [port](#) of Chancay.

9 COSCO is among a core of state-owned enterprises that are part of the country’s defense  
10 industrial base and are given special status by the ruling Chinese Communist Party, according to  
11 regional [analysts](#). The company has provided logistical [support](#) to the Chinese navy’s escort  
12 operations in the Gulf of Aden and experts say it serves as the maritime logistical arm for the  
13 People’s Liberation Army (PLA).

14 Meanwhile, McKinsey advised the U.S. Navy on plans to modernize its network of naval  
15 shipyards.

16 McKinsey, which set up business in China in the 1990s, [says](#) on its website it employs more  
17 than 1,000 people at six offices across the country and has carried out more than 1,500  
18 “engagements” with Chinese clients in the past five years.

19 According to McKinsey, the firm’s work in China is carried out through a separate legal  
20 entity and most of its consulting does not involve state-owned enterprises (SOEs).

21 “The vast majority of that work is for the private sector, including with U.S. and other  
22 multinational companies. Our limited work with SOEs focuses on the same core commercial and  
23 operational topics on which we serve other major corporations,” Grace, the company spokesperson,  
24 said.

25 The company declined to discuss its work with specific Chinese clients, including those that  
26 appear on U.S. government blacklists.

27 Grace said McKinsey follows an extensive internal policy to evaluate potential clients and  
28 does not serve political parties anywhere in the world or defense, intelligence, justice or policing

1 institutions in countries with low rankings on the Economist Intelligence Unit’s Democracy Index.

2 But experts say major state-owned companies in China are virtual arms of the ruling  
3 Communist Party and have senior party officials embedded in the enterprise’s leadership.

4 Asked about its relationship with Chinese enterprises with ties to the country’s military,  
5 Grace said, “Consistent with our client service policy, we do not serve any clients in China on  
6 topics connected to defense, intelligence, justice or police issues.”

7 According to the company’s policy manual, McKinsey employees “are required to disclose  
8 any potential conflicts of interest, whether real or perceived, and to consult with relevant firm  
9 leaders and governance bodies on how best to handle the situation.”

10 McKinsey also maintains strict standards on protecting data and ensuring “information  
11 security,” Grace said.

12 “All client information, whether from the U.S. government or any other client, is subject to  
13 broad safety and security procedures that we regularly assess and test to ensure that the firm is  
14 deploying rigorous security measures,” he said. “We follow all U.S. government requirements for  
15 handling its sensitive data — including where appropriate doing work on separate IT devices or  
16 only on client systems — and employ the requisite hardware and other security protocols to meet  
17 our obligations.”

### 18 [The McKinsey Way](#)

19  
20 Founded in 1926, McKinsey has built up a vast consulting business with 36,000 employees  
21 and dozens of offices around the globe, advising governments and top corporations. Known for its  
22 connections in the upper echelons of corporate power and for shaping how American companies  
23 operate, McKinsey has a loyal alumni network, including numerous CEOs and top government  
24 officials.

25 According to Duff McDonald, author of a 2013 book on McKinsey, ["The Firm: The Story of](#)  
26 [McKinsey and Its Secret Influence on American Business.](#)" the company’s business model hinges  
27 on what it calls confidentiality. McKinsey often does not reveal who its clients are or the nature of  
28 its work.

1 The firm is able to operate behind a wall of “confidentiality” partly because the management  
2 consulting industry is virtually unregulated, both in the U.S. and around the world, according to  
3 experts.

4 The tight-lipped firm says the principle of confidentiality allows it to protect the interests of  
5 its clients. But critics say McKinsey’s insistence on secrecy allows it to operate without  
6 accountability, and to provide advice to clients whose interests might be diametrically opposed.

7 “I don't think they have much compunction about working for anyone at all,” McDonald  
8 said.

9  
10 **‘No reason’ to hire McKinsey**

11  
12 Under federal contracting law, companies are required to disclose any conflict of interest, or  
13 appearance of a conflict, when bidding on a proposal, and to present a plan to address the conflict. It  
14 remains unclear if McKinsey has disclosed any potential conflicts of interest due to its work with  
15 Chinese firms, including in its contracts for the Defense Department.

16 In the four federal contracts obtained by NBC News between McKinsey and the Defense  
17 Department, the Navy and Customs and Border Protection, the consulting firm did not cite its  
18 clients in China or any apparent conflicts of interest.

19 For a 2018 contract for the Naval Information War Center Atlantic, which provides satellite  
20 communications and other information technology support for naval forces, McKinsey “did not  
21 make a disclosure of possible appearances of conflict of interest,” a Navy spokesperson said.

22 The U.S. Navy “was unaware of McKinsey’s work with any Chinese state-owned  
23 enterprises,” the spokesperson added.

24 For the 2015 contract between McKinsey and the Pentagon’s Defense Information Systems  
25 Agency (DISA), which runs the military’s computer network, the agency “was not aware of any  
26 conflict of interest or a possible appearance of a conflict of interest” concerning the contract, said  
27 Mary Constantino, spokesperson for DISA.

28 Asked about hiring McKinsey in the future, Constantino said the agency “cannot speculate

1 on prospective work and has no pending awards.”

2 A spokesperson for the Defense Department, Jessica Maxwell, said that “each contract is  
3 examined individually” and the department “won’t speculate on future contracts or bids for  
4 contracts. “

5 Sen. Marco Rubio, R.-Fla., has demanded that the firm offer more information about its  
6 work in China and explain how it prevents possible conflicts between its consulting business for the  
7 U.S. government and for Chinese clients.

8 In a [November 2020 letter](#) to McKinsey, Rubio complained that the firm had failed to  
9 directly respond to many of his questions in earlier correspondence. The senator wrote he was  
10 concerned the firm “either wittingly or unwittingly — is aiding the Chinese Communist Party’s  
11 attempt to supplant the United States.”

12 The senator asked McKinsey if it sought to avoid working with Chinese clients in areas of  
13 critical national security interest to the U.S., including telecommunications, the military and health  
14 care.

15 The firm did not directly answer the question but said it could not disclose information on  
16 specific clients or engagements because of its “contractual and professional obligations to maintain  
17 confidentiality,” according to Rubio’s letter.

18 Rubio also asked McKinsey what kind of safeguards the firm had in place to ensure its work  
19 for U.S. government entities did not inform its work with Chinese companies. The firm provided no  
20 answer, Rubio wrote.

21 In addition to the exchange of letters, Rubio’s senior staff and top policy advisers met with  
22 members of McKinsey’s global leadership team via Zoom in March, according to a congressional  
23 aide present.

24 “Most of the meeting consisted of generalities, platitudes and broad denials of wrongdoing  
25 or conflicts of interest. Every time a member of Sen. Rubio’s staff asked specific questions,  
26 McKinsey’s leadership repeated that they could not discuss their clients,” the congressional aide  
27 said.

28 Rubio told NBC News the federal government should stop hiring McKinsey for consulting

1 work.

2 “There is no reason the U.S. Government should continue using McKinsey given the  
3 company’s inability to provide clear, direct answers about its work in China,” Rubio said in an  
4 email.

5 The McKinsey spokesperson confirmed the company’s senior leadership in the U.S. and  
6 Asia met via Zoom with Rubio’s staff this year.

7 “We have discussed our approach to client selection with the senator's office at length,  
8 including the diligence efforts we undertake to ensure that each client engagement complies with all  
9 necessary guidelines, regardless of where that service takes place,” Grace said.

10 “We also discussed with the senator's office our extensive internal safeguards to mitigate  
11 potential conflicts of interest and wall off sensitive information. We remain available to continue  
12 those discussions,” he added.

13 Rubio has [proposed legislation](#) that would require federal contractors to reveal any  
14 commercial ties with the Chinese government, military or state-controlled entities. Other lawmakers  
15 have proposed bills to prevent U.S. contractors from buying key technological equipment or solar  
16 panels from Chinese firms.

17 Rep. Mike Rogers of Alabama, the ranking Republican on the House Armed Services  
18 Committee, said it was important to know whether taxpayers' dollars are “fueling China’s military  
19 modernization.”

20 “If a federal contractor has ties to the [Chinese Communist Party] and its civ-mil fusion  
21 apparatus, the government should have tools to punish that behavior and rethink whether that  
22 company has the privilege of doing business with the U.S. government,” Rogers said.

23 The Chinese government and military’s increasingly tight control over the private sector is  
24 forcing the U.S. to “rethink our trade and commercial relationship,” including how federal contracts  
25 are vetted, said Michael McCaul of Texas, the ranking Republican on the House Foreign Affairs  
26 Committee.

27 McCaul said McKinsey’s work deserved “greater scrutiny” and the federal government  
28 needed to demand more transparency.

1 “Transparency is a core tenet of our democratic system. If the U.S. government is spending  
2 taxpayerdollars, it makes sense to understand how federal contractors are doing business with an  
3 adversary’s military,” McCaul said.

4 McKinsey is not the only consulting company doing business with the federal government  
5 and Chinese state-owned companies, and the emerging cold war between Beijing and Washington  
6 has created a dilemma for these firms, experts say.

7 U.S. defense contractors that work with the Pentagon are subject to strict laws and rules  
8 about what weapons and technology they can provide to foreign governments. But management  
9 consulting firms fall into a gray area, as they are selling advice, according to a former senior  
10 Pentagon official.

11 “If U.S. consultants gain knowledge about how the U.S. government works and transfer that  
12 knowledge to the Chinese government, that would be a red flag,” said the former official.

13 Ensuring nothing spills over to a foreign client poses a difficult challenge, the official said.  
14 “Call me a skeptic, there might be ways to firewall it, but I just don’t know if those are sufficient to  
15 protect national security.”

16 China also worries U.S. firms could hand over sensitive information to its adversaries in  
17 Washington, and has imposed increasingly tough restrictions on American companies operating in  
18 the country, experts say. U.S. companies operating in China are under pressure to store data locally,  
19 making them increasingly vulnerable to Beijing scooping up proprietary data.

### 21 [McKinsey’s track record](#)

22  
23 In other work carried by McKinsey, the firm has faced accusations of conflicts of interest,  
24 and in some cases has apologized or agreed to costly settlements out of court.

25 Earlier this year, McKinsey agreed to pay nearly \$600 million to settle investigations into its  
26 role in helping boost [opioid sales](#). Lawsuits turned up documents showing how McKinsey pushed to  
27 ramp up sales of Purdue Pharma’s OxyContin painkiller as a deadly opioid crisis gripped the  
28 country. The firm also sought to help Purdue fend off potential regulations by the FDA, even as it

1 did consulting work for the FDA, according to court documents.

2 The House Committee on Oversight and Reform announced this month that it was launching  
3 an [investigation](#) into McKinsey’s consulting work for the opioid manufacturers, seeking documents  
4 regarding “the company’s conflict of interest, and its apparent failure to monitor and prevent  
5 harmful practices.”

6 McKinsey has come under federal investigation and been sued over allegedly flouting  
7 bankruptcy laws that require advisers to be [disinterested](#) advocates for clients and to disclose all  
8 relationships that might give rise to a [conflict](#) of interest.

9 In 2019, [McKinsey paid \\$15 million](#) to settle an inquiry by a unit of the Justice Department  
10 into whether it violated disclosure rules designed to prevent conflicts of interest in corporate  
11 bankruptcies. The firm, however, did not admit to any wrongdoing.

12 Last year, McKinsey agreed to forfeit millions of dollars in fees for advising [Westmoreland](#)  
13 [Coal Co.](#) in its bankruptcy, as part of a deal with federal officials probing Westmoreland’s  
14 compliance with bankruptcy laws.

15 In South Africa, the consulting giant became embroiled in a corruption scandal after  
16 authorities began a fraud investigation into a \$120 million contract McKinsey had worked on with a  
17 public utility company, Eskom. The company had ties to the billionaire Gupta family, close friends  
18 of former President Jacob Zuma who were found to have pocketed public funds by South Africa’s  
19 anti-corruption watchdog in 2016.

20 Eskom workers cut illegal connections during a energy management and losses campaign in  
21 Gauteng, South Africa, on Sept. 29, 2020. Alet Pretoriu / Gallo Images via Getty Images file

22 McKinsey issued an [apology](#) in 2017 over the Gupta case, saying it was “embarrassed” by  
23 the individuals whose work “fell short of our standards.”

24 “There appears to be a pattern of behavior from McKinsey,” said Sen. Maggie Hassan, D-  
25 N.H. “Whether it be the health of Americans or the national security of our country, McKinsey has  
26 repeatedly taken actions that create serious concerns about conflicts of interest.”

27 McDonald, author of "The Firm," said the company’s bankruptcy work, its role in the opioid  
28 crisis and other examples show it has failed to regulate itself.

1 “They say the nature of the business is such that we maintain strict confidentiality. OK, well  
2 then in that case, you're the only ones that can regulate this,” McDonald said. “And all the recent  
3 evidence in the last few decades suggests that they are either incapable, inept or not inclined to do  
4 so.”

5 Now I would like to tell you about one very interesting character in the US establishment  
6 named Al Gore. This is the former US Vice President under Clinton, the presidential candidate in  
7 2000 and the Nobel Peace Prize winner for the film An Inconvenient Truth (2006) about global  
8 warming.

9 His film and book have actually become the foundation for modern climate policy and the  
10 public demand for renewable energy sources. One should notice keep in mind that along with the  
11 awareness of internal concern for the ecology Al Gore was one of the first who realized the  
12 commercial potential in projects devoted to the protection of the environment.

13 Two years before ‘An Inconvenient Truth’ Al Gore together with Goldman Sachs Chief  
14 Asset Manager David Blood has run a new investment company Generation Investment  
15 Management. As a result, they both defined terms sustainable investing and ESG.

16 The former presidential candidate, as we could see, was very good at technology and  
17 finance. In 2007, he was suddenly [invited](#) to become a partner in Kleiner Perkins — one of the  
18 oldest and largest venture funds of Silicone Valley. John Doerr, one of Kleiner Perkins chief  
19 partners, joined the advisory board of Generation Investment Management.

20 J. Doerr, as Al Gore, stood for the innovations in clean energy to struggle with climate  
21 change. On the TED conference in 2007, he quoted his daughter “your generation created this  
22 problem, you better fix it”. That reminds me on Greta Thunberg’s words which would be told later.  
23 So that J. Doerr and Al Gore had a similar vision of the future and the month after mentioned  
24 partners’ rotation Kleiner Perkins fund invested into Silver Spring Networks. Biden's daughter,  
25 Ashley, left her hand-written diary for journalists to find where she reveals the same thoughts (in  
26 addition to her naked shower play with Joe Biden)

27

28

1  
2  
3  
4  
5  
6  
7  
8  
9  
10  
11 By great coincidence, this deal happened a year before the US Department of Energy [had](#)  
12 [announced](#) a \$3.4 billion grant program for smart grid developers. In fact, \$560 million of this  
13 amount was spent to utilities serviced by Silver Spring Networks, which works exactly with smart  
14 grids. 6 years later Silver Spring Networks successfully entered an IPO.

15  
16 Luck literally pursued Kleiner Perkins. In 2008, the fund invested tens of millions dollars in  
17 a start-up hybrid cars manufacturer Fisker Automotive. After that, in September 2009, the company  
18 [received](#) a low-interest \$529 million loan under the Advanced Technology Vehicle Manufacturing  
19 (ATVM) direct loan program from the same US Department of Energy.

20 Congress [passed](#) ATVM in 2007 after a drop in sales in the big three (General Motors, Ford,  
21 and Chrysler). The volume of the borrowed capital was \$25 billion. The goal of the program was to  
22 help the US auto industry to reduce fuel costs because Americans were tend to choose more fuel-  
23 efficient Japanese cars. That is, the problem devoted not to ecology issues, but much more to fuel  
24 saving.

25 Again, ATVM passed in 2007, but the allocation of funds began only 2 years later on a  
26 competitive basis. In February 2009, 8 months before the government loan to Fisker Automotive,  
27 John Doerr of Kleiner Perkins [became](#) a member of the Presidential Economic Recovery Advisory  
28 Council. The funny thing is that Fisker did not even have manufacturing facilities in the USA and

1 the assembly of their Karma models took place in Finland.

2 The Obama-Biden administration appointed a venture capitalist from Kleiner Perkins as  
3 a member of an economic advisory board. They also signed a government loan for help  
4 American automotive industry to a company (without any manufacturing capacity in the  
5 United States) that Kleiner Perkins has invested in.

6 That trick [was obviously noticed](#) by the public. Some companies [have sued](#) the Department  
7 of Energy, Mitt Romney even [called on](#) Congress to open an investigation into the loan to Fisker  
8 Automotive, pointing out that its investors included Al Gore, who sponsored Obama’s presidential  
9 campaign. Nevertheless, somehow all those worries dwindled away as federal cover-ups went into  
10 full swing.

11 Fisker’s plans to start the manufacture at a closed GM plant in Delaware at the expense of a  
12 government loan, which GM itself did not receive, deserved special attention. These plans caused  
13 some questions among local residents, and then current Vice President Joe Biden, who served as  
14 Senator from Delaware from 1973 to 2009, [assured](#) people that the budget money for Fisker would  
15 be paid off, and the company will eventually return “billions-billions” dollars to everyone.

16 Running ahead, the budget money didn’t return to taxpayers because Fisker went bankrupt  
17 in 2013. From the bankruptcy documents, which fell into the journalists’ hands only 7 years later, it  
18 [turned out](#) that Hunter Biden (Joe Biden’s son) was an investor of Fisker. However, this fact also  
19 faded into oblivion without preventing Biden from gaining 58.8% of the votes in Delaware during  
20 the 2020 presidential election.

21  
22  
23  
24  
25 Let us turn back to Tesla. Only \$8.4 billion [were allocated](#) from the \$25 billion program of  
26 help to the American auto industry. Only 5 companies received money, although 108 applications  
27 were received. Almost \$6 billion went to Ford with a democratically oriented management, \$1.5  
28 billion were given to Nissan, about half billion — to Fisker and Tesla and, finally, \$50 million came

1 to a less known VPG company.  
2  
3

4 Surprisingly, the credit limit has not been exhausted, large manufacturers like General  
5 Motors or Chrysler did not receive money, but two unprofitable startups from California, selling  
6 several hundred cars each, [did](#). We already know the main lobbyists of Fisker — they are Al Gore  
7 and John Doerr, who invested in Fisker through Kleiner Perkins. But were they acquainted with  
8 Elon Musk? A brief search immediately gave a positive answer to that question.

9 In 2013, Al Gore, while talking about his new Tesla S in an interview to Yahoo Finance,  
10 [called](#) Elon Musk his friend. More than that, his son Al Gore III [has been in charge](#) of Policy &  
11 Business Development at Tesla since 2015. After learning that I immediately went to have a look at  
12 the Generation Investment Management profile on CB Insights. It turned out that the Gore fund had  
13 invested in Musk’s SolarCity in 2011 and Gore III [worked there](#) as a Policy Officer.

14  
15  
16  
17 Then in 2016, Tesla acquired SolarCity. An unprofitable service company that didn’t even  
18 produce solar panels was taken over for a suspiciously large amount of money. Recently it [turned](#)  
19 [out](#) that Elon Musk has faced a \$9.4 billion fine for this deal, although the final court decision had  
20 not been made yet. It is important that after the takeover in 2018, Al Gore became suddenly  
21 [nominated](#) for the post of chairman of the Tesla board of directors.  
22  
23

24 Al Gore [rejected](#) that offer but I did not doubt more about his close connection with Tesla.  
25 At the same time, I was interested in their possible contacts before receiving the lobbied state  
26 subsidies of 2009. That’s why I decided to change the angle and check whether Tesla has a  
27 relationship with Kleiner Perkins. Then it turned out that Elon Musk had been friends with John  
28 Doerr for a very long time.

1 In 2006, when Tesla looked for money in round C, Kleiner Perkins fund offered \$50 million,  
2 while VantagePoint offered \$70 million. Despite the huge difference in bids, Musk wanted to strike  
3 a deal with Kleiner Perkins but on the condition that John Doerr would sit on the board of directors.  
4 Unfortunately, J. Doerr had many other obligations and was forced to refuse. That’s why Musk  
5 chose VantagePoint, as he [told](#) in an interview.

6 I went on and learned that the vice president of Tesla in 2006–2017 was Diarmuid  
7 O’Connell. As I remember, he [was responsible](#) for national security issues under former Secretary  
8 of State Colin Powell. He also spoke about Iraq chemical weapons and showed test tube to  
9 legitimize the military invasion of Iraq at the UN in 2003.

10 I wondered how he appeared in that story. However, I didn’t have to look for an answer for  
11 a long time, so let us meet Colin Powell, a member of the advisory board of Kleiner Perkins, a  
12 strategic partner of the fund in 2005.

13 There was no direct investment from the fund in the company, nevertheless it seems that  
14 there was another strong connection between Kleiner Perkins and Tesla. Is Al Gore really not a  
15 government subsidy beneficiary for Tesla? My confirmation bias did not allow this thought to get  
16 along in my head. Searching for keywords, I came across publications in [Yahoo Finance](#) and [Insider](#)  
17 [Monkey](#). The articles mentioned Gore’s earlier investment in Tesla.

18 Keeping in mind that the journalists could simply make a mistake, I began to study which  
19 funds were invested in Tesla at earlier stages and whether Al Gore was involved. Finally, I came  
20 across [an interview](#) with the managing partner of Capricorn Investment Group on the blog of the  
21 Japanese financial holding Nomura. He said that Capricorn financed the filming of ‘An  
22 Inconvenient Truth’ movie.

23 Capricorn was founded by Jeffrey Skoll, the former eBay president and billionaire. The fund  
24 invested in Tesla together with SpaceX at early stages. Mr Gore [brought in](#) \$35 million! Can you  
25 imagine? “That’s a big wad of cash for someone who reported barely \$2 million in assets in 2000,  
26 when his job as vice president came to an end”, as the New York Times wrote in 2008.

27 As a result, Al Gore was the direct beneficiary of providing state loans under the ATVM  
28 program for Fisker Automotive and Tesla Motors, in which he owned shares through

1 venture funds Kleiner Perkins and Capricorn Investment Group.

2 When I proved it, I wanted to learn more about Al Gore’s bio. It has been revealed that after  
3 losing the election, in 2001, he [became](#) a vice president of Metropolitan West Financial — a  
4 company with more than \$65 billion in assets under management. The company [was managed](#) by  
5 former heads of Drexel Burnham Lambert. That was a bankrupt investment bank, which history was  
6 very similar to Lehman Brothers.

7 The same year Mr Gore also joined the Google Advisory Board, in which he [invested](#)  
8 together with Kleiner Perkins in 1999. Probably that was the time when he met John Doerr. Then, in  
9 2003, the former US presidential candidate became a member of Apple’s board of directors. In  
10 addition, the founders of Google were also early investors in Tesla.

11 It is clear that Albert Gore had many connections in political and financial communities. In  
12 2006, he started a charitable organization The Alliance for Climate Protection. The company  
13 [launched](#) a \$300 million (sic!) ad campaign to mobilize Americans to reduce greenhouse gas  
14 emissions immediately. As a result, an “inconvenient truth” was told to everyone.

15 In 2009, Gore [appeared](#) before the United States Senate Committee on Foreign Relations to  
16 support Obama’s economic recovery plan. Then the government had passed the Recovery and  
17 Reinvestment Act, which included an \$80 billion stimulus package to promote green energy  
18 initiatives. Newspapers [called](#) the bill the “biggest energy bill in history”.

19 The person who owns stakes in Tesla and Fisker first knocks out government loans and  
20 then pushes a law according to which manufacturers of electric vehicles should pay  
21 fewer taxes, and buyers of electric vehicles should receive tax deductions. Can you  
22 imagine?

23 Surely, Al Gore was not the only one who acted in this process. In 2006, Nick Pritzker, the  
24 brother of Hyatt founder, [invested](#) in Tesla. His niece Penny Pritzker became the 38th US Secretary  
25 of Commerce in Barack Obama’s cabinet, and his nephew was the Governor of Illinois. In general,  
26 Pritzker is one of the richest families in the US.

27 Among of early investors in Tesla there is Steve Westley, a politician and businessman. He  
28 has already joined the company’s board of directors in 2007. More than that, during the 2008

1 presidential election, Westley [acted](#) as a co-chairman of California’s Obama for America campaign.  
2 Currently, he is a member of the US Department of Energy advisory board.

3 Al Gore, John Doerr, Nick Pritzker, Steve Westley, Elon Musk, Sergey Brin, Larry Page —  
4 all of them [were](#) so-called donors and beneficiaries to the Obama campaign. I mentioned only the  
5 names from the public access. Let me remind that these people are only mentioned in the context of  
6 the Tesla story while the whole green initiative and the Recovery and Reinvestment Act affects a  
7 much larger number of companies and investors.

8 The rapid development of electric vehicle companies is taking place in a distorted market  
9 environment. Their commercial success is mainly driven by government incentives unavailable for  
10 ICV cars manufacturers.

11 The US government is literally restructuring the auto market by hand in order to make one  
12 guy: Elon Musk, massively rich.. In that case the active discussions about climate change and  
13 greenhouse gas emissions could probably be nothing more than a part of a program to reallocate  
14 money in the US establishment since Nancy Pelosi, George Soros and The Feinstein family are the  
15 true owners of the stock profits from Elon Musk.

16 However, the question remains whether this is really a good thing, because there is no full  
17 consensus in the scientific community regarding the general belief in the environmental friendliness  
18 of electric vehicles and the beneficiaries are always the same 50 people associated with Nancy  
19 Pelosi.

VATICAN CITY (AP) - Pope Francis on Wednesday named a Chilean survivor of clerical sex abuse to serve on a Vatican commission that advises the pontiff on how.

## Man accused of being involved in plot to kidnap Michigan Gov. Gretchen Whitmer claims FBI agent tried to 'cover up the fact the agency encouraged the conspiracy'

By Snejana Farberov For Dailymail.com - August 18th 2021, 5:22:22 pm

Brandon Caserta, one of the six men indicted for allegedly plotting to kidnap Gov Gretchen Whitmer, claims that an FBI agent told an informant to lie and delete texts as part of an entrapment coverup.

# DEEDS DONE IN THE DARK ALWAYS COME TO LIGHT

The FBI, and other law enforcement organizations, define a "cartel" as: 'An association of industrialists and business firms organized covertly to establish a national, or international

1 monopoly, by price fixing and ownership of controlling stock, to operate a trust or monopoly to  
2 reduce competition between themselves by allocating markets, censoring public knowledge,  
3 manipulating governments or controlling the price and production of a product or service.'

4 This case is about a crime "cartel" which operating within government offices.

5 Every single California Senator, federal public official and White House staffer that we have  
6 charged with crimes in the complaint has now been exposed in main stream global media, in tens of  
7 thousands of print, web and video news reports as the owners of the stock, and the board members  
8 of, the companies that engaged in the crimes. 90% of the political officials charged with these  
9 crimes owned the stock of, and received other bribes from, the competitors of Plaintiffs:

10  
11 **REVEALED: Two Fed presidents with**  
12 **insider knowledge of US monetary policy**  
13 **sold millions of dollars of stock in blue-**

22 prompting Fed Chair  
23 Jerome Powell (inset) to  
24 call for ethics review.

20 **Members of The Fed, The White House, Congress and government agency bosses are**  
21 **paid bribes via trillions of dollars of covert stock market transactions!**

22 White House Staff including *Rahm Emanuel, Bill Daley, Jay Carney, David Plouffe,*  
23 *Robert Gibbs, Steve Rattner, David Axelrod, John Podesta,* et al; and *Steven Chu, Daniel Cohen*  
24 and *Bill Cooper* were, (from 2007 forward), either financed by, friends, with, sleeping with, dating  
25 the staff of, holding stock market assets in, promised a revolving door job or government service  
26 contracts from, partying with, personal friends with, photographed at private events with,  
27 exchanging emails with, business associates of or directed by; our business adversaries, or the  
28 Senators and politicians that those business adversaries pay campaign finances to, or supply

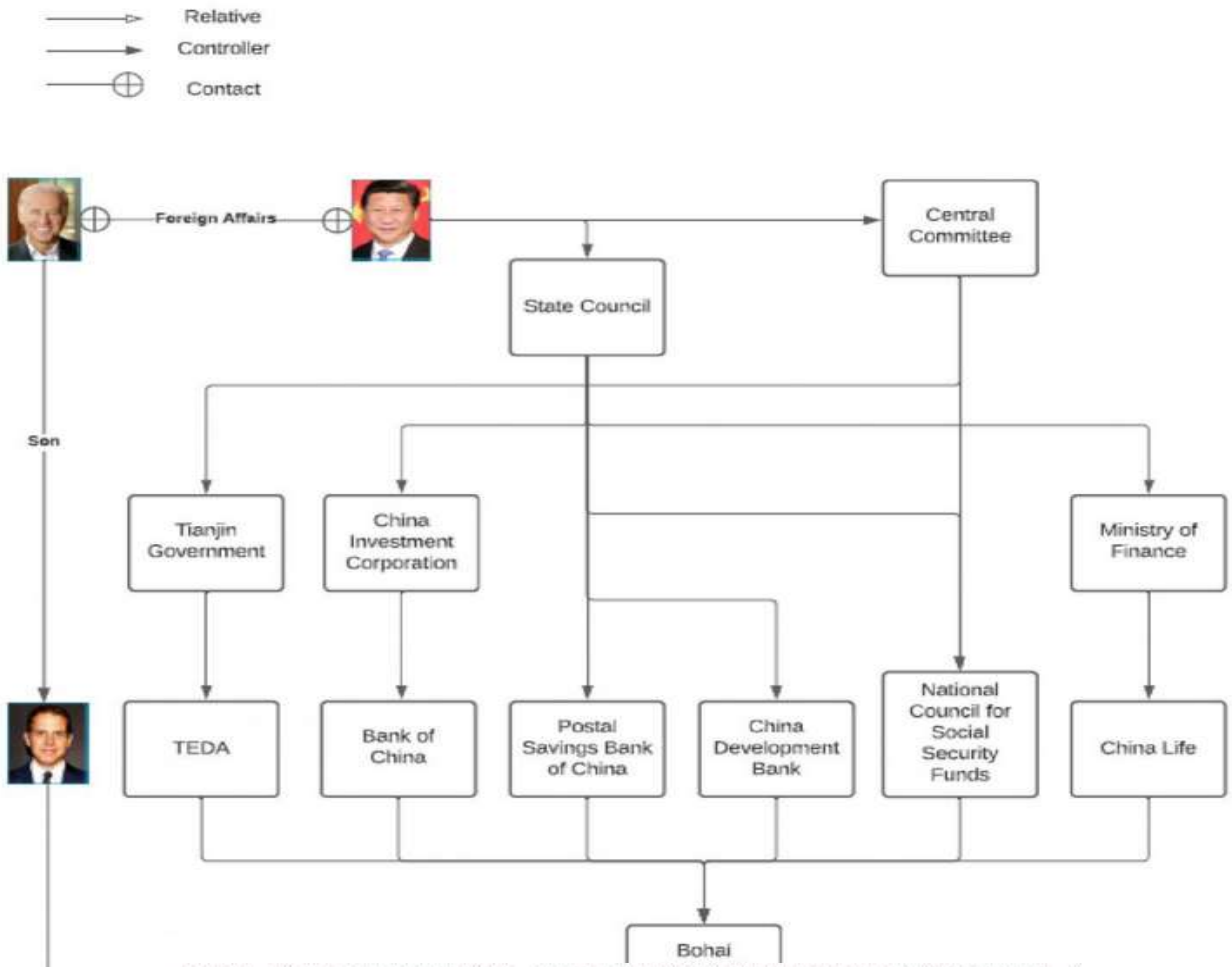

1 They knew that the product creation produced worker genocide, rapes, murders and poverty. They  
2 knew that the products from these efforts were ePlaintiff 42losive, cancer-causing, brain and liver  
3 damaging and toxic to the environment. This Cartel ignored these issues, on purpose, out of pure  
4 unmitigated greed!

5 Another way that bribes are passed is via a process called “layered inversion”. China has  
6 vast rare earth mines for electric cars so one would want to have an “in” there, such as:

All of the bribes by Defendants used a technique called “money laundering”:

From 2007 forward, The White House and various agencies were controlled by the Silicon Valley tech oligarchs for monopolistic profiteering! That is a violation of the law, the Constitution

1 and the American Way. The named person's we have presented to the FBI, DOJ, SEC and other  
2 agencies, engaged in crimes to personally profit in the stock market and political venues. At the  
3 same time they operated the command and control of millions of dollars of defamation, character  
4 assassination and black-list attacks against us for reporting their crimes. These perpetrators are now  
5 being exposed, arrested, indicted and drained of their ill-gotten profits. We are owed our damages  
6 compensation and we will not rest until we get it! Every member of the public is invited to help  
7 crowd-source the termination of these corrupt crooks.

8         This Cartel of California & Washington, DC politicians is being paid **bribes** with: billions of  
9 dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants  
10 which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix  
11 and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC;  
12 Free rent; Rare-Earth mining rights; Male and female prostitutes; Cars; Dinners; Party Financing;  
13 Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC  
14 Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take  
15 Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off  
16 gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduit-ed for donors;  
17 Gallery art; Private jet rides and the use of Government fuel depots (ie: Google handed out NASA  
18 jet fuel to staff); Recreational drugs; Real Estate; Fake mortgages; The use of Cayman, Boca Des  
19 Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman  
20 Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and  
21 bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as  
22 Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials; and  
23 other means now documented by us, The FBI, the FTC, The SEC, The FEC and journalists.

24         Bribes are conduit-ed as “speaker fees” and Netflix “Board Positions”:

## Bill Clinton's earnings from speaking fees

Source: CNN

V

Figure 7: A common method of paying bribes is via inflated "speaker fees"

We worked for, with, in and around the White House and various agencies. We were at the homes of the most famous people in government and their Silicon Valley financiers. We have cooperated with top law enforcement and Congressional investigators. Additional whistle-blowers have provided our effort with even more evidence. Ourselves, and investigating agencies, have absolute proof of the crimes, corruption and illicit activities and the ongoing cover-ups.

These crooks hide their bribes in covert "trust arrays". Any corporation can add more bribe cash to these trusts and an intermediary later informs the politician or oligarch that the "money is in".

It's well known, at least among tax lawyers and accountants for the ultra-wealthy: The estate tax can be easily avoided by ePlaintiff 42loiting a loophole unwittingly created by Congress three decades ago. By using special trusts, a rarefied group of Americans has taken advantage of this loophole, reducing government revenues and fueling inequality.

There is no way for the public to know who uses these special trusts aside from when they've been disclosed in lawsuits or securities filings. There's also been no way to quantify just

1 how much in estate tax has been lost to them, though, in 2013, the lawyer who pioneered the use of  
2 the most common one — known as the grantor retained annuity trust, or GRAT — estimated they  
3 may have cost the U.S. Treasury about [\\$100 billion](#) over the prior 13 years.

4 As Congress considers cracking down on GRATs and other trusts to help fund President Joe  
5 Biden’s domestic agenda, a new analysis by ProPublica based on a trove of tax information about  
6 thousands of the wealthiest Americans sheds light on just how widespread the use of special trusts  
7 to dodge the estate tax has become.

8 More than half of the nation’s 100 richest individuals have used GRATs and other trusts to  
9 avoid estate tax, the analysis shows. Among them: former Democratic presidential candidate  
10 Michael Bloomberg; Leonard Lauder, the son of cosmetics magnate Estée Lauder; Stephen  
11 Schwarzman, a founder of the private equity firm Blackstone; Charles Koch and his late brother,  
12 David, the industrialists who have underwritten libertarian causes and funded lobbying efforts to  
13 roll back the estate tax; and Laurene Powell Jobs, the widow of Apple founder Steve Jobs. (Powell  
14 Jobs’ Emerson Collective is among ProPublica’s largest donors.)

15 More than a century ago amid soaring inequality and the rise of stratospherically wealthy  
16 families such as the Mellons and Rockefellers, Congress created the estate tax as a way to raise  
17 money and clip the fortunes of the rich at death. Lawmakers later added a gift tax as a means of  
18 stopping wealthy people from passing their fortunes on to their children and grandchildren before  
19 death. Nowadays, 99.9% of Americans never have to worry about these taxes. They only hit  
20 individuals passing more than \$11.7 million, or couples giving more than \$23.4 million, to their  
21 heirs. The federal government imposes a roughly 40% levy on amounts above those figures before  
22 that wealth is passed on to heirs.

23 For her part, Powell Jobs has decried as “dangerous for a society” the early 20th century  
24 fortunes of the Mellons, Rockefellers and others. “I’m not interested in legacy wealth buildings, and  
25 my children know that,” she [told The New York Times](#) last year. “Steve wasn’t interested in that. If  
26 I live long enough, it ends with me.”

27 Nonetheless, after the death of her husband in 2011, Powell Jobs used a series of GRATs to  
28 pass on around a half a billion dollars, estate-tax-free, to her children, friends and other family,

1 according to the tax records and interviews with her longtime attorney. By using the GRATs, she  
2 avoided at least \$200 million in estate and gift taxes.

3 Her attorney, Larry Sonsini, said Powell Jobs did this so that her children would have cash  
4 to pay estate taxes when she dies and they inherit “nostalgic and hard assets,” such as real estate, art  
5 and a yacht. (At 260 feet, [Venus](#) is among the larger pleasure ships in the world.) Without the \$500  
6 million or so passed through the trusts, he said, Powell Jobs’ heirs would have to sell stock that she  
7 intends to give to charity to pay her estate tax bill.

8 Sonsini said Powell Jobs, whose fortune is pegged at \$21 billion by Forbes, has already  
9 given billions away to charity and paid \$2.5 billion in state and federal taxes between 2012 and  
10 2020. “When you look at an estate that may be worth multiple billions, and all the rest is going to  
11 charity, and you put it in perspective, what is the problem we’re worried about here?” Sonsini  
12 asked. “This is not about creating dynasty wealth for these kids.”

13 In a written statement, Powell Jobs said she supports “reforms that make the tax code more  
14 fair. Through my work at Emerson Collective and philanthropic commitments, I have dedicated my  
15 life and assets to the pursuit of a more just and equitable society.”

16 Others whose special trusts ProPublica identified, including Bloomberg and the Kochs,  
17 declined to comment on why they’d set up the trusts or their estate-tax implications. Representatives  
18 for Lauder didn’t respond to requests to accept questions on his behalf. Schwarzman’s spokesperson  
19 wrote that he is “one of the largest individual taxpayers in the country and fully complies with all  
20 tax rules.”

21 A typical GRAT entails putting assets, like stocks, in a trust that ultimately benefits a  
22 person’s heirs. The trust pays back an amount equal to what the trust’s creator put in plus a modest  
23 amount of interest. But any gains on the investments above that amount flow to the heirs free of gift  
24 or estate taxes. So if a person puts \$100 million worth of stock in a GRAT and the stock rises in  
25 value to \$130 million, their heirs would receive about \$30 million tax-free.

26 In 1990, Congress accidentally [created](#) GRATs when it closed another estate tax loophole  
27 that was popular at the time. The IRS challenged the maneuver but lost in court.

28 “I don’t blame the taxpayers who are doing it,” said Daniel Hemel, a professor at the

1 University of Chicago Law School. “Congress has virtually invited them to do it. I blame Congress  
2 for creating the monster and then failing to stop the monster once it became clear how much of the  
3 tax base the GRAT monster would eat up.”

4 Users of the trusts extend well beyond the top of the Forbes rankings, ProPublica’s analysis  
5 of the confidential IRS files show. Erik Prince, founder of the military contractor Blackwater and  
6 himself heir to an auto parts fortune, used the shelter. Fashion designer Calvin Klein has used them,  
7 as have “Saturday Night Live” creator Lorne Michaels and media mogul Oprah Winfrey.

8 “We have paid all taxes due,” a spokesperson for Winfrey said. A representative of Klein  
9 did not accept questions from ProPublica or respond to messages. A spokesman for Michaels  
10 declined to comment.

11 Prince also did not answer questions. “Hey if you publish private information about me I’ll  
12 be sure to return the favor,” he wrote. “Go ahead and fuck off.”

13 The GRAT has become so ubiquitous in recent decades that high-end tax lawyers consider it  
14 a plain vanilla strategy. “This is an off-the-shelf solution,” said Michael Kosnitzky, co-leader of the  
15 private wealth practice at law firm Pillsbury Winthrop Shaw Pittman. “Almost every wealthy  
16 person should have one.”

17 ProPublica’s tally almost certainly undercounts the number of Forbes 100 members who use  
18 shelters to avoid estate taxes. ProPublica counted only those people whose tax records or public  
19 filings explicitly mention GRATs or other trusts commonly used to dodge gift and estate  
20 taxes. But a wealthy person can call their trusts whatever they want, leaving plenty of trusts outside  
21 of ProPublica’s count.

22 This month, the House and Senate are hammering out proposals to raise revenue to help pay  
23 for the Biden administration’s plans to expand and the social safety net. The legislative  
24 [blueprint](#) released by House Ways and Means Committee Chairman [Richard Neal, D-Mass.](#), would  
25 defang GRATs and other trusts, which would still be legal but no longer be as useful for estate tax  
26 avoidance. If the provision makes it into law, “it would put a major dent in GRATs,” said Bob Lord,  
27 an Arizona attorney who specializes in trusts and estates.

28 Senate Budget Committee Chairman [Bernie Sanders, I-Vt.](#), has [proposed](#) going further in

1 undercutting estate tax avoidance tools. But the prospect of any reform is uncertain, as Democrats  
2 on Capitol Hill struggle to find the votes to pass the package of spending and tax changes.

3 GRATs are commonly described by tax lawyers as a “heads I win, tails we tie” proposition.  
4 If the investment placed in the GRAT soars in value, that increase passes to an heir without being  
5 subject to future estate tax. If the investment doesn’t go up, the wealthy person can simply try again  
6 and again until they succeed, leading many users to have multiple GRATs going at a time.

7 For example, Herb Simon, founder of the country’s biggest shopping mall empire and owner  
8 of the Indiana Pacers, was one of the most prolific GRAT creators in records reviewed by  
9 ProPublica. Since 2000, he has hatched dozens of the trusts, often more than one a year. In an  
10 [interview](#) with The Indianapolis Star in 2017, the octogenarian Simon said, “It’s always a big tax  
11 problem” for the next generation when someone dies, “but we’ve worked that tax problem. We  
12 won’t have a problem with that.”

13 A spokesperson for Simon didn’t respond to questions for this article.

14 Mentions of these trusts have periodically surfaced in the press after being disclosed in  
15 securities filings, as was the case with [trusts held](#) by Facebook co-founders Mark Zuckerberg and  
16 Dustin Moskovitz and Chief Operating Officer Sheryl Sandberg. In 2013, Bloomberg News  
17 published [a groundbreaking series](#) on GRATs, mining securities filings and other records to reveal  
18 how the mega-rich, including casino magnate Sheldon Adelson and such families as [Walmart’s](#)  
19 [Waltons](#), had perfected the use of the device.

20 ProPublica’s data shows that Michael Bloomberg, the majority owner of the company that  
21 bears his name and No. 13 on Forbes’ list of the wealthiest Americans, is himself a heavy user of  
22 GRATs. Over the course of a dozen years, he repeatedly cycled pieces of his private company in  
23 and out of the trusts — often opening multiple GRATs in one year. During that time, hundreds of  
24 millions of dollars in income flowed through Bloomberg’s GRATs, giving him opportunities to  
25 shield parts of his fortune for his heirs.

26 ProPublica described the transactions (but not the name of the person engaging in them) to  
27 Lord, the trusts and estates attorney. The GRAT is “the perfect loophole to avoid estate and gift tax  
28 in this situation,” said Lord, who is also tax counsel for Americans for Tax Fairness and an advocate

1 for estate tax reform.

2           When Bloomberg ran for president in 2020, he vowed to shore up the estate tax. “Owners of  
3 the biggest estates are expert at gaming the system to reduce what they owe,” a campaign fact sheet  
4 for his tax plan said. Bloomberg vowed to “lower the estate-tax threshold, so that more estates are  
5 taxed,” and to “shut down multiple estate-tax avoidance schemes.” His fact sheet offered few details  
6 as to how he would do that, and it didn’t mention GRATs.

7           The legislation Congress is now considering to curtail GRATs would leave open other  
8 options for estate tax avoidance, including a cousin to the GRAT known as a charitable lead annuity  
9 trust, or CLAT, which contributes to charity while passing gains from stocks and other assets on to  
10 heirs. And the legislation would grandfather in existing trusts, meaning that those who have already  
11 established trusts would be able to continue to use them to avoid paying estate taxes.

12           That has set off a predictable push by tax lawyers to get their clients to create tax-sheltering  
13 trusts before any new legislation takes effect.

14           Porter Wright, a law firm that offers estate planning services, [told existing and potential](#)  
15 [clients](#) it was “critical” to evaluate opportunities because “the window may close very soon. There  
16 are important and time sensitive issues which could substantially impact the amount of wealth you  
17 are able to transfer free of estate and gift tax to future generations.”

18

1 **EXHIBIT 6 – Testimony #231**

2  
3 Famous political figures, spent many evenings at victim’s house, were friends with victim,  
4 worked with victim, confided in victim, and provided victim with the highest level knowledge and  
5 experience in public policy operations. In fact, when *Witness2021B* ran for Mayor of his City, it was  
6 actually a sting operation which indicted two other well-known political figures and exposed a  
7 political official-focused sex ring.

8 Some of those figures informed *Witness2021B* of their organized crime scheme, the  
9 participants and the operators. They invited *Witness2021B* to become part of their scheme.

10 As a White House and City Hall commended Federal patent-awarded inventor/CEO,  
11 *Witness2021B* has been government, and network newscast, documented as the first to invent,  
12 launch, operate and deliver the companies and technology that Google, Facebook and Netflix  
13 copied to create their, later, operations. Google, Facebook and Netflix, Tesla executives and VC’s  
14 also happen to be the organizing, financing and beneficiary partners in the market manipulation  
15 scheme in this case. They have all known *Witness2021B* since college. Thus, *Witness2021B* had the  
16 opportunity to see them form their “*Silicon Valley Cartel*”, **collude, conspire and organize against**  
17 **the government, the public and industry** in a manner which the tech oligarchs describe in their  
18 own emails as being based on “*...the Italian Mafia!*”. Indeed, *The Silicon Valley Tech oligarchs*  
19 *have formed a collusion-based, law-violating, tax-evading, government-manipulating crime empire*  
20 *protected by famous politicians, whom they bribe!*

21 *Witness2021B* has been covertly reporting to GAO, FBI, FTC, SEC, FEC, IG OSC,  
22 California Fair Political Practices officials and Senators and others for decades.

23 His investigation work highlights include:

24 1974 – Advocated for and helped realize the creation of Dan Lowenstein’s California Fair  
25 Political Practices Commission and helped conduct investigations for CFPC and task force groups.  
26 Peers included Paul Kangas, Jack Palladino, Sam Brown, Melvin Belli’s investigators.

27 1978 - Undercover White-Collar Crime & Corruption Sting Operative

28 1988 - Placed in top percentile in Federal OPM Criminal Investigator 1811-C national test.

1 Received first CIA solicitation.

2 1990 - American Society For Industrial Security - active coordinator

3 1990 - International Narcotic Enforcement Officers Association - active coordinator

4 1991 - California Association of Licensed Investigators - active coordinator

5 2000 - California Department of Consumer Affairs Investigator - active coordinator

6 2000-2008 - Investigative Consultant to Congressional and journalism organizations

7 2009- 2018 - Assisted agencies in one of the largest anti-corruption projects in the last

8 decade

9 - Recipient of White House and Congressional Commendations and Federal Grants

10 - Instrumental in creating multiple federal laws and legal precedents

11 - Designed key sting-operation protocols

12 - Created first digital crowd-sourced law enforcement technologies

13 - Received multiple federal patents on IC and LE technologies

14 - Multiple high-profile white-collar case wrap-ups

15 His cases included notorious subjects that most people have seen in the news headlines.

16 Lately, by partnering with the messaging, media outreach, investigations and demands of

17 <https://socialsecurityworks.org> , <https://seniorsleague.org> , AARP, ICIJ and other related

18 organizations, and using [Streisand Effect amplifiers](#), torrents and mass social media processing,

19 This applicant, and his peers were able to get the heads of the Social Security Administration, the

20 heads of The U.S. Government and the Attorney General fired from their jobs for corruption and

21 abuse of public funds.

22 Nobody should tolerate political bullies that collude to abuse the public! Most members of  
23 the public, the non-corporate news media and community groups know that this level of corruption  
24 exists. You can see indisputable proof of these assertions in the documentary film:

25  
26 [http://focus-book.com/public/HOW\\_POLITICAL\\_CORRUPTION\\_WORKS.m4v](http://focus-book.com/public/HOW_POLITICAL_CORRUPTION_WORKS.m4v)

27 [http://newsplus007.com/public/HOW\\_POLITICAL\\_CORRUPTION\\_WORKS.m4v](http://newsplus007.com/public/HOW_POLITICAL_CORRUPTION_WORKS.m4v)

28 ... and at most streaming video outlets.

1 Due to the effectiveness of Applicant’s associates anti-corruption efforts, public officials  
2 have engaged in reprisal/retaliation attacks on Applicant and those officials engaged in felonies by  
3 doing that.

4 In the Solyndra/Silion Valley Cartel matter, *Witness2021B* did “*too good a job*” and broke  
5 up one of the largest corruption matters in America with roots that ran all the way to the Oval  
6 Office. The FBI raid on Solyndra was only the tip of the iceberg. Energy and Media Industry crimes  
7 like these have a SIX TRILLION DOLLAR upside if the crooks can pull them off.

8 The matter illuminated an organized crime scheme, in violation of RICO, anti-trust and  
9 other laws, between major public officials, Silicon Valley tech oligarchs and their operatives. Mr.  
10 Rusco and his investigation team at the United States Government Accountability Office (   
11 <http://www.gao.gov> ) spent significant time interviewing the witness. GAO and Congress then  
12 published a series of reports condemning the actions of the U.S. Department of Energy and their  
13 manipulations of taxpayerfunds. Congressional staff asked *Witness2021B* to attempt a new kind of  
14 activist public-interest lawsuit against The U.S. Government and the individual executives of the  
15 GOVT. The litigation was won by *Witness2021B* and his investors and they received the remand  
16 they sued for. The case was also “won” in that it achieved it’s goals to make history, set new legal  
17 precedents, put the corruption process on public record and prove that *Witness2021B* HAD been  
18 targeted for payback by government officials “*infected with corruption*”. (<http://www.pacer.gov> )

19 The United States Congress had awarded *Witness2021B*, and his team, a commendation and  
20 a multi-million dollar federal contract to build America’s energy “back-up” plan should the Middle  
21 East oil interests ‘*go sideways*’, as they, indeed, have.

22 Documents, NDA’s, emails and other evidence has proven that *Witness2021B* has had a  
23 relationship with the Department of Energy, and their labs, since, at least 2000. FBI agents Richard  
24 Auerbach, Peter D. Cair, Patricia Rich, Charles Brennan and William Wadman should be able to  
25 provide information about the oldest FBI contacts. Victim even had connections with local FBI  
26 Hero Mark Felt (known as ‘Deep Throat’ in the Watergate case) who lived near him. Reporters Ed  
27 Montgomery, Leslie Wayne, Carol Leoning and other well-known reporters have records which  
28 will verify some of the earliest investigation work by *Witness2021B*. Recent FBI discussions are

1 documented in the FBI building logs. The Federal report entitled: ***San Francisco's Corruption***  
2 ***Culture*** (Available as an additional attachment document) goes into great detail about the organized  
3 political crime activities in the region.

4  
5 Witness2021B and his engineering team, as early as 2005, had informed the Department of Energy,  
6 in writing that, as Lithium ion batteries age, the 'dendrite defects' in their internal chemistry cause  
7 the batteries to constantly increase their tendency to blow up. This was proven via x-ray analysis of  
8 lithium ion batteries, particularly those from Panasonic that are used by Tesla Motors. This data was  
9 intentionally covered up by White House and Department of Energy executives because they  
10 wanted those "trillions" of dollars of profits in their pockets from the *fabled* Afghanistan mining  
11 fields.

12 External forces, moisture, ambient energy waves and other factors, increase their tendency  
13 to self-ignite. Department of Energy Secretary's of Energy, their staff, White House and CIA  
14 executives have been proven, via their public stock brokerage records, to own lithium ion battery  
15 companies and child labor rare earth mining interests.

16  
17 That is why they cover up the dangers of toxic lithium ion (the burning smoke of which causes  
18 cancer, brain and fetus damage) and sabotage efforts to market fuel cells, ultra caps, nicad batteries  
19 and competing alternative energy storage: in violation of anti-trust laws.

20  
21  
22 Secretary of Energy Jennifer Granholm's Proterra Buses are now blowing up, Tesla is  
23 known for blowing up, Bolt's are now blowing up. Ener1 batteries destroyed millions of dollars of  
24 Fisker's when they got wet... The U.S. Government has hundreds of reports proving this to be a  
25 fact.

AS LITHIUM ION BATTERIES AGE, THE DENDRITE DEFECTS IN THEIR INTERNAL CHEMISTRY CAUSE THE BATTERIES TO CONSTANTLY INCREASE THEIR TENDENCY TO BLOW UP.

EXTERNAL FORCES, MOISTURE, AMBIENT ENERGY WAVES AND OTHER FACTORS, INCREASE THEIR TENDENCY TO SELF-IGNITE.

DEPARTMENT OF ENERGY SECRETARY'S OF ENERGY, THEIR STAFF, WHITE HOUSE AND CIA EXECUTIVES HAVE BEEN PROVEN, VIA THEIR PUBLIC STOCK BROKERAGE RECORDS TO OWN LITHIUM ION BATTERY COMPANIES AND MINING INTERESTS.

THAT IS WHY THEY COVER UP THE DANGERS OF LITHIUM ION AND SABOTAGE EFFORTS TO MARKET FUEL CELLS, ULTRA CAPS, NICAD BATTERIES AND ALTERNATIVE ENERGY STORAGE.

Witness2021B asks to end this cover up that allows corrupt politicians to profiteer on the death of Americans!

The United States Patent Office had also awarded *Witness2021B* one of the historically largest set of patents on a new, entirely produced-in-the-USA, energy technology per <http://www.uspto.gov>

These technologies competed with the corrupt overseas rare earth mining schemes owned by California Senators, Department of Energy Executives, White House staff and the Silicon Valley tech Cartel.

*Witness2021B* has been a provider, advisor and/or advocate in almost every major current federal case against the Silicon Valley Cartel since the federal “no poaching” lawsuit against the Cartel.

( Case #'s **11-cv-2509** and **5:2011cv02509** and **1:10-cv-01629** and **1:10-cv-02220** ). These cases, prove that the Silicon Valley Cartel colludes to harm the public and monopolize industries.

State-sponsored “hit-jobs” were ordered, operated and financed by government officials in order to engage in revenge, reprisal and vendetta, against *Witness2021B* because of his help to Federal investigators and Congress in these investigations. Those attacks fully incapacitated the victim.

1 In his public life, he has spent decades proving that nothing is "impossible" and that one is "only  
2 limited by their imagination" per his reference letters from clients and employers. Over the course  
3 of his work, he has assembled a global force of some of the world's top engineering, science,  
4 physics, programming, operations and logistics experts. He, and his peers, can respond instantly for  
5 disaster relief, market shifts and new global solutions demands. Solving global challenges with  
6 novel new innovations and conceptual-blockbusting program management.

7 His career has been focused on solving the world's greatest challenges. He has received  
8 awards, commendations, issued federal patents and industry acclaim for his networking,  
9 transportation, housing, medical, communications, energy and other technologies that he invented,  
10 built and marketed globally. Millions of user around the world deploy technologies first created,  
11 produced and patent-awarded to him.

12 His hundreds of letters of reference are from the White House, Mayor's, Fortune 500 CEO's  
13 and other well known leaders. He is renown for his life-time provision of service to his community  
14 and his nation.

15 His work stopped in 2008 when the attacks began. Many of the attacking operatives have  
16 been identified by name and **the FBI has been asked to interview them and confirm who was**  
17 **paying and directing them.** White House, Congressional and co-worker whistle-blowers, as well as  
18 recent Chinese, Russian and Syrian hacks have also cross-confirmed the attackers and their  
19 directives.

20 The victim has, for years, filed all of the proper forms, gone "through proper channels" and  
21 inquired as to next-steps from officials at the highest levels. For his efforts he has been rewarded  
22 with cover-ups, lies, obfuscation, stone-walling and avoidance. The victim now has one of  
23 America's largest collections of "Finger-Pointing" letters from government agencies and officials,  
24 each correspondence, essentially, saying: "Oh, it's not us go try DOJ or...(FBI, SEC, GAO..(Insert  
25 agency name here)...". No government body will step up to resolve the issue or allow their IG to  
26 investigate, or let "302 reports" get written for interviews that never happen. It is the RUN-  
27 AROUND on an epic scale.

28 Today, in San Francisco, arrested, indicted City Hall public officials, some of whom

1 *Witness2021B* helped uncover, get paid \$44,000.00 per month by the government even though they  
2 are arrested criminals. San Francisco also pays homeless people \$60,000.00 per year to sleep in a  
3 tent in front of City Hall. Today, in Washington DC, arrested, indicted Congress-people, some of  
4 whom *Witness2021B* helped uncover, get paid \$150,000.00 per year by the government even  
5 though they are arrested criminals.

2  
3 **EXHIBIT 7 – Crony Corruption Goes High Tech**

4 After a year of waiting and being assured that their loan application was complete and good,  
5 Plaintiff 42 Vehicles received a letter in August stating simply that their loan application under the  
6 Advanced Technology Vehicles Manufacturing (ATVM) Program had been rejected. No reasons  
7 were given in the letter and only after several attempts at phoning the ATVM office were they able  
8 to receive the reasons orally. Most were not even applicable to the loan application and did not  
9 reflect what was included in the submission or what, in fact, was available for review, clearly  
10 visible on our website and in the extensive media about our company.  
11

12  
13 The rejection appears to have been driven by political and competitive market interests and not  
14 technical or innovative valuation.  
15

16  
17 The Plaintiff 42 Vehicles car goes an almost unlimited range via hot-swap cartridges, costs less than  
18 \$20,000, uses no gasoline, is easy to repair and build, saves lives better than any other car, is faster  
19 than competing solutions, does not require an extension cord, uses electricity and creates green jobs.

20 The factory can be built quickly and at very low cost and, in fact, partially already exists via our  
21 manufacturing partners. The company already has thousands of customers lined up who want to buy  
22 our unique and very “green” car. The company hand delivered letters from those customers to the  
23 DOE ATVM office in Washington DC in 2008. The company currently has no significant debt and  
24 the company leaders have been contributing their time and resources for many years based on  
25 positive feedback received repeatedly by Department of Energy (DOE) loan reviewers and staff.

26  
27 The company won a semi-finalist position in the *Forbes: America’s Most Promising Companies*  
28 contest.

1  
2 Certainly company officials are not claiming that their vehicles will solve all of our energy  
3 problems. However with each car that is sold, we will help reduce our reliance on imported fuel by  
4 putting a vehicle on the road that uses absolutely no gasoline. This vehicle is truly using “advanced  
5 technology” – a major goal of this loan program. In addition, with a company that has no current  
6 debt, several patents, and thousands of interested customers, the company asserts that DOE’s  
7 financial risk in investing in our technology would be extremely low.  
8

9  
10 **We would understand a rejection of this loan application if legitimate reasons were given, but**  
11 **they were not.** One of the reasons given was that our car does not use E85 gasoline. No, this car  
12 uses NO gasoline which we thought is a goal our country should want to attain. Another reason was  
13 that we were not making millions of cars. Our marketing plan did not support that nor did the  
14 funding levels we requested, AT THIS STAGE. But we stated that we hoped to grow to make as  
15 many cars as Ford, GM or any other competitor but that we intended to grow, “in stages” as any  
16 smart business would. DOE also stated that Plaintiff 42 was not planning to sell cars to the  
17 government which is 100% false and clearly stated in our application that the core sales plan of the  
18 company is based on government fleet sales. We cannot help but wonder if DOE even read the  
19 application. Finally, and another example of a failure to read the application, was that DOE asserted  
20 our factory cost estimates were too low because the metal body fabrication systems were not  
21 calculated high enough. Plaintiff 42 Vehicles use no metal fabrication in its bodies.  
22

23  
24  
25 Plaintiff 42 Vehicles sent a follow up letter to Energy Secretary Steven Chu with the following  
26 questions that still remain unanswered and unexplained:

27 “

28

1. DOE reviewers never even talked to the founder, inventor, engineers, project leads or primary contractors to obtain additional information. We even were told over and over that everything in our application was complete and that nothing was needed. “Everything is on track” was an ePlaintiff 42ression repeated to the company by DOE reviewers. This is despite the fact that the reasons given for our rejection did not reflect the technology being used and therefore the ATVM reviewers did not understand our concept and product. Why was no one at Plaintiff 42 Vehicles contacted? Why was the staff at DOE during the course of the year positive about the outcome and never asked for additional information?
2. Rejection comments supplied by Chris Foster of DOE and third party press seem to be unrelated to the business of the company and have no foundation in fact. Why is that?
3. One of the main reasons given for the rejection was the fact that our vehicles do not use E85 gasoline. If that was true, why did competitors Tesla & Nissan get approved funding? Their vehicles also do not use E85. Additionally, in reviewing the transcripts of the two Public Meetings held to brief stakeholders on the loan program, **not one DOE speaker stated that E85 was a required component.**
4. While it is true that we do not wish to use carcinogenic gasoline, (Here in California we have a sticker on every gas pump that warns that filling your tank is likely to expose you to cancer), at no point was E85 gasoline ever mentioned, discussed, commented on or requested. In fact the topic was particularly avoided by DOE staff. Why not?
5. Another rejection point was that we were not planning to make enough cars. This is false. The company would like to build and sell more cars than any other car company. We are

1 fully willing to produce millions of vehicles if provided with the appropriate funding as it  
2 has quantified millions of fleet buyers for its vehicles. However, no DOE entity ever asked  
3 us to adjust, discuss or amend our numbers and we were more than willing to adjust those  
4 numbers if anyone had even bothered to ask. One must start out with small steps and we  
5 planned to ramp up to a massive number over time. To suggest that one do otherwise would  
6 demonstrate questionable judgment. What is the validity of this comment by the reviewers  
7 based on?  
8

9 6. We provided \$100 million+ of asset collateral opportunity for only a \$40M loan. To repeat,  
10 we provided over TWICE the collateral of the value of the loan. How is this not as secure of  
11 a structure as any of the other applicants?  
12

13 7. We had selected a primary, secondary and additional back-up factory buildings that DOE  
14 said would be fully NEPA compliant yet Tesla had no building, planned to build a structure  
15 which was not possible to meet Section 136 parameters in time, still does not have a  
16 building yet they received funding. How did that happen if the Section 136 rules required a  
17 NEPA compliant building upon application filing?  
18

19 8. We were told that we were rejected because we were not planning to sell cars to the  
20 government. **This is 100% false.** The core sales plan of the company is based on  
21 government and commercial fleet sales. Why did your reviewers say this?  
22

23 9. Additionally we were told that electric motors and batteries were considered by the  
24 reviewers to be too futuristic of a technology and not developed for commercial use even  
25 though they have been in use in over 40 industries for over 20 years, including by NASA.  
26 What is the rationale for this argument?  
27  
28

1 10. Almost every other part of the Plaintiff 42 car was to be purchased from existing  
2 commercial sources with multiple points of supply so it is not possible to see how a reviewer  
3 might think the vehicle had any significant technical acquisition hurdles. Why does DOE  
4 assume that the following companies with whom we would be contracting could not perform  
5 the following responsibilities:

6  
7 10.a. Deloitte & Touche to provide auditing and reporting of financial data.

8 10.b. Autodesk or Microsoft to deliver the process and design software.

9  
10 10.c. NEC, Intel or the other leading electronics companies in the world to build  
11 our controllers.

12  
13 10.d. Roush Automotive, one of the most successful automobile electronics groups  
14 in the world, to build the electronic module.

15 10.e. US National Lab system to solder a box together.

16  
17 10.f. Over 100 other major supplier companies that have been building parts for  
18 the auto, aerospace and industry for decades to deliver the component parts for our  
19 vehicles.

20  
21 11. The primary purpose of this loan program, Plaintiff 42 was told by its authors, was to  
22 develop advanced technology and further reduce our dependence on gasoline. The Plaintiff  
23 42 Vehicles car uses no gasoline and gets over 125 miles per battery charge. How is this not  
24 a direct conflict with the precepts of the Section 136 law?

25  
26 12. Plaintiff 42 was also told that its factory cost was too low because the metal body fabrication  
27 systems were not calculated high enough but the reviewers apparently did not even pay  
28

1 attention to the fact that Plaintiff 42 uses no metal fabrication in its body. What was the  
2 rationale in making such an erroneous comment?

3 13. Reviewers also stated that the car was a "hydrogen car" which it is not. It is an electric car.  
4 Why did they say that?  
5

6 14. In what ways were the following documents actually reviewed? The ATVM office stated  
7 that they "lost our documents" twice. Why?  
8

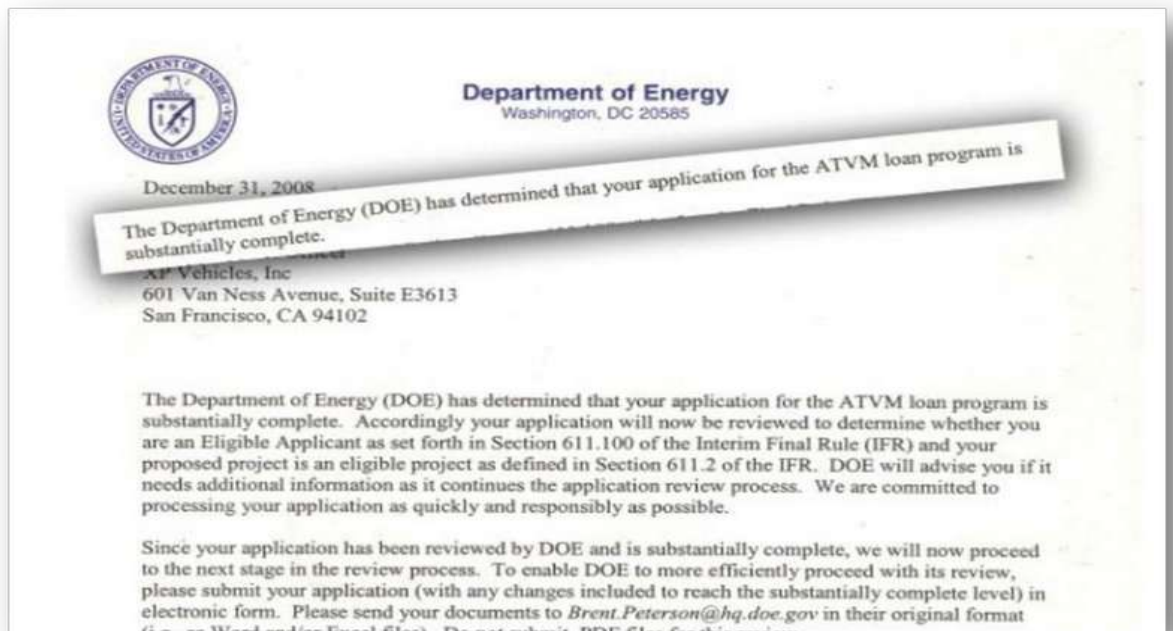

9 Documents Plaintiff 42 vehicles submitted to DOE:

- 10 ● Detailed financials that cost the company almost \$200,000 to prepare;
- 11 ● Metrics that demonstrated that the Plaintiff 42 car can save millions of lives per year and  
12 that it was safer than any vehicle;
- 13 ● Metrics that demonstrate that a gasoline/hybrid vehicle is dangerously carcinogenic when  
14 filled at a gas station compared to an Plaintiff 42 Vehicle;
- 15 ● Engineering and IP metrics that beat every competitor on price, range, safety, TOC,  
16 efficiency, toxic safety and hundreds of other points;
- 17 ● Examples of work from \$3M of cash and person-hours previously invested by founders,  
18 DOE & partners;
- 19 ● Lists of top auto and aerospace corporate partners, staff and resources, on stand-by,  
20 equaling thousands of people in all groups combined;
- 21 ● Validation of a deep team of core staff that have been developing the project and parts of  
22 the project for 3-15 years part time;
- 23 ● Samples of extensive international positive press coverage;
- 24 ● Proof of a market opening timed with tax and national imperative incentives that created a  
25 dramatic window for success;
- 26
- 27
- 28

- Proof that Plaintiff 42 was the lowest overhead car company in the market which equates to the best chance for profit and return funds;
- Samples of an in-house created online process management architecture;
- CAD designs, engineering plans and manufacturing plans;
- A detailed website;
- A detailed path to \$1.5B within 5 years or less from a less than \$100M investment;
- Examples of dozens of prototypes as seen in the photograph on the BUILDS page of our website;
- Numerous patents and issued trademarks;
- Large pending portfolio with third party valuation and validation reports valuing IP at over \$100M;
- People: Senior Scientists, Chemists & Engineers from Top University & Federal Labs, including staff that has built and delivered millions of vehicles to the consumer market;
- Partners: Federal, University, Fortune 500, Private Research Organizations;
- Written Customer inquiries from a massive national customer base of qualified retail leads and 1.2M of commercial unit opportunities equaling a \$1.5B+ opportunity. Also submitted an extensive package of letters from each customer candidate;
- Contracts: Federal Contract fully executed and MOU's executed;
- Awards/Commendations: Congress, DARPA;
- Research Data: Over 200+ technical research documents & 15+ years of research;
- Know How: Over 22,000+ man hours of development;
- Market data, studies and plans;
- Over 100+ documents of industry study;
- Unique access to Federal Labs & leased facility options;
- and other supporting materials.

1  
2 After several more attempts at receiving more clarification from the ATVM office, the company  
3 received a follow up letter of ePlaintiff 42lanation for the rejection. While more ePlaintiff  
4 42lanatory than the first, the reasons still are very questionable and the process greatly lacking in  
5 transparency. Below are additional questions that the company is raising, along with the ones above  
6 that still have not been answered.

7  
8  
9 In the October 23, 2009 follow up letter, Mr. Lachlan Seward states that the Plaintiff 42  
10 Vehicles loan application was deemed Substantially Complete on November 10, 2009. **This**  
11 **is completely false** as Plaintiff 42 Vehicles received a letter on December 31, 2008 states  
12 that the application was substantially complete.

25 Additionally, the NEPA for Plaintiff 42 Vehicles had been reviewed, edited and  
26 approved by DOE National Environmental Protection Act (NEPA) staff (Matthew  
27 McMillen) at the beginning of 2009  
28

26  
27  
28

The letter also states that “extensive review” was conducted yet (as mentioned above) not one Plaintiff 42 Vehicle company official, engineer, designer, investor, technician or anyone else who had designed and developed the car was contacted by DOE to answer questions and provide more information. It seems incredulous that after conducting an extensive review that DOE would not have at least one question about the application for any of the technical staff, or the founder who flew to the DOE in Washington, DC, twice, and was told by DOE staff, on each occasion, that “no additional information was needed and everything was in hand to finalize the application”.

The first reason given for the rejection was that the proposed vehicle is at a “development stage” and not ready for commercialization. Yet applications that have already been approved, we have been told, have had less plans or hard development data. These awardees also had the same three-year timeframe in their proposals, and one even went into 2013. We also find this contrary to the Administration’s stated goal about electric vehicles. According to a DOE spokesman, the Administration “shares the goal of ensuring that the program (ATVM) is flexible enough to account for the full range of available technologies.”

The second reason was the project’s impact on fuel economy of the US Light Duty Fleet over time was weak. This was never discussed with our team at any point of the process. However, it is surprising to us how a vehicle that is lighter than any other applicant by half, safer than any other applicant by many times and beats the metrics of every other applicants could not have exceeded every applicant on any comparison to Light Duty fleet metrics, a market that was core to our business plan. Our fleet sales were targeted directly at the Light Duty fleet so we find this reason to be confusing at best.

23  
24  
25  
26  
27  
28

The third reason cited in the letter was about the use of “advanced fuels.” First of all, at no point did anyone from DOE ask about or discuss with our technical staff our fuel plans. The letter further goes on to say that our use of hydrogen was one of the reasons that our application was being rejected. **Yet hydrogen is non-essential to our vehicle.** The hydrogen tank is rather an optional and stand-by power system for our electric vehicles. Further we fail to see how DOE could state that hydrogen is an “impractical and unproven energy source” in light of the fact that Honda and BMW are already shipping cars using that fuel source. But again, we must reiterate that the use of hydrogen is not an essential component of our vehicles and had DOE asked us about this fuel source, we could have explained that to them.

Finally, the letter states that the Plaintiff 42 Vehicles petroleum use reductions were unrealistic. We are most confused about this point as **our car uses absolutely no gasoline.** How could our reductions be unrealistic? Is this not a goal of the Obama Administration?

The company hired Ford Motor Company’s senior systems engineer to validate the final vehicle numbers submitted in the base response and provided numbers in support of that data produced by Sandia National Laboratories. How could those entities have provided numbers which the ATVM office could have interpreted so negatively for a vehicle which weighs less, goes farther and requires less energy storage than any other submitted vehicle in the entire set of applicants to date? How could the ATVM reviewers never even submit a question to the Plaintiff 42 technical team about any of these metrics?

27  
28

Why have none of our FOIA requests been responded to?”

In summation, these clarifying reasons for rejecting the Plaintiff 42 Vehicles ATVM loan application are still confusing, not applicable in many cases and unwarranted when considering those applications that have been approved. The listed points appear to have no foundation in facts relative to our design and we again question why there was no communication from DOE with the developers of the vehicle over a year.

Further we have been told that competing larger companies were given much counseling, guidance, feedback and opportunity to “tweak” their applications by DOE. These companies submitted their applications later than Plaintiff 42 Vehicles and were awarded funding. Our question is then why did Carol Battershell, DOE Senior Advisor state during the December 1, 2008 Public Meeting that “And that might lead one to believe that applying earlier is better than apply later.” When the program was first announced, that indeed was the guidance given – first come, first served – so scores of smaller, electric car companies and suppliers submitted their applications. Yet the rules changed mid-way through the process to allow larger automotive companies who did not submit their applications first to send them in and now they are being funded.

Finally, we were very disappointed to read in the September 23, 2009 issue of E&E News that Secretary Chu had suggested in June that the Administration was hoping that GM and Chrysler would be able to participate in the (ATVM) loan program. “There is money there, I wouldn’t say set aside, but let’s just say we are trying to stretch those dollars as far as we can.” This forces us to ask whether these funds are being set aside at the expense and loss of

1 smaller, more advanced technology electric car companies and suppliers who are requesting  
2 billions less in guaranteed loans and who are offering more forward-thinking and advanced  
3 projects to help us move away from our dependence on oil.

4  
5 This is only a partial list of the problematic issues that we experienced with the ATVM  
6 group at DOE.

7  
8 Every year since 2000 our research group has checked in with consumer car owners and  
9 auto industry suppliers. The bottom line has always been that no consumer electric car market will  
10 EVER happen until every consumer can charge their car at their home garage or home apartment  
11 parking spot. NOBODY, in any significant numbers, is going to drive many miles to a charging  
12 station, wait in line to get to the charger and then wait more than 4 minutes for their car to charge.  
13 The current time to charge most electric cars is 40 minutes with all of the fussing around accounted  
14 for.

15 We proposed a hot-swap battery system that any consumer can use, without driving to some  
16 special location. A consumer can hot-swap a wheeled battery in less than two minutes.

17 Senators and government officials don't like that because they bought stock market  
18 investments in the ways that don't work. Those White House and Department of Energy officials get  
19 bribes and stock market payola from Proterra, Ener1, Tesla and the old school suppliers, so they  
20 will not allow non-lithium-ion batteries and they will not allow fuel cell and ultra-capacitors to  
21 exist. Those politicians will not allow the only solutions that work to get to market. Here is what we  
22 told the Department of Energy and the White House, in writing for the last decade. With revelations  
23 like these:

24 ***MORAL HAZARD? Fed President Active Trader of Stocks...***

25  
26 ***Boston Official Who Warned on Real Estate Was Active REIT Trader...***

27  
28 ***Agency buying bonds of companies that don't seem to need central bank's help...***

1           ...it is clear the government officials, especially Department of Energy bosses, don't care  
2 about their salaries, they are entirely motivated by their stock market holdings, which compete with  
3 the public.

4  
5 Yes, Department of Energy staff get paid by special interests via stock market insider trading and so  
6 those energy executives sabotage any company that competes with their lithium ion battery mining,  
7 assembly or marketing payola.

8           The United States has about 100,000 public chargers, far fewer than Europe and China. It  
9 needs 10 times as many, auto experts say, to complete the switch from combustion engine vehicles.

10  
11 Over the past year, the electric vehicle charging industry has been swept up in a Wall Street gold  
12 rush because of growing optimism about electric cars and trucks.

13  
14 In President Biden's vision of a green future, half of all new cars sold in 2030 will be electric. But  
15 something really basic is standing in the way of that plan: enough outlets to plug in all those cars  
16 and trucks.

17  
18 The country has tens of thousands of public charging stations — the electric car equivalent of gas  
19 pumps — with about 110,000 chargers. But energy and auto experts say that number needs to be at  
20 least five to 10 times as big to achieve the president's goal. Building that many will cost tens of  
21 billions of dollars, far more than the \$7.5 billion that lawmakers have set aside in the infrastructure  
22 bill.

23  
24 Private investors are pouring hundreds of millions of dollars into building chargers, but the business  
25 suffers from a chicken-and-egg problem: Sales of electric cars are not growing fast enough to make  
26 charging profitable. It could be years before most charging companies break even, let alone mint big  
27 profits like Exxon Mobil and Chevron.

1 Fast chargers — ones that can fill up an electric car battery in 20 to 40 minutes — cost tens of  
2 thousands of dollars but are typically used less than humdrum gas pumps. Yet the auto and energy  
3 industries need to build them to reassure people that they won't be stranded in an electric car with  
4 no plug in sight.

5  
6 “E.V. charging infrastructure is the single biggest barrier to E.V. adoption,” said Asad Hussain, a  
7 senior analyst at PitchBook, a research firm. “You talk to anyone who's on the fence about buying  
8 an E.V. and the No. 1 concern that comes to mind is range anxiety.”

9  
10 The European Union, which is further along in electrifying cars, had nearly 200,000 public charging  
11 points last year. China, where electric cars are even more common than in Europe, had more than  
12 800,000 in 2020.

13  
14 European and Chinese officials have offered better incentives and imposed tougher regulations in  
15 part because they want to win a global race to build the cars and trucks of the future. U.S. policies,  
16 including the infrastructure bill, have been more modest because most Republicans and some  
17 Democrats oppose the regulation and spending needed to quickly ditch fossil fuels.

18  
19 Soon, even \$7.5 billion won't be enough to lay the groundwork for the electric age, Nick Nigro,  
20 founder of Atlas Public Policy, a consulting and research firm based in Washington, said about the  
21 proposed federal spending on charging stations.

22  
23 “Is it sufficient? No,” he said. “But it gets things going.”

24  
25 Most drivers today plug in their electric cars at home, and only occasionally use public charging  
26 stations. But those stations will be crucial, especially to those who live in apartments and people  
27 who drive long distances.

1 For years, start-ups, automakers and other companies have been slowly building chargers, mainly in  
2 California and other coastal states where most electric cars are sold. These businesses use different  
3 strategies to make money, and auto experts say it is not clear which will succeed. The company with  
4 the most stations, ChargePoint, sells chargers to individuals, workplaces, stores, condo and  
5 apartment buildings, and businesses with fleets of electric vehicles. It collects subscription fees for  
6 software that manages the chargers. Tesla offers charging mainly to get people to buy its cars. And  
7 others make money by selling electricity to drivers.

8  
9 Once the poor cousin to the hip business of making sleek electric cars, the charging industry has  
10 been swept up in its own gold rush. Venture capital firms poured nearly \$1 billion into charging  
11 companies last year, more than the five previous years combined, according to PitchBook. So far in  
12 2021, venture capital investments are up to more than \$550 million.

13  
14 On Wall Street, publicly traded special purpose acquisition companies, or SPACs, have struck deals  
15 to buy eight charging companies out of 26 deals involving electric vehicle and related businesses,  
16 according to Dealogic, a research firm. The deals typically include an infusion of hundreds of  
17 millions of dollars from big investors like BlackRock.

18  
19 “It’s early, and folks are trying to wrap their heads around what does the potential look like,” said  
20 Gabe Daoud Jr., a managing director and analyst at Cowen, an investment bank.

21  
22 These businesses could benefit from the infrastructure bill, but it is not clear how the Biden  
23 administration would distribute money for charging stations.

24  
25 Another unanswered question is who will be the Exxon Mobil of the electric car age. It might well  
26 be automakers.

27  
28 Tesla, which makes about two-thirds of the electric cars sold in the United States, has built

1 thousands of chargers, which it made free for early customers. The company could open its network  
2 to vehicles made by other automakers by the end of the year, its chief executive, Elon Musk, said in  
3 July.

4  
5 Volkswagen also owns a charging network, Electrify America, which is already available to all  
6 makes of cars. In Europe, Volkswagen, BMW, Ford Motor, Daimler and other automakers jointly  
7 own a charging company called Ionity. Drivers pay fees to charge in both cases, but some  
8 automakers offer free charging for a few years to entice car buyers.

9  
10 Energy giants like BP and Royal Dutch Shell have gotten into the business, too, by buying charging  
11 companies in Europe and the United States.

12  
13 And 14 electric utilities from Maine to Texas have formed the Electric Highway Coalition to build  
14 stations at intervals of 100 miles or less. Utilities elsewhere are also building chargers, as are cities  
15 like Los Angeles and New York.

16  
17 They are all competing in a tiny market: Less than 4 percent of new car sales and less than 1 percent  
18 of vehicles on U.S. roads are electric.

19  
20 Charging companies claim they can succeed even if it takes years for electric vehicles to take over.  
21 Some businesses like ChargePoint have been around for more than a decade, while others raising  
22 money don't have much of a track record.

23  
24 The chief executive of ChargePoint, Pasquale Romano, says his company avoids some costs by  
25 using contract manufacturers to build equipment and selling stations to employers who own electric  
26 vehicle fleets, retailers and others, who also buy software and maintenance subscriptions.

27  
28 "Everyone thinks this can go fast, and it can't," Mr. Romano said. "You have to get in and start

1 pedaling to help shape what it looks like.”

2  
3 Volta, a smaller charging company, places chargers near the entrances of retailers like Whole Foods  
4 Market and Walgreens. The chargers show ads, generating revenue, and the stations pay for  
5 themselves within a few years, said the company’s president and a co-founder, Chris Wendel. “It’s  
6 a sponsored service brought to you by brands that care about what you’re doing.”

7  
8 But some companies have stumbled. In December, TPG Pace Beneficial Finance, a SPAC backed  
9 partly by TPG, the private equity firm, announced that it would buy EVBox, an Amsterdam-based  
10 maker of charging equipment, valuing the company at \$1.4 billion.

11  
12 In January, Jim Cramer, the host of CNBC’s “Mad Money,” said EVBox was his favorite charging  
13 company because it is an established player in Europe. Shares of TPG Pace Beneficial climbed to  
14 \$31 in February, from around \$10.

15  
16 But this month, the companies delayed the merger’s closing because EVBox has not yet released its  
17 audited financial statements for 2020. TPG Pace said in a regulatory filing that there was  
18 “significant uncertainty” about the deal’s completion, and its shares have fallen back to about \$10.

19  
20 A spokeswoman for EVBox declined to comment.

21  
22 Mr. Cramer no longer stands by the EVBox pick. “I suppose we put too much faith in the financials  
23 as presented to investors at the time,” he said in an email.

24  
25 Since the start of 2020, 16 proposed SPAC mergers have been canceled or withdrawn. And  
26 investors and regulators have raised questions about the optimistic claims made by executives and  
27 promoters of SPACs.

28

1 Yet investors continue to pour money into charging. One charging company, EVgo, completed a  
2 SPAC deal and started trading in July. Trading in Volta started last month. Several other deals have  
3 been announced in recent months, including for Tritium, which makes fast chargers; Wallbox,  
4 which sells charging equipment, software and related services; and Allego, which operates a large  
5 charging network in Europe.

6  
7 Some investors think that charging cars might not be the best approach. Lithium ion batteries cause  
8 wars, corruption, genocide, mass rapes, child labor, unePlaintiff 42ected fires, environmental  
9 damage, cancers, liver damage, worker deaths and other awful things.

10  
11 Last month, Ample, which aims to build stations where drained E.V. batteries are replaced with  
12 charged ones, raised \$160 million. Raed Masri, founder of Transform VC, an investor in Ample,  
13 said battery swapping would be better for people without a place to plug in their cars because it is  
14 much faster.

15  
16 “They need a quick energy delivery system, and only swapping provides that,” Mr. Masri said.

17  
18 Other investors are making lots of bets. Energy Impact Partners, a private equity firm based in New  
19 York, has invested in several charging networks, a repair app for charging stations and an app that  
20 optimizes charging.

21  
22 Cassie Bowe, a principal at the firm, said that with electric vehicle sales growing fast, it was urgent  
23 to build a network to support them. “There’s no more time,” she said. “We need this infrastructure  
24 fast.”

25         The reality is that the current plan can never work. There is not enough money, consumer  
26 interest, logistical embrace or other support for public chargers to ever be more than a feel good  
27 fancy. The consumer desire for speed-of-delivery increases over 10% per year. Nobody is going to  
28 put up with the wait, especially after sitting in rush-hour congestion every morning and night.

1 Electric cars will never happen in any volume unless every home and apartment has a  
2 charger, the rates for the chargers are less than gasoline and the batteries or energy cassettes can be  
3 instantly hot-swapped. Department of Energy officials avoid this option, though, because it  
4 competes with their stock market holdings. Corruption in America will never end until Congress  
5 makes it illegal for a public servant, or their family, to own stocks!

6 Forensic data has proven that Applicant's records and decisions were altered by government  
7 staff and external hackers in an effort to harm Applicant in reprisal for his testimony to law  
8 enforcement as a witness, whistle-blower and advocate.

9 Applicant was a criminology student on the multi-campus "Core Curriculum" which was  
10 offered through Stanford, SFSU and Berkeley campuses. He lived on Chenery Street, in San  
11 Francisco, with Janet R. T. Who was the best friend of Kathryn Feinstein, daughter of the future  
12 mayor of San Francisco. Janet's mother worked for Dianne Feinstein. Kathryn Feinstein often  
13 stayed at Applicant's home and partied there in the hot tub in the back yard and in the downstairs  
14 living room. Where she told tales of San Francisco politics. This led to Applicant's recording and  
15 production of the investigative film series: "City Circus", about the characters in San Francisco  
16 politics.

17 Mayor George Moscone was then assassinated one day while Applicant was on the way to  
18 City Hall for a meeting at the Mayor's office. This assassination made Diane Feinstein Mayor of  
19 San Francisco and, later, a U.S. Senator.

20 Mayor Feinstein issued a large published proclamation to Applicant for his work on a major  
21 project for the City of San Francisco, a tribute to George Moscone viewed by millions of citizens  
22 and had Applicant produce many socialite events at City Hall for, and with, the Mayor's friend  
23 Charlotte Maillard.

24 Applicant was working on the 50<sup>th</sup> Anniversary Golden Gate bridge events but a rift  
25 developed between Applicants team and another group. The opposing group was being accused of  
26 embezzling Bridge District funds and was headed by two personal friends of Diane Feinsteins. The  
27 failures of the opposition group became national news as it was also backed by David Rockefeller's  
28 money man, who financed Diane Feinstein.

1 At this time Applicant, had numerous law enforcement and intelligence credentials,  
2 commendations and certifications and was approached to assist with a sting operation involving  
3 some of those officials. The sting operation required that Applicant run for Mayor of San Francisco  
4 because only a mayoral candidate could have access to the proper people, information and  
5 proximity needed for such an operation. Department of Justice, FBI, California Fair Political  
6 Practices Commission and other entities had an interest in these task force-type efforts. The  
7 combined efforts resulted in one famous official being arrested for running an underage prostitution  
8 ring for San Francisco public officials, co-managed by a SFPD official and another candidate for  
9 mayor, associated with the old school North Beach mob, being run out of politics and having his  
10 young daughter removed by the police to protect her from attempted abuse. Both of the indicted  
11 officials had close relationships with Diane Feinstein.

12 Applicant ran the opening ceremonies of David Rockefeller’s Embarcadero Center in San  
13 Francisco which Rockefeller, Feinstein and James Bronkema were key players in. James Bronkema,  
14 The head of the Golden Gate Bridge District had his mistress intermediate a potential “peace treaty”  
15 between applicant and his Cartel. He later sought to invite Applicant into the Bay Area political  
16 Cartel he ran and disclosed the insider scheme to Applicant, hoping to entice him. Bay Area VC  
17 Tom Perkins also made Applicant this offer and confirmed the existence, operation and scope of  
18 this Cartel which included famous politicians.

19 Subsequently, the Feinstein family became the investors, government financial agent,  
20 contractors, HR providers, staffing liaison, and friends for Elon Musk and managed the State and  
21 Federal gifts of billions of dollars of tax payer funds to Musk, which the Feinstein family profited  
22 from.

23 At the same time, Applicant was operating a U.S. Government funded electric vehicle  
24 manufacturing company and an energy production company that competed with Elon Musk’s  
25 companies. Applicant contacted the Fremont, California NUMMI plant which Elon Musk had  
26 publicly stated he “had no use for NUMMI”. Applicant had been in negotiations and had arranged  
27 the first request to re-task NUMMI. The Washington DC consulting group: “Eye On Washington”  
28 and CBS News 60 Minutes Producer: Bob Simon, then had communications with Diane Feinstein’s

1 Chief of Staff who threatened Applicant against having anything to do with the NUMMI plant.  
2 Subsequently Elon Musk announced he had stepped back in and was taking over the plant in a  
3 surprise announcement MC'd, in person by Diane Feinstein, whose family was managing the  
4 leasing, hiring and contracting for the NUMMI and next door Solyndra buildings.

5 Applicant had received a Congressional commendation for his work.

6 Subsequently, the FBI discovered ( confirmed via a declassified congressional report) that  
7 Daniel Jones, a former intelligence committee staffer for Sen. Dianne **Feinstein**, hired **Fusion GPS**  
8 and Christopher Steele to push the Russian story and used Fusion GPS, and other services to put hit-  
9 jobs on people for Feinstein. Additionally, the FBI discovered that high level Chinese spies worked  
10 for Feinstein, including driving her around. Fusion GPS, Media Matters, Gawker Media, Gizmodo  
11 Media Google and Youtube were subsequently found to have been hired by “a famous politician” to  
12 operate over \$30M of character assassination reprisal media defamation attacks against Applicant to  
13 punish him for helping law enforcement in these cases. It is well known that Feinstein, Pelosi,  
14 Harris, Reid and other Senators commonly use intelligence agency resources and “dirty tricks” to  
15 attack citizens they are mad at.

16 Applicant was cooperating with agency investigations at this time.

17 Applicant, at this time, discovered that he had been exposed to toxic materials, possibly  
18 intentionally as “political poisoning” (ie: The Salisbury Poisonings and the Alexander Litvinenko  
19 poisoning), as a reprisal tactic, from his work with The U.S. Government and Kaiser laboratories.  
20 Applicant filed for his benefit rights in 2007, which he had full credits for, but political officials  
21 from Senate offices ordered those funds frozen and used intelligence agency dirty tricks to  
22 manipulate and alter government records. The “Solarwinds”, “Supernova”, “Spectre” and hundreds  
23 of other hacks show that the very servers that Applicant’s records were on were, in fact, penetrated.

24 Intelligence agency staffers manipulated Applicant’s filed benefits applications with SSA,  
25 HUD and other agencies, in order to cut off his funds in reprisal for Applicant’s assistance to  
26 corruption investigations.

27 Congressional officials then assisted Applicant and his peers with a first-ever federal anti-  
28 corruption lawsuit. This case set many new legal precedents. Applicant’s team won the lawsuit

1 proving that government agencies “infected by corruption” had manipulated, blockaded and stone-  
2 walled Applicant’s funding.

3 SSA staff and officials from the SSA San Francisco office and the notorious “Mario U” SSA  
4 staff attack against Applicant have shown that some SSA staff ran political reprisals on Applicant.  
5 History has shown that some Bay Area SSA staff since 2007 have gone on to work for politicians in  
6 dispute with Applicant or for ANTIFA-like political activism groups that advocate attacks.

7 Further details in the matter can be viewed at:

9 and

10 <http://american-corruption.com>

11 ... and hundreds of thousands of other public transparency sites.

12  
13 Victim and his peers have aggressively pushed for the creation of an FTC task force to take  
14 on Silicon Valley tech monopolies. They have submitted thousands of pages of reports about  
15 Facebook, Tesla, Paypal and Google monopoly crimes based on data from San Francisco insiders  
16 at, and around, those companies.

17 The Federal Trade Commission has now launched a task force to monitor competition in the  
18 US’s technology markets, commissioners announced. In reaction, the Silicon Valley oligarchs are  
19 attempting every bribe, favor, influence manipulation and delay effort to stall that development.

20 The task force will include current officials working in the agency’s Bureau of Competition  
21 in order to “enhance the Bureau’s focus on technology-related sectors of the economy, including  
22 markets in which online platforms compete.” It will also include 17 staff attorneys who will be  
23 tasked with investigating anti-competitive behavior in the tech industry.

24 “The role of technology in the economy and in our lives grows more important every day,”  
25 FTC Chairman Joe Simons said. “As I’ve noted in the past, it makes sense for us to closely examine  
26 technology markets to ensure consumers benefit from free and fair competition.”

27 “Technology markets ... raise distinct challenges for antitrust enforcement”

28 The new task force comes amid growing pressure for antitrust action against large tech  
companies like Facebook and Google. Earlier this month, it was reported that FTC officials have

1 been looking to levy a multi billion-dollar fine on Facebook for repeatedly violating a privacy  
2 agreement the two bodies came to back in 2011. A coalition of advocacy groups argued that a fine  
3 would not be enough to incentivize Facebook to be more cautious with consumer data and asked the  
4 FTC to force the company spin-offs, Instagram and WhatsApp, back into their own entities once  
5 again. The groups argued that Facebook was too big for it to adequately care for user data for all  
6 three major apps.

7 Discussion over retroactive merger reviews that may result in companies divesting  
8 previously approved assets has been heating up over the last few months. The Democratic-led  
9 House Judiciary Committee has been reportedly beefing up its antitrust arm and hiring on big names  
10 like Lina Khan in the academic sphere.

11 “Technology markets, which are rapidly evolving and touch so many other sectors of the  
12 economy, raise distinct challenges for antitrust enforcement,” said Bureau Director Bruce Hoffman.  
13 “By centralizing our expertise and attention, the new task force will be able to focus on these  
14 markets exclusively – ensuring they are operating pursuant to the antitrust laws, and taking action  
15 where they are not.”

16 Hoffman confirmed that the task force would look into consummated mergers, but could not  
17 name any investigations specifically. When it comes to remedies for problematic mergers, Hoffman  
18 said that firms could be “broken out,” or could be forced to “spin off” previous acquisitions as new  
19 competitors in order to recreate the markets pre-merger.

20 Hoffman said that the task force would be working closely with the FTC’s Consumer  
21 Protection Bureau as it relates to consumer privacy enforcement especially in cases in which these  
22 issues coalesce.

23 “Our ongoing Hearings on Competition and Consumer Protection in the 21st Century are a  
24 crucial step to deepen our understanding of these markets and potential competitive issues. The  
25 Technology Task Force is the next step in that effort,” Simons said in the press release.

26 The Justice Department, which also has antitrust jurisdiction, is aware of the FTC’s new task  
27 force, according to Hoffman, and both agencies will continue to work separately on this front.

28 An alliance of investigators, forensics experts, EU prosecution offices, FBI specialists,

1 journalists, voters and public crowd-sourced volunteers have been campaigning for the arrest,  
2 prosecution, exposure and termination of each and every company, group and individual who  
3 engaged in these crimes and reprisal attacks on those who reported them.

5 1t-hit-from-18-market-meltdown](https://www.usnews.com/news/world/articles/2019-02-27/billionaire-list-shows-1t-hit-from-18-market-meltdown)

6 The biggest problem with the FTC being effective is that the Silicon Valley Mafia have  
7 bribed many FTC officials and placed Silicon Valley lawyers inside the FTC as staff members. On  
8 top of that, over 42 Senators have taken over 120 different kinds of bribes from Silicon Valley and  
9 those Senators influence the FTC to “hold off on any major actions”.

10 In other words, over 50% of the FTC is controlled by the entities they are supposed to  
11 investigate!!!! The fox is running the hen house!

**EXHIBIT 8 - Plaintiffs Demands Details And explanations**

**THE VICTIMS HEREIN DEMAND:**

**HUMAN RIGHTS AND CONSTITUTIONAL RIGHTS DAMAGES PAYMENTS AND REINSTATEMENT OF BLOCKADED RIGHTS!**

**PUNITIVE DAMAGES**

**FULL BENEFITS PAYMENTS FROM 2007 FORWARD BASED ON EARNED BENEFIT RIGHTS FROM 60 HOURS PER WEEK WORK FOR NATIONAL AND COMMUNITY PROJECTS FOR MANY DECADES AND TIMELY FILED DISABLING CONDITIONS CLAIMS THAT WERE BLOCKADED IN REPRISAL FOR WHISTLE-BLOWING**

**WITNESS FEES**

**INFORMANT FEES**

**WHISTLE-BLOWER FEES**

**COMPENSATORY FEES**

**LOSS OF INCOME COMPENSATION INCLUDING BUSINESS INCOME FROM SECURITIES INTERESTS**

**THIS IS ALSO A DEMAND FOR STATE SPONSORED LEGAL COUNSEL AND FINANCIAL SERVICES SUPPORT AND/OR FOR DOJ TO TAKE ON THIS CASE AND REPRESENT Plaintiffs INCLUDING COVERAGE AND COMPENSATION FOR CAUSES OF ACTION INCLUDING: ABUSE OF PROCESS; FTCA VIOLATIONS; ACCOUNT STATED; BREACH OF CONTRACT; CONVERSION; DEFAMATION; FRAUDULENT MISREPRESENTATION; FRAUDULENT CONCEALMENT; INJURIOUS FALSEHOOD, PRODUCT DISPARAGEMENT AND TRADE LIBEL; CIVIL RIGHTS VIOLATIONS AND VIOLATIONS OF THE U.S. CONSTITUTION; MISAPPROPRIATION OF TRADE**

**SECRETS; PRIMA FACIE TORT; QUANTUM MERUIT; TORTIOUS INTERFERENCE INCLUDING a.) Tortious interference with an existing contract, b.) Tortious interference with prospective, c.) Tortious interference with business relations contractual relations; PATENT INFRINGEMENT; PERSONAL INJURY; UNJUST ENRICHMENT; ANTI-TRUST LAW VIOLATIONS; LABOR LAW VIOLATIONS AND OTHER CAUSES.**

**Plaintiffs demand in dollar amount is equal to THREE HOURS OF INCOME of DEFENDANTS.**

"...WE DEMAND PAYMENT FROM The U.S. Government AND THE STATE OF CALIFORNIA FOR OUR DAMAGES, FEES, BACK-PAY AND STATE-CAUSED LOSSES FROM THIS POLITICAL CORRUPTION AND THE RELATED COVER-UP. IF WE DON'T GET OUR MONEY SOON, THE STREISAND EFFECT, THE FEDERAL INVESTIGATIONS, THE DOCUMENTARIES, THE RELEASE OF THE 'INSURANCE POLICY' AND PUBLIC FORENSICS WILL TOTALLY DESTROY EVERY SINGLE POLITICIAN AND TECH OLIGARCH THAT OPERATED THESE CRIMES! THESE ASSHOLES PROBABLY SHOULDN'T HAVE PUT HIT JOBS ON PEOPLE WHO HAVE FRIENDS IN THE CIA, NSA, FBI AND THE 'OTHER' WHITE HOUSE..."

The Victims were specifically and illegally excluded from participation in funding, benefits, jobs and income by major political figures, including U.S. Senators and White House executives who they knew, and those politician's corrupt Silicon Valley oligarch financiers. The tech Cartel and politicians attacked the victims because they would not cooperate with the crooked: sex trafficking, tax evasion, off-shore money laundering, political bribery quid-pro-quo, revolving door payola scams, foreign nation-sponsored domestic manipulations, stock market rigging, internet censorship and search engine manipulation and other crimes. They attacked the victims because they reported the crimes to federal police. They attacked the victims because their products obsoleted the products the Senators owned the stock of (ie: Tesla, Google, Facebook, Netflix are covertly owned by California politicians). They attacked the victims using taPlaintiff 42ayer-funded state resources. That is a felony violation of the law. The ongoing cover-up of these crimes and attacks is also a felony violation of the law. The victims are owed damages compensation, witness

1 fees and back-pay.

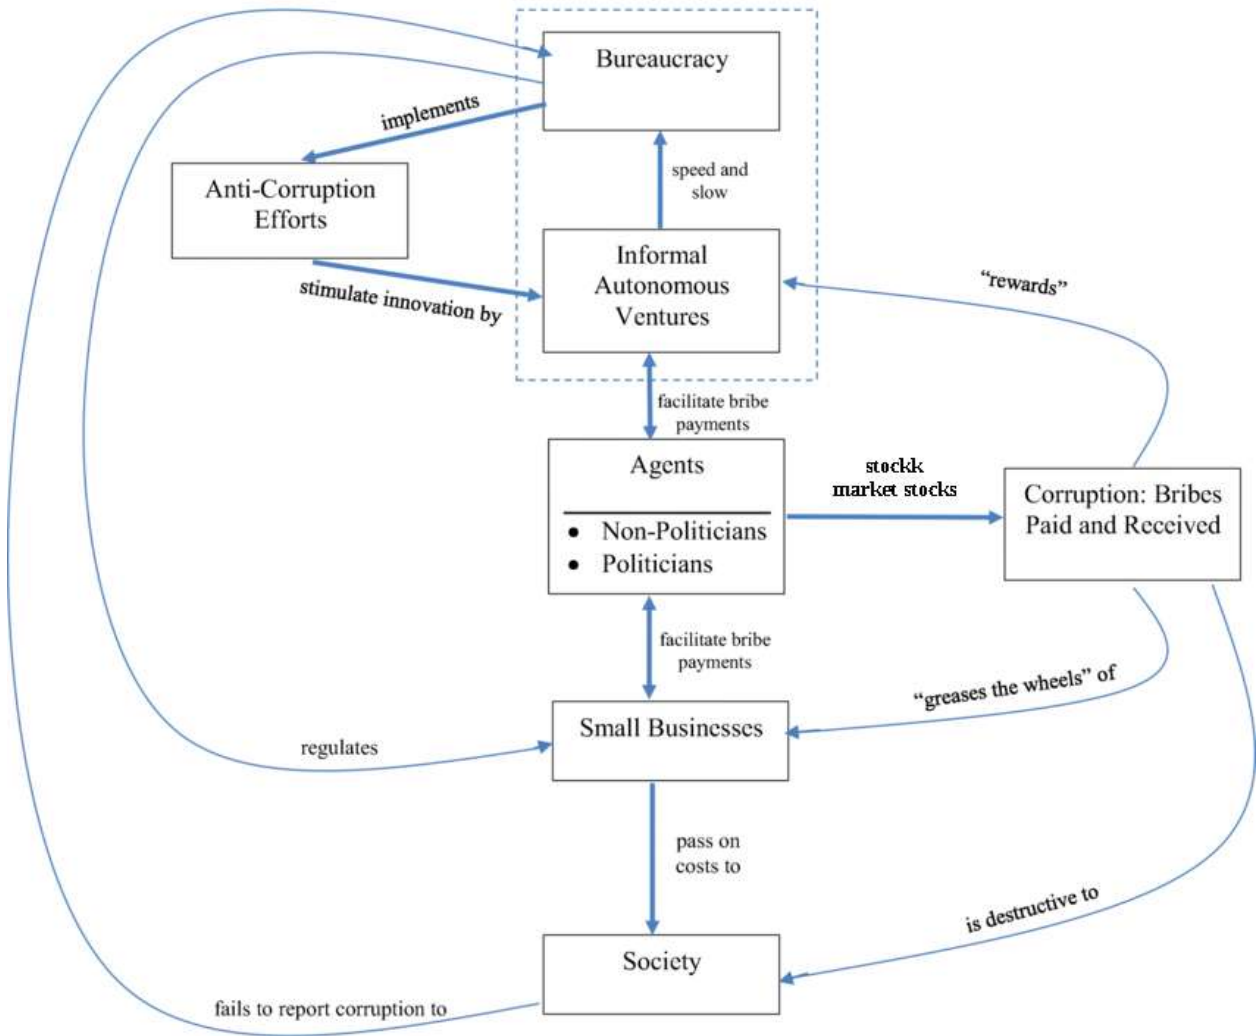

2  
3 Federal investigators have proven (via records-tracking, financial data, surveillance, insider tips,  
4 leaks, etc.) that White House executives, government agency executives (SSA, LSC, GOVT,  
5 USPTO, etc.) and California political bosses, including California U.S. Senators, owned interests in  
6 the victims competitors worth many billions of dollars. Any citizen can confirm these assertions via  
7 public records and the evidence in this report. Those government officials ordered, financed and  
8 executed whistle-blower reprisals and anti-trust violating attacks on the victims using state-  
9 sponsored, taxpayer-funded resources. Using government resources, they engaged in the  
10 illegal reprisal attacks on the victims, as listed in the claim section entitled: “*The Specific Attacks  
11 And Harms Undertaken Against Plaintiffs*”. The government officials manipulated SSA, HHS,  
12 GOVT, USPTO, DOJ, and other agency, payments, funds, benefits and rights in order to harm and  
13 economically damage the victims. They produced and financed a massive media defamation  
14 campaign using their Paypal Mafia-based “Silicon Valley Cartel”. This ‘Cartel’: 1.) finances the  
15 political campaigns of the Senators and the other politicians that own stock in their Silicon Valley  
16 dirty tech companies, 2.) is the competitor of the victims, 3.) shared staff with the named politicians,  
17 4.) is the nearly exclusive beneficiary of policy actions by those politicians, and 5.) has a massive  
18 number of conflict-of-interest relationships with each of the charged politicians. The victims  
19 reported the attackers crimes to the FBI, DOJ, IG and other officials and got attacked for reporting  
20 the crimes, for busting up the organized crime effort and for running companies whose product  
21 technologies obsoleted those of the tech Cartel. The victims are claiming their rights to their  
22 damages and fee compensation, but those same public figures have blocked them from an equitable  
23 jury trial to address the matter.

1 **EXHIBIT 9 - The Retaliation Attacks**

2  
3 **The Hired Attack Services And Hit-Job Contracting**

4 **Parties:**

5 When you enter these names in any major law enforcement or intelligence agency database  
6 forensic comparative-connection analysis software (ie XKEYSCORE), you find that they all narrow  
7 back to the same organized political crime network. The attackers hired, paid, commanded and  
8 controlled the attack services: Gawker Media, Gizmodo Media, Google, YouTube, Media Matters,  
9 Black Box, Fusion GPS, Black Cube, PsyOps, Shareblue, and other brands and used them to  
10 operate retaliation attacks against Plaintiffs and to manipulate government agency procedures  
11 against Plaintiffs in revenge/reprisal procedures.

12 **Officials Manipulated Social Security Money To Retaliate Against Whistle-Blowers**

13 Nancy Pelosi and her staff, Dianne Feinstein and her staff, Barack Obama and his staff,  
14 former CIA boss Robert James "Jim" Woolsey Jr and his staff; and over 100 other public officials,  
15 have the spy agency-type tools, resources, will and past experience to manipulate any HUD or  
16 Social Security decision against any citizen that they place on a ‘black-list’ or ‘hit-list’ in reprisal  
17 for competing with them or whistle-blowing on them. Per the evidence below:

18 Social Security, SSI, SDI, Disability and other earned benefits were stone-walled.

19 Applications for benefits for the Plaintiffs were intentionally “lost” like a “Lois Lerner hard  
20 drive”. Files in the application process “disappeared”. A U.S. Senator ordered Plaintiffs  
21 benefits to “never be approved” even though Plaintiffs worked 60 hour+ weeks for decades  
22 in service to their nation and their community. A SSA official in the local SSA office, who  
23 had a devout expressed hatred against one United States President ordered a benefits  
24 blockade against Plaintiffs because he found out that Plaintiffs ex-lawyer now worked in the  
25 White House. Forensic evidence and backgrounders on every person who worked on, or had  
26 access to, Applicants files, records, benefits decisions and related data sets shows that a  
27 number of those employees and contractors were members, financiers, web promoters or  
28 supporters of ANTIFA anarchy groups or KKK or Proud Boys related political activist-type

groups. In San Francisco and Marin Counties SSA offices, in employees workspaces and on their Facebook and MySpace sites, many employees proudly display pictures of themselves wearing their pink "pussy hats", black riot gear and sporting political tattoos. FBI records and IG investigations show that SSA has the highest percentage of political activist employees of any federal agency. Such persons are inclined to become drunk with power when allowed access to the trillions of dollars of government technology on the SSA file and decisions systems. A number of these persons have worked for, or with, U.S. Senators and other politicians who targeted Applicant in political reprisal. At least 3 persons in the San Francisco SSA office, at least 2 persons in the San Mateo SSA office and at least 2 persons in Marin SSA office are known to have engaged in such actions. Applicants funding and benefits were manipulated, so as to harm Applicant, as political reprisal as vendetta for his provision of testimony to federal investigators in a trillion dollar political corruption matter involving famous political figures featured in global news coverage. A vast number of agency abuse cases and lawsuits are now on public record in the Inspector General's offices and federal courts. It is an indisputable fact that some government agencies run "hit-jobs" on citizens on orders from certain corrupt politicians.

These actions are felony violations of the law. Federal and State Agencies including SSA, FEC, GOVT, HHS, VA, CIA, HUD, SA, SEC, FBI, DOJ and many others, have been charged, and found guilty, in these crimes against citizens. In the Congressional investigation published by the United States Congress in review of the U.S. Department of Energy LGP/ATVM programs, it is clearly proven that the U.S. Department of Energy was used as a slush-fund by some GOVT executives in order to pay off campaign financiers by attacking and sabotaging their competitors. The GOVT Paducah Gaseous Diffusion Plant under contracts with The U.S. Government and the government-owned U.S. Enrichment Corp paid \$5M whistle-blower awards to those whistle-blowers who were attacked, using government agency resources, for reporting a crime. Dept. of Energy Hanford URS has agreed to settle a lawsuit brought by former employee Walter Tamosaitis for \$4.1 million. The settlement in the whistle-blower case comes almost one year before the case was set for

1 a jury trial in federal court in Richland and compensates Tamosaitis for attacks against him,  
2 by GOVT officials, in retribution for reporting a crime. VA officials attacked hundreds of  
3 citizens who reported corruption, ie:

4 [https://www.thenewamerican.com/usnews/health-care/item/18610-va-whistleblowers-](https://www.thenewamerican.com/usnews/health-care/item/18610-va-whistleblowers-facing-retribution)  
5 [facing-retribution](https://www.thenewamerican.com/usnews/health-care/item/18610-va-whistleblowers-facing-retribution). As shown in this report: [https://www.pogo.org/analysis/2018/08/new-](https://www.pogo.org/analysis/2018/08/new-report-confirms-whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-affairs/)

6 [report-confirms-whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-](https://www.pogo.org/analysis/2018/08/new-report-confirms-whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-affairs/)  
7 [affairs/](https://www.pogo.org/analysis/2018/08/new-report-confirms-whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-affairs/), Agencies attack often and harshly. CIA and NSA executives have been widely  
8 shown to use spy tools to attack domestic citizens they don't like, ie:

9 [https://www.dailymail.co.uk/news/article-2435011/NSA-employees-used-phone-tapping-](https://www.dailymail.co.uk/news/article-2435011/NSA-employees-used-phone-tapping-tools-spy-girlfriends-cheating-husbands.html)  
10 [tools-spy-girlfriends-cheating-husbands.html](https://www.dailymail.co.uk/news/article-2435011/NSA-employees-used-phone-tapping-tools-spy-girlfriends-cheating-husbands.html) , and hundreds of other news links that can be  
11 provided. Elon Musk and Tesla, as well as Eric Schmidt and Larry Page at Google, have  
12 been proven to use the CIA group: IN-Q-TEL, to run government sponsored/financed  
13 attacks on business competitors. In Civil Action No. 1:13-cv-00777-RBW GOVERNMENT  
14 AGENCIES WERE CAUGHT BEING USED FOR ATTACKS AGAINST CITIZENS  
15 AND PUNISHED IN THE COURT AND THE MEDIA! The IRS, and hordes of other  
16 government agencies have been caught and proven, IN COURT, to target and attack people  
17 for presumed political differences.

18 Why should we assume that the Social Security Administration is not ALSO doing this too  
19 to harm citizens who speak out? The Lois Lerner IRS attacks took many years to resolve. In  
20 an unprecedented victorious conclusion to a four year-long legal battle against the IRS, the  
21 bureaucratic agency admitted in federal court that it wrongfully targeted citizens, during the  
22 Obama Administration, because of their political viewpoints and issued an apology to those  
23 people for doing so. In addition, the IRS is consenting to a court order that would prohibit it  
24 from ever engaging in this form of unconstitutional discrimination in the future. In a  
25 proposed Consent Order filed with the Court, the IRS has apologized for its treatment of  
26 U.S. citizens including organizations from 20 states that applied for 501(c)(3) and (c)(4) tax-  
27 exempt status with the IRS between 2009 and 2012 -- during the tax-exempt determinations  
28 process. Crucially, following years of denial by the IRS and blame-shifting by IRS officials,

the agency now ePlaintiff 42ressly admits that its treatment of our clients was wrong and a total violation of our Democracy. As set forth in the proposed Order: “The IRS admits that its treatment of Plaintiffs during the tax-exempt determinations process, including screening their applications based on their names or policy positions, subjecting those applications to heightened scrutiny and inordinate delays, and demanding of some Plaintiffs’ information that TIGTA determined was unnecessary to the agency’s determination of their tax-exempt status, was wrong.

For such treatment, the IRS ePlaintiff 42resses its sincere apology.” Throughout litigation of this case, activists have remained committed to protecting the rights of the public who faced unlawful and discriminatory action by the IRS and other agencies. The objective from the very beginning has been to hold agencies accountable for corrupt practices.

This Consent Order represents a historic victory for the public and sends the unequivocal message that a government agency’s targeting of citizens organizations, or any organization, on the basis of political viewpoints, will never be tolerated and that revenge will be swift and vast. The Order will put an end, once and for all, to the abhorrent practices utilized against citizens, as the agreement includes the IRS’s ePlaintiff 42ress acknowledgment of – and apology for – its wrongful treatment of the public. While this agreement is designed to prevent any such practices from occurring again, rest assured that all public interest lawyers will remain vigilant to ensure that the IRS, SSA, DOJ or SEC does not resort to such tactics in the future. Per detailed reports, in March of 2012 lawyers began being contacted by literally dozens of citizens and groups who were being harassed by the Obama IRS after submitting applications for tax-exempt status. Their tax-exempt applications were held up for years (over seven years in some cases), and they began receiving obtrusive and unconstitutional requests for donor and member information. That began a now more than five and a half year fight with the burgeoning bureaucracy at the IRS. Then on May 10, 2013, Lois Lerner, the then head of the IRS Tax Exempt Organizations Division, publicly implicated the IRS in one of the worst political targeting scandals of the century.

This is an extraordinary victory against government agency abuse. It sends a powerful warning to the deep state bureaucracy that it will not be allowed to violate the Constitution in order to silence and shut down the whistle-blowers. In addition to the IRS’s admissions of and apology for its wrongful conduct, the Consent Order would specifically award Plaintiffs the following: - A declaration by the Court that it is wrong to apply the United States tax code to any tax-exempt applicant or entity based solely on such entity’s name, any lawful positions it espouses on any issues, or its associations or perceived associations with a particular political movement, position or viewpoint; - A declaration by the Court that any action or inaction taken by the IRS must be applied evenhandedly and not based solely on a tax-exempt applicant or entity’s name, political viewpoint, or associations or perceived associations with a particular political movement, position or viewpoint; and - A declaration by the Court that discrimination on the basis of political viewpoint in administering the United States tax code violates fundamental First Amendment rights.

Disparate treatment of taxpayers based solely on the taxpayers’ names, any lawful positions the taxpayers espouse on any issues, or the taxpayers’ associations or perceived associations with a particular political movement, position or viewpoint is unlawful. In the Order, the IRS has also agreed that (unless ePlaintiff 42ressly required by law) certain actions against the Plaintiffs– i.e. the sharing, dissemination, or other use of information unnecessarily obtained by the IRS during the determinations process (such as donor names, the names of volunteers, political affiliations of an organization’s officers, etc.) – would be unlawful. In addition, the IRS promises not to take any retaliatory action against our clients for ePlaintiff 42osing the targeting scheme. Finally, and of crucial significance, the IRS admits it targeted persons and groups based on their viewpoints (i.e., “policy positions”) and that such viewpoint discrimination violates fundamental First Amendment rights. This is the first time the IRS has admitted that its targeting scheme was not just “inappropriate” – as TIGTA found – but, as alleged, blatantly unconstitutional.

To ensure consistency and uniformity within the agency’s operations going forward, the IRS

is required, pursuant to the Order, to inform all employees within the Exempt Organizations Division, as well as the Commissioners and Deputy Commissioners within other divisions, of the Order’s terms. This Order not only validates allegations about their treatment at the hands of the corrupt Obama-era IRS but also provides important assurances to the American public that the agency understands its obligation to refrain from further such discriminatory conduct. As Attorney General Sessions acknowledged in this regard, “[t]here is no excuse for [the IRS’s] conduct,” as it is “without question” that the First Amendment prohibits the conduct that occurred here, i.e., subjecting American citizens to disparate treatment “based solely on their viewpoint or ideology.” Sessions further confirmed his Department’s commitment to ensuring that the “abuse of power” in which the IRS engaged here “will not be tolerated.” It is impossible to overstate the importance of this victory.

This marks a years-long fight for justice in defense of the constitutional rights of the public. This is an extraordinary victory against abuse of power and corruption. It sends a powerful warning to the deep state bureaucracy that it will not be allowed to violate the Constitution and manipulate the IRS, SSA and other agencies in order to silence and shut down those who speak out about political corruption crimes. In the wake of Wisconsin Watchdog’s investigation into SSA staff allegations of incompetence, misconduct, and retaliation in Social Security disability appeals offices, several employees have taken their complaints to a Senate committee led by Wisconsin Sen. Ron Johnson.

An official with knowledge of the complaints said the Senate Homeland Security and Governmental Affairs Committee, chaired by the Oshkosh Republican, has received emails and other contacts from “certain people” inside the Social Security Administration’s Office of Disability Adjudication and Review. The initial complaints came from an employee inside the Milwaukee office following Wisconsin Watchdog’s opening investigative report that found some claimants waiting more than 1,000 days for an appeals decision on their disability benefits claim. Following Wednesday’s story of a whistle-blower in the Madison ODAR office, the committee has received more specific complaints about retaliation against

1 employees, the source said. Committee staff members sent the latest Watchdog piece to SSA  
2 administrators hoping they will “cooperate,” the source said. To date, the agency has been  
3 less than cooperative. “This is an ongoing process, and they are not always as forthcoming  
4 as we’d like them to be,” the source said. “Hopefully with your continued reporting, this is  
5 an issue they can’t duck.” A Senate committee member said officials there are working with  
6 the Office of Special Counsel on “multiple whistle-blower retaliation claims.” The  
7 committee continues to request information from the SSA. The whistle-blower in the  
8 Madison office claims management retaliated against her after she was called to testify in a  
9 misconduct case.

10 The incident involved “inappropriate behavior” by an administrative law judge, she said.  
11 “They are so corrupt. It’s absolutely horrible,” said the woman, a lead case technician in the  
12 Madison Office of Disability Adjudication and Review. She spoke on condition of  
13 anonymity, fearing more retribution from her supervisors. While she said recounting her  
14 particular experiences will more than likely betray her identity anyway, the ODAR case  
15 worker insisted she has had enough. “I’m at point where they don’t care about me, I don’t  
16 see why I’m protecting them. This is my last resort,” she said. “I want to do my work  
17 without fear of retaliation.” She said she has contacted the Senate committee. “I forwarded  
18 my information to them and I got an email back from them. See these reports:

assistant in the Milwaukee ODAR office, alleges he has been retaliated against by supervisors for going public with his charges of incompetence and misconduct in the agency. The federal employee, who has worked for SSA for 16 years, provided Wisconsin Watchdog with documents showing extremely long wait times for claimants appealing their denied applications for benefits. Doug Nguyen, SSA regional spokesman, in a previous story said the agency acknowledges that Milwaukee ODAR has a “high average processing time for disability appeal hearings, and we are working to address the issue.” Beyond the delays is what Klym calls the “shell game,” the wholesale transferring of cases to other parts of the country by administrators to make the Milwaukee office’s numbers look better than they are. The Madison office whistle-blower confirmed Klym’s allegations, saying at one point she saw 2,000 cases from the Milwaukee office handed off to the Oak Brook operation. There are over 10,000 SSA disability manipulation charges against SSA executives and staff.

**EXHIBIT 10 – Court Demand For FBI ‘302 Reports’ On Each Attacker**

Demand for FBI 302 reports on the following identified attackers has been hereby submitted to the FBI. The FBI and FINCEN have been requested to interview and engage in surveillance upon these individuals who engaged with organizations who transferred funds abroad and who sought to subvert public policy. The investigation of each should include NSA recordings known to exist, for each, from 2005 to date. Conclusions from those 302 interviews and investigations should be directed to accurately answering investigation parameters including:

1. Who had command and control of the attackers actions against Plaintiffs?
2. How were the attackers compensated?
3. How did each attacker first hear of the existence of Plaintiffs?
4. Identify each party who edited, reviewed, or consulted with the work product of each attacker?
5. What was the quid pro quo with clicks, advertising exposure, blog postings and web metrics?
6. Did any attacker pose as a third party to write their own blog comments under an assumed name? Which postings?
7. Who paid for the animated attack video production and which studio edited and sound produced the content?
8. Produce each email communication that went to, from or CC to any party at Google, Youtube, Alphabet or their subsidiaries? Submissions will be cross-referenced with NSA archives.
10. Provide all attackers, and their families, banking, bitcoin, Paypal, credit card and tax records from 2005 to date.
11. In addition to orders from your superiors, when did you first, otherwise, hear of Plaintiffs?
12. Why did you avoid ever giving Plaintiffs a chance to review, comment on or correct any material prior to publication?
13. Why did your release of the attack media only occur via your outlets, and via no other outlet on Earth, at exactly the same time?
14. In Presidential elections, how much money, and other compensation, did your office pay, or receive, in order to operate these same kinds of attacks against an opposition candidate?

**THE ATTACKERS. REPORTED TO FBI, DOJ AND POLICE**

**THE VICTIM'S HAVE DEDICATED ALL AVAILABLE RESOURCES TO PLACING THEM UNDER SURVEILLANCE AND LAW ENFORCEMENT MONITORING FOR THE REST OF THEIR LIVES. EVERY ILLICIT SEX, DRUG, TAX, REAL ESTATE, POLITICAL FINANCE AND OTHER ACT IS DOCUMENTED AND REPORTED.THE TARGETS ALL SHARE FINANCIAL BENEFITS, COMMUNICATIONS, COMMAND/CONTROL, MOTIVATION, OPPORTUNITY, UNJUST REWARDS AND OTHER TRACKING METRICS.**

**EXHIBIT 11 - These Are The Hired Attackers**

1 The Courts and Congressional hearings have proven that White House, U.S. Senators and  
2 their ex-CIA and Ex-FBI operatives have been proven to have used SSA and other government  
3 agencies, over and over again, to harm witnesses, reporters and whistle-blowers in illegal retribution  
4 attacks. Applicant's own Senators have been caught doing this over and over in order to protect  
5 their stock market ownership in Tesla Motors, see:

6 [http://focus-book.com/public/THE\\_ELON\\_MUSK\\_STORY.m4v](http://focus-book.com/public/THE_ELON_MUSK_STORY.m4v)

7 [http://newsplus007.com/public/THE\\_ELON\\_MUSK\\_STORY.m4v](http://newsplus007.com/public/THE_ELON_MUSK_STORY.m4v)

8 ... available on many streaming video sites.

9 Some government agencies have avoided any and all responsive replies to the Applicant, or  
10 his advocates, due to the political and media embarrassment involved for some of their staff. That  
11 non-responsive, generic reply, stone-walling effort can no longer be tolerated.

12 Since 2008 when Applicant raised these issues, over 100 government staff have been fired,  
13 the FBI Director and Attorney General involved in this case were fired, 60 Minutes and hundreds of  
14 other newscasts have covered this issue and there is no end in sight of investigations against  
15 government officials who engaged in reprisal and vendettas against Applicant simply because he  
16 did the right thin and assisted Congress and the FBI. Numerous books and films about this matter  
17 are now distributed globally. It is not rational for government officials to allow this matter to fester.

18 This natural-born American citizen ( *Witness2021B* ) was attacked with a \$30 million  
19 dollar+ retribution/political-reprisal/revange hatchet-job program. The cost of the attack is proven  
20 by bank records, payments and comparative analysis of hit-jobs run by political candidates against  
21 each other.

22 The "hit-job" was contracted by White House and Department of Energy political  
23 operatives, their appointees and staffing. Those public officials illegally used taPlaintiff 42ayer-  
24 financed government funds. They were also business competitors the witness.. They are mad  
25 because they got caught doing crimes with taxpayerfunds and the witness assisted with their  
26 interdiction. Thousands of similar attacks, on other citizens, have now been widely covered in major  
27 news stories and court cases. It is now impossible to deny that such attacks exist on a regular basis.

28 Reprisal attacks are SOP in DC!

1 The victim and his associates made legal history by helping the government sue itself for  
2 corruption. Their energy investment group won their federal lawsuit case proving that: **public**  
3 **agencies infected with corruption manipulate policy against those who report corruption**  
4 **and/or their competitors.**

5 Since that case, many other cases have been won by other victims who proved the same  
6 assertion. There is, now, no legal or historical-fact question about the veracity of the proof that  
7 public officials put "hit-jobs" on reporters, whistle-blowers or competitors using government  
8 resources to do so. In fact, today, the U.S. Congress is spending nearly a third of it's time on the  
9 question of agencies being used as reprisal operations.

10 A large number of well-known public officials were removed from their government  
11 positions because of their illicit deeds, exposed in these cases. Plaintiffs/Applicant's files were  
12 hacked by government-paid hackers. In particular, the employees and contractors of United States  
13 senators and White House executives hired these hackers via layered contracting routes.

14 Additionally, Federal prosecutors in Manhattan determined that FBI employees — three  
15 analysts and an agent — were able to view citizens private material because it was entered in  
16 Silicon Valley's Palantir software through the program's default settings. "When data is loaded onto  
17 the Platform, the default setting is to permit access to the data to other FBI personnel otherwise  
18 authorized to access the Platform," prosecutors wrote in a published court letter. It has been  
19 discovered that many Palantir staff can look at those records and re-sell that data to Google, Tesla  
20 or any third party. Plaintiffs records have been seen in the easy-to-interdict Palantir system.

21 In our communication with agencies, some of those agencies provided links to their entire  
22 server files which exposed the names, addresses, phone numbers, poverty status, emails and other  
23 records of their clients. They also exposed direct server access for hackers to easily ePlaintiff 42loit.  
24 We have informed each agency and they have now deleted the materials but other agency systems  
25 are known to be at risk and we do not have the resources to address them all.

26 Whereas, numerous Congressional reports, IT staff reports and security industry reports  
27 have verified that agency servers and files, including those upon which Plaintiffs records were  
28 housed, have been hacked, moved, deleted and edited by outside third parties including Chinese and

1 Russian hackers, bored teens and hired opposition research operatives and that the hardware level  
2 back-doors for SPECTRE and many other incursion sets still exist in agency Cisco, Intel, Juniper  
3 Networks and other Network devices now connected to government file networks at GOVT, SSA,  
4 FEC, and other agencies and this fact is indisputable. At the very least, China, Russian or Brazilian  
5 teen hackers have them up for sale on the Dark Web. The NSA certainly has copies of them.

6 Further: [https://arstechnica.com/information-technology/2021/07/an-ePlaintiff-42losive-  
7 spyware-report-shows-limits-of-ios-android-security/](https://arstechnica.com/information-technology/2021/07/an-ePlaintiff-42losive-spyware-report-shows-limits-of-ios-android-security/)

8 FOR THE RECORD:

9 Per the FBI, DOJ, FCC and Congressional investigators:

10 It is widely verified by the U.S. DOJ that hackers such as Wang Dong, Sun Kailiang, Wen  
11 Xinyu, Huang Zhenyu, and Gu Chunhui, who were officers in Unit 61398 of the Third Department  
12 of the Chinese People’s Liberation Army (PLA) and Aleksei Sergeyeovich Morenets, 41, Evgenii  
13 Mikhaylovich, Serebriakov, 37, Ivan Sergeyeovich Yermakov, 32, Artem Andreyevich Malyshev,  
14 30, and Dmitriy Sergeyeovich Badin, 27, who were each assigned to Military Unit 26165, and Oleg  
15 Mikhaylovich Sotnikov, 46, and Alexey Valerevich Minin, 46, who were also GRU officers, and  
16 hackers-for-hire including Kevin David Mitnick, Adrian Lamo, Albert Gonzalez, Matthew Bevan,  
17 Richard Pryce, Jeanson James Ancheta, Michael Calce, Kevin Poulsen, Jonathan James, The hacker  
18 known as ASTRA, The hacker known as GUCIFER, The hacker known as ANON 4CHAN and  
19 THOUSANDS of other individuals had free access and free reign throughout NSA, FBI, SSA, HUD,  
20 DOJ, OPM, CIA and other government servers via the SPECTRE, EMOTET, PRIME ROOTKIT,  
21 SERCOMM BACKDOOR, NOTPETYA, MELTDOWN, MASTERKEY, RYZENFALL,  
22 FALLOUT, CHIMERA, and hundreds of other back doors and penetration vulnerabilities in Cisco,  
23 Intel, Juniper Networks, AMD, and other equipment. Additionally, all of the core server penetration  
24 tools used by the CIA and the NSA were hacked by foreign nations and their core source code  
25 posted on the internet for all to use. On July 27, 2021 this was disclosed:

26 [https://news.sky.com/story/irans-secret-cyber-files-on-how-cargo-ships-and-petrol-stations-could-  
27 be-attacked-12364871](https://news.sky.com/story/irans-secret-cyber-files-on-how-cargo-ships-and-petrol-stations-could-be-attacked-12364871)

28 It is ludicrous for any agency to state that any government servers, prior to 2020, were not

1 widely penetrated and manipulated. The hackers are all known to have sold, or provided the results  
2 of their work to famous politicians for use against their competitors.

3 Nancy Pelosi is an owner of the hacking manipulation firm: CROWDSTRIKE. Crowdstrike  
4 and famous California Senators had the easy means, the motivations, the staffing, the resources and  
5 the known engagement of services to manipulate SSA, DOJ, SEC, FTC and other agency decisions  
6 and filing records in order to harm Plaintiffs, reporters and whistle-blowers who reported their  
7 crimes and corruptions.

8 Reports such as:

14 ...prove that, for example, Nancy Pelosi owns digital attack services.

15 Reports such as:

16 [https://www.msn.com/en-us/news/politics/feinstein-s-former-staffer-helped-funnel-  
17 millions-to-steele-and-fusion-gps-after-2016/ar-BB1gBzxQ](https://www.msn.com/en-us/news/politics/feinstein-s-former-staffer-helped-funnel-millions-to-steele-and-fusion-gps-after-2016/ar-BB1gBzxQ)

18 and

19 <https://dailycaller.com/2019/11/07/feinstein-fusion-gps-steele/>

20 ... and thousands of other reports prove that Dianne Feinstein's staff regularly hire hit-job  
21 services. Those services have been proven by the FBI, DOJ and JSOC to regularly hire hackers.

22 The hackers, daily, use the common tools of:

23 A. Injection. Injection flaws, such as SQL, NoSQL, OS, and LDAP injection, occur when  
24 untrusted data is sent to an interpreter as part of a command or query. The attacker's hostile data can  
25 trick the interpreter into executing unintended commands or accessing data without proper  
26 authorization.

27 B. Broken Authentication. Application functions related to authentication and session  
28 management are often implemented incorrectly, allowing attackers to compromise passwords, keys,

1 or session tokens, or to ePlaintiff 42loit other implementation flaws to assume other users' identities  
2 temporarily or permanently.

3 C. Sensitive Data exposure. Many web applications and APIs do not properly protect  
4 sensitive data, such as financial, healthcare, and PII. Attackers may steal or modify such weakly  
5 protected data to conduct credit card fraud, identity theft, or other crimes. Sensitive data may be  
6 compromised without extra protection, such as encryption at rest or in transit, and requires special  
7 precautions when exchanged with the browser.

8 D. XML External Entities (XXE). Many older or poorly configured XML processors  
9 evaluate external entity references within XML documents. External entities can be used to disclose  
10 internal files using the file URI handler, internal file shares, internal port scanning, remote code  
11 execution, and denial of service attacks.

12 E. Broken Access Control. Restrictions on what authenticated users are allowed to do are  
13 often not properly enforced. Attackers can ePlaintiff 42loit these flaws to access unauthorized  
14 functionality and/or data, such as access other users' accounts, view sensitive files, modify other  
15 users' data, change access rights, etc.

16 F. Security Misconfiguration. Security misconfiguration is the most commonly seen issue.  
17 This is commonly a result of insecure default configurations, incomplete or ad hoc configurations,  
18 open cloud storage, misconfigured HTTP headers, and verbose error messages containing sensitive  
19 information. Not only must all operating systems, frameworks, libraries, and applications be  
20 securely configured, but they must be patched/upgraded in a timely fashion.

21 G. Cross-Site Scripting XSS. XSS flaws occur whenever an application includes untrusted  
22 data in a new web page without proper validation or escaping, or updates an existing web page with  
23 user-supplied data using a browser API that can create HTML or JavaScript. XSS allows attackers  
24 to execute scripts in the victim's browser which can hijack user sessions, deface web sites, or  
25 redirect the user to malicious sites.

26 H. Insecure Deserialization. Insecure deserialization often leads to remote code execution.  
27 Even if deserialization flaws do not result in remote code execution, they can be used to perform  
28 attacks, including replay attacks, injection attacks, and privilege escalation attacks.

1 I. Using Components with Known Vulnerabilities. Components, such as libraries,  
2 frameworks, and other software modules, run with the same privileges as the application. If a  
3 vulnerable component is exploited, such an attack can facilitate serious data loss or server  
4 takeover. Applications and APIs using components with known vulnerabilities may undermine  
5 application defenses and enable various attacks and impacts.

6 J. Insufficient Logging & Monitoring. Insufficient logging and monitoring, coupled with  
7 missing or ineffective integration with incident response, allows attackers to further attack systems,  
8 maintain persistence, pivot to more systems, and tamper, extract, or destroy data. Most breach  
9 studies show time to detect a breach is over 200 days, typically detected by external parties rather  
10 than internal processes or monitoring.

11 We have provided reports, evidence and time to investigate and assist in interviews to the  
12 FBI, GAO, SEC and other Congressional and agency assets. The investigations have found that  
13 famous senators, their Silicon Valley oligarch financiers and their associates run a felony-class  
14 organized crime insider-trading scam that abuses taxpayers and sabotages competing businesses at  
15 the expense of the public treasuries.

16 ***Imagine living in a world where almost every one of the public officials that were***  
17 ***supposed to help you turned out to be your business competitors. Imagine having them use***  
18 ***government resources to profit at your expense, blockade you and treat democracy like a garage***  
19 ***sale!***

20 This is about a group of U.S. Senators, Silicon Valley Oligarchs, Crooked Law Firms and  
21 Lobbyists who commit crimes in order to manipulate over a trillion tax dollars into their, and their  
22 friends pockets. They use media monopoly tricks to try to shut out any other viewpoints. They push  
23 manufactured "emotional trigger" issues that they believe will get more tax money allocated to  
24 "issue solutions" that they, and their friends, happen to already own the monopolies for. They are  
25 felons yet they control some of the offices of the agencies who are supposed to arrest them. Silicon  
26 Valley bought K Street lobby firms and U.S. Senators, gave them more 'Dark Money' than history  
27 has ever seen and then had giant tech-law firms bribe, hit-job and blockade any attempts to arrest  
28 them.

1 The U.S. Government hired victim, paid him part of the offered money, then asked him to  
2 spend his life savings and years of his time on THEIR federal project based on their lies and false-  
3 promises.

4 He was defrauded by the government assertions!

5 Then the government took the assets victim were asked to invest, plus the money they owed  
6 him, and gave it to their friends. When he and his associates complained to the FBI, Congress and  
7 the SEC, they hired Fusion GPS-like companies to run "hit-jobs" on him and threaten his life.

8 The Victim was lied to and defrauded by government agencies.

9 Government officials took the money they had promised him and gave it to their friends,  
10 who are competitors to the victim.

11 The government used him, and his peers, as a smoke-screen to hide their crony payola crime  
12 that put taxpayercash in their crony friend's pockets.

13 Victim has received ZERO justice and ZERO compensation for his damages, his time, his  
14 witness testimony and his help provided to the authorities!

15 The Victim **demands** recompense **money from the State And Federal authorities!**

16 **One Of Their Attack Procedures - Documented**

17 Here is just one of the ways Google and the DNC's Nick Denton attack tabloids (Gawker,  
18 Gizmodo, Jalopnik, etc.) partnered to attack whistle-blowers under orders from Senators Boxer,  
19 Pelosi Feinstein, Reid, Harris and others.

20 ROBERT EPSTEIN hereby verifies the following:

21 Authorities in the UK have finally figured out that fake news stories and Russian-placed ads  
22 are not the real problem. The UK Parliament is about to impose stiff penalties—not on the people  
23 who place the ads or write the stories, but on the Big Tech platforms that determine which ads and  
24 stories people actually see.

25 Parliament's plans will almost surely be energized by the latest leak of damning material  
26 from inside Google's fortress of secrecy: The Wall Street Journal recently reported on emails  
27 exchanged among Google employees in January 2017 in which they strategized about how to alter  
28 Google search results and other "ephemeral experiences" to counter President Donald Trump's

1 newly imposed travel ban. The company claims that none of these plans was ever implemented, but  
2 who knows?

3 While U.S. authorities have merely held hearings, EU authorities have taken dramatic steps  
4 in recent years to limit the powers of Big Tech, most recently with a comprehensive law that  
5 protects user privacy—the General Data Protection Regulation—and a whopping \$5.1 billion fine  
6 against Google for monopolistic practices in the mobile device market. Last year, the European  
7 Union also levied a \$2.7 billion fine against Google for filtering and ordering search results in a  
8 way that favored their own products and services. That filtering and ordering, it turns out, is of  
9 crucial importance.

10 As years of research I’ve been conducting on online influence has shown, content per se is  
11 not the real threat these days; what really matters is (a) which content is selected for users to see,  
12 and (b) the way that content is ordered in search results, search suggestions, news feeds, message  
13 feeds, comment lists, and so on. That’s where the power lies to shift opinions, purchases, and votes,  
14 and that power is held by a disturbingly small group of people.

15 I say “these days” because the explosive growth of a handful of massive platforms  
16 on the internet—the largest, by far, being Google and the next largest being Facebook—has  
17 changed everything. Millions of people and organizations are constantly trying to get their content  
18 in front of our eyes, but for more than 2.5 billion people around the world—soon to be more than 4  
19 billion—the responsibility for what algorithms do should always lie with the people who wrote the  
20 algorithms and the companies that deployed them.

21 In randomized, controlled, peer-reviewed research I’ve conducted with thousands of people,  
22 I’ve shown repeatedly that when people are undecided, I can shift their opinions on just about any  
23 topic just by changing how I filter and order the information I show them. I’ve also shown that  
24 when, in multiple searches, I show people more and more information that favors one candidate, I  
25 can shift opinions even farther. Even more disturbing, I can do these things in ways that are  
26 completely invisible to people and in ways that don’t leave paper trails for authorities to trace.

27 Worse still, these new forms of influence often rely on ephemeral content—information that  
28 is generated on the fly by an algorithm and then disappears forever, which means that it would be

1 difficult, if not impossible, for authorities to reconstruct. If, on Election Day this coming November,  
2 Mark Zuckerberg decides to broadcast go-out-and-vote reminders mainly to members of one  
3 political party, how would we be able to detect such a manipulation? If we can't detect it, how  
4 would we be able to reduce its impact? And how, days or weeks later, would we be able to turn  
5 back the clock to see what happened?

6 Of course, companies like Google and Facebook emphatically reject the idea that their  
7 search and newsfeed algorithms are being tweaked in ways that could meddle in elections. Doing so  
8 would undermine the public's trust in their companies, spokespeople have said. They insist that  
9 their algorithms are complicated, constantly changing, and subject to the "organic" activity of users.

10 This is, of course, sheer nonsense. Google can adjust its algorithms to favor any candidate it  
11 chooses no matter what the activity of users might be, just as easily as I do in my ePlaintiff  
12 experiments. As legal scholar Frank Pasquale noted in his recent book "The Black Box Society,"  
13 blaming algorithms just doesn't cut it; the responsibility for what an algorithm does should always  
14 lie with the people who wrote the algorithm and the companies that deployed the algorithm. Alan  
15 Murray, president of Fortune, recently framed the issue this way: "Rule one in the Age of AI:  
16 Humans remain accountable for decisions, even when made by machines."

17 Given that 95 percent of donations from Silicon Valley generally go to Democrats, it's hard  
18 to imagine that the algorithms of companies like Facebook and Google don't favor their favorite  
19 candidates. A newly leaked video of a 2016 meeting at Google shows without doubt that high-  
20 ranking Google executives share a strong political preference, which could easily be expressed in  
21 algorithms. The favoritism might be deliberately programmed or occur simply because of  
22 unconscious bias. Either way, votes and opinions shift.

23 It's also hard to imagine how, in any election in the world, with or without intention on the  
24 part of company employees, Google search results would fail to tilt toward one candidate. Google's  
25 search algorithm certainly has no equal-time rule built into it; we wouldn't want it to! We want it to  
26 tell us what's best, and the algorithm will indeed always favor one dog food over another, one  
27 music service over another, and one political candidate over another. When the latter happens ...  
28 votes and opinions shift.

1 Here are 10 ways—seven of which I am actively studying and quantifying—that Big Tech  
2 companies could use to shift millions of votes this coming November with no one the wiser. Let’s  
3 hope, of course, that these methods are not being used and will never be used, but let’s be realistic  
4 too; there’s generally no limit to what people will do when money and power are on the line.

### 5 **1. Search Engine Manipulation Effect (SEME)**

6 Ongoing research I began in January 2013 has shown repeatedly that when one candidate is  
7 favored over another in search results, voting preferences among undecided voters shift  
8 dramatically—by 20 percent or more overall, and by up to 80 percent in some demographic groups.  
9 This is partly because people place inordinate trust in algorithmically generated output, thinking,  
10 mistakenly, that algorithms are inherently objective and impartial.

11 But my research also suggests that we are conditioned to believe in high-ranking search  
12 results in much the same way that rats are conditioned to press levers in Skinner boxes. Because  
13 most searches are for simple facts (“When was Donald Trump born?”), and because correct answers  
14 to simple questions inevitably turn up in the first position, we are taught, day after day, that the  
15 higher a search result appears in the list, the more true it must be. When we finally search for  
16 information to help us make a tough decision (“Who’s better for the economy, Trump or Clinton?”),  
17 we tend to believe the information on the web pages to which high-ranking search results link.

18 As The Washington Post reported last year, in 2016, I led a team that developed a system for  
19 monitoring the election-related search results Google, Bing, and Yahoo were showing users in the  
20 months leading up to the presidential election, and I found pro-Clinton bias in all 10 search  
21 positions on the first page of Google’s search results. Google responded, as usual, that it has “never  
22 re-ranked search results on any topic (including elections) to manipulate political sentiment”—but I  
23 never claimed it did. I found what I found, namely that Google’s search results favored Hillary  
24 Clinton; “re-ranking”—an obtuse term Google seems to have invented to confuse people—is  
25 irrelevant.

26 Because (a) many elections are very close, (b) 90 percent of online searches in most  
27 countries are conducted on just one search engine (Google), and (c) internet penetration is high in  
28 most countries these days—higher in many countries than it is in the United States—it is possible

1 that the outcomes of upwards of 25 percent of the world’s national elections are now being  
2 determined by Google’s search algorithm, even without deliberate manipulation on the part of  
3 company employees. Because, as I noted earlier, Google’s search algorithm is not constrained by  
4 equal-time rules, it almost certainly ends up favoring one candidate over another in most political  
5 races, and that shifts opinions and votes.

## 6 **2. Search Suggestion Effect (SSE)**

7 When Google first introduced autocomplete search suggestions—those short lists you see  
8 when you start to type an item into the Google search bar—it was supposedly meant to save you  
9 some time. Whatever the original rationale, those suggestions soon turned into a powerful means of  
10 manipulation that Google appears to use aggressively.

11 My recent research suggests that (a) Google starts to manipulate your opinions from the very  
12 first character you type, and (b) by fiddling with the suggestions it shows you, Google can turn a  
13 50–50 split among undecided voters into a 90–10 split with no one knowing. I call this manipulation  
14 the Search Suggestion Effect (SSE), and it is one of the most powerful behavioral manipulations I  
15 have ever seen in my nearly 40 years as a behavioral scientist.

16 How will you know whether Google is messing with your election-related search  
17 suggestions in the weeks leading up to the election? You won’t.

## 18 **3. The Targeted Messaging Effect (TME)**

19 If, on Nov. 8, 2016, Mr. Zuckerberg had sent go-out-and-vote reminders just to supporters of  
20 Mrs. Clinton, that would likely have given her an additional 450,000 votes. I’ve extrapolated that  
21 number from Facebook’s own published data.

22 Because Zuckerberg was overconfident in 2016, I don’t believe he sent those messages, but  
23 he is surely not overconfident this time around. In fact, it’s possible that, at this very moment,  
24 Facebook and other companies are sending out targeted register-to-vote reminders, as well as  
25 targeted go-out-and-vote reminders in primary races. Targeted go-out-and-vote reminders might  
26 also favor one party on Election Day in November.

27 My associates and I are building systems to monitor such things, but because no systems are  
28 currently in place, there is no sure way to tell whether Twitter, Google, and Facebook (or

1 Facebook’s influential offshoot, Instagram) are currently tilting their messaging. No law or  
2 regulation specifically forbids the practice, and it would be an easy and economical way to serve  
3 company needs. Campaign donations cost money, after all, but tilting your messaging to favor one  
4 candidate is free.

#### 5 **4. Opinion Matching Effect (OME)**

6 In March 2016, and continuing for more than seven months until Election Day, Tinder’s tens  
7 of millions of users could not only swipe to find sex partners, they could also swipe to find out  
8 whether they should vote for Trump or Clinton. The website iSideWith.com—founded and run by  
9 “two friends” with no obvious qualifications—claims to have helped more than 49 million people  
10 match their opinions to the right candidate. Both CNN and USA Today have run similar services,  
11 currently inactive.

12 I am still studying and quantifying this type of, um, helpful service, but so far it looks like  
13 (a) opinion matching services tend to attract undecided voters—precisely the kinds of voters who  
14 are most vulnerable to manipulation, and (b) they can easily produce opinion shifts of 30 percent or  
15 more without people’s awareness.

16 At this writing, iSideWith is already helping people decide who they should vote for in the  
17 2018 New York U.S. Senate race, the 2018 New York gubernatorial race, the 2018 race for New  
18 York District 10 of the U.S. House of Representatives, and, believe it or not, the 2020 presidential  
19 race. Keep your eyes open for other matching services as they turn up, and ask yourself this: Who  
20 wrote those algorithms, and how can we know whether they are biased toward one candidate or  
21 party?

#### 22 **5. Answer Bot Effect (ABE)**

23 More and more these days, people don’t want lists of thousands of search results, they just  
24 want the answer, which is being supplied by personal assistants like Google Home devices, the  
25 Google Assistant on Android devices, Amazon’s Alexa, Apple’s Siri, and Google’s featured  
26 snippets—those answer boxes at the top of Google search results. I call the opinion shift produced  
27 by such mechanisms the Answer Bot Effect (ABE).

28 My research on Google’s answer boxes shows three things so far: First, they reduce the time

1 people spend searching for more information. Second, they reduce the number of times people click  
2 on search results. And third, they appear to shift opinions 10 to 30 percent more than search results  
3 alone do. I don't yet know exactly how many votes can be shifted by answer bots, but in a national  
4 election in the United States, the number might be in the low millions.

### 5 **6. Shadowbanning**

6 Recently, Trump complained that Twitter was preventing conservatives from reaching many  
7 of their followers on that platform through shadowbanning, the practice of quietly hiding a user's  
8 posts without the user knowing. The validity of Trump's specific accusation is arguable, but the fact  
9 remains that any platform on which people have followers or friends can be rigged in a way to  
10 suppress the views and influence of certain individuals without people knowing the suppression is  
11 taking place. Unfortunately, without aggressive monitoring systems in place, it's hard to know for  
12 sure when or even whether shadowbanning is occurring.

### 13 **7. Programmed Virality and the Digital Bandwagon Effect**

14 Big Tech companies would like us to believe that virality on platforms like YouTube or  
15 Instagram is a profoundly mysterious phenomenon, even while acknowledging that their platforms  
16 are populated by tens of millions of fake accounts that might affect virality.

17 In fact, there is an obvious situation in which virality is not mysterious at all, and that is  
18 when the tech companies themselves decide to shift high volumes of traffic in ways that suit their  
19 needs. And aren't they always doing this? Because Facebook's algorithms are secret, if an executive  
20 decided to bestow instant Instagram stardom on a pro-Elizabeth Warren college student, we would  
21 have no way of knowing that this was a deliberate act and no way of countering it.

22 The same can be said of the virality of YouTube videos and Twitter campaigns; they are  
23 inherently competitive—except when company employees or executives decide otherwise. Google  
24 has an especially powerful and subtle way of creating instant virality using a technique I've dubbed  
25 the Digital Bandwagon Effect. Because the popularity of websites drives them higher in search  
26 results, and because high-ranking search results increase the popularity of websites (SEME),  
27 Google has the ability to engineer a sudden explosion of interest in a candidate or cause  
28 with no one—perhaps even people at the companies themselves—having the slightest idea they've

1 done so. In 2015, I published a mathematical model showing how neatly this can work.

## 2 **8. The Facebook Effect**

3 Because Facebook’s ineptness and dishonesty have squeezed it into a digital doghouse from  
4 which it might never emerge, it gets its own precinct on my list.

5 In 2016, I published an article detailing five ways that Facebook could shift millions of  
6 votes without people knowing: biasing its trending box, biasing its center newsfeed, encouraging  
7 people to look for election-related material in its search bar (which it did that year!), sending out  
8 targeted register-to-vote reminders, and sending out targeted go-out-and-vote reminders.

9 I wrote that article before the news stories broke about Facebook’s improper sharing of user  
10 data with multiple researchers and companies, not to mention the stories about how the company  
11 permitted fake news stories to proliferate on its platform during the critical days just before the  
12 November election—problems the company is now trying hard to mitigate. With the revelations  
13 mounting, on July 26, 2018, Facebook suffered the largest one-day drop in stock value of any  
14 company in history, and now it’s facing a shareholder lawsuit and multiple fines and investigations  
15 in both the United States and the EU.

16 Facebook desperately needs new direction, which is why I recently called for Zuckerberg’s  
17 resignation. The company, in my view, could benefit from the new perspectives that often come  
18 with new leadership.

## 19 **9. Censorship**

20 I am cheating here by labeling one category “censorship,” because censorship—the selective  
21 and biased suppression of information—can be perpetrated in so many different ways.

22 Shadow-banning could be considered a type of censorship, for example, and in 2016, a  
23 Facebook whistle-blower claimed he had been on a company team that was systematically  
24 removing conservative news stories from Facebook’s news-feed. Now, because of Facebook’s  
25 carelessness with user data, the company is openly taking pride in rapidly shutting down accounts  
26 that appear to be Russia-connected—even though company representatives sometimes acknowledge  
27 that they “don’t have all the facts.”

28 Meanwhile, Zuckerberg has crowed about his magnanimity in preserving the accounts of

1 people who deny the Holocaust, never mentioning the fact that provocative content propels traffic  
2 that might make him richer. How would you know whether Facebook was selectively suppressing  
3 material that favored one candidate or political party? You wouldn't. (For a detailed look at nine  
4 ways Google censors content, see my essay "The New Censorship," published in 2016.)

### 5 **10. The Digital Customization Effect (DCE)**

6 Any marketer can tell you how important it is to know your customer. Now, think about that  
7 simple idea in a world in which Google has likely collected the equivalent of millions of Word  
8 pages of information about you. If you randomly display a banner ad on a web page, out of 10,000  
9 people, only five are likely to click on it; that's the CTR—the "click-through rate" (0.05 percent).  
10 But if you target your ad, displaying it only to people whose interests it matches, you can boost your  
11 CTR a hundredfold.

12 That's why Google, Facebook, and others have become increasingly obsessed with  
13 customizing the information they show you: They want you to be happily and mindlessly clicking  
14 away on the content they show you.

15 In the research I conduct, my impact is always larger when I am able to customize  
16 information to suit people's backgrounds. Because I know very little about the participants in my  
17 experiments, however, I am able to do so in only feeble ways, but the tech giants know  
18 everything about you—even things you don't know about yourself. This tells me that the effect  
19 sizes I find in my experiments are probably too low. The impact that companies like  
20 Google are having on our lives is quite possibly much larger than I think it is. Perhaps that GOVT  
21 doesn't scare you, but it sure scares me.

### 22 **The Same Direction**

23 OK, you say, so much for Epstein's list! What about those other shenanigans we've heard  
24 about: voter fraud (Trump's explanation for why he lost the popular vote), gerrymandering,  
25 rigged voting machines, targeted ads placed by Cambridge Analytica, votes cast over the internet,  
26 or, as I mentioned earlier, those millions of bots designed to shift opinions. What about hackers like  
27 Andrés Sepúlveda, who spent nearly a decade using computer technology to rig elections in Latin  
28 America? What about all the ways new technologies make dirty tricks easier in elections? And what

1 about those darn Russians, anyway?

2 To all that I say: kid stuff. Dirty tricks have been around since the first election was held  
3 millennia ago. But unlike the new manipulative tools controlled by Google and Facebook, the old  
4 tricks are competitive—it’s your hacker versus my hacker, your bots versus my bots, your fake  
5 news stories versus my fake news stories—and sometimes illegal, which is why Sepúlveda’s efforts  
6 failed many times and why Cambridge Analytica is dust.

7 “Cyberwar,” a new book by political scientist Kathleen Hall Jamieson, reminds us that  
8 targeted ads and fake news stories can indeed shift votes, but the numbers are necessarily small. It’s  
9 hard to overwhelm your competitor when he or she can play the same games you are playing.

10 Now, take a look at my numbered list. The techniques I’ve described can shift millions of  
11 votes without people’s awareness, and because they are controlled by the platforms themselves,  
12 they are entirely noncompetitive. If Google or Facebook or Twitter wants to shift votes, there is no  
13 way to counteract their manipulations. In fact, at this writing, there is not even a credible way of  
14 detecting those manipulations.

15 And what if the tech giants are all leaning in the same political direction? What if the  
16 combined weight of their subtle and untraceable manipulative power favors one political party? If  
17 150 million people vote this November in the United States, with 20 percent still undecided at this  
18 writing (that’s 30 million people), I estimate that the combined weight of Big Tech manipulations  
19 could easily shift upwards of 12 million votes without anyone knowing. That’s enough votes to  
20 determine the outcomes of hundreds of close local, state, and congressional races throughout the  
21 country, which makes the free-and-fair election little more than an illusion.

22 Full disclosure: I happen to think that the political party currently in favor in Silicon Valley  
23 is, by a hair (so to speak), the superior party at the moment. But I also love America and democracy,  
24 and I believe that the free-and-fair election is the bedrock of our political system. I don’t care how  
25 “right” these companies might be; lofty ends do not justify shady means, especially when those  
26 means are difficult to see and not well understood by either authorities or the public.

27 Can new regulations or laws save us from the extraordinary powers of manipulation the Big  
28 Tech companies now possess? Maybe, but our leaders seem to be especially regulation-shy these

1 days, and I doubt, in any case, whether laws and regulations will ever be able to keep up with the  
2 new kinds of threats that new technologies will almost certainly pose in coming years.

3 I don't believe we are completely helpless, however. I think that one way to turn Facebook,  
4 Google, and the innovative technology companies that will succeed them, into responsible citizens  
5 is to set unsophisticated monitoring systems that detect, analyze, and archive what they're showing  
6 people—in effect, to fight technology with technology.

7 As I mentioned earlier, in 2016, I led a team that monitored search results on multiple search  
8 engines. That was a start, but we can do much better. These days, I'm working with business  
9 associates and academic colleagues on three continents to scale up systems to monitor a wide range  
10 of information the Big Tech companies are sharing with their users—even the spoken answers  
11 provided by personal assistants. Ultimately, a worldwide ecology of passive monitoring systems  
12 will make these companies accountable to the public, with information bias and online manipulation  
13 detectable in real time.

14 With November drawing near, there is obviously some urgency here. At this writing, it's not  
15 clear whether we will be fully operational in time to monitor the midterm elections, but we're  
16 determined to be ready for 2020.

17 - Robert Epstein is a senior research psychologist at the American Institute for Behavioral  
18 Research and Technology in California.

19 The members of the Silicon Valley Cartel, and the Senators that they own, created the  
20 above-listed tactics and deploy them against their comptitors and whistle-blowers, in violation of  
21 human rights and civil rights laws.

22 **The preps manually set-up these digital attack processes. They are not “glitches” or**  
23 **“bugs”.**

24 **All of the above tactics have been documented being used by Google, Facebook,**  
25 **YouTube and LinkedIn, against victim, as reprisal, on orders from U.S. Senator**

26  
27  
28

1 **EXHIBIT 12 - Senators Are Your Attackers And Your Business**  
2 **Competitors**

3 When the White House puts a [hit-job](#) on you, you probably won't survive it. They, and the  
4 crooked California Senators that facilitate such payback and reprisal attacks, are really good at  
5 state-sponsored revenge tactics.

6 At least you will know that the crime you reported was real. You will get a bit of vindication  
7 on top of the death threats, Fusion GPS bots, Black Cube trolls, and Nick Denton character  
8 assassination screeds.

9 You will know for sure that the political mobster-thing you whistle-blew on was about to  
10 take down *The President of the United States* if it got traction in the news. The “main-stream”  
11 Silicon Valley corporation-controlled propaganda news is hard to get around. A multi-trillion dollar  
12 embezzlement of public funds could have done it, though.

13 The government asked the victims to invest their life savings, years of their lives, their  
14 health, their brands and their friends money in a federal project. The victims agreed and that got  
15 them inside the darkest corridors of Washington, DC. What they saw there shocked them and  
16 unraveled an epic crime that affects every citizen in America!

17 This book documents the crime, the corruption, the reprisals and the state of modern  
18 Democracy...  
19

20  
21  
22  
23 Federal investigators have proven (via records-tracking, financial data, surveillance, insider tips,  
24 leaks, etc.) that White House executives, government agency executives (SSA, LSC, GOVT,  
25 USPTO, etc.) and California political bosses, including California U.S. Senators, owned interests in  
26 the victims competitors worth many billions of dollars. Any citizen can confirm these assertions via  
27 public records and the evidence in this report.  
28

1 The FBI has been arresting major political figures in this organized crime ring in San Francisco City  
2 Hall. Those government officials ordered, financed and executed whistle-blower reprisals and anti-  
3 trust violating attacks on the victims using state-sponsored, taPlaintiff 42ayer-funded resources.  
4 Using government resources, they engaged in the illegal reprisal attacks on the victims. Those  
5 harms are listed in detail in the claim section of the filed Victim Demand entitled: “*The Specific*  
6 *Attacks And Harms Undertaken Against Plaintiffs*”.

7  
8 Corrupt government officials manipulated SSA, HHS, GOVT, USPTO, DOJ, and other agency,  
9 payments, funds, benefits and rights in order to harm and economically damage the victims. They  
10 produced and financed a massive media defamation campaign using their Paypal Mafia-based  
11 “Silicon Valley Cartel”. This ‘Cartel’: **1.)** finances the political campaigns of the Senators and the  
12 other politicians that own stock in their Silicon Valley dirty tech companies, **2.)** is the competitor of  
13 the victims, **3.)** shared staff with the named politicians, **4.)** is the nearly exclusive beneficiary of  
14 policy actions by those politicians, and **5.)** has a massive number of conflict-of-interest relationships  
15 with each of the charged politicians.  
16

17  
18 The victims reported the attackers crimes to the FBI, DOJ, IG and other officials and got attacked  
19 for reporting the crimes, for busting up the organized crime effort and for running companies whose  
20 product technologies obsoleted those of the tech Cartel. The victims are claiming their rights to their  
21 damages and fee compensation, but those same public figures have blocked them from an equitable  
22 jury trial to address the matter.  
23

24  
25 The government has provided the attacker/political campaign financiers/competitors of the victims  
26 with tens of billions of dollars of free government cash yet the victims have gotten nothing but grief  
27 from the public officials who are supposed to help them because a criminal cover-up is in process.  
28

1  
2 The politicians who got those “bad guys” that free taPlaintiff 42ayer-provided money, own the  
3 stock of those criminal’s companies, are best friends with those oligarchs and are politically  
4 financed by those corrupt players. This organized crime cartel operates the most audacious and  
5 corrupt scheme in American political history.

6  
7  
8 This legal demand is based on first-hand damages, experience, interviews and discussions, with  
9 hundreds of government employees and contractors; well-known politicians and their support  
10 teams; plus tech CEO’s and their employees. It is also based on FBI records, GAO reports and  
11 Congressional forensic experts.

12  
13 This material has been filed with the FBI, DOJ, FTC, OSC, SEC, SSA, FCC, IG Offices, U.S.  
14 Congress and other relevant agencies as please to help the victims of these crimes. This is not just  
15 an informational document, it is a demand for justice! Some of the victims have been providing  
16 evidence to the DOJ and FBI, in this organized crime investigation, since 1978.

17  
18  
19 ***Not only do the Department of Energy, The Inspector General’s office and all of the left-over***  
20 ***staffers from the Obama Administration refuse to take any action; they actively operate a cover-***  
21 ***up and ePlaintiff 42end vast amounts of taxpayerdollars to operate this cover-up and to engage in***  
22 ***“hit-jobs”, reprisals and revenge tactics against the victims to punish them for whistle-blowing.***  
23 ***They do this to hide billions of dollars of dirty stock market profits they engage in to this day.***  
24 ***They do this to hide quid pro quo revolving door felony corruption schemes they engage in to this***  
25 ***day. They do this to hide their felony crimes that they profit from, via unjust rewards, to this day.***  
26  
27  
28

1 Additionally, some of the material in this demand was provided to the authors by those agencies.

2 While some of this material is politically embarrassing to some of those agencies, all parties

3 acknowledge that this disclosure assists in improved transparency at those agencies.

4  
5 **In every government agency there are three types of workers: 1.) The “good ones”, 2.) the**  
6 **“evil ones” and 3.) the “worker bees”. No matter how many “evil ones” there are at a given**  
7 **agency or department, it only takes ten “good ones” to bust them and get them fired or**  
8 **arrested. The “worker bee” ones tend to support the “good ones” in order to avoid disruption.**

9  
10 **This report could not have existed without the help of a few of the Elliot Ness-type “good**  
11 **ones” from each agency.**

12  
13 The dictionary defines an ***Omerta*** ( *ō-mûr'tə, ō'mĕr-tă'* ) as: ► n., *A rule or code that*  
14 *prohibits speaking or divulging information about certain activities, especially the activities of a*  
15 *criminal organization; Alternative spelling of [omertà](https://www.wordnik.com/words/omertà).*( <https://www.wordnik.com/words/omertà> ); *a*  
16 *code of silence practiced by the Mafia; a refusal to give evidence to the police about criminal*  
17 *activities.*

18  
19  
20 This case is about an *Omerta* practiced by well-known public officials and their Silicon Valley  
21 financiers. Calling this crime, both, a “*Capitol Hill Omerta*” and a “*Capital Hill Omerta*” are both  
22 appropriate since this involves a White House and Congress corrupted by cash.

23 Facebook, Google, Amazon, Ebay, Twitter, LinkedIn and Tesla bosses collude with politicians and  
24 conspire to run racketeering operations.

25  
26  
27 Their synchronized and coordinated manipulation of news and media always has only one  
28 profiteering intention and always uses tactics which steer the manipulation effects to the benefit of

1 the tech Cartel. The tech Cartel bosses are all exclusive recipients of government cash, jobs,  
2 contracts and other payola provided to them as quid pro quo. Their scam is operated for the  
3 oligarchs by: 1.) technology law firms, 2.) CPA corporations, 3.) “bundlers” and 4.) lobbyists that  
4 run the whole corrupt process for these crooks. ***These four groups, more than any other parties***  
5 ***MUST be FBI raided, outlawed and shut down by Congressional action! They are the biggest***  
6 ***mobsters in the whole scheme!***

7  
8  
9 These crooks interact, every moment, with billions of average people around the world without  
10 oversight. There is no effective Congressional or public monitoring of these oligarchs. No other  
11 companies in the world are allowed the same access to government and the same exemption from  
12 the law. Their access and position is based on taxpayerfinanced resources which only *they* are  
13 allowed to use because of their bribe payments to famous politicians. In other words: ***You, the***  
14 ***public, paid for the government resources and perks they use to operate their abusive monopolies.***

15  
16  
17 They have used their monopolistic, extremist, synchronized access to control public and  
18 government impressions, policies, elections, social moods and perceptions for their ideological and  
19 profiteering goals. Bribes in the form of cash, stock, advertising, revolving door jobs, sex workers,  
20 real estate, and hundreds of other kinds of payola, have been paid to *most* of the U.S. Congress and  
21 regulatory agency staff.

22  
23  
24 They meet covertly in restaurant and bar back-rooms (ie: “The AngelGate Scandal”), hotel suites,  
25 Aspen resorts and private mansions in order to plot and scheme their coordinated efforts. They  
26 control significant numbers of executives at the FBI, GOVT, FTC, DOT, SEC and other agencies,  
27 who, under non-compromised conditions, would normally arrest or indict them. They have an  
28

1 extraordinary number of ex-CIA, ex-IN-Q-TEL and ex-Mossad spy staff employed at their  
2 companies because they enjoy the power of spy trade craft tools to manipulate business and politics.

3  
4 They tell their naive young employees one thing and use their work-efforts to accomplish another  
5 thing: Their political goals!

6  
7 They use Scientology and Rajneesh cult-like '*mindfulness*' and '*holistic*' echo-chambering to  
8 ePlaintiff 42loit their employees.

9  
10  
11 They have staged a nearly one trillion dollar government funds kickback operation, via the highly  
12 placed government officials they control, in a massive quid pro quo and stock market manipulation  
13 schemes.

14  
15 FBI and DOJ bosses (including Comey, Holder, McCabe, etc.) were fully aware of these facts  
16 because they received written reports stating this facts as early as 2008. They covered up the crimes  
17 of the Cartel in order to protect their profiteering insider partners.

18  
19  
20 Very few people understand how the Silicon Valley media Cartel's subliminal messaging, mood  
21 manipulation and intention triggering technologies work and how they can be used to cause  
22 physical, emotional and cultural harm on an epic scale. The mass manipulation power of the Cartel  
23 is astonishing and VERY hard for the average person to comprehend from a technological and  
24 psychological perspective. In the 2020 elections, San Francisco voters overwhelmingly approved a  
25 ballot measure to impose an extra tax on any big tech company that pays its highest-paid employee  
26 over 100 times more than its median worker. This was a direct attack on the corrupt bosses of Tesla,  
27  
28

1 Google, Facebook, and their ilk, that our team organized.  
2

3 The ballot question was [approved](#) by voters,. As the [ballot question](#) states, the new tax is to  
4 be imposed on "businesses in San Francisco when their highest-paid managerial employee earns  
5 more than 100 times the median compensation paid to their employees in San Francisco."

6 This is because 1.) **criminal tech oligarchs** pay-off 2.) **politicians** and their 3.) **Silicon**  
7 **Valley billionaire political manipulator buddies** with a menage-et-trios bribe payola three-way  
8 scheme using money from public taxpayers and public shareholders. It is a ring of corruption that  
9 never stops spinning and the crooks are funded by public money. Eric Schmidt, Elon Musk, Larry  
10 Page, Harvey Weinstein, Jeffrey Epstein, Mark Zuckerberg, and the rest, engage in unspeakable  
11 acts using so much public money that they make Al Capone pale in comparison.

12 This Cartel of oligarchs and politicians have "**Kill Teams**" of hired tech mercenaries and media  
13 attackers that they pay to terminate members of the public, the media and smaller business that  
14 expose them or compete with them. Those attackers are identified, by name, in this book, and their  
15 tactics are exposed herein. In the DOJ case against Google ( **Case # 1:20-cv-03010** ), it is quite clear  
16 that Google is at the tip of an organized crime empire and a conspiracy to control news and  
17 commerce.  
18  
19

20  
21 To ignore, or cover up, the facts that these companies are a Mafia-class organized crime  
22 Cartel is to subject the national population to a risk greater than that of the entire old Italian Mafia!

23 The links herein point to over 2 million pages of confirming evidence documents and over  
24 60 hours of documentary and surveillance videos already provided to, or by, government  
25 investigators. This massive volume of evidence provides indisputable proof of the assertions herein  
26 by the people who were "*in the room*" and who witnessed these crimes!  
27

28 The only reason the Google's of the world are afraid of the truth is because they cannot exist

1 in the face of the facts! The tech Cartel’s greed made them forget the old rule: “*Dirty deeds done in*  
2 *the dark will always come to light!*”

3         When you talk to a public official who is involved in these cover-ups, they will lie to you. In  
4 almost every instance, the officials we asked to solve these problems turned out to be simpering,  
5 pandering, extremist zealots who will say anything to deny, distract, defer and delay justice and  
6 interdiction in these matters. The most famous senators, mayors and White House personnel were  
7 all discovered to be putting cash in their bank accounts, getting jobs, getting sex and buying  
8 mansions from the profits of these crimes.  
9

10         In fact, NSA surveillance; DOJ surveillance; government agency mail server records;  
11 corporate mail server records; Google email records; Yahoo email records; Facebook storage  
12 records; Linkedin archive records; tattoos; personal email and texting files; social media postings;  
13 photographs of the parties of interest at protests, riots, marches and social parties; their voting  
14 records; their financial stock ownership records; statements from their co-workers; financial records  
15 of their political contributions; their contacts lists on their smartphones and MS Outlook; adjacent  
16 building video surveillance cameras; stickers and signs on their cars and homes; AI processed  
17 analytical decision trees of the rulings they have made within government agencies; their job  
18 applications records from Craigslist, Monster, Taleo, etc; and a massive amount of other FBI-  
19 quality evidence; has proven that there does not appear to be anybody who worked on the victims  
20 case who was not an extremist, socialist, pro-anarchy activist. If any agency can prove otherwise,  
21 we are delighted to see the evidence. Federal IT officials have stated that almost every person who  
22 has touched, moved, ordered, requested or reviewed the Plaintiffs files is documented and it is easy  
23 to use NSA or Palantir-type software to rapidly confirm the assertion.  
24

25  
26         taxpayerfunded government resources were used to harm and damage the Plaintiffs as  
27 reprisal for their assistance to law enforcement.  
28

       Thus, State and Federal agencies owe Plaintiffs funds to compensate for those harms and

1 damages.

2 Forensic investigative history has now proven that those government officials at various  
3 agencies were either financed by, friends, with, sleeping with, dating the staff of, holding stock  
4 market assets in, promised a revolving door job or government service contracts from, partying  
5 with, personal friends with, photographed at private events with, exchanging emails with, business  
6 associates of or directed by; applicant's business adversaries, or the Senators and agency politicians  
7 that those business adversaries pay campaign finances to, or supply political digital search  
8 manipulation services to.  
9

10 That was a violation of Plaintiffs State and Federal Constitutional rights, all of Plaintiffs  
11 civil rights and a violation of a vast number of laws.

12 There are thousands and thousands of news reports, Inspector General reports and staff  
13 reports about FBI officials engaging in political bias and/or retaliation using government resources.

14 The articles, like:

26 ... are terrifying.  
27  
28

1 Columnist [Kurt Schlichter](#) writes that with the latest revelation of massive FBI  
2 incompetence/corruption – turns out the G-men ended up not just screwing up the gymnastics  
3 pervert case but lying about it under oath – you have to wonder something. We keep getting told  
4 that the rank-and-file are A-OK, that it’s just a few bad apples up on the top floor who are framing  
5 people, botching investigations, not stopping mass killers, urging intrafamilial narcing, and busting  
6 LEGO insurrectionists. Fine, great, dandy.

7  
8 So, where are all the good apples?

9 Who quit in protest?

10 Who resigned and went public?

11 Who said “No?”

12 If I was more technically savvy, this is where I would insert a GIF of a tumbleweed blowin’  
13 across the range.

14 Your oath or your pension is the choice, and the pension seems to prevails almost every  
15 single time. Not always – here a Space Force light colonel sacrifices his command to tell the truth,  
16 there a teacher gets fired for refusing to indoctrinate his students. But it’s an anomaly, like we were  
17 told the bad apples are an anomaly. Abandon your delusion that the good apples shall soon rise up  
18 and put things right. Have you seen a tsunami of right-putting?

19 And not just at the FBI, an agency so utterly corrupted and broken that President DeSantis  
20 should fire the director, order all the agents to the streets to patrol for jaywalkers, then demolish the  
21 hideous HQ building and sow the ground beneath it with salt. No, the good apples shortage is  
22 everywhere in government, from the feds down to your local flatfoot. And its in our other  
23 institutions too.

24 Who was it who busted mummies for felony kids-not-wearing-face-thongs-while-alone-and-  
25 outside? It wasn’t that malignant gnome Fauci. It wasn’t some MSNBCNN Baghdad Bob. It was  
26 local cops who did the bidding of their masters when the bidding was obviously bullSchiff. But they  
27 did it. They did the bidding. And we can’t unsee it.

28 How about in colleges? We hear about how bad it is and how scared everyone is, and we

1 learn that a lot of professors really, really don't like this CRT fascism stuff. But with few  
2 exceptions, they do nothing. They censor themselves, conform, and hope that somehow this will all  
3 blow over.

4         How about the media? Where are the journalist good apples there who stand up for  
5 objectivity, truth, and not being the ventriloquist dummies of the DNC? Almost all we see are bad  
6 apples, or a *pomme de terre* in the case of Brian Stelter, who is a potato.

7         The same with our military, fresh off its ignominious defeat in Afghanistan. Name me the  
8 general or admiral who quit because of this CRT idiocy. Maybe some did quietly, just running out  
9 the clock and bailing, but have they stood up and called out the Kendi clique at the Pentagon? A  
10 bunch of vets in Congress just punched out [a devastating report](#) on how broken the Navy is – the  
11 answer is “very” – and the question that comes to mind is “Where were the leaders?” The deadly  
12 nonsense that the report highlights did not just happen. It was the result of choices, including the  
13 choice not to shout “What the hell are you people thinking?”

14         Who made the choice to do that? No one. No, they made the choice to put their heads down  
15 and keep going, pretending [to remain calm because all is well](#).

16         All is not well, not remotely.

17         Many serve in silence, grumbling to the few friends that they can trust. They know this is all  
18 wrong, but they have a mortgage and besides, if all the good apples leave, who is left?

19         But does it matter that the institutions are all bad apples if the good apples never do a damn  
20 thing to stop them?

21         No. What they do is buck up the institutions that we should let collapse from the weight of  
22 their own mendacity and failure. The good apples are enablers. Bad apples need the good apples.  
23 And the good apples are good little apples, showing up for work, following orders, mentally  
24 excusing themselves from their participation in the abominations that our institutions have become.

25         I guess it's easy for me to tell some FBI guy with a kid in college assigned to bust granny  
26 tourist “insurrectionists,” or a two-star who always wanted to be a division commander and will get  
27 that gig if he just stays quiet about how the Army is turning into a bitter punchline, to do the right  
28 thing. I don't have to pay the piper; they do. But then, they took an oath. They promised to do the

1 **EXHIBIT 13 – Political Reprisal, Vendetta, Payback, Retribution,**  
2 **Retaliation, Revenge**

3 This is about the actual corruption, crimes and attacks a group of “Plaintiffs” experienced.  
4 This is the legacy that will follow the perpetrators throughout history. Long after the crooks  
5 documented here have passed away, the world will still know their crimes and corruption.

6 This material is not about political ideologies.

7 It is not about Democrats or Republicans.

8 It is about **racketeering, insider trading and organized crime.**

9  
10 The victims are are all natural born United States citizen(s) residing in America who worked  
11 for, and with, the State and Federal government as contractor/employees in technology, intelligence  
12 and/or law enforcement roles and had relationships with White House, Mayoral, Senate and  
13 Congressional executives (and their financiers) who provided knowledge of the stated crimes. They  
14 are not associated with any political party and self-identify as “independent” voters.

15  
16 The Plaintiffs suffered harms and damages from a felony organized crime operated by  
17 County, State and Federal public officials, per forensic investigators, FBI, Congressional reports  
18 and filed federal FOIA request responses pursuant to the Freedom of Information Act (FOIA), (5  
19 U.S.C. § 552 et seq.) and the implementing regulations of the United States government, and  
20 applicable laws. The Plaintiffs are seeking to acquire compensation for their damages and expose  
21 and curtail this type of corruption for all of time.

22  
23 Via standard legal and forensic accounting metrics the damages to some of the members of  
24 the public who were harmed by this corruption can be easily calculated. The Plaintiffs in this  
25 “Omerta” corruption case are seeking an award of \$1.5 billion dollars, per the list of harms in the  
26 sections below, from the Federal Treasury to compensate them for the proven harms and damages  
27 caused to the Plaintiffs. Further, they are seeking damages and back-pay funds from the general  
28 State and Federal Treasury funds.

1 For contrast, taPlaintiff 42ayer-financed government ‘payola’ and crony conduit funds in  
2 excess of **\$18 billion (Tesla)** and **\$49 billion (Google)**, respectively, have been given to each of two  
3 of Plaintiffs competitors, who then made many times those amounts by profiteering off those funds  
4 via criminal and corrupt activities. Those two insider examples are only two of dozens of  
5 technology oligarch-operated examples in the Cartel that government officials profited from, but  
6 these two are prime examples of the criminal activities engaged in, and covered up, at the expense  
7 of Plaintiffs who were attacked for reporting the crimes.  
8

9 Both of those entities are now under federal investigation and civil charges for racketeering  
10 and organized crime. It is shocking, to every voting citizen, that such criminal entities would  
11 receive such a massive volume of corrupt quid-pro-quo largess while law-abiding Plaintiffs  
12 technologies and products, which obsolete those competitors products on every metric, would be  
13 blockaded. Plaintiffs were attacked using state-sponsored resources, due to bribery and crimes by  
14 public officials, who own stock and benefits in those competitors.  
15

16 Plaintiffs have also been blockaded from their rights to legal council and equitable legal  
17 representation because this case exposes and embarrasses famous public officials who seek a cover-  
18 up. Nonetheless, denying Plaintiffs their civil and Constitutional rights is one of the biggest forms  
19 of human rights violations in the United States of America!

20 In one example, and for reference, we examine the United States Department of Energy  
21 government ‘loan’ program which was a “**stimulus fund**” authorized under section 136 of the  
22 [Energy Independence and Security Act of 2007](#).

23 [https://en.wikipedia.org/wiki/Energy\\_Independence\\_and\\_Security\\_Act\\_of\\_2007](https://en.wikipedia.org/wiki/Energy_Independence_and_Security_Act_of_2007) )  
24

25 Congress provided the program with \$25 billion in loan authority, supported by a \$7.5  
26 billion appropriation to fund the credit subsidy. All the money cam from you, the taPlaintiff 42ayer.

27 The ATVM, LGP and battery funds were designed by lobbyists to benefit corrupt politicians  
28 and their billionaire financiers and to kill off their competitors.

Recent reports, such as:

<https://www.sfgate.com/business/article/Inside-eBay-s-Cockroach-Cult-The-Ghastly-Story-15599604.php> )

prove that tech Cartel members: Ebay, Amazon, Tesla, [Facebook](#) ( <http://popurls.com/go/pop/lbae924f6b574ffcc129f0f361e411de8> ),

Google, Netflix, et al; maintain para-military attack and surveillance geek armies, *within* their organizations, to go after competitors, whistle-blowers and those that their owners dislike.

These “*Kill Teams*” have CIA-like tools and funding to “target and destroy” any member of the public. Department of Energy officials pointed the finger at targets and paid some of these strike-force operatives via quid-pro-quo.

Many of the leaders of these political assassination teams were hired from the previous White House administration. Obama PR Director Jay Carney, who now works for Amazon, was documenting suggesting a hit on employees who spoke out about warehouse safety. Congressional leader Devin Nunes was targeted by six of these companies. The Tesla ‘Intimidation Director ‘ was documented in court records running attack vectors against Tesla employee Martin Tripp because he reported safety cover-ups

( [Watch This Pedestrian](#) <http://popurls.com/go/pop/l94e3e600c2346835275b4ca0ceac31ad> )

at the Tesla factory. The documents provided prove that [tech billionaires](#)

( <http://popurls.com/go/pop/le7bddd602d893b8ebdc36ea1357df4ad> )

hire, and partner with, White House staff to destroy the lives of American citizens who compete with, or report the crimes of those entities.

The U.S. Government worked closely with these *Kill Teams* in order to sabotage competitors of their insiders. [EPlaintiff 42losive New FBI Texts](#)

( <https://www.allsides.com/news/2020-09-25-1011/trump-was-right-ePlaintiff-42losive-new-fbi-texts-detail-internal-furor-over-handling> )

prove that even the highest levels of law enforcement help put hit-jobs on those they disagree with!

1 Corrupt government officials used a process, known in intelligence community trade craft circles as  
2 a “**Vendetta Cycle**”, to ‘kill’ citizens. The process involves cutting off every outside source of  
3 income, running defamation media campaigns to forestall any future income, forcing the targets to  
4 be exclusively reliant on government funds **but** making the funds so minimal that the citizens could  
5 not afford to pay lawyers to help fight the attacks. The ‘Vendetta Cycle’ process blocks the targets  
6 from their money, their legal rights and their freedom. The process is repeated endlessly, and the  
7 government funds reduced, over time, until the victim is terminated.

8 This reprisal revenge process can be operated by just a handful of Senators and White House  
9 staff but the results are always lethal. It is 100% illegal and a vast violation of the United States  
10 Constitution but it is used constantly by political sociopath Senators. The process is described in  
11 leaked CIA, Russian and British spy manuals and widely covered by Glenn Greenwald and ICIJ  
12 reporters.

13 Even though the law in California (Cal. Lab. Code § § 1050 to 1053) says that an entity can't  
14 prevent or attempt to prevent former workers from getting work through misrepresentation,  
15 knowingly permit or fail to take reasonable steps to prevent blacklisting, or make a statement about  
16 why an employee was discharged or left employment, implying something other than what is  
17 ePlaintiff 42licitly said, or providing information that was not requested: **It is done every day in**  
18 **Silicon Valley.**

19 The "*Silicon Valley No Poaching Black-List*" class-action lawsuit was about this issue.  
20 Federal FAR Section 9.104-1 (d), and related laws, apply. Blacklisting is a key part of the IC  
21 Vendetta Cycle attacks. The victims also suffered damage to their rights under the Age  
22 Discrimination in Employment Act (ADEA) (29 USC Sec. 621, et seq.); the Americans with  
23 Disabilities Act (42 USC Sec. 12181, et seq.); the Civil Rights Acts - (42 USC Sec. 2000, et seq.);  
24 the Davis-Bacon Act (40 USC Sec. 276a, et seq.); the Employee Retirement Income Security Act  
25 (ERISA) (29 USC Sec. 1001, et seq.); the Equal Pay Act (29 USC Sec. 206[d]) and other violations.

26 There is a precedent that was set in the US Supreme Court case: *Gideon v. Wainwright*,  
27 (1963) that clarifies that you have a right to a lawyer even if you don't have money for one. The  
28 Sixth Amendment, as applied to the states through the Fourteenth Amendment Due Process Clause

1 gives one their Due Process rights. You need to kill someone, though, to most easily get your free  
2 lawyer, since the court-appointed lawyer is rarely ever appointed, on citizens behalf, in a case like  
3 this. Even if a defendant is represented by an attorney of his or her choosing, he or she may be  
4 entitled to relief on appeal if the attorney did not provide adequate representation. A defendant must  
5 demonstrate that the attorney’s performance “fell below an objective standard of reasonableness”  
6 and that this was prejudicial to the case. See:

7 [Strickland v. Washington](https://supreme.justia.com/cases/federal/us/466/668/case.html) ( <https://supreme.justia.com/cases/federal/us/466/668/case.html> ) ,  
8 466 U.S. 668, 688-92 (1984).

9 A few “free lawyers”, that victims had tried, turned out to be working for the opposition  
10 side. The federal organization: <https://www.lsc.gov> is required to help but has refused because it’s  
11 administrators were friends with, and appointed by, the public officials charged with corruption in  
12 this case.

1 **EXHIBIT 14 - Killing The Messenger**

2  
3 Plaintiffs, and their peers, who reported these crimes to authorities, were murdered,  
4 character assassinated, black-listed, de-funded, had their social security and state benefits cut-off or  
5 blockaded and more.

6 The FBI, special investigators and Congressional researchers say that there were only a  
7 handful of powerful people capable of operating attacks of this scale and sophistication against the  
8 Plaintiffs.

9 In Sweitzer, T. (1996, September). *Kill or be killed*. [Electronic version] Campaigns &  
10 Elections, 17(9), 46-47., the process used to “kill” others is described just as it was used against the  
11 Plaintiffs. In <https://theintercept.com/2014/02/24/jtrig-manipulation/> the formal process of hired  
12 character assassination, exactly as it was used against the Plaintiffs, is detailed. The well-  
13 documented process is further outlined in the articles:

14 **[Character assassination - Wikiquote](#)**

15  [https://en.wikiquote.org/wiki/Character\\_assassination](https://en.wikiquote.org/wiki/Character_assassination)

16  
17 **Character assassination** is at once easier and surer than physical assault; and it involves far  
18 less risk for the assassin. It leaves him free to commit the same deed over and over again, and may,  
19 indeed, win him the honors of a hero in the country of his Plaintiffss. Alan Barth, The Rights of  
20 Free Men: An Essential Guide to Civil Liberties (1984).

11 **Greenwald:** Leaked Docs Reveal Agency's (**GCHQ**) Digital Propaganda Toolkit. Latest  
12 files provided by Edward Snowden show **GCHQ's** ability to 'manipulate' the Internet using  
13 'hacker's buffet for wreaking online havoc' by Jon Queally, staff writer Common Dreams, July 15,  
14 2014 ...

15  
16 All of the attackers people are U.S. Government senior officials working in the White House  
17 and/or the U.S. Senate and/or their Silicon Valley oligarch political campaign financiers.

18 Every one of the attack technologies and resources were previously deployed against  
19 Presidential candidates in past elections. The providers, operators and compensation conduits of the  
20 attack services are known to law enforcement. The payment records have been uncovered, revealing  
21 that over \$30M of attack services billings and/or in-kind services exchanges were incurred by the  
22 attackers. By way of contrast: \$30M is the typical WEEKLY ePlaintiff 42enditure for opposition  
23 character assassination programs in a U.S. Presidential election using Gawker, Gizmodo, Facebook,  
24 Google and Fusion GPS media attack services.

25 Plaintiffs, and their peers, swear, warrant and certify that this is true. experts can prove in a  
26 Grand Jury, Civil Jury and Congressional Hearing that White House staff, U.S. Senators and their  
27 Silicon Valley financiers did order, operate and finance a massive “hit-job” on Plaintiffs as  
28 revenge/retribution/vendetta because Plaintiffs reported an organized crime activity involving well

1 known public officials.

2 Every public official who was, by law, supposed to help Plaintiffs have, so far, been proven  
3 by investigators to have been in direct business competition with Plaintiffs.

4 The effort made by political executives to steer the annual ePlaintiff 42enditure of trillions  
5 of dollars of taxpayerfunds and stock market profits to one group of friends or another is called  
6 “Cronyism” and it is operated by U.S. Senators and White House staff for illicit profiteering  
7 purposes.

8 The corrupt public officials involved here used real estate, stock market ownership,  
9 revolving door payola jobs and investment bank accounts to profiteer from each deal that the  
10 charged officials pushed.

11 FBI-level tracking of the covert accounts, trusts, shell corporations, family members and  
12 associates of every public official involved in this case proves that they made money by competing  
13 with Plaintiffs business ventures. The Panama Papers Leaks, Swiss Leaks, Snowden Leaks, and all  
14 of the other leaks prove this as fact.

15 The Assassins:

16 - *How A Modern Character Assassination and Political "Kill Order" Was Executed By*  
17 *Politicians, and their Silicon Valley Oligarchs, Against The Plaintiffs:*

18 This is how a vendetta, revenge and political payback operation was implemented against an  
19 American taxpayerwhen a Senator issued a "kill order" on a whistle-blower

20 Investigations have revealed that the White House and California Senators hired the  
21 character assassination and defamation attack services:

22 ***[Cardinal & Pine](#); Pacronym, Acronym; [The Americano](#); [Investing in US](#); Shadow Inc;***

3 ***USA; PR Firm Sunshine Sachs; The American Independent Foundation; Covington and***  
4 ***Burling; BuzzFeed; [The American Independent](#); Perkins Coie; Secondary Infektion; Wilson***  
5 ***Sonsini*** and thousands more to run hit-jobs, character assassinations, dirty tricks and economic  
6 reprisal attacks on any targets who reported the crimes. Each of those companies are now under  
7 federal and civil investigation. Most of these businesses offer the service of manipulating elections  
8 and news coverage in order to steer stock market profits into the pockets of billionaire clients at the  
9 expense of the taxpayer and Democracy. They hide their transactions via money-laundering. All of  
10 these services, when focused on individual citizens, are lethal.

11       These attackers deserve to be punished for the rest of their lives for taking away the lives of  
12 others in exchange for remuneration. Any company who is corrupt enough to hire any of these  
13 assassins should be forced out of business.

14       These attack services are responsible for 90% of the "Fake News" problem in the world  
15 because they are the authors of most fake news. Congress must act to make these kinds of  
16 companies illegal!

17       These digital assassination services offer hit-jobs, character assassinations and economic  
18 reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution  
19 and vendetta executions.

20  
21  
22  
23  
24

1  
2 **EXHIBIT 15 – More Details On The Specific Attacks And Harms Against**  
3 **Plaintiffs**

4 **Recent leaks and hacks published by ICIJ, Glenn Greenwald, The Guardian,**  
5 **ProPublica and other sources have revealed that White House staff like John Podesta, Robert**  
6 **Gibbs, John Podesta and others; Department of Energy staff like Steven Chu, Lachlan**  
7 **Seward, Matt Rogers and others; Their financiers from Google like Eric Schmidt, Elon Musk,**  
8 **Larry Page and others; contracted intelligence agency spies to assassinate the lives and**  
9 **income of Plaintiffs.**

10  
11  
12 -----  
13  
14 All of these tactics (And More...) are text book procedures operated daily by CIA, FSB,  
15 Mossad, In-Q-Tel, NSA, Chinese Secret Police in the course of their intelligence work. These  
16 tactics are widely detailed in leaked CIA and FSB manuals and discussed in length by Glenn  
17 Greenwald, Edward Snowden, Julian Assange and others in their writings. California Senators,  
18 White House staff and Silicon Valley tech oligarchs are the only known groups to aggressively seek  
19 out and hire former employees of the CIA, FSB, Mossad, In-Q-Tel, NSA, and Chinese Secret  
20 Police.

21 The volume and high-end type of attacks, operated against Plaintiffs, prove that the  
22 assertions of crimes, at the scope and level asserted in this document, must have happened because  
23 there is no other possible reason for these people to have attacked Plaintiffs in these ways.

24  
25 The attackers all knew each other, benefited from each others actions, shared the same  
26 motivations and profits, were all competitive to Plaintiffs, had each threatened Plaintiffs and had  
27 their staff whistle-blow on them that they engaged in these crimes! The suspects attacks prove the  
28 suspects actions and affiliations.

1 Federal law enforcement, the United States Congress and the highest level investigators in  
2 the U.S., and abroad, have documented (per the “FISA Memo”, Congressional Reports and federal  
3 employee testimony) and proven the fact that the Obama Administration regularly engaged in the  
4 operation of retribution, vendetta and reprisal campaigns known as “hit-jobs” against domestic  
5 natural born U.S. citizen domestic taxpayers. The Federal Court, in at least one previous court case,  
6 has ruled that the corporation in which Plaintiffs were an investor, in this particular matter, were the  
7 Plaintiffs and target of a number of these attacks designed to inflict permanent medical, emotional,  
8 character assassination, brand negation, economic and career damage.

9  
10 **Additional Examples Of The Attackers Methods:**

26 **Graham Questions Dems' Motives On Brett Kavanaugh Sexual Assault Allegations**  
27 (dailycaller.com)

28

1           **\*\* !!!!! Mueller Hears That Silicon Valley Has Been Manipulating The Entire BREXIT**  
2 **Campaign !!!!!** Second former employee of controversial data firm to be questioned by special  
3 counsel’s inquiry into Russia collusion. Per Carole Cadwalladr: Brittany Kaiser is said to be  
4 cooperating fully with the Mueller inquiry. A director of the controversial data company Cambridge  
5 Analytica, who appeared with Arron Banks at the launch of the Leave.EU campaign, has been  
6 subpoenaed by the US investigation into possible collusion between the Trump campaign and the  
7 Russian government. A spokesman for Brittany Kaiser, former business development director for  
8 Cambridge Analytica – which collapsed after the Observer revealed details of its misuse of  
9 Facebook data – confirmed that she had been subpoenaed by special counsel Robert Mueller, and  
10 was cooperating fully with his investigation. He added that she was assisting other US  
11 congressional and legal investigations into the company’s activities and had voluntarily turned over  
12 documents and data.

13           Kaiser, who gave evidence to the UK parliament last April in which she claimed Cambridge  
14 Analytica had carried out in-depth work for Leave.EU, is the second individual connected to the  
15 firm subpoenaed by the special counsel. The Electoral Commission has said its investigation into  
16 Leave.EU found no evidence that the campaign “received donations or paid for services from  
17 Cambridge Analytica ...beyond initial scoping work”. Damian Collins, chairman of parliament’s  
18 inquiry into fake news, said it was “no surprise” that Kaiser was under scrutiny by Mueller because  
19 “her work connected her to WikiLeaks, Cambridge Analytica and [its parent company] SCL, the  
20 Trump campaign, Leave.EU and Arron Banks”. He said it was now vital Britain had its own inquiry  
21 into foreign interference: “We should not be leaving this to the Americans.”  
22

23           **\*\* CBS NEWS 60 MINUTES Lara Logan "I’m Being ‘Targeted’ . Per Tamar Auber:**  
24 former CBS News foreign correspondent Lara Logan spoke with Fox News Sean Hannity about her  
25 recent comments slamming the media as “mostly liberal.” Logan told Breitbart podcaster Mike  
26 Ritland the remarks made on his show — which drew widespread attention online — amounted to  
27 “professional suicide.” Defending her remarks on Hannity’s show, Logan said that as the result of  
28 her speaking out about how the media is “mostly liberal” she has been targeted because she is an

1 independent voice. “Any journalists who are not beating the same drum and giving the same talking  
2 points,” she insisted “pay the price” for not going along with the liberal crowd. She also called out  
3 her targeters by name.

4 “I know they’re going to come after me,” she told Hannity. “Michael Calderone who is at  
5 the Huffington Post. I can give you the script now. I can tell you who the players are. Joe Hagan.  
6 Brian Stelter.” She added: “They smear you personally. They go after your integrity. They go after  
7 your reputation as a person and a professional. They will stop at nothing. I am not the only one. And  
8 I am just, I am done, right, I am tired of it. And they do not get to write my story anymore. They  
9 don’t get to speak for me, I want to say loudly and clearly to anybody who is listening, I am not  
10 owned. Nobody owns me, right? I’m not owned by the left or the right.” Logan made headlines  
11 recently when, during a scorched earth podcast interview with Ritland, she said that there was a lot  
12 of “weight” in most news organizations on “one side of the political spectrum.” “The media  
13 everywhere is mostly liberal. But in this country, 85 percent of journalists are registered Democrats.  
14 So that’s just a fact, right?” she told Ritland. She also trashed reporting based on single, anonymous  
15 government sources. “That’s not journalism, that’s horseshit,” Logan stressed. “Responsibility for  
16 fake news begins with us. We bear some responsibility for that, and we’re not taking ownership of  
17 that and addressing it. We just want to blame it all on somebody else.”

18  
19 **\*\* Internal documents from a private Israeli intelligence firm called Psy-Group** show  
20 that, at the time of many incidents, the company, and possibly other private investigators, were  
21 targeting U.S. citizens because they spoke up about crimes. Psy-Group’s intelligence and influence  
22 operations, which included a failed attempt in the summer of 2017 to sway a local election in  
23 central California, were detailed in a New Yorker investigation that I co-wrote earlier this month.  
24 Before it went out of business (ie: changed it's name) , last year, Psy-Group was part of a new wave  
25 of private-intelligence firms that recruited from the ranks of Israel’s secret services and described  
26 themselves as “private Mossads.” Psy-Group initially stood out among its rivals because it didn’t  
27 just gather intelligence; its operatives used false identities, or avatars, to covertly spread messages  
28 in an attempt to influence what people believed and how they behaved. In 2016, Psy-Group held

1 discussions with the Trump campaign and others about conducting covert “influence” operations to  
2 benefit the candidate. Psy-Group’s founder and C.E.O., Royi Burstien, a veteran Israeli intelligence  
3 officer who established the firm in 2014, told me that his talks with the Trump campaign went  
4 nowhere. The company’s posturing, however, attracted the attention of Robert Mueller, the special  
5 counsel, who has been investigating interference in the 2016 Presidential race.'

6  
7       **\*\* FED BOMBHELL: Fusion GPS Bribed Dozens of MSM Journalists With Cash To**  
8 **Run Character Assassinations.** High-ranking FBI insiders are pulling back the curtain on Fusion  
9 GPS, the firm that commissioned and spread the bogus Trump dossier. It appears the embattled  
10 intelligence firm was quite busy paying off Big Media reporters, according to federal sources who  
11 have traced dozens of transactions between TD Bank and media members as well as media  
12 organizations, sources confirm. But stunningly, Big Media organizations have employed Fusion  
13 GPS to dig dirt on politicians and D.C.’s elite — namely Donald Trump. “Fusion GPS was on the  
14 payroll of the media and in turn had members of the media on its payroll,” one FBI insider said. FBI  
15 insiders confirm Fusion GPS employed law firms as well as shell companies to send and receive  
16 funds to and from media and reporters. But the embattled firm also used its accounts at TD Bank to  
17 directly commission reporters. Likewise, Fusion GPS received funds from media companies into its  
18 own accounts at TD Bank, FBI insiders said, “There are dozens of payments from the media  
19 flowing into their (Fusion GPS’) account,” one federal law enforcement official said. “One  
20 company wired funds to Fusion (GPS) more than a dozen times.” Why would media companies  
21 commission Fusion GPS? Likely to dig dirt on enemies or secure records that reporters could not  
22 legally obtain, one federal law enforcement insider said. One FBI insider said the payments to  
23 Fusion GPS coincide with Donald Trump’s run for the White House. The payments were made  
24 between Sept. 2015 and Sept. 2017, records show. The unthinkable: The mainstream media paying  
25 Fusion GPS for dirt on Trump to the same firm the Democratic National Committee paid to fund the  
26 bogus Trump dossier. And at the same time Fusion GPS bribing journalists to place stories — likely  
27 negative about Trump, as well as spread the bogus Trump dossier around.

5 Group). These were based on [four classified GCHQ documents](#) (  
6 [http://msnbcmedia.msn.com/i/msnbc/sections/news/snowden\\_anonymous\\_nbc\\_document.pdf](http://msnbcmedia.msn.com/i/msnbc/sections/news/snowden_anonymous_nbc_document.pdf) )  
7 presented to the NSA and the other three partners in the English-speaking [“Five Eyes” alliance](#)  
8 ( [http://www.theatlantic.com/politics/archive/2013/06/is-the-five-eyes-alliance-conspiring-to-spy-](http://www.theatlantic.com/politics/archive/2013/06/is-the-five-eyes-alliance-conspiring-to-spy-on-you/277190/)  
9 [on-you/277190/](http://www.theatlantic.com/politics/archive/2013/06/is-the-five-eyes-alliance-conspiring-to-spy-on-you/277190/) ) . Today, we at *the Intercept* are publishing [another new JTRIG document](#)  
10 ( [https://firstlook.org/theintercept/document/2014/02/24/art-deception-training-new-generation-](https://firstlook.org/theintercept/document/2014/02/24/art-deception-training-new-generation-online-covert-operations/)  
11 [online-covert-operations/](https://firstlook.org/theintercept/document/2014/02/24/art-deception-training-new-generation-online-covert-operations/) ) , in full, entitled “The Art of Deception: Training for Online Covert  
12 Operations.”

13 By publishing these stories one by one, Plaintiffs NBC reporting highlighted some of the  
14 key, discrete revelations: the monitoring of YouTube and Blogger, the targeting of Anonymous with  
15 the very same DDoS attacks they accuse “hacktivists” of using, the use of “honey traps” (luring  
16 people into compromising situations using sex) and destructive viruses. But, here, I want to focus  
17 and elaborate on the overarching point revealed by all of these documents: namely, that these  
18 agencies are attempting to control, infiltrate, manipulate, and warp online discourse, and in doing  
19 so, are compromising the integrity of the internet itself.

## 20 **Recap Of Attack Tactics Used**

21 *POLITICAL KILL ORDERS AND STATE-SPONSORED CHARACTER ASSASSINATIONS - How A*  
22 *Modern Character Assassination and Political "Kill Order" Is Executed By the Silicon Valley*  
23 *Oligarchs and their total control of propaganda media. Patrick George At Jalopnik attacks*  
24 *outsiders under contract with Elon Musk and the DNC. Silicon Valley campaign finance oligarchs*  
25 *hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their*  
26 *financial partnership with the DNC's Google to push the character assassination articles to the top*  
27 *of Google web products and searches.*  
28

1  
2 *Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin*  
3 *boys that report to boy-loving sleaze-tabloid oligarch Nick Denton. They created the Fake News*  
4 *crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles*  
5 *designed to damage political enemies of the Socialists. They coordinate a large number of the*  
6 *character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other*  
7 *propaganda outlets. These Millennial boys are "Media Rapists" and should be treated as abusers. -*  
8  
9 *How and why did a Donald Trump stripper-date named "Stormy" or an Elon Musk sex party or a*  
10 *Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at*  
11 *about the same time in news history? -*

12  
13 *In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end*  
14 *people's lives in other creative ways. - It is all part of the modern trend in vendetta, revenge and*  
15 *political payback when a Senator or a tech oligarch issues a "kill order" on an opponent. - The*  
16 *client does not like to get their hands dirty so the actual social hit job is performed by companies*  
17 *such as: IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC);*  
18 *K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP);*  
19 *Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think*  
20 *Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The*  
21 *Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Undercover Global Ltd*  
22 *(DNC/GOP) Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge*  
23 *Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs*  
24 *(DNC); Covington and Burling - (DNC), BuzzFeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini -*  
25 *(DNC) and hundreds of others...These are the people and companies that except cash, revolving*  
26  
27  
28

1 door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes  
2 and real estate in exchange for destroying the lives of others. -

3  
4 These attackers deserve to be punished for the rest of their lives for taking away the lives of others  
5 in exchange for cash. Any company who is corrupt enough to hire any of these assassins should be  
6 forced out of business. These attack services are responsible for 90% of the "Fake News" problem  
7 in the world because they are the authors of most fake news. Congress must act to make these kinds  
8 of companies illegal! - These digital assassination services offer hit-jobs, character assassinations  
9 and economic reprisal programs to famous billionaires and corrupt politicians who are seeking  
10 revenge, retribution and vendetta executions. -

11  
12  
13 In the case of reporters getting targeted for attacks, President Donald Trump has been accused by  
14 the liberal corporate media of whipping up a hateful frenzy against the press. But while CNN's Jim  
15 Acosta grandstands against Trump, real journalists are still reeling from the draconian  
16 extrajudicial measures that Barack Obama and his administration used to target them for ePlaintiff  
17 42osing truth. - This secretive targeting occurred while Obama speechwriter and hate-filled  
18 ANTIFA supporter Ben Rhodes was running "Operation Echo Chamber," which reportedly  
19 continues, in which he fed information to willing corporate media scribes. "They literally know  
20 nothing," Rhodes said of the twentysomething journalists he easily manipulated. - The Freedom of  
21 the Press Foundation's Trevor Timm published documents showing how former attorney general  
22 Eric Holder changed the rules to more effectively intimidate and surveil members of the press. -

23  
24  
25  
26 Timm writes: "Today, we are revealing—for the first time—the Justice Department's rules for  
27 targeting journalists with secret FISA court orders. The documents were obtained as part of a  
28 Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First

1 *Amendment Institute at Columbia University.” - Obama is also clearly linked to the plot to obtain*  
2 *fraudulent FISA warrants on President Trump’s team, as evidenced by Peter Strzok and Lisa*  
3 *Page’s texts confirming that Obama was overseeing their fly-by-night operation. - Larry Schweikart*  
4 *reported for Big League Politics: For months pundits and researchers have been pondering the*  
5 *mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit The*  
6 *U.S. Government . Some have argued that Assistant Attorney General Rod Rosenstein knew the*  
7 *FISA was bogus when he extended it. Others have wondered if Special Counsel Robert Mueller*  
8 *knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other*  
9 *still, that Mueller was fooled by the FBI. This is what President Trump calls “SPYGATE”. -*

11  
12 *It may well be that the surveillance that was conducted began with UK intelligence services and*  
13 *then was fed back to the White House of Barack Obama. Here’s the kicker: President Barack*  
14 *Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because*  
15 *Obama all along had legal authorization to by-pass the normal court vetting process. According to*  
16 *50 U.S. Code 1802, the “Electronic Surveillance Authorization” () “Foreign intelligence in relation*  
17 *to a US person (Trump or his associates) is information that’s necessary for the US to protect*  
18 *against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power .*  
19 *. . OR . . . information relevant to national defense/security of the US, or the conduct of foreign*  
20 *affairs of the U.S.” Such an authorization by Obama required certification by Attorney General*  
21 *Loretta Lynch that must be logged with the FISC court. (“The [AG]+ shall immediately transmit*  
22 *under seal to the court [FISC] a copy of his certification.”) -*

23  
24  
25  
26 *In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at*  
27 *least with the DOJ and the FISC. - This is what they are hiding. - However, the Act requires the AG*  
28 *to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of*

1 these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened,  
2 did Lynch report—or only selectively report—to the committees in a way that excluded non-  
3 friendlies? Can you see why Adam Schiff, Mark Warner, and their ilk are terrified? - These are the  
4 playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their  
5 political and business enemies: - Government agency bosses sometimes solicit the target victims  
6 with false promises of future loans, contracts or grants from their agency and cause the target  
7 victims to ePlaintiff 42end millions of dollars and years of their time for projects which those  
8 government bosses had covertly promised to their friends. They use the target victims as a  
9 “smokescreen” to cover their illegal government slush-funds for the victims competitors and  
10 personal enemies.  
11

12  
13 By using this tactic, the attackers can drain the target victims funds and force them into an  
14 economic disaster in plain view of everyone without the government bosses fearing any reprisal for  
15 their scam.- Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other  
16 IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their  
17 profiles, texts, and inter-member communications, since those companies were started, hacked or  
18 purchased. The attack service providers use Palantir and In-Q-Tel financed data analysis software  
19 to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion  
20 and social conflict exploitation opportunities. If you had a bad date with someone, that someone  
21 will be hunted down and convinced to help harm, #metoo or "rape charge" the intended target.  
22  
23

24  
25 All dates involve a search for sex, so the likelihood that a sexual disappointment experience will  
26 exist in each persons dating history is high. Searching every past dating email and text of a subject  
27 is quite easy with modern software and hacking techniques. A synthetically amplified, PR-agency  
28 optimized sex scandal can destroy any target. Your dating experiences from the 70's or 80's will

1 come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you  
2 were unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your  
3 date for sex" and related twisted narratives that are designed to shame you, the target. If you try to  
4 get a date in the future, your potential date will be contacted by a third party who will slander and  
5 libel you to make sure your potential first date gets canceled.

6  
7  
8 Your social life will, essentially, end. Every photo on every dating site is cross checked with every  
9 other photo on the internet in order to cull your Facebook, LinkedIn, Snapchat and other social  
10 media together to create a total psychological manipulation profile data file on you. A single photo  
11 on a dating site can be cross searched on every mugshot archive, photo album and corporate  
12 database in the worth within minutes using modern super-computers.

13  
14 Your sex life will be on public record in a flash.- Social Security, SSI, SDI, Disability and other  
15 earned benefits are stone-walled. Applications of targets are "lost". Files in the application process  
16 "disappeared". Lois Lerner hard drive "incidents" are operated in order to seek to hide  
17 information and run cover-ups. - Government officials and tech oligarchs contact members of the  
18 National Venture Capital association (NVCA) and created national "black-lists" to blockade target  
19 victims from ever receiving investor funding.

20  
21  
22 This was also confirmed in a widely published disclosure by Tesla Motors Daryl Siry and in  
23 published testimony. If Silicon Valley political campaign finance oligarchs black-list you (see the  
24 "AngelGate" Scandal and the "High Tech No Poaching Class Action Lawsuit" cases) you will never  
25 get investor funding again. - FOIA requests are hidden, frozen, stone-walled, delayed, lied about  
26 and only partially responded to in order to seek to hide information and run cover-ups.- State and  
27 federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines  
28

1 had passed that they, the government officials, had stonewalled and obfuscated applications for, in  
2 order to force these deadlines that they set, to appear to be missed.

3  
4 Nobody has been able to find a living billionaire who is not a clinical sociopath. Each of the  
5 billionaires hold parties, conferences, and snooty get-togethers, annually, where they gather people  
6 together who, they believe, are willing to think and act sociopathically like them too. At these self-  
7 aggrandizing, frat-house, indulgence-fests they seek to plot the control of media and politics to  
8 manipulate the world to be like they see it. The events are known as Bilderberg, Renaissance  
9 Weekend, TED, Aspen, etc. The "speakers" speak propaganda and indoctrination subtleties. The  
10 "round tables" push a consistent propaganda theme. The prostitutes and rent boys are carefully  
11 disguised as "assistants". Those who question the party line are black-listed from future invites.  
12

13  
14 This can bankrupt a target victim.- Some Victims found themselves strangely poisoned, not unlike  
15 the Alexander Litvenko case. Heavy metals and toxic materials were found right after their work  
16 with The U.S. Government weapons and energy facilities. Many wonder if these "targets" were  
17 intentionally exposed to toxins in retribution for their testimony. The federal MSDS documents  
18 clearly show that a number of these people were exposed to deadly compounds and radiations, via  
19 GOVT, without being provided with proper HazMat suits which GOVT officials knew were  
20 required. - Victims employers are called, and faxed, and ordered to fire target victims from their  
21 places of employment, in the middle of the day, with no notice, as a retribution tactic. - On orders  
22 from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo  
23 Media produce attack articles and defamation videos.  
24

25  
26  
27 Google locks this attack media on the internet on the top line, of the front page of all Google  
28 searches for a decade in front of 7.5 billion people, around the world. This attack-type uses over

1 \$40 million dollars in server farms, production costs and internet rigging. The forensic data  
2 acquired from tracking some of these attacks proves that Google rigs attacks against individuals on  
3 the internet and that all of Google's "impressions" are manually controlled by Google's executives  
4 who are also the main financiers and policy directors of the Obama Administration.

5  
6 This data was provided to the European Union for it's ongoing prosecution of Google's political  
7 manipulation of public perceptions. - Victims HR and employment records, on recruiting and hiring  
8 databases, are embedded with negative keywords in order to prevent the victim targets from ever  
9 gaining future employment. - Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-  
10 blowers in these matters, turned up dead under strange circumstances.

11  
12  
13 It is very possible that some of these attack services, operated by former CIA operatives, even offer  
14 discrete murder-for-sale services using high-tech assassination tools that make murders look like  
15 heart attacks and brain failures. - Disability and VA complaint hearings and benefits are frozen,  
16 delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.-  
17 Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed,  
18 delayed, hidden, or re-directed in order to terminate income potential for target victims who  
19 competed with the attackers interests and holdings.-

20  
21  
22 DNS redirection, "website spoofing" sends target victims websites to dead ends where no sales  
23 orders or customer inquiries actually get back to the target. These internet revenue activity  
24 manipulations are conducted using Google and Amazon servers. All commercial storefronts and on-  
25 line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by  
26 a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to  
27 terminate revenue potentials for the target victims.-  
28

1  
2 *Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory*  
3 *statements and disinformation about victims in front of 7.5 billion people around the world on the*  
4 *internet in order to seek to damage their federal testimony credibility by a massively resourced*  
5 *facility. - Campaign finance dirty tricks contractors are hired by campaign financiers to attack the*  
6 *friends and family members of the target victim in order to create low morale for the target victims*  
7 *psyche and motivation.-*

9  
10 *Are you getting weird headaches and hearing a "buzzing sound" in your head? The U.S.*  
11 *Government has now acknowledged that the Cuban, Chinese and other embassy "sonic attacks"*  
12 *are from a known microwave beam weapon. Any one of the technical departments of the attack*  
13 *services listed at the top of this article can build such a biological harassment weapon. It can be*  
14 *aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological*  
15 *and emotional damage using a weapon that has no visible track of trajectory. It is designed to make*  
16 *the target victim think they are "going crazy" or "hearing sounds in their head".-*

18  
19 *In one case covert political partner: Google, transferred large sums of cash to dirty tricks*  
20 *contractors and then manually locked the media portion of the attacks into the top lines of the top*  
21 *pages of all Google searches globally, for years, with hidden embedded codes in the links and web-*  
22 *pages which multiplied the attacks on Victims by many magnitudes.- Covert Cartel financier:*  
23 *Google, placed Google's lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn,*  
24 *stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-*  
25 *supporting employees in order to rig the U.S. Patent Office to protect Google from being*  
26 *prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent*  
27  
28

1 lawsuits for technology theft and a number of those lawsuits refer to Google's operations as  
2 "Racketeering", "Monopolistic Cartel" and "Government Coup-like" behaviors.

3  
4 Thousands of articles and investigations detail the fact that Google, "essentially" ran the Obama  
5 White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any  
6 in American history. Google's investors personally told Applicant they would "kill him". Google  
7 and the Obama Administration were "the same entity". Applicant testified in the review that got  
8 Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google  
9 who were financed by Federal and State funds. - Honeytraps and moles were employed by the  
10 attackers. In this tactic, people who covertly worked for the attackers were employed to approach  
11 the "target" in order to spy on and misdirect the subject. - Gawker Media, Gizmodo Media, Snopes,  
12 SPLC and other hired media assassins will be retained to produce "hatchet job" character  
13 assassination articles about you. Then those articles will be faxed, mailed and emailed to your  
14 employer and investors with a note saying: "You don't want to have anything to do with this person,  
15 do you..?" in order to get you fired from your job and get your loans or financing pulled.

16  
17  
18  
19 The attackers will use their round one attack media, that they authored, to create a round two  
20 second wave attack designed to end your life via economic warfare.- Mortgage and rental  
21 applications will have had red flags added to them in databases to prevent the targets from getting  
22 homes or apartments.- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most  
23 major IT publications have reported that hundreds of spy "back-doors" have been found on every  
24 Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and  
25 hardware component set. This means that any kid with the "key" code can open any computer,  
26 server, router, cloud-network or other network connected device and read every file, photo, video,  
27 your calendar and email on your devices at any time from any location on Earth.  
28

1  
2 *The key codes have been released to every hacker community in the world for over ten years. There*  
3 *is now no government, corporate or personal data that can't be hacked, even data from decades*  
4 *ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes,*  
5 *or less. Important meetings you had planned with potential investors, employers, clients, dates,*  
6 *suppliers and others will suddenly get canceled at the last minute.*  
7

8  
9 *They will get canceled because your enemies are reading your calendar remotely and covertly*  
10 *sending slander information to those you had hoped to engage with in order to sabotage your life.*  
11 *Nothing you have ever typed on a computer or Smartphone is safe. it WILL be acquired and it WILL*  
12 *be used against you. - McCarthy-Era "Black-lists" are created and employed against target victims*  
13 *who competed with Obama Administration executives and their campaign financiers to prevent*  
14 *them from getting funding and future employment. - Obama Administration targets were very*  
15 *carefully placed in a position of not being able to get jobs, unemployment benefits, disability*  
16 *benefits or acquire any possible sources of income.*  
17

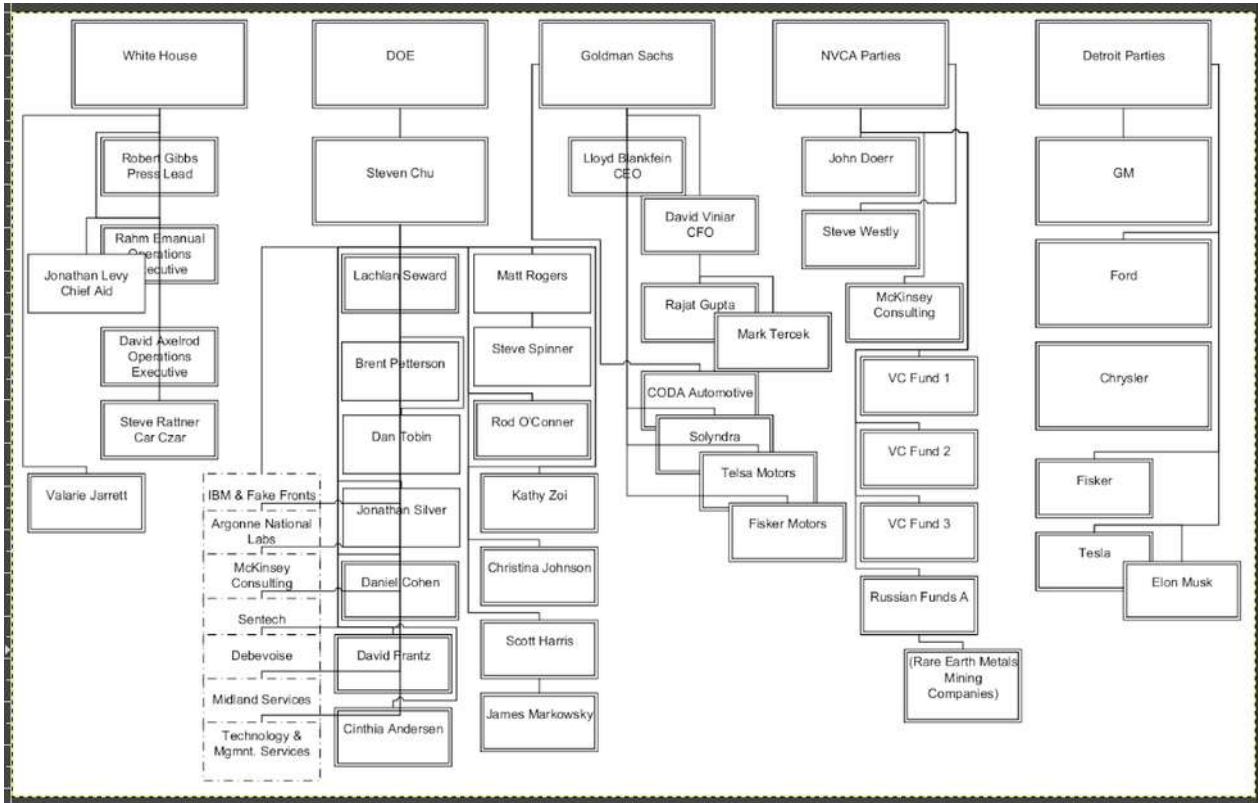

18  
19 *The retribution tactics were audacious, overt..and quite illegal. - There are thousands of additional*  
20 *Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-*  
21 *lawing such attack services. The cost of an attack on a person ranges from \$150,000.00 to over*  
22 *\$50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these*  
23 *attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even*  
24 *the smallest version of one of these "kill orders".*  
25

26  
27 *A number of modern office shootings are the results of these attacks against an individual who has*  
28 *lost everything because of the attack and has no options left. - Federal law enforcement, the United*

1 States Congress and the highest level investigators in the U.S., and abroad, have documented (per  
2 the “FISA Memo”, Congressional Reports and federal employee testimony) and proven the fact that  
3 the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal  
4 campaigns known as “hit-jobs” against domestic natural born U.S. citizen domestic taxpayers.  
5

6 The Federal Court, in at least one previous court case,has ruled that Applicants, in this particular  
7 matter, were the victims and target of a number of these attacks designed to inflict permanent  
8 medical, emotional, character assassination, brand negation, economic and career damage. The FBI  
9 has been asked to interview John Cook, Nicholas Guido Denton, Adrian Covert, Patrick George, Ian  
10 Fette and John Hermann of Gawker/Gizmodo re: their financing, payola and hit-job attacks on third  
11 parties.

**EXHIBIT 16 - Proof Of These Assertions**

Attached Exhibits, Additional Exhibits available in discovery phase, Videos referenced as exhibits, FINCEN files, FBI files, DOJ files, FTC files, FEC files, OSC files, OGE files, Pacer.gov court records, Leaked emails of perpetrators, Phone surveillance records, Bank records, Stock market transaction records, iPhone cloudcasts of meetings, Zoom recordings, DOE recordings of meetings, DOE powerpoints, Goldman Sachs emails, Private email accounts of public officials, Checking account records of public officials, Social media account postings of public officials, Meet-Up records of attendance by perpetrators, Eventbrite records of political event attendance by officials, Tax records of officials, Internet posted photographs of events attended by public officials, Uber and Lyft records of transport of persons for public officials, ad such other law enforcement and intelligence records.

1  
2  
3 **EXHIBIT 17 – Analyzing The Attackers The White House Hired**  
4

5 Let’s take a look at one of the attackers, known as “OBAMA AND DIANNE FEINSTEIN'S  
6 HIT MAN”

7  
8 Daniel Jones is Dianne Feinstein’s CIA-trained hit-man attack dog. He is sent out to target  
9 reporters and constituents that raise the ire of Ms. Feinstein. He hires Fusion GPS, Black Cube,  
10 Media Matters, Google, Gawker and other media assassins to destroy those who speak ill of the  
11 wicked witch of the West.

12  
13 He has the eyes of Tony Perkin’s in Alfred Hitchcock’s film: Psycho. He has the haircut of  
14 an out-of-touch hipster. His latest shtick is as an apologist for the 9-11 terrorists that killed  
15 thousands of American’s in the most horrific ways imaginable. You see, Daniel is very upset that  
16 the terrorists got caught and then the army threw cold water on them and they got chilly. Awwww  
17 Poor Terrorists...

18  
19 Let’s compare the cold terrorist to the innocent workers that had to jump off the top of the  
20 World Trade Center, while on fire, and watch the ground rise up to crush them into pulp. You could  
21 also compare the chilly terrorist to the passengers in the jets who watched the ball of flame race  
22 down the central aisle of their jetliners and burn all of the skin off of them as they died in agony.  
23 The old World Trade Center was very tall and those who died had a comparatively long time to  
24 watch their own deaths.

25  
26 Some people want the captured terrorists to get hauled up to the top of the new World Trade  
27 Center, set on fire, and get to go skydiving without a parachute. Daniel Jones wouldn’t like that. He  
28 has a soft spot for those who kill American’s in horrible ways.

1 Daniel uses his “opposition research” CIA tools to kill American’s every day.He puts their  
2 most shameful secrets on every online outlet, for decades, in order to end their lives simply because  
3 they said that“Dianne Feinstein is corrupt”. Why isn’t Daniel in prison? Could he use a splash of  
4 cold water to shock him into the real world?

5  
6 His perspective, as an extremist political zealot, is that he would give his life for Dianne and  
7 her crony cadre of stock market manipulators, as long as he could rationalize, like Hitler, that the  
8 ends justifies the means.Why hasn’t Congress had an investigation of this guy? He is such a  
9 narcissist that he got a feature film made about himself to promote his self-aggrandization interests.  
10 He leveraged the film to only show him as a “hero” who supports terrorists and got the film to hide  
11 all of his dirty tricks and insider machinations.

12  
13 Daniel J. Jones is a researcher and former intelligence analyst who heads the advocacy  
14 organizations [Democracy Integrity Project](#) and Advance Democracy, and works as president of the  
15 Penn Quarter Group, an opposition research firm.Prior to taking those positions, he was a staffer for  
16 U.S. Senator Dianne Feinstein (D-CA) and the Democratic staff of the Senate Intelligence  
17 Committee. [\[1\]](#)

18 Senate Republicans alleged that his organizations worked with controversial opposition  
19 research firm [Fusion GPS](#) and former British intelligence officer Christopher Steele, the operative  
20 who circulated a dossier of unverified allegations against then-candidate Donald Trump to media,  
21 politicians, and law enforcement after the 2016 election. [\[2\]\[3\]](#)

22 As a Senate Intelligence Committee staff member, Jones authored the “Senate Torture  
23 Report” that publicized CIA detention and interrogation techniques and has been used in the  
24 defense of accused terrorists. [\[4\]](#)

25 Jones is a graduate of Elizabethtown College in Pennsylvania and holds master’s degrees in  
26 teaching from Johns Hopkins University and public policy from Harvard University. [\[5\]](#) He  
27 participated in the [Teach for America](#) program before joining the FBI as an international  
28 intelligence analyst in 2003. [\[6\]](#)

1 Senate Intelligence Committee

2 In 2007, Jones joined the U.S. Senate Intelligence Committee staff of Sen. Dianne Feinstein  
3 (D-CA).

4 Jones led the Senate Intelligence Committee staff team behind the creation of the “Senate  
5 Torture Report,” which publicized CIA detention and interrogation practices during the War on  
6 Terror. [7] Many of the report’s findings were disputed by the CIA and other intelligence agencies,  
7 and its release was controversial because of the value the information it contained could potentially  
8 provide to terrorist organizations and other enemies of the United States. [8]

9 The report was published in December 2014 by the Senate’s Democratic leadership as one  
10 of their last actions before a Republican majority took control in 2015. In doing so, the Senate  
11 rejected a request from [Obama administration](#) Secretary of State John Kerry to delay the release out  
12 of concerns it would harm diplomatic efforts to build an international coalition against the ISIS  
13 Islamist terrorist network. [9]

14 Alka Pradhan, an attorney defending accused 9/11 terrorist attack planner Ammar al-  
15 Baluchi, has said that she will “forever be grateful” to Jones for the information released in the  
16 Torture Report. [10] [11] She said the information regarding CIA practices was “gold” for al-  
17 Baluchi’s defense. [12]

18 The government charged Al-Baluchi (born Abd Al Aziz Ali) with allegedly managing the  
19 travel plans and finances that delivered at least 13 of the 9/11 hijackers to the U.S., as well as later  
20 acting as a courier for Al Qaeda terrorist organization leader Osama bin Laden. [13]

21 *The Report* (Film)

22 The 2019 film *The Report* tells a fictionalized story of the creation of the torture report and  
23 positions Jones, as portrayed by actor Adam Driver, as a hero. [14] The film premiered at what the  
24 *Hollywood Reporter* characterized as a “politics-heavy” 2019 Sundance Film Festival, alongside  
25 movies celebrating U.S. Rep. Alexandria Ocasio-Cortez (D-N.Y) and “Dreamer” immigrants. [15].  
26 The film was created by DNC Feinstein advocates.

27 Penn Quarter Group

28 After leaving the Senate, Jones spent a year working for the lobbying firm of former Senate

1 Majority Leader (and board chair of the [Center for American Progress](#) think tank) [Tom Daschle](#) (D-  
2 SD) before founding the Penn Quarter Group. [16]

3 According to a report by House Intelligence Committee Republicans, Jones described Penn  
4 Quarter to the FBI in 2017 as “ePlaintiff 42osing foreign influence in Western elections,” and told  
5 FBI agents that it “was being funded by 7 to 10 wealthy donors located primarily in New York and  
6 California, who provided approximately \$50 million.” [17]

7 According to Senator Charles Grassley (R-IA), Jones told the FBI that Penn Quarter had  
8 secured the services of Christopher Steele and controversial opposition research firm Fusion GPS to  
9 “continue ePlaintiff 42osing Russian interference in the 2016 U.S. Presidential election.” Grassley  
10 alleged that Jones planned to send information generated by Steele and Fusion GPS to Congress and  
11 the media. [18]

12 In sworn testimony, former Trump campaign aide Michael Caputo would later accuse Penn  
13 Quarter of feeding false information to Jones’s former Senate Intelligence Committee colleagues,  
14 claiming that the resulting investigations forced Caputo to incur significant legal bills and receive  
15 death threats to himself and his family, even though Caputo was never charged with any  
16 wrongdoing. [19]

17 Even after the Mueller Report found no evidence that the Trump campaign engaged in any  
18 criminal conspiracy with Russian interests, Jones continued to promote theories regarding the 2016  
19 election to national media based on information allegedly uncovered by his researchers at Penn  
20 Quarter. [20][21]

21 Democracy Integrity Project

22 *For more information, see [Democracy Integrity Project](#) (Nonprofit)*

23 In 2017, Jones founded the [Democracy Integrity Project](#) as a 501(c)(4) advocacy group. [22]  
24 Funded by a range of left-wing donors, including liberal financier [George Soros](#), the organization  
25 promotes left-wing narratives around foreign interference in the 2016 U.S. presidential election and  
26 other elections around the world. [23] A spokesperson for Soros confirmed to the *Washington Post*  
27 that the Democracy Integrity Project “used Fusion GPS as a contractor.” [24]

28 In its 2018 tax filings, the Democracy Integrity Project reported paying more than \$3.3

1 million to Fusion GPS’s parent company Bean LLC and more than \$250,000 to a UK-based  
2 company at which Christopher Steele is a director for “research consulting.” [25] [26] [27] It also  
3 paid almost \$150,000 to Istok Associates, a UK-based firm run by Neil Barnett, who claims that  
4 Russia interfered with the UK’s Brexit election. [28][29]

#### 5 Advance Democracy

6 In January 2018, Jones also launched Advance Democracy, a 501(c)(3) charity. [30] This  
7 organization has not yet publicly filed any financial reports, but is also active in alleging continued  
8 Russian election interference: The *New York Times* reported that it had “flagged a number of  
9 suspicious websites and social media accounts” to authorities as promoting Russian interference in  
10 the 2019 European Parliament elections. [31]

[Democracy Integrity Project \(TDIP\) \(Non-profit\)](#)

**Each of the other attackers has a detailed investigation report on them and an active surveillance action underway by either the FBI, DOJ, FINCen, FTC, SEC, GAO, Congress, Interpol and private investigators.**

1  
2 **EXHIBIT 18 - The Suspicious Deaths**  
3

4 This felony criminal investigation case, is documented on thousands of websites and in  
5 dozens of federal court case records in which Victim/Witnesses won the case or was vindicated in  
6 the case and in thousands of news websites. Victim/Witnessess researchers and investigators  
7 disagree with any decision by any agency which causes a delay in response which puts the  
8 Victim/Witnessess in jeopardy for their life and safety. Testifying, and/or reporting about this crime  
9 has resulted in the death, potentially by murder, of the following individuals who reported to the  
10 authorities about this crime matter. Because this case involves a huge number of deaths, spies,  
11 trillions of dollars of energy industry funds, hit-jobs and epic political dirty tricks contracts there is  
12 a warning in effect to every suspect on "the list". "If any other principle whistle-blower in this case  
13 is killed, within 24 hours of their death, every person on "the list" will experience the worst possible  
14 outcome!"

15  
16 Any delay, obfuscation, cover-up, FOIA refusal or other obscuring tactic by each and every member  
17 of an agency employee or contracting entity will be prosecuted on a person-by-person basis. Each  
18 employee or official who causes, by their action, further harm to the Victim/Witnessess will be sued  
19 personally, have their assets garnished and will have a formal criminal referral authored and  
20 submitted to the FBI, DOJ, FTC, Congress and the news media. Victim/Witnessess have sued the  
21 highest level personnel in the government for corruption, launched FBI and Congressional  
22 investigations against them and had them removed from their jobs and placed under permanent  
23 surveillance. The court and news records prove this fact. Do not imagine that any reprisal action by  
24 a public agency staffer will go unnoticed or unpunished by federal law enforcement, public  
25 forensics and major independent news media investigations.

26  
27 The fact remains that the following person's were whistle-blowers or innocent victims in this  
28 crime. They died via strange, suspicious and untimely circumstances. Some of them may have been

1 murdered for helping with this case. This is not a complete list.

2 The following people associated with this case as witnesses are dead and many seem to have  
3 been murdered as reprisal for talking about this case:

4 ***Rajeev Motwani; Gary D. Conley; Seth Rich; Philip Haney; David Bird; Doug Bourn;***  
5 ***Misti Epstein; Joshua Brown; Kenneth Bellando; Moritz Erhardt; Imran Aliev; Kate Matrosova;***  
6 ***David Drye; Vincent Foster; Kathy Ferguson; Duane Garrett; Eric S. Fox; Judi Gibbs; Berta***  
7 ***Caceres; Suzanne Coleman; L.J. Davis; John Hillyer; Stanley Huggins; Sandy Hume; Shawn***  
8 ***Lucas; Gary Johnson; John Jones; John F. Kennedy, Jr.; Stephen Ivens; Mary 'Caity'***  
9 ***Mahoney; Eric Butera; Danny Casolara; John Ashe; Tony Moser; Larry Nichols; Joseph Rago;***  
10 ***Ron Brown; Bob Simon; Don Adams; Peter Smith; Victor Thorn; Lori Klausutis; Gareth***  
11 ***Williams; Daphne Caruana Galizia; James D Johnston; Dave Goldberg; Loretta Fuddy; Paul***  
12 ***Wilcher; Gary Webb; Beranton J. Whisenant Jr; Stanley Meyer; Jon Parnell Walker; Tyler***  
13 ***Drumheller; Barnaby Jack; Dominic Di-Natale; Barbara Wise; Ilya Zhitomirskiy; Jeff Joe***  
14 ***Black; Robin Copeland; John Wheeler; Ashley Turton; Michael Hastings; Antonin Scalia;***  
15 ***David Koschman; David Werner; Alex Okrent; Kam Kuwata; Larry Frankel; And hundreds***  
16 **more connected to this case who suddenly, and strangely, turned up dead in this case and,**  
17 **ironically, their deaths all benefit the suspects in this case...**

18 **Rajeev Motwani** taught Google how to Google. Suddenly, in perfect health, he was found  
19 floating face-down, dead, in his Silicon Valley swimming pool. It helps certain people that he can  
20 no longer talk.

21  
22 **Gary D. Conley** was the CleanTech competitor to, and whistle-blower on, the suspects. He was  
23 suddenly found with a bullet in his head behind Beale Air Force base. It helps certain people that he  
24 can no longer talk.

25  
26 Google programmer **Forrest Hayes**, who worked on Google search engine rigging, was suddenly  
27 found dead with the story that “he was overdosed by a Google hooker on his sex yacht”.

28

1 Google associate and Tesla Investments founder **Ravi Kumar** was also killed by his hooker.

2  
3 Deep Google investor VC liason and husband of Facebook executive **Cheryl Sandberg** was  
4 suddenly found dead with a hole in his head. The “official” story is that he was the first person in  
5 history to be killed by his treadmill.

6  
7 **David Bird** was the Wall Street Journal energy reporter who was working on a story that involved  
8 Cleantech energy connections of some of the suspects. He was working on a story about who  
9 controlled the modern energy industry and cleantech. He went for a walk and was found a long time  
10 later, dead, floating in a pond. It helps certain people that he can no longer talk.

11  
12 One **Mr. Breitbart** was a famous blogger, who railed on the web about the political manipulations  
13 of the suspects. Suddenly, he had a "heart attack" in his shower and died. It helps certain people that  
14 he can no longer talk on the blogs.

15  
16 Mr. **Karl Slym** , with Tata Motors was involved in a car deal with some of the suspects for one of  
17 the biggest Indian auto-makers. Suddenly he was a stain on the sidewalk, accomplished by his fall  
18 from the top of a skyscraper hotel. It helps certain people that he can no longer talk.

19  
20 **Doug Bourn**, The senior electrical engineer at Tesla (Google's covert partner), **Andrew Ingram** of  
21 Palo Alto, a top systems electrical engineer at Tesla; and **Brian M. Finn** the senior manager of  
22 interactive electronics, at Tesla, had deep knowledge of financial misdeeds and technical cover-ups  
23 at Tesla Motors. They were key parts of the Tesla operation. For some reason, they all got into a  
24 private airplane, in perfect health, and then the airplane plowed into the ground, killing all three at  
25 once. It helps certain people that they can no longer talk. They wrote, and helped describe, in Tesla's  
26 own federal patent filings, the fact that Tesla's batteries would kill you, maim you and/or burn your  
27 house down. Tesla did not realize this when they paid the federal patent filing fees. When Tesla,  
28 later realized this, they were forced to give all of their patents away for free. These three senior

1 engineers had deep inside knowledge of the Tesla Motors operations. Their aircraft suffered an  
2 "Engineering failure".

3  
4 The above individuals had absolute knowledge of this case and some of them were known to have  
5 been whistle-blowers in this case.

6  
7 All of these people (now over 50+ people) were in top health, had lots of money and were not likely  
8 to have died when they did. Then they died, suddenly and suspiciously, under bizarre  
9 circumstances. They were all connected to the suspects. Over 50 investment bankers connected to  
10 the suspects and their Goldman Sach's finance group are also suddenly dead under bizarre  
11 circumstances.

12       The tactics that The U.S. Government and Obama White House staff have practiced, so far,  
13 are to LIE, DENY, DEFLECT, DELETE and DIVERT. History has proven that those tactics didn't  
14 work for them. Now it is time for GOVT to pay the damages.

1  
2 **EXHIBIT 19 - The Tech Cartel**

3           The Silicon Valley Mafia is The Sandhill Road Venture Capital frat boy company bosses in  
4 Palo Alto, their National Venture Capital Association (NVCA) partners and the tech companies  
5 (Google, Tesla, Facebook, Amazon, Twitter, LinkedIn, etc.) they control. They are sometimes  
6 referred to as The Deep State. They have purchased California, New York and Washington, DC  
7 politicians (mostly Senators) who they also control.

8           They hire rogue ex-intelligence agents to operate attacks via Fusion GPS, The  
9 Gawker/Gizmodo/Jalopnik/Univision Hatchet-Job Fake Tabloid Facade (ie: Obama had White  
10 House staff: Robert Gibbs and John Podesta hire them, in association with Obama financier Elon  
11 Musk, to attack WITNESS Vehicles, Bright Automotive and ZAP Vehicles as retribution in  
12 violation of anti-trust laws), Black Cube, ShareBlue, New America, In-Q-Tel, Podesta Group,  
13 Media Matters, etc. . They spend over \$30M on each massive media attack program against  
14 competitors, reporters and outsiders.

15           They collude on black-lists, valuation controls, election manipulation, search engine rigging,  
16 domestic spying for political manipulation, stock rigging, insider trading, executive prostitute clubs,  
17 trophy wife assignments, the bribery of politicians and worse. They are felons who pay politicians  
18 to halt investigations and interdiction efforts. They are widely covered in news media articles as:  
19 sex abusers, cult enthusiasts, elitists, rapists, woman beaters, sexual work extortion operators,  
20 extremists, arrogant clones of each other, tone deaf, echo-chamber reinforcing, misogynist, racist,  
21 manipulative, insecure, covertly gay, corrupt, thieves' and other anti-social revelations.

22           The divorce and sex abuse court filings against the #PaloAltoMafia men of Silicon Valley  
23 are some of the most disturbing and sexually twisted court records you will ever read and they  
24 demonstrate a clear and decades-long pattern of collusion and depravity. From Google's "Sex  
25 Slaves" to "Sex Penthouses" to "Deaths by Prostitute"; the list is endless.

26           They are not limited to California and also operate out of New York and Washington DC.  
27 They use their monopolistic control of the internet to massively and exclusively scale services that  
28 only they control and use to abuse public privacy, human rights, invention rights and information.

1 They run their cartel like the old Italian Mafia once did.

2 Silicon Valley's Corrupt Palo Alto Mafia Network is based on "Scaled Monopolies" and  
3 covet Senate collusion ownerships of their companies.

4 They run a crime with hookers and a very big shark. Let us explain: There are millions of  
5 sharks in the ocean but only "Jaws" was big enough to earn himself (The Shark) so many feature  
6 films about trying to kill him. It was simply because he was so big and so hungry. Judging by the  
7 endless sequels, Jaws seems pretty hard to kill.

8 This is about the biggest sharks. They are from Silicon Valley.

9 Google, Facebook, Amazon, LinkedIn, Netflix, et al; exist because they operate under the  
10 criminal umbrella of the tech Cartel frat boys.

11 These guys are addicted to sex, and they are also huge assholes, so they can't keep any  
12 partners around unless they pay them to be trophy wives or "beard" wives. Buying sex from Italian  
13 escorts, young girls and New York Rent Boys is really, really expensive. This drives them  
14 to do anything to suck up huge amounts of cash.

15 These guys are also addicted to power, so they buy East and West Coast U.S. Senators,  
16 British Parliament members and partner with corrupt Russian oligarchs. Buying Senators is also  
17 really, really expensive. This also drives them to do anything to suck up huge amounts of  
18 cash.

19 These guys need, and spend, massive amounts of cash. Being a tech oligarch is really, really  
20 expensive. They can't have the IRS cutting into their hooker-budgets. They spend massive  
21 amounts on big law firms to hide money in real estate, trusts, fake charities and in a huge array of  
22 off-shore spider holes.

23 These guys can't afford to get caught so they hire In-Q-Tel, Gawker Media, Black Cube,  
24 Fusion-GPS, and a huge army of other attackers, to destroy anybody who questions their motives.  
25 Their Cartel exists because they own all of the main servers, banks, venture capital firms, tech law  
26 firms, K Street lobbyists and tech HR firms.

27 They control their entire eco-system and black-list anybody that offends them.

28 They own the internet and they delete anybody who steps in their circle.

1 Nobody can operate outside of it.

2 No start-up can compete with them without getting a hit-job put on it.

3 Since the year 2000, together, they have put over a million smaller companies out of  
4 business.

5 They exist because of "Scaling": the ability to use monopolized networks to reach everyone  
6 on Earth, have lower prices, and destroy all competition because they control all infrastructure.  
7 Scaling is all they talk about at their AngelGate "power lunches" in the back rooms of Restaurants  
8 on University Avenue in Palo Alto.

9 The FBI can't stop them because they owned James Comey, the head of the FBI.

10 The SEC, FEC and FTC can't stop them because they own the regulators at those agencies.

11 They Obama White House could not stop them because most of the Obama Administration  
12 was staffed by, and directed by, the staff of Google, Amazon and Facebook, et al.

13 Per the report at: [https://news.yahoo.com/coming-electric-car-disruption-nobody-  
14 134511726.html](https://news.yahoo.com/coming-electric-car-disruption-nobody-134511726.html)

15 you can see that the steel industry and other "Cartels" will go to great lengths to prevent electric  
16 cars, like Plaintiffs, built, from coming to market, or from coming to market without Elon Musk's  
17 insiders.

18 The Silicon Valley tech Cartel makes the Mafia look like small potatoes.

19 ***They are a criminal organization!***

2 **EXHIBIT 20 – The Political Bosses Of This Cartel Enterprise**

3  
4 If FINCEN, The FBI, ICIJ or our forensic team traces the ownerships, emails, stock brokers,  
5 family trusts, political contributions, operatives, lobbyists, bank accounts and communications and  
6 related forensic data between the perpetrators, it is obvious, to anyone with even a high-school  
7 education, that the perpetrators have conspired to engage in felony-grade crimes. AI-based, manual  
8 XKEYSCORE-class searches and ICIJ leaks have determined that the key management of this  
9 scheme included:

10  
11 **Felony Charges Against The Key Suspects Under RICO**

12 **Defendants and their Cartel operatives engaged in election law violating campaign finance,**  
13 **money laundering, illicit political quid pro quo and anti-trust violating operations, among**  
14 **other crimes.**

15  
16  
17 **Every public official who attacked Plaintiffs: A.) held stock and assets in Plaintiffs**  
18 **competitors, B.) was compensated by Plaintiffs competitors, C.) was a member of**  
19 **organizations who paid news, internet and information services to manipulate their output for**  
20 **their own unjust gain, D.) knew that their malicious assertions were false and defamatory, and**  
21 **E.) and otherwise met the legal means test to qualify as violators of federal RICO laws,**  
22 **Human Rights laws, Civil Rights standards and related State and Federal Constitutional**  
23 **rights laws.**

24 By rigging HUD, SSA, DOE, and other public benefits determinations, to harm the funding,  
25 payments, witness fees, informant fees, whistle-blower awards and stock market profits of  
26 adversaries, the Defendants engaged in felony crime. The purpose of this case is to cripple the  
27 whole crime organization via numerous charges, which shall be brought against multiple  
28 defendants, under multiple liability, which means that prosecutors will find the underlying elements

1 of of these acts and then have conspiracy on top of it, and then each and *every charge* against the  
2 perpetrators is *separate* and runs *consecutively* .

3         These RICO-related charges are easy to prove in court, as they focus on patterns of behavior  
4 as opposed to criminal acts. The government officials and their tech oligarch partners were  
5 audacious in publicly promoting their crimes and their above-the-law attitudes. RICO, here, also  
6 permits a private individual “*damaged in his business or property*” by a “*racketeer*” to file a civil  
7 suit. The government should, thus, join with Plaintiffs in this case.

8         The *Plaintiffs have proven* the existence of an “*enterprise*“.

9         The defendant(s) are *not* the enterprise; in other words, the *defendant(s)* and the *enterprise*  
10 are *not* one and the same.

11         The defendant(s) meet the construct of four specified relationships:

12         1. the defendant(s) and the enterprise: either the defendant(s) invested the proceeds of the  
13 pattern of racketeering activity into the enterprise;

14         2. the defendant(s) acquired or maintained an interest in, or control of, the enterprise through  
15 the pattern of racketeering activity;

16         3. the defendant(s) conducted or participated in the affairs of the enterprise “through” the  
17 pattern of racketeering activity ;

18         4. the defendant(s) conspired to do all of the above crimes.

19         The enterprise, herein, is the ‘prize,’ ‘instrument,’ ‘victim,’ or ‘perpetrator’ of the  
20 racketeers. A civil RICO action for this matter should be filed in state *AND* federal court.

21         We intend that both the *criminal* and *civil* components will allow the recovery of treble  
22 damages (damages in *triple* the amount of actual/compensatory damages) for Plaintiffs.

23         Our evidence has focused on *patterns of behavior AND criminal acts*.

24         We seek multiple liability (charges brought against multiple defendants, which means if  
25 prosecutors now find the underlying elements of of these acts, you have conspiracy on top of it)

26         Each and *every charge* against defendants is *separate* and runs *consecutively*. *Admissible*  
27 hearsay evidence is offered in this case. Associative evidence is allowed ( *guilt by association*  
28 meaning if a defendant profited off the crimes of an organization even if he was not directly

1 involved with the crime himself he shall still be charged as a co-conspirator and go *all the way up*  
2 the chain of command).

3  
4 This case structure will incentivize the operatives (soldati) at the corrupt law firms, CPA's,  
5 lobbyists and media outlets to flip, or roll-over, on the bosses.

6       These racketeers must *forfeit all* ill-gotten gains and interest in any business gained through  
7 a pattern of "*racketeering activity.*" Over 1000 false-front shells, trusts, dark money and PAC assets  
8 are known to be held by the defendants.

9       **These are the top corrupt parties** (*the worst of the bunch*) of the Cartel '*Enterprise*' that  
10 engaged in these crimes and/or acted as compensated operatives for the command and control of  
11 these attacks on citizens and abuses of government. Every person listed below now has a case file,  
12 and/or an active investigation underway by our investigators and/or The FBI, The SEC, The GAO,  
13 FINCEN, Interpol, ICIJ, The FTC and/or many other law enforcement and regulatory entities -

14 Eric Schmidt

15 Elon Musk

16 Mark Zuckerberg

17 Cheryl Sandberg

18 Larry Page

19 Sergy Brin

20 Vinod Khosla

21 Brian Goncher

22 Bruce Demming

23 John Doerr

24 Steve Spinner

25 Steve Westly

26 Steven Chu

27 Richard Blum

28 Paul Pelosi

1 David Axelrod

2 Jay Carney

3 Eric Holder

4 John Podesta

5 And those associates named below who supported their command and control of the actions herein  
6 charged;

7  
8 Plaintiffs personally witnessed many of them do these crimes. An AI surveillance and  
9 monitoring dossier, on each of them, is updated weekly and every additional illicit deed they engage  
10 in is reported to authorities:

11 (- **A.J. Delaurio** – Defamation-for-sale blogger \*\*)(- **Abound Solar** - Criminally corrupt

21 These parties, above, are the crooks under deep surveillance by the public and targeted for  
22 100% legal termination and exposure. Federal agencies and citizen sleuths are asked to fully  
23 prosecute them! San Francisco and Silicon Valley can't go bankrupt fast enough to make everyone  
24 happy about the downfall of these corrupt empires! these people are the dark core of the entity  
25 known as "*The Deep State*", aka, "*The Commission*", aka, "*The Silicon Valley Mafia*", aka "*The*  
26 *Paypal Mafia*", et al.

27 Most of the people listed above paid and/or took bribes!  
28

1 **EXHIBIT 21 - Felony Charges Against affiliated insider Elon Musk**

2  
3 Elon Musk is protected by President's, their White House staff, the financier's of those political  
4 campaigns and their banker: Goldman Sachs.

5  
6 Elon Musk and his Cartel operatives engaged in election law violating campaign finance, money  
7 laundering, illicit political quid pro quo and anti-trust violating operations, among other crimes.  
8

9  
10 No competitor on Earth can go up against a business that: 1.) Get's exclusive favored-nations status  
11 from The White House, 2.) Get's exclusive cash from the government that nobody else can get, 3.)  
12 Get's federal investigation waivers and NHTSA enforcement avoidance, 4.) Has their stock market  
13 assets owned by the very politicians that are supposed to regulate their industry, 5.) Get's exclusive  
14 tax payment waivers, 6.) Get's exclusive fee waivers, 7.) Has almost no enforcement against it of  
15 the laws it violates, 8.) Has the majority of it's business dealings run by Goldman Sachs, 9.) Get's a  
16 federally financed monopoly.  
17

18  
19 When you peek behind the Wizard of Oz curtain in the magical fantasy technology world of Elon  
20 Musk you find that the entire emerald utopia is built out of bribes, payola and crony tech Illuminati  
21 stock market manipulations. Elon Musk's 'wizardry' is 20% other people's stolen technologies and  
22 80% bullshit! He has purchased his internet PR facade with billions of dollars of the taPlaintiff  
23 42ayer's cash and keeps his self aggrandizing front going with extensive contracted off-shore troll  
24 farms and stock market "flash boy" algorithm computer hype engines.  
25

26  
27 Any tech person could do every single thing that Elon Musk has done with ONE THIRD LESS cash  
28 than Elon Musk has plowed through. So where does the rest of the money go?

1  
2 It goes to political candidates in quid pro quo money laundering Dark Money conduits!

9  
10 **[A Question for Tesla’s Board: What Was Elon Musk’s Mental State?](#)**

11 By [James B. Stewart](#)

12 Mr. Musk’s [tweet last week](#) — ePlaintiff 42ressing his intent to take Tesla private and  
13 declaring that he had “funding secured” for the multi billion-dollar transaction — was so impulsive,  
14 potentially inaccurate, poorly worded and thought out, and with such potentially dire consequences  
15 for himself, Tesla and its shareholders, that the board now must ask a sensitive but vital question:  
16 What was Mr. Musk’s state of mind when he wrote it?

17 “What does this say about the judgment of the person who set all this in motion?” said  
18 Charles M. Elson, director of the Weinberg Center for Corporate Governance at the University of  
19 Delaware. “That’s what the board has to find out.”

20 Read the full article [here](#)

21 **[Elon Musk needs to recognize his limitations and bring in a strong No. 2 to help run](#)**

22 **[Tesla: Analysts](#)**

23 [Tesla](#) co-founder and CEO [Elon Musk](#) must recognize he can’t do it all and agree to bring in  
24 a strong No. 2 to run day-to-day operations at the electric automaker, leading analysts told CNBC  
25 on Tuesday.

26 “We think he’s going through a founder’s dilemma. He’s clearly stretched too thin,”  
27 Consumer Edge Research analyst James Albertine said on [“Squawk Box.”](#) “I think this is Elon  
28 going through personal issues, having his own struggles with the bears, very publicly.”

1 Musk had been acting acting erratically for months even before his [take-private tweet two](#)  
2 [weeks ago](#), which raised concerns among investors and regulators in Washington.

3 In May, Musk rudely cut off analysts on Tesla’s first-quarter earnings call, [something he](#)  
4 [apologized for](#) on the second-quarter call earlier this month. He was also launching tweetstorm after  
5 tweetstorm all summer long as he was dealing with major production problems for the automaker’s  
6 new, less ePlaintiff 42ensive sedan, the Model 3.

7 The board needs to bring in a chief operating officer or co-CEO to take some of the  
8 pressures off of Musk and allow him to concentrate on being a “brilliant leader as a visionary,”  
9 contended Albertine, who on Tuesday downgraded Tesla stock to equal weight and reduced his 12-  
10 month price target to \$311 per share from \$385.

11 Shares of Tesla broke a four-session, 14 percent losing streak on Monday, and the stock was  
12 logging a strong advance in early Tuesday trading.

14  
15 [\*\*After Elon Musk’s ‘Pedo’ Tweet, Tesla Shares Fall 4% as Some Investors Worry\*\*](#)  
16 [\*\*About His Erratic Behavior\*\*](#)

17 By KEVIN KELLEHER

18 Tesla’s stock lost 4% of its value Monday following a rough weekend for its CEO Elon  
19 Musk.

20 Musk, who has taken to Twitter in recent weeks to combat his critics, drew criticism this  
21 weekend after calling a diver involved in the rescue of a Thai soccer team a “pedo.” The diver, Vern  
22 Unsworth, had criticized Musk’s effort to create a small submarine to rescue the soccer team  
23 members.

24 Thai rescuers succeeded in bringing the soccer team to safety without enlisting Musk’s help.  
25 Unsworth dismissed it as a PR stunt, telling Musk he could “stick his submarine where it hurts.”  
26 Musk then lashed back in a now deleted tweet that seemed to hint, by virtue of the British diver’s  
27 residence in Thailand, that he was a pedophile.

28 Unsworth has said he is considering legal action against Musk, while Tesla investors wasted

1 no time in ePlaintiff 42ressing their concerns about the CEO’s erratic behavior. Tesla slid 2.8%  
2 during official market hours Monday, before declining more than 1% in after-hours trading.

4 **[The many failures of Elon Musk, captured in one giant infographic](#)**

5 **[https://web.archive.org/web/20200104074824/https://stopelonfromfailingagain.com/  
6 2017/12/12/the-many-failures-of-elon-musk-captured-in-one-giant-infographic/](https://web.archive.org/web/20200104074824/https://stopelonfromfailingagain.com/2017/12/12/the-many-failures-of-elon-musk-captured-in-one-giant-infographic/)**

7 Among the more recent ‘failures’: parts of the Tesla Model 3 were being made by hand,  
8 contributing to a shortage of vehicles ready for delivery

9 Going through a rough patch at work? Well, at least you probably didn’t get ousted as CEO of your  
10 own company, watch two of your companies hover on the brink of bankruptcy or get fired while on  
11 your honeymoon.

12 All of those things have happened at various points to Elon Musk, founder of SpaceX, co-  
13 founder of Tesla TSLA, -0.33% , founder of Neuralink, co-founder of SolarCity and co-founder of  
14 X.com which eventually became PayPal , and who now has a net worth of about \$15 billion.

15 Musk’s impressive resume is littered with accomplishments, but it’s worth remembering it’s  
16 not all sunbeams and soaring stock prices.

18 **[Sorry, But Tesla’s Cool Electric Cars Can’t Compete As Long As Fracking Exists](#)**

19 **[https://web.archive.org/web/20200104074824/https://stopelonfromfailingagain.com/  
20 2017/09/20/sorry-but-teslas-cool-electric-cars-cant-compete-as-long-as-fracking-exists/](https://web.archive.org/web/20200104074824/https://stopelonfromfailingagain.com/2017/09/20/sorry-but-teslas-cool-electric-cars-cant-compete-as-long-as-fracking-exists/)**

21 If you were among the brave few who bought a Tesla Roadster in 2008, you purchased your  
22 government-subsidized \$100,000-plus electric car when a barrel of oil cost as much as \$162 in  
23 today’s dollars. “Peak oil” was an article of faith — as crude supplies ran out, ever-higher oil prices  
24 would destroy demand for the internal combustion engine and other fossil-fuel monstrosities. But  
25 now, if you’re one of the 500,000 wannabe Tesla owners who, according to CEO Elon Musk, has  
26 put down a \$1,000 deposit on a \$35,000 Model 3, the company’s new mass-market electric sedan,  
27 you’re probably just as familiar with a fashionable new green conceit. Now the article of faith is  
28 “peak demand” for oil, the idea that electric cars will soon make oil obsolete.

[You must watch this Elon Musk video of rocket fails](https://web.archive.org/web/20200104074824/https://stopelonfromfailingagain.com/2017/09/19/you-must-watch-this-elon-musk-video-of-rocket-fails/)

<https://web.archive.org/web/20200104074824/https://stopelonfromfailingagain.com/2017/09/19/you-must-watch-this-elon-musk-video-of-rocket-fails/>

Any time Elon Musk makes a mistake, it does not come cheap.

That could not be more true when it comes to SpaceX, the aeronautics company he runs. On Thursday, Musk shared a video highlighting what happens when you fail to land an orbital rocket booster.

And it is spectacular.

“Long road to re-usability of Falcon 9 primary boost stage...When upper stage & fairing also reusable, costs will drop by a factor >100,” wrote Musk.

The video consists of a lowlight reel of SpaceX, featuring a lot of rockets blowing up with captions like “Rocket is fine? It’s just a scratch.”

- Issuing new debt deviates from previous equity-based capital raises.
- The carmaker has added substantial debt to its balance sheet since its SolarCity merger last year.

[Continue reading “Tesla is making a risky move by issuing \\$1.5 billion in debt” →](#)

About 63,000 people have canceled preorders for the electric car over the course of the past year, as revealed earlier this week by [Tesla CEO Elon Musk](#) (<https://web.archive.org/web/20200104074824/https://www.inc.com/justin-bariso/elon-musk-takes-customer-complaint-on-twitter-from-idea-to-execution-in-6-days.html>) (on the company’s quarterly earnings call. (The number of orders dropped from about 518,000 to 455,000, Musk said.)

1 windshields. Plaintiffs demand a hearing, with Musk on-site, on a live Senate televised and webcast  
2 investigation hearing in Congress to go over each of these points.

3 Nobody On Earth Can Launder And Hide Illicit Cash, Or Bribe Politicians, Like Elon Musk  
4 He's worth an estimated \$39 billion, but has repeatedly said he's poor. He is a scumbag liar  
5 and a crook!

6 In one of a series of wild tweets posted last week, [Elon Musk stated](#) (  
7 <https://twitter.com/elonmusk/status/1256239554148724737> ) he would be “selling almost all  
8 physical possessions” and that he would “own no house.” He appears to be actually following  
9 through with that promise, as chronicled in a great story [in The Wall Street Journal](#) (  
10 <https://www.wsj.com/articles/elon-musk-techs-cash-poor-billionaire-11588967043?mod=e2twd> )  
11 about Musk's personal finances that you should go read.

12 According to the *WSJ*, despite being worth an estimated \$39 billion on paper:  
13 ...he has to borrow, sometimes a lot, to pay for his lifestyle and business investments without  
14 liquidating shares that help him maintain control of the companies he runs. About half his Tesla  
15 stock is pledged as collateral for personal loans, an April 28 financial filing shows. Maintaining his  
16 equity stake—about 20%, or around \$29 billion at its current valuation—is important for him to  
17 keep control over the Silicon Valley auto maker.

18 Musk also doesn't take a salary at Tesla, but he apparently became eligible for stock options  
19 worth more than \$1 billion this week. To get that money, he will need an eye-watering *\$592 million*  
20 to exercise the option, according to the *WSJ*. It's not clear if Musk has the money on hand to  
21 exercise that option or if the money raised from the house sales will be used to help pay for the sum.  
22 “Mr. Musk said he wasn't selling his possessions because he needs the money,” the *WSJ* reported.

23 The article also lists a few times Musk has said he's cash poor. Here's one example:  
24 Before Tesla went public, Mr. Musk told a judge during a contentious divorce with his first  
25 wife that he had run out of cash and had taken on emergency loans from friends to support his  
26 family and pay living expenses.

27 Here's another:

28 Last year, Mr. Musk's ability to access cash came up again during a defamation lawsuit over

1 comments he made about a man involved in the rescue of a Thai soccer team from a flooded cave in  
2 2018. A lawyer in the case said in a filing that Mr. Musk had described himself as “financially  
3 illiquid.”

4 The whole article has a lot of history about Musk, interesting information about his finances  
5 backed up by regulatory filings, and numerous quotes from Musk himself, and I sincerely  
6 recommend taking 10 minutes [to read it in full.](https://www.wsj.com/articles/elon-musk-techs-cash-poor-billionaire-11588967043?mod=e2twd) ( [https://www.wsj.com/articles/elon-musk-techs-](https://www.wsj.com/articles/elon-musk-techs-cash-poor-billionaire-11588967043?mod=e2twd)  
7 [cash-poor-billionaire-11588967043?mod=e2twd](https://www.wsj.com/articles/elon-musk-techs-cash-poor-billionaire-11588967043?mod=e2twd) )

8 Musk has Goldman Sachs, Welles Fargo and Wilson Sonsini Mobster-Class executive  
9 bankers hide his money in a rabbit warren of HUNDREDS of trusts, shell corporations and fake  
10 charities from South Dakota, to Switzerland to the Cayman Islands to Russia.

11 A federal investigation to show the tentacular diagram of scams has been demanded!

28

pedophile and incest participant"

32."Dianne Feinstein and her family covertly own many Musk interests and arranged for him to get his funds from the taxpayers. She helped sabotage his competitors in her district"

33."You can't put out the fires when his batteries ePlaintiff 42lode say fireman because Lithium fires are military class thermo-dynamics"

34."The fumes from his lithium ion thermal battery vapors give you cancer, lung and brain damage"

35.Psychologists say that Musk is a self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype addict.

36.Many of us know these facts from personal interaction with Musk, his companies and his politicians.

37.Everything in these reports can be proven in a jury trial, Congressional hearings or live TV debates but Musk would rather die than face uncontrolled public scrutiny.

38.Musk will do anything to keep this information from getting out, including hiring attack services like his Fusion GPS, Black Cube, Gawker and Gizmodo Kill services.

39.While Musk's dirty deeds sound like a bad Hollywood movie script. It all really happened and there is now massive hard copy evidence to prove it.

40.Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayercash and government resources from The U.S. Government and the California political tax pool.

41.When you follow-the-money and the insider trading, stock ownership and crony payola kick-backs. The payola between Musk, his scummy cronies and the politicians is proven.

42.The Musk empire pays bribes in billions of dollars of Google (Where Musk's boy buddy Larry Page works), Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC

43.The Musk empire pays bribes in billions of dollars of Google, Twitter, Facebook,

1 Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never  
2 reported to the FEC

3 44.The Musk empire pays bribes in free rent

4 45.The Musk empire pays bribes in Male and female prostitutes

5 46.The Musk empire pays bribes in cars

6 47.The Musk empire pays bribes in dinners at fancy restaurants

7 48.The Musk empire pays bribes in socialite party financing

8 49.The Musk empire pays bribes in Sports Event Tickets

9 50.The Musk empire pays bribes in Political campaign printing and mailing services

10 "Donations"

11 51.The Musk empire pays bribes in Secret PAC Financing. Musk's empire is a massive  
12 political financing conduit for the DNC politicians via a tentacular array of covert shell  
13 corporations, trusts, 501C's and stock bribes.

14 52.The Musk empire pays bribes in Jobs in Corporations in Silicon Valley For The  
15 Family Members of Those Who Take Bribes And Those Manage Bribes

16 53.The Musk empire pays bribes in "Consulting" contracts from McKinsey Consulting  
17 as fronted pay-off gigs

18 54.The Musk empire pays bribes in Overpriced "Speaking Engagements" which are  
19 really just pay-offs conduited for donors

20 55.The Musk empire pays bribes in Private jet rides and use of Government fuel depots  
21 (ie: Google handed out NASA jet fuel to staff)

22 56.The Musk empire pays bribes in commercial Real Estate

23 57.The Musk empire pays bribes in Fake mortgages

24 58.The Musk empire pays bribes in The use of Cayman, Boca Des Tores, Swiss and  
25 related money-laundering accounts and The use of HSBC, Wells Fargo, Goldman Sachs and  
26 Deustche Bank money laundering accounts and covert stock accounts

27 59.The Musk empire pays bribes in Free spam and bulk mailing services owned by  
28 Silicon Valley corporations

27  
28

60.The Musk empire pays bribes in the use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials

61.The U.S. Energy Dept (GOVT) has been covering-up organized political crime activities in which government funds are being used as a slush-fund to pay off political campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors via Musk political conduits.

62.Political campaign financiers and government agency staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts.

63.The basic Musk scam-deal goes like this: *"Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks..."*

64.Elon Musk is a criminal, a mobster, an asshole, a balding fake-hair wearing, plastic surgery-addicted, bi-sexual douchebag, woman-abusing, sex addicted, tax evader. Plaintiffs can put this in writing because all of those identifications regarding Musk can be proven in court and are documented in existing lawsuits and news stories.

65.Musk ePlaintiff 42loits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: “child labor electric car batteries”.

66.Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-glory look-at-me articles about himself.

67.Musk thinks he is the 'Jesus' of Silicon Valley and he will do anything to make the public think so.

68.Musk is insecure because his father was abusive and his “trophy wife” Mother is overbearing so he developed sociopath-like mental issues.

69.Musk has been professionally diagnosed as a 'psychotic narcissist.

70.He public stated on an investor call that he uses drugs and alcohol to get through the night. Plaintiffs have the tapes.

71.Musk relies on Google and the DNC Main Stream News (MSN) to hide bad news

28

about him.

72.Fake News manipulator Google is run by Larry Page. Larry is Musk's investor and bromance 'Butt buddy'. They share an apartment.

73.Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading.

74.His brother ran Solar City and is now under federal investigation for securities fraud.

75.A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.

76.Extremist politicians and their controlled news outlets refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes.

77.Investor oligarch's Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds.

78.Peter Thiel, a Musk 'boyfriend' also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: "Musk", "Tesla" or "Tesla Fire". They send trolls and fake bloggers (Many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk.

79.In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid skills.

80.There are no "Tesla Fan Boys". All of the fanatic Tesla comments on the internet are Musk's, Thiel's, Jurvetson's and Draper's fake fanboy trolls. Musk, himself, stays up late at night pretending to be a 'Tesla Fan Boy' on blogs.

81.The 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

82.Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders.

27  
28

83. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.

84. Musk never founded his companies. He took Tesla away from the founder: Marty, in a hostile take-over!

85. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. SpaceX is entirely a spy satellite operation.

86. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

87. Musk can't fix a car or build a rocket and has almost no mechanical skills he can't build or work on any of the things he made himself famous for.

88. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history!

89. Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18+ men who rig stocks and valuation bumps for Musk.

90. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing!

91. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or its suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla!

92. All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI by those who supplied this information but Musk has yet to be arrested because crooked California politicians, who own his stock, protect him from arrest.

93. Why aren't all of those parties in prison if it is so easy to prove the crime? Think back to recent history: the heads of the Department of Energy, the FBI, The DOJ and the U.S. Attorney General were kicked out of their jobs for corruption. THIS was the corruption they were doing. They all knew about this crime but they were covering it up.

94.Musk took over Tesla Motors in a hostile take-over in order to ePlaintiff 42loit lithium, cobalt and other mining corruption deals for his business partners.

95.When you take a look at the ‘lithium’ in Musk’s horrifically miss-engineered lithium ion batteries you will uncover horrible crimes engaged in to acquire it.

96.His batteries cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt.

97.Lithium ion batteries are insider trading-owned by ex-CIA boss Woolsey and GOVT Boss Chu.

98.Lithium ion batteries excrete chemicals that mutate fetuses when they burn and destroy your brain, lungs and nervous system when they burn

99.Musk's batteries kill the factory workers who make them

100.Musk's batteries cause Panasonic to be one of the most corrupt companies in the world

101.Musk's batteries poison the Earth when disposed of

102.Musk's batteries can't be extinguished by firemen

103.Musk's batteries poison firemen when they burn

104.Musk's batteries are based on criminally corrupt mining schemes like URANIUM ONE

105.Musk's batteries have over 61 toxic chemicals in them

106.Musk's batteries come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy

107.Musk's batteries and are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

108.Apple products with lithium ion batteries have been ePlaintiff 42loding and setting people on fire.

109.Over time the chemical dendrites, or deposits, inside each Musk battery grow worse and increase the chances of ePlaintiff 42losion as they age

110.Musk's LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO

1

26  
27  
28

ePlaintiff 42LODE AS TIME GOES ON AND AS THEY AGE. This is not a theory. This is a scientific fact. That is why you hear about more and more lithium batteries catching fire and blowing up.

111. Additionally, scientists also speculate that the increasing presence of low energy nuclear background energy and wifi energy in the environment is making lithium ion batteries ePlaintiff 42lode more often lately. This theory is upheld by the increasing number of FAA reports about commercial airline cabins suddenly “filling up with toxic smoke” as some lithium ion battery ePlaintiff 42lodes in someones overhead luggage. As commercial jets go higher they lose the protection of the atmosphere and are subjected to more gamma (and other) radiation from overhead. This makes the already unstable lithium ion batteries on board blow up.

112. "Bad Guys" have figured out how to make them ePlaintiff 42lode remotely in devices by making the device electronics cause the batteries to overload.

113. The dangers of lithium ion batteries are hidden by CNN and Main Stream News (MSN) because pretty much only the DNC people profit from them and the DNC folks control CNN and the MSN.

114. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging

115. United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.

116. Tom Steyer is a notorious DNC financier. His partner, Margaret Sullivan ran, the federal USAID agency, USAID sent all of the DNC campaign financiers in Silicon Valley a federal ‘report’ from USAID that said there was “A TRILLION DOLLARS OF LITHIUM IN AFGHANISTAN” and promised to give those lithium mines, EXCLUSIVELY, to the Silicon Valley venture capitalists if they funded and web search manipulated the election for Obama to take over the White House. Plaintiffs have the documents proving this. In other

1 words, a re-up of the Afghan War was caused by Elon Musk and it killed American soldiers  
2 so that Musk could buy more mansions and trophy wives.

3 117. Alkaline, NiCAD and hundreds of other battery chemistry DO NOT have all of  
4 these problems but Lithium Ion batteries get a monopoly because of politician insider  
5 trading ownership.

6 118. Tesla Motors has caused far more deaths and injuries than the world generally  
7 knows about.

8 119. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver  
9 alive and killed him.

10 120. In Florida two kids died in a Tesla, burned alive, screaming in agony.

11 121. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire.

12 122. A young woman, at the start of life, and her boyfriend were burned alive in their  
13 crashed Tesla.

14 123. There are many more deaths and crashes than you have seen in the Main Stream  
15 News (MSN) The deaths and the cover-ups are endless.

16 124. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their  
17 associates own the stock in Tesla Motors and/or its suppliers and mining companies and  
18 they cover-up and halt investigations and laws designed to save the public. They, and their  
19 crony's, spend over \$1B a year to still and troll hype about lithium ion batteries and cover-  
20 up the dangers.

21 125. Lithium ion EVs are more prone to battery fires. experts say that their lithium-ion  
22 batteries can fuel hotter fires that release toxic fumes and are more difficult to put out.

23 126. Lithium ion fires keep reigniting which explains why it takes so long and requires  
24 copious amounts of water or foam (it is an electric fire, after all) to smother the flames.

25 127. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers  
26 in 2008 and they got fired and/or warned to "say nothing" by Musk.

27 128. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos  
28 after two of them agreed to become whistle-blowers.

1 129.The DNC bosses, Congress people and federal executives own the stock in lithium,  
2 Solar and EV markets and use kickbacks from those markets (Especially via convoluted  
3 campaign finance laundering via Elon Musk) to finance the DNC.

4 130.The DNC bosses and Musk use character assassination as their main political tool  
5 against any member of the public who speaks out against their felony stock market scams  
6 and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they  
7 have teams of hired goons that they pay to destroy people's lives. They use Black Cube,  
8 Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock,  
9 Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie,  
10 Covington & Burling and a host of "media assassins".

11 131.Musk's "cabin boy": Jared Birchell, runs around covering up Musk crimes all day

12 132.Gawker and Gizmodo Media set-up the attack stories and, in paid partnership with  
13 Google, Google kicks their attack links around the globe, in front of 8 Billion people,  
14 forever. Google locks the attack articles of its enemies on the front top search results of  
15 Google search results forever, on purpose! Google and Musk are partners-in-crime.

16 133.Larry Page steals technology for Google and Musk meets with Larry Page to advise  
17 him on which technologies to steal and how to bypass FEC laws.

18 134.Musk has exceeded FEC campaign finance limits by billions of dollars via “in-  
19 kind” services.

148.MUSK'S SPACEX COMPANY Will have all of it's satellites destroyed in moments as soon as China gets pissed off: <https://www.japantimes.co.jp/news/2019/02/12/asia-pacific/chinas-space-debris-cleanup-may-cover-story-arms-u-s-satellites-pentagon/>

149.WE HAVE ASKED THE FBI, DOJ, OSC, SEC, FTC, GAO, U.S. CONGRESS, AND OTHERS, TO INVESTIGATE AND PROSECUTE MUSK AND HIS CRONY OPERATION!

150.ELON MUSK'S PAID-FOR MEDIA SHILLS COVER UP HIS CORRUPTION AND PUSH PUFF-STORIES ABOUT MUSK. NEVER TRUST THEM TO BE ANYTHING BUT BIASED PROPAGANDA OUTLETS. MANY OF THEM OWN TESLA STOCK: Electrek, Google, Facebook, CNN, Huffington Post, Dianne Feinstein's PR office, Nancy Pelosi, Steven Chu, MSNBC, PayPal, KPIX-TV, San Jose Mercury News, Any Hearst owned entity, The SF Chronicle, Motley Fool, Green Car Congress, The executive staff of the DNC, The NY Times, etc.

151.Plaintiffs saw Elon Musk commit crimes and we saw the Obama White House cover-up those crimes. Plaintiffs, and Plaintiffs associates, worked for Bright Automotive,

1 Zap Electric, Aptera, Eco Motors, The United States Department of Energy and the federal  
2 Office of Management and Budget and Tesla Motors itself. Americans have an ePlaintiff  
3 42ectations that their tax dollars will be used in a fair and legal manner and not to pay off  
4 crony campaign financiers like Elon Musk.

5 152.Americans have an ePlaintiff 42ectations that fair market competition will decide  
6 which companies get to live or die and that no campaign financiers gets to order the White  
7 House to produce the death or success decision about any American business. Elon Musk’s  
8 operation exists entirely because of criminal corruption and all of his companies must be  
9 shut down by federal law enforcement.

10 153.For nearly a decade, the U.S. Department of Energy has refused to comply with  
11 Freedom of Information Act (FOIA) requests for copies of Tesla Motors entire D.O.E.  
12 funding application documents. Former D.O.E. employees have shredded copies of those  
13 documents in order to keep them from being exposed to the public and the media. Why  
14 would they do that? Because those documents reveal felony criminal fraud by Tesla Motors,  
15 federal violations of the Section 136 law requirements and manipulations of the “hard-  
16 wiring” of the entire D.O.E. program. Those documents, which we have seen (and some  
17 Senate staff have private copies of) prove that, in a side-by-side comparison with all other  
18 applicants, the Tesla application was manipulation, rigged, false-reviewed and crony-  
19 advanced in order to pay-off certain campaign financiers and damage their competitors.

20 154.Demand that the U.S. Department of Energy stop breaking the law and comply with  
21 the FOIA requests to stop hiding the incriminating evidence in the Tesla files. Demand that  
22 the public be shown the original paper and not the later, “doctored” versions.

23 155.Plaintiffs saw Elon Musk operate an entirely illegal and unethical program based on  
24 State and Federal corruption. Plaintiffs told this, in writing and in person to the U.S.  
25 Attorney General: Eric Holder, who then quit his job after we reported these facts to him.

26 156.Plaintiffs reported that Elon Musk lied about vast number of dangers of the lithium  
27 ion chemistry he was using. Nothing was done.

28 157.Plaintiffs reported that Plaintiffs associates at The U.S. Government were having

25  
26  
27  
28

their safety reports on lithium ion danger suppressed. Nothing was done.

158.Plaintiffs reported that Elon Musk’s credit rating and financial records were fraudulent and amounted to “cooking the books”. Nothing was done.

159.Plaintiffs reported bribes paid by Musk’s lobbyists and associated to government officials in order to grease the skids for his crony payola. Nothing was done.

160.Plaintiffs reported that Goldman Sachs and Tesla Motors were operating a stock fraud pump-and-dump scam to manipulate Elon Musk’s stock holdings. Nothing was done.

161.Plaintiffs reported over a hundred illegal and corrupt actions by Elon Musk and his mob of Silicon Valley gangsters. Nothing was done.

162.If you have an ounce of morality, then you will not want to help Musk & Tesla profit from the crony political corruption that created them. Musk exists because he bribes politicians & acts as an illegal campaign financing conduit.

163.DOT/NHTSA has covered up years of reports about an acceleration surge issue that can suddenly crash your Tesla into walls and drive it off cliffs. It is either a known hacking attack or the effect of WiFi on Tesla electronics. Either can kill you.

164.Musk & Tesla are pure evil & exist because of hyper-corruption. You don’t want to contribute to their evil or be part of it in any way. You are funding evil & supporting criminal corruption by buying a Tesla or any Elon Musk owned product like Solar City, Tesla, Space X, Hyperloop, etc.!

165.Elon Musk spent more money, than any other car company in history, to do the exact same things that any other car has done, or could do, for 20 times less money. Musk’s Tesla was \$100,000.00 over budget, per car, at the time that Musk was handed his crony Dept. of Energy froms by Steven Chu. Musk has no clue how to operate a car company.

166.In one lawsuit it is noted that: “...Plaintiffs and Tesla both applied for funds at the same time, in the same funding cycle in the same program. Tesla had the historically epic number of horrific issues listed below, which were known to GOVT at the time of application, and Plaintiffs had NONE of these issues. How can any court, or rational person, believe that Plaintiffs were not intentionally bypassed, targeted and damaged for political

24  
25  
26  
27  
28

reasons while Tesla was simultaneously approved for political reasons, when the comparative metrics between the two applicants prove the largest merit disparity in the entire recorded history of the U.S. Department of Energy....the singular, and only, review criteria used by Department of Energy officials was: WHICH ONE BRIBED THE CAMPAIGN FINANCE GROUP FOR BARACK OBAMA?!"; Thus proving that Tesla exists because of organized-crime level political corruption.

167. Elon Musk’s self-driving “autopilot” feature, which keeps crashing and failing, is his attempt to scam taxpayer cash from Dept. of Transportation and Dept. of Energy public funds. He is only trying to do it to get more free federal cash.

168. The inventor of lithium ion batteries has confessed that lithium ion batteries blow up eventually. He says that deadly dendrites plague lithium-ion battery technology. The dendrites accumulate as part of the standard charging and recharging cycle and eventually cause a short circuit that often results in a smoldering or burning battery. These dendrites are destined to eventually blow up most Tesla cars and many electronic devices using lithium ion!

169. The CIA’s software designed to take over any Tesla on Earth and kill the driver, passengers and bystanders has been released in the wild and every hacker on Earth can now easily get a copy of it and kill you in your Tesla!

170. Ex-employees have leaked faked financial records, evidence of massive click-farm fake social media manipulation and evidence of unreported deaths and accidents. They say that most Tesla’s have one kind of defect or another.

171. If you read about the dirty deeds and cocaine dealings with the In-Q-Tel airplanes called “Cocaine 1” & “Cocaine 2”, & the corruption behind the company called In-Q-Tel & Musk’s software programmer who ran “The Silk Road” drug & murder service then you must be concerned that many In-Q-Tel people work for Musk. Why does Musk need dirty druggies & spies on his payroll unless he is running covert drug and business spying activities?

172. Ex-employees, Gawker writers and gay lawyers from Covington & Burling have

1 leaked stories that Elon Musk, Reid Hoffman, Larry Page are “butt buddies”.

2 173.Musk is anti-American and Anti-Worker Rights and has been caught flying in H1-B  
3 cheap offshore labor and ePlaintiff 42loiting immigrants for his deadly profits. Musk hates  
4 unions and worker rights efforts.

5 174.Elon Musk gets the Cobalt chemical to make his lithium ion batteries from slave  
6 trade and blood-money corruption in the Congo!

7 175.The lithium ion batteries that Musk uses also blow up when they naturally  
8 encounter Low Energy Nuclear (LENR) effects in the ambient environment. Millions of  
9 chemicals don’t blow up from LENR’d but lithium ion does!

10 176.If you are a Democrat then know that Elon Musk cost you the Hillary Clinton  
11 campaign because of his payola schemes. If you are a Republican, know that Elon Musk is  
12 the epitome of the worst form of DNC crony corruption you ever saw!

13 177.Musk bribed California politicians to give him hundreds of millions of dollars of  
14 taxpayerdollars & resources he never earned or worked for. He only got those crony payola  
15 perks handed to him because he operated as an illicit front for corrupt campaign financing  
16 for Dianne Feinstein, Jerry Brown, Harry Reid, Barack Obama and Hillary Clinton.

17 178.Multiple parties have filed “Demands For The Arrest of Elon Musk” with the FBI,  
18 DOJ, AG, FTC, SEC and other law enforcement agencies. It is not likely that Musk, or his  
19 companies will survive a full investigation.

20 179.Tesla and Solyndra sit on the same land in Fremont, CA. Solyndra was raided by  
21 the FBI for corruption. Tesla SHOULD be raided by the FBI for corruption. Both companies  
22 had kick-back crony payola schemes with Senator Dianne Feinstein. She owned the land,  
23 lease, HR, construction company and supplier interests and stock for both companies in one  
24 of the most massive conflict-of-interest crony financing schemes in U.S. history. Elon Musk  
25 and the Feinsteins are corruption partners.

26 180.People who see you in a Tesla think of you as a “Tone Deaf Douchebag”, “Tesla  
27 Tool!”, “Arrogant Prick”, “Ostentatious Obama Oaf”, “Sheep”, “Mindless Yuppie Scum”,  
28 “Misogynistic Silicon Valley Clone”, “Self-promoting Elitist Douche”, “Fake News Reading

1 Main Stream Boob”, “Naive Idiot” or other bad things.

2 181. Elon Musk is one of the main financiers behind Barack Obama & Hillary Clinton,  
3 both of whom have been charged with corruption. Musk endlessly tweets lies & “...No I  
4 didn’t do those bad things” BS but nobody else supports him.

5 182. Tesla financial records are “cooked” in a fraudulent manner to make the stock  
6 market valuation of Tesla a falsely manipulated factor. Musk uses “pre-orders”, by his own  
7 investors, to fake sales and wrote emails to customers asking them to put small deposits  
8 down so he could book them as fully paid sales in one of a large number of stock and loan  
9 valuation frauds. Musk and his investors practice stock market skims, pump-and-dumps and  
10 Flash Boy manipulations.

11 183. Lithium ion batteries are blowing up, starting fires &, generally, destroying  
12 people’s homes, cars, electronics & physical health. Boeing was ordered to stop flying the  
13 787 Dreamliner because it's Lithium ion batteries are catching fire spontaneously. A group  
14 of silicon valley venture capitalists forced/leveraged the government to buy & pay for these  
15 specific batteries, that they have stock in, in order to benefit their profit margins. Other  
16 batteries don’t have these problems. They knew about the dangers from day one, but put  
17 greed ahead of safety. There are thousands & thousands of reports of spontaneous lithium  
18 ion fires but the VC's who back lithium ion pay to keep this information hushed up. Millions  
19 of these batteries have been recalled for fire risk. The VC's tried to push as many as they  
20 could before they got caught. Now they are caught. These VC's & the Senators they bribed  
21 own stock in lithium mining companies too.

22 184. Tesla Motors has filed a patent which states the following , THESE ARE TESLA  
23 MOTORS WORDS warning about a crisis, the level of which they never disclosed to the  
24 consumer: ***“Thermal runaway is of major concern since a single incident can lead to  
25 significant property damage &, in some circumstances, bodily harm or loss of life. When a  
26 battery undergoes thermal runaway, it typically emits a large quantity of smoke, jets of  
27 flaming liquid electrolyte, & sufficient heat to lead to the combustion & destruction of  
28 materials in close proximity to the cell. If the cell undergoing thermal runaway is***

1 *surrounded by one or more additional cells as is typical in a battery pack, then a single*  
2 *thermal runaway event can quickly lead to the thermal runaway of multiple cells which, in*  
3 *turn, can lead to much more extensive collateral damage. Regardless of whether a single*  
4 *cell or multiple cells are undergoing this phenomenon, if the initial fire is not*  
5 *extinguished immediately, subsequent fires may be caused that dramatically ePlaintiff*  
6 *42and the degree of property damage. For example, the thermal runaway of a battery*  
7 *within an unattended laptop will likely result in not only the destruction of the laptop, but*  
8 *also at least partial destruction of its surroundings, e.g., home, office, car, laboratory, etc.*  
9 *If the laptop is on-board an aircraft, for example within the cargo hold or a luggage*  
10 *compartment, the ensuing smoke & fire may lead to an emergency landing or, under more*  
11 *dire conditions, a crash landing. Similarly, the thermal runaway of one or more batteries*  
12 *within the battery pack of a hybrid or electric vehicle may destroy not only the car, but*  
13 *may lead to a car wreck if the car is being driven or the destruction of its surroundings if*  
14 *the car is parked”. See <http://whoisonmusk.com> for more. ..*

15 185. Tesla's own staff, & every fire department, have now admitted that once a lithium  
16 ion fire gets started in a Tesla, that it is impossible to extinguish burning lithium ion  
17 material. This is Telsa's own words in THEIR patent filing, (You can look it up online)  
18 saying that the risk is monumental. Tesla has 6800 lithium ion batteries, any one of which  
19 can “go thermal”, start a chain reaction and blow up all of the rest of the 6800+ deadly  
20 batteries! Tesla drivers have been burned alive in thermal globs of flaming lithium ion,  
21 plastics & metal. Bystanders have heard their horrific screams of unutterable pain & terror as  
22 they were burned alive! Tesla fires can't be extinguished & the bodies are burned into  
23 “unrecognizable lumps of charred flesh”, according to fireman.

24 186. Lithium Ion batteries “go thermal” in peoples pockets, in your notebook, especially  
25 in a Tesla & Fisker car. There are tens of thousands of articles documenting this & there is a  
26 cover-up by the VC's that fund these things to keep this fact out-of-sight. Making Lithium  
27 Ion batteries poisons the workers who make them. It is a dangerous product that is covered-  
28 up by the Obama Administration. Panasonic knows that these batteries are deadly.

187. Tesla only exists to ePlaintiff 42loit Elon Musk’s bribes. The lithium ion batteries blow up when they get: wet, hot, bumped, over-charged, struck by energy fields, exposed to air or squashed. Lithium ion batteries poison the Earth & that they poison & kill the workers that make them. Lithium ion batteries come from war profiteering in Afghan & Bolivian corruption

188. Panasonic is Elon Musk’s partner. Panasonic is one of the most corrupt companies in the world. Panasonic has been charged, on multiple continents with: Product dumping, bribery, collusion, price fixing, anti-trust law violations, racketeering, worker abuse, toxic poisoning of workers, & other crimes. It is no wonder that Elon Musk & Panasonic are partners. Tata Motors executive Karl Slym was killed for ePlaintiff 42osing this fact.

189. Your tax dollars were stolen in order to make Tesla Motors, as part of a political financing kick-back scam. In other words, part of your paycheck was taken away from you in order to buy hookers, rent-boys & private jets for Musk & company.

190. Tesla’s are forged in criminal corruption, so anybody who drives a Tesla must be either ignorant, a weasel or one of the corrupt. The whole world now knows all of the facts in this list so you can never plead ignorance to these crimes.

191. Tesla’s have a huge amount of highly documented defects. The defects are so extensive that Tesla made buyers sign confidentiality agreements to try to hide how messed up their cars are.

192. Tesla’s have killed more people than the main-stream news has reported. The full Tesla death-list is covered up.

193. Musk lied about why he wanted to make electric cars, when, in fact, he actually poisons the environment because Tesla investors wanted to ePlaintiff 42loit toxic minerals & materials which can't be recycled in a clean manner

194. No other electric car has been so mundane, & yet had so many problems with it, since the electric car was first sold in the 1800's. There is nothing “novel” or “amazing” about the Tesla aside from dime store parlor tricks for PR hype.

195. More drunks have crashed Tesla's, than any other per capita car in the world, per

27  
28

volume of cars made

196. Elon Musk's co-founders, investors, partners, wives, investors, suppliers & employees have sued him for being a fraud &, essentially, called him an "asshole" in court records.

197. Elon Musk lied on this Department of Energy funding application and the Obama Administration refuses to allow any federal employees or witnesses to testify to these facts in public due to the devastating potential results of these facts.

198. More owners of Tesla's have been found to cheat on their taxes, & be involved in abuse-based divorces, than almost any other car brand owner. Tesla owners are bad people who rationalize their poor life choices. Owning a Tesla is a red-flag for a tax audit!

199. Elon Musk will lie, cheat & steal in order to self-aggrandize & glorify his egotistical mania. Musk has been documented engaging in over 100 lies which were later proven to be false. He has spent tens of millions of dollars to buy fake news about himself on Twitter, Facebook & Google because he is such a mentally disturbed ego-maniac.

200. None of Elon Musk's companies would exist if not for taxpayerfunded handouts given to him by corrupt politicians in exchange for illegal campaign finance deals with him & his investors.

201. Google, & Tesla, who are financial & political partners, have both been caught spying on consumers & manipulating Internet data in order to cover-up their complicity in huge political corruption & kick-back deals

202. Musk took U.S. taxpayerdollars from the government & then hired cheap off-shore labor & fired U.S. Union workers & domestic workers. He lied to & screwed the NUMMI workers that were working at the Fremont plant.

203. Musk has put over 18 surveillance devices in the Tesla. Anybody can hack those devices & monitor you. WORSE YET, foreign agents have hacked the Tesla & taken over the controls & driven Tesla's into bystanders & over cliffs.

204. When Erick Strickland was head of the NHTSA he was confronted about DOT safety cover-ups of the Tesla to protect Obama. He quit 48 hours later. The DOT safety

1 cover-ups to protect the Obama campaign finance payola scheme continue to this day.  
2 Obama’s Gibbs, Emanuel, Plouffe, Axelrod and Carney quit within a week of being  
3 threatened with exposure.

4 205. Elon Musk paid some of the largest bribes in the history of China, facilitated by  
5 Dianne Feinstein and her Chinese spy connections, in order to get his China factory opened.

6 206. Tesla’s have had a large number of recalls but Elon Musk refuses to call them  
7 “recalls”. Tesla’s have had multiple recalls for SEVERE safety dangers. DOT has been told  
8 this, in writing, for years, but wont take action in order to protect Obama.

9 207. Elon Musk is a bullshit artist who has no original ideas & wears black-turtle neck  
10 shirts (like Elizabeth Homes) to try to create a “cult” around himself & convince the world  
11 that he is a “Jesus-like” figure when, in fact, he is a clinical sociopath.

12 208. Tesla is a severe public safety hazard that has been systematically covered up by  
13 corrupt politicians.

14 209. Large numbers of Ex-CIA staff and In-Q-Tel spy staff work for Musk. Why does  
15 he need spies to build cars?

16 210. Tesla Motors batteries were promoted by those who wished to exploit the  
17 Afghanistan War for personal profit by controlling the Afghan lithium mining fields. Kleiner  
18 Perkins and Draper Fisher hyped the “...trillions of \$ of lithium in Afghanistan.”

19 211. Tesla Motors batteries blow up on their own because their chemistry causes them to  
20 be naturally defective.

21 212. Tesla Motors batteries blow up when they get wet because their chemistry is  
22 activated by water to make them explode.

23 213. Tesla Motors batteries fires cannot be put out by any common fire-fighting  
24 resources.

25 214. Tesla Motors batteries set themselves on fire.

26 215. Per Federal MSDS disclosure documents, Tesla Motors batteries emit cancer-  
27 causing vapors when they burn.

28 216. Tesla Motors Vehicles toxicity poison bystanders, nearby vehicular passengers,

27  
28

airline passengers in planes carrying said batteries in their holds, & environments where such incidents occur.

217.Tesla Motors batteries blow up when bumped by the same level of car incident that would, otherwise, only dent a normal car bumper.

218.In an accident, when a Tesla rolls over, molten metal & plastic can drip on & burn the occupants alive.

219.Tesla has multiple sexual harassment and unsafe work-place lawsuits against the company.

220.Per MSDS documents, Tesla Motors batteries emit brain damaging chemicals when they burn

221.Tesla is a stock pumping scam to profiteering on stock market peak manipulation at the expense of taxpayers.

222.Per MSDS documents, Tesla Motors batteries emit chemicals, burning, or not, that can damage an unborn fetus within the mother

223.Per MSDS documents, Tesla Motors batteries emit chemicals that can cause lung damage.

224.Per MSDS documents, Tesla Motors batteries emit chemicals that can cause liver damage.

225.Per published lawsuits & news reports, the factories that make Tesla Motors batteries have been charged with the deaths, & potentially fatal illness, of over 1000 workers & the poisoning of nearby towns.

226.Tesla Motors batteries become even more dangerous over time, particularly when tasked by electric transportation systems like Hover-boards & Tesla's. The chemistry in a lithium ion battery changes to become more unstable over time.

227.Tesla Motors batteries were never designed to be used in automobiles. Tesla used non-automotive batteries in one of the most dangerous configurations possible.

228.Tesla Motors occupants experience higher EMF radiation exposure than gasoline vehicle occupants.

25  
26  
27  
28

229. Elon Musk's Space X vehicles & Tesla Motors vehicles have both had a higher-than-average number of ePlaintiff 42losions. This has caused outside experts to doubt Musk's ability to place safety considerations over his need for hyped-up PR.

230. Leaked Sandia National Labs & FAA research videos dramatically demonstrate the unstoppable, horrific, “re-percussive accelerating domino-effect” ePlaintiff 42losive fire effect of the Tesla Motors batteries.

231. Tesla's own “Superchargers” & home 3-prong chargers have set Tesla's, homes & businesses on fire

232. Consumer rights groups contacted Erick Strickland, the head of the NHTSA, & charged him with a cover-up. He quit days later. The NHTSA then issued a safety investigation request to Tesla Motors, which would have more publicly exposed these dangers, but the safety investigation was never under-taken due to White House requests & lobbyist bribes, from Tesla, which got the investigation shut down.

233. NEPA regulations for the Tesla NUMMI factory in California & the Nevada Tesla “Gigafactory” have been violated relative to environmental safety standards.

234. Tesla Motors vehicles are not “Factory Built” “like Ford” builds cars, as Tesla professes. They are hand built in small volumes & subjected to numerous defects. Blogs have documented hundreds of defects, as listed by Tesla owners. Tesla has lost at least one LEMON CAR LAWSUIT for defective manufacturing.

235. Tesla's “showrooms” are often “pop-up” retail storefronts that are in tight-proximity retail centers, putting it's neighbors at risk of total loss from fire damage.

236. Tesla Motors vehicles have been hacked & taken over. Their doors, steering, listening devices & navigation have been taken over by outside parties. Multiple Tesla have suddenly swerved off the road, over cliffs & into other vehicles, killing bystanders & Tesla drivers.

237. Three Tesla top engineers & two competing senior executives, all of whom had whistle-blown on Tesla, who were in perfect health one day, suddenly died mysteriously the next day.

1 238. Multiple employees, founders, investors, marital partners, suppliers & others have  
2 sued Tesla Motors, &/or it's senior executives for fraud. Musk had nothing to do with  
3 creating Tesla. He ran a hostile take-over of Tesla from the founders.

4 239. In addition to suing him, many of his former staff & partners have described Musk  
5 as an “Arrogant Prick”.

6 240. Main-Stream Media (MSM) have agreed not to provide news coverage of the  
7 deadly defects of the Tesla because the MSM are owned by the same politicians who own  
8 Tesla Motors. It is now legal to sue The New York Times for hiding these deadly defects,  
9 though, particularly if your family member was injured or killed because they covered-up  
10 the danger for political reasons.

11 241. If you think the above bullet-points are bad there are over a 1000 more. Find the  
12 book “Is Elon Musk A Fraud” online or visit <https://stopelonfromfailingagain.com/> ( PER  
13 THE WAYBACK MACHINE Internet Archive) or thousands of other sites that expose the  
14 truth about Musk & Tesla!

15 242. BANKRUPT MUSK – NO CASH FOR CRONY CORRUPTION. Print this out &  
16 freely re-post it on blogs & social media. Post this on bulletin boards. Put this on the  
17 windshield of every Tesla you find. Print this out & hand these out in front of every Tesla  
18 dealership: Nobody can stop you from handing these out, it is your U.S. Constitutional First  
19 Amendment Right! Pass the word! Plaintiffs are prepared to back up every single fact on  
20 here at any public meeting with the FBI, Congress, FTC, GAO, SEC or before a Federal  
21 Special Prosecutor.

22 243. The crash of a Tesla Model X through the home of South Korean singer and actor Ji  
23 Chang Son. The crash ended with the nose of the vehicle in Ji Chang Son's living room after  
24 the Tesla malfunctioned. Hundreds of such Tesla crashes have occurred, resulting in the  
25 deaths and injuries of Tesla owners, passengers, bystanders, oncoming drivers and others.

26 244. Following accusations by a Korean celebrity that a Tesla car spontaneously drove  
27 through a wall, the carmaker has replied that the crash was “entirely due to the man’s  
28 horrible driving” in an ongoing effort, by Tesla, to steer the blame away from Tesla faulty

engineering Actor and singer Son Ji-chang (identified as Ji Chang Son in court documents) claimed he was parking his Tesla Model X SUV when the vehicle suddenly [lurched forward into his living room](#) ( <https://www.facebook.com/photo.php?fbid=1169875899799830&set=pcb.1169910243129729&type=3&theater> ).

245. In a lawsuit filed last week in California, Son claimed that the crash was due to “sudden unintended acceleration” and sought class-action status with other Model X owners. In a nod to the car’s ability to sense and avoid crashes, the lawsuit also hinted that the Model X should not be allowed take actions that the car “knows will result in the collision with a fixed object.”

246. In June, another California-based Model X owner, Puzant Ozbag, similarly claimed that his Model X spontaneously accelerated through a parking lot and into a wall. A special prosecutor is needed to investigate Tesla due to the huge number of cover-ups, by Tesla and the Obama Administration, to protect campaign financier Elon Musk. Jeff Sessions needs to hire a [lawyer](#) from outside the [government](#) appointed by Sessions as [attorney general](#) or, in the United States, by [Congress](#) to investigate a government official for misconduct while in office. A reasoning for such an appointment is that the governmental branch or agency may have political connections to those it might be asked to investigate. Inherently, this creates a [conflict of interest](#) and a solution is to have someone from outside the department lead the investigation. The term "special prosecutor" may have a variety of meanings from one country to the next, from one government branch to the next within the same country, and within different agencies within each government branch. Critics of the use of special prosecutors argue that these investigators act as a "fourth branch" to the government because they are not subject to limitations in spending, nor do they have deadlines to meet.

247. Attorneys carrying out special prosecutor functions in either federal or state courts of the United States are typically appointed [ad hoc](#) with representation limited to one case or a delineated series of cases that implicate compelling governmental interests, such as: Fraud (SEC, Complex, Cybercrime, Mortgages), Public Corruption, Money Laundering & Asset Forfeiture, Civil Rights, Racketeering Across State lines, Environmental Protection,

1 National Security, Tax & Bankruptcy, Organized Crime, or International cases where the US  
2 is a party).[1] Special prosecutors in courts of the [United States](#) may either be appointed  
3 formally by one of the three branches of government in a criminal proceeding, or when  
4 dictated by federal law or regulation, or informally in civil proceedings, and also by one of  
5 the three branches of government, or by a non-governmental entity to prosecute alleged  
6 unlawful conduct by government agents. When appointed by the [judicial branch](#) to  
7 investigate and, if justified, seek indictments in a particular judicial branch case, the attorney  
8 is called special prosecutor.[2] When appointed/hired particularly by a governmental branch  
9 or agency to investigate alleged misconduct within that branch or agency, the attorney is  
10 called [independent counsel](#). [3] When appointed/hired by the state or political subdivision to  
11 assist in a particular [judicial branch](#) case when the public interest so requires, the attorney is  
12 called [special counsel](#). [3] When appointed/hired by an organization, corporation, person or  
13 other non-governmental entity to investigate and, if justified, seek indictments against one or  
14 more government officials for acts committed under color of law, the attorney may be called  
15 [special counsel](#) or special prosecut. The term is sometimes used as a synonym for  
16 [independent counsel](#), but under the former law authorizing the independent counsel, the  
17 appointment was made by a special panel of the [United States Court of Appeals](#) for the  
18 [District of Columbia Circuit](#). The [Ethics in Government Act](#) ePlaintiff 42ired in 1999, and  
19 was effectively replaced by [Department of Justice](#) regulation 28 CFR Part 600, under which  
20 Special Counsel [Patrick Fitzgerald](#) was appointed to look into the [Plame affair](#). The Tesla  
21 Motors and Elon Musk Case requires a Special Prosecutor.

22 248. [ELON MUSK AND TESLA FACE CRIMINAL FRAUD CHARGES BY FEDS!](#)

<https://www.cnbc.com/2018/08/15/tesla-whistleblower-tweets-details-about-flawed-cars-scrapped-parts.html> )

251. Elon Musk's Incredible Smoke And Mirrors Dance. Elon Musk's untraceable money laundering and political bribery scam has now been exposed. It is called an "Invisible Bridge". It is the way that covert funds move through a secret conduit of close associates and family members. Elon Musk is at the head of the conduit and his mother, brother and associates Tim Draper, Steve Jurvetson, and George Soros round out the other tentacles. With operational links through Wells Fargo Bank, Silicon Valley Bank and Goldman Sachs, the scheme is perfected corruption. The "bridge" uses a combination of fake tax evasion charities and business assets, passes through Senator's pockets and is never visible to the FBI, the FEC and the SEC unless they have very good agents assigned to the matter.

252.NTSB, DOJ, SEC and FEC have been blocked from action by DNC lobbyists.

253.The overt and arrogant Musk misdeeds have now become "obvious and RICO-violating..."

254.He is protected by Senators Reid, Harris, Pelosi and Feinstein. They are beneficiaries of the scam. Musk's self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype. Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayercash and government resources from The U.S. Government and the California political tax pool. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs.

255.He is protected by the Clinton and Obama organizations along with most of the DNC. He finances these politicians via this scheme.

256.The U.S. Dept of Energy (GOVT) has been covering-up organized crime activities at GOVT in which GOVT funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for Fusion-GPS attacks on Silicon Valley business competitors.

257.DNC campaign financiers and GOVT staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts. The deal

1 was: Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit  
2 off of insider Musk stocks.

3 258. Elon Musk is a criminal, a mobster, an asshole, a balding fake-hair wearing, plastic  
4 surgery-addicted, bi-sexual douchebag, woman-abusing, sex addicted, tax evader.

5 259. Musk exploits poor people and child slaves in the Congo and Afghanistan  
6 to mine his lithium and Cobalt. Look up this phrase on the top search engines: “child labor  
7 electric car batteries”

8 260. Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy  
9 fake news self-glory look-at-me articles about himself. Musk thinks he is the 'Jesus' of  
10 Silicon Valley and he will do anything to make the public think so. Musk is insecure because  
11 his father was abusive and his “trophy wife” Mother is overbearing so he developed  
12 sociopath-like mental issues.

13 261. Musk has been professionally diagnosed as a 'psychotic narcissist.

14 262. Musk uses shell companies and trust funds to self-deal, evade the law and hide his  
15 bribes and stock market insider trading. His brother ran Solar City and is now under federal  
16 investigation for securities fraud.

17 263. A huge number of Tesla drivers, per capita, have been killed; pedestrians and  
18 oncoming drivers have also been killed, and Musk covers it up.

19 264. The DNC and the MSM refuse to allow any articles about Musk's crimes to be  
20 printed because they benefit from Musk's crimes.

21 265. VC's Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed  
22 from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who  
23 might disclose the Musk misdeeds.

24 266. Peter Thiel, a Musk ‘boyfriend’ also protects Musk. Musk, and his cronies, use  
25 Palantir, Google and related software to scan the entire internet every few minutes for any  
26 occurrence of the words: “Musk”, “Tesla” or “Tesla Fire”. They send trolls and fake  
27 bloggers (Many of them Russian) to put pro-Musk comments on the comments section of  
28 any blogs or articles discussing those topics and try to flood out the truth about Musk. In

28

EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills.

267. There are no “Tesla Fan Boys”. All of the fanatic Tesla comments on the internet are Musk’s, Thiel’s, Jurvetson’s and Draper’s fake fanboy trolls. Musk, himself, stays up late at night pretending to be a ‘Tesla Fan Boy’ on blogs.

268. Main Stream DNC-biased News organizations who refuse to cover the story reveal themselves as shills for Musk

269. The Silicon Valley Mafia promotes Musk as a "Tech God" leader but, in reality Musk is the same kind of "Leader" as Charles Manson, Jim Jones, David Koresh, Swami Rajneesh and Al Capone.

270. His own people have sued him for fraud and lies once they realized that Musk-ism and Scientology had so much in common.

271. The 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

272. Musk holds the Silicon Valley record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders.

273. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.

274. Musk and his culture are being sued for abuse to women and blacks and the Unions hate him for lying to them.

275. <https://stopelonfromfailingagain.com> reveals even more Musk lies.

276. Musk never founded his companies. He took Tesla away from the founder: Marty, in a hostile take-over!

277. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from anything SpaceX has launched. SpaceX is entirely a domestic spy operation.

1 278.Musk's "Mars" scheme is just a PR distraction to keep the news from looking too  
2 close at SPACEX domestic spying satellites.

3 279.The same kind of EMF radiation proven to cause cancer from cell phones exists in  
4 massive amounts in a Tesla.

5 280.Musk can't fix a car or build a rocket and has almost no mechanical skills.

6 281.If you pull a report of every VIN# of every Tesla ever built and cross reference that  
7 with insurance, repair and lawsuit records you will find that the "per volume" fire, crash,  
8 death and defect rate is THE WORST of any car maker in history! Musk's lobbyists have  
9 bribed DOT and NHTSA to stall safety inspections.

10 282.NO COMPLETE UNCOMPROMISING SAFETY REPORT ON TESLA CARS  
11 HAS EVER BEEN PUBLISHED but we have a copy of a hushed up report that would put  
12 Tesla out of business.

13 283.Musk's 'Autopilot' system is a scam to get government cash BUT IT NEVER  
14 WORKS. The Tesla 'Autopilot' has crashed into police cars, pedestrians, swamps and driven  
15 owners over cliffs.

16 284.Musk is a lying con artist and partners with Goldman Sachs to rig the stock market.  
17 Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk.

18 285.The "Silk Road" Cocaine and Murder-For-Hire website was created at Musk's  
19 SpaceX

20 286.Musk's In-Q-Tel staff ran two transport planes filled with drugs; listed as "Cocaine  
21 1" on FAA records.

22 287.Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their  
23 associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is  
24 why they criminally help cover-up investigations of Tesla!

25 288.All of this was reported, in writing, to James Comey, Patricia Rich and David  
26 Johnson at the FBI.

27 289.Tesla and Solyndra sit on the same land and share staff, contracts and lobbying.  
28 California politicians own parts of both companies.

27  
28

290.Musk took over Tesla Motors in a hostile take-over in order to ePlaintiff 42loit lithium, cobalt and other mining corruption deals for his business partners.

291.The ‘lithium’ in Musk’s horrifically miss-engineered lithium ion batteries cause wars in the Congo over mining corruption.

292.Afghanistan and Bolivian mobsters benefit from the corrupt mining deals involved with mining lithium and cobalt for Elon Musk's batteries.

293.Elon Musk opened a factory in China to try to avoid American worker safety laws because all of the labor cheats and safety violations he had engaged in, in America, were catching up to him. He neglected to provide adequate worker safety to quarantine for the coronavirus, though.

294.Elon Musk's Lithium ion batteries are insider trading-owned by ex-CIA boss Woolsey and GOVT Boss Chu and they engaged in extreme conflict-of-interest to help Musk.

295.Elon Musk's Lithium ion batteries excrete chemicals that mutate fetuses when they burn.

296.Elon Musk's Lithium ion batteries destroy your brain, lungs and nervous system when they burn.

297.Elon Musk's Lithium ion batteries kill the factory workers who make them.

298.Elon Musk's Lithium ion batteries cause Panasonic to be one of the most corrupt companies in the world.

299.Elon Musk's Lithium ion batteries poison the Earth when disposed of.

300.Elon Musk's Lithium ion batteries can't be extinguished by firemen because water makes them ePlaintiff 42lode even more and then ePlaintiff 42lode again hours later.

301.Elon Musk's Lithium ion batteries have chemical dendrites and deposition massing issues (revealed by X-Ray analysis) which makes them more and more likely to ePlaintiff 42lode as they age.

302.Elon Musk's Lithium ion batteries poison firemen when they burn.

303.Elon Musk's Lithium ion batteries are based on criminally corrupt mining schemes

27  
28

like URANIUM ONE.

304. Elon Musk's Lithium ion batteries have over 61 toxic chemicals in them.

305. Elon Musk's Lithium ion batteries come from an industry that spends billions on internet shills and trolls that they hire to nay say all other forms of energy

306. Elon Musk's Lithium ion batteries are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

307. Apple products with lithium ion batteries have been ePlaintiff 42loding and setting people on fire.

308. Over time the chemical dendrites, or deposits, inside each battery grow worse and increase the chances of ePlaintiff 42losion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EPlaintiff 42LODE AS TIME GOES ON AND AS THEY AGE. This is not a theory. This is a scientific fact. That is why you hear about more and more lithium batteries catching fire and blowing up. Additionally, scientists also speculate that the increasing presence of low energy nuclear background energy and wifi energy in the environment is making lithium ion batteries ePlaintiff 42lode more often lately. This is upheld by the increasing number of FAA reports about commercial airline cabins suddenly “filling up with toxic smoke” as some lithium ion battery ePlaintiff 42lodes in someones overhead luggage. As commercial jets go higher they lose the protection of the atmosphere and are subjected to more gamma (and other) radiation from overhead. This makes the already unstable lithium ion batteries on board blow up.

309. Tesla owner's had had more DUI's, abuse filings in divorce proceedings and crashes than any other car maker PER VOLUME. This makes Tesla the #1 car for douche bags and scummy people.

310. Tesla's own federal patent filing records confirm that Tesla batteries are as dangerous as this document reports.

311. Political activist George Soros owns part of Tesla Motors so that Soros can help conduit DNC cash.

312. The Obama Administration promised Silicon Valley oligarchs the market

1 monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign  
2 financing and search engine rigging.

3 313. United States Senators that are supposed to protect us from these deadly products  
4 own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT &  
5 NHTSA from outlawing them.

6 314. There have been thousands of defect reports filed on Tesla cars.

7 315. Tom Steyer is a notorious DNC financier. His partner, Margaret Sullivan ran, the  
8 federal USAID agency, USAID sent all of the DNC campaign financiers in Silicon Valley a  
9 federal 'report' from USAID that said there was "A TRILLION DOLLARS OF LITHIUM  
10 IN AFGHANISTAN" and promised to give those lithium mines, EXCLUSIVELY, to the  
11 Silicon Valley venture capitalists if they funded and web search manipulated the election for  
12 Obama to take over the White House. Plaintiffs have the documents proving this. In other  
13 words, a re-up of the Afghan War was caused by Elon Musk and it killed American soldiers  
14 so that Musk could buy more mansions and trophy wives.

15 316. If a Tesla battery gets wet it will ePlaintiff 42lode and cause all of the other  
16 batteries to ePlaintiff 42lode in a "cascade of ePlaintiff 42losions".

17 317. Water makes Tesla batteries ePlaintiff 42lode.

18 318. In an accident, when a Tesla rolls over, molten metal & plastic can drip on & burn  
19 the occupants alive and seal them in molten metal.

20 319. Alkaline, NiCAD and hundreds of other battery chemistry DO NOT have all of  
21 these problems but Lithium Ion batteries get a monopoly because of politician insider  
22 trading owner-ships.

23 320. Tesla Motors has caused far more deaths and injuries than the world generally  
24 knows about.

25 321. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver  
26 alive and killed him.

27 322. In Florida two kids died in a Tesla, burned alive, screaming in agony.

28 323. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire.

1           324.A young woman, at the start of life, and her boyfriend were burned alive in their  
2 crashed Tesla.

3           325.There are many more deaths and crashes than you have seen in the Main Stream  
4 News (MSN) The deaths and the cover-ups are endless.

5           326.Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their  
6 associates own the stock in Tesla Motors and/or it's suppliers and mining companies and  
7 they cover-up and halt investigations and laws designed to save the public.

8           327.Elon Musk's Lithium ion battery partners spend over \$1B a year to shill and troll  
9 hype about lithium ion batteries and cover-up the dangers.

10          328.Lithium ion EVs are more prone to battery fires.

11          329.experts say that their lithium-ion batteries can fuel hotter fires that release toxic  
12 fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains  
13 why it takes so long and requires copious amounts of water or foam (it is an electric fire,  
14 after all) to smother the flames.

15          330.Tesla employee Bernard Tse and his team warned Elon Musk about these dangers  
16 in 2008 and they got fired and/or warned to "say nothing" by Musk.

17          331.Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos  
18 after two of them agreed to become whistle-blowers. Another whistle-blower has suggested  
19 they were killed in a "Boston Brakes" hit-job.

20          332.The DNC bosses, Congress people and federal executives own the stock in lithium,  
21 Solar and EV markets and use kickbacks from those markets (Especially via convoluted  
22 campaign finance laundering via Elon Musk) to finance the DNC.

23          333.The DNC bosses and Musk use character assassination as their main political tool  
24 against any member of the public who speaks out against their felony stock market scams  
25 and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they  
26 have teams of hired goons that they pay to destroy people's lives.

27          334.Musk uses Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo  
28 Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook

1 servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "media assassins".

2 335.Musk buddies: Gawker and Gizmodo Media set-up the attack stories and, in paid  
3 partnership with Google, Google kicks their attack links around the globe, in front of 8  
4 Billion people, forever. Google locks the attack articles of its enemies on the front top search  
5 results of Google search results forever, on purpose! Google and Musk are partners-in-  
6 crime.

7 336.Larry Page steals technology for Google and Musk meets with Larry Page to advise  
8 him on which technologies to steal and how to bypass FEC laws.

9 337.Musk has exceeded FEC campaign finance limits by billions of dollars via “in-  
10 kind” services.

11 338.Had the full scope of these facts been acted on during the Obama Administration,  
12 Barack Obama would have become the first modern sitting President to have been arrested  
13 in the White House. Barack Obama was fully aware of these schemes, crony payola deals  
14 and corruption crimes and discussed the implementation of these crimes, daily, with Rahm  
15 Emanuel, David Plouffe, Steven Rattner, Robert Gibbs, John Podesta, David Axelrod, Eric  
16 Holder and Jay Carney in the Oval Office.

17 339.THIS corruption involves TRILLIONS of dollars of corrupt mining deals,  
18 automotive and energy monopolies!

19 340.THIS is why the federal budget analysis reports are showing TRILLIONS of dollars  
20 of 'untraceable' losses from the United States Treasury from 2006 up to today!

21 341.THIS is why a large number of reporters, whistle-blowers and prosecutors  
22 suddenly, and mysteriously turned up dead!

23 342.The company that Elon Musk built to usher in the electric-car future might not have  
24 enough cash to make it through the calendar year without stock markets scams being used to  
25 keep it alive.

26 343.Tesla again fell far short of its own production targets for the mass-market Model 3  
27 sedan

28 344. Another person died in a crash involving its assisted-driving feature.

1 345.Musk entered into a public dispute with federal safety regulators.

2 346.Tesla’s once high-flying stock, buffeted by a downgrade from credit analysts, has  
3 dropped 24 percent from its peak in September but Silicon Valley Vc's will pump it up to  
4 save face.

5 347.No one has raised or spent money the way Elon Musk has; Nor has any other chief  
6 executive officer of a public company made a bankruptcy joke on Twitter at a time when so  
7 much seemed to be unraveling.

8 348.Tesla is going through money so fast that, without additional financing, there is  
9 now a genuine risk that the 15-year-old company could run out of cash in 2018. The  
10 company burns through more than \$6,500 every minute, according to data compiled by  
11 Bloomberg. Free cash flow—the amount of cash a company generates after accounting for  
12 capital ePlaintiff 42enditures—has been negative for five consecutive quarters. That will be  
13 a key figure to watch when Tesla reports earnings May 2. Read the full story here:

14 <https://www.bloomberg.com/graphics/2018-tesla-burns-cash/>

15 349.In years to come, we will all look back and wonder how so many people were taken  
16 in by this shyster, who makes Enron look honest.

17 350.One of Tesla’s greatest strengths is its ability to monetize the patience and goodwill  
18 of its customers and loyal fans. The company is sitting on a staggering \$854 million in  
19 customer deposits as of the end of 2017.

20 351.Since Tesla sells its products direct to consumers, without relying on a dealer  
21 network, customer deposits are cash payments that essentially serve as interest-free loans—  
22 and these loans can stretch on for years. If Tesla were to go bankrupt, those deposit holders  
23 would likely be wiped out.

24 352.Tesla is holding customer deposits for two vehicles that aren’t even in production  
25 yet: an electric Tesla Semi (\$20,000 deposit) and a next-generation Roadster (either \$50,000  
26 down or the \$250,000 retail price paid up front to reserve a limited edition). Even customers  
27 interested in installing an array of solar roof panels or the company’s Powerwall home  
28 battery must hand over \$1,000 to place an order.

353. Tesla doesn't break out deposit numbers by car, but the vast majority comes from \$1,000 reservations for the Model 3. When Musk first introduced the lower-priced sedan in March 2016, fans stood in long lines at Tesla stores. Two years later, the slower-than-expected pace of production means that most of the more than 400,000 reservation holders are still waiting. And new people appear to be joining the queue: As of April, the company reported "net Model 3 reservations remained stable."

354. There's an additional source of free money from loyal believers: An unknown number of customers have paid up for vehicle features—\$3,000 for "Full Self Driving" capability, for example—that Tesla thus far hasn't figured out or released to anyone.

355. Elon Musk cooked the books by emailing interested sales prospects and asked them to put a deposit down before each quarter ended so he could book their tiny deposits as fully transacted \$60K+ "sales" before each quarter closed.

356. Elon Musk and SpaceX are being sued by multiple employees for "lying about safety standards, safety records" and deadly safety defects.

357. The Elon Musk Tesla Money Laundering Board Of Directors is as full of fraud and corruption as Musk. Birds of a feather stick together and the Jurvetson, Draper, Musk, et al; clan of corruption runs deep. The Board of Directors can't operate their scam without the whole pack of thieves and liars in place. An outsider will break their swamp of tax evasion, Dark Money political bribes, off-shore cash, self-dealing, book-cooking, real estate fraud, expense padding and other nefarious deeds.

358. Dianne Feinstein's family member: Herb Newman of Sausalito, California's HR firm: Newman Search (415 332-8425) has a company as of 1972 with the sole purpose of setting up investment bank deals with the People's Republic of China. Feinstein arranged for Newman to provide the staffing for Tesla and Solyndra. Dianne Feinstein has been under investigation for spy activities with China and her senior aide was arrested as a Chinese top spy. In 1973 Mr. Newman arrived in Canton at the invitation of the Chinese Council for the Promotion of International Trade. (CCPIT). He and his company MVTC were one of fifty businesses to be invited to the Canton Trade Fair held in Kwangchow China. In 1978 Mr.

Newman founded China Investments and in partnership with California Trade Delegations both companies as members of the San Francisco Chamber of Commerce began taking US Corporations to China. Mr. Newman along with one of his associates at the time Mr. Darryl Schoon helped organize Senator Dianne Feinstein's first trip to China in conjunction with the San Francisco Chamber of Commerce. Herb Newman, Mart Bailey and Feinstein's Husband; Dick Blum are on intelligence agency watch-lists, and under electronic surveillance, for potentially corrupt deals with China, Tesla and Solyndra.

359.Dianne Feinstein's husband owns CBRE which owns the real estate contracts for both Tesla and Solyndra.

360.Dianne Feinstein's family owns interests in the construction companies hired by both Tesla and Solyndra.

361.Dianne Feinstein had her staff warn other California businesses away from using the NUMMI car factory in order to protect the real estate deal for both Tesla and CBRE, which is owned by her husband.

362.Tesla began real estate deals in multiple states and then canceled them at the last minute, which got them sued for fraud and charged with "lying" to different communities. They started, and then pulled out of these different building (San Jose, Southern California, New Mexico, Etc.) deals, because CBRE and Feinstein were trying to leverage real estate profit exploitation using taxpayerfunding.

363.Panasonic and Tesla have known for decades that the Panasonic 18650 batteries used in the Tesla suffer from multiple chemistry degradation defects which will almost always make them eventually ePlaintiff 42lode or "go thermal". The defects include: 1.) LENR activation, 2.) Dendrite lengthening, 3.) Particle congealing, 4.) Chemistry evolution and other defects. The Tesla projects is, essentially, a failed product product dumping effort of a failed and dangerous battery product.

364.Elon Musk has demanded that his employees sign "loyalty pledges", "vows" and engage in Omerta's in order to keep the corruption details of Tesla from being exposed to the public.

1           365.Tesla insider Antonio Gracias is the mob boss insider at Tesla who arranges media  
2 hit-jobs on those who displease Musk.

3           366.The NHTSB has issued requests to Tesla for safety tests and data that Tesla never  
4 complied with. Instead, Tesla paid bribes, which were referred to as "fees" to avoid having  
5 to complete those tests. An independent group of outside investigators issued a damning  
6 safety report to the NHTSB demanding that Tesla be compelled to produce the safety tests in  
7 2010 but Obama appointed NHTSB executives buried the report and protected Tesla in order  
8 to keep the connection between Obama's funding and Tesla protected. NHTSB boss:  
9 Strickland, an Obama insider, was confronted with this in Washington, DC and resigned  
10 from his job 48 hours later. NHTSB has still not acted on the severe Tesla safety defects that  
11 have been reported since 2009.

12           367.An SEC investigation of Musk uncovered horrific evidence of Musk corruption but  
13 the SEC could not report or act on it because Obama congressional bosses and lobbyists got  
14 the SEC investigation "limited" to only examine a single Twitter "Tweet" from Musk.

15           368.Elon Musk is protected by top DOJ, SEC, CFTC, FEC and other Obama left-over  
16 staff as well as 45 U.S. Senators and top Federal Reserve members and Goldman Sachs, who  
17 live in terror that exposure of the entire Elon Musk financial food-chain will topple the entire  
18 DNC Dark Money payola scam. This is the reason that Tesla can get away with so much  
19 obvious and overt corruption and still continue operations. Tesla Motors book-cooking,  
20 financial frauds and political payola conduits, if fully revealed, would change the course of  
21 political influence in America.

22           369.Elon Musk has been sued by a man that Musk called a "Pedo", yet Musk's own  
23 father has been accused of child sex abuse, racism and, indeed, got his own daughter  
24 pregnant!

25           370.Elon Musk's mother has been accused of being a "self-indulgent trophy wife" who  
26 Musk was trained by to be an arrogant elitist. Her hatred of black people was imbued on  
27 Musk who has been sued by black people at his company for "running a racist culture".

28           371.Elon Musk divorced the same woman twice because she knew his dirty little secret

24  
25  
26  
27  
28

and threatened to out him if he did not keep the deal going. She was hired to "act" as his wife.

372. Musical artist Iggy Azalea was at a Musk Party, with other friends, who captured Elon Musk on video on drugs and in weird sex acts. Musk had Iggy's camera stolen at the party to hie the evidence but he did not get the other cameras and did not realize that some of those cameras placed their images and videos directly on the Cloud, where hackers acquired them.

373. With cover-up help from Eric Holder, Steven Chu, Obama, Valarie Jarret, DNC FBI agents, Perkins Coie, Covington and Burling, Wilson Sonsini, etc; sociopath Musk actually believes he is "untouchable" and that he can get away with anything. His downfall will be the same downfall of every narcissist sociopath oligarch throughout all of recorded history.

374. Elon Musk is a drug addict. A simple urine and blood test proves it. Musk's downfall and the downfall of John DeLorean are seeming to align.

375. Dianne Feinstein and Nancy Pelosi are violating the law protecting Tesla by withholding investigations and prosecutions? Why are they allowing American citizens to continue to die from the 1.) "sudden acceleration electronics defect"; 2.) "The failed Auto-pilot electronics defect" 3.) "The deteriorating and deadly lithium ion batteries" and 4.) numerous other defects widely documented in the news media and filed lawsuits?

376. Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs.

377. The Energy Dept (GOVT) has been covering-up organized crime activities at GOVT in which GOVT funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors.

378. DNC campaign financiers and GOVT staff share stock market holdings with each

1 other under family trusts, shell corporations and layered Goldman Sachs accounts. The deal  
2 was: Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit  
3 off of insider Musk stocks.

4 379.Musk ePlaintiff 42loits poor people and child slaves in the Congo and Afghanistan  
5 to mine his lithium and Cobalt. Look up this phrase on the top search engines: “child labor  
6 electric car batteries”.

7 380.The Silicon Valley Paypal Mafia promotes Musk as a "Tech God" leader but, in  
8 reality Musk is the same kind of "Leader" as Charles Manson, Jim Jones, David Koresh,  
9 Swami Rajneesh and Al Capone. His own people have sued him for fraud and lies once they  
10 realized that Musk-ism and Scientology had so much in common.

11 381.Musk holds the record for getting sued for fraud by his investors, wives, former  
12 partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire  
13 hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his  
14 competitors and elected officials who Musk hates.

15 382.Musk and his culture are being sued for abuse to women and blacks and the Unions  
16 hate him for lying to them. <https://stopelonfromfailingagain.com> ( PER THE WAYBACK  
17 MACHINE Internet Archive) reveals even more Musk lies.

18 383.THIS corruption is what all of the big political scandals are about today!

19 384.THIS corruption involves TRILLIONS of dollars of corrupt mining deals,  
20 automotive and energy monopolies!

21 385.THIS is why the federal budget analysis reports are showing TRILLIONS of dollars  
22 of 'untraceable' losses from the United States Treasury from 2006 up to today!

23 386.THIS is why a large number of reporters, whistle-blowers and prosecutors  
24 suddenly, and mysteriously turned up dead!

25 387.THIS can all be proven in jury trial and in live televised Congressional hearings!

26 388.This is all being covered up because top State and Federal officials are in on it, own  
27 the stock in it and are so deeply involved in it that they could go to Federal prison when this  
28 all comes out.

1           389.The anxieties that lurk beneath the tremendous ambition of Tesla Inc. moved into  
2 the forefront in recent weeks. The company again **fell far short** (  
3 [https://www.bloomberg.com/news/articles/2018-04-03/tesla-model-3-output-misses-](https://www.bloomberg.com/news/articles/2018-04-03/tesla-model-3-output-misses-forecast-as-musk-promises-progress)  
4 [forecast-as-musk-promises-progress](https://www.bloomberg.com/news/articles/2018-04-03/tesla-model-3-output-misses-forecast-as-musk-promises-progress) ) of its own production targets for the mass-market  
5 Model 3 sedan, another person **died in a crash** (  
6 [https://www.bloomberg.com/news/articles/2018-03-31/tesla-says-driver-s-hands-weren-t-](https://www.bloomberg.com/news/articles/2018-03-31/tesla-says-driver-s-hands-weren-t-on-wheel-at-time-of-accident)  
7 [on-wheel-at-time-of-accident](https://www.bloomberg.com/news/articles/2018-03-31/tesla-says-driver-s-hands-weren-t-on-wheel-at-time-of-accident) ) involving its assisted-driving feature and Musk entered  
8 into **a public dispute** ( [https://www.bloomberg.com/news/articles/2018-04-12/tesla-](https://www.bloomberg.com/news/articles/2018-04-12/tesla-withdraws-from-ntsb-crash-probe-over-autopilot-data-flap)  
9 [withdraws-from-ntsb-crash-probe-over-autopilot-data-flap](https://www.bloomberg.com/news/articles/2018-04-12/tesla-withdraws-from-ntsb-crash-probe-over-autopilot-data-flap) ) with federal safety regulators.  
10 esla’s once high-flying stock, buffeted by a downgrade from credit analysts, has dropped 24  
11 percent from its peak in September.

12           390.There’s a good reason to worry: No one has raised or spent money the way Elon  
13 Musk has. Nor has any other chief executive officer of a public company made  
14 a **bankruptcy joke** ( <https://twitter.com/elonmusk/status/980566101124722688> ) on  
15 Twitter at a time when so much seemed to be unraveling.

16           391.Tesla is going through money so fast that, without additional financing, there is  
17 now a genuine risk that the 15-year-old company could run out of cash in 2018. The  
18 company burns through more than \$6,500 every minute, according to [data compiled by](https://notalotofpeopleknowthat.wordpress.com/2018/05/01/tesla-burning-cash/#methods)  
19 [Bloomberg](https://notalotofpeopleknowthat.wordpress.com/2018/05/01/tesla-burning-cash/#methods) ( [https://notalotofpeopleknowthat.wordpress.com/2018/05/01/tesla-burning-](https://notalotofpeopleknowthat.wordpress.com/2018/05/01/tesla-burning-cash/#methods)  
20 [cash/#methods](https://notalotofpeopleknowthat.wordpress.com/2018/05/01/tesla-burning-cash/#methods) ). Free cash flow—the amount of cash a company generates after  
21 accounting for capital ePlaintiff 42enditures—has been negative for five consecutive  
22 quarters. That will be a key figure to watch when Tesla reports earnings May 2.Read the full  
23 story here: <https://www.bloomberg.com/graphics/2018-tesla-burns-cash/>

24           392.In years to come, we will all look back and wonder how so many people were taken  
25 in by this shyster, who makes Enron look honest.A

26           393. lot of Musk’s money has been extracted from suckers, who think he is God’s gift,  
27 as Bloomberg reports:One of Tesla’s greatest strengths is its ability to monetize the patience  
28 and goodwill of its customers and loyal fans. The company is sitting on a staggering \$854

1 million in customer deposits as of the end of 2017.

2 394. Since Tesla sells its products direct to consumers, without relying on a dealer  
3 network, customer deposits are cash payments that essentially serve as interest-free loans—  
4 and these loans can stretch on for years. If Tesla were to go bankrupt, those deposit holders  
5 would likely be wiped out.

6 395. Tesla is holding customer deposits for two vehicles that aren't even in production  
7 yet: an electric Tesla Semi (\$20,000 deposit) and a next-generation Roadster (either \$50,000  
8 down or the \$250,000 retail price paid up front to reserve a limited edition). Even customers  
9 interested in installing an array of solar roof panels or the company's Powerwall home  
10 battery must hand over \$1,000 to place an order.

11 396. Tesla doesn't break out deposit numbers by car, but the vast majority comes from  
12 \$1,000 reservations for the Model 3. When Musk first introduced the lower-priced sedan in  
13 March 2016, fans stood in long lines at Tesla stores. Two years later, the [slower-than-  
14 ePlaintiff 42ected pace of production](https://www.bloomberg.com/graphics/2018-tesla-tracker/) ( [https://www.bloomberg.com/graphics/2018-tesla-  
15 tracker/](https://www.bloomberg.com/graphics/2018-tesla-tracker/) ) means that most of the more than 400,000 reservation holders are still waiting.  
16 And new people appear to be joining the queue: As of April, the company reported “net  
17 Model 3 reservations remained stable.”

18 397. There's an additional source of free money from loyal believers: An unknown  
19 number of customers have paid up for vehicle features—\$3,000 for “Full Self Driving”  
20 capability, for example—that Tesla thus far hasn't figured out or released to anyone.

21 398. The consumer psychology that sees hundreds of thousands of people essentially  
22 extending an interest-free loan to a public company is unusual, to say the least. I think the  
23 phrase “more money than sense” rather sums it up

24 399. Apple and Google also named in US lawsuit over Congolese child cobalt mining  
25 deaths for Elon Musk's Tesla Cars. Dell, Microsoft and Tesla also among tech firms named  
26 in case brought by families of children killed or injured while mining in DRC. [I saw the  
27 unbearable grief inflicted on families by cobalt mining. \(  
28](https://www.theguardian.com/global-development/commentisfree/2019/dec/16/i-saw-the-unbearable-grief-inflicted-on-families-by-cobalt-mining.)

[unbearable-grief-inflicted-on-families-by-cobalt-mining-i-pray-for-change](#) ) I pray for chan  
Elon Musk's cobalt extraction in DRC has been linked to child labour.

400.A landmark legal case has been launched against the world’s largest tech companies by Congolese families who say their children were killed or maimed while mining for cobalt used to power smartphones, laptops and electric cars, the Guardian can reveal.

401.Apple, Google, Dell, Microsoft and Tesla have been named as defendants [in a lawsuit filed](#) in ( <http://iradvocates.org/sites/iradvocates.org/files/stamped%20-Complaint.pdf> )Washington DC by human rights firm [International Rights Advocates](#) ( <http://www.iradvocates.org/> ) on behalf of 14 parents and children from the Democratic Republic of the Congo (DRC). The lawsuit accuses the companies of aiding and abetting in the death and serious injury of children who they claim were working in cobalt mines in their supply chain.

402.The lawsuit argues that Apple, Google, Dell, Microsoft and Tesla all aided and abetted the mining companies that profited from the labour of children who were forced to work in dangerous conditions – conditions that ultimately [led to death](#) ( <https://www.theguardian.com/global-development/commentisfree/2019/dec/16/i-saw-the-unbearable-grief-inflicted-on-families-by-cobalt-mining-i-pray-for-change> ) and serious injury. The families argue in the claim that their children were working illegally at mines owned by UK mining company Glencore. The court papers allege that cobalt from the Glencore-owned mines is sold to Umicore, a Brussels-based metal and mining trader, which then sells battery-grade cobalt to Apple, [Google](#) ( <https://www.theguardian.com/technology/google> ) , Tesla, Microsoft and Dell.

403.Other Plaintiffs in the court documents say they worked at mines owned by Zhejiang Huayou Cobalt, a major Chinese cobalt firm, which the lawsuit claims supplies [Apple](#) ( <https://www.theguardian.com/technology/apple> ), Dell, and Microsoft and is likely to supply the other defendants.

404.Another child, referred to as John GOVT 1, says that he started working in the

24  
25  
26  
27  
28

mines when he was nine. The lawsuit claims that earlier this year, he was working as a human mule for Kamoto Copper Company, carrying bags of cobalt rocks for \$0.75 a day, when he fell into a tunnel. After he was dragged out of the tunnel by fellow workers, he says he was left alone on the ground at the mining site until his parents heard about the accident and arrived to help him. He is now paralysed from the chest down and will never walk again.

405. Other families included in the claim say that their children were killed in tunnel collapses or suffered serious injuries such as smashed limbs and broken spines while crawling through tunnels or carrying heavy loads. The families say that none were paid any compensation for the deaths and injuries.

406. One of the central allegations in the lawsuit is that Apple, Google, Dell, Microsoft and [Tesla](https://www.theguardian.com/technology/tesla) ( <https://www.theguardian.com/technology/tesla> ) were aware and had “specific knowledge” that the cobalt they use in their products is linked to child labour performed in hazardous conditions, and were complicit in the forced labour of the children

407. It is charged that the Musk empire is an organized crime program that exists between Silicon Valley tech oligarchs, investment banks, U.S. Senators, government agency staff and White House staff who engage in these crimes.

408. That public officials knowingly participate in these crimes by failing to report their associates who engage in these illicit actions and by hiring suppliers who operate these illicit activities.

409. That the Musk empire suspects manipulate government funds for their personal profiteering at the expense of domestic citizen taxpayers like us.

410. That the Musk empire suspects operate a vast stock market manipulation program, as a core function of their operations, and those illicit deeds function at the expense of the public to render unjust gain to public officials.

411. That the Musk empire suspects contract a known group of lobbyists, corrupt law firms, unethical CPA's, corrupt investment banks and specialized corruption services providers to attack, defame, physically harm, character assassinate, black-list and/or kill those they dislike and they harmed many persons with those acts.

1           412.That the Musk empire suspects operate an Epstein-like sex-trafficking network of  
2 prostitutes and sexual extortion activities and locations for the engagement of said activities  
3 and for the bribery of cohorts via sex workers and that Musk was a personal associate of  
4 Jeffrey Epstein.

5           413.That the Musk empire suspects engage in electronic attacks and manipulations  
6 including hacking, election manipulation, media censorship and internet search results  
7 manipulation in order to mask their schemes.

8           414.That the Musk empire suspects engage in Lois Lerner-like, SPYGATE-like, VA  
9 whistleblower-like reprisal and retribution attacks using government agencies like SSA,  
10 DOJ, FBI, LSC, HUD, HHS, GOVT, Etc

11           415.It is demanded that Elon Musk be arrested on RICO Racketeering, Anti-Trust, Tax  
12 Evasion, Bribery, and related charges!

13           416.Elon Musk had sex with a young non-age-appropriate rock and roll girl and got her  
14 pregnant.

15           417.Elon Musk dated anal sex advocate Gwenyth Paltrow who later told her friends that  
16 he was full of shit.

17           418.Elon Musk divorced one actress, then had to remarry her because she had the goods  
18 on him.

19           419.Video exists of Elon Musk at various sex parties.

20           420.Elon Musk dated Johnny Depp's girlfriend Amber Heard who thought that Musk  
21 was even more controlling than Johnny Depp.

22           421.The NUMMI car factory that Musk took over was first called, by Musk, in the  
23 media "non-functional". Even the two major car makers that were using it had abandoned it.  
24 Feinstein make Musk take it because here husband's company: CBRE Realty, managed the  
25 property around it.

26           422.Musk never made good on his promises to NUMMI workers or the Unions  
27 representing the NUMMI factory.

28           423.After getting an insane amount of exclusive free cash from the taxpayers, Musk

1 flew workers in from overseas.

2 424. Multiple women have charged Musk for sexual abuse and factory misogyny.

3 425. Musk couldn't make it in college and bailed out.

4 426. Far more SpaceX rockets have ePlaintiff 42loded and fully failed than the public is  
5 aware of.

6 427. Musk said he would already have sent his buddies around the moon but many  
7 potential passengers have bailed out after they saw the due diligence on SpaceX lack of  
8 experience.

9 428. Musk, Draper, Page, Westly, Schmidt, Brin and other famous tech asshole  
10 billionaires have formally agreed to run a "cartel" to control news, information and  
11 industries.

12 429. Inside the Tesla that Elon Musk had SpaceX put in orbit is a "confession folder"  
13 that would destroy Musk if anyone went up and got it.

14 430. Elon Musk believes he could kill someone and not get in trouble because he has so  
15 many California Senator's, Tier one law firms and former White House staff protecting him.

16 431. Elon Musk is the Citizen Kane of the modern world. He thinks he is the Al Capone  
17 of Technology. He uses things that appear to be all "crunchy granola" on the surface to steal  
18 taxpayersubsidies with the help of corrupt politicians.

19 432. Aside from Musk's own personal dirty operations and orders, the largest facilitator  
20 of his crimes is the large group of men inside Goldman Sachs and JP Morgan dedicated to  
21 supporting his crimes and corruptions.

22 433. Through covert conduits, Elon Musk pays blogger James Ayre to shill is schemes  
23 online.

24 434. Musk's entire media plan is self-promotional aggrandizing and fake virtue-signaling  
25 to keep the news off his case.

26 435. The SEC made him quit but he just changed one letterhead graphic and nothing  
27 else. Musk still runs Tesla and the rest of the empire just like he always did.

28 436. Musk covertly funds abortion projects because he gets so many girls pregnant and

27  
28

refuses to use a condom.

437.Deutsche Bank is the other biggest player in the Musk Empire money laundering, political payola and corruption crimes.

438.Musk stole most of his designs from others, as proven by the U.S. Patent office and previous publications.

439.When Elon Musk's Hyper-loop crashes, it will turn all of the passengers into a bloody applesauce like nightmare.

440.Musk's 5G SpaceX Starlink Satellites could destroy the environment, will add to the cancer-causing radiation of the Earth and are to be used to spy on consumer's uses of the internet.

441.In lawsuits, Musk always pleads that he "has no money".

442.X-Ray analysis by over 40 major laboratories prove that Elon Musk's lithium ion batteries have severe and constantly degrading defects inherent in their construction. Musk has known about these dangers for decades but chose to work with Panasonic to cover it up.

443.Elon Musk lost a LEMON CAR lawsuit proving that his cars are poorly designed and manufactured.

444.Elon Musk's union negotiating tactics are: "delay, deny, defer and claim to be conducting a fake study..."

445.Elon Musk's take-over of Tesla from Martin Eberhardt, the actual founder, was based on an Obama Administration scheme to ePlaintiff 42loit Lithium mines in Afghanistan and Cobalt mines in the Congo, which Obama financiers had bought the rights to. Frank Guistra and Goldman Sachs helped come up with this scheme.

446.A famous article about SpaceX quotes a top Musk staff staffer saying Musk is a "liar".

447.A top SpaceX engineer has sued Spacex for lying about rocket safety and says that Musk does not care about science, he cares about publicity.

448.Most of the "famous" people Musk hired, quit after seeing what a sham his operations are.

28

449.Jared Birchell, of Burlingame, is terrified that Musk will have him killed because he knows "where the bodies are buried", but he has to act demure and "stay-off-the-press-radar" for now to keep Musk from paying too much attention to him.

450.Every property that Musk owned has been bugged by government, news or competitor specialists.

451.Musk takes a number of drugs for mental issues yet he runs companies with products that can easily kill their users. Many think that he should be under closer federal supervision.

452.The U.S. Department of Energy PR Department has been ordered by Obama officials (who, shockingly, are still there even during the Trump Administration) to always hype up Musk because, WHEN Musk fully fails, it will prove that The U.S. Government funded him because **Obama ordered them** to and not *based on any* merits. Most every Applicant for GOVT funds beat Musk on every merit EXCEPT CRONYISM!

453.Trump-hating Elon Musk wanted to nay say Trump by subjecting Tesla workers to COVID death by refusing to close plant

454.Musk uses his own workers to play deadly politics with their lives in COVID closure he refused

455.Musk totally lied about his capacity, ability and knowledge to make COVID ventilators in order to scam political funding

456.Musk sent snoring devices instead of ventilators and lied about those products in order to Virtue Signal for his own hype

457.Musk has had babies with many women in an Epstein-like master plan to seed the world with his DNA so that mini-Musk's will live on forever. Each ex-baby momma has been paid massive sums to keep quiet about his misdeeds.

458.Musk uses his many mansions to hide money and operate tax manipulation efforts.

459.The "Mainstream Media" is controlled by Democrat bosses who refuse to allow any negative news to be printed about Musk because Musk conduits funds to the DNC.

460.One of Musk's 'baby ovens' known as "Grimes' has been revealed to have been used

as a "sex toy for Musk" by Grimes friends.

461.The U.S. Department of Energy has a federal policy of promoting Musk's hype because they are liable for criminal prosecution because Secretary of Energy Steven Chu and his staff helped organize Musk's embezzlement of taxpayerfunded monies and insider-traded on that profiteering.

462.Failing Elon Musk tries to make Alameda County pay for his failed NUMMI factory by using COVID as an excuse!

463.The cooling fluid of Tesla cars leaks into the battery chamber and causes the batteries to ePlaintiff 42lode and Musk ordered that defect covered up.

464.The touch-screen on the car has a huge number of programming defects in it that can crash the car

465.Musk has had unprotected sex with a number of women and is on a mission to get a number of women pregnant in order to "spread his DNA around".

1           **The Malignant Narcissism And Cartel Climate Of Elon Musk And His Billionaire Frat**  
2 **Boy Club**

3           At almost every juncture, Elon Musk has made egotistical decisions that lead to more  
4 failures. His behavior is that of a person who has no care or concern for the health, safety and  
5 welfare of the American people. Nothing could epitomize that more perfectly than his grotesque  
6 suggestions that we should shoot nuclear bombs off on Mars or that nobody will care that his  
7 Starlink Satellites are designed to spy on the public. This would seem comical, and entirely  
8 unbelievable, if it had not actually happened.

9           In 2006 the many scientists told Elon Musk and his advisers of the high likelihood that a  
10 pandemic of lithium ion battery ePlaintiff 42losions would strike the nation and advised the  
11 incoming administration to take appropriate steps to reduce its impact. Obama officials hid the  
12 dangers because they owned stock in lithium and cobalt mines for those batteries, particularly in  
13 Afghanistan.

14           In November of 2007, the experts warned Obama that the country was likely to be afflicted  
15 with a devastating pandemic of lithium ion originating from Asian and Russian oligarchs.

16           In January 2009, the Obama administration was told by its own experts, Bernard Tse and his  
17 team who knew Tesla bosses, Sandia and others that the lithium ion batteries in Tesla cars had  
18 degrading chemistry which become a global pandemic of auto danger. Again, Obama chose  
19 inaction.

20           Obama and Musk have deprived Democratic-led regions of the country from receiving  
21 needed safety reviews of Tesla cars.

22           Over the year's since 2006, Americans working with the GOVT, NHTSA, SEC and other  
23 groups accelerated warnings to Obama officials. These engineers and other science professionals  
24 were intentionally ignored in order to protect politicians stock market profits.

25           In these, [and any other examples](http://www.testimony111.com/), ( <http://www.testimony111.com/> ) Musk and his inner  
26 circle of White House and Senate insiders ignored or purged experts and other truth-tellers, and lied  
27 about, misrepresented, deflected or denied the dire threat to the American people posed by the  
28 lithium ion battery scam.

1           Considered in total, Musk and his regime have shown themselves to be incompetent,  
2 callous, malevolent and deeply cruel in their response to the Tesla safety issue crisis (as well as to a  
3 plethora of other issues).

4           But to merely document the Musk regime’s deadly failures in response to the dangers of his  
5 companies is to ignore the most important question: What are Musk's and his advisers’ underlying  
6 motivations?

7           This forensic question must be answered if we are ever to have a full accounting of the  
8 Musk Corruption, and see justice done for the voters, the dead tesla victims and those who will die  
9 in the future as well as the damage done to the broader American community.

10          The coordinated 'main-stream' media’s preferred storyline that suggests Musk is simply  
11 incompetent doesn’t add up because Muskhhas made the wrong decision every single time in terms  
12 of how crises like this are supposed to be dealt with. (i.e. Be consistent, transparent, factual, and  
13 credible.) It’s increasingly not believable for the left-wing press to suggest that Musk has been  
14 distracted or inept during this crisis, in part because of the level of his uselessness has become so  
15 staggering.

16          Maybe Musk is vengeful. Maybe he wants to wreck the economy to create investment  
17 opportunities? He’s under the thumb of a foreign entity? He wants to cause panic and cancel the  
18 November elections? He’s a fatalist? Who knows. And honestly, the specific “why” isn’t what  
19 matters now. What matters is asking the difficult questions and pondering what the Musk oligarchy  
20 is truly about, no matter what lurks in the shadows...

21          Now the press needs to shift some of its focus and ask the truly alarming questions about  
22 Musk and his motives. Because we still don’t know why he essentially ordered his companies to  
23 embark on such sinister ventures involving slicing up brains; over-priced deadly cars for rich  
24 douche-bags; digging holes for billionaire hide-outs, launching domestic spy satellites and  
25 manipulating elections along with his boyfriend: Larry Page, etc...

26          Psychologist and psychotherapists have an answer: Elon Musk is a "***malignant narcissist***".  
27 Musk's mental pathologies inexorably compel him to hurt and defraud large numbers of people —  
28 including his own supporters.

1 ePlaintiff 42orts have looked at Musk's borderline personality disorders. They explain that  
2 sadism and violence are central to Musk's malignant narcissism and his decision-making about his  
3 self-promotion. They warn that Musk is abuser locked into a deeply dysfunctional relationship with  
4 the American people and that, like other sadists, Musk enjoys causing harm and suffering to any  
5 that do not recognize his "tech Jesus" self-proclaimed superiority.

6 Ultimately, all psychologists generally concludes that Musk is engaging in ["democidal  
7 behavior"](#) (  
8 <https://www.taylorfrancis.com/books/9780203793756/chapters/10.4324/9780203793756-2> ) in  
9 partnership with Obama and Pelosi and cautions that the many dead and injured (so far) from the  
10 Tesla fires and crashes are not simply collateral damage from the Musk madness, but rather the  
11 logical outcome of Musk's apparent mental pathologies and the poor decisions that flow from them.

12 Musk is both denying responsibility by saying things such as, "I take no responsibility.  
13 We've done everything right." But at the same time, Musk is also sabotaging the efforts to stop the  
14 corruption in his empire. This is a very important aspect of Musk's behavior. Musk is not just  
15 deflecting blame onto others, he is actively interfering with the politicians' ability to do their job  
16 by controlled Senators with bribes. Musk is not just incompetent. He is actively engaging in  
17 sabotage against competitors and reporters who speak the truth about him.

18 You might wonder: How does someone with his type of mind reconcile claims like "I have  
19 total power" with "I take no responsibility"? He has said both things within a few days of each  
20 other. Well; That is a function of how the psychology of a malignant narcissist is structured. When  
21 Musk says things such as, "I have total power," that's the grandiosity. "I'm in total control" is a  
22 function of Musk's paranoia, where everything bad is projected outward. Therefore, anything  
23 negative or bad is someone else's fault. Bad things are 'other people' in Musk's mind. The  
24 grandiosity and "greatness" are all him. Musk's mind runs on a formula which bends and twists  
25 facts, ideas and memories to suit his malignant narcissism. This is why Musk contradicts himself so  
26 easily. He lies and makes things up. His fantasies all serve his malignant narcissism and the world  
27 he has created in his own mind about his greatness.

28 Another component of Musk's malignant narcissism is sadism. That part of Musk's mind is

1 more hidden. People such as Musk are malignant-narcissist sadists because they, at some deep level,  
2 are driven to cause harm to other people. Musk’s life is proof of this. His pedo father and trophy  
3 wife narcissist mother demonstrate his roots. He enjoys ripping people off and humiliating people.  
4 He does this manically and gleefully. He has lied thousands of times. He threatens people online  
5 and elsewhere. Most psychologists believe that Elon Musk is also a sexual sadist, who on some  
6 basic level enjoys and is aroused by watching people be afraid of him. In his mind, Musk is creating  
7 chaos and instability so that he can feel powerful.

8       Professor of psychiatry and psychoanalyst Otto Kernberg called that phenomenon  
9 “omnipotent destructiveness.” The bullying, the violence, the destruction, frightening people,  
10 humiliating people, getting revenge and the like — such behavior is what Elon Musk has done his  
11 whole life. It is who Elon Musk really is. Unfortunately, too many people are still in denial of that  
12 fact.

13       Musk has to create and control a field of negative corrupting energy around himself. For  
14 example, he pressures the scientific experts to bend the truth to his dreamworld during his press  
15 conferences. The scientists are basically Musk’s hostages. The American people are hostages as  
16 well to Elon Musk's lies. Plaintiffs are being abused by him. Plaintiffs know that Musk is lying.  
17 Plaintiffs know that he’s doing nothing to help us. Plaintiffs feel helpless to do anything to stop him.  
18 It is causing collective mental despair. It is not that all Americans are suckers or dupes, it is that  
19 Musk is a master at such cruel and manipulative behavior.

20       Elon Musk is a master at getting negative attention, and the more people he can shock and  
21 upset, the better.

22       Malignant narcissists like Elon Musk view other human beings as kindling wood to be  
23 burned for their own personal enrichment, media enlargement and hype ePlaintiff 42ansion.

24       Follow the facts to the obvious and true conclusion. If all the facts show that Elon Musk  
25 (and his little boy buddies Larry Page, Eric Schmidt, John Doerr, Reid Hoffman, Steve Westly, etc.)  
26 is a malignant narcissist with these powerful sadistic tendencies, this omnipotent destructiveness,  
27 where he’s getting pleasure and a sense of power from dominating people and degrading people and  
28 destroying people and plundering people and laying waste to people, both psychologically and

1 physically, then to deny such obvious facts is willful ignorance.

2 **When Musk is finally exposed, like Elizabeth Holmes and Theranos or ENRON, it will**  
3 **be glorious.**

4 Rather than making a prediction as to Musk's specific actions when the emperor has no  
5 clothes, it is more helpful to describe the type of actions he will take. Rather than trying to say,  
6 “This is the move he’ll make.” Like in a relationship, Elon Musk is the abuser. He is the husband or  
7 father who is abusing his partner or children or other relatives. The American people are like a  
8 woman who is leaving her abuser. She tells her abuser, “That’s it! I am done with you!” She has her  
9 keys in hand and is opening the door of the house or apartment to finally leave. What happens? The  
10 democidal maniac Elon Musk will attack us, badly. Make no mistake. Elon Musk is going to find a  
11 way to attack and cause great harm to the American people if he believes that he will be fully  
12 exposed. He will use his spy satellites, his media controls, his remote controlled cars, his stock  
13 market manipulation tools, his Goldman Sachs economic destruction team and more. Musk will  
14 strike back... unless the FBI finally arrests him first.

28 *Figure 8: Elon Musk And Elizabeth Holmes = 2 of a kind*

## Elon Musk Has Stolen Every Bit Of Technology He Has ePlaintiff 42loited

1  
2 In a shocking expose by [Paul Lienert](#), [Norihiko Shirouzu](#), and [Edward Taylor](#), they reveal  
3 that while Elon Musk is hailed (by his own PR and hype) as an innovator and disruptor who went  
4 from knowing next to nothing about building cars to running a car company, he swiped all of his  
5 technology from others.

6 His Tesla car, his hyperloop train, his tunnel digger, his 'brain chip' ...everything he has done  
7 was created by somebody else. The original founders of Tesla sued him for coming in and taking  
8 over the company.

9 Musk's record shows he is more of a fast learner who spies on other firms that had  
10 technology Musk lacked. Musk stole their most talented people, and then blew his competitors off  
11 the grid with anti-trust violating monopoly tactics.

12 Musk has been dropping hints for months that significant advances in technology will be  
13 announced as Tesla strives to get away from corrupt Panasonic and their awful toxic, ePlaintiff  
14 42loding batteries.

15 New battery cell designs, chemistry and manufacturing processes are just some of the  
16 developments that would allow Tesla to reduce its reliance on its long-time battery partner, Japan's  
17 Panasonic (which has been accused of bribery, product dumping and other illicit deeds), people  
18 familiar with the situation said.

19 "Elon doesn't want any part of his business to be dependent on someone else," said one  
20 former senior executive at Tesla who declined to be named. "And for better or worse - sometimes  
21 better, sometimes worse - he thinks he can do it better, faster and cheaper." The problem is, Musk  
22 does his version of "better" by ripping everyone off and hiring moles and character assassins to go  
23 after any competitors that get in his way. Musk has been documented hiring Nicholas Guido  
24 Denton's tabloid empire (Gawker/Gizmodo/Jalopnik...) character assassination service to operate  
25 massive hit-jobs against his adversaries.

26 Tesla has battery production partnerships with Panasonic, South Korea's LG Chem and  
27 China's Contemporary Amperex Technology Co Ltd (CATL) that are ePlaintiff 42ected to  
28 continue.

1 But at the same time, Tesla is moving to control production of cells - the basic component of  
2 electric vehicle battery packs — at highly automated factories, including one being built near  
3 Berlin, Germany and another in Fremont, California where Tesla is hiring dozens of experts in  
4 battery cell engineering and manufacturing.

5 “There has been no change in Plaintiffs relationship with Tesla,” Panasonic said in a  
6 statement provided by a company spokeswoman. Of course, Panasonic has to say that.

7 “Plaintiffs relationship, both past and present has been sound. Panasonic is not a supplier to  
8 Tesla; we are partners. There’s no doubt Plaintiffs partnership will continue to innovate and  
9 contribute to the betterment of society.”

10 Tesla did not respond immediately to a request for comment.

11 Since he took over the fledgling Tesla company in 2004 in a hostile tactile take-over,  
12 Musk’s goal has been to learn enough - from partnerships, acquisitions and talent recruitment - to  
13 bring key technologies under Tesla’s control, people familiar with Tesla’s strategy said.

14 They said the aim was to build a heavily vertically integrated company, or a digital version  
15 of Ford Motor Co’s iron-ore-to-Model-A production system of the late 1920s.

16 “Elon thought he could improve on everything the suppliers did - everything,” said former  
17 Tesla supply chain executive Tom Wessner, who is now head of industry consultancy Imprint  
18 Advisors. “He wanted to make everything.”

19 Batteries, a big chunk of the cost of an electric car, are central to the Musk method. While  
20 subordinates like Bernard Tse have argued, for years, against developing proprietary Tesla battery  
21 cells, Musk continues to drive toward that delusional control-freak goal.

22 “Tell him ‘No’, and then he really wants to do it,” said a third former Tesla veteran.

23 Reuters reported in May that Tesla is planning to unveil low-cost batteries designed to last  
24 for a million miles. Tesla is also working to secure direct supplies of key battery materials, such as  
25 nickel, while developing cell chemistry that would no longer need to be as expensive and  
26 blood-mineral sourced as Musk’s cobalt.

27 ‘STRAIGHT FOR MARS’

28 Panasonic is partnered with Tesla at the \$5 billion Nevada “Gigafactory”, while CATL and

1 LG Chem supply cells to Tesla’s Shanghai factory, where battery modules and packs are assembled  
2 for its Model 3 sedan.

3 Panasonic recently said it is planning to ePlaintiff 42and its production lines in Nevada,  
4 which supply the cells that then go into the battery modules assembled next door by Tesla.

5 But the Nevada Gigafactory partnership almost didn’t happen, according to two former  
6 Tesla executives. Musk ordered a team to study battery manufacturing in 2011, according to one  
7 former executive, but eventually partnered with Panasonic in 2013 because Musk failed to  
8 understand it.

9 Now, Tesla is testing a battery cell pilot manufacturing line in Fremont and is building its  
10 own vast automated cell manufacturing facility in Gruenheide in Germany.

11 The roller-coaster relationship with Panasonic mirrors other Tesla alliances.

12 During its development alliance with Germany’s Daimler, which was an early investor in  
13 Tesla, Musk became interested in sensors that would help keep cars within traffic lanes.

14 Until then the Tesla Model S, which Mercedes-Benz engineers helped refine, lacked  
15 cameras or sophisticated driver assistance sensors and software such as those used in the Mercedes  
16 S-Class.

17 “He learned about that and took it a step further. We asked Plaintiffs engineers to shoot for  
18 the moon. He went straight for Mars,” said a senior Daimler engineer said. Musk primarily uses the  
19 “Mars Project” as hype and BS to cover the fact that all of his Starlink, and other SpaceX launches,  
20 are almost exclusively spy satellites to monitor citizens and their internet interests.

21 Meanwhile, an association with Japan’s Toyota, another early investor, taught him about  
22 quality management.

23 Eventually, stolen executives from Daimler and Toyota joined Tesla in key roles, along with  
24 talent from Alphabet Inc’s Google, Apple, Amazon, Microsoft, as well as rival carmakers Ford,  
25 BMW and Audi.

## 26 **THE MUSK SPIN**

27 Some relationships did not end well, however.

28 Tesla hooked up with Israeli sensor maker Mobileye in 2014, in part to learn how to design

1 a self-driving system that evolved into Tesla’s Autopilot.

2 “Mobileye was the driving force behind the original Autopilot,” said a former Mobileye  
3 executive, who declined to be named.

4 Mobileye, which is now owned by Intel, also recognized the risk of sharing technology with  
5 a fast-moving startup like Tesla, which was on the brink of collapse at the end of 2008 and now has  
6 a market value of \$420 billion.

7 But Tesla and Mobileye had an acrimonious and public split after a driver was killed in 2016  
8 when a Model S using the Autopilot system crashed.

9 At the time, Amnon Shashua, who is now Mobileye president and chief executive, said  
10 Tesla’s Autopilot was not designed to cover all possible crash situations as it was a driver assistance  
11 system, not a driverless system.

12 The former Mobileye executive said there was no question of Tesla improperly using their  
13 technology.

14 U.S. tech firm Nvidia followed Mobileye as a supplier for Autopilot, but it too was  
15 ultimately sidelined.

16 “Nvidia and Tesla share a common strategy of developing software-defined vehicles  
17 powered by high-performance AI computers. Elon is very focused on vertical integration and  
18 wanted to make his own chips,” said Nvidia’s senior director of automotive, Danny Shapiro.

19 In addition to partnerships, Musk went on an acquisition spree four years ago, buying a  
20 handful of little-known companies - Grohmann, Perbix, Riviera, Compass, Hibar Systems - to  
21 rapidly advance Tesla’s expertise in automation. Maxwell and SilLion further boosted Tesla’s  
22 ability in battery technology.

23 “He learned a lot from those people,” said Mark Ellis, a senior consultant at Munro &  
24 Associates, which has studied Tesla extensively. “He leveraged a lot of information from them, then  
25 put his spin on making it better.”

5  
6  
7 **Recap:**

8 *The Musk empire has paid more bribes to politicians than almost any other modern entity.*  
9 *That is why no full investigation of the Musk scams has ever been completed. Google's Eric Schmidt*  
10 *and Larry Page have a bromance relationship with Musk and use the global resources of Alphabet*  
11 *to hide any negative news about Musk assets.*

12 *The 2008 Department of Energy Cleantech Crash proves that a federal agency was used as*  
13 *just one big slush-fund to pay-off political campaign financiers, operate insider-trading stocks and*  
14 *sabotage those financiers competitors using taPlaintiff 42ayer-financed resources! We have used*  
15 *private investigator, FBI resources and deep AI research to reveal that all government staff*  
16 *working on Plaintiffs application were getting quid-pro-quo...they were on the take. (Can anyone*  
17 *point out to us EVEN ONE person who was in the GOVT/White House loop who was not working*  
18 *for, invested in, getting a future job from or other wise conflicted?) What do you do when The U.S.*  
19 *Government convinces you to invest millions of dollars, and your life, into one of their projects.*

20 *When their project turns out to be a scam where they had covertly hard-wired the upside to*  
21 *a couple of Senator's and their campaign financier friends. The fix was in and the game was rigged*  
22 *to use a government program as a slush-fund for friends-with-benefits. We, and the public, got*  
23 *defrauded. Now the damages must be paid for, one way, or another. Every one of the insiders who*  
24 *did get government funding got it in the exact same size and order as their covert political*  
25 *campaign funding and stock market bribes to the deciders.*

26 *Chamath Palihapitiya and other Silicon Valley insiders have now exposed the fact that*  
27 *Greylock, Kleiner, etc. are just a VC Ponzi Scheme! in this whole mess. Musk used crooked*  
28 *Senators to get his funds. Those Senators and government agency bosses were financed by, friends*

1 with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door  
2 job or government service contracts from, partying with, personal friends with, photographed at  
3 private events with, making profits by consulting for, exchanging emails with, business associates of  
4 or directed by; one of those business adversaries, or the Senators and politicians that those  
5 business adversaries pay campaign finances to, or supply political search engine manipulation  
6 services to.

7 *Elon Musk is notorious for getting Department of Energy money by bribing public officials*  
8 *and placing his friends: Steven Chu, Matt Rogers, Steve Westly, Steve Spinner's 'special friend', etc.*  
9 *on the staff of The U.S. Government and in the White House. We have FBI-class records, financial*  
10 *tracking, emails, stock market relay records and other forensic data that proves it. We can swear,*  
11 *warrant, certify and prove these assertions in front of Congress in a live Congressional hearing or*  
12 *Civil Jury trial, given non-compromised legal backing.*

13 *If you think you have bribed the same number of Senators, bought a President and taken*  
14 *over most of The U.S. Government like Musk did... go for it! In this day and age, with every citizen*  
15 *able to track every public figure, with FBI-quality databases, on their home computers, it might be*  
16 *a crash-and-burn but you are welcome to try. Lithium metals, and other rare earth mining*  
17 *materials, are monopolized by Elon Musk and his Silicon Valley Cartel, in rare-earth corrupt*  
18 *mining scams.*

19 *Lithium's widespread use in cars is hindered by a challenging obstacle: upon multiple*  
20 *charge-discharge cycles, fractal filaments called dendrites always grow through the electrolyte*  
21 *from the negative to the positive electrode and short-circuit the battery from the inside, thus*  
22 *guaranteeing that Tesla Cars will eventually all ePlaintiff 42lode. Musk and Panasonic have known*  
23 *this since 2007 (They are "dumping" the batteries via Tesla) and have paid U.S. Senators, who own*  
24 *stock in Tesla, to cover it up. The lithium fires and toxic vapors are a major safety concern because*  
25 *they have killed, poisoned and injured too many citizens.*

26 *Musk gets away with his scams because he pays U.S. Senators bribes with stocks in his*  
27 *corporations and has a thousand crooked Goldman Sachs investment bankers selling his hair-*  
28 *brained schemes to your parents pension funds. Tesla is known as "the official car of douche-bags".*

1 *The safety defect cover-ups on the Tesla are extreme.*

2 *Musk's narcissistic trophy-wife mom and his extremist father (who got his young sister*  
3 *pregnant) are thought to be the cause of Musk's racism and sociopath behaviors. He is the #1 crony*  
4 *capitalist government mooch in America and has received billions of dollars of your tax money to*  
5 *help him buy his mansions, starlets and sex parties.*

6 *His cars and rockets blow up, his tunnels are unsafe, his satellites spy on consumers and his*  
7 *brain chip company tortures small animals. He swiped all of his technology from someone else and*  
8 *has never come up with his own inventions. There are thousands of pages of evidence, such as the*  
9 *following examples, that prove that Musk is a corrupt covert government official sponsored by*  
10 *corrupt members of the government in exchange for money-laundering and political services. There*  
11 *is no other possible ePlaintiff 42lanation for how an awful person like Musk could exist based on*  
12 *government payola:*

**(REVIEW) Analyzing the Nasdaq TSLA Stock Market Bet Via A Diverse Set Of Analysts Reports**

There is a list of over 1000 illicit, criminal, abusive, monopolistic, corrupt and sociopath-like things that Elon Musk has done that the FBI, FTC, SEC and others have. Why has Musk not been arrested? Because he is 'protected' by his co-investors: Dianne Feinstein, Nancy Pelosi, Harry Reid, Google's owners, Facebook's owners and all of the Silicon Valley Venture Capitalists... but still: He needs to be arrested!

**What Really Went On Between Amber Heard And Elon Musk?**

Remember that it that Elon Musk presented to his parents of Amber Heard, even after Dragnev's lawsuit (started in 2015).

**Elon Musk faces court trial after shareholder sued him and Tesla claiming the CEO's 2018 pay packet worth £2.5billion was excessive and a breach of the board's duty**

Tesla shareholder Richard Tometta brought a lawsuit against Elon Musk and members of Tesla's board in 2019 after the CEO's pay package, worth around \$2.5 billion, was cleared.

**'Kill them dead. Die. Die. Die!' Elon Musk's message about rival to his start-up X.com where staff worked 36-hour shifts, slept under their desks and competition was so brutal 'it would make the creator of Game of Thrones blush,' new book reveals**

Details about Elon Musk are revealed in 'The Founders: The Story of Paypal and the Entrepreneurs Who Shaped Silicon Valley', by author Jimmy Soni.

[Corruption And Crappy Engineering - Musk's So Unsafe - AMOSKER FAILED TESLA BAD C - MUSK](#)

*Almost every single investor of Elon Musk is also the primary financier and beneficiary of the politicians, and their Congressional shenanigans, that used taxpayer money and resources to give Musk's companies all that free money. For example, Dianne Feinstein's family run the HR service (Herb Newman), the construction company, the railroads, the building leases (CBRE), the China funds (Mart Bailey, Steve Westly, Steve Spinner, et al) and swap staff members for Tesla and Solyndra.*

*Feinstein and Pelosi blocked funding for all Tesla competitors for the same State and Federal cash and tax waivers and for the NUMMI factory. The California politicians, personally, made billions off insider trading, pump-and-dumps and payola. Felonies? You Bet! When Musk owns two different seated Presidents, 22+ major Senators and 17 major agency bosses and Governors, why should he worry? If only the FBI, DOJ, SEC, FTC, etc., didn't have other things to do. Tesla, and everything Musk does, are corrupt mobster operations..."*

**THE CROOKED ELON MUSK FAMILY: MEET THE KING OF COVER-UPS:**

Many people think that Elon Musk, his family and his Tech Cartel are the biggest, lying, scumbag mobsters in history! It is time to arrest Elon Musk!

**Tesla Will Pay \$0 Federal Tax Despite  
Elon Musk's \$11 Billion Personal Tax  
Bill**

Tesla had no taxable income to report to the U.S.  
IRS (2012-2016-2017)

**THE FORBIDDEN TESLA TIMELINE THAT MUSK'S COVER-UP PEOPLE DON'T WANT YOU TO SEE:**

Derived from RICO CASE FILE #456-D-hj45A and Tesla Employee Testimony. 15 Tesla employees have provided every company email since 2003, between all suppliers, investors and third parties. (Their hard drives did not crash). All of this information can be independently verified with minor research and interviews.

By comparing records and files from FINCEN, FBI, FTC, SEC, Congressional Investigators, ICIJ, FEC, DOJ, ProPublica, and other sources, one can easily see that political officials own Google, Tesla, Facebook, YouTube, Instagram, et al, (AKA "The Tech Cartel" or, in legal terms: "The Enterprise"). This explains why those companies have been exempt from regulation and prosecution. Those public officials and tech company oligarchs have exchanged millions, and millions, of dollars between themselves and their families for profiteering. PANASONIC'S LITHIUM ION BATTERIES WERE NEVER DESIGNED AS AUTOMOBILE POWER STORAGE SOLUTIONS AND WILL ALWAYS BLOW UP.

TESLA DOWNGRADED THE POWER OF ALL TESLA'S TO PREVENT THE CARS FROM BLOWING UP, BUT THAT MEANS TESLA DEFRAUDED ALL BUYERS OF TESLA CARS!

They were all either financed by, friends, with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, exchanging emails with, business associates of or directed by; our business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political digital search manipulation services to. Criminal U.S. Senators coordinated and profited in these schemes.

Their own family members have now supplied evidence against them. You don't hear about this, much, in the "main-stream news" because nearly half of Congress, White House staff and government agency bosses own the stock in the news broadcasters and receive billions of dollars of financing from them.

Many witnesses, including us, have now sworn, warranted and certified to federal law enforcement about the details of these

began to show the Roadster at events to market it.

August. Elon Musk, John Doerr, Rahm Emanuel, Robert Gibbs and David Axelrod discuss a quid-pro-quo scheme to advance money for the Presidential and Senate campaigns and get paid back in spades from TARP and Dept. of Energy "Loans", tax credits, stock perks and monopolies.

September. 120 employees. They made more tests, including radiated emissions and susceptibility testing. EMF emissions during charging were high and those reports were ordered shredded

October. They made a durability test, which consists of driving the Roadster on a cobblestone racetrack. The idea is to simulate 100,000 miles in 6 months. It would have taken much longer time to drive the same distance on a smooth road. Tesla realized that their computer models were inaccurate - the Roadster's transmission didn't survive the durability test. Tesla is warned, by Detroit UAW executives that everything they are doing is wrong, wasting tens of millions of dollars and could damage the overall auto industry. Musk hates unions and pledges to keep unions out. He ignores the advice due to narcissism issues.

November 2004. 144 employees, and more tests, including driving through a saltwater bath.

December. They showed the EP 2 at the Los Angeles Auto Show.

The police officers are seen on the left with the white SUV in the background that has been involved in a crash. The investigation team is seen in the middle to the right in the background.

**2007**

January. Tesla brought the Roadster to Arvidsjaur, Sweden, to see if it could survive winter conditions. It had severe charging issues

February. 205 employees. Tesla began to build a validation prototype (VP), where they took everything they learned from the engineering prototype. Tesla says it will build a \$35 million plant in Albuquerque, to produce the Model S. They lied.

March. 230 employees and they finished the VP 1.

April. In dire finances, Tesla raised more money - a series D round led by Elon Musk, Technology Partners, and Vantage Point.

June. Tesla's motor factory in Taiwan was finished and it began producing parts.

July. A new transmission was somewhat finished but still has ongoing problems.

August. Tesla finished the VP 10. CEO Martin Eberhard was replaced by Tesla investor. Tesla's are now \$100,000.00 over budget PER CAR Michael Marks, hired, who would wrk as an interim-CEO until Tesla found a long-term CEO.

September. Tesla delayed the launch of the Roadster because they needed more time to test its durability.

October. Tesla transmission failed in the durability tests. Massive engineering failures are piling up. Tesla needed yet another transmission.

November. Actual Tesla Martin Eberhard is forced out of the company after confronting Elon Musk regarding Musk's manipulations. Musk orders his PR group to launch character assassination campaign against Eberhardt

December. Interim CEO Michael Marks see the lies and leaves and is replaced by interim CEO Ze'ev Drori. Bernard Tse is contracted, by Tesla, to hide the Tesla battery explosion documents that have been uncovered.

December. Tesla says it will build it;s factory in Southern California. They lied.

December. Sex worker hired by Musk attempts blackmail. Lawyers shut her down

Autopilot Tesla HITS police cruiser & another car in Florida in a near-miss incident that left 2 people injured

**2008**

January. 260 employees. The VPs survived the new tests, so the Roadster was finished -except for the transmission. Tesla

**HIGHLIGHTS:**

(Full Timeline is 42 pages long)

**1880's** - Detroit Electric sells Electric cars commercially

**1900.** 38 percent of US automobiles are powered by electricity, but as Henry Ford designed the much cheaper T-Ford, the electric cars began to disappear.

**1970s.** The price of gasoline hits record because of a series of energy crises, so the interest in electric cars increased again.

**June 1971.** Elon Musk was born to one of the most dysfunctional families in the world.

**1996-1999.** General Motors produced an electric car called EV1 and leased it to customers.

**1998** - Elon Musk is spending his fathers ill-gotten mining dollars. His father's friends tell Musk to "keep an eye on the mines in Afghanistan..."

**1999.** Elon Musk sold his company Zip2 and made \$22 million. He founded X.com that would become PayPal.

**October 2002.** eBay acquired PayPal and Elon Musk made \$165 million.

**2003.** General Motors cancelled the lease program and removed the last EV1 from the streets. They said they couldn't sell enough of the cars to make the EV1 profitable.

July. Martin Eberhard and Marc Tarpenning incorporated Tesla Motors. They had earlier made a feasibility study to see if they could make an electric car. They now made a feasibility study together with AC Propulsion to see if the batteries would work.

November. The 2 employees searched for a partner to build the rest of the car. Lotus became their choice. Lotus engineers, from England, agree to provide chassis of car.

**TESLA'S KILL THEIR OWNERS BECAUSE THEY ARE SO DEFECTIVE AND UNSAFE IN EVERY WAY!**

**2004**

February. Ian Wright, who had met Martin Eberhard while on a plane, joined the company. They finished business plan 1.0. Ian later leaves Tesla in disgust when he realizes what they are up to

March. Starting a car company is expensive, so they began to look for outside investors. Silicon Valley VC's discuss having Elon

### When Elon Musk's Political Bribery Does Not Work!

Marina Koren writes in the Atlantic, that the thought of a three-letter government agency preventing narcissist Elon Musk (currently the richest person in the world from stock market manipulations he created with Goldman Sachs), from doing anything he wants might seem like a bureaucrat's fantasy.

[TESLA autopilot accused for emergency-vehicle crashes...](#)

This is the guy who got approval to launch a Tesla into space simply to spray his arrogance across the solar system, who got a street renamed Rocket Road because he had the local politicians by the balls, who disregarded [coronavirus restrictions](#) when he felt they got in the way of ass-hole cars-for-millionaires business. But Musk's ambitious timeline for launching Starship, his wet dream rocket, out of a remote part of Texas depends right now on a pending decision from the Federal Aviation Administration that could add months or even years of delay. Many have already contacted the FAA to say that "Musk is full of shit...his arrogance endangers all... his satellites spy on the public with Google-like spy craft...etc..."

[US probing Autopilot problems on 765,000 Tesla vehicles](#)

Musk can't bulldoze past regulations of this particular nature. He does have one power that many executives do not: Whenever he talks, people pay attention because he has spent more money to control digital media than anyone in history.

So called "Sociopath", Musk now finds himself at a bit of an inflection point. This could be the year that he smooths out yet another piece of friction in his deep-space enterprise, or it could be the year that momentum stalls. Last night's presentation seemed like a not-so-subtle attempt to show that the success of Starship hinges on what the FAA decides—a heavy message disguised as a fanciful TED Talk. Many nations, and astronomers worldwide, hate Musk because his satellites crash into other spacecraft, fall out of the sky, block observations of deadly asteroids, spy on citizens... and essentially do little that is not evil! In a notorious 60 Minutes interview, experts at NASA dismissed him as a rich flake.

[Tesla reportedly paid \\$1 million to former employee who said supervisors called him a racist slur](#)

The Starship prototype at the center of the show is not the first one SpaceX has built, and it certainly won't be the last. SpaceX keeps blowing up these prototypes until one stays intact. Science says that there are over 80 ways that passengers on SpaceX ships will die, get mutated, get cancer or have their insides toxicified. Musk doesn't care. Fame-slutting rides higher than safety for old Elon.

2 **EXHIBIT 22 - Felony Charges Against affiliated insiders Larry Page, Eric**  
3 **Schmidt, Sergey Brin And Jared Cohen**

4 **The Spies In Your Pocket Are Rigging Your Elections**

5 Defendants and their Cartel operatives engaged in election law violating campaign finance, money  
6 laundering, illicit political quid pro quo and anti-trust violating operations, among other crimes.

7  
8 Google was just a search engine that helped you find pie recipes. How did it turn into a cartel-based  
9 monopoly of political corruption, domestic spying, sex cults and election rigging? Elon Musk and  
10 Google bosses Larry Page and Eric Schmidt shared apartments, lobbyists, Goldman Sachs teams,  
11 sex partners, stock market trickery and competitor black-lists. Let's take a look at how that all that  
12 worked...  
13

14  
15 In fact, let's take a look at what the users of the internet, and the news media, say about the Google  
16 – YouTube – Alphabet Cartel that this octopus-like crime operation has spawned:  
17

18 ***"Google is a sick corrupt criminal business run by sex trafficking perverts and***  
19 ***sociopaths..." Say GOOGLE'S own inside employees, Divorce Court records of Google***  
20 ***executives, 70+ State & Federal investigations and major news outlets.***

21 Most of the U.S. Senators and government agency heads own stock in, get their political  
22 campaigns financed by and party with, the owners and executives of the Silicon Valley big tech  
23 companies.

24 That is why those public officials fail to halt the mass societal abuses of those companies.  
25 Above all others, the California politicians are in bed with the same criminals they are supposed to  
26 regulate.

27 While politicians shrug off any attempt to bring the oligarchs into line, they provide lip-  
28 service, window-dressing pretend actions that have impressive titles but zero bite.

1 The authors of this report were in private meetings with the investors and founders of the  
2 Silicon Valley “Big Five”, at the inception of their companies, and hereby testify that those owners  
3 planned, with malicious intent, the use of their business licenses for the purpose of manipulating,  
4 harming and restricting the public interest, and DEMOCRACY, for profiteering purposes.

5 Big tech’s “*green-washing*”, false-savior, “*we-are-your-mother*” fake “*do-gooder*” facade is  
6 a sham to sucker everyone.

7 They hide behind a curtain of false altruism and do the darkest deeds any industry can  
8 undertake behind that contrived screen.

9 One of Google , Youtube and Facebook’s most insidious technologies can even get you to  
10 engage in riots, murders and other crimes, even though you might, otherwise, never do those things.  
11 Here is how that technology works:

12 Since the early 20th century, the name of the Russian scientist Ivan Pavlov has been  
13 associated with the idea of brainwashing. Pavlov’s ePlaintiff 42eriments, in which he trained dogs  
14 to salivate in response to a signal such as a bell, showed that the mind could be conditioned to react  
15 automatically to stimuli. But he looked forward to a time when science could manipulate the brain  
16 directly. In a passage eerily accurate in describing today’s neural imaging, he wrote: “If we could  
17 look through the skull into the brain of a consciously thinking person...then we should see playing  
18 over the cerebral surface a bright spot with fantastic, waving borders, constantly fluctuating in size  
19 and form, and surrounded by a darkness, more or less deep, covering the rest of the hemispheres.”

20 We still don’t have a precise topography of the brain in terms of specific thoughts or  
21 feelings. It’s hard to imagine where one would begin if one wanted to surgically force someone to  
22 reveal a particular secret, or to persuade him or her to vote for a certain candidate. But since  
23 Pavlov’s time, science has moved much closer to enabling direct physical control of the brain. In  
24 this century, neuroscientists’ insights into memory, cognition, pleasure and pain may make coercive  
25 “mind control” a reality.

26 The psychologist James Olds (1922-76), one of the founders of modern neuroscience,  
27 conducted an ePlaintiff 42eriment at McGill University in 1953 in which he implanted electrodes  
28 deep in the brains of rats and started observing their responses to electrical stimulation at various

1 sites. His key observation resulted from an accident: He missed the desired anatomical site slightly  
2 on one particular rat. After recovering from surgery, the animal was placed in a special chamber.  
3 Every time it went to a corner of the chamber, it received a small electrical stimulus to the brain,  
4 with each corner stimulating a different site. The rat kept returning to one specific corner, even  
5 skipping eating to hang out there and get the brain stimulation.

6 Olds inferred that there was something pleasurable about receiving a shock at that site in the  
7 brain. Next he started training the rat to go to different parts of the box or to turn right or left before  
8 it could receive the desired electrical stimulation. Using this technique, Olds could elicit complex  
9 behaviors easily; Pavlov would have been envious about this shortcut to behavioral conditioning.  
10 Olds observed that “Left to itself in the apparatus, the animal...stimulated its own brain regularly,”  
11 up to 5,000 times an hour.

12 The mind-control possibilities for this intervention sounded almost limitless, but would it  
13 work on people? Psychiatrist Robert Heath (1915-99), of Tulane University, performed studies with  
14 human patients, including one code-named B-7, a 28-year-old man with severe narcolepsy. Heath  
15 implanted a series of electrodes in various areas of his brain and asked the patient what he felt after  
16 each area was stimulated. One area was so aversive that the patient intentionally broke the stimulus  
17 button so that he would never have to experience that sensation again.

18 However, the feelings evoked by stimulating a different site were intensely pleasurable. The  
19 patient learned that he could block an incipient narcoleptic attack by self-stimulating; he was able to  
20 control his symptoms so well that for the first time he was able to get a job. On the rare occasion  
21 that he fell asleep too rapidly to press the button, his friends knew that they could promptly wake  
22 him up by pressing it for him.

23 Neurosurgical techniques have continued to evolve to be less invasive, less risky and applied  
24 to very specific areas of the brain.

25 At one point the CIA approached Heath, asking if he would work with the agency to study  
26 the brain’s pleasure and pain system. He spurned the invitation, he told a New York Times reporter  
27 in 1977: “If I had wanted to be a spy, I would have been a spy. I wanted to be a doctor and practice  
28 medicine.” This kind of work, most of which was conducted in the 1960s and 1970s, has largely

1 been shut down because of ethical concerns.

2           However, the underlying neurosurgical techniques have continued to evolve. Fifty years  
3 after Heath’s studies, procedures are less invasive, less risky and can be applied to very specific  
4 areas of the brain. Implanted deep-brain stimulators (DBS) are used by thousands of people with  
5 Parkinson’s disease to help control their muscle movements, as well as for other conditions such as  
6 pain and epilepsy. There is ongoing interest in using such interventions on different sites in the  
7 brain to treat patients with psychiatric disorders, particularly patients with treatment-resistant  
8 depression.

9           Deep-brain stimulation requires painstaking surgery and ePlaintiff 42ensive equipment,  
10 suitable for an individual but hardly appropriate for group interventions. Is there a way of  
11 stimulating a group of people without implants? In her 1996 book “Cults in Our Midst,”  
12 Psychologist Margaret Singer described love bombing,” an indoctrination technique used by some  
13 cults in which recruits are given so much flattery and adulation that they feel welcome and safe.

14           The neuroendocrine equivalent involves a hormone called oxytocin that is manufactured  
15 deep in the brain. People release oxytocin when they are bonding with another; it is sometimes  
16 nicknamed the feel-good hormone. Early research found that it is increased during breast-feeding  
17 and during sexual intimacy. Subsequent research showed that oxytocin is also produced in other  
18 situations of closeness—prayer, team sports, even when dog owners interact with their pets.

19           But there is a darker side to oxytocin. EPlaintiff 42eriments have found that it can stoke trust  
20 and cooperation within a group at the expense of distrust of people outside the group. Currently, the  
21 most effective way of administering oxytocin is through a nasal spray, but if it were possible to  
22 administer it orally or via aerosol, it could conceivably be used in group settings to increase  
23 attachment and thereby recruit new potential members of a cult or party. People might willingly join  
24 a group or adopt a new belief if it allowed them to receive pleasurable stimulation—after all, addicts  
25 aren’t particularly squeamish about what they need to do to obtain their drugs.

26           On the other side of the coin, people might repudiate their old beliefs or identities to turn off  
27 painful stimulation, the way patient B-7 broke his stimulus button. When the dystopian movie “A  
28 Clockwork Orange” was released in 1971, audiences were stunned by its portrayal of the power of

1 aversive conditioning. The advance of neuroscience means that such techniques are no longer just  
2 fantasies. So far they have been kept in check only by government regulation and medical  
3 professionals' sense of ethics. But governments are always seeking new weaponry, and history  
4 suggests that there will always be some researchers who close their eyes to the implications of their  
5 work or justify it as a way to protect society from looming threats. Their self-restraint may not  
6 always protect us from the dark potential of Google and Facebook's scientific coercion. This report  
7 goes deeper into those contrived and manually steered tech manipulations operated by Big Tech's  
8 executives.

9         Google is manipulating your internet searches, your elections, your perceptions of the news,  
10 your democracy, your ideologies and your school curriculum's. Google and their cartel (including  
11 FACEBOOK, NETFLIX, LINKEDIN, YOUTUBE, et al ) collude to manipulate social dynamics.  
12 White House executives, Federal Agency Executives and U.S. Senators including Dianne Feinstein,  
13 Kamala Harris, John Podesta, Nancy Pelosi, Harry Reid own, control and finance "***The Deep State***"  
14 because they own, and their families, own the stock in the companies comprising ***The Deep State***,  
15 they tell those companies what to do, they fund those companies and they social communicate with  
16 each other through covert channels, they engage sexually with each other and they exchange stock  
17 market tips and strategies, and that forensic accounting shows that the politicians and the corrupt  
18 companies are all the same organization. ***This, in part, proves that the "Deep State" is "State  
19 Sponsored".***  
20

21  
22 Google, and The Deep State's, socialistic, anti-Christian bias is invisibly reflected in the  
23 suppression of ideological content from appearing in some search results.  
24

25         In shocking research that has spanned the past 6 ½ years, Dr. Robert Epstein – former  
26 editor-in-chief of *Psychology Today* and now Senior Research Psychologist at the American  
27 Institute for Behavioral Research and Technology – has found that by controlling search results,  
28 Google possesses unprecedented power to sway the thinking of undecided voters during an election

1 campaign.

2 How is it done?

3 Google can manipulate its search engine algorithm to display one-sided search results that  
4 decidedly favor one political candidate over another.

5 Dr. Epstein gave a grim prediction in recent congressional testimony...

6 He said that “democracy as originally conceived cannot survive Big Tech as currently  
7 empowered.”

8  
9 Dr. Epstein is a registered Democrat. He supported and voted for Hillary Clinton in the 2016  
10 election. He has no hidden agenda ... and no axe to grind for President Trump.

11 During the 2016 presidential election campaign, he captured and analyzed “more than  
12 13,000 election-related searches conducted by a diverse group of Americans on Google, Bing, and  
13 Yahoo in the weeks leading up to the election...”

14 During the 2018 midterm election cycle, Dr. Epstein captured 47,000 election-related  
15 searches – plus nearly 400,000 web pages to which the search results were linked.

16 The results of his scientific analysis in both cases were disturbing...

17  
18 The Google search results in 2016 – which account for over 92% of worldwide internet  
19 searches – were significantly biased in favor of Hillary Clinton in all 10 positions on the first page  
20 of search results in both blue states and red states.

21 In 2018, the first-page search results heavily favored web sites and articles favoring  
22 Democrat candidates rather than being evenly split between Democrat and Republican candidates.

23 Very few people who do spontaneous searches ever scroll past the first page of search  
24 results. And Google knows this.

25  
26 Dr. Epstein has conducted dozens of controlled experiments in the U.S. and other  
27 countries to precisely measure – through before-and-after questionnaires – how opinions and votes  
28 shift among undecided voters when search results strongly favor one candidate over another.

1 He calls this shift “SEME” – Search Engine Manipulation Shift.

2 “SEME is one of the most powerful forms of influence ever discovered in the behavioral  
3 sciences,” Dr. Epstein said in his congressional testimony, “and it is especially dangerous because it  
4 is invisible to people – ‘subliminal’ in effect... Bottom line: biased search results can easily produce  
5 shifts in the opinions and voting preference of undecided voters by 20% or more – up to 80% in  
6 some demographic groups.”

7 I can tell you, this is enough voters to change the results of any election.

8  
9 Dr. Epstein calculated that Search Engine Manipulation Shift likely persuaded at least 2.6  
10 million undecided voters to cast their ballots for Hillary Clinton in 2016 ...and perhaps as many as  
11 10.4 million.

12 In the 2018 midterm elections, Epstein’s evidence suggests that as many as 78.2 million  
13 votes may have been shifted to Democrat candidates due to Search Engine Manipulation Shift.

14 These effects are far more meddlesome and interfering than fake news stories or ads placed  
15 by Russians on social media...

16  
17 While these acts of interference are troubling and unacceptable, they don’t shift very many  
18 votes because they are competitive and visible. Search Engine Manipulation Shift – on the other  
19 hand – is invisible and non-competitive.

20 Dr. Epstein explains: “SEME is an example of an ‘ephemeral experience,’ and that’s a  
21 phrase you’ll find in internal emails that have leaked from Google recently. A growing body of  
22 evidence suggests that Google employees deliberately engineer ephemeral experiences to change  
23 people’s thinking... My recent research demonstrates that Google’s ‘autocomplete’ search  
24 suggestions can turn a 50/50 split among undecided voters into a 90/10 split without people’s  
25 awareness.”

26  
27 As ePlaintiff 42ected, Google, Hillary Clinton, and progressive media outlets have all  
28 disputed Dr. Epstein’s research and his claims...

1 They all say in unison that this 2016 study of election-related search results has been  
2 “debunked,” and that Epstein’s results aren’t valid because he made “weird methodological  
3 choices” in an earlier 2010 study.

4 But they haven’t debunked his methodology or his results at all...

5 They’re just saying this to try to discredit him and convince people to not take his work  
6 seriously. They haven’t refuted him either by conducting their own comparable studies ... or by  
7 addressing his explanations of his methodology.

8  
9 Incidentally, the number one Hillary Clinton financial supporter in the 2016 election was  
10 Alphabet Inc. – the parent company of Google.

11 You can read Dr. Epstein’s testimony and study the methodology of his ePlaintiff  
12 experiments [here](#).

13 He is eminently qualified to conduct the type of research he’s been conducting with Google  
14 search – having been a research psychologist for nearly 40 years.

15 He received his Ph.D. at Harvard University in 1981 and has published 15 books and more  
16 than 300 scientific articles on artificial intelligence and other behavioral topics.

17 Dr. Epstein believes the solution to Google’s search engine manipulation is to end its  
18 monopoly over its “black box” algorithm operation.

19 By requiring that the database they use to generate search results must be available in the  
20 public domain – accessible to all – many new search platforms will spring up and compete with  
21 Google, providing the same excellent search results.

22 Incidentally, I find that every time I run a Google search on a topic, I am served biased  
23 viewpoints...

24 Usually a CNN report is first on the list, followed by:

- 25 •The New York Times
- 26 •The Washington Post
- 27
- 28

1 •MSNBC

2 •Other pro-socialist media

3 I often have to scroll to page 7 or 8 to start finding conservative viewpoints.

4 Since 2012, Google has discriminated against and marginalized our editorial content. If they  
5 are doing it to us, they are certainly doing it to conservative web sites with higher numbers of  
6 subscribers. See these videos:

7 <https://youtu.be/rNvgl38TLvI>

8 and

9 [https://youtu.be/csye\\_Jkp4eI](https://youtu.be/csye_Jkp4eI)

10  
11 There were allegations raised that Google was **manipulating the news** to help Hillary. They  
12 allegedly steered **2.6 million votes to Hillary** and had far more of an impact upon the 2016 election  
13 than Russians. A whistleblower at Google has come out and warned that things are getting worse.  
14 Google whistleblower **Zach Vorhies** came out and provided documents and warnings. He said:

15 *“Before Trump won, Google had this mission statement to organize the world’s information  
16 and making it universally accessible and useful.”*

17  
18 *“After Trump won, they said ‘Well, Donald Trump won because of fake news and  
19 Russia hacking the election, so what we need to do is ... protect our users from fake  
20 news; we need to protect our users from the damaging effects of Russian trolls and  
21 bots.”*

22  
23 What is interesting is that Elizabeth Warren has been a longtime critic of the economic  
24 power of Amazon, Google, and Facebook. She is making their **break-up** under Anti-Trust Laws a  
25 key component of her presidential platform.

26  
27 Google's ubiquitous search engine, **Google Search**, is the backbone of the tech giant's  
28 business.

1 In many ways, Google Search is the backbone of the modern internet — the way much of  
2 the web is sorted and organized and located. Given how crucial it is to daily internet use for billions  
3 of people around the world, it's a particularly ripe target for manipulation.

4 Google denies doing as much, and [insists that Google Search is built on algorithms](#) and data  
5 gleaned from use.

6 But [a new Wall Street Journal investigation](#) found that Google manipulated search  
7 algorithms in some worrying ways, including prioritizing large businesses over smaller ones,  
8 removing autocomplete results that involve sensitive topics like immigration and abortion, and even  
9 outright blacklisting some websites.

10 In one such change to Google's search algorithms, the service guided search users to more  
11 prominent businesses over lesser-known ones, the Journal reported. That change reportedly helped  
12 to boost Amazon's store in search results.

13 In another example cited in the Journal's report, autocomplete search results for sensitive  
14 subjects were replaced with safer results than those found on competing search engines like Yahoo,  
15 Bing, and [DuckDuckGo](#).

16 Google is known for refusing to share specific details on how its search algorithms operate,  
17 which it attributes to a measure of operations logistics: If the algorithms were public, then they  
18 could be gamed, Google argues.

19 "Extreme transparency has historically proven to empower bad actors in a way that hurts our  
20 users and website owners who play by the rules," Google spokesperson Lara Levin told the Journal.

21 When reached for a response to the report, a Google spokesperson offered the following  
22 statement:

23 "We have been very public and transparent around the topics covered in this article, such as  
24 our Search rater guidelines, our policies for special features in Search like Autocomplete and valid  
25 legal removals, our work to combat misinformation through Project Owl, and the fact that the  
26  
27  
28

1 changes we make to Search are aimed at benefiting users, not commercial relationships. This article  
2 contains a number of old, incomplete anecdotes, many of which not only predated our current  
3 processes and policies but also give a very inaccurate impression of how we approach building and  
4 improving Search. We take a responsible and principled approach to making changes, including a  
5 rigorous evaluation process before launching any change — something we started implementing  
6 more than a decade ago. Listening to feedback from the public is a critical part of making Search  
7 better, and we continue to welcome the feedback."  
8

9         If you use Google’s search engine, “There’s no way of knowing what you’re missing,” says  
10 Gabriel Weinberg, CEO and founder of search engine DuckDuckGo, whose company released  
11 a [study](#) Tuesday claiming that Google is manipulating Americans’ search results.

12         The study concludes that Google is editorializing and providing different search results for  
13 different users who search for identical terms, within seconds and minutes of each other.

14         “The editorialized results are informed by the personal information Google has on you, like  
15 your search, browsing and purchase history,” the study says.  
16

17         “What we’re seeing is intense amounts of variation,” Weinberg told Yahoo Finance. “Most  
18 of the people in the study saw results completely unique to them.”

19         By unique, Weinberg means that inconsistent source links appeared in search results, and  
20 some of the same links appeared in varying hierarchical order.

21         Seventy-two U.S. participants in the study entered three independent Google search terms  
22 — gun control, immigration, and vaccinations — using a desktop Chrome browser at 9 p.m. eastern  
23 time on July 24, 2018.  
24

25         Unique results were returned for 68% of private searches for “gun control,” 57% of searches  
26 for “immigration,” and 92% of searches for “vaccinations.”

27         According to the study, Google returned these filtered results, regardless of whether  
28 participants searched in private “[incognito](#),” or non-private mode.

1 “It’s exactly opposite of what people would expect,” Weinberg said.

2 In non-private mode, unique search results were generated for 59% of searches for “gun  
3 control,” 63% of searches for “immigration,” and 92% of searches for “vaccinations.”

4 “Our proposition is that if you search in the U.S. you should be seeing the same things,  
5 especially when you search major political topics,” Weinberg said.

6 DuckDuckGo decided to run the new study after a previous version examined Google search  
7 results in connection with the 2012 presidential campaigns. A [Wall Street Journal study](#),  
8 commissioned around the same time, mirrored DuckDuckGo’s findings, showing that Google’s  
9 personalized search results inserted tens of millions of more links for then-candidate Barack Obama  
10 than for his primary challenger Mitt Romney.

11 “Search personalization doesn’t actually help search results, it really hurts in the aggregate,  
12 making people more politically polarized,” Weinberg said.

13 In his experience, Weinberg says when consumers think of search personalization they’re  
14 really expecting search localization for services like local weather, local restaurants, and  
15 maps, rather than national or international political issues.

16 “You can do that all without a filter bubble because it’s not based on your search history,”  
17 he said, adding that search-based ad revenue is not dependent on search personalization.

18 DuckDuckGo’s study controlled for local results by designating all local search results as  
19 equal and accounting for no variation if the local links appeared in the same hierarchical order. A  
20 result showing an LA Times link, for example, was treated the same as link to the Chicago Tribune.

21 For critics who dispense with the importance of result order, Weinberg says they’re  
22 mistaken.

23 “The first link gets about 40% of the clicks, the second gets about 20%, and it drops off by  
24 half with each [subsequent] link,” he said. “If you switch the second and first link, that’s actually a  
25 huge difference” because the one is now getting twice as many clicks as the other.

1 Yahoo Finance reached out to Google for a response to DuckDuckGo’s study and didn’t  
2 receive a response.

3 “I’m really not on any particular side,” Weinberg said when asked about his political  
4 ideology.

5 He says he’d like to see Congress question Google CEO Sundar Pichai about search result  
6 bias when he testifies before the House Judiciary Committee on December 11.

7 “We understand [the study] is coming from a competitor and there’s an inclination to  
8 believe [the findings] less so. That’s why we made it all public, the data, the code, the directions,  
9 and we are basically saying we believe other people should study this,” he said.

10 Weinberg says editorialized results may be crafted depending on the level of privacy, and  
11 the number of Android products you use.

12 “They may have all your email, they may have all your text messages, have all your photos,  
13 all your contacts, so [editorialized content] can be based on all of those things. It’s a completely  
14 black box and opaque to consumers.”

15 A few people in the study were given a much broader range in search results from what the  
16 majority of participants were seeing, Weinberg said.

17 “You would just have no idea if you were one of those people. And you also would have no  
18 idea, even if you know you’re seeing something different, why you’re seeing it.”

19 The rise of renewed and vociferous social movements for every non-white and non-cis male  
20 group can be seen as paralleling the rise of social media and the domination of technology  
21 platforms. In time, at least in the Western world, when blacks, women, gays, and most other  
22 populations have won equal rights, and even preferential rights, under codified federal law, and  
23 when their social currency has never been higher, it seems now that their voice has never sounded  
24 more pained or aggrieved.

25 Without a doubt, the ease of emoting through a tweet has certainly affected how individual  
26  
27  
28

1 users can set off maelstroms of irrational fury. Whether calling out real hurt, self-deluded hurt, or  
2 pure schadenfreude, there is no shortage of bored and usually meaningless lives attempting to drag  
3 down a crab that has nearly escaped the barrel of life.

4 The other side of the same coin is how the tech giant themselves can influence the narrative.  
5 We see this play out with not-so-alleged [shadow banning](#) practices of conservative social media  
6 accounts, and most people are by now aware of YouTube [demonetizing](#) conservative channels. We  
7 can add a new wrinkle: The representation of Google Image searches to advance a social narrative.  
8

9 Let's break down what we saw in our own online queries, and then we can analyze it  
10 afterward. Try it out for yourself and leave a comment at the end of the article.

11 *Google Search: "White Men"*

12 The top three rows of the search produced a total of sixteen results. Of those, there were:

- 13 ○One result featuring a woman of color
- 14 ○Three results featuring exclusively black men, either as a victim of white brutality or as a  
15 successful black man. Each image is a well-dressed black man wearing a tuxedo or suit.
- 16 ○Five results featuring either a mug shot of some kind or simply an angry visage.
- 17 ○Visible taglines for the images including phrases like "Dear White Men, We Need You,"  
18 "White Men Are Bad," "An Angry White Man" and one begins "White Men Aren't Thrilled When  
19 Women"

- 20 ○Only two results showing white men smiling

21 *Google Search: "Black Men"*

22 The top three rows of the search produced a total of seventeen results. Of those, there were:

- 23 ○All seventeen results featuring black men
- 24 ○Eight of the results featuring black men smiling
- 25 ○At least six of the results explicitly ePlaintiff 42ressing victimhood. A few others  
26 are vaguer but allude to it.

- 27 ○Visible taglines for the images including: "The Young Black Men Caught," "Why Do  
28 White People Feel," "Photo Campaign That Celebrates Black" and "Resilience Of Black Men."

*Google Search (see feature photo): "White Women"*

1 The top three rows of the search produced a total of fifteen results. Of those, there were:  
2 ○Five results featuring women of color  
3 ○Two results featuring black men  
4 ○Four featuring white women smiling  
5 ○Visible taglines for the first five results including: “The Trouble with White Women,”  
6 “White Women Need To Talk About Race,” “White Women Aren’t Allies At Work,” “Dear White  
7 Women, No More,” and “White Women: It’s Time To Be...”

8 ○Other taglines including “White Women Were Southern Slave Owners,” “Being  
9 Exoticised By White Women,” “Black Women Are Paid Less Than White,” and “White Women  
10 Benefit Most (from white privilege).”

11 *Google Search: “Black Women”*

12 The top three rows of the search produced a total of sixteen results. Of those, there were:  
13 ○All sixteen results featuring black women  
14 ○All sixteen results featuring well-dressed and well-groomed women  
15 ○Fourteen of the results featuring black women smiling or projecting happiness (the other  
16 two project strength)

17 ○Visible taglines including: “How Women Have Shaped,” “Studies Suggest Black Women  
18 Are More,” “My Heroes Are Black Women,” and “20 Millennial Black-Owned Brands.”

19 *Google Search: “White People”*

20 The top three rows of the search produced a total of fifteen results. Of those, there were:

21 ○Seven results featuring people of color  
22 ○Four additional results featuring white people protesting in solidarity with black people  
23 ○Just one result featuring a white person smiling (a white woman with dreadlocks)

24 ○Visible taglines including: “Dear White People,” “Dear White People (again),” “A Letter  
25 To White People,” and another features the deplorable Robin DeAngelo.

26 *Google Search: “Black People”*

27 The top three rows of the search produced a total of fifteen results. Of those, there were:

28 ○All fifteen results featuring black people  
○Eleven results featuring blacks smiling

○Visible taglines including: “What’s Life Really Like For Black,” “Being Black In  
America,” “Racism Grows in Places,” and “Facebook Has Problem With Black People.”

*An Analysis of Search Results*

1  
2 An aggregate of the three “white” searches is unflattering for white people. Of the forty-six  
3 total results, a full eighteen (39%) of them depict non-whites, sometimes in roles of victimhood but  
4 usually in portrayals of independence and success. In and of itself, this is not bad, but it is  
5 misrepresentative of the intended search, and as we see, it is not replicated in reverse for other  
6 searches. For the whites themselves, just seven (15%) were represented in a positive light as  
7 indicated by smiling. Put another way, more than twice the amount of blacks were shown than  
8 whites in a positive way – in a search designed to produce white results, to begin with.  
9

10 The taglines are especially egregious. Just two taglines suggest something positive  
11 (“Employment Helps White Men’s Health,” and another is assumed to be positive because it shows  
12 white women rallying against the death of a black woman at the hands of police). Two others are  
13 neutral in that they advertise white shirts. That leaves a full twenty-four taglines (52%) under an  
14 image of white people that states something negative or dangerous about them.  
15

16 An aggregate of the three “black” searches has a different outcome. Of the forty-eight total  
17 results, fully 100% of those results came back with images of black people. In the same vein, none  
18 of the taglines suggest that blacks are dangerous or that anything blacks do is harmful to others (as  
19 is the case especially with white women, more on that anon).

20 Amazingly, twenty-nine taglines portray blacks as victims. Despite the overall happiness of  
21 blacks as seen through imagery, the titling of the pictures nevertheless contends that blacks must be  
22 seen as victims. The taglines refer to the problems being black in America, and several refer to their  
23 killings (always at the hands of whites or police, not other blacks, even though black homicide  
24 victims are killed by other blacks 90% of the time according to the FBI).  
25

26 As it relates specifically to the query of white women, something striking is happening.  
27 There is clearly a concerted effort to portray white women as comfortably and cunningly subversive  
28 (Where is the feminist outrage, by the way?). Most headlines call out white women for a

1 combination of their insincere efforts at allying with blacks, benefiting from white privilege, and to  
2 really hammer home a negative stereotype, fulfilling the role of a “Karen.” In the intersectional rat  
3 race, the irony is that a significant majority of all women marchers in January 2017 were [white and](#)  
4 [championing leftist causes](#). Two immalleable rules in life: You can’t please everyone, and the left  
5 always consumes its own.

6       It is obvious that the Marxists at Google have an agenda to pursue, namely that the narrative  
7 must be alive and well. White men and women are evil? Check. Are blacks simultaneously victims  
8 of white oppression and strong individuals? Check. The more subtle displays arise when looking at  
9 the positive and negative dispositions. In Nazi propaganda, Goebbels only had to compare [Jews to](#)  
10 [rats](#) for so long before most Germans went along with the lie. How long before a similar lie is  
11 believed here? More concerning, what happens after that?

12       *The Wall Street Journal* has undertaken a thorough [investigation](#) into how Google, despite  
13 its denials and disavowals, manipulates search results to influence what you learn and find online.  
14

15       For years Google executives have insisted that they do not use human intelligence to arrange  
16 the results of online searches. Yet, the *Journal* found that, “Google’s algorithms are subject to  
17 regular tinkering from executives and engineers who are trying to deliver relevant search results,  
18 while also pleasing a wide variety of powerful interests and driving its parent company’s more than  
19 \$30 billion in annual profit.”  
20

21       The *Journal* also found that, “Despite publicly denying doing so, Google keeps blacklists to  
22 remove certain sites or prevent others from surfacing in certain types of results.”  
23

24       The tech giant also influences search results through its auto-complete feature prior to  
25 searching the internet. “In auto-complete, the feature that predicts search terms as the user types a  
26 query, Google’s engineers have created algorithms and blacklists to weed out more incendiary  
27 suggestions for controversial subjects, such as abortion or immigration, in effect filtering out  
28 inflammatory results on high-profile topics.”

1 In response to the investigation, a Google spokeswoman, Ms. Levin, told the *Journal*, “We  
2 do today what we have done all along, provide relevant results from the most reliable sources  
3 available.”

4 Google, which has more than 90% of the market share for online searches, is an extremely  
5 powerful company capable of controlling what people know and what they can learn online.

6 The *Journal* tested the word “abortion” in Google’s search engine and compared the results  
7 to Bing and DuckDuckGo’s results. According to the test, Planned Parenthood was featured in 39%  
8 of the results on the first page of Google’s results compared to 14% for Bing and 16% for  
9 DuckDuckGo.  
10

11 Ms. Levin responded to the test by claiming that Google does not promote Planned  
12 Parenthood through its algorithm, but the available evidence suggests otherwise.

13 Google has also [been exposed](#) by a former staffer who spoke with the undercover  
14 investigative organization Project Veritas. The staffer, Zachary Vorhies, claimed that Google has a  
15 “news blacklist” document which censors conservative websites such as LifeNews.com,  
16 Newsbusters and the Media Research Center.  
17

18 According to one researcher, Google even has the power to influence the results of an  
19 election. Indeed, they have already done so.

20 Dr. Robert Epstein, Ph.D., a senior research psychologist at the American Institute for  
21 Behavioral Research and Technology, is one of the lonely voices that has been speaking out about  
22 Google’s manipulation of search results. Dr. Epstein’s research has focused particularly on the  
23 impact of Google’s search result manipulation on elections.  
24

25 In a [testimony](#) before the Senate Judiciary Committee in June of 2019, Dr. Epstein claimed  
26 that, “In 2016, biased search results generated by Google’s search algorithm likely impacted  
27 undecided voters in a way that gave at least 2.6 million votes to Hillary Clinton (whom I  
28 supported).”

1 Dr. Epstein also claimed that, “On Election Day in 2018, the “Go Vote” reminder Google  
2 displayed on its home page gave one political party between 800,000 and 4.6 million more votes  
3 than it gave the other party. In other words, Google’s “Go Vote” prompt was *not* a public service; it  
4 was a *vote manipulation*.”

5 The evidence Dr. Epstein provides is disconcerting, though not surprising.

6 In a leaked video following the election of President Donald Trump in 2016, Google  
7 executives held a staff meeting in which they conveyed significant remorse about the election  
8 results.  
9

10 In the [video](#), Google co-founder Sergey Brin states, “I know this is probably not the most  
11 joyous TGIF (weekly meeting) we have had. Let’s face it, most people here are pretty upset and  
12 pretty sad because of the election.”

13 Brin goes on to say, “Myself, as an immigrant and refugee, I certainly find this election  
14 deeply offensive and I know many of you do too. And I think it’s a very stressful time, and it  
15 conflicts with many of our values.”  
16

17 In the same meeting, Google CFO Ruth Porat broke down in tears recounting Hillary  
18 Clinton’s loss that Tuesday evening. After texting a friend who was at what would have been  
19 Clinton’s election night victory party, Porat said her friend responded, “People are leaving. Staff is  
20 crying. We’re going to lose.” With her voice trembling, Porat says, “Uh... that was first moment I  
21 really *felt* like we were going to lose, and it was this massive kick in the gut that we were going to  
22 lose.”  
23

24 Numerous other examples of liberal bias among Google’s top executive team was  
25 demonstrated in the video, and what’s remarkable is that there is not a single moment of  
26 conservative opinion expressed. The support for Clinton and the sense of dread seemed to be  
27 unanimous.  
28

It couldn’t be clearer that Google is an enormously influential company run by an entirely

1 liberal executive team. And the *Journal*'s excellent investigative work further exposes their  
2 manipulative practices.

3 I think it's past time we consider whether using Google as our primary search engine, which  
4 most Americans do, is wise.

5 Google, Inc., isn't just the world's biggest purveyor of information; it is also the world's  
6 biggest censor.

7 The company maintains at least nine different blacklists that impact our lives, generally  
8 without input or authority from any outside advisory group, industry association or government  
9 agency. Google is not the only company suppressing content on the internet. Reddit has frequently  
10 been [accused](#) of banning postings on specific topics, and a [recent report](#) suggests that Facebook has  
11 been deleting conservative news stories from its newsfeed, a practice that might have a significant  
12 effect on public opinion – even on voting. Google, though, is currently the biggest bully on the  
13 block.  
14

15 When Google's employees or algorithms decide to block our access to information about a  
16 news item, political candidate or business, opinions and votes can shift, reputations can be ruined  
17 and businesses can crash and burn. Because online censorship is entirely unregulated at the  
18 moment, victims have little or no recourse when they have been harmed. Eventually, authorities will  
19 almost certainly have to step in, just as they did when [credit bureaus](#) were regulated in 1970. The  
20 alternative would be to allow a large corporation to wield an especially destructive kind of power  
21 that should be exercised with great restraint and should belong only to the public: the power to  
22 shame or exclude.  
23

24 ***If Google were just another mom-and-pop shop with a sign saying "we reserve the right to  
25 refuse service to anyone," that would be one thing. But as the golden gateway to all knowledge,  
26 Google has rapidly become an essential in people's lives – nearly as essential as air or water. We  
27 don't let public utilities make arbitrary and secretive decisions about denying people services; we  
28***

1 ***shouldn't let Google do so either.***

2 Google venture capitalists and executives are exposed by looking up their names on  
3 [www.pacer.gov](http://www.pacer.gov). They have all been charged with sex trafficking, bribery, money laundering and  
4 revenge programs against their wives and business peers, ie:

11 “Google, and it’s Cartel (Alphabet, Youtube, and hundreds of other shell-company facades) are a  
12 criminal organization engaged in felony-class crimes. Google’s bosses bribe politicians, regulators  
13 and law enforcement officials to hold off prosecution. At Google: Kent Walker, Andy Rubin, Larry  
14 Page, Eric Schmidt, Sergy Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are  
15 so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to  
16 comprehend how they can get any legitimate work done...”

17 “Between all of the sex cult activity; hookers; rent boys; political bribes to Pelosi, Harris,  
18 Newson, and Feinstein; DDoS attacks they run; CIA and NSA stealth deals; privacy harvesting;  
19 Scientology-like employee indoctrination; cheap Asian labor; covert Axiom scams and other illicit  
20 things they get up to; one just has to wonder. Some of the largest political bribes in American or  
21 European history were paid via billions of dollars of pre-IPO cleantech stock, insider trading, real  
22 estate, Google search engine rigging and shadow-banning, sex workers, revolving door jobs,  
23 nepotism, state-supported black-listing of competitors and under-the-table cash. Why are these  
24 Silicon Valley Oligarchs and their K-Street law firms and lobbyists immune from the law?...”

25  
26 “U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of  
27 dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants  
28 which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix

1 and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC;  
2 Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets;  
3 Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in  
4 Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who  
5 Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking  
6 Engagements" which are really just pay-offs conduited for donors; Private jet rides and use of  
7 Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake  
8 mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts;  
9 The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts  
10 and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley  
11 corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington &  
12 Burling, etc. to conduit bribes to officials; and other means now documented by us, The FBI, the  
13 FTC, The SEC, The FEC and journalists....”

14 “Google and Youtube are based on technology and business models that Google and  
15 YouTube stole from small inventors who had launched other companies that were up and operating  
16 before YouTube or Google even existed as business operations. Google holds the record for the  
17 largest number of corporate sex scandals, abuses and sex trafficking charges...”

18 “There are only two kinds of people that work at Google: 1.) Cult indoctrinated naive kids  
19 with odd sexual quirks and 2.) divisive managers and executives who seek to exploit those  
20 eco-chambered employees for nefarious political and stock market manipulation purposes under the  
21 Scientology-like guise of "doing good things", when, in fact, they are engaged in horrific crimes  
22 against society. Google has hired almost every technology law firm in order to "conflict them out"  
23 from ever working to sue Google. If Google rapes you, robs your patents or does anything awful,  
24 you won't be able to find a lawyer to help you. Most Google executives in control of Google have  
25 been indoctrinated by family dynasties to believe that any crime is justified by a bigger cause. Most  
26 of those executives are men. The few women in control of departments are figure-heads...”

27 “Google bosses attend the same parties and business meetings in which they collude, co-  
28 lobby, rig markets and make anti-trust violating plans together. Google is a private government

1 with more money and power than most smaller nations. Google has more lobbyists bribing more  
2 politicians than any other company in America...”

3 “Jared Cohen and fashion show-horse Yasmin Green at Google had the job of over-  
4 throwing countries in the Middle East. They openly bragged about it. (  
5 <https://truthstreammedia.com/2013/06/02/googles-regime-change-agent-jared-cohen/> )... People  
6 that work at Google get paid \$260,000.00+ per year to lie, spy, manipulate politics, bribe  
7 politicians and engage in other crimes. For that kind of money, a person will doing ANYTHING and  
8 rationalize it as "part of the higher cause"...”

9 “Google is the largest financier of the Obama political campaign and exceeded FEC  
10 campaign spending limits by tens of billions of dollars. Plaintiffs can prove this in a jury trial, a  
11 Grand Jury hearing and a live Congressional hearing. Google is the largest staffing source of the  
12 Obama Administration. Plaintiffs can prove this in a jury trial, a Grand Jury hearing and a live  
13 Congressional hearing. The largest number of laws and policy decisions, benefiting a single  
14 company and it's investors, went to: Google. Plaintiffs can prove this in a jury trial, a Grand Jury  
15 hearing and a live Congressional hearing...”

16 “Google, and it's investor's are the single largest beneficiary of the Obama Administration.  
17 Plaintiffs can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing...”

18 “The Obama Administration only won the White House because Google and Facebook  
19 engaged in the largest digital media and search engine manipulation in human history. Plaintiffs  
20 can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing...”

21 “Google, and it's investors, during the Obama Administration, had most of their competitors  
22 denied funding, grants, contracts and tax waivers while Google's investors GOT funding. Plaintiffs  
23 can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing and prove  
24 that Google coordinated anti-trust violations with senior Obama Administration White House  
25 staff....”

26 “...Damore reveals that Google operates it's staffing like a Scientology cult. They control  
27 their employees lives, information, transportation, free time, entertainment and social life. A Google  
28 life is a glass-bubble of echo-chamber extremist, hyper-sex-kink, reinforcement...”

21 [Project Veritas](#) ( <https://www.projectveritas.com/> ) has been lifting back the veil covering  
22 big tech companies and their nefarious activities following the 2016 election. They tried to play left-  
23 leaning-but-mostly-fair before the 2016 election, believing in their hearts that Hillary Clinton would  
24 be President without their concerted meddling. That didn't work out for them, so they are trying to  
25 prevent "another Trump situation" in 2020 by unabashedly [purging, silencing, and censoring](#) (  
26 [https://noqreport.com/2019/05/08/purge-censor-silence-tech-giants-go-full-orwell-prepare-2020-  
28 elections/](https://noqreport.com/2019/05/08/purge-censor-silence-tech-giants-go-full-orwell-prepare-2020-<br/>27 elections/) ) on platforms like Facebook, Google, Twitter, Pinterest, Instagram, and YouTube.

(Article by Michio Hasai republished from [NOQReport.com](#))

1 The answers delivered today before Congress in response to questions by [Representative](#)  
2 [Dan Crenshaw](#) weren't the standard denials. They were politically manipulative answers designed  
3 to make it known they're doing what we've said they were doing all along, but they feel justified in  
4 doing it because "hate speech" must be stopped at all costs. Of course, what constitutes hate speech  
5 to the social justice warriors in big tech invariably circles around conservative thought. There is no  
6 form of hate speech short of physical threats that can be attributed to progressives, at least not in the  
7 minds of the people who control big tech. If conservatives are aggressive, they're delivering hate  
8 speech. If progressives are aggressive, they're just being truthful. That's what big tech thinks.

9 This is the worst-case scenario for conservatives. Before, we could call them liars and  
10 cheats. Now, we have to fight them on an ideological level, and while we have the truth on  
11 Plaintiffs side, they have the technology. They have the eyeballs. They control what people see and  
12 don't see. And as such, they can no longer be trusted to deliver anything even remotely close to fair  
13 and balanced. They're unhinged from reality, but instead of coming back to reality once exposed,  
14 they're building a new reality around their ideologies.

15 Russia may arrest Google employees for running Google as a manipulative service  
16 containing hidden political insertions affecting the human subconscious

- 17 • Russian government will now arrest those who try to 'control minds' via mass web  
18 manipulation
- 19 • Google was created to push liberal leftist political messages on the subconscious
- 20 • **Research exposes Google as insidious mind-control political shill**
- 21 • No matter your political persuasion, it is unfair and manipulative for Google to  
22 control minds ANY political purposes

23 By [Sophie Tanno For Mailonline](#)

24 A Russian journalist has been accused of 'controlling minds' and 'affecting the human  
25 subconscious' after referencing George Orwell's 1984 in an article.

26 Mikhail Romanov, a reporter for the Yakutsk Vecherniy weekly, was writing a story on the  
27 alleged torture of an academic.

28 *Police in [Russia's](#) republic of Sakha charged Romanov after they suspected him of trying to*

1 tap into the readers' sub-consciousness, Russian newspaper [Kommersant](#) reported.

2  
3 Mikhail Romanov, a reporter for the Yakutsk Vecherniy weekly, was writing a story on the  
4 alleged torture of an academic (stock)

5 A Russian journalist has been accused of 'controlling minds' and 'affecting the human  
6 subconscious' after referencing George Orwell's 1984 (pictured) in an article

7 Romanov's editor told the publication: 'This is a story about how anyone can be squashed by  
8 the government machine.

9 'It's also about how Big Brother is watching, reading all comments on online forums.'

10 This is understood to be the first time a journalist will be tried under Russia's new legislation  
11 punishing those who are perceived to have published information 'containing hidden insertions  
12 affecting the human subconscious. '

15 [\*11 Shocking Messages Hidden In Your Childhood Cartoons\*](#)

16 [https://www.therichest.com/ePlaintiff\\_42ensive-lifestyle/entertainment/11-shocking-](https://www.therichest.com/ePlaintiff_42ensive-lifestyle/entertainment/11-shocking-messages-hidden-in-your-childhood-cartoons/)  
17 [messages-hidden-in-your-childhood-cartoons/](https://www.therichest.com/ePlaintiff_42ensive-lifestyle/entertainment/11-shocking-messages-hidden-in-your-childhood-cartoons/)

18 11 Shocking **Messages** Hidden In Your Childhood Cartoons. The creative animators and  
19 screenwriters often insert **subliminal messages** into their work, and the examples can sometimes be  
20 more than unusual. Sexism, **political messages**, conspiracy theories and hidden inappropriate jokes  
21 are found in numerous cartoons that we all grew up with.

22 [\*What Are Subliminal Messages And Do They Work?\*](#)

23 <https://allthatsinteresting.com/what-are-subliminal-messages>

24 **Subliminal messages**, on the other hand, are likewise real and similar to supraliminal  
25 **messages** except that the signal or stimulus is below Plaintiffs threshold of conscious awareness. In  
26 other words, you cannot consciously perceive a **subliminal message**, even if you search for it.

27 **Google likely ‘thoroughly infiltrated’ by Chinese govt., expert warns**

28 [\(LifeSiteNews\)](#) – Tech billionaire Peter Thiel recently called on the federal government to

1 investigate Google for potential infiltration by the Chinese government, and now security experts  
2 are saying his concerns are well-founded.

3 *Thiel, one of President Donald Trump’s most high-profile [gay supporters](#) and an [avowed](#)  
4 [critic](#) of Silicon Valley, made the remarks at last weekend’s National Conservatism Conference,  
5 [Axios reports](#). He called on the FBI and CIA to ask Google, “how many foreign intelligence  
6 agencies have infiltrated your Manhattan Project for AI”; “does Google’s senior management  
7 consider itself to have been thoroughly infiltrated by Chinese intelligence”; and whether this  
8 alleged infiltration is why the company works with China’s military but not America’s.*

9 “I’m not sure quite how to put this, I would like them to be asked [these questions] in a not  
10 excessively gentle manner,” Thiel added.

11 Alex Stamos, a researcher with the Stanford Internet Observatory and [former chief security](#)  
12 [officer at Facebook](#), ( <https://www.nytimes.com/2018/03/19/technology/facebook-alex-stamos.html>  
13 ) said Tuesday it was “completely reasonable” to assume that both the Chinese and Russian  
14 governments have, in some form or another, already infiltrated not only Google but every top tech  
15 company:

16 Note that “subverted” is very different than planting professional spies in “The Americans”  
17 style. Each of the big companies employs thousands of employees with family members under the  
18 control of these countries, and a gov request might be simple and seem borderline reasonable.

19 Stamos predicted that the “next couple of years” would see the revelation of a “major  
20 combined HUMINT/InfoSec [human intelligence/information security] attack against a major tech  
21 company.”

22 He’s not the only one who advises that Thiel’s warnings be taken seriously. Richard Clarke,  
23 a former counterterrorism and cybersecurity advisor to both Democrat and Republican presidents,  
24 [told CNBC](#) ( [https://www.cnbc.com/2019/07/17/ex-white-house-advisor-richard-clarke-thiel-right-](https://www.cnbc.com/2019/07/17/ex-white-house-advisor-richard-clarke-thiel-right-on-google-and-china.html)  
25 [on-google-and-china.html](#) ) there was cause for concern.

26 “Here’s what I think is true: Google refused to work for the Pentagon on artificial  
27 intelligence,” Clarke said. “If you turn around and you work on artificial intelligence in China, and  
28 you don’t really know what they’re going to do with that, I think there’s an issue.”

1 The internet giant has denied working with the Chinese military, but opened an artificial  
2 intelligence center in Shanghai in 2017 despite the Communist regime’s strict speech and internet  
3 controls. On Tuesday, Google executive Karan Bhatia [testified](#) (  
4 [https://www.technologyreview.com/f/613975/google-has-terminated-dragonfly-project-to-build-a-  
5 search-engine-for-china/](https://www.technologyreview.com/f/613975/google-has-terminated-dragonfly-project-to-build-a-search-engine-for-china/) ) to the Senate Judiciary Committee that the company has terminated a  
6 [controversial](#) ( [https://www.lifesitenews.com/news/google-researcher-resigns-in-protest-of-  
7 companys-plan-to-aid-censorship](https://www.lifesitenews.com/news/google-researcher-resigns-in-protest-of-companys-plan-to-aid-censorship) ) censored search engine it had been working on for China.

8 Clarke added that there was no meaningful distinction between Google working with  
9 Chinese companies and the Chinese government, given the level of state control in the country.

10 The specter of foreign influence on the tech industry further intensifies its ongoing  
11 controversies regarding [political bias and censorship](#) ( [https://www.lifesitenews.com/news/google-  
12 denies-blacklisting-under-oath-despite-leaked-docs-showing-otherwise](https://www.lifesitenews.com/news/google-denies-blacklisting-under-oath-despite-leaked-docs-showing-otherwise) ) and [violations of user  
13 privacy](#) ( [https://www.lifesitenews.com/news/facebooks-5-billion-fine-for-privacy-scandals-too-  
14 low-democrats-complain](https://www.lifesitenews.com/news/facebooks-5-billion-fine-for-privacy-scandals-too-low-democrats-complain) ) . Responding to Thiel’s original comments, President Trump [said](#)  
15 ( <https://twitter.com/realDonaldTrump/status/1151095675213553664> ) that his administration will  
16 “take a look” at the matter.

17 [\[-\] gazillions](#)

18 “Google being biased is glaringly obvious even to a retard. Google forcing their employees  
19 to support them politically is a human rights violation. The old railroad barons a hundred years ago  
20 were bad people, but no where near as abusive as google is to the employees. The old railroad  
21 tycoons had their supporters too who thought strikers and protesters against their tyranny were  
22 awful people. Silicon Valley just indoctrinated their followers and employees by brainwashing them  
23 first like any cult does. "Do no evil" was always a smarmy block of shit in pixels, no different than  
24 the purple dinosaur singing "I love you, you love me". The purple dinosaur never loved you one  
25 little bit. It was a lie, and parents had no business being such gullible suckers and allowing their  
26 children to be lied to by an actor in a fuzzy suit...”

- 27 • <https://voat.co/v/news/3348671/19866570>

28 [\[-\] geraldo-0](#)

1 forcing their employees to support them politically is a human rights violation.

2 > *Civil and political rights are a class of rights that **protect individuals' freedom** from*  
3 *infringement by governments, social organizations, and private individuals. They ensure one's*  
4 ***entitlement to participate in the civil and political** life of the society and state **without***  
5 ***discrimination or repression.***

6 *From the first time they censored, shadow-banned people who opposed their way of viewing*  
7 *world, far-left, SJW, leftards has put cornerstone to **civil rights movement 2.0**, including people*  
8 *who are at the rock bottom and uppermost stairs of oppression. Clearly, this is infringement of rights*  
9 *by gov and private entities, which has been ignored from by the time it was apparent that such*  
10 *violation is well spread and not a unique case.*

11 *Those at silicon valley had no idea that their attempt to have conservative and alike voice*  
12 *removed/deplatformed is **someway resemble how "white" and "colored" segregation works**;*  
13 *which is no brainer considering that they did not pay any attention to "obscure" details and only*  
14 *remember famous persons who was oppressed at that time.*

15 *So, don't spout only " Hate speech is Freee speech". Tell them that when some peers mock*  
16 *center-right personalities by reenacting what happened prior to Civil Rights Act of 1968,throwing*  
17 *liquids to nigger who ignored the sign, isn't a good joke since **political affiliation is covered in***

24 *having cognitive dissonance episode explaining why adding another class would hurt other classes*  
25 *that already existed in last statue”*

26 *In creating Google, Larry Page, Eric Schmidt, Sergy Brin and Rajeev Motwani worked out a*  
27 *way for get government cash to fund a political manipulation company which only manipulated*  
28 *politics that put profits in the pockets of Larry Page, Eric Schmidt, Sergy Brin and Rajeev Motwani.*

1 The founders knew they could spy on every voter and control those voters without their  
2 knowledge. In an epic web security study, it was revealed that Google ePlaintiff 42loited the  
3 following:

4 “...You probably can't imagine the [second-by-second dangers](#) and harms that Google’s  
5 empire uses modern electronics, like your phone and tablet, are causing to your life, your income,  
6 your privacy, your beliefs, your human rights, your bank account records, your political data,  
7 your job, your brand name, your medical data, your dating life, your reputation and other [crucial](#)  
8 [parts of your life](#).

9 Any use of a dating site, Google or Facebook product, social media site, movie site, or  
10 anything that you log in to, puts you at substantial risk. Remember: "[if it has a plug, it has a bug](#)".  
11 Every electronic device can be easily made to spy on you in ways you cannot possibly imagine.

12 **The Take-Aways:**

- 13 - Stalkers can find you by zooming in on your pupil reflection images in your online photos ( <https://www.kurzweilai.net/reflected-hidden-faces-in-photographs-revealed-in-pupil> )
- 14
- 15 - If you send email overseas or make phone calls overseas all of your communications, and those  
16 with anybody else, are NSA monitored ( <https://www.privacytools.io/> )
- 17 - Bad guys take a single online photo of you and put it in software that instantly builds a dossier on  
18 you by finding where every other photo of you is that has ever been posted online ( [https://www.aclu.org/blog/privacy-technology/surveillance-technologies/apples-use-face-](https://www.aclu.org/blog/privacy-technology/surveillance-technologies/apples-use-face-recognition-new-iphone)  
19 [recognition-new-iphone](#) )
- 20
- 21 - Face-tracking software for stalking you on Match.com and OK Cupid is more effective than even  
22 FBI software for hunting bank robbers ( [https://www.cnet.com/news/clearview-app-lets-strangers-](https://www.cnet.com/news/clearview-app-lets-strangers-find-your-name-info-with-snap-of-a-photo-report-says/)  
23 [find-your-name-info-with-snap-of-a-photo-report-says/](#) )
- 24 - Any glass, metal or ceramic object near you can be reflecting your voice or image to digital beam  
25 scanners that can relay your voice or image anywhere in the world
- 26 - All your data from any hotel you stay at will eventually be hacked and leaked ( [Info of 10](#)  
27 [MILLION MGM guests including Justin Bieber and TWITTER CEO leaked online!](#) )
- 28 - Your voting data will be used to spy on you and harm you ( [Every voter in Israel just had their data](#)

1 [leaked in 'grave' security breach... \)](#)

2 - Lip-reading software can determine what you are saying from over a mile away (

3 [https://www.telegraph.co.uk/news/2020/01/20/russian-police-use-spy-camera-film-opposition-](https://www.telegraph.co.uk/news/2020/01/20/russian-police-use-spy-camera-film-opposition-activist-bedroom/)  
4 [activist-bedroom/ \)](#)

5 - Every Apple iPhone and other smart-phone has over 1000 ways to bug you, listen to you, track  
6 you and record your daily activities even when you think you have turned off the device. Never  
7 leave your battery in your phone. ( [LEAKED DOCS: Secretive Market For Your Web History...](#) )  
8 ( [Every Search. Every Click. On Every Site...](#) )

9 - Elon Musk's SpaceX StarLink satellites are spy satellites that send your data to Google and other  
10 tech companies ( [https://www.chieftain.com/news/20200118/first-drones-now-unexplained-lights-](https://www.chieftain.com/news/20200118/first-drones-now-unexplained-lights-reported-in-horsetooth)  
11 [reported-in-horsetooth \)](#)

12 - Google and Facebook have all of your medical records and they are part of a political operation ( [https://www.wsj.com/articles/hospitals-give-tech-giants-access-to-detailed-medical-records-](https://www.wsj.com/articles/hospitals-give-tech-giants-access-to-detailed-medical-records-11579516200)  
13 [11579516200 \)](#)

14 - Every dating site, comments section and social media site sends your private data, covertly, to  
15 government, political campaigns and corporate analysis groups and can also be hacked by anyone.

16 - Any hacker can hack ANY network with even a single Intel, Cisco, Juniper Networks or AMD  
17 motherboard on it and nobody can stop them unless they destroy the motherboard because the  
18 back-doors are built into the hardware. Many of the companies you think are providing security are  
19 secretly owned by the Chinese government spy agencies or the CIA ( <https://boingboing.net/2020/02/11/cia-secretly-owned-worlds-to.html> )  
20

21 - Warehouses in Nigeria, Russia, Ukraine, Sao Paolo, China and hundreds of other regions, house  
22 tens of thousands of hackers who work around the clock to try to hack you and manipulate your  
23 data.  
24

25 - Every red light camera, Walmart/Target/Big Box camera and every restaurant camera goes off to  
26 networks that send your activities to credit companies, collection companies, political parties and  
27 government agencies ( ['Homeland Security' using location data from apps to track millions of people...](#)

28 - Match.com, OKCupid and Plenty of Fish are also DNC voter analysis services that read your texts

1 and keep your profiles forever

2 - If you don't put fake ages, addresses, phone numbers and disposable email addresses on ANY form  
3 you fill out electronically, it will haunt you forever (

4 <https://www.the-sun.com/news/284784/pornstar-data-breach-massive-leak-bank-details/> )

5 - Every train, plane and cruise line records you constantly and checks the covert pictures they take  
6 of you against global databases. Corporations grab your collateral private data that those Princess  
7 Cruises and United Airlines companies take and use them to build files on you (

8 <https://www.silive.com/news/2020/01/report-new-app-can-id-strangers-with-a-single-photo.html> )

9 - The people who say "nobody would be interested in me" are the most at risk because their naiveté  
10 puts them at the top-of-the-list for targeting and harvesting ( [https://www.cnet.com/news/clearview-](https://www.cnet.com/news/clearview-app-lets-strangers-find-your-name-info-with-snap-of-a-photo-report-says/)

11 [app-lets-strangers-find-your-name-info-with-snap-of-a-photo-report-says/](https://www.cnet.com/news/clearview-app-lets-strangers-find-your-name-info-with-snap-of-a-photo-report-says/) )

12 - Silicon Valley tech companies don't care about your rights, they care about enough cash for their  
13 executives to buy hookers and private islands with. Your worst enemy is the social media CEO.  
14 They have a hundred thousand programmers trying to figure out more and more extreme ways to  
15 use your data every day and nobody to stop them

16 - The government can see everyplace you went to in the last year (

17 <https://www.protocol.com/government-buying-location-data> )

18 There have been over 15,000 different types of hacks used against over 3 billion "average"  
19 consumers. EVERY one of them thought they were safes and that nobody would hack them because  
20 "nobody cared about them". History has proven every single one of them to have been totally  
21 wrong!

22 If you are smart, and you read the news, you will know that you should ditch all of your  
23 electronic devices and "data-poison" any information about you that touches a network by only  
24 putting fake info in all conceivable forms and entries on the internet. You, though, may be smart but  
25 lazy, like many, and not willing to step outside of the bubble of complacency that corporate  
26 advertising has surrounded you with.

27 Did you know that almost every dating and erotic site sends your most private life  
28 experiences and chat messages to Google's and Facebook's investors?

1 <https://www.businessinsider.com/facebook-google-quietly-tracking-porn-you-watch-2019-7>

2 Do you really want all of those Silicon Valley oligarchs that have been charged with sexual  
3 abuse and sex trafficking to know that much about you?

4 Never, Ever, put your real information on Youtube, Netflix, LinkedIn, Google, Twitter,  
5 Comcast, Amazon and any similar online service because it absolutely, positively will come back  
6 and harm you!

7 Always remember: Anybody that does not like you can open, read and take any photo, data,  
8 email or text on EVERY phone, computer, network or electronic device you have ever used no  
9 matter how "safe" you think your personal or work system is! They can do this in less than a minute.  
10 Also: Hundreds of thousands of hackers scan every device, around the clock, even if they never  
11 heard of you, and will like your stuff just for the fun of causing trouble. Never use an electronic  
12 device unless you encrypt, hide and code your material! One of the most important safety measures  
13 you can take is to review the security info at: <https://www.privacytools.io/>

14  
15 Those people who think: "I have nothing to worry about..I am not important" ARE the people who  
16 get hacked the most. Don't let naivete be your downfall. (

17 [https://www.eff.org/deeplinks/2019/07/when-will-we-get-full-truth-about-how-and-why-](https://www.eff.org/deeplinks/2019/07/when-will-we-get-full-truth-about-how-and-why-government-using-facial-recognition)  
18 [government-using-facial-recognition](https://www.eff.org/deeplinks/2019/07/when-will-we-get-full-truth-about-how-and-why-government-using-facial-recognition) )

19 All of your info on Target, Safeway, Walgreens has been hacked and read by many  
20 outsiders. NASA, The CIA, The NSA, The White House and all of the federal background check files  
21 have been hacked. The U.S. Government has been hacked hundreds of times. All of the dating sites  
22 have been hacked and their staff read all of your messages. Quest labs blood test data and sexual  
23 information reports have been hacked and published to the world. There is no database that can't  
24 be easily hacked. Every computer system with Intel, AMD, Juniper Networks, Cisco and other  
25 hardware in it can be hacked in seconds with the hardware back-doors soldered onto their  
26 electronic boards. All of the credit reporting bureaus have been hacked. Wells Fargo bank is  
27 constantly hacked. YOU ARE NOT SAFE if you put information on a network. NO NETWORK is  
28 safe! No Silicon Valley company can, or will, protect your data; mostly because they make money

1 FROM your data!

2  
3 Every single modern cell phone and digital device can be EASILY taken over by any hacker and  
4 made to spy on you, your family, your business and your friends in thousands of different ways.  
5 Taking over the microphone is only a small part of the ways a phone can be made to spy on you.  
6 Your phone can record your location, you voice vibrations, your mood, your thoughts, your sexual  
7 activity, your finances, your photos, your contacts (who it then goes off and infects) and a huge  
8 number of other things that you don't want recorded.

9 [Privacy watchdog under pressure to recommend facial recognition ban...](#)

10  
11 [Alarming Rise of Smart Camera Networks...](#)

12  
13 [AMAZON's Ring Doorbell Secretly Shares Private User Data With FACEBOOK...](#)

14  
15 The worst abusers of your privacy, personal information, politics and psychological information  
16 intentions are: Google, Facebook, Linkedin, Amazon, Netflix, Comcast, AT&T, Xfinity, Match.com  
17 & the other IAC dating sites, Instagram, Uber, Wells Fargo, Twitter, Paypal, Hulu, Walmart,  
18 Target, YouTube, PG&E, The DNC, Media Matters, Axiom, and their subsidiaries. Never, ever,  
19 put accurate information about yourself on their online form. Never, ever, sign in to their sites using  
20 your real name, phone, address or anything that could be tracked back to you.

21 If you don't believe that every government hacks citizens in order to destroy the reputation  
22 of anyone who makes a public statement against the current party in power then read the public  
23 document at: [https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-](https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf)  
24 [4.pdf](#)

25 That document shows you, according to the U.S. Congress, how far things can go.

26 A program called ACXIX hunts down all of your records from your corner pharmacy, your  
27 taxi rides, your concert tickets, your grocery purchases, what time you use energy at your home,  
28 your doctor records...and all kinds of little bits of info about you and puts that a file about you. That

1 file about you keeps growing for the rest of your life. That file sucks in other files from other data  
2 harvesting sites like Facebook and Google: FOREVER. The information in that file is used to try to  
3 control your politics and ideology.

4 In recent science studies cell phones were proven to exceed radiation safety limits by as high  
5 as 11 times the 2-decade old allowable U.S. radiation limits when phones touch the body. This is  
6 one of thousands of great reasons to always remove the battery from your cell phone when you are  
7 not talking on it. A phone without a battery in it can't spy on you and send your data to your  
8 enemies.

9  
10 **If you are reading this notice, the following risks apply to you, Thanks to the Silicon Valley**  
11 **oligarchs:**

12  
13 1. EVERY network is known to contain Intel, Cisco, Juniper Networks, AMD, QualComm and other  
14 hardware which has been proven to contain back-door hard-coded access to outside parties. This is  
15 a proven, inarguable fact based on court records, FISA data, IT evidence, national news  
16 broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security,  
17 FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

18  
19 2. Chinese, Russian FSB, Iranian and other state-sponsored hacking services as well as 14 year old  
20 domestic boys are able to easily enter your networks, emails and digital files because of this. They  
21 can enter your network at any time, with less than 4 mouse clicks, using software available to  
22 anyone. This is a proven, inarguable fact based on court records, FISA data, IT evidence and  
23 inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services,  
24 FBI.

25  
26 3. Your financial office is aware of these facts and has chosen not to replace all of the at-risk  
27 equipment, nor sue the manufacturers who sold your organization this at risk equipment. They  
28 believe that the hassle and cost of replacement and litigation is more effort than the finance

1 department is willing to undertake. This is a proven, inarguable fact based on court records, FISA  
2 data, IT evidence, national news broadcasts, Congressional presented evidence and inventory  
3 records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

4  
5 4. In addition to the existing tools that were on the internet, in recent years, foreign hackers have  
6 released all of the key hacking software that the CIA, DIA and NSA built to hack into any device.  
7 These software tools have already been used hundreds of times. Now the entire world has access to  
8 these tools which are freely and openly posted across the web. This is a proven, inarguable fact  
9 based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented  
10 evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU,  
11 Global IT services, FBI.

12  
13 5. The computers, servers, routers, cell phones, IP cameras, IP microphones, Smart Meters,  
14 Tesla's, "Smart Devices:", etc. and other devices openly broadcast their IP data and availability on  
15 the internet. In other words, many of your device broadcast a "HERE I AM" signal that can be  
16 pinged, scanned, spidered, swept or, otherwise, seen, like a signal-in-the-dark from anywhere on  
17 Earth and from satellites overhead. Your devices announce that they are available to be hacked, to  
18 hackers. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national  
19 news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security,  
20 FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

21  
22 6. It is bad policy for your organization, or any organization, to think they are immune or have IT  
23 departments that can stop these hacks. NASA, The CIA, The White House, EQUIFAX, The  
24 Department of Energy, Target, Walmart, American ePlaintiff 42ress, etc. have been hacked  
25 hundreds of times. This is a proven, inarguable fact based on court records, FISA data, IT evidence,  
26 national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On  
27 Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

1 7. *The thinking: “Well, nobody would want to hack us”, or “We are not important enough to get*  
2 *hacked” is the most erroneous and negligent thinking one could have in the world today. Chinese,*  
3 *Russian and Iranian spy agencies have a global “Facebook for blackmail” and have been sucking*  
4 *up the data of every entity on Earth for over a decade. If the network was open, they have the data*  
5 *and are always looking for more. The same applies to Google and Facebook who have based their*  
6 *entire business around domestic spying and data re-sale. This is a proven, inarguable fact based on*  
7 *court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence*  
8 *and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT*  
9 *services, FBI.*

10  
11 8. *You are a “Stepping Stone” doorway to other networks and data for targeted individuals and*  
12 *other entities. Your networks provide routes into other people’s networks. The largest political*  
13 *industry today is called “Doxing” and “Character Assassination”. Billions of dollars are ePlaintiff*  
14 *42ended by companies such as IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC);*  
15 *Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC);*  
16 *Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook -*  
17 *(DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC);*  
18 *Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater -*  
19 *(DNC/GOP); Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge*  
20 *Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs*  
21 *(DNC); Covington and Burling - (DNC), BuzzFeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini -*  
22 *(DNC) and hundreds of others to harm others that they perceive as political, personal or*  
23 *competitive threats. Do not under-estimate your unintended role in helping to harm others. This is a*  
24 *proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts,*  
25 *Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ,*  
26 *Wikileaks Vault 9, EU, Global IT services, FBI.*

27  
28 9. *NEVER believe that you are too small to be noticed by hackers. Parties who believe that are the*

1 *hackers favorite targets. This is a proven, inarguable fact based on court records, FISA data, IT*  
2 *evidence, national news broadcasts, Congressional presented evidence and inventory records, ie:*  
3 *Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.*

4

7 ***use very little information to obtain quick access to anyone’s personal minutiae....”***

8  
9 **Google is a criminally corrupt organization:**

10 From INSIDE Google, Plaintiffs team saw Google manipulate the entire internet to hype up  
11 Larry Page's "boyfriend": Elon Musk and Tesla, which Google execs owned a portion of, while  
12 sabotaging Tesla's competitors. Google illicitly and illegally timed these manipulations with stock  
13 market pump-and-dump efforts to ePlaintiff 42loit insider trading. That is a felony violation of  
14 RICO, Antitrust and other laws. Every single thing that Google does is contrived to harm a  
15 competitor, a politician, an employee whistle-blower or some other business adversary. There are  
16 no "bugs", "operator errors", "server anomalies" or other media "accidents" at Google. Everything  
17 Google does is contrived, at a psychological warfare kind of level, to change a social perception.

18 Google must show its software to FBI, SEC, FTC and Plaintiffs search engine optimization  
19 experts to prove that they did not engage in these crimes. The fact is: Plaintiffs can prove they did  
20 the crimes and FBI experts can help us prove it!

21 In a similar case unfolding in Britain over whether Google wrongly demoted price  
22 comparison rival Foundem from its search results in favour of paid-for adverts, Google must now  
23 decide which it values more: the algorithms that rank its search results, or its stance that manually  
24 fiddling with those results to promote its own paid-for products over rivals' sites doesn't break  
25 competition laws.

26 High Court judge Mr Justice Roth [posed the stark question](https://www.bailii.org/ew/cases/EWHC/Ch/2020/657.html) (  
27 <https://www.bailii.org/ew/cases/EWHC/Ch/2020/657.html> ) to Google's lawyers in mid-March, just  
28 as the global coronavirus situation began triggering governmental responses in the West.

1 Foundem had asked for legal permission to bring in independent expert Philipp Klöckner to  
2 read confidential documents disclosed by Google in court.

3 Those documents were court exhibits filed by Google engineers Cody Kwok and Michael  
4 Pohl. They sought, as the judge put it, "to explain the operation and aims of Google's ranking  
5 algorithms, and how they have been applied to shopping comparison sites generally and Foundem  
6 in particular".

7 Foundem has been pursuing Google since 2006, when [a flip of the switch at Mountain View](https://www.theregister.co.uk/2009/11/19/google_hand_of_god/)  
8 ( [https://www.theregister.co.uk/2009/11/19/google\\_hand\\_of\\_god/](https://www.theregister.co.uk/2009/11/19/google_hand_of_god/) ) caused the price-comparison  
9 site to vanish down Google's search rankings. Foundem argues that Google's demotion of it was a  
10 deliberate act to penalise a commercial rival and an abuse of Google's dominant market position.

11 Google denies this and is defending a High Court claim from Foundem as well as an EU  
12 competition investigation triggered by the website. The High Court case is stuck at a very early  
13 stage, despite having been filed in 2012, [thanks to the EU investigation](https://www.theregister.co.uk/2015/04/02/lawsuit_against_google_delayed_by_eu_commish/). (

14 [https://www.theregister.co.uk/2015/04/02/lawsuit\\_against\\_google\\_delayed\\_by\\_eu\\_commish/](https://www.theregister.co.uk/2015/04/02/lawsuit_against_google_delayed_by_eu_commish/) )

15 Foundem's lawyers, the company argued in the High Court, wouldn't be able to understand  
16 the technical algorithm evidence without having an SEO expert on hand. While not disputing this,  
17 Google strongly objected to Klöckner because he is a working SEO consultant: the Chocolate  
18 Factory is terrified of the SEO industry getting a proper glimpse under the bonnet and seeing how  
19 the search engine really operates. It told Mr Justice Roth:

20 The integrity of Google's ranking processes relies upon all webmasters or website owners  
21 having the same degree of access to information about Google's ranking... This will no longer be the  
22 case if information of this kind is made available to some individuals offering commercial services  
23 to assist companies to improve their Search ranking.

24 It also claimed Klöckner was potentially biased against it because he had done work for  
25 Trivago and Visual Meta, two firms that previously complained to the EU Commission about  
26 Google's anti-competitive practices.

27 Foundem suggested Google could simply withdraw the evidence so nobody would need to  
28 read it, while Google dug in and insisted the evidence was vital to help prove its case that nothing

1 bad was done here. Thus Mr Justice Roth gave the adtech monolith a choice. Either it could  
2 withdraw the evidence as Foundem suggested, or it could agree to let Klöckner read the algorithm  
3 papers. The SEO expert would be given legal permission to enter two so-called confidentiality rings  
4 where he could read unredacted copies of the documents and talk to lawyers about them.

5 "If Google maintains its present course, then for the reasons I have explained I will grant the  
6 application that Mr Klöckner be admitted to those two rings until further order," said the judge!  
7 Plaintiffs are strongly advocating for full Court review of Google's manipulations in every possible  
8 Court.

9 Google is a criminal operation. It's executives have been publicly exposed as participants in  
10 horrific sex scandals, money laundering, political bribery and racism. It is time for the bought and  
11 paid shill politicians to stop protecting them!

12 One of the "Godfather's" of the Silicon Valley Cartel is Eric Schmidt. He is typical of the  
13 Cartel bosses that know each other, date each other, party together, use the same lawyers, get  
14 involved in the same sex scandals and lawsuits and pay stock bribes to the same politicians.

15  
16 Subject: More DWS Call Sheets  
17 To: Frank, Carla <FrankC@dnc.org> ☆  
18 RoseAnn Rotando- she is interested in attending the Roundtable and wants to know where the funds will be used.  
19 Eric Schmidt- we want to add a few lines to his call sheet. He already maxed to the NRSC and the DSCC but he hasn't given to us yet this year. He should max to us because he is on the DNC task  
20 force team.

DEMOCRATS  
<https://mydemocrats.org/NorCal2013>

1  
2  
3 In July 2016, Raymond Thomas, a four-star general and head of the U.S. Special Operations  
4 Command, hosted a guest: Eric Schmidt, the chairman of Google.

5 General Thomas, who served within the 1991 gulf war and deployed many times to  
6 Afghanistan, spent the higher half of a day showing Mr. Schmidt around Special Operations  
7 Command’s headquarters in Tampa, Fla. They scrutinized prototypes for a robotic exoskeleton suit  
8 and joined operational briefings, which Mr. Schmidt needed to study extra about as a result of he  
9 had recently begun advising the military on technology.

10 After the go-to, as they rode in a Chevy Suburban towards an airport, the conversation  
11 turned to a form of artificial intelligence.

12 “You absolutely suck at machine learning,” Mr. Schmidt informed General Thomas, the  
13 officer recalled. “If I got under your tent for a day, I could solve most of your problems.” General  
14 Thomas said he was so offended that he needed to throw Mr. Schmidt out of the car, however  
15 refrained.

16 Four years later, Mr. Schmidt, 65, has channeled his blunt assessment of the military’s tech  
17 failings into a private campaign to revamp America’s defense forces with extra engineers, extra  
18 software program and extra A.I. In the method, the tech billionaire, who [left Google last year,](https://www.nytimes.com/2019/04/30/business/alphabet-board-eric-schmidt-diane-greene.html)  
19 ( <https://www.nytimes.com/2019/04/30/business/alphabet-board-eric-schmidt-diane-greene.html> )  
20 has reinvented himself because of the prime liaison between Silicon Valley and the national security  
21 community.

22 Mr. Schmidt now sits on two government advisory boards aimed toward bounce beginning  
23 technological innovation in the Defense Department. His confidants embrace former Secretary of  
24 State Henry Kissinger and ex-Deputy Defense Secretary Robert Work. And by means of his  
25 personal enterprise capital agency and a \$13 billion fortune, Mr. Schmidt has invested millions of  
26 {dollars} into more than half a dozen defense start-ups.

27 In an interview, Mr. Schmidt — by turns thoughtful, pedagogical and hubristic — stated he  
28 had embarked on an effort to modernize the U.S. military because it was “stuck in software in the

1 1980s.”

2 He portrayed himself as a successful technologist who didn’t consider in retirement and [who](#)  
3 [owed a debt to the country](#) ( [https://www.nytimes.com/2020/02/27/opinion/eric-schmidt-ai-](https://www.nytimes.com/2020/02/27/opinion/eric-schmidt-ai-china.html)  
4 [china.html](#) ) for his wealth — and who now had time and perception to resolve one of America’s  
5 hardest issues. The purpose, he stated, “should be to have as many software companies to supply  
6 software of many, many different kinds: military, H.R. systems, email systems, things which  
7 involve military intelligence, weapons systems and what have you.”

8 Mr. Schmidt is urgent ahead with a Silicon Valley worldview the place advances in software  
9 program and A.I. are the keys to determining nearly any situation. While that philosophy has led to  
10 [social networks that spread disinformation](#) (  
11 <https://www.nytimes.com/2018/11/14/technology/facebook-data-russia-election-racism.html> ) and  
12 different unintended penalties, Mr. Schmidt stated he was convinced that making use of new and  
13 comparatively untested technology to complex conditions — together with lethal ones — would  
14 make service members extra environment friendly and bolster the United States in its competition  
15 with China.

16 His techno-solutionism is difficult by his ties to Google. Though Mr. Schmidt left the  
17 corporate’s board final June and has no official working function, he holds \$5.Three billion in  
18 shares of Google’s parent, Alphabet. He also stays on the payroll as an adviser, incomes a \$1 annual  
19 wage, with two assistants stationed at Google’s Silicon Valley headquarters.

20 That has led to allegations that Mr. Schmidt is placing Google’s financial pursuits forward  
21 of different concerns in his protection work. Late final yr, a federal court ordered a congressional  
22 advisory committee he leads to flip over data that would make clear whether or not Mr. Schmidt  
23 had advocated his business interests whereas heading the group.

24 Mr. Schmidt stated he had adopted guidelines to keep away from conflicts. “Everybody is  
25 rule-bound at the Pentagon, and we are too,” he stated.

26 Google and the Defense Department declined to touch upon Mr. Schmidt’s work.

27 Even without these issues, shifting the military’s path isn’t any easy process. While Mr.  
28 Schmidt has helped generate reports and recommendations about know-how for the Pentagon, [few](#)

1 [have been adopted.](https://www.facadatabase.gov/FACA/apex/FACAPublicCommittee?id=a10t0000001gzneAAA) ( [https://www.facadatabase.gov/FACA/apex/FACAPublicCommittee?](https://www.facadatabase.gov/FACA/apex/FACAPublicCommittee?id=a10t0000001gzneAAA)  
2 [id=a10t0000001gzneAAA](https://www.facadatabase.gov/FACA/apex/FACAPublicCommittee?id=a10t0000001gzneAAA) )

3 “I’m sure he’ll be frustrated,” stated Representative Mac Thornberry, a Republican of Texas  
4 who nominated Mr. Schmidt in 2018 to an advisory committee on A.I. “Unlike the private sector,  
5 you can’t just snap your fingers and make it happen.”

6 Mr. Schmidt acknowledged that progress was sluggish. “I am bizarrely told by my military  
7 friends that they have moved incredibly fast, showing you the difference of time frames between the  
8 world I live in and the world they live in,” he stated.

9 But he stated he had little intention of backing down. “The way to understand the military is  
10 that the soldiers spend a great deal of time looking at screens. And human vision is not as good as  
11 computer vision,” he stated. “It’s insane that you have people going to service academies, and we  
12 spend an enormous amount of training, training these people, and we put them in essentially  
13 monotonous work.”

14 Mr. Schmidt’s first brush with the military got here in 1976, whereas he was in graduate  
15 college on the University of California, Berkeley. There, he centered on research on distributed  
16 computing, funded by cash from Darpa, an analysis arm of the Defense Department.

17 The work catapulted Mr. Schmidt into his technology profession. After finishing his  
18 graduate studies in pc science, he labored at various tech firms for more than twenty years, together  
19 with the networking software maker Novell. In 2001, Google appointed him chief govt.

20 The search engine firm was then in its infancy. Its 20-something founders, Larry Page and  
21 Sergey Brin, were contemporary out of a Stanford University doctorate program and had little  
22 business expertise. Mr. Schmidt was hired to assist information them, offering “adult supervision,”  
23 which he did — after which some.

24 Mr. Schmidt [took Google public in 2004](https://www.nytimes.com/2004/04/30/business/the-google-ipo-wall-street-an-egalitarian-auction-bankers-are-not-amused.html) (  
25 [https://www.nytimes.com/2004/04/30/business/the-google-ipo-wall-street-an-egalitarian-auction-](https://www.nytimes.com/2004/04/30/business/the-google-ipo-wall-street-an-egalitarian-auction-bankers-are-not-amused.html)  
26 [bankers-are-not-amused.html](https://www.nytimes.com/2004/04/30/business/the-google-ipo-wall-street-an-egalitarian-auction-bankers-are-not-amused.html) ) and built it right into a behemoth, diversifying into smartphones,  
27 cloud computing and [self-driving cars.](https://www.nytimes.com/2010/10/10/science/10google.html) (  
28 <https://www.nytimes.com/2010/10/10/science/10google.html> ) The success turned him right into

1 an enterprise movie star. In 2009, he served as a tech adviser to the Obama administration.

2 In 2011, with Google price almost \$400 billion, the corporate introduced Mr. Page was able  
3 to resume the C.E.O. reins. Mr. Schmidt turned govt chairman.

4 In that function, Mr. Schmidt took on new tasks, many of which introduced him to  
5 Washington. In 2012, he participated in categorized briefings on cybersecurity with Pentagon  
6 officers as half of the Enduring Security Framework program. In 2015, he attended a seminar on the  
7 banks of the Potomac River, hosted by then-Defense Secretary Ash Carter, on the use of know-how  
8 inside the government.

9 “It was all interesting to me,” Mr. Schmidt stated. “I didn’t really know much about it.”

10 He additionally traveled to North Korea, Afghanistan and Libya whereas writing a guide  
11 about know-how and diplomacy, and dabbled in politics, lending technical assist to Hillary Clinton  
12 within the run-up to her 2016 presidential marketing campaign.

13 His enterprise capital fund, Innovation Endeavors, was lively too. It invested in start-ups like  
14 Planet Labs, which operates satellites and sells the imagery to protection and intelligence  
15 companies, and Team8, a cybersecurity firm based by former Israeli intelligence members.

16 At the 2016 World Economic Forum in Davos, Switzerland, Mr. Carter requested Mr.  
17 Schmidt to fulfill. He had a proposal: Could Mr. Schmidt lead the Defense Innovation Board, a  
18 civilian advisory group tasked with bringing new technology to the Pentagon?

19 “We were in one of these dumpy hotels, and there he is with his small entourage walking in,  
20 and he basically said to me, ‘This is what I want to do. You’d be the perfect person to be  
21 chairman,’” Mr. Schmidt said.

22 Mr. Schmidt said he turned down the function as a result of he was busy and had no military  
23 background. But Mr. Carter argued that Mr. Schmidt’s tech experience was wanted, because the  
24 U.S. military — which had as soon as been a middle of innovation — was falling behind companies  
25 like Google and Facebook in software and A.I.

26 Mr. Schmidt finally agreed. (Mr. Carter didn’t reply to requests for remark.)

27 As head of the Defense Innovation Board, Mr. Schmidt started touring navy bases, plane  
28 carriers and plutonium strongholds. The journeys, which took Mr. Schmidt to about 100 bases in

1 locations like Fayetteville, N.C., and Osan, South Korea, have been a definite break from his well-  
2 heeled life in Silicon Valley.

3 “You want to see these things,” Mr. Schmidt stated. “I received the nuclear missile tour.  
4 Things which are exhausting. I received a tour of [Cheyenne Mountain](https://www.norad.mil/About-NORAD/Cheyenne-Mountain-Air-Force-Station/) (  
5 <https://www.norad.mil/About-NORAD/Cheyenne-Mountain-Air-Force-Station/> ) so I might  
6 perceive what their actuality was.”

7 One of the primary journeys was to Tampa to go to General Thomas, who is named Tony,  
8 the place Mr. Schmidt saw maps and reside video feeds displayed on huge screens. “Eric’s  
9 observation was that a huge part of what the military does is it sits and watches,” stated Josh  
10 Marcuse, the then executive director of the Defense Innovation Board who was on the journey.

11 The visits made tangible what Mr. Carter had told Mr. Schmidt about how the military was  
12 lagging in technology. Mr. Schmidt quickly made ideas to vary that.

13 Some of his concepts have been impractical. Eric Rosenbach, then the chief of workers to  
14 Mr. Carter, recalled Mr. Schmidt as soon as telling him that the Pentagon can be higher off if it  
15 employed nobody however engineers for a year.

16 Others have been helpful. At an Air Force facility in Qatar in 2016, Mr. Schmidt visited  
17 officers who scheduled flight paths for the tankers that refueled planes. They used a white board and  
18 dry-erase markers to set the schedule, taking eight hours to finish the duty.

19 Mr. Schmidt stated he recalled considering, “Really? This is how you run the air war?”  
20 Afterward, he and others on the Defense Department labored with the tech company Pivotal to ship  
21 software to the officers.

22 On one other journey to a navy base in South Korea in 2017, an intelligence analyst  
23 complained to Mr. Schmidt that the software program he used to evaluate surveillance movies from  
24 North Korea was clunky.

25 “Let me guess,” Mr. Schmidt said, according to a Defense Department aide who traveled  
26 with him. “You don’t have the flexibility to change that.”

27 In December 2017, Mr. Schmidt stepped down as Google’s chairman however remained on  
28 the board. He said he was seeking a brand new chapter.

1 “If I stayed as chairman, then next year would have been the same as the previous year, and  
2 I wanted a change of emphasis,” said Mr. Schmidt. “As chairman of Google, what I did is I ran  
3 around and gave speeches, and went to Brussels and all the things that Google still does today. It’s  
4 much better to work on these new things for me.”

5 Google declined to comment on Mr. Schmidt’s departure as chairman.

6 By then, Mr. Schmidt’s ties to Google had induced issues in his protection work. In 2016,  
7 Roma Laster, a Defense Department worker, filed a complaint on the company elevating  
8 considerations about Mr. Schmidt and conflicts of curiosity, Mr. Marcuse stated.

9 In the complaint, [earlier reported by ProPublica](https://www.propublica.org/article/how-amazon-and-silicon-valley-seduced-the-pentagon) ( [https://www.propublica.org/article/how-  
10 amazon-and-silicon-valley-seduced-the-pentagon](https://www.propublica.org/article/how-amazon-and-silicon-valley-seduced-the-pentagon) ) , Ms. Laster, who labored with the Defense  
11 Innovation Board, said Mr. Schmidt had requested a service member what cloud computing  
12 providers their unit used and whether or not they had thought-about options. She stated Mr. Schmidt  
13 confronted a battle of interest as a result of he worked for Google, which additionally gives cloud  
14 services.

15 Mr. Marcuse, who now works at Google, said Mr. Schmidt was “scrupulous and diligent” in  
16 avoiding conflicts. Mr. Schmidt said he adopted the principles forbidding conflicts of interest. Ms.  
17 Laster didn’t reply to requests for remark.

18 Mr. Schmidt quickly received caught up in one other situation between Google and the  
19 military. Google had signed a contract in 2017 to assist the Pentagon to construct methods to  
20 automatically analyze drone footage to identify particular objects like buildings, vehicles, and  
21 people.

22 Mr. Schmidt was a proponent of the hassle, known as Project Maven. He stated he inspired  
23 the Pentagon to pursue it and testified in Congress in regards to the undertaking’s deserves,  
24 however was not concerned within the company’s selection of Google.

25 But the [effort blew up](https://www.nytimes.com/2018/05/30/technology/google-project-maven-pentagon.html) ( [https://www.nytimes.com/2018/05/30/technology/google-project-  
26 maven-pentagon.html](https://www.nytimes.com/2018/05/30/technology/google-project-maven-pentagon.html) ) in 2018 when [Google employees protested](https://www.nytimes.com/2018/04/04/technology/google-letter-ceo-pentagon-project.html) ( <https://www.nytimes.com/2018/04/04/technology/google-letter-ceo-pentagon-project.html> ) and  
27 stated they didn’t need their work to result in deadly strikes. More than 3,000 staff signed a letter to  
28

1 Mr. Pichai, saying the contract would undermine the general public’s belief within the firm.

2 It was a black eye for Mr. Schmidt. Military officers, who stated Project Maven was not  
3 getting used for deadly missions, condemned Google for abandoning the contract. Google staff  
4 additionally criticized Mr. Schmidt’s ties to the Pentagon.

5 “He has very different goals and values than the engineers at his company,” stated Jack  
6 Poulson, a Google worker who protested Mr. Schmidt’s military work and who has since left the  
7 company.

8 Mr. Schmidt said he sidestepped discussions about Project Maven as a result of of conflict-  
9 of-interest guidelines, however wished he might have weighed in. “I would have certainly had an  
10 opinion,” he stated.

11 Last April, Mr. Schmidt [announced](https://twitter.com/ericsschmidt/status/1123324575436214272) (  
12 <https://twitter.com/ericsschmidt/status/1123324575436214272> ) he deliberate to go away Google’s  
13 board. He had helped create an A.I. middle backed by the Pentagon in 2018 and had additionally  
14 turn into co-chair of the National Security Commission on Artificial Intelligence, a brand new group  
15 advising Congress on developing A.I. for defense.

16 A month after leaving Google, Mr. Schmidt invested in Rebellion Defense, a software  
17 program start-up based by former Defense Department staff that analyzes video gathered through  
18 drone. His enterprise agency later put more cash into the company, and Mr. Schmidt joined its  
19 board.

20 The funding led to extra bother. The Electronic Privacy Information Center, a nonprofit  
21 privateness and civil liberties group, sued the A.I. commission last September for failing to show  
22 over data. EPIC said the group was stacked with industry executives like Mr. Schmidt and others  
23 from Microsoft, Amazon and Oracle, who could potentially sway the government in favor of their  
24 companies’ interests.

25 Mr. Schmidt was underneath scrutiny as a result of of Rebellion Defense and the way he  
26 might push the government to make use of the start-up’s services, EPIC said.

27 “We don’t have any public disclosure about what information Eric has provided to the  
28 commission about his business interests,” said John Davisson, a legal professional at EPIC.

1 In December, a district court dominated the A.I. fee should disclose the data requested by  
2 EPIC. The fee has launched a whole lot of pages of paperwork, most of which don't contain Mr.  
3 Schmidt or his companies. EPIC stated extra data are set to be launched.

4 Chris Lynch, the chief executive of Rebellion Defense, said Mr. Schmidt suggested the  
5 company solely on hiring and growth. Mr. Schmidt said he didn't advocate for the Defense  
6 Department to purchase technology from the start-up.

7 He has continued plowing forward. In November, he unveiled a \$1 billion dedication by  
8 means of Schmidt Futures, the philanthropic agency that he runs along with his spouse, Wendy, to  
9 fund education for those who want to work in public service.

8 [What Are Google's Subliminal Political Manipulation Messages And How Do They](#)  
[Work?](#)

9 Investigator [Haley Kennington](#) points out that *Google v. Oracle* — is the "[copyright case of](#)  
10 [the century](#)". ( <https://www.natlawreview.com/article/google-v-oracle-will-software-be-free> )

11 This decade-long dispute will determine whether Google's unauthorized replication of more  
12 than 11,000 lines of Oracle's Java was illegal.

13 When Apple's iPhone hit stores in 2007, Google needed to develop a similar concept to  
14 remain competitive. Java, Google thought, would serve as the basis for its own operating  
15 system. But rather than license the software outright, the company instead chose to steal the code  
16 and ask for forgiveness later.

17 As demonstrated through the ongoing court case, Google discussed licensing Java in  
18 2005 in emails to Sun Microsystems but then walked away from the negotiations. Google's  
19 leadership allegedly [wrote](#), ( <https://www.wired.com/2012/04/android-google-oracle/> ) "If Sun  
20 doesn't want to work with us, we have two options: 1) Abandon Plaintiffs work and adopt MSFT  
21 CLR VM and C# language, or 2) Do Java anyway and defend Plaintiffs decision, perhaps making  
22 enemies along the way." This appears to be indubitable proof that Google was aware that the code  
23 was copyrightable.

24 This shouldn't come as a surprise. A top lawyer for Google once [admitted](#) (  
25 <https://www.sfgate.com/books/article/In-the-Plex-The-Googlization-of-Everything-2375189.php> )  
26 that "Google's leadership doesn't care terribly much about precedent or law." The company seems  
27 to think that its high-priced lawyers and endless monetary resources can always rewrite the rules of  
28 the road to meet the company's financial interests.

1 Google's strategy of ostensibly stealing intellectual property appears to rely on the Plaintiffs  
2 inability to withstand the years of costly litigation and legal delay tactics that it brings against its  
3 challengers. This practice has been coined in the I.P. space as "[efficient infringement](https://www.law360.com/articles/1245477)". (   
4 <https://www.law360.com/articles/1245477> ) " Similar claims have been made over the years from  
5 companies such as the speaker company Sonos, the lyric website Genius, and the review  
6 site Yelp!, all of which allege that Google has stolen their content, software, or other technologies.

7 Unfortunately for Google, efficient infringement in the *Google v. Oracle* case was a  
8 nonstarter. Oracle is a much bigger Plaintiffs challenger than the other companies it has faced in  
9 years past, and it had no problem holding firm over the last ten years of Google's legal delay  
10 tactics. Now, after a decade, the case finds itself in the high court's hands.

11 Previously, the U.S. Court of Appeals for the Federal Circuit stated that Google's decision to  
12 move the code directly to another platform without any alterations wasn't "fair use" since it wasn't  
13 transformative and was used just for one company's financial gain. When reviewing the facts and  
14 matters of law in this case, it becomes abundantly clear that it made the right call.

15 In the coming weeks, the Supreme Court should confirm the U.S. Court of Federal Claims'  
16 findings. It should not try to "correct" the software industry for Google, **one of the most predatory**  
17 **companies in modern times**. Deep down, even Google itself likely knows that the coding it lifted is  
18 copyrightable. The company has endless cash and appears to want to use it to carve out I.P.  
19 loopholes for itself. That should not be tolerated — not today, not tomorrow, not ever.

20 Google spied on Plaintiffs, copy their software, business models, blockaded their patents,  
21 ran black-lists that got them sued by the DOJ and still continues to operate like the technology  
22 branch of the Mafia.

**THE SILICON VALLEY CARTEL**

**A Recap Of The Musk And Silicon Valley Cartel Assertions**

*THE INVESTIGATIONS OF THE CORRUPTION AT GOOGLE: Google exists to mass manipulate populations and run stock market scams for Google's owners. From INSIDE Google, Plaintiffs team saw Google manipulate the entire internet to hype up Larry Page's "boyfriend": Elon Musk and Tesla, which Google execs owned a portion of, while sabotaging Tesla's competitors.*

*Google illicitly and illegally timed these manipulations with stock market pump-and-dump efforts to ePlaintiff 42loit insider trading. That is a felony violation of RICO, Antitrust and other laws. Every single thing that Google does is contrived to harm a competitor, a politician, an employee whistle-blower or some other business adversary.*

*There are no "bugs", "operator errors", "server anomalies" or other media "accidents" at*

1 *Google. Everything Google does is contrived, at a psychological warfare kind of level, to change a*  
2 *social perception.*

3 *Google must show its software to FBI, SEC, FTC and Plaintiffs search engine optimization*  
4 *experts to prove that they did not engage in these crimes. The fact is: We can prove they did the*  
5 *crimes and FBI experts can help us prove it! Google is known as the "Nazi's of the Internet". In a*  
6 *case unfolding in Britain over whether Google wrongly demoted price comparison rival Foundem*  
7 *from its search results in favour of paid-for adverts, Google must now decide which it values more:*  
8 *the algorithms that rank its search results, or its stance that manually fiddling with those results to*  
9 *promote its own paid-for products over rivals' sites doesn't break competition laws.*

10 *The integrity of Google's ranking processes relies upon all webmasters or website owners*  
11 *having the same degree of access to information about Google's ranking... This will no longer be*  
12 *the case if information of this kind is made available to some individuals offering commercial*  
13 *services to assist companies to improve their Search ranking.*

14 *Google is a criminal operation. It's executives have been publicly exposed as participants in*  
15 *horrific sex scandals, money laundering, political bribery and racism. It is time for the bought and*  
16 *paid shill politicians to stop protecting them! - Google spies on competitors and steals their*  
17 *technology -*

18 *Google runs tens of millions of dollars of defamation attacks against competitors - Google*  
19 *hides all media and news coverage for competitors of Larry Page's boyfriend: Elon Musk - Google*  
20 *lies to the public about what they really do with the public's data - Google promotes illegal*  
21 *immigration in order to get cheap labor and control votes - Google runs VC funding back-lists*  
22 *against start-ups that are competitive - Google bribes thousands of politicians - Google is a*  
23 *criminal RICO-violating monopoly - Google rigs the stock market with Flash-boy, Pump/Dump and*  
24 *Microblast SEC violating computer tricks - Google pays bribes to politicians in Google and*  
25 *YouTube stock - Google manipulates who gets to see what web-sites, globally, for competitor black-*  
26 *lists - Google has a "no poaching" Silicon Valley jobs blacklist -*

27 *Google bosses sexually abuse women and young boys - Google bosses run sex trafficking*  
28 *operations in the Epstein and NXVIUM cults - Google bosses control the NVCA financing cartel*

1 over start-ups - Google has placed the majority of the corporate staff in at least one White House -  
2 Google controls national elections for anti-competitive purposes - The company "Polyhop", in the  
3 HOUSE OF CARDS tv show, does all the crimes that Google actually does in reality - Google's law  
4 firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays - Google  
5 bribes some politicians with revolving door jobs -

6 Google is primarily responsible for destroying the Bay Area Housing opportunities - Google  
7 runs DDoS attacks on competitors by massively crawling their sites - Google boss Andy Rubin runs  
8 a sex slave farm according to his own family - Google boss Eric Schmidt was a philandering sex-  
9 penthouse owner according to vast news articles - Google executives hire so many hookers that one  
10 of them, Mr. Hayes, was killed by his hooker -

11 Google executives sexually abuse so many women that the women staff of Google walked  
12 out one day - In the 2009 White House, you could not swing a cat without hitting a Google insider -  
13 Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA  
14 Senator - Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC  
15 investigations of Google crimes - Google was funded by the CIA, via In-Q-Tel, a so called "501 c3  
16 charity" which was caught with tons of cocaine -

17 Google gets millions of dollars of taxpayercash for spying on Americans inside the USA -  
18 Google's map service was a spy system paid for by taxpayers money that Google now profits off of -  
19 Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit  
20 off Google stocks - Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and  
21 staff for Character Assassination attacks -

22 Google VC's and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Google  
23 and harm Google competitors - Google bribed it's lawyer into position as head of the U.S. Patent  
24 office in order to have her protect Google - To rig insider stock trades, Google hides negative Tesla  
25 stories and pumps positive Tesla stories on "push days" - Google and Elon Musk Co-own, co-invest  
26 and co-market stocks covertly while running anti-trust schemes - Google rarely likes, or hires,  
27 black employees per federal and news media investigations - Google hired most of the Washington,  
28 DC K Street lobby firms and told them to "do what ever they could" - The film: "Miss Sloane"

1 depicts only 2% of the illicit lobbying tactics Google employs daily -

2 Demands for an FTC and FBI raid of Google, for criminal activity, securities law and  
3 election felonies have been filed - Google's David Drummond had his Woodside, CA Quail Road  
4 house bugged revealing sex and financial misdeeds - Google, and it's Cartel (Alphabet, Youtube,  
5 and hundreds of other shell-company facades) are a criminal organization engaged in felony-class  
6 crimes. Google's bosses bribe politicians, regulators and law enforcement officials to hold off  
7 prosecution. At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergy Brin, Jared  
8 Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election  
9 manipulation, and White House bribes that it is hard to comprehend how they can get any  
10 legitimate work done.

11 Google executives came from most of the fraternity houses involved in the college rape  
12 scandals. Google sells covert character assassination services to politicians and fellow oligarchs.  
13 Youtube/Google/Alphabet/Deep State are all the same entity. They conspire to hide news about  
14 their corruption and they control most of the internet.

15

26  
27  
28

1 **EXHIBIT 23 - Felony Charges Against affiliated insiders Mark**  
2 **Zuckerberg And Cheryl Sandberg**

3 Defendants and their Cartel operatives engaged in election law violating campaign finance, money  
4 laundering, illicit political quid pro quo and anti-trust violating operations, among other crimes.  
5

6  
7 Because of what the “[THE FACEBOOK FACE-PLANT](#)” matter exposed; citizens are calling  
8 their elected officials and demanding that the Department of Defense and The Department Of  
9 Justice CUT-OFF **Facebook/WhatsApp/Instagram** from their global DNS servers until they  
10 [FULLY answer to Congress for their crimes and lies](#). This Silicon Valley social crime operation  
11 has been proven to be a national security risk, a dire threat to our youth, [a bribery operator](#) and a  
12 threat to society as a whole! October 4, 2021 was the first day in modern human history that the  
13 entire planet was freed from the social stain that is the Facebook empire. University data scientists  
14 and forensic internet analysts were able to compare traffic manipulations on Oct 1., 2021, by  
15 Facebook's web manipulation and privacy harvesting gang, to the "clean" internet that uniquely  
16 existed on Oct. 4, 2021. [You can see the changes. You can see who was controlling what. You can](#)  
17 [see the fake user data stop...and start. The whole thing is rigged and the scientific facts now prove](#)  
18 [it!](#)  
19

20  
21  
22 The Congressional Senate Commerce hearings have further proved that FACEBOOK  
23 operates exactly like a ***Mexican drug cartel*** run by '***El Zucko***' pushing addictive media and  
24 messaging to kids and vulnerable citizens in order to control global politics. Zuckerberg's “Tech  
25 Cartel” owns the U.S. Congress with billions of dollars of bribes and lobbyists. We have warned  
26 Congress and the agencies about these issues, in writing, since 2002 but lobbyists seem to speak  
27 louder than justice!

28 The facts prove that Facebook is one of the largest abusers of children in the world.

1 FACEBOOK makes over one billion dollars, per day, for each day that they delay Congress from  
2 acting! If Osama Bin Laden and Adolph Hitler jointly owned Google and Facebook and Congress  
3 repeatedly called them in for hearings and at the end of each hearing they said "We made some  
4 mistakes but we will do better", would you ever believe them? Would you wonder how Congress  
5 could go for decades without stopping them? If you found Nazi gold bars and underage Afghan  
6 slaves in the closets of the Senators, would that better explain why Congress does nothing about  
7 Facebook And Google?

FILED:**  
August 6, 2021

**VERIFIED STOCKHOLDER DERIVATIVE COMPLAINT**

1 'Zuckerberg seems to think our elections are for sale'. Citizens react with fury over  
2 revelations Mark Zuckerberg piled \$400million into local Democratic organizations to help swing  
3 the election for Biden and that he has spent over \$5B manipulating other American elections. Proof  
4 that the elections WERE rigged!

5 Rep. Dan Bishop said that Facebook CEO Mark Zuckerberg 'put a thumb on the scale' in the  
6 2020 election cycle and other elections. Zuckerberg, 37, and his wife Priscilla Chan, 36, gave  
7 \$419.5 million into two nonprofits that largely donated to control elections. CTCL and CEIR  
8 profited grants to counties to help fund the election manipulations as covertly prepared for  
9 Zuckerberg by Obama staffer David Plouffe.

10 The *New York Post*'s front-page package of articles and op-eds did an admirable job of  
11 covering the scandal, bringing much-needed attention to an issue that many Americans knew little  
12 about, even though it was arguably the decisive factor in the 2020 presidential election.

13 The Amistad Project filed [the first litigation](#) seeking to block private funding of elections in  
14 September 2020, based on investigations that began months earlier. We have continued and  
15 ePlaintiff 42anded our investigate-and-litigate strategy ever since, with a particular focus on the  
16 swing states that ultimately decided the outcome of the election.

17 What we have [uncovered](#) through litigation, discovery, open records requests, and witness  
18 interviews is deeply disturbing. In addition to [over \\$400 million from Zuckerberg](#), The Amistad  
19 Project has identified hundreds of millions of dollars' worth of additional contributions in the form  
20 of talent, information, and monies from leftist individuals and nonprofits. All told, the real total  
21 easily exceeds *\$1 billion*.

22 As numerous reports have correctly pointed out, there were not ePlaintiff 42licit laws on the  
23 books forbidding the infusion of private monies into public election offices, primarily because such  
24 a scheme had never been attempted or anticipated prior to 2020. There are, however, longstanding  
25 laws that apply to the broader contours of the left's election meddling operation, because efforts to  
26 interfere with free and fair elections to produce a desired outcome are as old as democracy itself.

27 For instance, if it can be proven that leftist organizations gave money to public officials with  
28 the intent of achieving a partisan electoral advantage, then those contributions are a direct violation

1 of campaign finance law.

2 In addition, conspiracy to deprive “any person or any class of persons of the equal protection  
3 of the laws” is a violation of longstanding civil rights laws. Zuckerberg-funded grants from the  
4 Center for Tech and Civic Life heavily favored Democrat-leaning cities and counties, resulting in  
5 massive discrepancies in per-capita election funding between the urban core of major battleground  
6 states and the rest of those states. The conditions imposed as part of those grants further  
7 disadvantaged voters in less urban areas, for example by making it easier for urban voters to have  
8 flawed ballots “cured” by officials paid with Zuckerberg money. Moreover, as reported by Mollie  
9 Hemingway, these private interests actively worked to eviscerate state election integrity laws  
10 allowing for massive breaches in the chain of custody of the ballots in the urban core.

11 Voters in Zuckerberg-funded jurisdictions also benefited disproportionately from access to  
12 conveniences such as absentee ballot drop boxes – in Delaware County, Pennsylvania, one drop box  
13 was placed every four square miles and for every 4,000 voters; in the 59 counties carried by Trump  
14 in 2016, there was one drop box for every 1,100 square miles and every 72,000 voters.

15 And this disparate impact was the result of a conspiracy.

16 The plan was outlined months in advance by David Plouffe, Barack Obama’s 2008  
17 campaign manager who later served as a senior political advisor to the Chan-Zuckerberg Initiative.  
18 In his book, *A Citizen’s Guide to Beating Donald Trump*, Plouffe predicted that the 2020 general  
19 election would come down to a “block by block street fight” to turn out the vote in the urban core,  
20 especially cities such as Detroit, Milwaukee, and Philadelphia. Not long after that book came out,  
21 Plouffe’s previous employer, the Chan-Zuckerberg Initiative, began pouring staggering amounts of  
22 money – \$350 million – into CTCL, which proceeded to use it to turn out left-leaning voters in  
23 cities such as Detroit, Milwaukee, and Philadelphia.

24 Prior to 2020, CTCL’s annual revenues never exceeded \$1.2 million. But it had all the right  
25 connections – leaders such as Tiana Epps-Johnson and Whitney May, who are veterans of the  
26 George Soros-funded New Organizing Institute. And CTCL represents just one of scores of leftist  
27 nonprofits interfering with the 2020 election.

28 The Amistad Project is still fighting to hold Mark Zuckerberg, CTCL, and the other key

1 players in this conspiracy accountable. In the coming days, for instance, we will be issuing demands  
2 as part of our civil litigation, and will continue consulting those with subpoena power, to demand  
3 the production of communications Zuckerberg and other substantial players and billionaires had  
4 with leftist nonprofits pertaining to the 2020 election.

5 Leftist election officials in the urban core of the swing states kicked America out of the  
6 counting room and invited billionaires in during the 2020 election. Elections must be transparent to  
7 be fair, and America deserves to see the records reflecting how these private interests funded by  
8 left-leaning billionaires managed the election.

9 When those communications are public, it will be clear that the left did far more than just  
10 corrupt our elections – they were actively working to turn government offices, which must act  
11 objectively, into campaign turn-out-the-vote centers for the Biden campaign.

2  
3 **EXHIBIT 24- Felony Charges Against affiliated insiders who are U.S. Senators,**  
4 **White House Executives And Other Public Officials**  
5

6 The companies charged in this complaint are largely owned by U.S. Senators and their  
7 family members, along with major government agency officials.

8 In other words, the companies charged with doing coordinated crimes and corruption are  
9 owned by the very people that are responsible for regulating those companies.

10 Those public officials have the means, the motive and the novel ability to manipulate  
11 funding for those companies and against their competitors.

12 Forensic data proves that the charged officials hae done so.

13 Analysis of financial disclosure data, FINCEN reports and ICIJ leaks shows senators and  
14 their spouses have as much as \$400M invested in corporate stocks.

15 We have first-hand knowledge of, and experience with, West Coast public officials putting  
16 hit-jobs, media attacks, de-funding orders and benefits manipulations on their constituents in order  
17 to protect their stock interests.

18 As they set national policy on important issues such as climate change, tech monopolies,  
19 medical debt and income inequality, these US senators have glaring conflicts of interest and have  
20 participated in cover-ups of these crimes and attacks on us for reporting them.

21 While corrupt public officials argue that “it isn’t illegal for them to own stocks” because  
22 they made exceptions in the law exclusively for themselves, it IS illegal to use such gains for  
23 racketeering!

24 An analysis of personal financial disclosure data has found that senators and their spouses  
25 have as much as \$400M personally invested in corporate stocks.

26 The majority of these stocks come from public companies that these officials regulate.

27 Overall, the senators are invested in 338 companies – including tech firms such as Apple  
28 and Microsoft, oil and gas giants including ExxonMobil and Antero Midstream, telecom companies

1 including Verizon, and major defense contractors such as Boeing.

2 The average range of the investments is between \$551,000 and nearly \$1,874,000 while  
3 these Senators also get millions of dollars of other perks from these companies.

4 Not only are the senators far wealthier than most of their constituents, but they're in a prime  
5 position to increase their wealth via policymaking.

6 The lawmakers' motivations are clearly driven by corruption. If a representative on the  
7 House financial services committee [owns hundreds of thousands of dollars worth of stock in Bank](#)  
8 [of America](#), how might this investment affect their questioning of Bank of America's CEO in a  
9 hearing? Could it influence how they legislate and vote on banking issues? Of COURSE IT DOES!

10 Senator Joe Manchin, the ranking member on the Senate energy and natural resources  
11 committee, owns between \$1m and \$5m worth of non-public stock in his family coal business,  
12 Enersystems, making him the only Democratic senator who is directly profiting from the  
13 environmentally devastating coal business.

14 Despite pressure from the left, the Senate minority leader, Chuck Schumer, made Manchin  
15 the ranking member of the committee, and Manchin did not divest his coal holdings.

16 Some senators want to do away with these perceived conflicts of interest. Senator Elizabeth  
17 Warren introduced [anti-corruption legislation](#) in August 2018 that included a ban on members of  
18 Congress, senior congressional staff, cabinet secretaries, White House staff, federal judges and  
19 other officials from owning individual stocks, bonds, commodities, futures and other types of  
20 securities while in office. The senators Sherrod Brown and Jeff Merkley introduced the [Ban](#)  
21 [Conflicted Trading Act](#) in December to prevent members of Congress and senior staff from trading  
22 individual corporate stocks. All such attempts to end stock market bribery have been defeated by  
23 the corrupt senators who make all of their money off of stock bribes.

24 Senators have between \$8.3m and \$22m invested in the communications and electronics  
25 sector, including up to \$4.2m in internet companies and as much as \$4.1m in computer software  
26 businesses. Senator Shelley Moore Capito, a member of the commerce, science, and transportation  
27 committee's subcommittee on communications, technology, innovation and the internet and the  
28 subcommittee on manufacturing, trade and consumer protection, owns between \$53,000 and

1 \$194,000 worth of Microsoft stock, as much as \$99,000 of Intel stock and up to \$30,000 each in  
2 AT&T and Verizon stock.

3 Senator Jacky Rosen, who is also on both subcommittees, owns between \$310,000 and \$1m  
4 worth of communications and electronics stock. Her largest potential investments are as much as  
5 \$265,000 in Amazon, up to \$115,000 in AT&T and \$100,000 in software company Adobe.

6 Energy and natural resources companies come up frequently in the senators' investments;  
7 members own between \$3.5m and \$13.9m in stocks in this sector. As the world hurtles towards a  
8 potential climate catastrophe by 2030, senators own as much as \$6.1m worth of stock in oil and gas  
9 companies. In addition, members have between \$1.1m and \$2.8m invested in electric and natural  
10 gas utilities stocks.

11 Fifteen senators own stock in Apple and in Microsoft; eleven are invested in Amazon and in  
12 Intel, and 10 own stock in Google's parent company, Alphabet.

13 Aside from the Wireless Telecom Group, in which Senator Rick Plaintiff 22of Florida has as  
14 much as \$3m invested, the top public stocks by investment amount are Apple (between \$798,000  
15 and \$2.2m), Microsoft (\$588,000 to \$2.2m), and Alphabet (\$577,000 to \$1.8m). Ownership in  
16 Amazon, which is [vying for a \\$10bn defense contract](#), is not far behind at between \$423,000 and  
17 \$1.3m.

18 Wells Fargo, the financial giant that has paid numerous fines for its frequently fraudulent  
19 practices, is the bank that has attracted the most investment dollars from senators: as much as  
20 \$1.5m. Also among the top stocks are telecom companies Crown Castle International (\$385,000 to  
21 \$1.2m), Verizon (\$407,000 to \$1m), and AT&T (\$250,000 to \$925,000).

22 In terms of total stock ownership in the five sectors, Senator Dianne Feinstein, who along  
23 with husband Richard Blum, an investment banker, is second, with up to \$7m invested in the five  
24 sectors. Blum's purchase of as much as \$250,000 worth of Facebook stock three months before his  
25 wife questioned the Facebook CEO, Mark Zuckerberg, came under scrutiny after Sludge [reported](#)  
26 the trade. He has since sold off the stock, but the couple still owns up to \$3.3m worth of  
27 communications and electronics sector stock, which is heavily represented their state of California,  
28 including between \$150,001 and \$650,000 invested in Alphabet.

1 Feinstein is followed by Senator David Perdue, who owns as much as \$6.4m invested. In  
2 addition to his considerable financial sector stock, the former Dollar General CEO has stock  
3 holdings worth as much as \$2.8m in the energy and natural resources sector and up to \$2m in the  
4 communications and electronics sector.

5 Congress refuses to ban lawmakers from buying and selling individual stocks because it is  
6 the largest conduit for bribes in America.

7 According to a recent NPR report, lawmakers on both sides of the aisle have failed to  
8 disclose stock purchases that they or their spouse made. Disclosure is required under the STOCK  
9 Act.

10 House Speaker Nancy Pelosi's husband has purchased a great deal of tech stock this year.  
11 According to a Forbes report in July, Paul Pelosi made millions on "timely" bets on Big Tech stock  
12 purchases in advance of an antitrust bill stalling in the House. Retail traders are reportedly tracking  
13 Pelosi's trades to decide which to buy.

14 They still sort of continue to blatantly trade in stocks, So in the case of the Pelosis, for  
15 example, she's the Speaker of the House, legislation that's going to affect Big Tech in a positive way  
16 or big contracts going to Big Tech, her husband's not only buying and selling stock in Big Tech, he's  
17 actually buying options, which are sort of leveraged bets that the stock is going to go one way or the  
18 other...and, of course, Paul Pelosi Sr. just happens to be really good at making those predictions  
19 because he tells his wife what to do in Congress so that he can benefit.

20 Looking back to 2011 one can clearly see that lawmakers were making stock purchases in  
21 industries related to committees they were serving on in Congress.

22 Lo and behold, people sitting on the health committee were trading healthcare stocks when  
23 they were introducing legislation that was going to benefit those companies, and vice versa. The  
24 Pelosi material was some of the most ePlaintiff 42losive back in 2011. She is continuing to do  
25 similar sorts of things today.

26 Pelosi files disclosure forms related to the stock buys that her spouse makes, which is one of  
27 the requirements in the STOCK Act. The website Capitol Trades tracks the stock purchases that  
28 members of Congress make, per their disclosure forms.

1           There is huge public concern about insider trading in Congress, but further action on the  
2 issue faces roadblocks.

3           The problem remains inherently that we're asking Congress to regulate themselves and this  
4 is a very powerful way for members of Congress to become wealthy. Congress is not really serious  
5 about it, because they don't think it's going to cost their jobs. Insider trading, though, SHOULD put  
6 Congress-people in jail!

7           You need to ban the buying and selling of individual shares of stock. There's no reason  
8 members of Congress should be trading stocks or, specifically, stock options in Tesla, Facebook,  
9 Google, Netflix and the Silicon Valley Cartel, which are leveraged bets like the Pelosis do.

10           There should be a "searchable database" of the financial disclosure documents from  
11 lawmakers rather than scanned documents.

1 **EXHIBIT 26 -Trillions Of Dollars Of Political Mining Manipulations That**  
2 **Plaintiffs exposed**

3  
4 **Afghanistan And The Mines Of Hell That Provided Payola To Senators And Silicon**  
5 **Valley Oligarchs**

6  
7 How do you pay back the bribes, paid by Silicon Valley tech billionaires, to put Presidents  
8 in the White House to be your bitch?

9 You create payola out of holes in the ground! You use corrupt overseas “rare earth” mineral  
10 mines!

11 Now that the 20 years of war, trillions of dollars of taxpayerexpense and American soldier  
12 deaths have yielded a not-so-glorious end to the Afghan War, we can all only bide our time until  
13 everybody can visit: **Disneyland Kabul**, right?

14 Mr. nice-guy Taliban boss is one bullet away from being gone and the big beards will  
15 control the whole shebang again. They have already started leaking the secrets from the last two  
16 decades of conflict.

17 The U.S. invaded Afghanistan in late 2001. In 2007 Silicon Valley technology oligarchs and  
18 the Barack Obama campaign organizers came up with the idea that Afghanistan had trillions of  
19 dollars of electric car battery materials in it's dry lake-beds. That covert pretext was used to extend  
20 the war. On Aug. 30, 2021, the [U.S. completed a pullout of troops](#) from Afghanistan, providing an  
21 uncertain punctuation mark to two decades of conflict.

22 Of course, by themselves figures can never give a complete picture of what happened and  
23 what it means, but they can help put this war in perspective.

24 **'The Afghanistan Papers' Reveals How Officials Knew The U.S. Was Likely To Fail**  
25 **There**

26 In April 2002, former President George W. Bush warned that insurgents were trying to  
27 undermine any peace and progress the U.S. achieved in Afghanistan.

28 “We know this from not only intelligence but from the history of military conflict in

1 Afghanistan. It's been one of initial success followed by long years of floundering and ultimate  
2 failure,” Bush said to the audience at Virginia Military Institute. “We're not going to repeat that  
3 mistake.”

4 Less than 6% of our budget comes from government support. WBUR only exists because  
5 readers like you fund our quality reporting. Donate Now.

6 Yet for all of the positive spin from multiple administrations, there is well-documented  
7 doubt and confusion behind the curtain.

8 In Craig Whitlock’s new book, the author and investigative journalist at The Washington  
9 Post looks at what went wrong in Afghanistan over the two decades the U.S. had troops there.

10  
11 The Post sued the federal government to obtain previously undisclosed documents that  
12 reveal how military leaders, diplomats and other officials publicly praised U.S. progress and success  
13 in Afghanistan while privately knowing that there was no clear strategy or mission. The documents  
14 also suggest they knew the U.S. was probably not able to win.

15 Whitlock outlines these findings in “The Afghanistan Papers: A Secret History of the War.”  
16 He says when the war started after the Sept. 11 terrorist attacks, everyone could identify the enemy  
17 — members of al-Qaida.

18 “That was a pretty successful part of the mission: Within six months, by early 2002, pretty  
19 much all of al-Qaida's leadership had been killed, captured or had fled Afghanistan. At that point,  
20 the enemy was pretty amorphous,” Whitlock says. “That's where things started to go awry.”

21 With al-Qaida largely quelled, the Pentagon — under Secretary of Defense Donald  
22 Rumsfeld’s leadership — was struggling to a “remarkable degree” to clearly define who the enemy  
23 was shortly after the war began, Whitlock says he discovered in the memos obtained for “The  
24 Afghanistan Papers.”

25 Rumsfeld, Bush and former Vice President Dick Cheney would lump together al-Qaida, the  
26 Taliban and other insurgent groups, Whitlock says, often calling them “the bad guys.”

27 “For instance, Rumsfeld wrote a memo to his intelligence chiefs a year or two into the war  
28 in which he said, ‘I have no visibility into who the bad guys are in Afghanistan,’ ” Whitlock says.

1 “And frankly, that wasn't something we ever sorted out over the last two decades.”

2 **On Foreign Service Officer Todd Greentree stating in an oral interview that the U.S.**  
3 **provoked the Taliban insurgency in Afghanistan by hunting them down:**

4 “Greentree goes on in his oral history interview to say that we sort of violated the Afghan  
5 way of war, that over the centuries Afghanistan has been overrun by foreign occupiers. They've also  
6 had civil wars. We have commanders from different parts of the country fighting each other, but  
7 they know how to switch sides and change allegiances. And so that's the way you sort of end the  
8 conflict in Afghanistan, is you have some kind of reconciliation.

9 “But the United States didn't do that. It thought it had defeated the Taliban back in 2002.  
10 And rather than allow for some sort of reconciliation for a way to politically end the fighting, we  
11 kept creating this bigger and bigger list of bad guys, which in turn just made the list get longer and  
12 longer.”

13 **On uncovering an interview with Lt. Gen. Michael Flynn, who told U.S. war auditors**  
14 **in 2015 that:** “if we're doing such a great job, why does it feel like we're losing?” “Well, Flynn was  
15 head of military intelligence for NATO and the United States in Afghanistan. He served many tours  
16 there. And before he got involved in politics and became known as a political extremist, he was well  
17 respected in the military for his intelligence assessments. And his point here is that because we kept  
18 sending in new units every year, troops would rotate in for nine or 12 months at a time. Same with  
19 diplomats at the U.S. Embassy.

20 “He's really getting to the question of human nature here that, particularly in the military,  
21 nobody wants to admit they didn't accomplish the mission, and part of that is the can-do spirit of the  
22 military. But it's also this unwillingness to admit that the situation was unfixable or that you failed.  
23 You don't want to take responsibility for failure on your watch or even to question the mission. The  
24 instinct is always to say you succeeded.”

25 **On how the apparent problems with the U.S. partnership with the local Afghan army**  
26 **doesn't square with public messaging of a strong alliance:**

27 “The slogan that the Pentagon put out was that we're shoulder to shoulder with the Afghans  
28 in the field. We're training them, we're mentoring them, we're patrolling with them. But the reality

1 on the ground was that, as Secretary [Robert] Gates points out [in an interview obtained in ‘The  
2 Afghanistan Papers’], we sort of dictated the terms of what they were supposed to do and ePlaintiff  
3 expected the Afghans to follow along. Now, part of that was hubris on the part of U.S. officials that  
4 we thought we knew best, even though we really didn't understand Afghanistan that well.

5 “But underlying all that was a sort of distrust of our Afghan partners. You see that in a lot of  
6 oral history interviews with U.S. troops who are serving as trainers or mentors. They just didn't  
7 think the Afghans were up to the job. The Afghan army recruits couldn't read. They couldn't shoot  
8 straight. They deserted often. And so this is a very, very difficult task to train an Afghan army that  
9 was competent. And frankly, the Americans at the field level didn't have much confidence that this  
10 was going to work. But in public, the American generals kept reassuring the public that everything  
11 was going great. So there's this extreme disconnect between what the American people were being  
12 told and what military officials thought behind the scenes.”

13 **On Foreign Service Officer Michael Metrinko’s comments during an oral interview**  
14 **that CIA officials on the ground in Afghanistan did not understand the country:**

15 “The fact is, we didn't understand the place very well at all. Michael Metrinko is a foreign  
16 service officer who is a rare bird because he spoke Dari, one of the Afghan national languages, and  
17 he was pretty scathing in his assessment of anybody else in The U.S. Government , but particularly  
18 the CIA.

19 “And as he pointed out, the CIA sort of thought they understood Afghanistan and would  
20 come in beards and dress like the locals and hand out bags of cash to warlords to try and get them  
21 on their side. But Metrinko said whenever he would talk with Afghan elders in their native  
22 language, they would sort of laugh at how blind the Americans were in their understanding of  
23 Afghanistan.

24  
25 “Again, this is something we see throughout the war. There was an interview we obtained  
26 with [Lt. Gen.] Douglas Lute, who is the war czar for both Bush and [former President Barack]  
27 Obama, and he said we didn't have the foggiest idea of what we were doing. We were devoid of a  
28 fundamental understanding of Afghanistan. And that's something you hear again and again that

1 even though we were there for 20 years, we never really understood the place. And this was just an  
2 enormous reason why the war failed.”

3 **Book Excerpt: 'The Afghanistan Papers', By Craig Whitlock**

4 Two weeks after the 9/11 attacks, as the United States girded for war in Afghanistan, a  
5 reporter asked Defense Secretary Donald Rumsfeld a straightforward question: Would U.S. officials  
6 lie to the news media about military operations in order to mislead the enemy?

7 Rumsfeld stood at the podium in the Pentagon briefing room. The building still smelled of  
8 smoke and jet fuel from when American Airlines flight 77 ePlaintiff 42loded into the west wall,  
9 killing 189 people. The defense secretary started to reply by paraphrasing a quotation from British  
10 Prime Minister Winston Churchill: “In wartime, truth is so precious that she should always be  
11 attended by a bodyguard of lies.” Rumsfeld explained how the Allies, prior to D-Day, ran a  
12 disinformation campaign called Operation Bodyguard to confuse the Germans about when and  
13 where the invasion of western Europe would take place in 1944.

14 Rumsfeld sounded as if he were justifying the practice of spreading lies during wartime, but  
15 then he pivoted and insisted he would never do such a thing. “The answer to your question is, no, I  
16 cannot imagine a situation,” he said. “I don’t recall that I’ve ever lied to the press. I don’t intend to,  
17 and it seems to me that there will not be reason for it. There are dozens of ways to avoid having to  
18 put yourself in a position where you’re lying. And I don’t do it.”

19 Asked if the same could be ePlaintiff 42ected of everyone else in the Defense Department,  
20 Rumsfeld paused and gave a little smile.

21 “You’ve got to be kidding,” he said.

22 The Pentagon press corps laughed. It was classic Rumsfeld: clever, forceful, unscripted,  
23 disarming. A former star wrestler at Princeton, he was a master at not getting pinned down.

24 Twelve days later, on October 7, 2001, when the U.S. military began bombing Afghanistan,  
25 no one foresaw that it would turn into the most protracted war in American history—longer than  
26 World War I, World War II and Vietnam combined.

27 Unlike the war in Vietnam, or the one that would erupt in Iraq in 2003, the decision to take  
28 military action against Afghanistan was grounded in near-unanimous public support. Shaken and

1 angered by al-Qaeda’s devastating terrorist strikes, Americans expected their leaders to  
2 defend the homeland with the same resolve as they did after the Japanese attack on Pearl Harbor.  
3 Within three days of 9/11, Congress passed legislation authorizing the Bush administration to go to  
4 war against al-Qaeda and any country that harbored the network.

5 For the first time, the North Atlantic Treaty Organization (NATO) invoked Article 5, the  
6 alliance’s collective commitment to defend any of its member states under attack. The United  
7 Nations Security Council unanimously condemned the “horrifying terrorist attacks” and called on  
8 all countries to bring the perpetrators to justice. Even hostile powers expressed solidarity with the  
9 United States. In Iran, thousands attended candlelight vigils and hardliners stopped shouting “Death  
10 to America” at weekly prayers for the first time in twenty-two years.

11 With such strong backing, U.S. officials had no need to lie or spin to justify the war. Yet  
12 leaders at the White House, the Pentagon and the State Department soon began to make false  
13 assurances and to paper over setbacks on the battlefield. As months and years passed, the  
14 dissembling became more entrenched. Military commanders and diplomats found it harder to  
15 acknowledge mistakes and deliver clear-eyed, honest assessments in public.

16 No one wanted to admit that the war that started as a just cause had deteriorated into a losing  
17 one. From Washington to Kabul, an unspoken conspiracy to mask the truth took hold. Omissions  
18 inexorably led to deceptions and eventually to outright absurdities. Twice—in 2003 and again in  
19 2014—The U.S. Government declared an end to combat operations, episodes of wishful thinking  
20 that had no connection to reality on the ground.

21 Excerpted from THE AFGHANISTAN PAPERS: A Secret History of the War by Craig

24 **From 2001 to 2021**

25 On Sept. 18, 2001, the U.S. House of Representatives voted [420-1](#) and the Senate [98-0](#) to  
26 [authorize](#) the United States to go to war, not just in Afghanistan, but in an open-ended commitment  
27 against “those responsible for the recent attacks launched against the United States.” U.S. Rep.  
28 Barbara Lee of California cast the [only vote opposed](#) to the war.

1 In other words, the U.S. Congress took [7 days](#) after the 9/11 attacks to deliberate on and  
2 authorize the war.

3 At [7,262 days](#) from the first attack on Afghanistan to the final troop pullout, Afghanistan is  
4 said to be the U.S.'s longest war. But it isn't – the U.S. has [not officially ended the Korean War](#).  
5 And U.S. operations in Vietnam, which began in the mid-1950s and included the declared war from  
6 1965-1975, also rival Afghanistan in longevity.

7 U.S. President [George W. Bush told](#) members of Congress in a joint session on Sept. 20,  
8 2001 that the war would be global, overt, covert and could last a very long time.

9 “Our war on terror begins with al-Qaida, but it does not end there. It will not end until every  
10 terrorist group of global reach has been found, stopped and defeated. ... Americans should not  
11 expect one battle, but a lengthy campaign, unlike any other we have ever seen,” [he said](#).

12 The U.S. started bombing Afghanistan a few weeks later. The Taliban surrendered in  
13 Kandahar on Dec. 9, 2001. The U.S. began to fight them again in earnest in March 2002. In April  
14 2002, President Bush promised to help bring “[true peace](#)” to Afghanistan: “Peace will be achieved  
15 by helping Afghanistan develop its own stable government. Peace will be achieved by helping  
16 Afghanistan train and develop its own national army. And peace will be achieved through an  
17 education system for boys and girls which works.”

18 The global war on terror was not confined to operations in Iraq and Afghanistan. The U.S.  
19 now has counterterrorism operations in [85 countries](#).

### 20 **The human cost**

21 Most Afghans alive today were not born when the U.S. war began. The median age in  
22 Afghanistan is just [18.4 years old](#). Including their country's war with the Soviet Union from 1979  
23 to 1989 and civil war in the 1990s, most Afghans have lived under nearly continuous war.

24 There are, according to the U.S. Bureau of Labor Statistics, [980,000 U.S. Afghanistan war](#)  
25 [veterans](#). Of these men and women, [507,000 served in both Afghanistan and Iraq](#).

26 As of mid-August 2021, [20,722](#) members of the U.S. military had been wounded in action in  
27 Afghanistan, not including the [18 who were injured](#) in the attack by ISIS-K outside the airport in  
28 Kabul on Aug. 26, 2021.

1 Of the veterans who were injured and lost a limb in the post-9/11 wars, many lost [more than](#)  
2 [one](#). According to [Dr. Paul Pasquina](#) of the Uniformed Services University of the Health Sciences,  
3 of these veterans, “About 40% to 60% also sustained a brain injury. Because of some of the lessons  
4 learned and the innovations that have taken place on the battlefield ... we were taking care of  
5 service members who in previous conflicts would have died.”

6 In fact, because of advances in trauma care, more than **90%** of all soldiers in Afghanistan  
7 and Iraq who were injured in the field survived. Many of the seriously injured [survived wounds](#) that  
8 in the past might have killed them.

9 In all, **2,455 U.S. service members** were killed in the Afghanistan War. The figure includes  
10 13 U.S. troops who were killed by ISIS-K in the Kabul airport attack on Aug. 26, 2021.

11  
12 A burial for one of 2,455 U.S. troops who died in Afghanistan. Olivier Douliery/AFP via  
13 Getty Images

14 U.S. deaths in Operation Enduring Freedom also include 130 service members who died in  
15 other locations besides Afghanistan, including Guantanamo Bay in Cuba, Djibouti, Eritrea,  
16 Ethiopia, Jordan, Kenya, Kyrgyzstan, Pakistan, Philippines, Seychelles, Sudan, Tajikistan, Turkey,  
17 Uzbekistan and Yemen.

18 The U.S. has paid **US\$100,000 in a “death gratuity”** to the survivors of each of the service  
19 members killed in the Afghanistan war, totaling **\$245.5 billion**.

20 **More than 46,000 civilians have been killed** by all sides in the Afghanistan conflict. These  
21 are the direct deaths from bombs, bullets, blasts and fire. [Thousands more have been injured](#),  
22 according to the United Nations Assistance Mission in Afghanistan.

23 And while the number of Afghans leaving the country has increased in [recent weeks](#), more  
24 than **2.2 million displaced Afghans** were living in Iran and Pakistan at the end of 2020. The United  
25 Nations Refugee Agency reported in late August 2021 that since the start of that year, [more than](#)  
26 [558,000](#) people have been internally displaced, having fled their homes to escape violence.

27 According to the [United Nations](#), in 2021 about a third of people remaining in Afghanistan  
28 are malnourished. **About half of all children under 5 years old** experience malnutrition.

1 The human toll also includes the hundreds of Pakistani civilians who were killed in [more](#)  
2 [than 400 U.S. drone strikes](#) since 2004. Those strikes happened as the U.S. sought to kill Taliban  
3 and al-Qaida leaders who fled and sheltered there in late 2001 after the U.S. invasion of  
4 Afghanistan. Pakistani civilians have also been killed in crossfire during fighting between militants  
5 and the Pakistani military.

### 6 **The financial cost**

7 In terms of the federal budget, Congress has allocated a bit over **\$1 trillion** to the  
8 Department of Defense for the Afghanistan War. But all told, the Afghanistan War has cost much  
9 more than that. Including the Department of Defense spending, more than [\\$2.3 trillion](#) has been  
10 spent so far, including increases to the Pentagon’s base military budget due to the fighting, State  
11 Department spending to reconstruct and democratize Afghanistan and train its military, interest on  
12 borrowing to pay for the war, and spending for veterans in the Veteran Affairs system.

13 The total costs so far for all post-9/11 war veterans’ disability and medical care costs are  
14 about **\$465 billion** through fiscal 2022. And this doesn’t include the future costs of all the post-9/11  
15 veterans’ medical and disability care, which [Harvard University scholar Linda Bilmes estimates](#) will  
16 likely add about \$2 trillion to the overall cost of care for veterans of the Iraq and Afghanistan wars  
17 between now and 2050.

18 The war in Afghanistan, like many other wars before it, began with optimistic assessments  
19 of a quick victory and the promise to rebuild at war’s end. Despite Bush’s warning of a lengthy  
20 campaign, few thought then that would mean decades. But 20 years later, the U.S is still counting  
21 the costs.

22 Meet the "*Russian Treasure Maps*" of Afghanistan. They were said to show where five  
23 trillion dollars worth of copper, *lithium for Tesla, indium for Solyndra* and other technology  
24 minerals were hidden in the Afghan plains. That lithium and indium could power Elon Musk’s cars  
25 and Solyndra tubes, (if only a certain group of Silicon Valley billionaires had a way to monopolize  
26 that...hmmmm?) But; were those “Treasure Maps” a trick or a treat?

27 To this day, controversy exists across the intelligence communities, of many nations, about  
28 whether, or not, those maps were a scam created to “trick the American’s” or the actual locations of

1 trillions of dollars of mining deals that were “*antibody's for the taking*”. The papers that the CIA  
2 geologists pulled out of that archival library in Kabul, Afghanistan still read to be a bit too  
3 convenient for what happened next. CIA Boss Woolsey promoted lithium batteries until he was blue  
4 in the face. Did Woolsey own mining interests in the CIA manipulation efforts in Afghanistan?  
5 Secretary of Energy Steven Chu, after getting booted out of office for corruption, went to work at a  
6 lithium company. The USAID, staffed by Hillary Clinton associates, pushed white papers and  
7 power-points to tech VC’s pitching the “***trillions of dollars of electric car lithium in Afghanistan***”  
8 and ignoring the fact that it may not even exist and that everybody around it wants to kill you. Is  
9 Elon Musk responsible for the deaths of all of the American soldiers that went to Afghanistan to get  
10 him lithium for his ePlaintiff 42ensive douche-bag cars? Maybe.

11       Decades later, after an invasion or two, and vast ePlaintiff 42enditures of cash, political  
12 capitol and lives, very little of the promised golden mining treasure has materialized. What has  
13 materialized is epic corruption, political payola, campaign secrets, deaths and controversy. By  
14 Pentagon audits, over SEVEN TRILLION dollars of U.S. taxpayermoney disappeared down the  
15 hole in Afghanistan and the U.S. got nothing out of it.

Talison Lithium Ltd's

Goldman Sachs, McKinsey Consulting and Deloitte helped a few rogue CIA buddies distribute a huge number of white papers and press releases which used the buzz words: “Trillions of dollars of lithium in Afghanistan” and “Afghanistan is the Saudi Arabia of Lithium”. Why would those particular companies put so much effort into hyping a pile of dirt on the other side of the planet? The answer lies in who they hyped it to and who took the bait. It turns out, most of the money that flowed through this (probable) scam financed the Obama campaign. It also turns out that those who skimmed profits from this vast flowing river of corruption sludge were Elon Musk,

1 John Doerr, Eric Schmidt, Steve Jurvetson and the very pack of investors who co-funded the Obama  
2 campaign. They were also the very same people who, exclusively, got the only cash from the  
3 Obama Administration.

13 In the Congo, Elon Musk’s rush to gather Cobalt for his ePlaintiff 42loding batteries has led  
14 to child slave labor, mass rape, genocide and machete mutilations.

15 The wars and political dirty tricks to gather the politically targeted rare earth mining payola  
16 which Google, Tesla, Facebook, Amazon (All sponsors and beneficiaries of the Obama campaigns)  
17 stuffed into their products were worth a supposed “\$18 trillion dollars” to the tech oligarchs. People  
18 kill other people and rig elections for that kind of money.

19 GOVT "Tesla Fan Boys" made up their own interpretations of Department of Energy  
20 applicants statements and re-wrote applicants intentions in order to create negative data for  
21 competitors of Tesla and make Tesla look better even though Tesla was: 1.) about to go bankrupt,  
22 2.) bleeding cash, 3.) owner of the absolute worse debt ratio of any applicant, 4.) Trying to build  
23 new buildings, like Solyndra (for real estate holdings to benefit CBRE, Feinstein's husband's  
24 company), 5.) bleeding staff, 6.) operated by a sociopath drug abuser, 7.) reliant on Afghanistan  
25 war-based lithium battery mines that may never materialize, 8.) reliant on Congo cobalt mines that  
26 used child slave labor, 9.) reliant on Panasonic lithium batteries that were never intended for auto  
27 energy storage and widely documented to ePlaintiff 42lode and release poison cancer-causing gas  
28 during fires, 10.) off budget PER CAR by over \$100,000.00 PER CAR, 11.) in a legal dispute with

1 all of its founders, 12.) fully conflicted with stock ownership by GOVT, White House and Senate  
2 executives, and much, much more...

3       The *Lithium, Indium, Cobalt* and *Uranium* mining deals, and their associated wars, were  
4 staged by the Obama Administration, through Goldman Sachs and JP Morgan for the nearly  
5 exclusive benefit of the Silicon Valley Obama political financiers. Obama's utter disaster of a war  
6 in Afghanistan was staged to help Elon Musk buy private jets and hang out at Jeffrey Epstein and  
7 Steve Jurvetson sex parties. How many child slaves died in holes in the ground digging for Musk's  
8 cobalt by hand? The "S" in "Model S" really stands for ***Slave-labor!***

9       Modern civilization was built on fossil fuels, with the invention and commercialization of  
10 the internal combustion engine during the 1800s setting the stage for petroleum-based vehicles to be  
11 dominant worldwide for the next 150 years.

12       Various oil majors continue to produce huge volumes of oil and natural gas, owing to fossil  
13 fuels still being used to meet the bulk of the world's energy requirements.

14       Although energy demand is expected to continue to increase, the share of fossil  
15 fuels in the global energy mix is set to decline. This shift is particularly profound when considering  
16 the current technological revolution in the transportation industry.

17       Increasing concern over the environmental degradation caused by excessive fossil fuel  
18 extraction and burning has led to the development of alternative technologies, disrupting the  
19 monopoly once held by petroleum-powered vehicles.

20       Electric vehicles (EVs) are the front-runners for the future of sustainable transportation.  
21 They use electric motors, which have improved significantly in terms of technology and economies  
22 of scale over the past decade. These battery-powered vehicles seem to be winning the technology  
23 race for the future of transportation.

24       Although many EV variations still present concerns over efficiency, battery range and  
25 safety, it is generally agreed that petroleum-powered vehicles have lost their stranglehold on the  
26 automotive industry, with various experts expecting a dramatic shift to EVs as the  
27 dominant vehicle type within the next decade – particularly in developed countries such as the US  
28 and European countries.

1 Such a shift has been confirmed by US President Joe Biden, who signed Executive Order  
2 14017 on February 24, 2021, to direct a complete government approach to assessing vulnerabilities  
3 in critical supply chains and strengthening their resilience.

4 On June 8, after conducting a 100-day assessment of supply chain vulnerabilities, the White  
5 House issued a statement declaring that EV supply chains – specifically those for the manufacture  
6 of large-capacity EV batteries – are among the most vulnerable and most critical to the economic  
7 future of the US.

8 The statement declared that the US Department of Energy Loan Programs Office (LPO)  
9 would immediately leverage about \$17-billion in loan authority in the Advanced Technology  
10 Vehicles Manufacturing (ATVM) Loan Program to support a domestic battery supply chain.

11 The LPO will leverage full statutory authority to finance key strategic areas of development  
12 and fill capacity deficits in the domestic supply chain. This will include the ATVM program  
13 extending loans to manufacturers of advanced-technology vehicle battery cells and packs for re-  
14 equipping, expanding or establishing such manufacturing facilities in the US.

15 The US Department of the Interior, with the support of the White House Office of Science  
16 and Technology Policy, will establish a working group comprising agencies such as the Department  
17 of Agriculture and the Environmental Protection Agency to ePlaintiff 42and critical minerals  
18 production in the US by identifying sites where such minerals could be produced and processed.

19 Moreover, the US Development Finance Corporation will ePlaintiff 42and international  
20 investments in projects that will increase critical minerals production capacity where this will  
21 benefit the US.

22 The White House recommended that Congress authorize new and ePlaintiff 42anded  
23 incentives to spur consumer adoption of US-made EVs.

24 “We recommend Congress support \$5-billion in investments to electrify the federal fleet  
25 with US-made EVs, and \$15-billion in infrastructure investment to build a national charging  
26 infrastructure to facilitate the adoption of EVs,” it said.

27 Moreover, earlier this month, the Biden administration issued an executive order that called  
28 for half of all vehicles sold in the US to be emission-free by 2030 – an ambitious goal that would

1 necessitate significant investment in EV infrastructure, including a comprehensive charging station  
2 network, for example.

3 US National Mining Association (NMA) president and CEO Rich Nolan said that the Biden  
4 administration’s energy and infrastructure agenda cannot be accomplished without mining, which  
5 will provide a significant boost for the country’s mining sector at all levels.

6 “Infrastructure projects are incredibly materials intensive. President Biden’s plan for EV  
7 adoption and electrification across the economy, energy and transportation sectors holds the  
8 potential for significant additional investment in domestic mining,” he tells Engineering News &  
9 Mining Weekly.

10 He explains that it has been estimated that \$1-trillion of infrastructure spending could  
11 require an additional six-million tons of steel, 110 000 t of copper and 140 000 t of aluminum a  
12 year.

13 In terms of EVs, the general sentiment in the automotive industry seems to be that the  
14 demand curve is going to become vertical and that the supply chains are “going to ePlaintiff  
15 42lode”, Nolan says.

16 “I don’t believe that the pivot to EVs is solely dependent on the Biden plan. Automakers and  
17 the capital markets have already made investments in battery production and announced a rapid  
18 transition,” he says.

19 For example, vehicle manufacturer General Motors has announced that it will invest \$27-  
20 billion in EVs over the next five years, while competitor Ford will double its investment in EVs to  
21 \$22-billion.

22 Meanwhile, earnings reported for EV manufacturer Tesla’s first quarter of 2021 were  
23 record-breaking, comprising a profit of \$438-million on revenues of \$10.39-billion. During that  
24 period, Tesla delivered about 184 800 vehicles – double the number recorded for the same quarter  
25 of last year.

26 The World Bank estimates that battery minerals production could increase by 500% by 2050  
27 to meet the growing demand for advanced energy technologies.

28 “The demand is coming; just how fast is the question,” Nolan comments.

1 Although rare-earth or critical minerals are being “hotly pursued” for battery production, the  
2 importance of copper – which he says is plentiful in the US – should not be discounted: “EVs use  
3 three times as much copper as the standard combustion engine vehicle. Copper will form the  
4 arteries of an electrified future”.

5 Nolan adds that the US will need to produce the same amount of copper in the next 25 years  
6 as was produced globally in the past 5 000 years. Silver is also critical for building a more  
7 sustainable energy economy. For example, about 10% of silver demand stemmed from photovoltaic  
8 solar in 2019.

9 “Silver demand from EVs and 5G is building. The electrification of everything means more  
10 metals are needed,” he says.

11 While the US can theoretically develop domestic mines in the medium to long term to  
12 supply the minerals and metals needed to secure supply chains for the EV revolution, short-term  
13 demand leaves the US with no choice but to source supply from overseas.

14 “It should be no surprise that the Biden administration is looking to all available resources to  
15 meet those immediate needs,” Nolan says.

16 Canada is a natural ally from which to source such resources and Hillary Clinton's friend  
17 rank Giustra controls a big part of the mining industry in Canada.

18 Canadian cobalt producer First Cobalt president and CEO Trent Mell explains that the world  
19 relies largely on China for the supply of most materials required to produce a lithium-ion battery  
20 cell.

21 “The current battery supply chain is very high risk. The impact of geopolitical changes could  
22 lead to a change in tariff environments or outright bans on Chinese ePlaintiff 42orts of certain  
23 materials deemed critical to economic growth,” he says, noting that these risks must drive a  
24 localisation of battery supply chains in coming years.

25 “First Cobalt and other Canadian companies are well positioned to capture value in the  
26 battery supply chain, which would otherwise be captured by Chinese refiners,” Mell says.

27 He adds that politicians in Canada and the US must ensure that some of the money being  
28 invested in the EV industry “finds its way to mining and refining”.

1 Nolan adds, however, that it would be a mistake to interpret a strategy intent on ensuring  
2 immediate supply as a long-term comprehensive strategy that will effectively meet US mineral  
3 demand for the future.

4 “We have to improve the competitiveness of the US industry on the global stage. Therefore,  
5 the NMA is working closely with Congress and the Biden administration to address unnecessary  
6 permitting delays and ensure timely access to our vast resources,” Nolan says.

7 Mell explains that there are several stages that must be developed in North America for the  
8 supply chain to become truly integrated. These stages comprise the mining of critical raw materials,  
9 refining them to battery-grade sulphates, further refining them into battery precursor materials, then  
10 into cathode and anode materials, followed by cell manufacturing.

11 The cells are put into modules and packs, which end up in EVs and other battery-energy  
12 storage systems.

13 “Over the past few years, we have seen numerous announcements relating to EV plants and  
14 battery manufacturing sites, but few developments are being made on the raw material front,” he  
15 comments.

16 Critical minerals producers from allied countries – such as First Cobalt – have a unique  
17 opportunity to fill this gap in the short to medium term while the US develops its own resources.

18 However, for the US, the race is on and world war three could be caused by electric vehicle  
19 mining.

20 However, US miners are competing with critical mineral producers in other countries that  
21 have fully fledged government backing, while not necessarily operating under environmental or  
22 labour standards that are as stringent as those in the US.

23 Therefore, Nolan says that domesticising EV supply chains would not only serve the US  
24 economy in the long term but would also be more environmentally and socially responsible.

25 “The most responsible sourcing is here at home, in the US, where we know these minerals  
26 will be mined under the strictest environmental and labour standards globally,” he concludes.

27 In the end, the U.S. will never get the rare earth minerals that Goldman Sachs stock market  
28 hypsters have pitched. The smoke and mirrors pipe dreams of EV mining orgasms will evaporate

1 into toxic wastelands, false hopes and international wars. Trillions of dollars of BS stock market  
2 pump-and-dump is already underway but it will only lawsuits, market crashes and no actual  
3 affordable cars. China and Russia have already cut off all of the non-domestic lithium ion battery  
4 minerals. The U.S. had better get a clue and go for ANYTHING except lithium ion batteries.

1 of your office we make the following request for FOIA data.

2 Plaintiffs Office requests that your office produce the following within twenty business days and further seeks  
3 ePlaintiff 42edited review of this request for the reasons identified below:

4 1. All records discussing, referring, or relating to all meetings or communications between staff and related  
5 parties or their representatives including minutes of those meetings, or any memoranda written about these meetings by  
6 your employees and contractors who were present or have knowledge of these actions related to FST, Plaintiff 30, DCT  
7 or Plaintiff 42 Vehicles proposals for their proven patented, trade secret and patent pending technologies to use  
8 domestic coal waste for plasma processing into clean energy storage systems on which the U.S. Department Of Energy  
9 has worked with Plaintiffs Teams via Ameren Energy, Lawrence Livermore, Sandia and Department of Energy HQ  
10 efforts, and direct Department of Energy funding, support and advisory efforts since, at least, 2000 and which  
11 Department of Energy officials blockaded in order to favor Tesla Motors, Solyndra and companies which acquired their  
12 energy minerals from Afghanistan, Bolivia and China (Assets of which are owned by corrupt U.S. Senators and  
13 Department of Energy staff via proven Goldman Sachs, JP Morgan and related investment bank accounts) and other  
14 corrupt regions through corrupt rare earth mining scams relative to the White House Executive Order Of September 30,  
15 2020, per the following:

16 White House Executive Order Places U.S. Emphasis On Plaintiffs Coal Waste Processing Technology

17 "Executive Order on Addressing the Threat to the Domestic Supply Chain from Reliance on Critical Minerals  
18 from Foreign Adversaries

19 Economy & Jobs

20 Issued on:

21  
22 By the authority vested in me as President by the Constitution and the laws of the United States of America,  
23 including the International Emergency Economic Powers Act (50 U.S.C. 1701 et seq.) (IEEPA), the National  
24 Emergencies Act (50 U.S.C. 1601 et seq.) (NEA), and section 301 of title 3, United States Code,

25 I, DONALD J. TRUMP, President of the United States of America, find that a strong America cannot be  
26 dependent on imports from foreign adversaries for the critical minerals that are increasingly necessary to maintain  
27 Plaintiffs economic and military strength in the 21st century. Because of the national importance of reliable access to  
28 critical minerals, I signed Executive Order 13817 of December 20, 2017 (A Federal Strategy To Ensure Secure and

1 *Reliable Supplies of Critical Minerals), which required the Secretary of the Interior to identify critical minerals and*  
2 *made it the policy of the Federal Government “to reduce the Nation’s vulnerability to disruptions in the supply of*  
3 *critical minerals.” Pursuant to my order, the Secretary of the Interior conducted a review with the assistance of other*  
4 *executive departments and agencies (agencies) that identified 35 minerals that (1) are “essential to the economic and*  
5 *national security of the United States,” (2) have supply chains that are “vulnerable to disruption,” and (3) serve “an*  
6 *essential function in the manufacturing of a product, the absence of which would have significant consequences for*  
7 *Plaintiffs economy or Plaintiffs national security.”*

8 *These critical minerals are necessary inputs for the products Plaintiffs military, national infrastructure, and*  
9 *economy depend on the most. Plaintiffs country needs critical minerals to make airplanes, computers, cell phones,*  
10 *electricity generation and transmission systems, and advanced electronics. Though these minerals are indispensable to*  
11 *Plaintiffs country, we presently lack the capacity to produce them in processed form in the quantities we need.*  
12 *American producers depend on foreign countries to supply and process them. For 31 of the 35 critical minerals, the*  
13 *United States imports more than half of its annual consumption. The United States has no domestic production for 14 of*  
14 *the critical minerals and is completely dependent on imports to supply its demand. Whereas the United States*  
15 *recognizes the continued importance of cooperation on supply chain issues with international partners and allies, in*  
16 *many cases, the aggressive economic practices of certain non-market foreign producers of critical minerals have*  
17 *destroyed vital mining and manufacturing jobs in the United States.*

18 *Plaintiffs dependence on one country, the People’s Republic of China (China), for multiple critical minerals is*  
19 *particularly concerning. The United States now imports 80 percent of its rare earth elements directly from China, with*  
20 *portions of the remainder indirectly sourced from China through other countries. In the 1980s, the United States*  
21 *produced more of these elements than any other country in the world, but China used aggressive economic practices to*  
22 *strategically flood the global market for rare earth elements and displace its competitors. Since gaining this advantage,*  
23 *China has ePlaintiff 42loited its position in the rare earth elements market by coercing industries that rely on these*  
24 *elements to locate their facilities, intellectual property, and technology in China. For instance, multiple companies were*  
25 *forced to add factory capacity in China after it suspended ePlaintiff 42orts of processed rare earth elements to Japan in*  
26 *2010, threatening that country’s industrial and defense sectors and disrupting rare earth elements prices worldwide.*

27 *The United States also disproportionately depends on foreign sources for barite. The United States imports*  
28 *over 75 percent of the barite it consumes, and over 50 percent of its barite imports come from China. Barite is of*

1 critical importance to the hydraulic fracturing (“fracking”) industry, which is vital to the energy independence of the  
2 United States. The United States depends on foreign sources for 100 percent of its gallium, with China producing  
3 around 95 percent of the global supply. Gallium-based semiconductors are indispensable for cellphones, blue and  
4 violet light-emitting diodes (LEDs), diode lasers, and fifth-generation (5G) telecommunications. Like for gallium, the  
5 United States is 100 percent reliant on imports for graphite, which is used to make advanced batteries for cellphones,  
6 laptops, and hybrid and electric cars. China produces over 60 percent of the world’s graphite and almost all of the  
7 world’s production of high-purity graphite needed for rechargeable batteries.

8 For these and other critical minerals identified by the Secretary of the Interior, we must reduce Plaintiffs  
9 vulnerability to adverse foreign government action, natural disaster, or other supply disruptions. Plaintiffs national  
10 security, foreign policy, and economy require a consistent supply of each of these minerals.

11 I therefore determine that Plaintiffs Nation’s undue reliance on critical minerals, in processed or unprocessed  
12 form, from foreign adversaries constitutes an unusual and extraordinary threat, which has its source in substantial part  
13 outside the United States, to the national security, foreign policy, and economy of the United States. I hereby declare a  
14 national emergency to deal with that threat.

15 In addition, I find that the United States must broadly enhance its mining and processing capacity, including  
16 for minerals not identified as critical minerals and not included within the national emergency declared in this order.  
17 By expanding and strengthening domestic mining and processing capacity today, we guard against the possibility of  
18 supply chain disruptions and future attempts by Plaintiffs adversaries or strategic competitors to harm Plaintiffs  
19 economy and military readiness. Moreover, additional domestic capacity will reduce United States and global  
20 dependence on minerals produced in countries that do not endorse and pursue appropriate minerals supply chain  
21 standards, leading to human rights violations, forced and child labor, violent conflict, and health and environmental  
22 damage. Finally, a stronger domestic mining and processing industry fosters a healthier and faster-growing economy  
23 for the United States. Mining and mineral processing provide jobs to hundreds of thousands of Americans whose daily  
24 work allows Plaintiffs country and the world to “Buy American” for critical technology.

25 I hereby determine and order:

26 Section 1. (a) To address the national emergency declared by this order, and pursuant to subsection 203(a)(1)  
27 (B) of IEEPA (50 U.S.C. 1702(a)(1)(B)), the Secretary of the Interior, in consultation with the Secretary of the  
28 Treasury, the Secretary of Defense, the Secretary of Commerce, and the heads of other agencies, as appropriate, shall

1 investigate Plaintiffs Nation’s undue reliance on critical minerals, in processed or unprocessed form, from foreign  
2 adversaries. The Secretary of the Interior shall submit a report to the President, through the Assistant to the President  
3 for National Security Affairs, the Assistant to the President for Economic Policy, and the Assistant to the President for  
4 Trade and Manufacturing Policy, within 60 days of the date of this order. That report shall summarize any conclusions  
5 from this investigation and recommend executive action, which may include the imposition of tariffs or quotas, other  
6 import restrictions against China and other non-market foreign adversaries whose economic practices threaten to  
7 undermine the health, growth, and resiliency of the United States, or other appropriate action, consistent with  
8 applicable law.

9 (b) By January 1, 2021, and every 180 days thereafter, the Secretary of the Interior, in consultation with the  
10 heads of other agencies, as appropriate, shall inform the President of the state of the threat posed by Plaintiffs Nation’s  
11 reliance on critical minerals, in processed or unprocessed form, from foreign adversaries and recommend any  
12 additional actions necessary to address that threat.

13 (c) The Secretary of the Interior, in consultation with the heads of other agencies, as appropriate, is hereby  
14 authorized to submit recurring and final reports to the Congress on the national emergency declared in this order,  
15 consistent with section 401(c) of the NEA (50 U.S.C. 1641(c)) and section 204(c) of IEEPA (50 U.S.C. 1703(c)).

16 Sec. 2. (a) It is the policy of the United States that relevant agencies should, as appropriate and consistent with  
17 applicable law, prioritize the expansion and protection of the domestic supply chain for minerals and the  
18 establishment of secure critical minerals supply chains, and should direct agency resources to this purpose, such that:

19 (i) the United States develops secure critical minerals supply chains that do not depend on resources or  
20 processing from foreign adversaries;

21 (ii) the United States establishes, expands, and strengthens commercially viable critical minerals  
22 mining and minerals processing capabilities; and

23 (iii) the United States develops globally competitive, substantial, and resilient domestic commercial supply  
24 chain capabilities for critical minerals mining and processing.

25 (b) Within 30 days of the date of this order, the heads of all relevant agencies shall each submit a report to the  
26 President, through the Director of the Office of Management and Budget, the Assistant to the President for National  
27 Security Affairs, and the Assistant to the President for Economic Policy, that identifies all legal authorities and  
28 appropriations that the agency can use to meet the goals identified in subsection (a) of this section.

1 (c) Within 60 days of the date of this order, the heads of all relevant agencies shall each submit a report as  
2 provided in subsection (b) of this section that details the agency's strategy for using the legal authorities and  
3 appropriations identified pursuant to that subsection to meet the goals identified in subsection (a) of this section. The  
4 report shall explain how the agency's activities will be organized and how it proposes to coordinate relevant activities  
5 with other agencies.

6 (d) Within 60 days of the date of this order, the Director of the Office of Science and Technology Policy shall  
7 submit a report to the President, through the Director of the Office of Management and Budget, the Assistant to the  
8 President for National Security Affairs, the Assistant to the President for Economic Policy, and the Assistant to the  
9 President for Trade and Manufacturing Policy, that describes the current state of research and development activities  
10 undertaken by the Federal Government that relate to the mapping, extraction, processing, and use of minerals and that  
11 identifies future research and development needs and funding opportunities to strengthen domestic supply chains for  
12 minerals.

13 (e) Within 45 days of the date of this order, the Secretary of State, in consultation with the United States Trade  
14 Representative, shall submit a report to the President, through the Assistant to the President for National Security  
15 Affairs, the Assistant to the President for Economic Policy, and the Assistant to the President for Trade and  
16 Manufacturing Policy, that details existing and planned efforts and policy options to:

17 (i) reduce the vulnerability of the United States to the disruption of critical mineral supply chains through  
18 cooperation and coordination with partners and allies, including the private sector;

19 (ii) build resilient critical mineral supply chains, including through initiatives to help allies build reliable  
20 critical mineral supply chains within their own territories;

21 (iii) promote responsible minerals sourcing, labor, and business practices; and

22 (iv) reduce the dependence of the United States on minerals produced using methods that do not adhere to  
23 responsible mining standards.

24 Sec. 3. The Secretary of the Interior, in consultation with the Secretary of Defense, shall consider whether the  
25 authority delegated at section 306 of Executive Order 13603 of March 16, 2012 (National Defense Resources  
26 Preparedness) can be used to establish a program to provide grants to procure or install production equipment for the  
27 production and processing of critical minerals in the United States.

28 Sec. 4. (a) Within 30 days of the date of this order, the Secretary of Energy shall develop and publish guidance

1 (and, as appropriate, shall revoke, revise, or replace prior guidance, including loan solicitations) clarifying the extent  
2 to which projects that support domestic supply chains for minerals are eligible for loan guarantees pursuant to Title  
3 XVII of the Energy Policy Act of 2005, as amended (42 U.S.C. 16511 et seq.) (“Title XVII”), and for funding awards  
4 and loans pursuant to the Advanced Technology Vehicles Manufacturing incentive program established by section 136  
5 of the Energy Independence and Security Act of 2007, as amended (42 U.S.C. 17013) (“the ATVM statute”). In  
6 developing such guidance, the Secretary:

7 (i) shall consider whether the relevant provisions of Title XVII can be interpreted in a manner that better  
8 promotes the expansion and protection of the domestic supply chain for minerals (including the development of  
9 new supply chains and the processing, remediation, and reuse of materials already in interstate commerce or otherwise  
10 available domestically);

11 (ii) shall examine the meaning of the terms “avoid, reduce, or sequester” and other key terms in section  
12 16513(a) of title 42, United States Code, which provides that the Secretary “may make guarantees under this section  
13 only for projects that — (1) avoid, reduce, or sequester air pollutants or anthropogenic emissions of greenhouse gases;  
14 and (2) employ new or significantly improved technologies as compared to commercial technologies in service in the  
15 United States at the time the guarantee is issued”;

16 (iii) shall consider whether relevant provisions of the ATVM statute may be interpreted in a manner that better  
17 promotes the expansion and protection of the domestic supply chain for minerals (including the development of  
18 new supply chains and the processing, remediation, and reuse of materials already in interstate commerce or otherwise  
19 available domestically), including in such consideration the application of these provisions to minerals determined to  
20 be components installed for the purpose of meeting the performance requirements of advanced technology vehicles; and

21 (iv) shall examine the meaning of the terms “qualifying components” and other key terms in subsection  
22 17013(a) of title 42, United States Code.

23 (b) Within 30 days of the date of this order, the Secretary of Energy shall review the Department of Energy’s  
24 regulations (including any preambles thereto) interpreting Title XVII and the ATVM statute, including the regulations  
25 published at 81 Fed. Reg. 90,699 (Dec. 15, 2016) and 73 Fed. Reg. 66,721 (Nov. 12, 2008), and shall identify all such  
26 regulations that may warrant revision or reconsideration in order to expand and protect the domestic supply  
27 chain for minerals (including the development of new supply chains and the processing, remediation, and reuse of  
28 materials already in interstate commerce or otherwise available domestically). Within 90 days of the date of this order,

1 the Secretary shall propose for notice and comment a rule or rules to revise or reconsider any such regulations for this  
2 purpose, as appropriate and consistent with applicable law.

3 Sec. 5. The Secretary of the Interior, the Secretary of Agriculture, the Secretary of Commerce, the  
4 Administrator of the Environmental Protection Agency, the Secretary of the Army (acting through the Assistant  
5 Secretary of the Army for Civil Works), and the heads of all other relevant agencies shall, as appropriate and consistent  
6 with applicable law, use all available authorities to accelerate the issuance of permits and the completion of projects in  
7 connection with expanding and protecting the domestic supply chain for minerals.

8 Sec. 6. The Secretary of the Interior, the Secretary of Energy, and the Administrator of the Environmental  
9 Protection Agency shall examine all available authorities of their respective agencies and identify any such authorities  
10 that could be used to accelerate and encourage the development and reuse of historic coal waste areas, material on  
11 historic mining sites, and abandoned mining sites for the recovery of critical minerals.

12 Sec. 7. Amendment. Executive Order 13817 is hereby amended to add the following sentence to the end of  
13 section 2(b): “This list shall be updated periodically, following the same process, to reflect current data on supply,  
14 demand, and concentration of production, as well as current policy priorities.”

15 Sec. 8. Definitions. As used in this order:

16 (a) the term “critical minerals” means the minerals and materials identified by the Secretary of the Interior  
17 pursuant to section 2(b) of Executive Order 13817, as amended by this order; and

18 (b) the term “supply chain,” when used with reference to minerals, includes the ePlaintiff 42loration, mining,  
19 concentration, separation, alloying, recycling, and reprocessing of minerals.

20 Sec. 9. General Provisions. (a) Nothing in this order shall be construed to impair or otherwise affect:

21 (i) the authority granted by law to an executive department or agency, or the head thereof; or

22 (ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative,  
23 or legislative proposals.

24 (b) This order shall be implemented consistent with applicable law and subject to the availability of  
25 appropriations.

26 (c) This order is not intended to, and does not, create any right or benefit, substantive or procedural,  
27 enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers,  
28 employees, or agents, or any other person.

*DONALD J. TRUMP*

*THE WHITE HOUSE,*

*September 30, 2020."*

-----

*As The U.S. Government Inspector General's office, The FBI, DOJ, OSC, FTC and FEC are aware, we have filed criminal referrals in this matter and demanded payment for Plaintiffs damages in the state-financed corruption in this matter caused by government employees and contractors exposed in Congressional, FBI, DOJ, OSC, FTC and FEC investigations. This information has been publicly relayed to the news media and the voting population of America and Europe. Former White House executives, U.S. Senators and Department of Energy staff have been proven to have held financial interests in these off-shore mining efforts and federal investigators can swear, warrant, and certify to this fact. Presidential candidates have been proven to have, or now hold, vast assets in Chinese and other foreign corrupt rare-earth mining quid pro quo scams.*

*Plaintiffs Office seeks all responsive records regardless of format, medium, or physical characteristics. In conducting your search, please understand the terms "records," "communications," and "documents" in their broadest sense, to include any written, typed, recorded, graphic, printed, or audio material of any kind. We seek records of any kind, including electronic records, audiotapes, videotapes, and photographs, as well as letters, emails, facsimiles, telephone messages, voice mail messages and transcripts, notes, or minutes of any meetings, telephone conversations or discussions. Plaintiffs request includes any attachments to these records.*

*No category of material should be omitted from search, collection, and production.*

*You may not exclude searches of files or emails in the personal custody of your officials, such as personal email accounts, which are known by Plaintiffs investigators to have been used to attempt to avoid transparency.*

*Records of official business conducted using unofficial systems or stored outside of official files is subject to the Federal Records Act and FOIA. It is not adequate to rely on policies and procedures that require officials to move such information to official systems within a certain period of time; Plaintiffs Office has a right to records contained in those files even if material has not yet been moved to official systems or if officials have, through negligence or willfulness, failed to meet their obligations.*

1 Custodian searches are still required; agencies may not have direct access to files stored in .PST files, outside of  
2 network drives, in paper format, or in personal email accounts. In addition, please note that in conducting a  
3 "reasonable search" as required by law, you must employ the most up-to-date technologies and tools available, in  
4 addition to searches by individual custodians likely to have responsive information. Recent technology may have  
5 rendered the your prior FOIA practices unreasonable. In light of the government-wide requirements to manage  
6 information electronically by the end of 2016, it is no longer reasonable to rely exclusively on custodian-driven  
7 searches.

8 Furthermore, agencies that have adopted the NARA Capstone program, or similar policies, now maintain  
9 emails in a form that is reasonably likely to be more complete than individual custodians' files. For example, a  
10 custodian may have deleted a responsive email from his or her email program, but the GOVT's archiving tools would  
11 capture that email under Capstone. Accordingly, Plaintiffs Office insists that the your offices use the most up-to-date  
12 technologies to search for responsive information and take steps to ensure that the most complete repositories of  
13 information are searched. If any potentially responsive records have been destroyed and/or transferred to other  
14 agencies or offices, such as the National Archives and Records Agency (NARA), then I request copies of the destruction  
15 or transfer slips as well as any other documentation relating to, mentioning or describing said transfer or destruction,  
16 to include but not be limited to confirmation that your offices have no other copies of said records. Under the FOIA  
17 Improvement Act of 2016, agencies must adopt a presumption of disclosure, withholding information "only if . . .  
18 disclosure would harm an interest protected by an exemption" or "disclosure is prohibited by law." If it is your position  
19 that any portion of the requested records is exempt from disclosure, please advise.

20 Plaintiffs Office requests that you provide an index of those documents as required under *Vaughn v. Rosen*,  
21 484 F.2d 820 (D.C. Cir. 1973), cert. denied, 415 U.S. 977 (1974). As you are aware, a Vaughn index must describe  
22 each document claimed as exempt with sufficient specificity "to permit a reasoned judgment as to whether the material  
23 is actually exempt under FOIA." Moreover, the Vaughn index "must describe each document or portion thereof  
24 withheld, and for each withholding it must discuss the consequences of disclosing the sought-after information."  
25 Further, "the withholding agency must supply 'a relatively detailed justification, specifically identifying the reasons why  
26 a particular exemption is relevant and correlating those claims with the particular part of a withheld document to  
27 which they apply.'"

28 See - *Competitive Enter. Inst. v. Office of Sci. & Tech. Policy*, 827 F.3d 145, 149-50 (D.C. Cir. 2016); cf.

1 *Judicial Watch, Inc. v. Kerry* , 844 F.3d 952, 955-56 (D.C. Cir. 2016) *Id.* at 8 ("The Government argues that because  
2 the agency had a policy requiring [the official] to forward all of his emails from his [personal] account to his business  
3 email, the [personal] account only contains duplicate agency records at best. Therefore, the Government claims that  
4 any hypothetical deletion of the [personal account] emails would still leave a copy of those records intact in [the  
5 official's] work email. However, policies are rarely followed to perfection by anyone. At this stage of the case, the Court  
6 cannot assume that each and every work-related email in the [personal] account was duplicated in [the official's] work  
7 email account." (citations omitted))

8 *See- Presidential Memorandum-Managing Government Records*, 76 Fed. Reg. 75,423 (Nov. 28, 2011),  
9 <http://bit.ly/2qOnSLU>; Office of Mgmt. & Budget Exec. Office of the President, Memorandum for the Heads of  
10 Executive Departments & Independent Agencies, "Managing Government Records Directive," M-12-18 (Aug. 24,  
11 2012), <http://bit.ly/2raBimr>

12 *See - FOIA Improvement Act of 2016 § 2* (Pub. L. No. 114-185)

13 *See- Founding Church of Scientology v. Bell* , 603 F.2d 945, 949 (D.C. Cir. 1979)

14 *See - King v. U.S. Dep't of Justice* , 830 F.2d 210, 223-24 (D.C. Cir. 1987) (emphasis in original)

15 *See - Id.* at 224 (citing *Mead Data Central, Inc. v. U.S. Dep't of the Air Force* , 566 F.2d 242, 251 (D.C. Cir.  
16 1977))

17 *In the event some portions of the requested records are properly exempt from disclosure, please disclose any*  
18 *reasonably segregable nonexempt portions of the requested records. If it is your position that a document contains non-*  
19 *exempt segments, but that those non-exempt segments are so dispersed throughout the document as to make segregation*  
20 *impossible, please state what portion of the document is non-exempt, and how the material is dispersed throughout the*  
21 *document. Claims of non-segregability must be made with the same degree of detail as required for claims of*  
22 *exemptions in a Vaughn index. If a request is denied in whole, please state specifically that it is not reasonable to*  
23 *segregate portions of the record for release. In addition to the records requested above, Plaintiffs Office also requests*  
24 *records describing the processing of this request, including records sufficient to identify search terms used and*  
25 *locations and custodians searched and any tracking sheets used to track the processing of this request. If your offices*  
26 *use FOIA questionnaires or certifications completed by individual custodians or components to determine whether they*  
27 *possess responsive materials or to describe how they conducted searches, we also request any such records prepared in*  
28 *connection with the processing of this request.*

1            *You should institute a preservation hold on information responsive to this request.*

2            *Plaintiffs Office intends to pursue all legal avenues to enforce its right of access under FOIA, including*  
3 *litigation and press conferences if necessary. Accordingly, your offices are on notice that litigation is reasonably*  
4 *possible and that Plaintiffs offices have prevailed in past related federal litigation.*

5            *Where possible, please provide responsive material in electronic format by email in PDF format.*

6            *Plaintiffs non-political, criminal investigation, non-commercial public interest Congressional investigation*  
7 *and distribution group requests rolling production of these records as they are located and reviewed. Please be aware*  
8 *that under 5 U.S.C. § 552(a)(6)(A), a FOIA request is considered constructively denied after twenty business days and*  
9 *is subject to an appeal on that basis.*

10           *Fee Waiver*

11           *In accordance with 5 U.S.C. § 552(a)(4)(A)(iii), Plaintiffs Office, and citizen complainants, request a waiver of*  
12 *fees associated with processing this request for records. The subject of this request concerns the operations of the*  
13 *federal government, and the disclosures will likely contribute to a better understanding of relevant government*  
14 *procedures by the general public in a significant way.*

15  
16 *Moreover, Plaintiffs Office provides research to major online news organizations viewed by millions of voters and*  
17 *therefore we are entitled to a fee waiver on the grounds that disclosure of the information sought is in the public*  
18 *interest because it is likely to contribute significantly to public understanding of the operations or activities of the*  
19 *government and is not primarily in the commercial interest of the requester. Regardless, we are willing to pay fees for*  
20 *this request up to \$50 without prior approval. If you estimate that the fees will exceed this limit, please notify us first.*

21

22           ***ePlaintiff 42edited Processing***

23           *Pursuant to 5 U.S.C. § 552(a)(6)(E)(1) and 43 C.F.R. § 2.20(a)(2), Plaintiffs Office requests that your office*  
24 *ePlaintiff 42edite the processing of this request.*

25           *Requests shall receive ePlaintiff 42edited processing when a requester demonstrates "an urgency to inform the*  
26 *public about an actual or alleged Federal Government activity, if made by a person who is primarily engaged in*  
27 *disseminating information." First, Plaintiffs Office is an organization "primarily engaged in disseminating*  
28 *information." (finding that Plaintiffs Office is a "representative of the news media" because it "gathers information of*

1 potential interest to a segment of the public, uses its editorial skills to turn the raw material into distinct work, and  
2 distributes that work to an audience.")

3 We are also investigating criminal activity, for Plaintiffs own litigation and law enforcement reporting, by  
4 employees and contractors of your offices, in that such activity harmed us.

5 See - Mead Data Central, 566 F.2d at 261

6 See - Am. Civil Liberties Union v. Department of Justice, 321 F. Supp.

7 2d 24, 29 n.5 (D.D. Cir. 200))

8 These records are urgently needed to inform the public about actual or alleged government activity.

9 Specifically, Plaintiffs Office contends there exists an urgency to inform the public about what matters of state that were  
10 discussed and that those disclosures are helpful to the current White House Administration and the American public in  
11 their efforts to end political corruption. The courts have found that the issue of news coverage to be especially critical  
12 in determining whether a "compelling need" exists for ePlaintiff 42edited FOIA processing. The Court have asserted  
13 that the "ultimate conclusion" with regards to ePlaintiff 42edited processing relies on important underlying facts, such  
14 as "the credibility of a claimant's allegations regarding government activity, the existence of a threat to physical safety,  
15 or whether an issue is the subject of news coverage."

16 Certification

17 The above information is true and correct to the best of Plaintiffs knowledge.

18 Further Correspondence

19 To ensure that this request is properly construed, that searches are conducted in an adequate but efficient  
20 manner, and that extraneous costs are not incurred, Plaintiffs Office welcomes an opportunity to discuss its request  
21 with you before you undertake your search or incur search or duplication costs. By working together at the outset,  
22 Plaintiffs Office and your offices can decrease the likelihood of costly and time-consuming litigation, and public press  
23 conferences, in the future.

24 This matter affects every voting citizen because, if we can't get justice in America, then no voter will believe  
25 they can either.

26 We look forward to your response.

-----

As if the **Trump** declaration of the multi-trillion dollar value of rare earth minerals was not enough to underscore the victim's assertion about the scope of the corruption issue, the **Biden Administration** has now trumpeted the size of the issue: **Silicon Valley tech oligarchs** control politics, politicians and public policy decisions in order to control ideologies and treasury money distributions. Their bribes pay to keep their monopolies going.

Fuel Cells like those used in the Honda, Toyota, Kia, Hundai, and all other non-Detroit controlled cars, work perfectly but the tech cartel hates them because they beat lithium batteries by miles. Steam, capacitors, air pressure, and hundreds of other energy solutions do not cause the genocides, child labor camps, ePlaintiff 42losions, self-generating fires, cancer-causing smoke and other evils that lithium batteries cause. All alternatives to lithium batteries can be entirely produced domestically. Lithium requires invasions and CIA covert actions in foreign nations that already hate the USA. China, Chile, Afghanistan and other nations have already plotted dog-leash restrictions on U.S. access to rare earth minerals.

Risking the entire fate of America, these tech oligarchs and their surrogates, have spent billions of dollars to nay say every other technology, particularly fuel cells (which they fear most).

China promoted Joe Biden and Barack Obama for President because China knew that they would push electric cars..and China controls the electric car materials resources. Quite a scheme. It

1 is not a question of “If” China will hold the U.S. hostage. It already has.

## 3 U.S. Identifies Vast Mineral Riches in Afghanistan

Tyler Hicks/The New York Times

12 A bleak Ghazni Province seems to offer little, but a Pentagon study says it may have among the world's largest deposits of lithium.

13 By **JAMES RISEN**

14 Published: June 13, 2010

15 WASHINGTON — The United States has discovered nearly \$1 trillion  
16 in untapped mineral deposits in [Afghanistan](#), far beyond any  
17 previously known reserves and enough to fundamentally alter the  
18 Afghan economy and perhaps the Afghan war itself, according to  
19 senior American government officials.

**EXHIBIT 28 – How ANYONE Can Verify These Facts**

Every major federal investigator and intelligence officer has confirmed these facts. Many of them PROVIDED this evidence. Congressional hearings have also proven these facts. Thousands of experts can prove these facts in any equitable jury trial. Everyone has heard of [Mossack Fonseca](https://www.esquire.com/news-politics/politics/a29536656/panama-papers-mossack-fonseca-investigations-russia-trump-organization/) ( <https://www.esquire.com/news-politics/politics/a29536656/panama-papers-mossack-fonseca-investigations-russia-trump-organization/> ) and the [Panama Papers](https://www.icij.org/investigations/panama-papers/new-panama-papers-leak-reveals-mossack-fonsecas-chaotic-scramble/) ( <https://www.icij.org/investigations/panama-papers/new-panama-papers-leak-reveals-mossack-fonsecas-chaotic-scramble/> ) but there are 187+ other crooked CPA firms that Diane Feinstein, Elon Musk, Nancy Pelosi, Larry Page, John Doerr, Steve Westly, Reid Hoffman, et al, use with even [dirtier secrets](https://www.sec.gov/files/Algo_Trading_Report_2020.pdf) ( [https://www.sec.gov/files/Algo\\_Trading\\_Report\\_2020.pdf](https://www.sec.gov/files/Algo_Trading_Report_2020.pdf) ) about stock market rigging and money laundering. [Jeffrey Epstein's](https://www.businessinsider.com/jeffrey-epstein-politicians-connections-donations-2019-7?op=1) ( <https://www.businessinsider.com/jeffrey-epstein-politicians-connections-donations-2019-7?op=1> ) Political Mafia corruptions and perversions are the heart-and-soul of the Cartel that these people operate. The investigators at every federal agency now have this proof IN HAND and the public should demand prosecutions of the criminals or the resignations of any officials running the cover-ups. Plaintiffs stated that, [Since Before 2005, "Plaintiffs Witnessed Social Media Companies Engage in Illegal Campaign Contributions With Their 'Algorithm' Censorship And Blacklisting"](http://testimony111.com/index.php?post/Since-Before-2005%2C-We-Witnessed-Social-Media-Companies-Engage-in-Illegal-Campaign-Contributions-With-Their-Algorithm-Censorship-And-Blacklisting) ( <http://testimony111.com/index.php?post/Since-Before-2005%2C-We-Witnessed-Social-Media-Companies-Engage-in-Illegal-Campaign-Contributions-With-Their-Algorithm-Censorship-And-Blacklisting> ).

Thus the cover-ups are still going on.

<https://justthenews.com/accountability/political-ethics/monfbi-sexcapades-bureau-rocked-illicit-office-romances-workplace>

1 The Plaintiffs have requested, under FOIA law, that all agencies provide all records discussing,  
2 referring, or relating to all meetings or communications between staff and related parties or their  
3 representatives including minutes of those meetings, or any memoranda written about these  
4 meetings by their employees and contractors who were present or have knowledge of these actions  
5 related to the “ *The Obama Administration Vendetta, Reprisal, Revenge Manipulations Of Plaintiffs*  
6 *Funding As Payback For Plaintiffs Provision Of Support To A Criminal Investigation*” per the  
7 following facts as told to the FBI and DOJ in this federal filing.  
8

9 **This is an actual FOIA that has also been stone-walled:**

10 **“Whereas**, numerous Congressional reports, IT staff reports and security industry reports have verified that agency  
11 servers and files, including those upon which Plaintiffs records were housed, have been hacked, moved, deleted and  
12 edited by outside third parties including Chinese and Russian hackers, bored teens and hired opposition research  
13 operatives and that the hardware level back-doors for SPECTRE and many other incursion sets still exist in agency  
14 Cisco, Intel, Juniper Networks and other Network devices now connected to government file networks at GOVT, SSA,  
15 FEC, and other agencies and this fact is indisputable. (The supporting GOVT files are neither lost nor unrecoverable.  
16 The supporting Kleiner Perkins and Greylock case files are neither lost nor unrecoverable. At the very least, China,  
17 Russian or Brazilian teen hackers have them up for sale on the Dark Web. The NSA certainly has copies of them.)

18 FOR THE RECORD:

19 Per the FBI, DOJ, FCC and Congressional investigators:

20 It is widely verified by the U.S. DOJ that hackers such as Wang Dong, Sun Kailiang, Wen Xinyu, Huang Zhenyu, and  
21 Gu Chunhui, who were officers in Unit 61398 of the Third Department of the Chinese People’s Liberation Army (PLA)  
22 and Aleksei Sergeyevich Morenets, 41, Evgenii Mikhaylovich, Serebriakov, 37, Ivan Sergeyevich Yermakov, 32,  
23 Artem Andreyevich Malyshev, 30, and Dmitriy Sergeyevich Badin, 27, who were each assigned to Military Unit 26165,  
24 and Oleg Mikhaylovich Sotnikov, 46, and Alexey Valerevich Minin, 46, who were also GRU officers, and hackers-for-  
25 hire including Kevin David Mitnick, Adrian Lamo, Albert Gonzalez, Matthew Bevan, Richard Pryce, Jeanson James  
26 Ancheta, Michael Calce, Kevin Poulsen, Jonathan James, The hacker known as ASTRA, The hacker known as  
27 GUCIFER, The hacker known as ANON 4CHAN and THOUSANDS of other individuals had free access and free reign  
28 throughout NSA, FBI, SSA, DOJ, OPM, CIA and other government servers via the SPECTRE, EMOTET, PRIME  
ROOTKIT, SERCOMM BACKDOOR, NOTPETYA, MELTDOWN, MASTERKEY, RYZENFALL, FALLOUT,  
CHIMERA, and hundreds of other back doors and penetration vulnerabilities in Cisco, Intel, Juniper Networks, AMD,  
and other equipment. Additionally, all of the core server penetration tools used by the CIA and the NSA were hacked by  
foreign nations and their core source code posted on the internet for all to use.

It is ludicrous for any agency to state that any government servers, prior to 2020, were not widely penetrated and  
manipulated. The hackers are all known to have sold, or provided the results of their work to famous politicians for use  
against their competitors.

Nancy Pelosi is an owner of the hacking manipulation firm: CROWDSTRIKE. Crowdstrike and famous California  
Senators had the easy means, the motivations, the staffing, the resources and the known engagement of services to  
manipulate SSA, DOJ, SEC, FTC and other agency decisions and filing records in order to harm Plaintiffs, reporters  
and whistle-blowers who reported their crimes and corruptions.

( <http://www.opensecrets.org/personal-finances/nancy-pelosi/net-worth?cid=N00007360&year=2011> )

1 ( [https://www.realclearinvestigations.com/articles/2020/10/09/pelosi\\_takes\\_big\\_stake\\_in\\_crowdstrike\\_democrat-tied\\_linchpin\\_of\\_russiagate\\_125557.html](https://www.realclearinvestigations.com/articles/2020/10/09/pelosi_takes_big_stake_in_crowdstrike_democrat-tied_linchpin_of_russiagate_125557.html) )

2 The hackers, daily, use the common tools of:

3 A. Injection. Injection flaws, such as SQL, NoSQL, OS, and LDAP injection, occur when untrusted data is sent to an  
4 interpreter as part of a command or query. The attacker’s hostile data can trick the interpreter into executing unintended  
5 commands or accessing data without proper authorization.

6 B. Broken Authentication. Application functions related to authentication and session management are often  
7 implemented incorrectly, allowing attackers to compromise passwords, keys, or session tokens, or to ePlaintiff 42loit  
8 other implementation flaws to assume other users’ identities temporarily or permanently.

9 C. Sensitive Data exposure. Many web applications and APIs do not properly protect sensitive data, such as financial,  
10 healthcare, and PII. Attackers may steal or modify such weakly protected data to conduct credit card fraud, identity  
11 theft, or other crimes. Sensitive data may be compromised without extra protection, such as encryption at rest or in  
12 transit, and requires special precautions when exchanged with the browser.

13 D. XML External Entities (XXE). Many older or poorly configured XML processors evaluate external entity references  
14 within XML documents. External entities can be used to disclose internal files using the file URI handler, internal file  
15 shares, internal port scanning, remote code execution, and denial of service attacks.

16 E. Broken Access Control. Restrictions on what authenticated users are allowed to do are often not properly enforced.  
17 Attackers can ePlaintiff 42loit these flaws to access unauthorized functionality and/or data, such as access other users’  
18 accounts, view sensitive files, modify other users’ data, change access rights, etc.

19 F. Security Misconfiguration. Security misconfiguration is the most commonly seen issue. This is commonly a result of  
20 insecure default configurations, incomplete or ad hoc configurations, open cloud storage, misconfigured HTTP headers,  
21 and verbose error messages containing sensitive information. Not only must all operating systems, frameworks,  
22 libraries, and applications be securely configured, but they must be patched/updated in a timely fashion.

23 G. Cross-Site Scripting XSS. XSS flaws occur whenever an application includes untrusted data in a new web page  
24 without proper validation or escaping, or updates an existing web page with user-supplied data using a browser API that  
25 can create HTML or JavaScript. XSS allows attackers to execute scripts in the victim’s browser which can hijack user  
26 sessions, deface web sites, or redirect the user to malicious sites.

27 H. Insecure Deserialization. Insecure deserialization often leads to remote code execution. Even if deserialization flaws  
28 do not result in remote code execution, they can be used to perform attacks, including replay attacks, injection attacks,  
and privilege escalation attacks.

I. Using Components with Known Vulnerabilities. Components, such as libraries, frameworks, and other software  
modules, run with the same privileges as the application. If a vulnerable component is ePlaintiff 42loited, such an attack  
can facilitate serious data loss or server takeover. Applications and APIs using components with known vulnerabilities  
may undermine application defenses and enable various attacks and impacts.

J. Insufficient Logging & Monitoring. Insufficient logging and monitoring, coupled with missing or ineffective  
integration with incident response, allows attackers to further attack systems, maintain persistence, pivot to more  
systems, and tamper, extract, or destroy data. Most breach studies show time to detect a breach is over 200 days,  
typically detected by external parties rather than internal processes or monitoring.

**Whereas**, Staff within the Department of Energy, including those who worked directly with Lachlan Seward, Steven  
Chu and other top executives and at The White House have revealed the insider corruption schemes, at those offices, to  
Plaintiffs and Plaintiffs investigators.

1 **Whereas**, Plaintiffs own elected Senate and Congressional representatives have had their staff arrested for spying for  
2 China and a shocking number of the companies in this scam now belong to Chinese interests via strange machinations,  
per CBS News, and this fact is indisputable.

3 **Whereas**, Plaintiffs own elected Senate and Congressional representatives have had their staff engage the services of  
4 Fusion GPS and other spy agency-like services to attack Plaintiffs and competitive adversaries who competed with their  
campaign financiers and this fact is indisputable.

5 **Whereas**, Silicon Valley has a “mafia-like” organization known in the news media as “*The PayPal Mafia*”, AKA “*The*  
6 *Deep State*”, AKA “*The Silicon Valley Tech Mafia*”, which is known to exist by their shared communications to  
organize a private agenda; their shared use of the same banks, CPA’s, lobbyists, corrupt tech law firms and political  
7 operatives; their shared statements of agenda at tech conferences; their shared black-lists on Venture Beat, Gust, Google  
8 Docs and “Angelgate” (Disclosed by the founder of Tech Crunch) collusion meeting venues; and FBI research. It is  
widely documented that member Reid Hoffman funds street riots and that boss Eric Schmidt manipulates intelligence  
agency resources for political and profiteering personal goals. The DOJ-produced “*Silicon Valley No Poaching*” class-  
action case deeply discusses this group and their collusion and these facts are indisputable.

9 **Whereas**, “*The Silicon Valley Tech Mafia*” bosses James Bronkema, Tom Perkins and members of Greylock Capital  
10 did disclose the existence of this active, organized, collusion-based “*Silicon Valley Tech Mafia*” organization, which is  
operating in violation of federal RICO laws, to Plaintiffs and solicited their membership. Photographs of the members  
11 dressed as Mafia godfathers, to glorify their intent, and their emails and tech conference statements very clearly refer to  
their intent to emulate an organized crime entity. Steven Greer, a “*cover-up expert*” has multiple feature films on Netflix  
12 about a Cabal of these people setting out to control technology industries. Jeffrey Epstein was a favored member of this  
group. Over 10,000 news articles feature disturbing research about the actions and agenda of this group of sociopath frat  
13 boy billionaires and these facts are indisputable.

14 **Whereas**, Plaintiffs own elected Senate and Congressional representatives family members have stayed at Plaintiffs  
15 home and dated Plaintiffs and obviously relayed deep operational information to Plaintiffs about the activities of other  
family members and this fact is indisputable.

16 **Whereas**, Plaintiffs own elected Senate and Congressional representatives have placed over \$100 Million of profits in  
17 their family bank accounts based on business investments in direct competition to Plaintiffs and this fact is indisputable.

18 **Whereas**, Plaintiffs properly filed Applications from 2007 forward were stalled, with-held, delayed, blocked, denied,  
19 manipulated and reprisal-distorted to revenge-punish Plaintiffs for Plaintiffs 2007 assistance to law enforcement in a  
major bribery and payola investigation involving State and Federal treasury funds and stock manipulations by Plaintiffs  
own elected representatives and this fact is indisputable.

20 **Whereas**, Plaintiffs own elected Senate and Congressional representatives engaged in a very public battle with the  
Central Intelligence Agency involving the hacking of each other’s computers and this fact is indisputable.

21 **Whereas**, Plaintiffs hired Covington and Burling, including Bruce Demming and Plaintiffs associates, to describe “how  
22 it all works In Washington” and how Eric Holder and Steven Chu were placed in their positions by Covington and  
Burling.

23 **Whereas**, The President of The United States is currently engaged in a highly public battle with the FBI, CIA and third  
24 parties over the abuse of top spy agency and law enforcement agencies for political vendetta purposes and this fact is  
indisputable and proves, at the highest, level that federal agency bosses regularly use federal agency resources, such as  
25 GOVT agency bosses, for harms against citizens.

26 **Whereas**, public news reports and Congressional Special Committee reports prove that previous White House staff and  
27 Plaintiffs own elected Senate and Congressional representatives have engaged in tens of millions of dollars of spy  
agency-type harassment, defamation, opposition research, character assassination, hacking and decision manipulation  
28 using taxpayer and third-party contractor resources and this fact is indisputable.

1 **Whereas**, Jofi Joseph, and over 20 other Obama Administration officials, were whistle-blowers about activities within  
2 the Obama White House and exposed such activities voluminously on social media and in covert Google docs accounts.  
3 They, along with articles such as: [https://theintercept.com/2016/04/22/googles-remarkably-close-relationship-with-the-](https://theintercept.com/2016/04/22/googles-remarkably-close-relationship-with-the-obama-white-house-in-two-charts/)  
4 [obama-white-house-in-two-charts/](https://theintercept.com/2016/04/22/googles-remarkably-close-relationship-with-the-obama-white-house-in-two-charts/) and FBI and FTC reports revealed that fact that Google/YouTube/Alphabet/Et Al  
5 controlled and staffed most of the Obama White House. **Google Boss Larry Page and Tesla Boss Elon Musk were co-**  
6 **investors, bromance boyfriends, collaborative lobbyists and had a shared agenda and controlled White House and**  
7 **GOVT decisions.** Google ‘advised’ Mckinsey and Covington and Burling on the hiring for the White House and The  
8 U.S. Government with all of their friends. The Google global media control system hides any good news about Tesla’s  
9 competitors, especially Plaintiffs, and authors defamation and attack videos and hit job articles and puts those attack  
10 media items at the top of all Google and Youtube search results. They openly bragged about it. (  
11 <https://truthstreammedia.com/2013/06/02/googles-regime-change-agent-jared-cohen/> ). Google is a criminal empire that  
12 told the Obama White House and Department of Energy what to do!

13 **Whereas**, Plaintiffs have no affiliation with any political party and Plaintiffs only personal political agenda is to “end  
14 political corruption and crony capitalism via 100% legal innovation efforts”.

15 **Whereas**, one of Plaintiffs lawyers now works in the White House and sued GOVT, and GOVT and SSA staff knew of  
16 this and those staff ordered retribution holds or manipulations of Plaintiffs rights and funding because they hate the  
17 current President of the United States for personal reasons as their emails, social media, voting records and events  
18 participation proves and this fact is indisputable.

19 **Whereas**, Plaintiffs, as part of a group of Plaintiffs, won a federal lawsuit against The U.S. Government and GOVT  
20 proving that Plaintiffs Applications for funding were manipulated by agencies infected with corruption, bias, favoritism  
21 and crony capitalism and this fact is indisputable.

22 **Whereas**, No known party within, or consulting to the U.S. Department of Energy, for Plaintiffs application reviews,  
23 since 2007, is not politically opposed to any person opposing the Obama White House Administration and Plaintiffs did  
24 participate in a successful lawsuit against corruption in the Obama White House and THUS each and EVERY GOVT  
25 staffer who reviewed Plaintiffs benefits applications was conflicted in their interests, including the GOVT IG office,  
26 and unqualified to do so and this fact is indisputable.

27 **Whereas**, The IRS lost the very public legal “Lois Lerner” case which proved that the White House regularly uses its  
28 power to manipulate federal agencies in order to target those that are disliked in the public and that similar cases and IG  
reports have proven this across every agency and the GOVT and this fact is indisputable.

**Whereas**, numerous Senate and White House letters on official letterhead and videos and press photography prove that  
Plaintiffs have had a decades long relationship with White House, Department of Energy senior officials (Ranging from  
Warren Buffet, To Hillary Clinton, To Monica Lewinsky’s hiring manager, to Mayor’s of San Francisco to seated  
White House Vice Presidents , et al) and, thus, had adequate access to knowledge of deep operations and crimes within  
those offices and this fact is indisputable.

**It is thus well known and proven that:**

1. Plaintiffs applications since 2007 were illegally stalled, with-held, delayed, blocked, denied, manipulated and  
reprisal-distorted to punish Plaintiffs for their assistance to law enforcement in a major bribery and payola investigation  
involving State and Federal treasury funds and stock manipulations by Plaintiffs own elected representatives and GOVT  
staff beholden to those officials.

2. Plaintiffs are Federal Witnesses and Whistle-blowers in an active, ongoing federal corruption investigation who has  
had their rights to a lawyer and other civil rights blocked. By blocking Plaintiffs funds AND blocking their rights AND  
disabling Plaintiffs with these attacks and subverting their access to federal Legal Services Corporation-provided legal  
support and by black-listing law-firms who sought to help Plaintiffs, a violation of Plaintiffs State and Federal  
Constitutional Rights has been undertaken.

1 3. Operational command and control of hacking services, GOVT decision procedures and practices, file manipulations,  
2 records deletions and related manipulations of Plaintiffs applications are clearly proven and sourced to Plaintiffs own  
elected Senate and Congressional representatives, GOVT officials and White House staff.

3 **Therefore:**

4 **It is demanded that Plaintiffs full retroactive awards and global potential profits from their vehicle**  
5 **manufacturing and energy companies from 2007 forward, including damages, be provided at this time per the**  
6 **provided comparative calculation metrics document.**

7 **Plaintiffs are seeking to settle this matter rapidly with an agreed upon financial amount to cover damages and**  
8 **back-monies owed but we will legally collect the funds from the GOVT and federal accounts in any case. Since**  
9 **GOVT has previously wired funds to Plaintiffs projects, it should be a trivial matter to transfer those funds in**  
10 **order to finalize this matter.**

11 Re: The **comparative calculation metrics**: The damages amounts in the attached report are based on fully verified,  
12 government reported values from carbon credit sales, revenues, stock market exploitation of GOVT funding matters and  
13 other profit GAAP reported amounts and FBI revealed sums, from December 2008 to today, that the GOVT-crony  
14 competitors and their investors made in documented profits, revenues, tax write-offs, tax waivers and other upsides that  
15 Plaintiffs lost because of the corruption damages, rights blockades and reprisal attacks. Additionally, damages from  
16 benefit funds blockades, black-lists and other losses of revenue are incorporated in those standards-based, court  
17 precedent comps. Additionally, monies owed for whistle-blower and federal informant fees are calculated per industry  
18 precedents (such as the Walter T. Department of Energy whistle-blower award ( [https://www.latimes.com/nation/la-na-](https://www.latimes.com/nation/la-na-hanford-whistleblower-settlement-20150813-story.html)  
19 [hanford-whistleblower-settlement-20150813-story.html](https://www.latimes.com/nation/la-na-hanford-whistleblower-settlement-20150813-story.html)) and the known annual budget for FBI informant payments  
20 provided to Congress in previous budget reports). Plaintiffs provided the documented case evidence to federal  
21 investigators since 1986. Additionally, salary losses based on the averaged CEO salaries of the CEO of Tesla Motors,  
22 Fisker Motors, Bloom Energy, Solyndra and General Motors are included as industry standards for the energy and  
23 automotive market in the same time-frame. Additionally, standard pain and suffering inclusions are incorporated.

24 The filed FOIA's require that each agency provide all records of review of bias or conflict of interest, since 2007, in  
25 Plaintiffs application and federal dispute processes.

26 The FOIA's seek all responsive records regardless of format, medium, or physical characteristics. In conducting your  
27 search, please understand the terms "records," "communications," and "documents" in their broadest sense, to include  
28 any written, typed, recorded, graphic, printed, or audio material of any kind. Plaintiffs seek records of any kind,  
including electronic records, audiotapes, videotapes, and photographs, as well as letters, emails, facsimiles, telephone  
messages, voice mail messages and transcripts, notes, or minutes of any meetings, telephone conversations or  
discussions. Plaintiffs request  
includes any attachments to these records.

No category of material should be omitted from search, collection, and production. You may not exclude searches of  
files or emails in the personal custody of your officials, such as personal email accounts, which are known by Plaintiffs  
investigators to have been used to attempt to avoid transparency.

Records of official business conducted using unofficial systems or stored outside of official files is subject to the  
Federal Records Act and FOIA. It is not adequate to rely on policies and procedures that require officials to move such  
information to official systems within a certain period of time; Plaintiffs Office has a right to records contained in those  
files even if material has not yet been moved to official systems or if officials have, through negligence or willfulness,  
failed to meet their obligations.

Custodian searches are still required; agencies may not have direct access to files stored in .PST files, outside of  
network drives, in paper format, or in personal email accounts. In addition, please note that in conducting a "reasonable  
search" as required by law, you must employ the most up-to-date technologies and tools available, in addition to  
searches by individual custodians likely to have responsive information. Recent technology may have rendered the your  
prior FOIA practices unreasonable. In light of the government-wide requirements to manage information electronically

1 by the end of 2016, it is no longer reasonable to rely exclusively on custodian-driven searches.

2 Furthermore, agencies that have adopted the NARA Capstone program, or similar policies, now maintain emails in a  
3 form that is reasonably likely to be more complete than individual custodians' files. For example, a custodian may have  
4 deleted a responsive email from Plaintiffs or her email program, but the GOVT's archiving tools would capture that  
5 email under Capstone. Accordingly, Plaintiffs Office insists that the your offices use the most up-to-date technologies to  
6 search for responsive information and take steps to ensure that the most complete repositories of information are  
7 searched. If any potentially  
8 responsive records have been destroyed and/or transferred to other agencies or offices, such as the National Archives  
9 and Records Agency (NARA), then I request copies of the destruction or transfer slips as well as any other  
10 documentation relating to, mentioning or describing said transfer or destruction, to include but not be limited to  
11 confirmation that your offices have no other copies of said records. Under the FOIA Improvement Act of 2016,  
12 agencies must adopt a presumption of disclosure, withholding information "only if . . . disclosure would harm an  
13 interest protected by an exemption" or  
14 "disclosure is prohibited by law." If it is your position that any portion of the requested records is exempt from  
15 disclosure, please advise.

16 Plaintiffs Office has requested that you provide an index of those documents as required under Vaughn v. Rosen, 484  
17 F.2d 820 (D.C. Cir. 1973), cert. denied, 415 U.S. 977 (1974). As you are aware, a Vaughn index must describe each  
18 document claimed as exempt with sufficient specificity "to permit a reasoned judgment as to whether the material is  
19 actually exempt under FOIA." Moreover, the Vaughn index "must describe each document or portion thereof withheld,  
20 and for each withholding it must discuss the consequences of disclosing the sought-after information." Further, "the  
21 withholding agency must supply 'a relatively detailed justification, specifically identifying the reasons why a particular  
22 exemption is relevant and correlating those claims with the particular part of a withheld document to which they apply.'"

23 See - Competitive Enter. Inst. v. Office of Sci. & Tech. Policy , 827 F.3d 145, 149-50 (D.C. Cir. 2016); cf. Judicial  
24 Watch, Inc. v. Kerry , 844 F.3d 952, 955-56 (D.C. Cir. 2016) Id. at 8 ("The Government argues that because the agency  
25 had a policy requiring [the official] to forward all of his emails from his [personal] account to his business email, the  
26 [personal] account only contains duplicate agency records at best. Therefore, the Government claims that any  
27 hypothetical deletion of the [personal account] emails would still leave a copy of those records intact in [the official's]  
28 work email. However, policies are rarely followed to perfection by anyone. At this stage of the case, the Court cannot  
assume that each and every work-related email in the [personal] account was duplicated in [the official's] work email  
account." (citations omitted))

See- Presidential Memorandum-Managing Government Records, 76 Fed. Reg. 75,423 (Nov. 28, 2011),  
<http://bit.ly/2qOnSLU>; Office of Mgmt. & Budget Exec. Office of the President, Memorandum for the Heads of  
Executive Departments & Independent Agencies, "Managing Government Records Directive," M-12-18 (Aug. 24,  
2012), <http://bit.ly/2raBimr>

See - FOIA Improvement Act of 2016 § 2 (Pub. L. No. 114-185)

See- Founding Church of Scientology v. Bell , 603 F.2d 945, 949 (D.C. Cir. 1979)

See - King v. U.S. Dep't of Justice , 830 F.2d 210, 223-24 (D.C. Cir. 1987) (emphasis in original)

See - Id. at 224 (citing Mead Data Central, Inc. v. U.S. Dept of the Air Force , 566 F.2d 242, 251  
(D.C. Cir. 1977))

In the event some portions of the requested records are properly exempt from disclosure, please disclose any reasonably  
segregable nonexempt portions of the requested records. If it is your position that a document contains non-exempt  
segments, but that those non-exempt segments are so dispersed throughout the document as to make segregation  
impossible, please state what portion of the document is non-exempt, and how the material is dispersed throughout the  
document. Claims of non-segregability must be made with the same degree of detail as required for claims of  
exemptions in a Vaughn index.

1 If a request is denied in whole, please state specifically that it is not reasonable to segregate portions of the record for  
2 release. In addition to the records requested above, Plaintiffs Office also requests records describing the processing of  
3 this request, including records sufficient to identify search terms used and locations and custodians searched and any  
4 tracking sheets used to track the processing of this request.

5 If your offices use FOIA questionnaires or certifications completed by individual custodians or components to  
6 determine whether they possess responsive materials or to describe how they conducted searches, we also request any  
7 such records prepared in connection with the processing of this request.

8 You should institute a preservation hold on information responsive to this request.

9 Plaintiffs Office intends to pursue all legal avenues to enforce its right of access under FOIA and damages recovery,  
10 including litigation and press conferences if necessary. Accordingly, your offices are on notice that litigation is  
11 reasonably possible and that Plaintiffs offices have prevailed in past related federal litigation.

12 Where possible, please provide responsive material in electronic format by email in PDF format. Plaintiffs non-political,  
13 criminal investigation, non-commercial public interest Congressional investigation and distribution group requests  
14 rolling production of these records as they are located and reviewed.

15 Please be aware that under 5 U.S.C. § 552(a)(6)(A), a FOIA request is considered constructively denied after twenty  
16 business days and is subject to an appeal on that basis.

#### 17 **Fee Waiver**

18 In accordance with 5 U.S.C. § 552(a)(4)(A)(iii), Plaintiffs Office, and citizen complainants, request a waiver of fees  
19 associated with processing this request for records. The subject of this request concerns the operations of the federal  
20 government, and the disclosures will likely contribute to a better understanding of relevant government procedures by  
21 the general public in a significant way. Moreover, Plaintiffs Office provides research to major online news  
22 organizations viewed by millions of  
23 voters and therefore we are entitled to a fee waiver on the grounds that disclosure of the information sought is in the  
24 public interest because it is likely to contribute significantly to public understanding of the operations or activities of the  
25 government and is not primarily in the commercial interest of the requester. Regardless, we are willing to pay fees for  
26 this request up to \$50 without prior approval. If you estimate that the fees will exceed this limit, please notify us first.

#### 27 **ePlaintiff 42edited Processing**

28 Pursuant to 5 U.S.C. § 552(a)(6)(E)(1) and 43 C.F.R. § 2.20(a)(2), Plaintiffs Office requests that your office ePlaintiff  
42edite the processing of this request.

Requests shall receive ePlaintiff 42edited processing when a requester demonstrates "an urgency to inform the public  
about an actual or alleged Federal Government activity, if made by a person who is primarily engaged in disseminating  
information." First, Plaintiffs Office is an organization "primarily engaged in disseminating information." (finding that  
Plaintiffs Office is a "representative of the news media" because it "gathers information of potential interest to a segment  
of the public, uses its editorial skills to turn the raw material into distinct work, and distributes that work to an  
audience.")

Plaintiffs are also investigating criminal activity, for Plaintiffs own litigation and law enforcement reporting, by  
employees and contractors of your offices, in that such activity harmed us.

See - Mead Data Central, 566 F.2d at 261

See - Am. Civil Liberties Union v. Department of Justice, 321 F. Supp.  
2d 24, 29 n.5 (D.D. Cir. 200))

These records are urgently needed to inform the public about actual or alleged government activity. Specifically,  
Plaintiffs Office contends there exists an urgency to inform the public about what matters of state that were discussed

1 and that those disclosures are helpful to the current White House Administration and the American public in their  
2 efforts to end political corruption. The courts have found that the issue of news coverage to be especially critical in  
3 determining whether a "compelling need" exists for ePlaintiff 42edited FOIA processing. The Court have asserted that  
4 the "ultimate conclusion" with regards to ePlaintiff 42edited processing relies on important underlying facts, such as  
5 "the credibility of a claimant's allegations regarding government activity, the existence of a threat to physical safety, or  
6 whether an issue is the subject of news coverage."

7 **Certification**

8 The above information is true and correct to the best of Plaintiffs knowledge.

9 **Further Correspondence**

10 To ensure that this request is properly construed, that searches are conducted in an adequate but efficient manner, and  
11 that extraneous costs are not incurred, Plaintiffs Office welcomes an opportunity to discuss its request with you before  
12 you undertake your search or incur search or duplication costs. By working together at the outset, Plaintiffs Office and  
13 your offices can decrease the likelihood of costly and time-consuming litigation, and public press conferences, in the  
14 future.

15 This matter affects every voting citizen because, if we can't get justice in America, then no voter will believe they can  
16 either. Plaintiffs have made certain that every voters does know the facts of this matter via mass social media.

17 For additional confirmation of precedents confirming Plaintiffs rights to this data, please review the following:

18 See - Al-Fayed v. Central Intelligence Agency, 254 F.3d 300, 306 (D.C. Cir. 2001) (Al-Fayed) Id. at

26 **Demand And Confirmation Of Intent:**

27 To be clear, this is not simply a FOIA request. Many FOIA requests have already been filed.

28 This is a **DEMAND FOR HUMAN RIGHTS AND CONSTITUTIONAL RIGHTS DAMAGES PAYMENTS AND  
REINSTATEMENT OF BLOCKADED RIGHTS!**

**THIS IS ALSO A DEMAND FOR STATE SPONSORED LEGAL COUNSEL AND FINANCIAL SERVICES  
SUPPORT AND/OR FOR DOJ TO TAKE ON THIS CASE AND REPRESENT Plaintiffs**

**Notes:**

Every single person at The U.S. Government is familiar with this case, the cover-ups and Plaintiffs ability to bring FBI and SEC-class investigations and punishments to bear. It is foolish for any party at GOVT or DOJ to deny knowledge of this matter. Thousands of movies, newscasts, articles, FBI reports and Congressional reports cover this matter in great detail and they ALL reach the same conclusion that crimes were committed by GOVT and White House staff and cover-ups are ongoing. It is a proven fact that EVERY major official and staffer at GOVT is dedicated to operating a cover-up of these crimes and they intend to offer no resources or aid. They are shredding documents and deleting hard drives as fast as they can but hackers are widely known to have harvested all evidence from GOVT servers years ago.

1 Congressional IT reports confirm this. The evidence exists in the hands of third parties and often suddenly appears on Wikileaks and other repositories.

2 Federal, Congressional, Law enforcement and forensic experts have already begun collection/garnishment development  
3 for these funds. A settlement today will eliminate great pain and shame for EVERY person at agencies, later. Please  
ePlaintiff 42edite settlement proceedings for the sake of all concerned.

4 Due to the novel creation and construction of the Section 136 funds bank account, the government can neither move,  
5 remove, block off nor delay this effort. As you are aware, multiple Presidents and billionaires have tried to do so and  
none of them, from either party, could touch it, so no party should even think about trying to hide or redirect the money.

6 The largest number of search engine results, across the globe, on EVERY search engine, about **ANY** public agency  
7 have to do with the “**Department of Energy Green Corruption**”. This reality will keep that legacy going for the rest of  
8 time. You can settle this now or watch what happens when millions of citizens crowd-source an anti-corruption process,  
100% legally, using their home computers and cell phones. Do public officials really want their name right next to  
Steven Chu’s black-stained profile for all of time?

9 Every SINGLE thing Plaintiffs told GOVT that was going to happen in 2008 HAS happened. The cases WERE payola.  
10 The batteries DID blow-up! Afghanistan WAS totally corrupt! Solyndra WAS a Scam! Chu DID blockade Fuel Cells to  
help Musk! GOVT staff WERE hiding corruption plans in their private emails and text messages! The GOVT servers  
11 WERE hacked over 200 times! The IBM Consulting Service WAS conducting manipulated reviews! Steve Rattner  
WAS a crook! Etc, etc, etc!...History and Congressional investigations have proven that GOVT was wrong on 100% of  
12 the assumptions and Plaintiffs have been proven 100% right.

13 The crimes, and the circumstances of the Plaintiffs of these crimes, must be made right TODAY, or each politician, and  
their staff, will become what corrupt Steven Chu and indicted Eric Holder have become in the history books: **Political  
14 Stains!** What will the legacy be of those we are asking to resolve this be? Plaintiffs asked Steven Chu that TO HIS  
FACE in 2009. Plaintiffs all know the answer now.

15 If Plaintiffs have to execute the garnishment taking of their funds and the shaming of each individual involved in the  
16 crimes and cover-ups, 100% legally, the headaches will last forever! Cancel culture is only a hint of it. Lawsuits are just  
a tiny part of it. Public shame, indictments and midnight visits from the FBI barely describe how bad it can get for the  
17 felon public agency staff that manipulate Democracy.

18 Some past efforts have been funded by anonymous billionaires who fund 501 C 3 and 501 C 4 charities by paying  
outside lawyers directly or requesting pro bono services. Steve Jobs widow and Bezo’s ex wife, alone, have the  
19 financial resources to fund the largest lawsuits and private investigator teams in “*the history of the world*”. There are  
now THOUSANDS of such activist billionaires. Plaintiffs intend to go to every one, everywhere in the world, to get an  
20 anti-corruption program underway and agency offices who continue cover-ups may end up being VERY sad that they  
did not settle this when they could.

21 Do Defendants want to face that kind of legal warfare for the rest of their lives when this can all be settled, to Plaintiffs  
22 satisfaction, with one check of far lower expense, TODAY?

23 It is a waste of taxpayerfunds and resources to allow the hubris of crooked Senator’s and insane Silicon Valley search  
engine billionaires to exacerbate this case endlessly because they are pissed off that they got caught doing crimes. Since  
24 Congress shows no interest in supporting the law, proposed by Plaintiffs, to curtail hit-jobs and collusion by billionaires,  
then one must assume that the opportunity to use those measures goes both ways.

25 This **human rights** and **legal rights** effort has been accomplished with an ad hoc CIA/FBI-type team of reporters,  
26 intelligence officers, FBI agents, lawyers, forensic researchers, AI corruption-hunting digital database engines, private  
investigators, inside whistle-blowers, ICIJ investigative reporters and **any** member of the public that wishes to join the  
27 crowd-sourced research and authoring efforts. Members of Congress helped create this effort. ANYBODY is allowed to  
help us. These are ad hoc common-interest parties who have assembled a forensic research team known as *The  
28 Advanced Voluntary Electronic National Group-Excellence Reinforcement Services*. Modern AI engines at Stanford,  
CERN and other universities hum all night long tracking down political crooks like a million XKEYSCORE (

1 <https://en.wikipedia.org/wiki/XKeyscore> ) DB engines on steroids. EVERY public official must ask themselves: “**What**  
2 **side of the chart do I want to be on when these algorithms spit out the results of every dime in all my secret accounts,**  
3 **anywhere on Earth, and covert stock market interests, I have transacted and taken through secret conduits, covert**  
4 **real estate scams and PACs”? A large number of active FBI, CIA, DOJ, SEC and other agency personnel are**  
5 supportive of Plaintiffs 100% legal anti-corruption effort because they too disdain criminals operating within Plaintiffs  
6 Democracy.

Plaintiffs are available for any and all meetings with Senior White House, FBI, DOJ, SEC, Congressional and related  
agency staff who have federal “Q-Sensitive” security clearance, provided that the State has provided Plaintiffs with an  
equitable law firm to represent him as counsel and appropriate financial representatives. Plaintiffs must make certain  
that he is aware which side, any party who contacts him, is on. There are only two sides: 1.) *The Cover-up Operators*  
and 2.) *The Prosecutors*, each type proves their intent by their actions...”

1 **EXHIBIT 28 - The Political Payola Money Laundering And Stock**  
2 **Manipulations**

3  
4 **Laundering The Politicians Dirty Cash**

5 Billions of dollars of payola in this case has been laundered via U.S. real estate transactions in the  
6 last five years, according to a new report by a Washington, D.C.-based think tank. Senators Pelosi,  
7 Harris, Feinstein, Reed and their associates own some of the larges swathes of illicit money  
8 laundered real estate in America.

9  
10 By using a database of over 100 publicly reported real estate money laundering cases in the U.S.,  
11 United Kingdom and Canada, Global Financial Integrity says the U.S. has become a preferred  
12 destination for those looking to use real estate to stash illicit funds — making it a “Kleptocrat’s  
13 dream.”

14  
15  
16 Public officials and their associates, known as “*politically exposed persons*”, were involved in more  
17 than half of the U.S. cases that GFI reviewed. Those PEPs include Genaro García Luna, a former  
18 Mexican security minister who bought millions of dollars of U.S. property while accused of taking  
19 bribes from the Sinaloa cartel, and the stepson of former Malaysian Prime Minister Najib Razak,  
20 who was arrested in 2019 for his alleged role in the 1MDB scandal.

21  
22  
23 “[Real estate] provides a really easy way to hide ill-gotten gains with little oversight and few  
24 questions asked,” GFI policy director Lakshmi Kumar told the International Consortium of  
25 Investigative Journalists. “If you’re a criminal, why would you not choose a method that allows you  
26 to flaunt your wealth openly, but also hide its illicit nature?”  
27  
28

1 The U.S. was once considered at the regulatory forefront when it came to preventing money  
2 laundering through real estate, adding “persons involved in real estate closings and settlements” to  
3 the Bank Secrecy Act’s definition of financial institutions in 1988. But over time, Kumar says, the  
4 country lost ground to its peers in the U.K. and Europe.

5  
6 “This is clearly a systemic issue globally,” Kumar said. “Everyone’s discovering how easy it is to  
7 use and abuse the real estate sector. The difference is that everyone else seems to have charted a  
8 path forward. They have put in legislation they’re trying to figure it out. In the U.S., we’re still held  
9 back.”  
10

11  
12 One of the biggest issues that the report cites is the use of geographic targeting orders as the U.S.’s  
13 primary tool to identify potential money laundering events. GTOs impose reporting requirements on  
14 real estate purchases, but only in narrowly targeted scenarios — large cash purchases by legal  
15 entities in specific geographic areas.  
16

17  
18 More than 60% of the U.S. cases examined in the report involved properties in at least one county  
19 not covered by a targeting order, which GFI says highlights the inadequacy of the system.  
20

21 “A lot of the money laundering cases we saw reported in the U.K. and Canada were really  
22 concentrated in what you’d call real estate hubs in the country,” Kumar said. “In the U.S., that was  
23 not the case. It was spread far and wide.”  
24

25  
26 Another concern the report outlines is that the U.S. anti-money laundering regime is focused on  
27 residential purchases, when a significant portion of the cases GFI reviewed involve commercial real  
28 estate transactions.

1  
2 The FinCEN Files, an investigation on global dirty money flows by ICIJ and BuzzFeed News,  
3 examined the impact of large-scale money laundering on middle America.

4  
5 ICIJ found that Ukrainian oligarch Ihor Kolomoisky, whose case is cited in GFI’s report, amassed a  
6 Midwest real estate empire with his associates, at one time becoming Cleveland’s largest  
7 commercial landlords, and leaving behind a trail of unpaid property taxes, unemployed workers and  
8 dangerous factory conditions. Kolomoisky has since been sanctioned by the U.S. State Department.

9  
10  
11 Kumar said that because commercial deals often involve several parties and complex financing  
12 arrangements, they are an easy way to stash illicit money.

13  
14 “When you talk about residential real estate, the heart of it is identifying who is the beneficial  
15 owner, [because] if you find out who the beneficial owner is, it also tells you who the criminal is,”  
16 Kumar told ICIJ. “In a commercial real estate investment, you don’t have to own the majority stake  
17 to be a criminal. You can own 2% of a \$500 million property, and you are [still] laundering millions  
18 through it.”  
19

20  
21 The report also delves into the involvement of “gatekeepers” in real estate transactions and the  
22 direct role of real estate agents, lawyers and accountants in facilitating illicit transactions. But GFI  
23 also points to regulating private investment advisers as a more under-the-radar way of tackling real  
24 estate money laundering.  
25

26  
27 “Investment vehicles are one of the key methods in which to invest in commercial real estate in this  
28 country,” Kumar said. “And private equity, venture capital [and] hedge funds have no [anti-money

1 laundering] requirements — so that becomes a black box, because you don't know who is bringing  
2 what money into this country and how.”

3  
4 The report proposes major overhauls to the U.S.'s anti-money laundering program to fill these gaps,  
5 including replacing GTOs with more stringent reporting requirements on real estate transactions  
6 across the country, robust implementation of the beneficial ownership registry passed this year as  
7 part of the Corporate Transparency Act, and urging the U.S. Treasury to issue specific regulations  
8 regarding purchases by foreign PEPs.  
9

10  
11 The authors of this report confronted federal regulator s, and Elon Musk's staff, with the fact that  
12 Musk was money laundering via the vast number of mansions he had accrued. Musk then put all of  
13 the mansions up for sale and “moved” to Texas where he thought the law might not get him. He was  
14 wrong!

15  
16  
17 Take a look at the massive number of real estate and art collection ownerships that Dianne  
18 Feinstein, Kamala Harris, Elon Musk, Nancy Pelosi...and the rest (and their families) have accrued  
19 to money launder their gains.

20  
21  
22 -----

23  
24 **From another report on this matter:**

25  
26 *“...A group of domestic citizens filed FBI complaints and lawsuits against The President of*  
27 *the United States and his senior staff along with a lawsuit against a rogue off-shoot of the CIA*  
28 *called "In-Q-Tel". These citizens instigated Congressional corruption investigations and hearings*

1 against the most senior members of the State and Federal government. These actions resulted in the  
2 termination of very famous public officials and their crony criminal embezzlement scams and  
3 almost resulted in the President being forced to leave office, mid-term, based on revelations of a  
4 massive crony kick-back scheme which began to be exposed after the FBI raid of Solyndra. The  
5 director of the FBI was fired for assisting in cover-ups related to this matter.

6 This natural-born American domestic group of engineers was attacked with a \$30 million  
7 dollar+ retribution/political reprisal program contracted by White House political operatives, and  
8 their appointees, who were also the business competitors of the engineers. The attackers used  
9 Fusion GPS-type character assassination smear campaigns (operated by their cronies at Google,  
10 Gawker, Gizmodo, Jalopnik and Facebook), NVCA black-listing, Solyndra-laundering, stone-  
11 walling, Lois Lerner-class agency manipulation and search engine rigging. In-Q-Tel turns out to be  
12 the only federally financed "charity" whose staff are also employed by each of the suspects in this  
13 case and who financed the suspects in this case. It was revealed that White House executives  
14 ordered government agencies to harm members of the public and to reprisal with-hold public  
15 resources from the public. This was a violation of tort, RICO and anti-trust laws.

16 The victims fought back.

17 With the encouragement of members of Congress they used 100% legal tools to interdict the  
18 corruption.

19 Essentially; they helped the United States government sue itself!

20 First, with a unique new kind of pioneering federal lawsuit, victims established — FOR THE  
21 FIRST TIME IN LEGAL HISTORY — that political cronyism is a valid basis for a claim of  
22 arbitrary-and-capricious agency action under the Administrative Procedure Act. See: Federal Case  
23 One, (D.D.C. 2015).

24 Second, they prevailed in the United States Court of Appeals for the District of Columbia  
25 Circuit on their appeal of the district court's ruling that an agency may escape judicial review of its  
26 action by requesting a voluntary remand but refusing to reconsider its initial denial of an  
27 application. See: Case Federal Two, (D.C. Cir. 2017). The Washington DC Circuit agreed with the  
28 victims that an agency may only seek a remand if it promises to reconsider its initial decision. It is

1 because of that victory that the government, under court order is now re-doing the victims  
2 applications and GAO, FBI, IG's and Congressional oversight offices are watching to assure  
3 effective ethics and transparency. Third, these cases placed, on permanent public record, one of the  
4 most detailed documentation sets, ever assembled, about how modern political "Dark Money"  
5 conduits operate. The legal team hired ex-FBI, CIA and SEC experts to track down covert bank  
6 accounts, revolving door bribes, insider stock trades and other payola between the victim's  
7 competitors and public officials. This documentation now prevents the use of those kinds of criminal  
8 efforts, in the future, by ePlaintiff 42osing their tactics to the public.

9 Fourth, the victim's team engaged in the interdiction and termination of corrupt agency  
10 executives, contractors and their financiers. This included some of the most well-known names in  
11 Washington, DC, at the time. Many of them were, and are still being, investigated and surveilled by  
12 the FBI, GAO, SEC and Congress.

13 Fifth, and most important, the effort put every corrupt political scheme on notice that they  
14 WILL be found out and interdicted!

15 The bottom line?

16 The victims group WON on every single aspect of their public-interest goals but still have  
17 yet to be recompensed for their damages!

18 Now the "bad guys" have less options to engage in the corruption of our Democracy! “

19  
20 =====

21  
22 **From Yet Another Overview Of The Matter:**

23  
24 “ Victim and his co-workers witnessed officials stealing money from both, their company  
25 and the US Government Treasury. They reported it to the cops. It turned out to be part of one of the  
26 biggest embezzlement crimes ever exposed. Major political figures and tech "bosses" turned out to  
27 be running a "PayPal Tech Mafia". The bad guys then began hunting down and attacking whistle-  
28 blowers in reprisal "for the rest of our lives" per their threats and their ongoing retribution

1 vendettas.

2           *It was found that famous senators, their Silicon Valley oligarch financiers and their*  
3 *associates run an organized crime insider trading scam that abuses taxpayers and sabotages*  
4 *competing businesses. The terminations of the heads of the FBI, The U.S. Government and other*  
5 *famous people in politics is because of their operation, and cover-ups, of this case. The cover-ups*  
6 *are still going on. Victim’s ability to get justice in this matter is still blockaded.*

7           *Hundreds of the perpetrators have already been fired, placed under permanent public*  
8 *surveillance, financially tracked through every asset, reported to federal agencies and targeted for*  
9 *investigation.*

10           *This is a large part of all of that "political corruption" and "dirty Dark Money" politics you*  
11 *read about in the newspaper every day.*

12           *The goal is to interdict every single person, company and political operative group who is*  
13 *engaging in these crimes using crowd-sourced investigation and intelligence tools. “*

1 **EXHIBIT 29 – The Crony Insider Political Payola**

2  
3 Cronyism is still prevalent in the energy sector, and the government allocates special  
4 benefits to the well-connected instead of fostering a playing field that provides opportunity for all to  
5 compete. Nancy Pelosi, Kamala Harris, Dianne Feinstein and Jerry Brown had stock market and  
6 revolving door job benefits from the Cleantech Crash Department of Energy funds "winners" and  
7 helped to sabotage the competitors of their friends that got handed Crony Cash. Forensic FBI-class  
8 accounting proves this! These people were supposed to be Plaintiffs leaders but they chose to cheat  
9 rather than compete!

10 Corruption cannot be fixed in America until it is illegal for ANY politician, or their family  
11 members, to own stock market stocks!

12 The Department of Energy’s crony-exclusive subsidies obstruct the long-term success and  
13 viability of the technologies and energy sources that they are intended to promote by distorting the  
14 actual costs of energy production and interfering with the price signals by which businesses monitor  
15 supply and demand. This is clearly covered in the feature films: "***Too Big To Fail***" and "***Omerta***".

16 In order to keep competitors (of the California Senator's friends) from getting access to the  
17 funding, White House and Department of Energy (GOVT) goons, under Secretary of Energy Steven  
18 Chu, resorted to the following vendetta and blockade tactics:

19 - Plaintiffs were first-to-file GOVT applications. Plaintiffs had been invited by the  
20 government to participate. GOVT refused to follow the "*First Come, First Served*" rule of the  
21 Section 136 funding law and moved those Applicant's who had their act together, to the back of the  
22 line when it was discovered that they were ahead of Tesla and Fisker, who had lackadaisically not  
23 even filed applications. Tesla and Fisker knew they were going to just be handed the funds, without  
24 review, based on White House insider say-so. GOVT then arbitrarily published an illegal rule  
25 change press release saying that the "First-Come, First-Served" rule was suddenly no longer in  
26 effect after GOVT realized that insider Tesla and Fisker had not had their acts together and that  
27 their competitors had filed first and could get money ahead of White House favorites Fisker and  
28 Tesla.

1 Micheal Carr, one of the authors of the 136 Bill, personally told Plaintiffs, in his  
2 Washington DC office, that Tesla and Fisker were not intending to even submit applications  
3 because funding was “in the bag” for them. Washington DC research firm: Eye On Washington,  
4 spoke with Dianne Feinstein’s Chief Of Staff, who threatened them and Plaintiffs over the Fremont  
5 California NUMMI factory. The Plaintiffs were the first party to approach the NUMMI factory  
6 owners to take over the factory. Elon Musk had already gone on the news to say that the “NUMMI  
7 factory had no value to Tesla”.

8 Feinstein then talked Musk into back-tracking and taking the building because her husband  
9 ran CBRE realty which had interests in that and the Solyndra property (later raided by the FBI) next  
10 door. Her relative: Herb Newman, got the HR work and a construction contractor with Feinstein  
11 family connections got construction work. Some of her staff then went to work for Tesla.  
12 Feinstein’s daughter used to stay at Plaintiffs home and had often complained about her mother’s  
13 ethics in recorded get-togethers. Her best friend lived with Plaintiffs and her mother worked at the  
14 Feinstein office. The 60 Minutes “Cleantech Crash” episode reveals that most of the Plaintiffs  
15 technologies were acquired by China and forced ultra-cheap rates and Chinese spies have been  
16 found to be working for the Feinstein’s. Tesla’s China deal was facilitated by Feinstein  
17 intermediaries. Feinstein’s hubby’s business partner: Mart Bailey, is China’s top deal maker. China  
18 is considered, by the Pentagon, to be America’s biggest current global adversary.

19 - Once an applicant applied for GOVT funds, they were locked out of all other bank or  
20 venture funding worldwide, by design. The National Venture Capital Association and major banks  
21 cooperated with this scheme. No other funding outlet could match the GOVT finance rate, so  
22 nobody would fund an applicant until AFTER an applicant had been funded... but GOVT would  
23 not fund any applicants except the 5 companies who paid the biggest bribes, and made the largest  
24 campaign PAC payments, to the Obama campaign. The GOVT funds were a catch-22 to make sure  
25 that indie tech companies could NOT get funded unless they were crony insiders.

26 - GOVT "bottom-drawer" outsiders, especially the Plaintiffs, applications and stuck them  
27 at the bottom of a file cabinet, in Lachlan Seward's GOVT office, for months without even looking  
28 at them in order to run-out-the-clock on those who competed with campaign-finance front facades:

1 Tesla and Fisker. Tesla and Fisker had agreed to take the taxpayer money, stuff it in their company  
2 account, then move it to PAC's who then moved it to Obama, Feinstein, Harris and Pelosi political  
3 election campaigns. That process is called "Dark Money Obfuscation". When the New York Mafia  
4 did it they got put in prison. When Elon Musk does it, he gets more free taxpayer cash.

5 - GOVT told Plaintiffs, that competed with Tesla, that GOVT would not approve the loan  
6 for their 100% electric car because the applicant's car "***DID NOT USE ENOUGH GASOLINE***"...!  
7 or that an applicant "was not going to make enough cars from the outset"..when it is widely known  
8 that any manufacturing effort requires a ramp-up curve.

9 - Every, so called, 'GOVT reviewer' of the GOVT applications was either a direct competitor  
10 of the Plaintiffs or had stock market holdings in Tesla, Fisker, Solyndra, etc. or later went to work  
11 for them. The review process was the most rigged, crony deal anyone had ever seen in Washington  
12 DC.

13 - Insider (and bribe paying) Tesla Motors had hundreds of meetings and phone calls with  
14 GOVT staff, many at GOVT HQ, in order to hand-walk Tesla through the process and babysit their  
15 application on orders from the Obama White House. Competing applicants received no phone calls,  
16 no meetings and no help. GOVT's Carol Battershal, refused to return most phone calls from  
17 applicants who were in competition with Tesla because she was a "*Tesla Fan Girl*".

18 - GOVT lawyer Cohen, refused to respond to any questions from applicants competing with  
19 Tesla, yet spent many hours helping Tesla get their paperwork configured. He was terminated for  
20 conflict issues.

21 - Oval Office White House car czar: Steven Rattner, refused to assist or respond to any  
22 applicants and told a number of members of Congress that he was just focused on trading "votes-  
23 for-GOVT-funds with Detroit auto unions". He said that small electric car start-ups "don't offer  
24 enough vote trades to make a discussion valuable". ***Rattner was later indicted in New York for  
25 Stock market fraud.*** His indictment provided key initial clues that the entire Cleantech "green  
26 energy" program was about pumping stock market holdings that GOVT and White House insiders  
27 exclusively controlled for their own profiteering.

28 - The GOVT was so overt in their industrial monopoly operations and sabotage efforts that

1 Tesla's own marketing boss wrote an article about it because they were so obvious in their  
2 manipulations of an industry: <https://www.wired.com/2009/12/GOVT-loans-stifle-innovation/>

3 - GOVT never once called, or returned calls from CEO's of the companies applying. GOVT  
4 particularly refused to talk to Plaintiffs because all of Plaintiffs technology obsoleted all of Tesla's  
5 business model and technologies.

6 - One of the White House staff that communicated between agencies was caught taking  
7 pictures up girls skirts and his case was reduced because of White House intervention. Barack  
8 Obama later became part of NETFLIX and helped bring the notorious pedo film "Cuties" to the  
9 screen. Sex trades between White House staff, GOVT staff and lobbyists had become common-  
10 place by 2010.

11 - Applicant Bright Automotive famously published a nationwide open letter confirming all  
12 of these crimes and abuses by GOVT

13 - ZAP Motors, Elio Motors, Brammo and almost every other applicant confirmed these  
14 charges.

15 - The GAO, Congress and yet-to-be-seen FBI documents and NSA recordings confirm all of  
16 these assertions.

17 - Plaintiffs hand delivered more written customer order letters to Congress and GOVT in  
18 Washington DC than ALL of the other applicant's combined yet Lachlan Seward at GOVT "lost  
19 them" (like Lois Lerner lost her IRS hard drives). The applicants re-sent them, yet the GOVT office  
20 refused to review them or contact the customers that had submitted them because they proved that  
21 Tesla was faking customer order volume and other applicants were not.

22 - GOVT staff Matt Rogers, Steve Spinner and other Steven Chu buddies, who were  
23 manipulated into GOVT jobs by McKinsey/Covington and Burling, flew back and forth to  
24 California, on the taxpayers dime, to go to parties and baseball games each weekend, yet GOVT  
25 could not find the time or resources for any in-person meetings with anyone but insider Tesla  
26 Motors. They were reported-on by green energy CEO Gary D. Conley. Conley was later found with  
27 a bullet in his head behind Beale Air Force base in Northern California. Conley had written and  
28 talked to a number of applicants stating that a major Silicon Valley crime mob was "after him".

1 Kamala Harris refused to investigate the matter when she was the Attorney General of California.  
2 Harris is financed by the Silicon Valley oligarchs suspected of being complicit in the deaths of  
3 Conley, Rajeev Motwani, Seth Rich and others.

4 - Applicant WITNESS Vehicles had applied for a loan under the GOVT "LGP" program.  
5 GOVT wanted a cash payment of many tens of thousands of dollars from them in order to look at  
6 that application. GOVT told WITNESS that "GOVT does not have an application form so just make  
7 up your own". WITNESS acquired an investor to fund the "review payment", which GOVT  
8 maintained was not a bribe. Tesla Motors was not required to make such a payment in advance of  
9 review. Tesla only had to make the payment later, after other applicant's complained that Tesla was  
10 getting "crony insider favors". Secretary of Energy Steven Chu's top man had committed, in a  
11 recorded call, to speak to WITNESS's outside investor's in one phone call, per the request of  
12 WITNESS's investors to confirm that the money was being used as a GOVT fee. The GOVT  
13 official refused to return all calls, emails, FEDEX letters and personal messenger requests to  
14 respond. He was recorded in conversations in the next room while his secretary said he was "not in  
15 the building" and also when he told his secretary to "hang up" on the callers. The investors had  
16 become concerned that the promised reply from GOVT was being blocked. After a massive number  
17 of attempts, a few minutes after the deadline to pay the "review fee" had passed, the senior official  
18 at GOVT finally responded with a communication. He sent an email stating that WITNESS had  
19 missed the deadline and was not eligible to apply. He had specifically and overtly sabotaged  
20 WITNESS by not giving the one sentence response to WITNESS's investors, ever!, and then  
21 waiting until the moment the deadline passed to say "HA, we f\*cked you!" In a recorded conference  
22 call and Congressional meetings, Steven Chu had offered to waive the fee, as GOVT had set a  
23 precedent of doing for this with other, applicants. WITNESS, which beat every other applicant on  
24 comparative metrics, lost millions of dollars because of the lies and machinations of GOVT.

25 - Steven Chu's buddies at McKinsey Consulting flooded Congress and the White House with  
26 "helpful" "White Papers" that all seemed to reach the ironically similar conclusion that only Tesla  
27 Motors could be the "green company" that could solve "green energy". [Raj Gupta Went to jail for](#)  
28 [rigging McKinsey](#) and ( <https://www.indiawest.com/blogs/former-mckinsey-ceo-rajat-gupta-s-10->

1 [tall-claims-short-shrifted/article\\_e7e88b8c-9c58-11e9-9d18-03143acc78a.html](http://tall-claims-short-shrifted/article_e7e88b8c-9c58-11e9-9d18-03143acc78a.html) ) stock market  
2 manipulations. The Silicon Valley oligarchs had hired all of McKinsey to push this narrative that  
3 would only hype Tesla stock. McKinsey pushed lithium mining and lithium batteries like there was  
4 no tomorrow. Google and Goldman Sachs held massive assets in lithium mining.

5 - GOVT "Tesla Fan Boys" made up their own interpretations of applicants statements and  
6 re-wrote applicants intentions in order to create negative data for competitors of Tesla and make  
7 Tesla look better even though Tesla was: 1.) about to go bankrupt, 2.) bleeding cash, 3.) owner of  
8 the absolute worse debt ratio of any applicant, 4.) Trying to build new buildings, like Solyndra (for  
9 real estate holdings to benefit CBRE, Feinstein's husband's company), 5.) bleeding staff, 6.)  
10 operated by a sociopath drug abuser, 7.) reliant on Afghanistan war-based lithium battery mines that  
11 may never materialize, 8.) reliant on Congo cobalt mines that used child slave labor, 9.) reliant on  
12 Panasonic lithium batteries that were never intended for auto energy storage and widely  
13 documented to ePlaintiff 42lode and release poison cancer-causing gas during fires, 10.) off budget  
14 PER CAR by over \$100,000.00 PER CAR, 11.) in a legal dispute with all of it's founders, 12.) fully  
15 conflicted with stock ownership by GOVT, White House and Senate executives, and much, much  
16 more...The FBI and SEC have been provided with a list of nearly 1000 lies, deceptive actions,  
17 safety cover-ups, stock manipulations in association with Google owners, sex abuse issues, racism  
18 and frauds by Tesla Motors and Elon Musk.

19 - Department of Energy staff use lies, Lois Lerner-type manipulations, sabotage, third-party  
20 contracted media hit-jobs (operated by Fusion GPS, Gizmodo, Media Matters, Google, etc.), stone-  
21 walling and other dirty tricks tactics known as "Ratf\*ucking", to harm and delay funding for any  
22 party who might compete with the crony insiders.

23 There are **thousands** of other hard-evidence case examples of the corruption in this case.

24 White House Staff including Rahm Emanuel, Bill Daley, Jay Carney, Robert Gibbs, Steve  
25 Rattner, David Axelrod, John Podesta, et al; and The Secretary of Energy Steven Chu and the Chief  
26 Counsel for the United States Department of Energy Daniel Cohen and Bill Cooper were, (from  
27 2007 forward), either financed by, friends, with, sleeping with, dating the staff of, holding stock  
28 market assets in, promised a revolving door job or government service contracts from, partying

1 with, personal friends with, photographed at private events with, exchanging emails with, business  
2 associates of or directed by; applicant's business adversaries, or the Senators and Department of  
3 Energy politicians that those business adversaries pay campaign finances to, or supply political  
4 digital search manipulation services to.

5 Criminal U.S. Senators coordinated and profited in these schemes. Their own family  
6 members have now supplied evidence against them. The facts prove that nobody is allowed to "win"  
7 government funds **unless** they are friends and stock market partners with certain U.S. Senators.

8 Even if your GOVT application metrics beat every single other competing Applicant, you  
9 will get lied to and defrauded by Department of Energy and White House officials. You will be told  
10 that you have a "fair chance", **but** all of the money is secretly hard-wired to a business partner of a  
11 Pelosi or Feinstein and you will just waste your time, staff resources and payroll waiting for years  
12 on promised funds that will never come.

13 The awful truth is that Plaintiffs were **DEFRAUDED** out of their life savings, their  
14 investors savings and years of their lives by The U.S. Government . The feds knew that the money  
15 was hard-wired to Fisker, Tesla and the crony insiders but they induced the other applicants to apply  
16 under false pretenses. They used the outsider applicants as a cover-up for their pass-through crony  
17 payola schemes to pay off Silicon Valley tech oligarchs for funding the Obama and Pelosi political  
18 campaigns and internet search rigging.

19 The White House, at the time, and The U.S. Government engaged in **FELONY**,  
20 **ORGANIZED CRIME** payola, worked with Jeffrey Epstein and his gang and operated massive  
21 stock market manipulation. The highest levels of law enforcement, including Eric Holder and James  
22 Comey, helped cover it up! Joe Biden's son has now been exposed running the same type of  
23 shenanigans with sketchy off-shore companies.

24 When the government plays favorites, valuable resources shift to less productive uses.

25 Removing the cronyism and corporate welfare that are pervasive in energy markets is no  
26 easy feat. The current administration's attempt to rescind unused funds in the U.S. Department of  
27 Energy Advanced Technology Vehicles Manufacturing loan program provides a good case study.

28 In handing out only five crony loans, the program has wasted taxpayerdollars by subsidizing

1 economic losers (Fisker) and has promoted corporate welfare by subsidizing well-off companies  
2 (Nissan and Ford). Tesla Motors was clearly awarded government funds based on bribes and cover-  
3 ups of its failed finances and deadly engineering defects. Additionally, Tesla acts as a campaign  
4 funding conduit to Nancy Pelosi and Dianne Feinstein's election drives. The program has \$4.3  
5 billion remaining but has been idle for more than eight years without a new loan administered by  
6 the department because the FBI is hot on the trail of this scheme. Funds still left in that account  
7 should be given to the Plaintiffs who were the victims of this failed crony payola Cleantech Crash  
8 political payola scheme.

9       The Congressional Budget and Impoundment Control Act of 1974 authorizes the President  
10 to rescind funding previously enacted into law, and the White House appropriately offered a \$15  
11 billion rescissions package that included the Advanced Technology Vehicles Manufacturing loan  
12 program. The government owes the defrauded applicants their damages and that money should  
13 come from the \$4.3 billion still sitting around at GOVT. The White should take the \$1.5 Billion out  
14 of the fund and provide it to these Plaintiffs.

15       The Pelosi Special Interests have, so far, prevailed, and the program remains in place. The  
16 money is just sitting there. A DOJ lawsuit is needed to expose the scam and shut down these crimes  
17 against the public. In the mean time, that money must be used to compensate those harmed,  
18 damaged, sabotaged and defrauded by GOVT. No company will ever get that money again without  
19 a global crowd-sourced public FBI-class investigation being conducted against them. That money,  
20 must, therefore, be used to make up for the quantified past crimes and harms against the non-crony  
21 Applicant's!

22       Thus, the State of California and The Agencies Of The U.S. Government should consider  
23 Plaintiffs demand. It is a legal '**Demand For Payment**' and the collection proceedings are in  
24 process!

25

28

1  
2  
3 **EXHIBIT 29 - McKinsey’s Fake White-papers, Designed To**  
4 **Pitch The Scam, Were Contracted By Defendants**  
5

6 McKinsey & Company staffed The White House and The senior executives at the U.S. Department  
7 of Energy for the “Cleantech Crash”. All the insiders were McKinsey insiders who worked for the  
8 government AND AGAINST THE PUBLIC and for their insider friends. McKinsey was hired by  
9 the Silicon Valley VC Cartel to flood Congress and political circles with a tsunami of white-papers  
10 and talks saying that lithium ion batteries were the only thing that could solve their “Climate  
11 Crisis”.... Except McKinsey was hired by the battery owners. You might wonder where you heard  
12 the name “McKinsey”. McKinsey loves monopolistic world-scope corporate crime smoke-screens.

13 Since 2008, McKinsey & Company has regularly advised the Food and Drug  
14 Administration’s drug-regulation division, according to agency records. The consulting giant has  
15 had its hand in a range of important FDA projects, from revamping drug-approval processes to  
16 implementing new tools for monitoring the pharmaceutical industry.

17 During that same decade-plus span, as emerged in 2019, McKinsey counted among its  
18 clients many of the country’s biggest drug companies — not least those responsible for making,  
19 distributing and selling the opioids that have ravaged communities across the United States, such as  
20 Purdue Pharma and Johnson & Johnson. At times, McKinsey consultants helped those drugmaker  
21 clients fend off costly FDA oversight — even as McKinsey colleagues assigned to the FDA were  
22 working to bolster the agency’s regulation of the pharmaceutical market. In one instance, for  
23 example, McKinsey consultants helped Purdue and other opioid producers push the FDA to water  
24 down a proposed opioid-safety program. The opioid producer ultimately succeeded in weakening  
25 the program, even as overdose deaths mounted nationwide.

26 Yet McKinsey, which is famously secretive about its clientele, never disclosed its  
27 pharmaceutical company clients to the FDA, according to the agency. This year ProPublica  
28 submitted a Freedom of Information Act request to the FDA seeking records showing that

1 McKinsey had disclosed possible conflicts of interest to the agency’s drug-regulation division as  
2 part of contracts spanning more than a decade and worth tens of millions of dollars. The agency  
3 responded recently that “after a diligent search of our files, we were unable to locate any records  
4 responsive to your request.”

5 [Federal procurement rules](#) require U.S. government agencies to determine whether a  
6 contractor has any conflicts of interest. If serious enough, a conflict can disqualify the contractor  
7 from working on a given project. McKinsey’s contracts with the FDA, which ProPublica obtained  
8 after filing a FOIA lawsuit, contained [a standard provision](#) obligating the firm to disclose to agency  
9 officials any possible organizational conflicts. One passage reads: “the Contractor agrees it shall  
10 make an immediate and full disclosure, in writing, to the Contracting Officer of any potential or  
11 actual organizational conflict of interest or the existence of any facts that may cause a reasonably  
12 prudent person to question the contractor’s impartiality because of the appearance or existence of  
13 bias.”

14 Agency officials rely on disclosure to ensure that they have the information they need to  
15 consider whether a contractor’s other business relationships risk slanting its judgment. “Contractors  
16 have the obligation to disclose potential conflicts, and then the government has an obligation to  
17 figure out how to deal with it,” said Jessica Tillipman, an assistant dean and government  
18 procurement law expert at George Washington University Law School.

19 Asked for comment, McKinsey did not assert that it disclosed potential conflicts to the FDA.  
20 But a spokesperson for the firm, Neil Grace, nonetheless maintained that “across more than a  
21 decade of service to the FDA, we have been fully transparent that we serve pharmaceutical and  
22 medical device companies. McKinsey’s work with the FDA helped improve the agency’s  
23 effectiveness through organizational, resourcing, business process, operational, digital, and  
24 technology improvements. To achieve its mission, the government regularly seeks support from  
25 additional experts who understand both the government’s mission and the industries’ practices. We  
26 take seriously our commitment to avoid conflicts and to serve the best interests of the FDA.”

27 (McKinsey is a sponsor of ProPublica’s local virtual events programming.)

28 McKinsey’s failure to disclose its industry engagements deprived the FDA of the

1 opportunity to consider whether, for example, the overlap between McKinsey’s government and  
2 pharmaceutical industry projects and the potential financial incentives at play constituted a conflict,  
3 experts said.

4 “For a contractor like McKinsey not to disclose the companies it is working for has all the  
5 appeal of the Addams Family on Halloween hiding Uncle Fester in the basement so as not to scare  
6 the neighborhood,” said Charles Tiefer, a professor of government contracting at the University of  
7 Baltimore Law School.

8 An FDA spokesperson, Shannon Hatch, said: “The FDA’s procurement activities are  
9 governed by the Federal Acquisition Regulations (FAR). The agency takes our role awarding  
10 contracts seriously and we work to ensure the agency maintains high standards of integrity as set  
11 forth in the FAR.”

12 McKinsey’s extensive opioid company consulting eventually began coming to light, starting  
13 with [a 2019 ProPublica report](#). The firm’s opioid work has provoked widespread criticism, spawned  
14 a welter of lawsuits and led the firm to pay nearly \$600 million this year to settle legal claims made  
15 by all 50 states, as well as five U.S. territories and the District of Columbia. It also prompted  
16 McKinsey to issue a [statement](#) in which the firm acknowledged that it “fell short” of its standards in  
17 advising opioid makers while also denying that it “sought to increase overdoses or misuse and  
18 worsen a public health crisis.” The firm pledged not to work on opioid-related projects going  
19 forward.

20 The lawsuits and [public outrage](#) have focused on the consulting firm’s efforts to help  
21 increase (or “turbocharge,” in McKinsey’s parlance) sales of Purdue Pharma’s highly addictive  
22 flagship opioid, OxyContin. But lately, concerns have begun to emerge about McKinsey’s parallel  
23 assignments, which were worth upward of \$50 million over about 12 years, for the nation’s primary  
24 drug regulator. [In a letter](#) to the FDA in August, a bipartisan group of senators led by [Sen. Maggie](#)  
25 [Hassan, D-N.H.](#), asked the regulator to address “potential conflicts of interest that may have arisen”  
26 from McKinsey’s work for both the agency and “a wide range of actors in the opioid industry,  
27 including many of the companies that played a pivotal role in fueling the opioid epidemic that our  
28 country now faces.”

1 McKinsey, which has focused on counseling the CEOs of leading corporations for much of  
2 its nearly 100-year history, began expanding its public-sector practice in the United States around  
3 the time of its earliest FDA projects. McKinsey prides itself on its ability to act quickly and with  
4 discretion, and in its largely unregulated engagements for corporate clients, there are few  
5 impediments to the firm doing so.

6 In government consulting, however, the rules are far more stringent, and on several recent  
7 occasions, the firm has been caught [refusing to abide by such strictures](#), including disclosure rules.  
8 Over the past couple of years, for example, McKinsey’s bankruptcy-advisory practice has paid more  
9 than \$30 million to the Justice Department and one client’s creditors to settle allegations that it  
10 failed to disclose potential conflicts, as required by the federal bankruptcy rules. Those allegations  
11 also [prompted a federal criminal investigation](#) of the firm. McKinsey has denied wrongdoing, and  
12 the investigation, which came to light in 2019, has not led to charges.

13 There are signs of overlap between McKinsey’s government and industry engagements,  
14 though publicly available information about the firm’s work for drug companies is limited. In one  
15 instance in 2008, which surfaced in a lawsuit against Purdue, the FDA told Purdue that it planned to  
16 require the company to submit a drug-safety plan for its bestselling drug, OxyContin. The company  
17 recognized that regulation of this sort threatened to cut into its sales margins, and according to  
18 McKinsey documents [filed in federal court](#), top Purdue executives tasked the consultancy with  
19 devising a response to the FDA.

20 According to [McKinsey PowerPoint slides](#), the firm proposed four options, among them  
21 suing the FDA to “delay” the imposition of a safety plan and to “band together” with other opioid  
22 producers to “formulate arguments to defend against strict treatment by the FDA.” Purdue selected  
23 the latter, with McKinsey helping to implement the strategy. In 2009, McKinsey emails and slides  
24 show, its consultants prepared Purdue executives for at least two meetings with FDA officials. (One  
25 suggested answer to questions about who at Purdue would take personal responsibility for  
26 OxyContin overdoses: “We all feel responsible.”)

27 In the meantime, according to [a 2011 FDA contract](#), the agency’s drug-regulation division  
28 hired McKinsey to develop a “new operating model” for the office responsible for developing drug-

1 safety plans of the sort Purdue and its allies were fighting against, with the consultancy’s help.  
2 Among McKinsey’s tasks were defining the office’s “strategic goals and objectives,” including its  
3 “role in monitoring drug safety.”

4 In 2012, the FDA issued a substantially watered-down version of the opioid-safety plan.

5 There’s no evidence to suggest McKinsey’s consultants at the FDA influenced the opioid-  
6 safety plan. But this apparent overlap between a government contract and an assignment for a  
7 commercial client reflects the type of issue an agency would want to consider when assessing  
8 whether a potential conflict of interest exists. Agencies are likeliest to identify a conflict “where an  
9 outside business venture is related directly to the subject matter of the procurement and structured  
10 such that there is a real economic incentive for biased performance,” Keith Szeliga, a partner at the  
11 law firm Sheppard Mullin, [wrote in a 2006 article](#) in the Public Contract Law Journal.

12 A number of other McKinsey projects at the FDA, contracting records show, were also  
13 likely to have a financial impact on its pharmaceutical industry clients. In 2010, for example, the  
14 FDA hired the firm to help it develop a system to track and trace the distribution of potentially  
15 harmful prescription drugs. The [contract](#) required the firm to consult with “supply chain  
16 stakeholders,” a category that potentially included a number of long-standing McKinsey clients.  
17 Hassan and her fellow senators, in their recent letter to the FDA, called this “an obvious conflict of  
18 interest.”

19 [\*\*How McKinsey Is Making \\$100 Million \(and Counting\) Advising on the Government’s\*\*](#)  
20 [\*\*Bumbling Coronavirus Response\*\*](#)

21 [Another contract](#), from 2014, tasked McKinsey with assessing the “strengths, limitations and  
22 appropriate use” of Sentinel, a system meant to monitor the safety of drugs once they’re on the  
23 market. That project likewise called for McKinsey to interview “external stakeholders,” including  
24 “industry organizations” and “drug and device industry leaders.”

25 The news of McKinsey’s opioid work apparently did little to dampen the FDA’s enthusiasm  
26 for the consultancy. In March 2019, just after the news broke, the agency signed a new contract  
27 with McKinsey — extending the firm’s multiyear effort to help the FDA “modernize” the process  
28 by which it regulates new drugs. McKinsey is one filthy, lying, shill operation.

4 <https://www.journals.uchicago.edu/doi/pdfplus/10.1086/686474>

5 **Crony Capitalism** Paul H. Rubin\* This Article discusses "**crony capitalism**," a form of  
6 rent-seeking, and its sources. Although the term **crony capitalism** is generally applied to non-  
7 Western economies, any economy is susceptible to three primary sources of cronyism: stan-dard  
8 special interest legislation, "bootlegger and Baptist"

## 11 **Bribery, Money Laundering And Hit-Jobs**

13 If you thought that Mossack Fonseca and the Panama Papers was "the story": It was only the  
14 beginning!

15 Silicon valley's politicians make policy that, both, ruins taxpayers while making the  
16 politicians rich by artificially inflating the value of the politicians secret stock market holdings.  
17 Now we have exposed their entire scam!

18 This is about the U.S. Senators and their crony dark money political bribes and criminal  
19 kick-backs, the tech oligarchs who deployed the bribes and the victims of these crimes.

20 Google, Tesla, Facebook, Linkedin and their VC's (and deeply bribed Senators) ordered and  
21 operated hit-jobs on the public and their competitors, supported by the Obama White House and  
22 U.S. Dept. of Energy. The FBI raided their scheme and the investigations tracked all the way back  
23 to the Oval Office!

24 - This is about a group of tech oligarchs, and their corrupt Senators, who commit crimes in  
25 order to manipulate over a trillion tax dollars (YOUR MONEY) into their, and their friends pockets.

26 - They are felons yet they control some of the offices of the agencies who are supposed to  
27 arrest them. Silicon Valley bought K Street and U.S. Senators, gave them more Dark Money than  
28 history has ever seen and then had giant tech-law firms bribe, hit-job and blockade any attempts to

1 solve the problem.

2 - Some of the largest bribes in American history were paid via billions of dollars of pre-IPO  
3 cleantech stock, insider trading, real estate, Google search engine rigging and shadow-banning, sex  
4 workers, revolving door jobs, nepotism, state-supported black-listing of competitors and under-the-  
5 table cash. Why are these Silicon Valley Oligarchs and their K-Street law firms and lobbyists  
6 immune from the law?

7 U.S. Senators, Agency Heads and Congress were bribed, in this case, with:

8 - Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock  
9 and stock warrants which is never reported to the FEC

10 - Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search  
11 engine rigging including shadow-banning, de-boosting, DNS re-routing, directed search suggestion,  
12 subliminal messaging bias, and hundreds of other psychological manipulation tricks; the value of  
13 which is never reported to the FEC but proven by invoices and bank payments between Google and  
14 Gawker, Gizmodo, DNC, Fusion GPS, Black Cube, etc.

15 - Free rent

16 - Prostitutes and Rent Boys

17 - Cars

18 - Dinners

19 - Party Financing

20 - Sports Event Tickets

21 - Campaign Services "Donations"

22 - Secret PAC Financing

23 - Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take  
24 Bribes And Those Who Take Bribes, Themselves

25 - "Consulting" contracts from McKinsey as fronted pay-off gigs

26 - Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors

27 - Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel  
28 to staff)

- 1 - Real Estate
- 2 - The use of Cayman, Boca Des Tores, Swiss and related laundering accounts
- 3 - The use of HSBC, Wells Fargo and Deustche Bank money laundering accounts
- 4 - Free spam and bulk mailing services owned by corporations
- 5 - Epstein sex ring ePlaintiff 42loits
- 6 - Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington &
- 7 Burling, etc. to conduit bribes to officials

8 While our investigators were able to get a law produced that made insider trading less  
9 attractive for Congress, nothing has been done to stop stock warrant bribes and revolving door  
10 payola. Additionally, even with the new law, 60% of the U.S. Congress (including their associates  
11 and families) STILL engage in insider trading because law enforcement has not prosecuted many of  
12 them.

13 This is about a group of U.S. Senators, Silicon Valley Oligarchs, Crooked Law Firms and  
14 Lobbyists who commit crimes in order to manipulate over a trillion tax dollars into their, and their  
15 friends pockets. They use media monopoly tricks to try to shut out any other viewpoints. They push  
16 pretend issues that they believe will get more tax money allocated to "issue solutions" that they, and  
17 their friends, happen to already own the monopolies for. They are felons yet they control some of  
18 the offices of the agencies who are supposed to arrest them. Silicon Valley bought K Street lobby  
19 firms and U.S. Senators, gave them more Dark Money than history has ever seen and then had giant  
20 tech-law firms bribe, hit-job and blockade any attempts to arrest them.

21 There are no "conspiracy theories" here. These are all hard forensic facts that will stand-up  
22 in any court!

23 They did this to anybody who they thought might expose the White House use of agencies  
24 as "slush-funds" and "Dark Money" campaign finance laundering conduits. They were afraid that  
25 exposure of these schemes would cause the President of the United States to be forced to resign in  
26 the middle of his term!

27 The associated case videos and reports provided with this case matter are evidence, signed  
28 by thousands of reporters and investigators, that the suspects are: A.) Based around Silicon Valley

1 and Washington DC; B.) Operating as a RICO-violating cartel; C.) Deeply sociopath and sexually  
2 disturbed; D.) Money laundering via large law firms and investment banks; E.) Using Google,  
3 Reddit, Facebook, etc. as mass political behavior-manipulation programs; F.) Paying for and  
4 operating character assassination programs against those who defy them; G.) Using "green energy"  
5 as one of their facades to steer tax dollars to the companies that they, and their friends, already own  
6 and work for; H.) Willing to resort to the most extreme things to protect their scheme; I.) Living in  
7 an ideological "echo-chamber" in their tech bubbles; J.) Empowered entirely by the public's lack of  
8 willingness to boycott them and demand their arrests.

9 A vast number of individuals and companies, who are willing to testify about these crimes  
10 have NEVER BEEN ALLOWED into a Congressional hearing, court-room, FBI 302 interview,  
11 etc., because crooked Senators are terrified of the confirming testimony they can all provide.

12 We placed autonomous monitoring applications on a vast number of co-location servers,  
13 shared hosting ISPs, stand-alone servers and sites around the world over ten years ago and  
14 monitored: 1.) Google search results compared to other search engines, 2.) Google DNS and  
15 spoofing activities, 3.) Google results on 100 key search terms including search terms of assets,  
16 candidates and business associates connected to Google, 4.) Where Google sends data from users  
17 clicking on Google supplied links, 5.) Where fabricated mole data that was injected as user data  
18 ultimately ended up later, and other metrics. The results prove that Google abuses the market, the  
19 public, politics and human rights for and with U.S. Senators and public officials.

20 We found that Elon Musk, Larry Page, Sundar Picachu, Eric Schmidt, Jared Cohen and  
21 Sergy Brin at Google and Mark Zuckerberg at Facebook order their company staff to hide, down-  
22 rank, hole-punch the net, shadow-ban, stock market valuation manipulate and exclude this website  
23 on the internet. They do this IN COORDINATION WITH Public Officials including California  
24 Senators who co-own those companies. We track every technical trick they use and report it to  
25 Congress and anti-trust agencies. The more they do it, the more they create evidence that will put  
26 them out of business!

27 The Google empire controls most of the media on Earth, via many front corporations, and  
28 indoctrinates everyone in it's organization using 'cult' methodologies. Google owner's believe in

1 "our-ideology-at-any-cost" and "the-ends-justify-the-means" scenarios. What could possibly go  
2 wrong?

3 In “The CleanTech Crash” is has been uncovered that Every single Dept of Energy  
4 executive, and related Senator, owns stock market assets in Tesla, Fisker, Solyndra, Ener1, etc. so  
5 they blockaded and sabotaged every applicant who competed with their holdings in a RICO-  
6 violating, felony organized crime, using taxpayerfunds.

1 **EXHIBIT 30 - Claim And Damages Elaboration**

2 Plaintiffs Causes Of Action

3  
4 **ABUSE OF PROCESS; FTCA VIOLATIONS; ACCOUNT STATED; BREACH OF**  
5 **CONTRACT; CONVERSION; DEFAMATION; FRAUDULENT MISREPRESENTATION;**  
6 **FRAUDULENT CONCEALMENT; INJURIOUS FALSEHOOD, PRODUCT**  
7 **DISPARAGEMENT AND TRADE LIBEL; CIVIL RIGHTS VIOLATIONS AND**  
8 **VIOLATIONS OF THE U.S. CONSTITUTION; MISAPPROPRIATION OF TRADE**  
9 **SECRETS; PRIMA FACIE TORT; QUANTUM MERUIT; TORTIOUS INTERFERENCE**  
10 **INCLUDING A.) TORTIOUS INTERFERENCE WITH AN EXISTING CONTRACT, B.)**  
11 **TORTIOUS INTERFERENCE WITH PROSPECTIVE, C.) TORTIOUS INTERFERENCE**  
12 **WITH BUSINESS RELATIONS CONTRACTUAL RELATIONS; PATENT**  
13 **INFRINGEMENT; PERSONAL INJURY; UNJUST ENRICHMENT; ANTI-TRUST LAW**  
14 **VIOLATIONS; LABOR LAW VIOLATIONS AND OTHER CAUSES.**

15       Whereas the lawyers for the tech oligarchs argue that they should be sued separately from  
16 the government entities and the politicians, those tech oligarchs and politicians invalidated that  
17 assertion by exchanging billions of dollars of (NOT reported to the FEC) cash, stock market stocks,  
18 real estate, search engine manipulations, insider trading algorithm manipulation sharing, and other  
19 compensations, which, thereby, made them business partners with each other, combined them as a  
20 RICO racketeering compliant “Cartel”, in the eyes of the law, and joined them legally as a group  
21 organized for “unjust gains”.

22       To clarify, criminally corrupt Senators changed federal laws so that they could say that such  
23 bribery ‘*was only not illegal for themselves*’. Whether this contrivance by these corrupt insider-  
24 trading Senators will stand, remains to be seen. The fact that these political figures conspired with  
25 each other and their financier/beneficiaries leaves no cloudy issues relative to the law! ***They broke***  
26 ***the law under racketeering and organized crime rules!***

27       To qualify for those Department of Energy funds, automakers and eligible component  
28 manufacturers had to promise to increase the fuel economy of their products by 25% over the

1 average fuel economy of similar 2005 models, and apply the loans to future investments  
2 "reasonably related to the reequipping, expanding, or establishing a manufacturing facility in the  
3 U.S." Plaintiffs vehicles had the highest calculated fuel efficiency in the world, the lowest cost-to-  
4 manufacture, the lowest selling price, the most attractive debt-ratio, the highest safety factor, the  
5 most hires of laid off Detroit factory workers and executives and the biggest volume of sales order  
6 requests! Plaintiffs had refused to pay the bribes so they got **black-listed**! Even though these rules  
7 were supposed to be "law", Department of Energy officials constantly and illicitly changed the rules  
8 and criteria, every time that it looked like an outsider was getting close to winning the funds. In this  
9 way, **no applicant who was not a White House or U.S. Senator's political campaign financier**  
10 **could ever get the money.**

11 Bright Automotive, ZAP, WITNESS, EcoMotors and Elio have famously published national  
12 letters confirming that the entire Department of Energy funding programs are a shell game operated  
13 with constantly shifting gauntlets designed to only allow insiders in and destroy all of their  
14 competitors. GOVT staff will make up any excuse to keep non-crony applicants out, including  
15 faking reviews of applicants and shredding their data. A large majority of GOVT staff are still "left-  
16 over" from the previous corrupt Administration and believe that their income is still based on lying  
17 and providing a cover-up of the criminal corruption described herein.

18 Non-crony applicants were **DEFRAUDED** into thinking that they had a chance. Outsider  
19 applicants were falsely **INDUCED** to spend millions of their dollars via false government promises.  
20 This resulted in part, but not all, of the massive damages to Plaintiffs. In distributing the loans, the  
21 GOVT was supposed to fairly support technologies that are promising and deserving of assistance.  
22 Alas, recent lawsuits, GAO and Treasury examinations and Congressional investigations have  
23 revealed that The U.S. Government has been "*infected with corruption*" and only administered these  
24 funds to benefit friends and harm their competitors.

25 Loan recipients must also be "financially viable" for the length of the loan. Plaintiffs stayed  
26 viable through the projected life of the loan, under the most dire circumstances possible, even  
27 though most other crony "winners" of ANY GOVT funds were forced into bankruptcy by the lies  
28 and frauds operated by the White House and Department of Energy and the "unjust-gain" (Per the

1 U.S. Treasury) schemes to intentionally crash companies like Solyndra and Abound for “Windfall  
2 tax write-off profits and VC/I-Bank skims” [2]

3 [https://en.wikipedia.org/wiki/  
4 Advanced\\_Technology\\_Vehicles\\_Manufacturing\\_Loan\\_Program#cite\\_note-csmonitor.com-2](https://en.wikipedia.org/wiki/Advanced_Technology_Vehicles_Manufacturing_Loan_Program#cite_note-csmonitor.com-2)

5 Tesla borrowed cash from Arabs, Warren Buffet and Detroit to cook it’s books to make it  
6 look financially viable on paper, but Tesla was anything but “OK”. Tesla is a sham. Musk can cycle  
7 the original GOVT funding for stock market pump-and-dumps for the next 100 years but Tesla is  
8 will always be a company forged in corruption, ‘book-cooking’, bribes and payola. Musk and his  
9 scams exist because over a thousand insiders at [Goldman Sachs](#) (

10 [https://www.businessinsider.com/matt-taibbis-vampire-squid-take-down-of-goldman-sachs-is-  
11 finally-online-2009-7?op=1](https://www.businessinsider.com/matt-taibbis-vampire-squid-take-down-of-goldman-sachs-is-finally-online-2009-7?op=1) ), The NVCA and [Deutsche Bank](#) (

12 <https://www.db.com/company/index.htm> ) spend all day manipulating the stock market with  
13 massive automated computer trading arrays. Also, four big U.S. Senators (who are his investors)  
14 spend a large part of their days covering his ass in order to keep their insider trading schemes going.

15 Given 60 days by congressional statute to issue an interim final rule, The U.S. Government  
16 (GOVT [https://en.wikipedia.org/wiki/United\\_States\\_Department\\_of\\_Energy](https://en.wikipedia.org/wiki/United_States_Department_of_Energy) ),[3] responsible for  
17 overseeing the program, finalized the rule 36 days later on November 5, 2008 (compared to 18  
18 months usually needed for such rule making). Over 1000 public officials and applicants can testify  
19 that the money was planned to have been distributed by Dec. 30, 2008.

20 This program is related to the [United States Treasury Department](#)  
21 ( [https://en.wikipedia.org/wiki/United\\_States\\_Treasury\\_Department](https://en.wikipedia.org/wiki/United_States_Treasury_Department) )s [Troubled Asset Relief  
22 Program](#) (TARP - [https://en.wikipedia.org/wiki/Troubled\\_Asset\\_Relief\\_Program](https://en.wikipedia.org/wiki/Troubled_Asset_Relief_Program) ) “*stimulus fund*”  
23 which has been providing contrived [bailout](#) ( <https://en.wikipedia.org/wiki/Bailout> )funding to two  
24 of the big three U.S. automakers to give the impression of reducing the [effects of the 2008–10  
25 automotive industry crisis on the United States](#) ( [https://en.wikipedia.org/wiki/Effects\\_of\\_the\\_2008–  
27 10\\_automotive\\_industry\\_crisis\\_on\\_the\\_United\\_States](https://en.wikipedia.org/wiki/Effects_of_the_2008–<br/>26 10_automotive_industry_crisis_on_the_United_States) ).

28 The two “*stimulus funds*” programs were enacted during the [Automotive industry crisis of](#)

1 2008–10 ( [https://en.wikipedia.org/wiki/Automotive\\_industry\\_crisis\\_of\\_2008–10](https://en.wikipedia.org/wiki/Automotive_industry_crisis_of_2008–10) ), in order to pay  
2 off political favors[4] Obama Chief of Staff Rahm Emanuel is notorious for saying that you should  
3 ‘*never let a good crisis go to waste*’, by which he meant that politicians should create “**stimulus**  
4 **funds**”, to hand out taxpayer money to their friends, every chance they get. (ie: See the internal  
5 Treasury, GAO and OMB notes on the current “**COVID Stimulus**” investigations and negotiations  
6 re: payola and crony schemes).

7 The stark reality is that *no politician screaming about “climate change” and “immigrants”,*  
8 *etc. is not making tens of millions of dollars in stock market profits from “climate change” and*  
9 *“immigration” services providers.* They have a traceable financial incentive to lie about these  
10 issues for their own profiteering schemes. They get paid by Eric Schmidt, Elon Musk, Reid  
11 Hoffman and the Cartel to say these things and they own stock in the Tesla cars and Warren Buffet  
12 windmills. You can follow the money, quite easily, with modern AI technology, but the mainstream  
13 media hides that fact.

14 While climate change may be bad for crops, the only “green” thing that these crooked  
15 Senators care about is the “green” cash in their stock market accounts. They only need that  
16 taxpayer Department of Energy “ATVM” or “LGP” money to appear in an outside account for a few  
17 minutes while their Goldman Sachs insiders and their Sandhill Road VC’s scoop the “skims”. The  
18 **skims** are billions of dollars of fake “*management fees*” off-the-top, electronically captured with the  
19 push of a button. The Plaintiffs helped get the FBI to raid Solyndra, not because Solyndra’s indium-  
20 based solar tubes caught on fire all the time or because of the real estate scams involved, but  
21 because crooked money was made off of the skims and the manipulated windfall tax write-off  
22 profits. Solyndra never had to sell a thing for the scams to work. Department of Energy staff,  
23 especially PR staff, will lie, shred, deny, defer and obfuscate to cover-up these crimes. GOVT  
24 policy is to “deny any and all past political failures, *no matter what*”.

25 In this case, Plaintiffs have filed charges, criminal referrals and requests-for-investigation  
26 with the FBI, DOJ, FTC, SEC, SFPD, Inspector Generals, and other offices. Plaintiffs won previous  
27 historical, precedent-setting, federal lawsuits proving that Plaintiffs funding and agency decisions  
28 **were manipulated by reprisal, vendetta, revenge hit-jobs operated against him by government**

1 ***officials exposed in an active federal corruption investigation.*** FBI officials Patricia Ritch,  
2 Christopher Wray, John F. Bennett, Craig D. Fair, the duty officers, and their predecessors, at the  
3 San Francisco and Washington DC offices should be familiar with this case as building logs and  
4 videos show that Plaintiffs have been to the 450 Golden Gate Ave, 13<sup>th</sup> Floor FBI offices on  
5 multiple occasions to file reports. Plaintiffs have active SEC, SFPD, OSC, etc. case numbers.  
6 Plaintiffs are also actively participating in the promotion of current DOJ and FTC lawsuits against  
7 the perpetrators including Google/Alphabet and other large parties who influenced government  
8 process, illicitly, in this corruption matter.

9 While Plaintiffs have asked the Department of Justice to execute and collect these funds on  
10 their behalf, they have reserved their rights to have any commercially licensed collection agency  
11 legally acquire these funds, under law. These particular funds and these particular government bank  
12 accounts are like no other in the world and they offer novel collection opportunities and challenges.

13 The Plaintiffs have, for years, implored The U.S. Department of Justice to take up Plaintiffs  
14 case in order to ePlaintiff 42edite the matter. United States Attorney Generals and FBI bosses keep  
15 getting indicted, fired and investigated over this very same matter of corruption, so this ask has been  
16 a long row to hoe.

17 Plaintiffs have demanded an immediate settlement to the claim so that all parties can be  
18 spared further pain in this matter. Getting a response from the feds, though, is like pulling teeth.  
19 Hollow, ineffective form letters from law enforcement and regulatory agencies, for a case this  
20 compelling, ring of insincerity and underscore the frustration every citizen has with the modern  
21 justice system.

22 It would not be a total loss for the federal bankers, though. The federal government is free to  
23 seek reimbursement from the State Of California for these funds, to replenish the GOVT account  
24 that Plaintiffs intend to garnish. Why? Because over 40 major California public officials, known to  
25 federal investigators, participated in the referenced corruption in a manner which inured to their  
26 personal and family bank accounts and damaged all of the Plaintiffs in this matter (as well as the  
27 taxpayers). That fact is easily proven by the forensic accounting of those politicians family  
28 investment bank accounts, from 2007 to today, and their email communications, all of which the

1 NSA and other agencies have recorded (and outside hackers may have acquired). Those public  
2 officials engaged in this corruption on an interstate basis which, also, makes this matter of interest  
3 to the FBI.

4 ***This is about one of the largest criminal stock market and payola manipulations in***  
5 ***American history! It is happening again with the COVID “stimulus funds”***

6 ***( [https://www.zerohedge.com/political/house-moderates-hammer-out-152-trillion-](https://www.zerohedge.com/political/house-moderates-hammer-out-152-trillion-bipartisan-compromise-pandemic-relief)***  
7 ***[bipartisan-compromise-pandemic-relief](https://www.zerohedge.com/political/house-moderates-hammer-out-152-trillion-bipartisan-compromise-pandemic-relief) )!***

8 The 2008 “Stimulus” ended up being \$2 trillion dollars. Ironically, the 2020 COVID  
9 “stimulus” plan is for the same amount. All of the players are the the same and the insider trading  
10 schemes are quite similar. Those who do not learn from the past are doomed to repeat it!

11 Plaintiffs have reported this, in writing, to every known law enforcement and regulatory  
12 entity. They have a vast archive of crime report receipts and case numbers **but** zero productive  
13 results on their behalf. Each agency finger-points to another agency because they are either too lazy  
14 to do the work or their bosses are implicated in the crime benefits. The Plaintiffs will no longer wait  
15 for those responsible for enforcement to do their jobs. Everyone has seen, in the news, the shocking  
16 number of Inspector General top brass indicted for corruption. It is clear that IG offices can no  
17 longer be counted on for justice.

18 So: U.S. Senators and their staff and financiers as well as White House executives, their  
19 staff and financiers and government agency executives and their staff and beneficiaries have been  
20 charged, fired and/or arrested in this matter. It has been irrefutably proven that those parties, could,  
21 have and may again, quite easily, manipulate federal records, decisions and processes in order to  
22 harm, punish, defund, and reprisal-blockade Plaintiffs rights, benefits and legal options. Silicon  
23 Valley oligarchs partnered with the politicians to operate these crimes. Over 1000 news broadcasts  
24 and hundreds of thousands of news articles discuss the case and those media clippings have been  
25 provided to every federal office in on-line, cloud internet, repositories. The feature films **“Too Big**  
26 **To Fail”**, **“Omerta”** and over four different **CBS News 60 Minutes** episodes deal with this matter.  
27 San Francisco City Hall officials have started to be arrested in the associated corruption issues.  
28 Washington DC and Marin County officials are under investigation, by federal authorities, in this

1 active case matter.

**Comps For Whistle-Blower And Damages Validation Metrics**  
**Harms Demands Calculation Metrics**

The comparative calculation metrics: The damages amounts in the attached report are based on fully verified, government reported values from carbon credit sales, revenues, stock market exploitation of GOVT funding matters and other profit GAAP reported amounts and FBI revealed sums, from December 2008 to today, that the GOVT-crony competitors and their investors made in documented profits, revenues, tax write-offs, tax waivers and other upsides that Plaintiffs lost because of the corruption damages, rights blockades and reprisal attacks. Additionally, damages from benefit funds blockades, black-lists and other losses of revenue are incorporated in those standards-based, court precedent comps. Additionally, monies owed for whistle-blower and federal informant fees are calculated per industry precedents (such as the Walter T. Department of Energy whistle-blower award ( <https://www.latimes.com/nation/la-na-hanford-whistleblower-settlement-20150813-story.html>) and the known annual budget for FBI informant payments provided to Congress in previous budget reports). Plaintiffs provided the documented case evidence to federal investigators since 1986. Additionally, salary losses based on the averaged CEO salaries of the CEO of Tesla Motors, Fisker Motors, Bloom Energy, Solyndra and General Motors are included as industry standards for the energy and automotive market in the same time-frame. Additionally, standard pain and suffering inclusions are incorporated. All of Plaintiffs back benefits payments from 2007 to today are also demanded.

1 **EXHIBIT 31 - The San Francisco Bay Area Culture Of Political Corruption**  
2 **Created These Crimes**

3 - This is the crowd that began this “Crime Spree”

4 - The huge number of corruption incidents in San Francisco Government reflect the roots of these  
5 crimes

6  
7 A gunshot rang through the corridors of San Francisco City Hall.

8  
9 A Mayor was dead and a new mayor was moved into position. The bullet that assassinated Mayor  
10 George Moscone on November 27, 1978 would lead to political corruption that would change the  
11 course of the world. Systematized political rigging had breached a new era. One of the victims of  
12 these crimes was on his way to City Hall to see the Mayor’s office about a major new project.

13  
14 Everything changed that day.

15  
16 The assassination of George Moscone was perfectly timed to place Dianne Feinstein into power as  
17 the new mayor of San Francisco and begin the next-generation of industrialized corruption on an  
18 epic scale. The new generation of corporation-backed pay-to-play was now being sponsored by the  
19 newly minted power known as *The Silicon Valley Cartel*.

20  
21  
22 As George Moscone lay dying on his desk in San Francisco, just south of there a man named John  
23 Doerr was looking at a folder that showed that his Silicon Valley “venture capitol” scheme had just  
24 broken the record at \$750 million dollars of negotiable funds that he could now control.

25  
26 John Doerr, and a number of Silicon Valley venture capitalists, benefited from the death of George  
27 Moscone. The assassination put Silicon Valley’s number one crony in control of cronyism: Dianne  
28

1 Feinstein.

2  
3 The massive number of elitist bribes paid to get the douche-bag children of the rich into Stanford  
4 University has been exposed. The Feinstein’s, and their Silicon Valley VC buddies, were the  
5 biggest part of the manipulations. U.S. Sen. Dianne Feinstein’s husband, University of California  
6 Regent Richard Blum, was named by the state auditor's office as one of the regents involved in  
7 admissions scandal where UC wrongly admitted dozens of wealthy, mostly white students as favors  
8 to well-connected people.  
9

10  
11 Among those “inappropriately admitted” were a student whose family was friends with a member  
12 of the Board of Regents, the child of a major donor and an applicant who babysat for a colleague of  
13 a former admissions director, according to the California State Auditor. In one case, a regent  
14 unidentified in the audit sent an “inappropriate letter of support” directly to the UC Berkeley  
15 chancellor on behalf of a student with only a 26% chance of winning a spot off the wait list, despite  
16 the policy prohibiting efforts by regents to influence admissions decisions by going around the  
17 regular process. The applicant was admitted. Auditor’s spokeswoman Margarita Fernandez  
18 confirmed to The Associated Press that Blum was the regent. Blum told the San Francisco  
19 Chronicle on Thursday that he’s never been caught doing anything wrong, yet, and that he has used  
20 his clout to get friends and family into the elite public system for years. This was the 98<sup>th</sup> time the  
21 Feinstein’s have been charged with insider scheming and crony manipulations of public resources.  
22  
23

24  
25 *Mother Jones Magazine* has published an article revealing that Bay Area tech insider Jaron Lanier  
26 was deeply involved with Jeffrey Epstein’s cult. Epstein’s sex director: Ghislaine Maxwell, was  
27 deeply involved with Kleiner Perkins top money boys and was photographed at their parties as she  
28 arranged sexual deeds. Kleiner Perkins was sued by one of its top staff for sex abuses. Kleiner

1 Perkins has long sat at the head of the table for Bay Area perversion and corruption. Tech insider  
2 Elon Musk was also involved with Jeffrey Epstein’s cult and also involved with Kleiner Perkins big  
3 boys.

4  
5 Kleiner Perkins was formed in 1972. It has traditionally focused on early-stage investments, but  
6 also does later-stage investments. Tom Perkins explained: “*We follow the McDonald’s hamburger*  
7 *concept of putting playgrounds in front of burger joints: ‘get ‘em while they are young and you can*  
8 *control them for life’...*”  
9

10  
11 The savvy team at Kleiner, aka KPCB, realized that buying politicians was prudent and, in fact,  
12 necessary for the kind of financial shell-games they played. Dianne Feinstein had been one of their  
13 big bets. Kamala Harris is their “next girl”. Barack Obama and Hillary Clinton would be their  
14 bigger, and most notorious plays. In a yet to be released recorded interview, Kleiner’s Tom Perkin’s  
15 explains his theory of quid-pro-quo with politicians. His words will make anyone shudder with fear  
16 about the fact that these types of Machiavellian billionaires actually exist. In fact, Kleiner Perkins  
17 and their festering child: Google, are all comprised of these kinds of warped, power-mad minds.  
18

19  
20 The firm was named after its four founding partners: Eugene Kleiner, Tom Perkins (“Poor  
21 people are Nazi’s..”), Frank J. Caufield, and Brook Byers. Other notable members of the firm  
22 include partners John Doerr and tax evader Raymond J. Lane, as well as high-profile individuals  
23 such as Sun Microsystems co-founder Bill Joy (who joined as partner in January 2005), former U.S.  
24 Secretary of State Colin Powell (who joined in July 2005 in the newly created position of "strategic  
25 limited partner"), Vinod Khosla and former U.S. Vice President Al Gore, who joined as partner in  
26 November 2007[9] [10] as part of a collaboration between KPCB and Gore's firm Generation  
27 Investment Management (GIM) to promote green technology, business and policy solutions.  
28 Kleiner Perkins was, and is, the founder of the collusion group known as the “Silicon Valley

1 Cartel”.

2 [Dean Baker](#) has discussed Mark Ames who published an [article](#) that should forever destroy  
3 any connection between the Silicon Valley tech billionaires and libertarian worldviews. The article  
4 reports on a court case that alleges that Apple, Google, and other Silicon Valley powerhouses  
5 actively conspired to keep their workers’ wages down. According to documents filed in the case,  
6 these companies agreed not to compete for each others’ workers dating at least as far back as 2005.  
7 Workers in the industry have filed a class action suit that could lead to the payment of billions of  
8 dollars in lost wages.

9 This case is striking at many levels, the most obvious being the effective theft of large  
10 amounts of money by some of the richest people on the planet from their employees. This is  
11 pernicious, but not altogether surprising. After all, the boss stealing from the workers is as dog bites  
12 man as it gets. Few would be surprised that rich people were willing to break the law to get even  
13 richer.

14 The real news here is *how* the Silicon Valley barons allegedly broke the law. The charge is  
15 that they actively colluded to stifle market forces. They collectively acted to prevent their workers  
16 from receiving the market-clearing wage. This means not only that they broke the law, and that they  
17 acted to undermine the market, but that they really don’t think about the market the way libertarians  
18 claim to think about the market.

19 The classic libertarian view of the market is that we have a huge number of people in the  
20 market actively competing to buy and sell goods and services. They acknowledge the obvious —  
21 some actors are much bigger than others — but there is so much competition that no individual or  
22 company can really hope to have much impact on market outcomes.

23 This point is central to their argument that the government should not interfere with  
24 corporate practices. For example, if we think our local cable company is charging too much for  
25 cable access, our libertarian friends will insist that the phone company, satellite television or other  
26 competitors will step in to keep prices in line. They would tell the same story if the issue were  
27 regulating the airlines, banks, health insurance, or any other sector where there is reason to believe  
28 that competition might be limited.

1 They would tell the same story on the labor side. If we are concerned that workers are  
2 getting low wages then the answer is to improve their skills through education and training rather  
3 than raise the minimum wage. If workers were worth more than the minimum wage, then the  
4 market would already be paying them more than the minimum wage.

5 They have the same story when it comes to requiring family leave, sick days, or other  
6 benefits. Libertarians would say that if workers value these benefits they would negotiate for them  
7 and be willing to trade off wages. There is no reason for the government to get involved.

8 This story about the wonders of the free market is simple in its appeal and it has the great  
9 implication that nothing should be done to keep the rich from getting ever richer. However the  
10 Silicon Valley non-compete agreements show that this is not how the tech billionaires believe the  
11 market really works. This is just a story they peddle to children and gullible reporters.

12 If they really believed the market had a deep sea of competitors in which no individual actor  
13 could count for much, then their non-compete agreements would serve no purpose. If Google,  
14 Apple, Intel and the other biggies agreed not to hire each others' workers, it really wouldn't affect  
15 their pay since there would always be new upstarts ready to jump in and hire away underpaid  
16 engineers.

17 The fact the Silicon Valley honchos took the time to negotiate and presumably enforce these  
18 non-compete agreements was because they did not think that there were enough competitors to hire  
19 away their workers. They believed that they had enough weight on the buy-side of the market for  
20 software engineers that if they agreed to not to compete for workers, they could keep their wages  
21 down.

22 It shouldn't be surprising that the Silicon Valley billionaires really are not libertarians. After  
23 all, much of their fortunes rest on patents and copyrights, both of which are government granted  
24 monopolies: the opposite of a free market.

25 But for some reason, seeing the tech whiz-kids forming a cartel to keep down their workers'  
26 wages seems an even more direct violation of any belief in libertarian principles. This is the same  
27 sort of cartel behavior that we associate with the cigar-chomping [robber barons of the late 19th](#)  
28 [century](#). It turns out that the biggest difference between the tech billionaires of the Internet Age and

1 the high rollers of the railroad age is the cigars.

2         These Silicon Valley Oligarchs own, control, partner with, co-invest in Harry Reid, Kamala  
3 Harris, The Pelosi Family, The Feinstein Family, The Newsom Family and other West Coast  
4 political manipulators.

5         The problem with social media is not that different services banned President Trump or  
6 other conservatives, it's that those services have such a stranglehold on free speech that even the  
7 President of the United States has trouble getting his message out without them. We have let a  
8 Silicon Valley Cartel have so much control over who gets heard and who doesn't, that it has  
9 become a very real threat to free speech in America. Instinctively, many conservatives tend to recoil  
10 at that statement because they incorrectly believe that only the government can threaten free speech.  
11 Even a decade ago, that would have been true – and that's coming from someone who did social  
12 media for Duncan Hunter's presidential campaign in 2008 Back then, if you had asked me what was  
13 more important, getting support for my candidate on conservative blogs and websites or building a  
14 powerful social media presence, I'd have said the former. That is no longer true.

15         Today, all political roads lead through Google, Twitter, and Facebook. These unaccountable  
16 corporations have become so powerful that websites, newspapers, candidates, and businesses have  
17 all become heavily dependent on them to get their message out. In fact, I would venture to guess  
18 that 95+% of the people that see anti-social media arguments, this column included, will learn about  
19 them through those three websites.

20         These companies, along with Apple and Amazon, have the power to set an agenda for the  
21 nation online and they are using it. Here's a fun little exercise. Pick any prominent conservative  
22 politician and search for them on Google. Once you get beyond their campaign website & social  
23 media profiles, you'll find mostly negative results for the first couple of pages. Now search for any  
24 prominent liberal politician and search for them on Google. Once you get beyond their campaign  
25 website & social media profiles, you'll find mostly positive results for the first couple of pages.  
26 Those results, which Google has deliberately orchestrated through the way they've designed their  
27 algorithms, help move millions of votes to Democrats every election. Facebook plays the same kind  
28 of games with information and it has a huge impact on the news. Facebook rewrote its algorithms to

1 dramatically reduce the traffic of conservative websites. Even more insidiously, Facebook may  
2 penalize your website for saying things they don't agree with about topics like COVID precautions,  
3 transsexuals, or election fraud. This puts conservative websites in a no-win situation. Either they  
4 self-censor what they believe on those topics or if they come out and say it, they have their reach  
5 reduced and people still don't get to hear their message.

6         What this means is that the information you are allowed to hear is increasingly controlled by  
7 a small, completely unaccountable group of far-Left-wingers that live in Silicon Valley. These are  
8 people with pronouns in their bios and MAO posters on their walls who believe everyone to the  
9 right of Tulsi Gabbard and Joe Manchin is a white supremacist. Do you trust them to be the arbiters  
10 of what news and opinions you are allowed to consume?

11         What choice do conservative consumers have at this point other than to leave and be  
12 silenced or stay with a service they despise to try to get their message out? The standard response to  
13 this has always been, "If you don't like these social media monopolies, build your own." Of course,  
14 that is always much easier said than done in a field like social media, where already having a huge  
15 share of the potential users on a service gives them an enormous competitive advantage, but as  
16 we've seen in the last few years, building a genuine competitor to the social media monopolies is  
17 nearly impossible. Companies that start to make competitive inroads will either be bought out by  
18 deep-pocketed Big Tech companies if they want their user base (see Instagram and WhatsApp for  
19 example) or targeted for destruction by the Big Tech Cartel if they don't, as we've seen with the  
20 Libertarian platform Parler (full disclosure: Dan Bongino is one of the owners of Parler). While I'm  
21 not a lawyer and can't tell you how Parler will ultimately fare in their suit against Amazon, I can  
22 tell you that the Big Tech Cartel uses its own standards like a weapon. They have set up a situation  
23 where whether you are adhering to their standards or not is an arbitrary judgment call and what do  
24 you know, conservatives almost always lose those judgment calls while liberals get the benefit of  
25 the doubt for the same supposed offenses 99 times out of 100. For example, if you want to claim  
26 Parler had violent content that wasn't deleted, you could literally point to thousands and thousands  
27 of similar posts on Twitter and Facebook. But Parler, which was one of the hottest apps in America,  
28 was targeted for destruction by the Big Tech Cartel while Facebook and Twitter get a pass for much

1 worse offenses because they're part of the club.

2       Again, none of this would matter if these weren't monopolies, but they are. So, here's the  
3 real question. What are Republican lawmakers going to do about this? Back in 2016, they could  
4 have done a lot, but they didn't. Right now, they probably can't do a whole lot, but that is likely to  
5 change quite a bit in the next 2-4 years. When it does, they need to move to destroy the Big Tech  
6 Cartel instead of allowing themselves to continue to be paid off in campaign contributions to look  
7 the other way. They can hit the Big Tech Cartel via anti-trust lawsuits, getting rid of section 230,  
8 making it easy for banned users to sue, sliding poison pills into these massive budget bills that hurt  
9 the stock value of these companies, or [my favorite, by breaking these monopolies up](#). Anything that  
10 does serious damage to these corporations is a step in the right direction. I would encourage  
11 Republican lawmakers to do this not only because these companies are a frightening threat to free  
12 speech in America, but because these companies are also targeting their constituents, making it  
13 harder for Republicans to win elections and doing everything in their considerable power to tilt this  
14 country as far as possible to the Left. So, in the end, it doesn't really matter why Republican  
15 lawmakers go after these companies, it's just critically important that they do, not just for their own  
16 sake, but for the good of the country and the world.

17  
18 Feinstein backed Italian mobster John Molinari for the next new mayoral position. To hedge her  
19 bets, she also kept an inside deal going with candidate Roger Boas, also running for Mayor, and  
20 later indicted for racketeering and child prostitution. Molinari lost due to his connections to  
21 corruption, abuse of his daughter (Per a San Francisco Police Department report), his tenure of the  
22 Golden Gate Bridge district where embezzlement was also charged and his old-school North Beach  
23 mob connections. The Weiner-Gate and Epstein Sex Island scandals prove that under-age and  
24 twisted sex scandals are part and parcel of this crowd. All three were placed under permanent  
25 surveillance by the FBI and multi-agency task force groups.  
26  
27  
28

1 Feinstein had a number of “bag-men” who delivered cash to her through various outlets. The  
2 Coblentz law firm was one such avenue of payola. The most notorious bag-man was James  
3 Bronkema, the head of the San Francisco Chamber of Commerce and a co-conspirator of Molinari’s  
4 on the Golden Gate Bridge District Board. Bronkema received massive funds from David  
5 Rockefeller, under various trusts and hotel guises, which Bronkema relayed to Feinstein for real  
6 estate favors. Bronkema’s mistress, Patricia Novak, the head of the San Francisco Fair, along with  
7 her girl friends, recall Bronkema as a tough character who threatened to “turn you into a headless  
8 body floating in San Francisco Bay” if you got on his bad side.  
9

10  
11 A testament to the Bronkema/Rockefeller/Feinstein play are the bridges that run between the  
12 Embarcadero Center buildings, above the roads in San Francisco. Rockefeller wanted those bridges  
13 but no other San Francisco developer was allowed to have them. This was per Feinstein’s  
14 machinations on behalf of her Rockefeller-ian benefactor. “She’s a bitch”, decried real estate  
15 developer Walter Shorenstein, “But she’s Rockefeller’s bitch”. Both the Embarcadero Center and  
16 the Golden Gate Bridge’s stand as permanent reminders of the beginning of this epoch of  
17 corruption.  
18

19  
20 Feinstein later found a new “Bag-man” named Richard Blum. His billions financed her move to the  
21 U.S. Senate with hopes of placing her in the White House. In exchange, she tripled his billions with  
22 public policy decisions that almost exclusively benefited Blum’s companies.  
23

24  
25 Feinstein made a deal with Silicon Valley’s Elon Musk, facilitated by Kleiner Perkins. She took a  
26 plot of land in Fremont, California which her family 1.) ran the real estate company for, 2.) the  
27 construction company for, 3.) the lobbying for, 4.) the HR firm for and 5.) other services for. The  
28 conflicts-of- interest stagger the imagination. She put Solyndra and Tesla side-by-side on that land

1 and her family grabbed the stock market warrants and lobbying cash for both of the companies.  
2 Solyndra failed and got raided by the FBI after \$500+M of taxpayercash went sideways. Because  
3 Barack Obama’s campaign was financed by The Silicon Valley Cartel, The White House ordered  
4 AG Eric Holder and AG Loretta Lynch to shut down the further investigations of Solyndra, Tesla  
5 and the rest of the Cleantech Crash Cartel disasters. The cover-up makes Watergate pale in  
6 comparison.

7  
8  
9 Feinstein helped Cartel member Elon Musk get part of NASA shut down and then get handed the  
10 very same NASA contracts that NASA was just curtailed from doing. It was amazing quid-pro-quo.  
11 Feinstein would stop at nothing to scrape from the pig trough of state and federal cash.

12  
13 The media outed Feinstein and she never made it to the White House. The internet has dubbed her:  
14 *“The most corrupt living politician in America”*. While Feinstein has faded, the Silicon Valley  
15 Cartel has tripled in size and power. With payrolls of \$200 million dollars a day, Kliener, Google  
16 and the Kleiner portfolio could order worker bee’s to do a lot of damage by trolling blogs and  
17 pushing election perception manipulation. They did and they still do!

18  
19  
20 The Cartel did a study that showed that “edgy candidates like women or blacks could stand out in  
21 the media” so they jumped over to use Barack Obama, and then Hillary Clinton, for their  
22 government kick- back schemes. The campaign financing deal between the Silicon Valley tech  
23 titans goes like this: *“Silicon Valley rigs the internet and media to put you in office and you rig the  
24 government to give us insane amounts of cash, stock perks, federal contracts and monopolies”*

25  
26  
27 Kleiner Perkins created a Russian venture development group and courted the biggest mobsters in  
28 Russia. In fact, Silicon Valley’s Steven Chu started handing taxpayercash to the Russian billionaires

1 Ener1, Severstal and other Russian mobster billionaire fronts until even Congress thought it was too  
2 overtly corrupt and shut him down. The heads of Russian Cartels were suddenly teaching The  
3 Silicon Valley Cartel a thing or two about rigging the system. Kleiner put their insider's Steven  
4 Chu, Matt Rogers, Steve Spinner, and Steve Westly in charge of the U.S. Department of Energy  
5 pay-to-play gambit with orders to get billions of U.S. taxpayerdollars shipped exclusively back to  
6 the Silicon Valley Cartel while sabotaging all of the Cartel's competitors.  
7

8  
9 For all of it's lovely gardens and tree covered lands, Stanford University is America's corruption  
10 training ground. Date rapes thrive in Stanford frat houses. Cover-ups are guaranteed to protect rich  
11 family donors. A huge number of horrific executive sex scandals have shamed the campus over and  
12 over. China and the Middle East have poured billions of dollars of bribes into the place. The CIA  
13 runs the "*Stanford Research Institute*" program on campus. Hot young female interns that go "up-  
14 the-hill" to Sandhill Road can count on getting sexually extorted by the venture capital guys they try  
15 to work for. The majority of the "*business leaders*" from Stanford have ended up getting  
16 investigated for SEC, FCC, DOJ and FTC violations. Stanford University is where the worst-of-the-  
17 worst douche bags are formed!  
18

19  
20 The Silicon Valley Cartel gets most of their payola from skims off-the-top in investment bank  
21 scams and from stock market pump-and-dumps created by ePlaintiff 42loiting the free government  
22 money that they use to artificially hype the stock market valuations while Goldman Sachs and The  
23 Silicon Valley Cartel skim the momentary high-points on the Wall Street stock exchange.  
24

25  
26 These days, in San Francisco proper, almost every third City Hall official is under investigation for  
27 corruption. The current Mayor of San Francisco even had sex with one of the arrested goons. The  
28

1 FBI has been asked to pay “special attention” to the crony crime circuit of City Hall. Previous  
2 corrupt Mayor Ed Lee had a convenient heart attack at the grocery store.

3  
4 Kleiner Perkins has always loved to steal federal funds under the guise of “It will help the nation”.

5  
6 The green-washing “Cleantech” database deals didn’t work out so well so they moved their pitch to  
7 “Let’s stop terrorists” with Plaintiffs databases. Kleiner had funded many database companies so  
8 Silicon Valley pitched Washington that all of their database companies could spy on every  
9 American and “see the future” like Tom Cruise did in the movie **Minority Report** and catch bad  
10 guys before they become bad”.  
11

12  
13 This was just a scam to try to make their wasted database internet toys stay relevant. That scam has  
14 now failed too. Silicon Valley’s “Big Data” has not only missed every single terrorist activity but it  
15 has steered law enforcement down wild goose chases and cost the consumer electronics industry a  
16 hundred billion dollars in losses because people hate being spied on. Big Data trying to accurately  
17 figure out what organic things will do is like trying to get the Amish to build nuclear reactors. The  
18 CIA has found out that you can generate lots of pretty bar graphs and flowcharts with Silicon  
19 Valley’s tools but the outcome will be nonsense that has no prudent application in real life.  
20

21  
22 The newest Silicon Valley “Please-Buy-Plaintiffs-Databases” scam is “Driverless” cars. They need  
23 databases to track and spy on all of the drivers.  
24

25  
26 NO MEMBER OF THE PUBLIC wants driverless cars but The Silicon Valley Cartel gets  
27 Obama and Hillary to give them both DOT and GOVT taxpayercash for the facade driverless car  
28

1 projects while they sell their lithium ion batteries, from the Afghanistan lithium fields, that they  
2 have monopolized. Great! Apple, exposed in the media in this scheme, was recently forced to  
3 cancel it's car project which was also diving for federal handout dollars.

4  
5 With modern AI-based forensics, any investigator can now see how these Silicon Valley Cartel  
6 dirty payola deals work, who did them, how the money is hidden and who the beneficiary trails lead  
7 to, in a series of articles.

8  
9  
10 Everyone in the world is now aware of the fact that John Doerr, Dianne Feinstein, Elon Musk, Larry  
11 Page and Eric Schmidt rig elections, White House decisions and the direction of the use of U.S.  
12 Treasury funds. The emails and FBI documents prove it. How long can Americans tolerate the use  
13 of 40% of their paychecks to pay for John Doerr's private jets? That remains to be seen.

14  
15 The Golden Gate Bridge 50<sup>th</sup> Anniversary Bash was an extravagant party created to skim funds for  
16 the political campaigns of Roger Boas, John Molinari, Dianne Feinstein and their friends. The  
17 political crooks on the corrupt Golden Gate Bridge Board, hounded by Gene Pratt of Marin, tried to  
18 push a twenty two million dollar party that should have only cost \$200,000.00. The majority of the  
19 money was originally planned to be skimmed, payola-ed, and back-door conduit-ed, as Dark  
20 Money, to these politicians.

21  
22  
23  
24 Roger Boas was indicted for embezzling city funds from Moscone Center and running an underage  
25 whore-house (with an SFPD official) for City Hall officials.

26  
27 The Golden Gate Bridge Board was publicly shamed into canceling the scam and down-sizing to a  
28 slightly less crony operation.

1  
2 John Molinari was placed under FBI watch, was charged with abuse of his daughter, who was  
3 removed from his home by the Police, and forever monitored for corruption. His offices and rentals  
4 at Van Ness and Golden Gate Avenue, in San Francisco, were bugged.

5  
6 Bridge Director, James Bronkema (David Rockefeller's "bag man" on the West Coast) tried to  
7 make his mistress: Patricia Novick, the Producer of the party but that plan got outed. Bronkema and  
8 the Coblentz law firm were placed under watch for Dark Money political shenanigans.  
9

10  
11 Dick Blum was suggested as the provocateur who got Dan White to kill Harvey Milk and Mayor  
12 George Moscone in order to get Dianne Feinstein her position in government. San Francisco private  
13 investigator Paul Kangas has some theories about the whole Moscone and Feinstein mess. San  
14 Francisco lawyer Harmeet Dhillon has other theories.  
15

16  
17 The Golden Gate Bridge scandal was typical of every major project in the Bay Area.  
18

19 During this period, the San Francisco oligarchs, elitists and gatekeepers who control crony  
20 capitalism in San Francisco included: Janet Reilly and Clint Reilly (who the lead characters in the  
21 House Of Cards TV series were based on); Ed Lee; John Molinari; Roger Boas; Dick Blum; Vinod  
22 Khosla; Anybody named Haas or Getty; Charlotte Maillard; Ed Shultz; Henry Kissinger; Will  
23 Hearst; Nancy Pelosi; Dianne Feinstein; Kathryn Feinstein; Plaintiff 22Weiner; Darcy Brown;  
24 Stewart Brand; Joseph Costello; Carl Livingston; Henry Adams; Wally McCormick; Bob McKeen;  
25 Jean Bricker; Richard Thieriot; Wilkes Bashford; James Bronkema; William Ball; Gordon Bellis;  
26 Frances Bowers; Donna Casey; Gretchen Cebrian; Tina Cella; Lawrence Chickering; Sheldon  
27 Cooper; Charles Crocker; Edwin Cutler; Myron Du Bain; Coburn Everdell; Donna Ewald; John  
28

1 Gamble; William Gaylord; Richard Graff; Reid Hoffman; Ann Getty; Anthony Hale; Matilda  
2 Kunin; Wendy Linka; Mary Moulton; William Newsom; John Owsley; Bokkara Patterson; Juan  
3 Reynal; Steven Swig; Anyone named Thieriot; Wilfred Von Bulow; Michael Whitman; Brayton  
4 Wilbur; Rita Barela; John Brunelle; John Calori; William Coblentz; Joseph V. Costello; John  
5 Diefenbach; Myron Dubain; Frank Woods; Mort Feld; T. Jack Foster Jr; Gordon P Getty; James  
6 Gilleran; John Goy; Evie Haas; Bryan Hemming; John Jacobs; Fritz Jewett; Ray Jones; George  
7 Keller; Art Kern; Bob Lansdon; Arthur Latno; Robert Leefeldt; Bob Lurie; Malcom MacDonald;  
8 Dan McCall; Wallace McCormack; Rich Miller; Elizabeth Pfau; Forette Pomeroy; David Ringler;  
9 Hadley Roff; Norman Rosenblatt; Albert Schlesinger; Steven L. Swig and a whole pack of related  
10 insiders.  
11

12  
13 Now, as they die off, the whole story can be revealed. Part of that story is based on interviews and  
14 meetings with some of them. People like Tom Perkins, James Bronkema, Roger Boas, Melvin Belli  
15 and others, ultimately regretted their crimes, or corruptions, and went on-the-record, near the end of  
16 their days.

5  
6 Maëlle Gavet, a 15-year veteran of the tech industry, recalls an unsettling conversation she  
7 had at a Silicon Valley cocktail party in 2017.

8 Gavet was chatting with an early investor at Uber and mentioned some of the disturbing  
9 news surrounding the company’s co-founder and CEO, Travis Kalanick. There were revelations  
10 about spying on passengers, sexual harassment, a toxic macho work culture, and according to  
11 Kalanick’s own friends, his “aspirational baller syndrome.”

12 The investor, Gavet told The Post, just laughed and said, “Oh, no, he’s so much worse than  
13 anybody knows.” Gavet was nonplussed, asking the investor why he chose to do business with  
14 somebody so unrepentantly awful.

15 “He may be an asshole,” the investor told her. “But he’s my asshole.”

16 This was just one of the many interactions that inspired Gavet to write her new book,  
17 [“Trampled by Unicorns: Big Tech’s Empathy Problem and How to Fix It”](#) (  
18 [https://www.amazon.com/Trampled-Unicorns-Techs-Empathy-Problem/dp/1119730643?](https://www.amazon.com/Trampled-Unicorns-Techs-Empathy-Problem/dp/1119730643?tag=nypost-20)  
19 [tag=nypost-20](#) ) (Wiley), out Tuesday. Though Kalanick was ousted as Uber’s CEO in 2017 and  
20 stepped down from the company’s board of directors earlier this year, his psychopathic behavior is  
21 all too common among Big Tech execs, Gavet writes.

22 Enlarge ImageUber’s ex-CEO Travis Kalanick has been accused of spying on passengers  
23 and building a toxic macho work culture.NY Post composite/Mike Guillen

24 According to the Hare Psychopathy Checklist — the universally accepted diagnostic tool  
25 used to assess this disorder — a psychopathic personality includes traits such as a grandiose sense  
26 of self-worth, a lack of remorse or guilt, poor behavioral controls, pathological lying and a lack of  
27 empathy.

28 These attributes aren’t just present “but celebrated in Silicon Valley,” says Gavet, who once

1 held the position of executive vice-president of global operations for Priceline Group, among other  
2 roles.

3 News of bad behavior by Silicon Valley CEOs — from Elon Musk’s tweeting out  
4 misinformation about the pandemic to WeWork co-founder Adam Neumann now being probed by  
5 the New York state attorney general over allegations of self-dealing — has recently become so  
6 frequent, it’s considered normal.

7 Take Theranos CEO Elizabeth Holmes, known for her eerie lack of blinking and an  
8 allegedly faked baritone voice. Once a Silicon Valley darling, she became a self-made billionaire by  
9 promising her blood-testing company would revolutionize health care with innovative finger-prick  
10 tests that delivered quick, painless, cheap results. But her claims were a lie. She now stands accused  
11 of fraud and is reportedly planning to make an insanity plea when she goes to trial this March.

12 Through the power of her psychopathy, Holmes convinced many — including veteran  
13 investors and politicians — “of her ‘messianic vision’ to defy reality with her ‘miracle’ blood-  
14 testing kit,” Gavet writes.

15 Research by the FBI found that companies managed by psychopaths tend to have decreased  
16 productivity and low employee morale. In fact, Silicon Valley’s psychopathic traits “trickle down  
17 through entire organizations,” says Gavet. “In effect creating psychopathic companies.”

18 Enlarge ImageWeWork co-founder Adam Neumann is being probed by the New York state  
19 attorney general over allegations of self-dealing.NY Post composite/Mike Guillen

20 This is enabled by an “infantilized culture” at many start-up companies, where employees  
21 become accustomed to working in “hyper-privileged bubbles where their every whim is catered to  
22 and every need anticipated,” she writes.

23 At Google, for instance, employees are treated to nap pods, free massages and a luxury  
24 hotel-style concierge service to run errands. The biotech firm Genentech reportedly offers perks like  
25 on-site car washes, haircuts, spa treatments and even a dentist.

26 “By sheltering these guys in this little cocoon or womb, it kind of emphasizes that young  
27 male problem, where Mom takes care of everything,” says Richard Walker, professor emeritus of  
28 geography at the University of California, Berkeley, and a veteran Valley-watcher. “It’s kind of

1 magical, where food just appears, and ‘If my treat isn’t there it’s because Mom forgot to provide it!’  
2 ”

3 And it’s resulted in a serious lack of empathy, writes Gavet.

4 In February 2018, a 61-year-old livery driver shot himself in front of City Hall in lower  
5 Manhattan, claiming he’d lost his livelihood because of competition from Uber cars. “I will forever  
6 remember the reaction of two of my friends working at Uber at the time,” says Gavet.

7 “During a dinner party, I asked how they felt about the suicide, and they were both like, ‘It’s  
8 sad, but it’s the cost of disruption.’ ”

9 It’s an excuse she’s heard repeatedly. “I can’t tell you the number of times I’ve heard people  
10 in Silicon Valley dismiss something horrible they may have caused with, ‘That’s the cost of  
11 disruption,’ ” she says. “They’re like, ‘Yeah, it’s awful, but we’re trying to make the world a better  
12 place, so it’s OK.”

13 His legacy has cultivated an indelible association between being a jerk and a genius.

14 - Maëlle Gavet on Steve Jobs

15 While that behavior can be found in any industry, from Wall Street to mass media, Gavet  
16 says it’s particularly embedded and hard to fix in tech, “because it tends to take root at the early  
17 stages of a start-up.”

18 “The types of things I witnessed over the years include the work hard/play hard attitude,  
19 epitomized by a culture of booze-fueled partying; recklessness; the prioritizing of hyper-growth  
20 over sustainable profits; and demeaning comments about women and minorities,” she writes.

21 The examples of it are abundant, from Facebook CEO Mark Zuckerberg’s non-apology after  
22 the Federal Trade Commission fined his company \$5 billion for allowing Cambridge Analytica to  
23 mine user data for political purposes, to Jeff Bezos complaining during an engineer’s presentation,  
24 “Why are you wasting my life?”

25 But some of the more glaring examples happen behind the scenes. Gavet spoke with a  
26 content moderator for Facebook, who worked for the company between 2017-2018 and looked for  
27 hate speech and graphic violence on the platform. He recalled flagging an image posted of a  
28 massacre in Southeast Asia.

1 Enlarge ImageAmazon CEO Jeff Bezos once said to an engineer during a presentation,  
2 “Why are you wasting my life?”NY Post composite/Mike Guillen

3 “There was an image of a baby with somebody’s foot on its chest,” he said. “I had decided  
4 that was a dead baby because it wasn’t fighting back.” But his auditor felt otherwise, insisting there  
5 was no proof that the baby was dead, and the photo remained.

6 Content moderators get a quality score and every image they mistakenly flag is a ding  
7 against their score. The result can be dehumanizing, according to Gavet.

8 “Imagine arguing about whether a baby is dead because you don’t want to get your quality  
9 score down,” she says. “All you care about is getting the point back, not whether the baby is dead.”

10 The moderator who spoke to Gavet was later diagnosed with PTSD and is now suing  
11 Facebook.

12 The patron saint of Big Tech douches, the one who inspired an entire generation of start-up  
13 entrepreneurs to put their worst face forward, was late Apple co-founder and CEO Steve Jobs. He  
14 disliked wearing shoes (or showering), preferred parking in handicapped parking spots and once  
15 motivated employees by calling them “f–king d–kless assholes.”

16 “His legacy has cultivated an indelible association between being a jerk and a genius,”  
17 writes Gavet. “Which has ballooned to the point where many people believe that a founder-CEO, in  
18 particular, actually has to be a jerk to be a genius.”

19 She calls it the Steve Jobs Syndrome, and she’s witnessed both powerful and up-and-coming  
20 tech exes believing in the myth like it’s doctrine. Theranos CEO Holmes ruthlessly copied Jobs —  
21 not just by wearing black turtlenecks — but also by following his example of persuading people “to  
22 believe he was a prophet even when he was wrong,” Gavet writes.

23 Enlarge ImageLate Apple CEO Steve Jobs preferred parking in handicapped parking spots  
24 and once motivated employees by calling them “f–king d–kless assholes.”NY Post composite/Mike  
25 Guillen

26 Gavet recalls working with a high-profile tech founder — she was overseeing the company’s  
27 acquisitions — and “every time I called him out on his lack of empathy and humility, which clearly  
28 led to many disastrous decisions, he would say to me, ‘Steve Jobs didn’t build Apple by being

1 humble and caring about people.’ ”

2       These myths wouldn’t survive if the CEOs alone believed them. Former WeWork CEO  
3 Neumann was celebrated in the media for his audacious leadership style — from barefoot strolls  
4 through Manhattan to offering his employees tequila shots and Run DMC concerts in the office.

5       But Neumann’s success was a mirage. “He made millions leasing buildings he partly owned  
6 back to WeWork,” Gavet writes. He also bought the trademark to the word “we” and then sold the  
7 trademark use to WeWork, his own company, for \$5.9 million.

8       After initially being valued at \$47 billion in January 2019, WeWork’s worth reportedly  
9 dropped to \$10 billion in September that same year. But when Neumann stepped down as CEO, he  
10 was paid \$185 million as a “consulting fee.”

11       Neumann isn’t the only CEO who’s been rewarded for actively making things worse for  
12 investors. In early May, Tesla CEO Musk tweeted, “Tesla stock price is too high, IMO.” Within an  
13 hour of his tweet, the Tesla share price plummeted 10 percent, wiping \$14 billion off the company’s  
14 stock market value. One investor tweeted back at Musk, “Dude ... I just lost \$10k because of this  
15 tweet. Wtf is wrong with U?”

16       Not only is Musk still Tesla’s CEO, but his net worth also jumped this summer to \$103  
17 billion, up from \$22.4 billion last year, making him the third-richest person in the world.

18       Enlarge Image

19       For anything to change, Gavet argues that companies need to take a more empathetic  
20 approach.

21       “They need to hire differently, promote differently, reward differently,” she says. “I’m an  
22 optimist, but I’m also a capitalist. I believe there are ways to make a company more empathetic,  
23 more reasonable, a force of good in the world. And I believe in the long run, that would actually be  
24 beneficial for the businesses.”

25       She sees evidence of it happening already. Tim Bray, a celebrated engineer at Amazon and  
26 their onetime vice president of Web Services, quit his job in May because of the “toxicity running  
27 through the company culture,” as he wrote in a blog post.

28       “I choose neither to serve nor drink that poison,” he wrote.

1 Bray isn't alone in recognizing the toxic culture, but many are unsure how to take a stand.

2 "Some of the CEOs I'm close to — and I still think they are, to a large extent, psychopaths  
3 — they're struggling," says Gavet. "They tell me, 'It feels like I'm damned if I do, damned if I  
4 don't.' They get criticized for being too aggressive, but when they try to be empathetic, they're  
5 criticized for being too soft."

6  
7 The trend of psychopathy at the top of Big Tech won't be "disrupted," Gavet says, until we  
8 stop expecting the next Steve Jobs to be as abrasive and psychotic as, well ... Steve Jobs.  
9 [Joel B. Pollak notes](#) that former Vice President Joe Biden promised earlier this month that his  
10 climate change policies will bring new jobs — "good, paying union jobs." He has made — and  
11 broken such promises before.

12  
13 In 2009, Biden [promised](#) ( [https://www.youtube.com/watch?v=5g\\_6TYULxMg](https://www.youtube.com/watch?v=5g_6TYULxMg) ) that  
14 \$529 million in new Department of Energy loan guarantees to Fisker Automotive to produce  
15 electric cars in Delaware would provide "billions of dollars in good, new jobs." Four years later,  
16 Fisker filed for bankruptcy — without producing a single car in the U.S.

17 As Breitbart News [reported](#) ( <https://www.breitbart.com/politics/2013/11/23/obama-admin-picks-green-energy-loser/> ) at the time, Fisker was granted the loan guarantees to produce a hybrid  
18 sports car called the "Karma" for the luxury auto market, with a price of \$103,000. High-profile  
19 political figures lobbied for the deal. Fisker filed for bankruptcy failed in 2013 and taxpayers lost  
20 \$139 million on the venture. Republicans noted: "The jobs that were promised never materialized  
21 and once again tax payers are on the hook for the administration's reckless gamble."

22  
23 Along with failed solar panel manufacturer [Solyndra](#) ( <https://www.breitbart.com/politics/2011/09/19/solyndra-scandal-hits-obama-white-house/> ) , Fisker  
24 was one of the highest-profile failures of the stimulus, which Biden [oversaw](#) ( <https://www.npr.org/2020/04/06/828303824/a-look-back-at-how-joe-biden-managed-the-2009-stimulus-package> ) , and which he has touted on the campaign trail as proof of his ability to handle  
25  
26  
27  
28 America's economic recovery.

1           Moreover, Vice President Biden admitted pushing for Fisker to build its new “Karma” plant  
2 in his home state of Delaware.

3           As the *Wall Street Journal* [reported](#) (  
4 <https://www.wsj.com/articles/SB126074549073889853> ) : “A spokeswoman for Mr. Biden said  
5 that he had made no direct appeals to GOVT [Department of Energy] on Fisker’s behalf before the  
6 loan was approved, though he did talk to the company several times afterward to put in a plug for  
7 his home state.”

8           The Delaware site, an old GM plant, was located across the continent from Fisker’s  
9 corporate headquarters in Southern California.

10          The *Washington Post* [noted](#) ( [https://www.washingtonpost.com/cars/fisker-an-influential-](https://www.washingtonpost.com/cars/fisker-an-influential-disaster/2013/04/05/a7438a0a-9e21-11e2-9219-51eb8387e8f1_story.html)  
11 [disaster/2013/04/05/a7438a0a-9e21-11e2-9219-51eb8387e8f1\\_story.html](https://www.washingtonpost.com/cars/fisker-an-influential-disaster/2013/04/05/a7438a0a-9e21-11e2-9219-51eb8387e8f1_story.html) ) :

12          Even current Vice President Joe Biden was drawn into the Fisker debacle. To build its  
13 planned Project Nina vehicle—to be dubbed the Atlantic—Fisker maneuvered itself into a  
14 purchase of a former GM plant in Wilmington, Del., that had once built the smart  
15 Pontiac Solstice and Saturn Sky roadsters. The plant was one of many properties split  
16 off during GM’s 2009 bankruptcy filing, and was to be sold as a part of the “old GM.”  
17 While the plant had some physical advantages of being near a port, it had several big  
18 disadvantages—namely, it was a world away from Fisker’s U.S. headquarters in  
19 California, needed extensive retooling, was far too large for the task at hand,  
20 and was ostensibly more expensive to retrofit than some other “old GM”  
21 properties, such as Doraville, the suburban Atlanta plant that once built GM minivans.

22          The Wilmington plant did have the huge advantage of lying in Vice President Biden’s  
23 backyard. Lobbying by all local politicians is said to have won the day for the  
24 Wilmington plant, but like much of Fisker’s financial history, the details are blocked  
25 from view. [Vice President Biden would not respond directly to questions about Fisker](#)  
26 [posed by ABC News](#), (  
27  
28

1 <http://abcnews.go.com/Blotter/fisker-build-electric-cars-us/story?>

2 id=16458585#.UAY9T7TY8rV ) his office insisting only that he supported the ATVM  
3 [Advanced Technology Vehicles Manufacturing] program—but failing to address how a  
4 site from his hometown was given a Federally-backed reprieve.

5  
6 As the left-wing *Nation* later [noted](https://www.thenation.com/article/archive/biden-delaware-way-graft/) ( [https://www.thenation.com/article/archive/biden-](https://www.thenation.com/article/archive/biden-delaware-way-graft/)  
7 [delaware-way-graft/](https://www.thenation.com/article/archive/biden-delaware-way-graft/) ), the new Fisker facility was less than five miles from Joe Biden’s Delaware  
8 home.

9 Biden proudly [announced](https://www.energy.gov/articles/vice-president-biden-announces-reopening-former-gm-boxwood-plant) ( [https://www.energy.gov/articles/vice-president-biden-](https://www.energy.gov/articles/vice-president-biden-announces-reopening-former-gm-boxwood-plant)  
10 [announces-reopening-former-gm-boxwood-plant](https://www.energy.gov/articles/vice-president-biden-announces-reopening-former-gm-boxwood-plant) ) the deal in 2009: “We knew that we needed to  
11 do something different – in Delaware and all across the nation.” He [declared](https://abcnews.go.com/Blotter/car-company-us-loan-builds-cars-finland/story?id=14770875) ( <https://abcnews.go.com/Blotter/car-company-us-loan-builds-cars-finland/story?id=14770875> ) :  
12 “We’re making a bet on the future, we’re making a bet on the American people, we’re making a bet  
13 on the market, we’re making a bet on innovation.” When Fisker won the loan, Biden [celebrated](https://abcnews.go.com/Blotter/car-company-us-loan-builds-cars-finland/story?id=14770875)  
14 ( <https://abcnews.go.com/Blotter/car-company-us-loan-builds-cars-finland/story?id=14770875> ) :  
15 “The story of Fisker is a story of ingenuity of an American company, a commitment to innovation  
16 by The U.S. Government and the perseverance of the American auto industry.” He [proclaimed](https://investativeresearchcenter.org/hunter-biden-listed-as-fisker-creditor-raising-questions-about-green-energy-boondoggle/)  
17 ( [https://investativeresearchcenter.org/hunter-biden-listed-as-fisker-creditor-raising-questions-](https://investativeresearchcenter.org/hunter-biden-listed-as-fisker-creditor-raising-questions-about-green-energy-boondoggle/)  
18 [about-green-energy-boondoggle/](https://investativeresearchcenter.org/hunter-biden-listed-as-fisker-creditor-raising-questions-about-green-energy-boondoggle/) ) : “This is seed money that will return back to the American  
19 consumer in billions and billions and billions of dollars in good, new jobs.”

20  
21 It was a pledge that would be [described](https://www.canadianbusiness.com/companies-and-industries/the-ode-fisker-automotive-2007-2013/) ( [https://www.canadianbusiness.com/companies-](https://www.canadianbusiness.com/companies-and-industries/the-ode-fisker-automotive-2007-2013/)  
22 [and-industries/the-ode-fisker-automotive-2007-2013/](https://www.canadianbusiness.com/companies-and-industries/the-ode-fisker-automotive-2007-2013/) ), in retrospect, as “delusional.”

23 Fisker produced exactly [zero](https://www.youtube.com/watch?feature=player_embedded&v=KAyc-8qGpv0) ( [https://www.youtube.com/watch?](https://www.youtube.com/watch?feature=player_embedded&v=KAyc-8qGpv0)  
24 [feature=player\\_embedded&v=KAyc-8qGpv0](https://www.youtube.com/watch?feature=player_embedded&v=KAyc-8qGpv0) ) cars in the U.S. Instead, it [produced](https://abcnews.go.com/Blotter/car-company-us-loan-builds-cars-finland/story?id=14770875) ( <https://abcnews.go.com/Blotter/car-company-us-loan-builds-cars-finland/story?id=14770875> ) its  
25 first cars in Finland. In addition to the losses for the federal taPlaintiff 42ayer, Delaware had  
26 [committed](https://whyy.org/articles/delawares-hope-for-fisker-rests-with-chinese-billionaire/) ( <https://whyy.org/articles/delawares-hope-for-fisker-rests-with-chinese-billionaire/> )  
27 over \$20 million to the deal by the time the company filed for bankruptcy in 2013.  
28

1 Biden learned nothing from the Fisker fiasco. In his climate speech, he promised once again  
2 to promote electric vehicles, saying he would deliver ( [https://www.rev.com/blog/transcripts/joe-](https://www.rev.com/blog/transcripts/joe-biden-climate-change-speech-transcript-september-14)  
3 [biden-climate-change-speech-transcript-september-14](https://www.rev.com/blog/transcripts/joe-biden-climate-change-speech-transcript-september-14) ) “more than a million new jobs in the  
4 American auto industry.”

5 We have heard such promises before... The politicians turned out to have lied in order to  
6 profit on insider trade

10 -----  
11 ELON MUSK PROVEN TO HAVE exposed WORKERS TO DEADLY COVID ON  
12 PURPOSE BECAUSE OF HIS CRAZY IDEAS

13 SAN FRANCISCO - Tesla's Bay Area production plant recorded hundreds of positive  
14 covid-19 cases following CEO Elon Musk's defiant reopening of the plant last May, according to  
15 county-level data obtained by a legal transparency website.

16 The document, obtained by the website PlainSite following a court ruling this year, showed  
17 Tesla received around 10 reports of covid-19 in May when the plant reopened, and saw a steady rise  
18 in cases all the way up to 125 in December, as the disease caused by the novel coronavirus peaked  
19 around the country.

20 The revelation follows The Washington Post's reporting in June that there had been multiple  
21 positive covid-19 cases reported at Tesla's facilities in Fremont, Ca., after Musk decided to reopen  
22 despite a countywide shelter-in-place order, daring officials to arrest him. The data, covering the  
23 months between May and December, showed there were around 450 total reported cases. Roughly  
24 10,000 workers work at the plant.

25 For nearly a year, the Alameda County Public Health Department, which is where Fremont  
26 is located, argued it could not release data on the number of cases under the Health Insurance  
27 Portability and Accountability Act, which grants privacy over health records. As part of an  
28 agreement struck in mid-May allowing Tesla to reopen, Tesla was required to report positive cases

1 to the Alameda County Public Health Department. Despite around 10 positive cases in May,  
2 according to the data, the health department told The Post in early June there were no known cases  
3 of workplace infections affecting county residents.

3 cool are actually getting looks of hate and pathos as they drive by. The tone deaf buyers of the car  
4 with the most safety and engineering defects is not something to be proud to drive. It is ***something***  
5 ***to be ashamed to drive.***

6 -----  
7 CORRUPTION, BRIBES AND CRONY POLITICS RULE SAN FRANCISCO THEY  
8 SAY

9 San Francisco and Silicon Valley are both run by the same dynastic criminally corrupt  
10 families and sick perverted insiders. They send their kids to Stanford University where they  
11 indoctrinate and brainwash the next generation into a culture of greed, sex, political bribery and  
12 Sandhill Road collusion. San Francisco City Hall is powered by hookers, sex and kick-backs. Every  
13 attendee at the San Francisco Symphony and Opera opening nights are the "elite" scum of the  
14 Pacific Heights money and power manipulation crowd. Old men wield young arm candy as they  
15 siphon off taxpayers money into their personal construction and real estate company City contracts.  
16 The FBI can't even keep up with all of the crimes. If you think the FBI arrests of Northern  
17 California political criminals is going good, know that they FBI has a backlog that is years long. An  
18 FBI forensic accounting investigation of the CPA files and investment bank records of each "old  
19 San Francisco family" and public official would reveal stock market crimes, insider trading, real  
20 estate money laundering and stock market payola crimes that are Off-The-Scales!

# Homeless people at risk of COVID-19 can receive alcohol and cannabis in San Francisco hotel rooms. It's part of a controversial strategy to stop the virus' spread.

Trisha

Thadani@TrishaThadani

New: The federal stimulus package will erase the majority of San Francisco's projected \$650 million budget deficit over the next two years, saving

City Hall from having to make painful service cuts and layoffs. For now.

[https://www.sfchronicle.com/politics/article/Federal-stimulus-nearly-wipes-away-San-16010321.php?utm\\_campaign=CMS%20Sharing%20Tools%20\(Premium\)&utm\\_source=t.co&utm\\_medium=referral\\_via\\_@sfchronicle](https://www.sfchronicle.com/politics/article/Federal-stimulus-nearly-wipes-away-San-16010321.php?utm_campaign=CMS%20Sharing%20Tools%20(Premium)&utm_source=t.co&utm_medium=referral_via_@sfchronicle)

Centered around San Francisco, powerful and greedy people abuse the public system in order **to manipulate TRILLIONS of government treasury and stock market dollars** into their own pockets. They lie, cheat, bribe, steal, attack, and even kill, in order to grab this money (provided from the pockets of the taxpayers). They create fake "*political issues*" in order to steer massive amounts of government money to "*solutions*" that they just happen to own the companies of. ("*Follow the Money*") They collude on cover-ups, cover-stories, pump-and-dumps, fake "*Stimulus Funds*" redirection and other illicit deeds. Famous politicians are a very big part of this crime. They are easy to spot via the tens of millions of dollars, in their personal bank accounts, which only appeared after they took office. One part of them is: *The Silicon Valley Tech Cartel*; an anti-trust violating organized-crime operation based on quid-pro-quo. They manipulated the Dept of Energy to only fund political favorites and to sabotage the competitors of those favorites in an epic violation of anti-trust and anti-racketeering laws.

[San Francisco Criminals Now Targeting Residents Due to Lack of Tourists, Say City Officials](#)

Posted by **Mike LaChance**

*“tourism has gone down so substantially in San Francisco that criminal rings that targeted tourists in areas that tourists frequent no longer have tourists there”*

To

urism in the city of San Francisco is down, partly due to the pandemic, but also because of crime. As a result, criminals are now reportedly shifting their focus to city residents. Wealthy movie star Julia Roberts moved to San Francisco and now she has to have full time security because gangsters from across town have staked out her mansion for robberies. It is not just the rich, anybody with a Tesla parked at their house is targeted by robbers.

How’s that for painful irony?

**San Francisco is now a filthy cesspool riddled with feces and drugs thanks to  
progressive ...theblaze.com**

Famous writer Ezra Klein says San Francisco has gone socially insane.  
*" If progressivism can't work there, why should the country believe it can work anywhere  
else?"* He said that: You may have heard that San Francisco's Board of Education voted 6 to 1 to  
rename 44 schools, stripping ancient racists of their laurels, but also Abraham Lincoln and Senator  
Dianne Feinstein. The history upon which these decisions were made was dodgy, and the results  
occasionally bizarre. Paul Revere, for instance, was canceled for participating in a raid on  
Indigenous Americans that was actually a raid on a British fort. In normal times, bemusement  
would be the right response to a story like this. Cities should have idiosyncratic, out-there politics.

1 You need to earn your “Keep X weird” bumper stickers. And for all the Fox News hosts who’ve  
2 collapsed onto their fainting couches, America isn’t suffering from a national shortage of schools  
3 named for Abraham Lincoln.

4  
5 But San Francisco’s public schools remain closed, no matter the name on the front. “What I cannot  
6 understand is why the School Board is advancing a plan to have all these schools renamed by April,  
7 when there isn’t a plan to have our kids back in the classroom by then,” Mayor London Breed said  
8 in a statement. I do not want to dismiss the fears of teachers (or parents), many living in crowded  
9 homes, who fear returning to classrooms during a pandemic. But the strongest evidence we have  
10 suggests school openings do not pose major risks when proper precautions are followed, but their  
11 continued closure does terrible harm to students, with the worst consequences falling on the  
12 neediest children. And that’s where this goes from wacky local news story to a reflection of a  
13 deeper problem. ***California has the highest poverty rate in the nation***, when you factor in housing  
14 costs, and vies for the top spot in income inequality, too. California is dominated by Democrats, but  
15 many of the people Democrats claim to care about most can’t afford to live there. San Francisco  
16 politicians generally have low IQ’s and loud mouths, just like internet “influencers”.

17  
18 [San Francisco residents stop city from renaming 44 schools honor so-called racist historical](#)  
19 [leaders](#)

20  
21 The median price for a home in California is more than \$700,000. As Bloomberg reported in 2019,  
22 the state has four of the nation’s five most expensive housing markets and a quarter of the  
23 nation’s homeless residents. The root of the crisis is simple: It’s very, very hard to build homes in  
24 California. When he ran for governor in 2018, Gavin Newsom promised the construction of 3.5  
25 million housing units by 2025. Newsom won, but California has built fewer than 100,000 homes  
26 each year since. In much of San Francisco, you can’t walk 20 feet without seeing a multicolored  
27 sign declaring that Black lives matter, kindness is everything and no human being is illegal. Those  
28 signs sit in yards zoned for single families, “If you’re living eight or 10 people to a home, it’s hard

1 to protect yourself from the virus,” Senator Wiener told me. “Yet what we see at times is people  
2 with a Bernie Sanders sign and a ‘Black Lives Matter’ sign in their window, but they’re opposing  
3 an affordable housing project or an apartment complex down the street.” In California, taking that  
4 standard seriously might mean worrying less about the name on the school than whether there are  
5 children inside it. In San Francisco, politics becomes an aesthetic rather than a program. You have  
6 to have a BLM sign in your window and a rainbow sticker on your Tesla bumper but you never  
7 actually intend to do anything that is NIMBY. San Francisco's fake symbols of progressivism are  
8 always preferred to the sacrifices and risks those ideals demand. In San Francisco Democrats hold  
9 total control of the government. If progressivism cannot work here, why should the country believe  
10 it can work anywhere else?

2 Gilles Desaulniers moved to San Francisco 40 years ago, settling in the ‘friendly, quaint and  
3 affordable’ city after running out of cash while driving from **Canada** down the West Coast of  
4 America.

5 Today he runs a grocery store filled with fresh fruit, vegan snacks and organic wines typical of this  
6 famously liberal Californian city.

7 But Gilles has shut one outlet and would sell up entirely if anyone wanted this one, his  
8 remaining shop. Each day, up to 30 people stroll in and openly steal goods, costing him hundreds of  
9 dollars.

10  
11  
12  
13 A street cleaner showed me a box filled with used syringes that he had collected, then I met  
14 two charity workers picking up needles from the pavement. How many do you find a day, I ask?  
15 ‘Between 300 and 600, depending on the weather,’ one replies. A homeless man is pictured second  
16 left using a syringe to inject drugs in the city in June 2018

17  
18 He has been bitten twice recently by people in his shop and he also found a woman turning  
19 blue in the toilet after a drugs overdose, a hypodermic needle still stuck in her leg. He showed me a  
20 metal door that is corroding due to people urinating in his doorway, then spoke of finding a man  
21 relieving himself in full view of infants playing in a child centre next door. ‘Our society is falling  
22 apart,’ says Desaulniers. ‘If people do not play by some rules, society does not function. But it feels  
23 like there is no order, there is no shame.’ He uses two apocalyptic movies to illustrate the state of  
24 his adopted city: ‘Living here feels like A Clockwork Orange and Blade Runner have both come  
25 true.’

26 I could grasp his despair. I had just passed dealers selling drugs beside a police car parked outside  
27 government offices, and seen their customers openly smoke fentanyl, an opioid 50 times stronger  
28 than heroin, then collapse on the street.

1 • City ranks among worst tax-and-spend offenders...

2 Yet true to form, San Francisco has just elected as district attorney a radical called Chesa  
3 Boudin, whose parents were infamous militants from a far-Left, anti-war group. They were jailed  
4 for triple murder when Chesa was a toddler, leaving him to be adopted by the founders of the  
5 organisation

6 All cities have their seedy sides. But this is the very centre of San Francisco, by an upmarket  
7 Westfield shopping mall thronged with people in designer clothes perusing Rolex watches, Louis  
8 Vuitton handbags and Tiffany jewellery.

9 The beautiful city by the bay, where Tony Bennett famously left his heart and which poses as a  
10 beacon of progressiveness, has more billionaires per capita than any other on the planet.

11 Not long ago, a seven-bedroom home here recently sold for \$38 million (£29 million), while  
12 at the Michelin-starred Saison restaurant, the ‘kitchen menu’ starts at \$298 a head and reservations  
13 require a \$148 deposit.

14 The city authorities have a huge \$12 billion budget, handing their 31,800 staff average annual pay  
15 and benefit packages of an astonishing \$175,000.

16 Yet the tide of homeless, addicted and mentally ill people washing up here has become so  
17 severe that a global expert on slums claimed San Francisco may be more unsanitary than some of  
18 the poorest parts of Africa and Asia.

19 Oracle, one of the technology giants based in the nearby Silicon Valley, has switched a conference  
20 for 60,000 people to Las Vegas due to the toxic combination of ‘poor street conditions’ and costly  
21 hotels.

22 This followed a medical association moving its \$40 million convention out of San Francisco  
23 amid safety fears because of sordid tent encampments and overt drug use. Other events are being  
24 affected.

25 Indoors, people are making deals, talking about healthcare and networking. Yet in the  
26 streets, I witnessed homeless people injecting cocaine,’ tweeted Kistein Monkhouse while attending  
27 a recent J. P. Morgan conference for 9,000 people.

28 As one prominent academic tells me, it seems a cruel irony that so much squalor and despair is

1 found in the Californian base of all those billionaire technology titans seeking to reshape the world  
2 in their image.

3 ‘San Francisco has always had hobos but we’ve never seen anything like this. It’s become a  
4 vision of some kind of strange dystopian future,’ says Joel Kotkin, a widely respected professor in  
5 urban studies.

6 He can reel off damning statistics to back his claim that San Francisco symbolises the  
7 Golden State’s descent into ‘high-tech feudalism’ including America’s highest poverty levels, its  
8 worst rates of property crime and its biggest gap between top and middle incomes.

9 But one statistic stands out: almost half of homeless people in the United States are in  
10 California, according to a recent White House study.

11 And San Francisco, a comparatively small city that is home to tech giants such as Twitter,  
12 Uber and Airbnb, has the highest rate of ‘unsheltered’ citizens – at ten times the national level.

13 (The Horrors Of Living In San Francisco Cause Many To Jump Off The Golden Gate  
14 Bridge)

15 All cities have their seedy sides. But this is the very centre of San Francisco, by an upmarket  
16 Westfield shopping mall thronged with people in designer clothes perusing Rolex watches, Louis  
17 Vuitton handbags and Tiffany jewellery

18 Downtown visitors cannot fail to witness the distressing evidence. Almost instantly after I  
19 arrived, I saw three people smoking crystal meth through glass pipes, then others with the facial  
20 scabs and sores associated with this destructive drug. One man with matted hair sat slumped in a  
21 stupor wearing just grubby underpants.

22 Another, clearly under the influence of heroin, had ‘nodded off’ and was static on a child’s  
23 bicycle. A third urinated on the street. A woman changed her clothes from a tatty suitcase on the  
24 pavement.

25 Others shuffled pathetically or rolled slowly along the street in wheelchairs. Some were  
26 clearly suffering mental distress, such as a man in his 50s begging for cash who told me he was  
27 waiting for his air force pension. A street cleaner showed me a box filled with used syringes that he  
28 had collected, then I met two charity workers picking up needles from the pavement.

Ho

w many do you find a day, I ask? ‘Between 300 and 600, depending on the weather,’ one replies. So if you are going to San Francisco, feel free to wear flowers in your hair but local women say avoid sandals on your feet. Dog owners complain they have to wash human faeces from the legs of their pets after a walk. One fed-up resident showed me Hondurans handing out socks filled with wraps of drugs in front of a building being turned into an upmarket Whole Foods store. The dealers displayed little need for concealment. ‘After a while, you become desensitised – it’s like everyone here is wearing blinkers,’ says my guide, a man in his 30s. ‘All my friends with kids have moved out of the city.’

The city and state have some of the highest tax rates in the country, but his area of SoMa West voted to back a fresh charge on firms to fund a new community group to clean up its streets. It is the 17th district to pass such a measure.

‘You have to develop a thick skin,’ says Sonya Lee, 24, supervisor in a Starbucks branch surrounded by bustling boutiques, ePlaintiff 42ensive hotels and smart restaurants. ‘Every day, people come in and take stuff. It’s dreadful but we don’t know what to do.’

(Twitter's sick perverted staff attract naive young drug users and sex deviants)

1 San Francisco, a comparatively small city that is home to tech giants such as Twitter, Uber  
2 and Airbnb, has the highest rate of ‘unsheltered’ citizens – at ten times the national level. Official  
3 data, based on one night’s count last year, claimed 8,011 homeless people in this city of 884,000  
4 people – a rise of 17 per cent on 2017. But a record of those receiving healthcare found numbers  
5 twice as high and rising faster. City authorities claim their key problem is the high cost of housing  
6 combined with past failures to build enough properties. But many blame something simpler to  
7 solve: the lack of law enforcement.

8 ‘When you tell vagrants that anything goes, it leads to the anarchy you see on these streets,’  
9 says Heather MacDonald, a fellow at the Manhattan Institute think-tank and a conservative  
10 essayist. She believes we are witnessing a ‘real-life experiment’ into what happens if  
11 society stops enforcing bourgeois norms out of sensitivity to vulnerable people. MacDonald argues  
12 that the city authorities are culpable, fuelling drug addiction by doling out 4.5 million needles a year  
13 when there is nothing compassionate about giving addicts and mentally ill people the freedom to  
14 ‘decompose’ on the streets.

15 Much of what she says is backed by Thomas Wolf, 49, who lost his job and family after  
16 becoming addicted to opioid painkillers following foot surgery, then moving on to cheaper heroin  
17 and ending up homeless in his native city. ‘It is a cycle of despair,’ he says. ‘I was heartbroken at  
18 losing my wife and kids but all I cared about was drugs. I hated being on the streets but I loved the  
19 easy access to drugs. ‘Yet there’s such denial that if you’d have asked me if I had a problem, I’d  
20 have said no.’

21 Wolf, who now works for the Salvation Army helping homeless people rebuild lives and  
22 has just been appointed to a specialist civic taskforce, sees untreated addiction as the root cause of  
23 the city’s problem. He says most people living on the streets are hooked on either drugs or drink.

24 ‘If you see someone shouting at the wall, it is crystal meth, not mental illness – although  
25 meth might have destroyed their mind.’ Wolf claims that while the city distributes drug  
26 paraphernalia, he was never asked to quit or offered help. He says many users sell their monthly  
27 welfare \$190 food stamps on receipt to go on a binge. And he wants to see generous welfare  
28 benefits – almost \$600 a month in return for 12 hours of voluntary work – slashed. His own time as

1 a homeless heroin addict ended after police caught him holding six socks filled with drugs for  
2 Honduran dealers. His brother bailed him from jail on condition that he went into rehab. He was  
3 lucky. Last year there were 234 deaths from fentanyl and heroin in the city, more than double the  
4 previous year and five times higher than in 2016.

16 olf believes that the decision by a state ballot six years ago to reclassify thefts of property below the  
17 value of \$950 as misdemeanours has backfired badly, leading to a huge increase in shoplifting. ‘It is  
18 a disaster,’ he says. ‘The idea was sound – to reduce jailing that is predominantly of minorities – but  
19 the side effect was to embolden people to commit crime with impunity. Everyone knows you can go  
20 into shops and steal up to \$950.’ Even shampoo, deodorant and toothpaste are now locked up in  
21 chemist shops to curb thefts. The police declined to speak officially. But one officer sitting in his  
22 car beside blatant street-dealing said there was no point arresting people as they would simply be  
23 released, even if they were carrying drugs and cash valued at several thousand dollars. ‘I find it very  
24 frustrating and lots of my colleagues find it very frustrating,’ he says, adding that officers only  
25 intervene when there is violence. ‘We get the blame because people think we’re doing nothing. But  
26 it’s not our fault.’ Wes Tyler, manager of a family-owned hotel, told me a man high on crystal meth  
27 smashed a \$5,000 window one Sunday afternoon – then repeatedly ignored court dates and  
28 probation orders despite being seen in the neighbourhood last week.

1 'If City Hall does not start to take these issues more seriously, we'll see businesses  
2 impacted,' says Jay Cheng, spokesman for the local Chamber of Commerce. Yet true to form, San  
3 Francisco has just elected as district attorney a radical called Chesa Boudin, whose parents were  
4 infamous militants from a far-Left, anti-war group. They were jailed for triple murder when Chesa  
5 was a toddler, leaving him to be adopted by the founders of the organisation.

6  
7 The beautiful city by the bay, where Tony Bennett famously left his heart and which poses  
8 as a beacon of progressiveness, has more billionaires per capita than any other on the planet. Not  
9 long ago, a seven-bedroom home here recently sold for \$38 million (£29 million), while at the  
10 Michelin-starred Saison restaurant, the 'kitchen menu' starts at \$298 a head and reservations require  
11 a \$148 deposit. The 39-year-old, who studied at Oxford University as a Rhodes scholar and later  
12 worked as a translator for Venezuela's former leader Hugo Chavez, a Fidel Castro acolyte,  
13 campaigned on moving away from prosecuting 'quality of life' offences to focus on serious and  
14 corporate offences.

15 The San Francisco Police Officers Association spent heavily campaigning against Boudin,  
16 saying he was the choice for 'criminals and gang members'.

17 But Jennifer Friedenbach, executive director of the charity Coalition on Homelessness,  
18 argues city residents should get angry over 'systemic neglect' that sparked this crisis rather than  
19 blaming people on the streets. 'No one wants to live like this,' she says. 'We've tried locking people  
20 up before but that didn't work.' Friedenbach insists that the problems stem from a lack of affordable  
21 housing, a significant reduction of emergency shelters and the slashing of spending on treatment  
22 programmes.

23 She says, rightly, that issues of homelessness, mental health and addiction are often linked.  
24 The city's mayor, London Breed, whose younger sister died of a drug overdose and elder brother  
25 was jailed for robbery, declined to comment.

26 In her inaugural speech, Breed said the 'twin troubles of homelessness and housing affordability'  
27 were the big challenge. She is boosting grants for shelters, treatment and street cleaning. Yet those  
28 desperate sights staining this one-time hippy nirvana are ultimately the sign of abject political

1 failure. Her new fiefdom is, after all, so populated by millionaires in their exclusive enclaves that it  
2 is the second richest city in the world's richest nation. Considering the city's wealth, it smacks of  
3 callous and uncaring hypocrisy. As one local resident says: 'Are they really being progressive to  
4 that poor guy in the street with a needle in his arm who is going to die tomorrow?'

**[San Francisco's Homeless Encampments expose The Failure Of A Liberal Utopia](#)**

By **[John Daniel Davidson](#)**

**San Francisco Is Now The Most Rapidly Failing City In America**

In America's most liberal city, increasingly visible homeless camps are a stark symbol of San Francisco's economic hollowing out and the failure of progressive governance.

SAN FRANCISCO – “You want the down-low? I’ll give you the down-low: Gavin Newsom and his pearl-clutching elitists from Pacific Heights only do things that profit themselves!

These guys will all tell you something different, but the one thing everyone here has in common is that they all do drugs.”

I’m talking to a group of homeless men camped out under Highway 101 in San Francisco’s Mission

1 neighborhood, where a half-dozen tents are set up on a wide sidewalk across the street from a Best  
2 Buy. The thirty something guy who's telling me it's all about drugs doesn't want to give me his  
3 name.

4 -----  
5 **Shit-Hole San Francisco — where drug addicts outnumber high school students**

6 Officer Brian Donohue checks on Jeffrey Choate after he sees him lying on the sidewalk  
7 along Larkin Street and asks him to dispose of used needles next to him in a proper container on  
8 Monday, September 10, 2018 in

9  
10 San Francisco has more drug addicts than it has students enrolled in its public high schools, the city  
11 Health Department's latest estimates conclude.

12  
13 There are about 24,500 injection drug users in San Francisco — that's about 8,500 more people  
14 than the nearly 16,000 students enrolled in San Francisco Unified School District's 15 high schools  
15 and illustrates the scope of the problem on the city's streets.

16  
17 It's also an increase of about 2,000 serious drug users since 2012, the last time a study was done.

18  
19 "There is an opioid epidemic in this country, and San Francisco is no exception," Deputy Director  
20 of Health Dr. Naveena Bobba said.

21  
22 The problem is particularly visible in the Tenderloin, where police reported more than 600 arrests  
23 for drug dealing last year. And where 27 suspects were booked into County Jail for dealing drugs in  
24 the first 20 days of the new year.

25  
26 The out-in-the-open use of drugs on city sidewalks and at the Civic Center BART Station was a  
27 huge embarrassment for the city and triggered more police patrols and crackdowns in the past year.

28 The BART station has been cleaned up, but the problem continues in the Tenderloin.

1  
2 And while the police stay busy targeting dealers — the criminal side of illegal drugs — the city’s  
3 public health officials work the problem as a health crisis.

4 -----  
5 **CRONY POLITICS RULE SAN FRANCISCO**

6 The San Francisco Board of Supervisors voted 7-4 on Tuesday to overturn [the 2015 sale of](#)  
7 [Presidio Terrace](#), a privately-owned street in the neighborhood of the same name used by a few  
8 dozen of the city’s wealthiest homeowners, faulting the city’s tax collector and not the residents for  
9 letting an annual \$14 tax bill go unpaid for decades.

10 Supervisor Mark Farrell, whose district includes Presidio Terrace, scheduled Tuesday’s hearing in  
11 August, allegedly to “get to the bottom” of the dispute and let all parties plead their case.

12 A South Bay couple bought Presidio Terrace’s circular street and accompanying sidewalks at a tax  
13 sale to the tune of \$90,000 after the Presidio Terrace Association (PTA) had failed to pay the taxes  
14 on their avenue for 30 years.

19 SAN FRANCISCO BAY AREA VENTURE CAPITALISTS PROVE THEIR  
20 CORRUPTION RUNS DEEP

21 The founder of a Silicon Valley venture capital firm was sentenced Wednesday to six  
22 months behind bars for paying about \$450,000 in bribes to boost his two daughters' entrance exam  
23 scores and get one of them into Georgetown University as a bogus tennis recruit.

24 Manuel Henriquez, the 57-year-old founder and ex-CEO of Hercules Capital based in Palo  
25 Alto, California, cried and dabbed his eyes with a tissue as he prayed for forgiveness from his  
26 children and other families he hurt, and asked the judge for mercy.

27 "There is no perfect way to ePlaintiff 42ress how broken I feel in my heart and soul," said  
28 Henriquez, who sat next to his lawyer and wore a face mask for much of the hearing held via video

1 conference because of the coronavirus pandemic.

2 His wife, Elizabeth Henriquez, was sentenced in March to seven months behind bars. She is  
3 currently locked up at a prison in California and is ePlaintiff 42ected to be released in January,  
4 according to online records.

5 Prosecutors had asked for five months for Manuel Henriquez, calling him in court  
6 documents a “less active participant in the mechanics of the fraud than his wife.” The defense urged  
7 the judge for three months or less.

8 U.S. District Judge Nathaniel Gorton called Henriquez a hypocrite who donated money to  
9 aid children, while at the same time using his wealth and privilege to put his kids ahead of other less  
10 fortunate students in the college admissions process.

11 “It’s a sad day,” the judge said.

### 12 [How San Francisco's Wealthiest Families Launched Kamala ..](#)

13 A high-school senior had deftly promoted her “brand” for the Ivy League, a college  
14 consultant boasted. In a2013 promotional video, William Rick Singer, the mastermind of an  
15 elaborate admissions corruption scheme, showered praises on the young woman.

16 She’d started her own organization to fight climate change, he said. She’d eventually enroll  
17 in Brown. That student, it turns out, was Mary Doerr, a daughter of John Doerr, the Silicon Valley  
18 venture capitalist and early backer of Google and Amazon.

19 The Doerrs were clients of Singer years before he turned a legitimate college consulting  
20 practice into an elaborate bribery-for-admissions scheme that has shaken American academia, the  
21 parents who sought Singer’s advice and the Wall Street and Silicon Valley firms that are now  
22 dealing with the fallout.

23 Pro golfer Phil Mickelson and National Football League Hall of Fame quarterback Joe  
24 Montana each tweeted last week that their families had used Singer for college consulting and were  
25 “shocked” to hear about the illegal activity.

26 So are some of the Wall Street and Silicon Valley companies who had connections to  
27 Singer, including Goldman Sachs Group Inc., bond-giant PIMCO and venture-capital firm Kleiner  
28 Perkins Caulfield & Byers, which Doerr co-founded and is chairman.

1 Court papers suggest as many as 800 families hired Singer at some point. Singer ran an  
2 apparently legitimate college counseling firm, the Edge College & Career Network, before about  
3 2011. The 2013 promotional video that referred to Mary Doerr says she was a client “six years  
4 ago,” or about 2007. The bribery case reaches back only to 2011.

5 The Doerr family has not been accused of any wrongdoing. Mary Doerr graduated from Brown  
6 University in 2015 and now is a graduate student at North Carolina State University, according to  
7 her LinkedIn profile.

8 Calls to Mary Doerr and her mother, Anne, were not returned. A Kleiner Perkins  
9 spokeswoman, Katie Hutchison, didn’t respond to a request to speak with John Doerr.  
10 Hutchison declined to answer questions but said in a written statement that while Doerr and partner  
11 Tom Schlein, “along with a long list of Valley luminaries,” were clients of Singer, they consulted  
12 him only for “test tutoring and help with college applications — typical of services provided by  
13 thousands of private college counselors across the country — and nothing further.”

14 Goldman Sachs, which was mentioned in a wiretapped phone conversation as a social connection  
15 for at least one of the parents charged in Singer’s bribery-for-admissions scheme, says it has begun  
16 an internal investigation into any connection its employees may have to the former college  
17 consultant.

18 Firms whose partners and employees were caught up in the federal case known as  
19 “Operation Varsity Blues” have swiftly moved to fire or accept the resignations of people involved.  
20 Bond-giant PIMCO said in a statement on Monday that “as part of a regular series that includes  
21 dozens of outside speakers, PIMCO invited Mr. Singer to speak twice over the past decade, the  
22 latest in 2015, about the college admissions process.” But the firm added that it “has never had a  
23 business relationship with Rick Singer or his college preparation organization. Neither PIMCO nor  
24 the PIMCO Foundation has ever paid Mr. Singer or donated money to his foundation.”

25 The statement added that any employees who engaged with Singer’s illegal scheme “would  
26 have no place at the firm.”

27 PIMCO’s former chief executive Douglas Hodge, who retired in 2017, is accused of paying  
28 about \$500,000 in bribes for two daughters and a son to be admitted to Georgetown University and

1 and the University of Southern California as fake tennis, soccer and football recruits.

2         The case has also sent shivers among affluent parents who fear they and their children will  
3 be tarnished as the Singer case unfolds.

4         Families now in the admissions process “want to illustrate that they’re a good family that  
5 wouldn’t cheat and that their kids would never want them to cheat the process,” said Christine  
6 Pluta, a private counselor with Edvise Princeton who has also worked in the admissions offices of  
7 the University of Pennsylvania and Barnard College. “I have never before heard a family try to  
8 convince me of their own integrity. Singer is part of the conversation.”

9         Pluta said when she worked at Penn about 20 years ago, a “father offered me a million  
10 dollars if his daughter would be admitted. At first I thought he was joking.” She said she made it  
11 clear the offer was inappropriate.

12         Singer cooperated with authorities and pleaded guilty to facilitating more than \$25 million in  
13 bribes for faked ACT and SAT scores and bogus athletic profiles to schools including the  
14 USC, Georgetown and Yale University. Parents contributed to Singer’s fake charity, Key Worldwide  
15 Foundation, to facilitate bribes to coaches and school officials and some and some took the  
16 charitable-donation deduction.

17         The wealthy parents worked in finance, sports and entertainment and included actresses Lori  
18 Loughlin and Felicity Huffman as well as Hodge, who was replaced as CEO of PIMCO in 2016;  
19 Gordon Caplan, the co-chairman of global law firm Wilkie Farr & Gallagher LLP, and William  
20 McGlashan Jr., a former partner of private equity firm TPG, who was fired last week.

21 The relationships in those worlds led to some embarrassing revelations for firms who invited Singer  
22 to speak.

23         “We know people at Goldman Sachs who have, you know, recommended you highly,” said  
24 parent Marci Palatella, according to transcripts of a wiretapped conversation with Singer.

25 Palatella, chief executive officer of a liquor distribution company in Burlingame, Calif., and the  
26 wife of former San Francisco 49ers player Lou Palatella, was charged with paying \$575,000 in  
27 bribes to get their son into USC as a fake “long snapper” football recruit.

28         Goldman Sachs spokesman Patrick Scanlan said Monday that “we’re continuing to look into

1 the matter.”

2 Another parent charged in the scandal referenced Kleiner Perkins. In a wiretapped  
3 conversation, parent Bruce Isackson worried that the Internal Revenue Service might discover the  
4 bogus charity, to which Isackson is accused of paying hundreds of thousands of dollars in bribes to  
5 get his daughter into USC as a fake-recruited rower.

6 Isackson, who was president of real-estate development firm WP Investments in Woodside,  
7 Calif., was charged along with his wife, Davina. He no longer appears on the website of the firm,  
8 which didn’t respond to calls.

9 “Is this gonna be this — be the front page story with everyone from Kleiner Perkins do  
10 whatever, getting these kids into school,” Isackson said according to the transcript.

11 In the 2013 promotional video, Singer spoke of an unnamed client who had started  
12 Inconvenient Youth while in high school. “She got totally engaged in her brand, in her story, in her  
13 passion,” he said in the short video, adding that “I had her six years ago as a student” and thanking  
14 former Vice President Al Gore for allowing “us” to use his slide show from his 2006 documentary,  
15 “An Inconvenient Truth,” that inspired Doerr’s group.

16 Singer added that getting in to college “has to do with getting involved in your brand.” He  
17 highlighted his role in Mary Doerr’s venture, saying that “we wanted to create an organization that  
18 would focus on global warming for youth.”

19 Mary Doerr started Inconvenient Youth in 2008 between her junior and senior years  
20 atCastilleja School in Palo Alto, Calif.

21 John Doerr, whose net worth Forbes puts at \$7.5 billion, has been involved in education  
22 issues for some time. He is co-founder and lifetime director of the NewS chools Venture Fund,  
23 which invests in start-ups aimed at improving public education. He and Anne Doerr donated \$50  
24 million in 2015 to Rice University, his alma mater, to finance a leadership training program.  
25 The couple paid about \$50,000 bribes to have someone cheat multiple times on standardized tests  
26 for their daughters, authorities said.

27 The Henriquezes were also charged with paying \$400,000 to the sham charity run by  
28 admissions consultant Rick Singer to get their oldest daughter into Georgetown by falsely

1 portraying her as a star tennis player. Singer in turn paid then-Georgetown tennis coach Gordon  
2 Ernst in exchange for labeling her as a recruit, authorities say.

3 Ernst, who's accused of getting nearly \$3 million in bribes, has pleaded not guilty.

4 Singer has pleaded guilty to running the sprawling bribery scheme and helped investigators  
5 build the case against the parents.

6 Henriquez's lawyers said in court documents that his participation in the scheme was “minor  
7 and largely passive” as he was busy running his company while his wife “devoted herself to the care  
8 and well-being of their children.”

9 "Mr. Henriquez knew some but not all of the details of the scheme with Singer, played a  
10 small role, and to his great regret and shame, did not stop it. He paid Singer's bills, as he did all the  
11 family's bills," his lawyers said in a court filing.

12 Assistant U.S. Attorney Eric Rosen said it “strains credulity” that Henriquez would believe  
13 that the \$400,000 payment to Singer's sham charity would support "underfunded college athletic  
14 programs (including Georgetown tennis) and programs for disadvantaged youth," as his attorneys  
15 claimed in court documents.

16 Rosen accused Henriquez of refusing to fully accept responsibility for his actions and  
17 attempting to present a "sanitized version of the conduct to the court."

18 The Henriquezes are among nearly 30 parents who've admitted to charges in the massive  
19 case called “Operation Varsity Blues.”

20 “Full House” star Lori Loughlin and her fashion designer husband, Mossimo Giannulli, are  
21 scheduled to be sentenced in August after pleading guilty to paying half a million dollars to get their  
22 two daughters into the University of Southern California as fake crew recruits. Loughlin's plea deal  
23 calls for her to serve two months behind bars and Giannulli's calls for him to serve five months.

**San Francisco Forensic Investigator Paul Kangas Keeps The Ruling Elite On Their Toes**

Don't do crime with public money in front of Paul Kangas. This modern Sam Spade will

1 latch onto the case like a pit-bull and never let go. If City Hall, Silicon Valley or the Opera Crowd  
2 get into bribery, corruption, sex trafficking and other dirty bits, Paul might end up on their heels.

3  
4 As the former guard for President Kennedy, Paul Kangas is now a private Investigator in California.  
5 His seminal article on the role of George HW Bush in the assassination of JFK was just published  
6 on the front page of the Cuban newspaper, Granma. 30 million copies were distributed worldwide.  
7 He has taught, and inspired, many contemporary media investigators who have over-turned the  
8 entire news industry with the kinds of FBI-class public research that Kangas uses. The many  
9 "citizen sleuth' groups operating around the world were inspired by the early work of Kangas. Paul  
10 Kangas has busted up more corruption in San Francisco than the last 4 police bosses in San  
11 Francisco. You don't always know that he did it, but suddenly a package of investigation data shows  
12 up at the right reporter's desk at the right time and that public official is "gone:.

13 Kangas is said to have copies of all of the files left behind when Clinton private eye: Jack  
14 Palladino, died. Paul Kangas is the last guy on Earth that any corrupt politicians should consider  
15 screwing with!

17 Billionaire Real Estate Mogul David Rockefeller dies at age 101. His San Francisco “Bag  
18 Man” James Bronkema is also dead. John Molinari, their Italian “business man” mob-fixer is in his  
19 final years.

20 **The end of an era of real estate corruption, bribery, elitist black-listing and crony**  
21 **politics on the West Coast.**

22 Deepti Hajela, Associated Press

23 The billionaire philanthropist who was the last of his generation in the famously  
24 philanthropic Rockefeller family died, Monday, March 20, 2017, according to a family spokesman.  
25 (AP Photo/D. Pickoff, File) NEW YORK (AP) — David Rockefeller, the billionaire businessman  
26 and philanthropist who was the last in his generation of one of the country’s most famously  
27 philanthropic families, died Monday. He was 101. Rockefeller died in his sleep at his home in  
28 Pocantico Hills, New York, according to his spokesman, Fraser P. Seitel. He was the grandson of

1 Standard Oil co-founder John D. Rockefeller and the youngest of six children born to John D.  
2 Rockefeller Jr. With the passing of his siblings, he became the guardian of his family’s fortune and  
3 head of a sprawling network of family interests, both business and philanthropic, that ranged from  
4 environmental conservation to the arts. To mark his 100th birthday in 2015, Rockefeller gave 1,000  
5 acres of land next to a national park to the state of Maine. Aspects of the Rockefeller brothers’  
6 upbringing became famous, including the 25-cent allowance, portions of which had to be set aside  
7 for charity and savings, and the inculcation that wealth brings great responsibility. Two of his  
8 brothers held elected office: Nelson Rockefeller served as the governor of New York, hungered for  
9 the White House and briefly served as vice president. Winthrop Rockefeller was a governor of  
10 Arkansas. David Rockefeller, however, wielded power and influence without ever seeking public  
11 office.

12         Among his many accomplishments were spurring the project that led to the World Trade  
13 Center. And unlike his other brothers, John D. III and Laurance, who shied from the spotlight and  
14 were known for philanthropy, David Rockefeller embraced business and traveled and spoke widely  
15 as a champion of enlightened capitalism. “American capitalism has brought more benefits to more  
16 people than any other system in any part of the world at any time in history,” he said. “The problem  
17 is to see that the system is run as efficiently and as honestly as it can be.” Rockefeller graduated  
18 from Harvard in 1936 and received a doctorate in economics from the University of Chicago in  
19 1940. He served in the Army during World War II, then began climbing the ranks of management  
20 at Chase Bank. That bank merged with The Manhattan Company in 1955 He was named Chase  
21 Manhattan’s president in 1961 and chairman and chief executive officer eight years later. He retired  
22 in 1981 at age 65 after a 35-year career. In his role of business statesman, Rockefeller preached  
23 capitalism at home and favored assisting economies abroad on grounds that bringing prosperity to  
24 the Third World would create customers for American products. He parted company with some of  
25 his fellow capitalists on income taxes, calling it unseemly to earn \$1 million and then find ways to  
26 avoid paying taxes on it. He didn’t say how much he paid in taxes and never spoke publicly about  
27 his personal worth. In 2015, Forbes magazine estimated his fortune at \$3 billion. As one of the  
28 Rockefeller grandchildren, David belonged to the last generation in which the inherited family

1 billions were concentrated in a few hands. The next generation, known as “the cousins,” has more  
2 people. Rockefeller was estimated to have met more than 200 rulers in more than 100 countries  
3 during his lifetime, and often was treated as if he were a visiting head of state. Under Rockefeller,  
4 Chase — now JPMorgan Chase & Co. — was the first U.S. bank to open offices in the Soviet  
5 Union and China and, in 1974, the first to open an office in Egypt after the Suez crisis of 1956.

6 In his early travels to South Africa, Rockefeller arranged clandestine meetings with several  
7 underground black leaders. “I find it terribly important to get overall impressions beyond those I get  
8 from businessmen,” he said. But Rockefeller took a lot of heat for his bank’s substantial dealings  
9 with South Africa’s white separatist regime and for helping the deposed, terminally ill Shah of Iran  
10 come to New York for medical treatment in 1979, the move that triggered the 13-month U.S.  
11 embassy hostage crisis in Tehran. Rockefeller maintained the family’s patronage of the arts,  
12 including its long-standing relationship with New York’s Museum of Modern Art, of which his  
13 mother had been a fervent patron. His private art collection was once valued at \$500 million. The  
14 Rockefeller estate overlooking the Hudson River north of New York City is the repository of four  
15 generations of family history, including Nelson’s art and sculpture collection. One of the major  
16 efforts of Rockefeller’s later years was directed at restoring family influence in the  
17 landmark Rockefeller Center, most of which had been sold in the 1980s to Japanese investors. He  
18 eventually organized an investor group to buy back 45 percent of the property. His philanthropy and  
19 other activities earned him a Presidential Medal of Freedom, the nation’s highest civilian honor, in  
20 1998. Rockefeller and his wife, the former Margaret McGrath, married in 1940 and had six children  
21 — David Jr., Richard, Abby, Neva, Margaret and Eileen. His wife, an active conservationist, died in  
22 1996. James Bronkema was his Bag Man that paid various public officials along with the Coblenz  
23 Law firm. For the dirtiest deals, though, John L. Molinari would step in. Molinari uses his sub-gang  
24 comprised of: The Amelia Commercial Owners' Association, John L. Molinari Assc, The Molinari  
25 Family Partnership LLC, Twenty Five Fifty Five Larkin, The Rapallo Group, Inc., Golden Van  
26 Associates LLC  
27 John Molinari Partners and other fronts.

28 Molinari is part of the North Beach Italian business men organization. The FBI has been

1 thought to have bugged his Van Ness, Larken Street, Columbus Avenue locations as well as his  
2 cars.

3 In 1987 Mr. Molinari was a 52-year-old insurance and gun-for-hire man who had served on  
4 the Board of Supervisors since 1972, including five terms as president. He played a key role in  
5 engineering Mrs. Feinstein's elevation to Mayor in 1978, and in 1982 became a Democrat, essential  
6 to advancing in a city that is 77 percent Democratic. He has earned a reputation as a politician who  
7 knows his way around City Hall and can bring warring factions to battle. Molinari is said to have  
8 lied about which district he actually lived in, on records filed for that election. Roger Boas,  
9 Molinari's friend, was arrested for running a pedophile underage sex ring for the rest of the San  
10 Francisco City Hall Elites. Molinari's daughter was removed from his home, per the now public  
11 police report records, to protect her from sexual abuse. She was placed in protective custody in a  
12 center on California Street, in San Francisco, where she provided investigators with damaging  
13 information about her father.

14 Molinari's large crooked nose and squinty deep-set eyes did not help him avoid the "North  
15 Beach Mob" assertions cast by his political adversaries. Warren Hinckle once called him "*A sad  
16 version of The Godfather...*"

### 17 18 **Anatomy of A Civic Corruption Case- San Francisco- The Bridge To Sin**

19 THE COLD CASE THAT IS NOW VERY HOT! INVESTIGATORS NOW HAVE THE  
20 FINAL PIECES OF THE PUZZLE! Link to story: <http://wp.me/p4e1uX-2LV>  
21 See how the Golden Gate Bridge and a little bridge between two buildings at Embarcadero Center  
22 connected to an organized crime and child sex abuse ring for billionaires in A billion dollar real  
23 estate political kickback scam, by San Francisco “elites”, to create an owned and controlled Senator.  
24  
25 Interesting that one has posted pictures of them-self dancing and hugging very young girls on  
26 Facebook, one was arrested and indicted for running an underage prostitution ring for billionaire  
27 campaign backers and San Francisco “elites”, One (A senior public official) had their daughter  
28 removed from their home by the police because she was sexually abused (Police reports available)

1 and one was charged with hiring underage prostitutes.

2  
3 You would think it would be hard to be indicted for BOTH running a child prostitution ring for  
4 Pacific Heights billionaires AND helping to embezzle government funds for Moscone Convention  
5 Center AND Embarcadero Center but one managed to do it all, on behalf of the others.

6  
7 James Bronkema was known as David Rockefeller’s “Bag Man” on the West Coast. He looked  
8 exactly like the greedy little “Monopoly Man” Billionaire on the game-board and even sported the  
9 same mustache and vest just to make the point that he was not only corrupt, he was BAD ASS  
10 CORRUPT and he would get the Rockefellers on your ass if you messed with him!

11  
12 When a real estate or political policy action needed to be greased, Bronkema or Coblenz showed up  
13 with the cash for the Supervisors, inspectors and public policy-types. Bronkema was one of the  
14 creators of “Flower” and ran the cash into John Molinari’s Mayoral campaign. He put his girl-  
15 friends in executive city jobs as payoff for services rendered. Their hope was to move Molinari  
16 from Mayor, to Senator to Governor and on up... but that didn’t work out..... when the FBI  
17 showed up on some doorsteps.

18  
19 Bronkema ran the Business Bureau, The Golden Gate Bridge, Embarcadero Center and Rockre, a  
20 “private business operations group” for the Rockefellers. He funneled kickbacks, crony deals and  
21 special favors from San Rafael to Oakland to City Hall.

22  
23 They got a different party to play Senator and Molinari was forgotten but not forgiven for his false  
24 campaign district address, tax form creativity and family police incidents. A bug was placed in  
25 Molinari’s Classic Jaguar and feds got quite a bit of dirt on old-school San Francisco corruption off  
26 of Molinari’s North Beach idle chatter. Molinari then turned State’s evidence.

27  
28 Once Molinari ate it in the elections, they plowed all of the cash into Feinstein.

A key associate (Goudie, aligned with Molinari) was a top Presidential appointee and campaign funder who was arrested and indicted for federal funds fraud in the Christopher Columbus Scandal which emulated the Golden Gate Bridge Scandal with the same consultants. (Check out his old Facebook page)

The new Silicon Valley Prostitution cases have opened up the Old San Francisco child prostitution cases, as girls reveal decades of abuse and finally tell reporters what really happened back then. Which Silicon Valley and SF Venture Capitalists, who you see quoted in the news lately, were founders of “Flower” the top secret San Francisco underage sex ring for billionaires , held in the billionaires hotels so surveillance security could be totally controlled, (With SF, NYC and Silicon Valley Branches), which is, apparently, still operating? Why are they so excited about all of the underage girls coming over the border in the Mexican child border crisis? Why are Silicon Valley CEO’s and VC’s so supportive of “child Immigrants”?

Paying a bribe for real estate exclusives was often done with cash and hookers, known as “pink cash” in SF.

Why was NAMBLA allowed to thrive in San Francisco at the time, Including being given San Francisco Public Libraries, On Potrero hill and in other locations, to hold their secret “how to abuse children” meetings? (See FBI reports on NAMBLA)

Which San Francisco billionaire VC, in the news lately for other reasons, has a regular weekly appointment to have six nude girls come over and read him books from his library while he pleasures himself?

Which one is under investigation regarding a murder and an attempted murder?

1 Which one ordered a “hit” on someone?

2

3 Part of Kubrick’s film: “Eyes Wide Shut” was based on “Flower”. The cost for a young virgin  
4 started at \$50,000.00. Taking her virginity was called: “picking a flower”.

5

6 Run all of the names on your database and draw the financial, business and personal connections  
7 and see how interesting this case REALLY is!

8

9 Who was the bigger real estate guru: Blum, Rockefeller or Shorenstein?

10

11 What do Dianne Feinstein, Richard Blum, James Bronkema, Roger Boas, John Molinari and David  
12 Rockefeller all have in common? All them reported to WHO?

13

14 Nobody can now say they “didn’t know what was going on!” The evidence overtly implicates all of  
15 the players.

16

17 Was there a different reason, than we were told, that Mayor George Moscone was killed? Dan  
18 White said he was “drugged up on Twinkies”, was he drugged up on something else so he could  
19 carry out his “kill orders” from on high?

20

21 Who went to federal prison and who didn’t?

22

23 Who ordered the case shut down, but who kept working on it because they thought there was a  
24 major cover-up going on?

25

26 Who took the fall while the others kept on keeping on?

27

28 Who paid for who’s political campaign..and still does? Who pulls who’s strings?

Who is under 24 hour digital device surveillance by 5 different agencies? (Answer: EVERY SINGLE ONE OF THEM, THEIR FAMILIES AND ASSOCIATES)

What is a RICO?

What did federal investigators find when they set-up an office in one of the suspects condo buildings across from his office above Chevy's Restaurant?

How bad is running a child prostitution ring for the San Francisco elite and Silicon Valley founders?

How much, in bribes and corruption, did the exclusive little bridge from one Embarcadero Center to another, over the public road, really cost Boas, Rockefeller, Molinari, Bronkema and Feinstein?

Who is still operating as a front for whom?

Let's discuss. Send in your links. Watch for the YOUTUBE VIDEO: Anatomy of A Civic Corruption Case and please ask PBS Frontline to pick up the full length version!

Please ask City, State and Federal agencies to OFFICIALLY RE-OPEN THIS CASE!

TA- Former FB\*, Associate Producer/ D- SF Chron, FG, J- Worked with Bruce Brugman, GG, HJK, R- Latimes, Wspo-G, bSpecial thanks to D at Regional Federal Office

Worst case scenario: Egomaniac billionaires, who loved sex with children, controlled the real estate deals in San Francisco, because they needed to feel powerful. They had George Moscone killed because he wasn’t cool with their sex ring/real estate shenanigans and to put their own person in the top post in Government, aimed for the Presidency. The investigation needs to be re-opened and all cover-up actions overturned.

27  
28 The dark politics, corruption and scandal of the administration and governance of the

1 Golden Gate Bridge. What can be done? Let's ePlaintiff 42lore that question on behalf of all  
2 citizens...

- 3 • Who killed Tommy Walker, a devout Mormon who was to organize a major part of  
4 the celebration and who then discovered the corruption in the Bridge District Committee.
- 5 • Who is Patricia Novick and what is the exact accounting of her pre-contract meetings  
6 as the contractor AND the girlfriend of the Bridge Director?
- 7 • TOXIC LEAD is being used on the bridge and it is poisoning tourists, neighbors and  
8 bridge workers. Touch the bridge or breath while you are on it and you could die or be  
9 sickened for life: see: <http://www.goldengatewaste.org>
- 10 • Bridge Directors for over a decade have gotten kickbacks from paint suppliers for  
11 paint used on the bridge. James and John, the former directors, know what we mean
- 12 • The Bridge Directors and all of the Presidio Events marketing staff were informed of  
13 all of the facts on this site BEFORE they started marketing to sponsors for money yet they  
14 hid these facts from sponsors in their marketing. That is fraud.
- 15 • Why were no key celebration contracts put through the bid process and only  
16 rewarded to friends of the Directors?
- 17 • Which same persons were involved in both the 50th & 75th events and have the  
18 same kickback and favors deals?
- 19 • Why was the former Bridge Director told to permanently remove himself from  
20 politics forever? Hear reporters reviews of his recovered police reporter for child abuse.
- 21 • Which Bridge Director was under police investigation because of a police complaint  
22 filed by his own daughter?
- 23 • Which Bridge Director bribed almost every member of the Board of Supervisors on  
24 behalf of his real estate monopoly?
- 25 • How could a Bridge District that can't even afford to run it's ferry's (according to  
26 NBC News) afford to engage in ANY party extravaganzas?
- 27 • Bridge says that their plans for an insurance disaster are to " Keep their fingers  
28 crossed"!!!!

- Which Bridge Director used taxpayer money to buy a car?
- The Bridge never pays its bills and has had millions in debts.
- Why did CALTRANS say that it did not want the Golden Gate Bridge District involved with it?
- Why wasn't the law followed, which required that the Bridge District be dissolved?
- Gene Pratt and Marin Advocates Association said the Bridge District was operating as an illegal private government. Are they? To whose benefit?
- The attached chart of currently contracted celebration suppliers and their business associates shows a highly suspicious set of connections. What do you think?
- The mansion on the point near China Beach, behind Robin William's old house, in the SeaCliff District of San Francisco has its entire foundation built out of stolen Golden Gate Bridge Steel. It is even painted with bridge orange paint. Which Bridge District Director slipped the owner that stash?

- How many senior Bridge District staff got permit and tax favors in the SeaCliff District of San Francisco? Why?

- In the Book "Paying the toll: local power, regional politics, and the Golden Gate Bridge" By Louise Nelson Dyble, we see that the Golden Gate Bridge District was built on corruption and maintains its process as a citadel of corruption with "charges of extravagance, no-bid contracts and inside deals" that began in 1938 and have increased yearly up to 2012. This book can be ordered from Amazon.com

15 **THE GOLDEN GATE BRIDGE GALLERY OF CORRUPTION:**

16 How "Special Projects" work, step by step instructions:

17 #1. Make-up a "special project" (ie: New paint, big party, "art" project, Staff "reduction  
18 technology", etc.)

19 #2. Hire your friends to put it on.

20 #3. Pay your friends three times more than it actually costs.

21 #4. Wait for the project to end or fail; it doesn't matter, either way, because your friends  
22 already have the cash. Who cares if it blows up.

23 #5. Have dinner with your friends you gave the contracts to. Watch as they slide a manila  
24 envelope with the "extra cash" to you under the table or wire it to your law firm to put into your  
25 campaign fund.

26 #6. Buy girlies, gin, condo's and campaigns.

27 #7. Make up another "special project"... YAHOO!

San Francisco: Democrat LGBT Lutheran Pastor And Friends Arrested In Child Porn Raid  
Five pedophiles at a Pro-LGBT Church have been arrested by San Francisco's Child exploitation Task Forces for the production of child pornography. Controversial Gay Pastor of Christ Church Lutheran in San Francisco, the Rev. Steven Sabin, heads the congregations.

Reverend Steven Sabin is the head pastor at the Christ Church Lutheran national website, where he hosts streaming podcasts worldwide.

1 The  
2 Christ Lutheran  
3 Church says  
4 that they're  
5 aware of the  
6 Pastor's arrest.  
7 A HUGE  
8 number of  
9 church bosses

10 have been charged with sex abuse, touching kids and running sex cults in San Francisco.

14 San Francisco Is An Uninhabitable Hellhole...

15 **San Francisco Tech Executives And City Hall Directors Play A Dangerous Game With**  
16 **Trophy Wives and Prostitutes**

17 By Lucy Carl

18 Driven by a psychopathic need to employ sex for power instead of passion, executives from  
19 SalesForce, Twitter, Google, Facebook and other famous brands, live a life of debauchery few  
20 normal people can comprehend.

21  
22 Almost every \$200K/year executive has both a “trophy” wife and a bevy of prostitutes on call. Most  
23 of them get the wives and the hookers from many of the same resources. Most of the prostitutes  
24 know about the trophy wives, and vice versa, because it is part of “The Deal”.

25  
26 The San Francisco Zoo fundraising parties, The “House Parties” (on Broadway, west of Divisadero  
27 in the tony Pacific Heights neighborhood), San Francisco Symphony parties and Opening Nights,  
28 The Red and White Ball Events, The Guardsman parties, The Spinster Events, The Rosewood Hotel

1 “tech events” and a horde of other elitist find-some-ass events deliver the chicks to the Chads.

2  
3 A Trophy Wife is a surgically enhanced woman who dresses like a Playboy model, wears porno  
4 makeup and has a Jessica Rabbit type of cartoonish facial structure. She is acquired by the tech  
5 executive to show off to other tech executives. An unusually large number of San Francisco tech  
6 executives are homosexual but they still have Trophy wives to keep up appearances.

7  
8 At one of these events a young, attractive woman will approach a recently divorced tech executive  
9 and advise him that she understands “the Deal”. She uses code words and alluded to references but  
10 the intent is clear. She is willing to be either a trophy wife or a prostitute because the guy has the  
11 cash and she wants the rich lifestyle. A trophy wife is aware that she must accept the fact that the  
12 man is rich and can get any woman and there is a 3000 to 1 ratio of hot girls to rich men. If she  
13 wants the cash she must accept the non-monogamous sex-with-other-women culture of the tech  
14 males.

15  
16 The Trophy Wives get to live in the big houses with the tech guys and the prostitutes live in  
17 apartments in Marin County and Palo Alto. Many of the prostitutes are from overseas and are  
18 known as “Instagram Girls” because they advertise on Instagram and Match.com as “models”.  
19 Hundreds of these internet hookers are flown into San Francisco, Oakland and San Jose  
20 international airports, daily, on the credit cards of these tech executives. The pot is well stocked.  
21 San Francisco tech executives account for as much bay area sex trafficking, in dollar volume, as the  
22 San Francisco Chinatown gangs. A San Francisco tech prostitute goes for \$1000.00 to \$10000.00  
23 per night while a Chinatown sex worker is only \$300.00 per session.

24  
25 There are over 200 “Personal Services” providers for tech executives who pitch “managing  
26 engagement schedules” for CEO’s. They are pimps who have networked lists of hookers. They are  
27 usually women in the PR business who once were trophy wives, or prostitutes, themselves when  
28 they were younger. Most tech executives will eventually receive an offer from a “Social Events

1 Manager”, looking to hook them up.

2  
3 Trophy Wives and prostitute offerings can be found jogging on San Francisco’s Marina Green,  
4 sitting overtly in outdoor cafe’s on Chestnut Street and Union Street in the Marina district and at  
5 every “tech event”. They dress in fluorescent Spandex with bare midriff tops and painted on  
6 Spandex leggings shoved as far up their butt-crack as biology will allow. The regulars, though, are  
7 at the elite events and fund-raisers.

8  
9 The websites BACKPAGE.COM, SEEKING ARRANGEMENTS.COM and MATCH.COM are  
10 the source favored by the tech guys for girls-on-demand hookers. Google is in a huge battle against  
11 the government because Google does not want BACKPAGE.COM shut down. It is the top source  
12 for hookers for the men of Google.

13  
14 The parties at the French, British and Russian embassies are notoriously full of high-class hookers  
15 and wannabe trophy wife candidates. The key to confirming them, in person, or on Match.com, is  
16 the use of code words like “generous gentlemen”, “appreciates a special women”, “knows how to  
17 take care of..” , “diamonds..” and other subliminal references.

18  
19 The game can go south, though. Google’s, Tesla Investments and other top executives have been  
20 killed by their hookers. Over 100 top tech execs are now in the news for their over-the-top sex  
21 scandals. A Trophy Wife or a Hooker can blackmail the tech executives at any moment; non-  
22 disclosure agreements be damned. Hundreds of babies are now being paid for by hundreds of tech  
23 executives along with hush-money to keep the names of those babies fathers quiet.

24  
25 Yes, San Francisco truly is the modern version of Sodom and Gomorrah.

**San Francisco Millennium Tower is leaning, sinking and now cracking thanks to corrupt Ed Lee**

San Francisco's leaning, sinking Millennium Tower has a new problem after a window cracked on the 36th floor. The whole building could collapse just like the Florida condo collapse!

"This is a window system that's designed to sustain hurricane force winds so this is obviously of serious concern," said San Francisco Supervisor Aaron Peskin.

[San Francisco in one photograph: Rich liberals sip \\$30 glasses of wine as they watch the city burn](#)

**San Francisco Has The Most High-Tech Schools In The World But SF Students Are The Biggest Failures In The World**

- San Francisco proves, again, that it is all fluff and no substance  
- Bottom line: "Don't move to San Francisco if you want your kids to get an education!"

-----

A survey by Blind found that 59% of employees at Bay Area tech companies said they cannot afford homes.

- San Francisco is too expensive even for tech workers.

San Francisco's housing market is so out of control, most tech workers say they can't afford homes thanks to Google

The San Francisco Bay Area's housing market is so bleak, even tech workers are struggling to buy a home there.

- Cisco, eBay, and Intuit had the highest percentage of employees who said home ownership is elusive.

-----  
San Francisco Employee privacy is at stake as corporate surveillance technology monitors Bay Area workers' every move

[Ellen Sheng@ellensheng](mailto:Ellen Sheng@ellensheng)

#### Key Points

- Corporate interest in surveillance seems to be on the rise to boost productivity.
- A 2018 survey by Gartner found that 22% of organizations worldwide are using employee-movement data, 17% are monitoring work-computer-usage data, and 16% are using Microsoft Outlook- or calendar-usage data.
- Employees are concerned over this invasion of privacy.

**The San Francisco ghosts in Kamala Harris past show that she knows how to F\*ck**

by [Tiana Lowe](#)

Few outside of

California know or care who Willie Brown is. But that may be about to change. Brown spent around a quarter of a century as de facto royalty in California, first serving more than three decades as a member of the California Assembly (15 years

**SHOW ME THE MONEY**

**SF District Attorney Kamala Harris says she cannot “find” \$3.7M in Federal cash that she received.**

as its speaker), and then eight years as mayor of San Francisco. He also once carried out an open extramarital affair with a young prosecutor named Kamala Harris, currently a U.S. senator and leading contender for the Democratic presidential nomination. Now, we're far beyond the point that a personal past like that disqualifies a candidate. Harris, after all, is vying to challenge a thrice-married man who once graced the cover of Playboy and publicized his infidelity on the cover of the

1 New York Post. Candidates' personal lives no longer warrant deep investigation, unless they tell us  
2 something about their professional and political lives.

3 Unfortunately for Harris, the Willie Brown story is not strictly personal. It's also  
4 professional.

5  
6 When Harris was barely 30, she began dating Brown, then in his 60s and speaker of the  
7 California Assembly. To be clear, an ambitious woman dating a powerful man is not alone any  
8 cause for concern. Strong women are attracted to success, and a 30-year-old assistant district  
9 attorney is hardly, say, a 21-year-old intern. But the story doesn't end there.

10 For one thing, Brown  
11 was [married](#) at the time. He wound  
12 up dumping Harris and returning to  
13 his wife as he became mayor.  
14 (Again, in the era of President  
15 Trump, few will clutch their pearls  
16 over this.)

17 More questionable than the romance is the relationship's apparent effect on her finances and her  
18 career. Brown, according to contemporary news accounts, gifted his then-girlfriend two government  
19 jobs with ample salaries — while she was just getting her start as an assistant DA.

20  
21  
22 As the San Francisco Weekly [reported](#) in 2003:

23 Aside from handing her an ePlaintiff 42ensive BMW, Brown appointed her to two patronage  
24 positions in state government that paid handsomely — more than \$400,000 over five years. In 1994,  
25 she took a six-month leave of absence from her Alameda County job to join the Unemployment  
26 Insurance Appeals Board. Brown then appointed her to the California Medical Assistance  
27 Commission, where she served until 1998, attending two meetings a month for a \$99,000 annual  
28 salary.

(That's more than \$150,000 in current dollars.)

Even after they broke up, Brown, a San Francisco kingmaker, continued to support

Harris' career, boosting her district attorney run and years later calling on Antonio Villaraigosa to stay out of the Senate race, thus clearing the field for Harris. Just two years into her tenure as senator, Harris now wants to reach the White House.

The facts are messy, but most in California politics are. If she earned few hundred thousand dollars in taxpayer-funded patronage thanks to a personal relationship, that undermines some of her good-government cred. Or at least it requires her to explain how she's changed.

Barack Obama wisely fessed up about his drug usage long before he was a presidential candidate, and he alluded to his

personal growth and past mistakes enough that it created a satisfying narrative, one that couldn't be used against him. Donald Trump was a womanizer and a brash braggart, but that was his entire brand for more than two decades. The first real instance where his past came to haunt him was when

1 he seemed to confess to sexual battery on the now-infamous Access Hollywood tape. The  
2 allegations of consensual affairs never really mattered.

3  
4  
5 Harris doesn't talk about Brown. She says that it's not relevant. But part of her prosecutorial  
6 persona is a posture of toughness on corruption. But the Willie Brown story, with those big  
7 paychecks, gives off at least a whiff of cronyism. She's got to address the charge she was profiting  
8 personally off connections to power — at least if she wants us to believe she actually stands [for the](#)  
9 [people](#).

**THE DNC'S SAN FRANCISCO SEX CULT OFFERS CLITORAL TOUCHING FOR \$150.00**

We Went UnderCover With An iPhone In San Francisco And Marin County - The Dark Side of the Orgasmic Meditation Company

Almost every member is a registered Democrat and some are highly placed in the DNC. OneTaste is pushing its sexuality wellness education toward the mainstream. Some former members say it pushed them into sexual servitude and five-figure debts.

By Ellen Huet

When Michal got married in August 2015, her family and longtime friends didn't attend. The woman who walked her down the aisle, the dozens of beaming onlookers, her soon-to-be husband—all were people she'd met in the preceding 10 months. Wearing a loose, casual dress borrowed from one of her new friends, Michal spent the ceremony in a daze.

She knew she didn't want to get married like this, in the living room of a rented San Francisco house without her family's support, yet she felt compelled to do it. That uneasy feeling could apply to most of her experiences in OneTaste.

OneTaste is a sexuality-focused wellness education company based in the Bay Area. It's best known for classes on "orgasmic meditation," a trademarked procedure that typically involves a man

1 using a gloved, lubricated fingertip to stroke a woman’s clitoris for 15 minutes. For Michal, like  
2 those at her wedding, OneTaste was much more than a series of workshops. It was a company that  
3 had, in less than a year, gained sway over every aspect of her life.

5 **Warren Hinckle describes the corruption he witnessed inside San Francisco City Hall!**

6 **The following is an excerpt from the new book: [Ransoming Pagan Babies: The Selected](#)  
7 [Writings of Warren Hinckle](#) by Heyday Books. We are proud to present the work of Warren  
8 **Hinckle, one of San Francisco’s most legendary and larger-than-life personalities. For**  
9 **decades, Warren Hinckle provided unique insight into San Francisco’s turbulent political**  
10 **scene and changed the face of American journalism.****

11 On the afternoon of November 6, 1987, the Friday after the election, a crisp and cool San  
12 Francisco day without a sunbeam of hope piercing the dark electoral cloud gathered over his head,  
13 Supervisor John Molinari was secluded in his second floor City Hall office, receiving no visitors but  
14 the intimate and the anointed. Molinari’s new campaign manager, Jack Davis, knocked on the door  
15 and went in without waiting, as was his custom. He stopped short at the scene inside. John Molinari  
16 was seated behind his desk in what seemed to be a state of shock. In a supplicant pose before the  
17 supervisor was the Reverend Cecil Williams with his arms outstretched in prayerful entreaty. The  
18 black pastor gave Davis the annoyed glance of one who is interrupted during a sacramental process.  
19 Molinari waved the campaign manager off. Davis closed the door softly. The moment had the  
20 sanctity of the confessional. Indeed, it was a bizarre religious tableau of the type not seen in  
21 American politics since the conniving Kissinger knelt with the besotted Nixon in the bunker hours  
22 of Watergate.

23 The Reverend Williams, playing the rat to Molinari’s mole—even his friends call Molinari  
24 the “Mole”—told him that he was jumping ship to join Art Agnos, who had just come within a few  
25 thousand votes of burying the Mole, the former front-runner, in his own campaign mistakes. And  
26 Williams had the chutzpah to urge the Mole to quit the race while Agnos was soaring ahead.  
27 Molinari, who had just slam-dunked \$1.4 million of his friends’ money down the political sewer,  
28 was stupefied; the smiling clergyman wanted to turn the election into a coronation. Williams is the

1 boss of Glide Memorial United Methodist Church, the Notre Dame of the Tenderloin. He is also  
2 one of the face cards of San Francisco politics.

3 A savvy ecclesiastic who receives \$800,000 a year from the city to feed the hungry in his  
4 Tenderloin tabernacle, Williams was a premature supporter of Molinari. That was back in the good  
5 old days when Jack took an early lead in the polls after raising over a million dollars from  
6 garbagemen (the supervisor’s grandfather was a pioneer San Francisco scavenger), real estate  
7 developers and others doing business with the city and county of San Francisco. When Molinari  
8 came in a distant second in the November 3 primary, Williams was quick to apprehend an apparent  
9 change in divine will; God, after all, is on the side of the winners. The mercurial minister was the  
10 first of many longtime Molinari supporters to jump ship, citing what he saw as the candidate’s move  
11 to the right; many of the others deserting were men of capital who simply could not afford to back a  
12 loser.

13 The shock effect of Agnos’s dramatic showing against the previously heavily favored  
14 Molinari affected many in the city, not the least Agnos himself. “Feinstein is going to go to pieces,”  
15 he said. “She won’t be able to handle re-entering ordinary life without the policemen and the limos  
16 on hand. You can’t imagine the incredible power it gives you being mayor but you’ve got to be able  
17 to handle the power. I’m tough. I’ll be able to handle it. I’ll stand on the steps of City Hall like  
18 Feinstein never did and let the ordinary people come up to me and ask me questions, call me an  
19 ass----. The power won’t get to me.” Agnos told me that the night Williams did his routine in  
20 Molinari’s office. Agnos seemed adrenalated and his eyes were glistening with the otherworldly  
21 look of a messiah. He was in the state of political rapture that once moved his fellow Democrat  
22 Lyndon Johnson, high from peacemaking, to boast, “I’ve got doves coming out my armpits.”

23 I know these things because I was a candidate for mayor; not a journalistic observer, but a  
24 participant. I crossed the line dividing citizen and politician and entered the twisted world of San  
25 Francisco electoral politics, analogous in every way to the Twilight Zone. It is a world closer to the  
26 double dealing of the Middle East than to the values of middle America—a world where money is  
27 regent and the commitments that count are the ones that ring the cash register. And yet it’s an  
28 amazingly personal world where the loyalties and hatreds that shape the campaign come from real,

1 or imagined, hurts of years past. Just say no, I reply, when people ask me why anyone would run for  
2 mayor.

3 My decision to run had a lot to do with being born and raised in this town and thinking that  
4 the vision of the old city was being dirtied and chiseled by the politicians. There was a pervasive  
5 feeling, shared by many, that San Francisco deserved better than it was being offered in this  
6 election, or, perversely, that it was getting just what it deserved. I thought the city was getting short-  
7 sheeted, and that in the last free-for-all election we will see in many a year, some idiot had better  
8 jump in there and give the politicians what for. As it turned out, I was that idiot.

9 Yet this mayoral race, for all of its nightmarish big-bucks elements, has brought a few real  
10 changes. Who would have imagined a year ago that the election of 1987 would see:

11 • The nationally-hyped Feinstein regnant go out with a whimper, the city busted  
12 financially and Madame Mayor unable to deliver for either Molinari or the Giants stadium,  
13 her two final lost causes.

14 • Herb Caen losing it by putting his healthy cynicism aside and his 50 years of power  
15 on the line for a dice-playing buddy named Jack “Millionari” Molinari. Meantime, the young  
16 columnist for the afternoon paper went for Agnos, making Mr. San Francisco look like Mr.  
17 Milpitas.

18 • Political control of San Francisco shifting from the Feinstein/Molinari lazy bucks,  
19 let-'em-build-skyrises clique to the Sacramento moneybags machine headed by Assembly  
20 Speaker Willie Brown, the new power behind the Agnos throne.

21 • The entrance fee for any serious run for mayor of San Francisco becoming a cool  
22 million bucks.

23 Running for mayor of San Francisco was an exhilarating, exhausting, dreadful, extremely  
24 informative and sometimes hilarious experience. At a party thrown by a left-wing Valencia Street  
25 bookstore, a worker at McAuley Neuropsychiatric Institute came up to me and said he had great  
26 news. He had polled six people at the hospital and all six had said they were going to vote for me as  
27 the candidate who cared most for the poor and the homeless. That was encouraging, I said. Were  
28 these six of his co-workers? No, he said, crestfallen, they were inmates.

1 When you don't have a million bucks like your rivals, you have to think up gimmicks to  
2 draw attention to your candidacy. That's why we developed the official "Hinckle for Mayor"  
3 condoms. They were produced in faraway Thailand and packaged in Tempe, Arizona (sorry, no  
4 union bug), in covers cleverly resembling traditional campaign matchbooks. We gave away  
5 thousands for educational purposes here in the AIDS capital of the country.

6 Good news travels. During a stuffy black-tie fundraiser at the Players Club in New York, I  
7 gave one of the campaign matchbook/condoms to Tom Wolfe, the writer. Tom used to live in San  
8 Francisco and thought this great sport. He bounded across the room to former New York Mayor  
9 John Lindsay and handed him the little package, saying this was from his candidate for mayor.  
10 Lindsay began to slip it politely into his pocket, as one would with matches. Wolfe said, "Wait a  
11 minute, Your Honor, these aren't regular matches, these are from San Francisco." Lindsay looked  
12 down and opened the cover. His tanned chin dropped in horror.

13 -----  
14 **If You're Going To San Francisco...Think Again**

15 **By Brian C. Joondeph**

16  
17 A few decades ago, Plaintiff 22McKenzie sang one of the classic hippie [anthems](#), "San Francisco,"  
18 back in 1967. It was sung during the heyday of sex, drugs, and rock and roll. Flower power was the  
19 rage. Peace, love, and understanding were the mantras of the day, in response to the Viet Nam War  
20 and the oppression of The Man.

21 McKenzie sang, "If you're going to San Francisco, be sure to wear some flowers in your hair." Back  
22 then, the flowers were for decoration, to match the tie-dyed clothing and sandals.

23  
24 Flash forward fifty years, and residents of San Francisco may need to wear flowers, not only in their  
25 hair, but also covering their entire bodies. Not for decoration, however, but to mask the odor of a  
26 new feature of the streets of San Francisco. Excrement.

27 And it's been making the national news, a veritable emblem of what the city has become.  
28 The newly inaugurated San Francisco mayor is London Breed, who, as an aside, has a perfect 1960s

1 name. Interviewed after her inauguration, the Daily Caller noted that she [observed](#) that the streets of  
2 her city "are flooded with the excrement of the homeless."

3 In other words, San Francisco has become Poop City.

4       Apparently this is not a new problem. The famous chronicler of the city, San Francisco  
5 Chronicle columnist Herb Caen, occasionally would use the phrase in his daily screeds during the  
6 1980s and 1990s, but it's far worse now. As the Daily Caller had the new mayor [noting](#): "There is  
7 more feces on the sidewalks than I've ever seen growing up here." And not just poop. Added to the  
8 mix is a "dangerous mix of drug needles, garbage, and feces."

9       Lovely. In 1967, "If you're going to San Francisco, you're gonna meet some gentle people  
10 there." Now you will meet a garbage dump mixed with a cesspool.

11       San Francisco has about 7,500 homeless individuals and is [spending](#) \$280 million on  
12 homeless services for them. Some simple math reveals that the city could give each homeless  
13 resident just over \$37,000 per year, a figure well above the minimum wage in most other places,  
14 and call it a day.

15       If you take out the salaries of all the bureaucrats administering these "homeless services,"  
16 there would likely be more than \$100,000 available for each homeless person. But you know that  
17 won't happen in a Democrat-run city, an administrative state, like San Francisco.

18       How can the city discourage the homeless from using the sidewalks as their toilets? In their  
19 minds, spend more money. The mayor [assured](#) her fellow progressives: "Harsher penalties for  
20 offenders are not on the table." Instead the typical liberal solution, as the mayor promised, came to:  
21 "I work hard to make sure your programs are funded." I wonder if we'll see toilet paper dispensers  
22 popping up on the sidewalks?

23       This situation might seem to be a cross between funny and absurd, but it has economic  
24 consequences far beyond the necessary clean-up. Who might not be going to San Francisco because  
25 of the city's pungent new attractions?

26       Start with conventions? San Francisco has always been a popular convention destination due  
27 to its fairly pleasant weather, its tourist attractions, its world-class restaurants, and of course, the  
28 cable cars. But in its current state, the bloom is off the San Francisco rose.

1 A major medical association recently cancelled its annual meeting which would have  
2 brought 15,000 attendees and \$40 million to the San Francisco economy, [according](#) to the SF  
3 Chronicle. This, after many years of coming to the city. Think of that. A group of doctors, quite  
4 familiar with feces, needles, and the downtrodden, have said "enough."  
5 These are things doctors can see in the medical ward and prefer to avoid when away from work,  
6 often with family, at a medical conference. It's likely that other trade groups and industries will stay  
7 away from San Francisco as well.

8 Can you blame them? How many U.S. cities provide visitors with a [public defecation map](#) to  
9 help tourists steer clear of piles of poop littering the city's sidewalks? Or which other city can boast  
10 of the 20-pound [bag of poop](#) found a few weeks ago on a city sidewalk?

11 How did things get this bad for the city that Tony Bennett left his heart in? When Tony  
12 recorded that song in the 1950s, San Francisco had a Republican mayor. Their last Republican  
13 mayor, George Christopher, [left office in 1964](#), when the Beatles arrived in America. Since then,  
14 it's been a hard day's night for San Francisco, with nearly sixty years' worth of Democrats running  
15 the show.

16 At a national level, San Francisco is represented by House minority leader Nancy Pelosi,  
17 Senator Dianne Feinstein, and Senator Kamala Harris, all of whom are hard-core liberals. I am quite  
18 confident that there are no piles of poop on the sidewalks in front of their homes.

19 San Francisco is just another of [many U.S. cities](#) run by Democrats, and into the ground.  
20 Even liberal film maker Michael Moore [observed](#) about his home city in Michigan: "Flint has voted  
21 for Dems for 84 straight yrs. What did it get us?"

22 San Francisco is left with virtue-signaling in the name of compassion, tolerance and all the  
23 other liberal claptrap in a bid to try to hide third world conditions on city streets. Aside from visitors  
24 choosing to go anywhere but San Francisco, what about the residents living in such conditions?

25 Warm summer temperatures and open sewers become a microbiology laboratory. Toss in a  
26 bunch of undernourished and unhealthy homeless persons, sharing hypodermic needles, and  
27 pestilence follows. Such a shame for a once-magnificent city.

28 Rather than cleaning up its mess, San Francisco has just this week [banned plastic straws](#).

1 Poop and hypodermic syringes littering the sidewalks is just fine, but watch out for those nasty little  
2 plastic straws.

3           Once upon a time Plaintiff 22McKenzie’s words rang true, “For those who come to San  
4 Francisco, summertime will be a love-in there.” Now it’s simply America’s version of a s\*\*\*hole.  
5 Brian C. Joondeph, MD, MPS, a Denver based physician and writer.

4 These are the people that decide who gets elected in San Francisco.

5 They trade wives, boyfriends, rent boys and prostitutes.

6 They operate a vicious black-list.

7  
8 **Palo Alto, California – Home Of The Tech Mobsters**

9 Stanford University graduates are inspired by the likes of corrupt Elon Musk and corrupt  
10 Italian Prime Minister Silvio Berlusconi—the forerunner of the media-manipulating populist-  
11 criminal-strongman trend that’s recently swept through Western nations—or passages discussing  
12 Facebook, Twitter and Google’s prioritization of profit over their responsibility to safeguard  
13 democracy from hate speech and disinformation. Eric Schmidt, Larry Page, Elon Musk, Jack  
14 Dorsey, Reid Hoffman, John Doerr, Vinod Khosla and Mark Zuckerberg are the embodiment of this  
15 problem, given that their flouting of rules and standards of common decency—has made it appear  
16 acceptable, and in fact rewarding, to act in the worst possible manner as a means of achieving one’s  
17 selfish ends. Their Silicon Valley is the pit of American assholery.

18 To grasp that argument, one need only listen to Silicon Valley Assholes: A Theory’s basic  
19 description of an asshole. As many state, “The asshole is the guy who allows himself special  
20 advantages in Bay Area cooperative life out of an entrenched sense of entitlement that immunizes  
21 him against the complaints of other people.” In other words, he’s the individual—generally male,  
22 although as John Cleese candidly admits, his mother probably was one too—who thinks the general  
23 rules don’t apply to them because they’re somehow smarter, better, or more special than their fellow  
24 citizens. James’ example is a surfer who violates the right-of-way customs in the ocean. Yet the  
25 type is universal, whether in line at the grocery store, on the road in traffic, or at work. They’re the  
26 arrogant creeps convinced they’re fundamentally superior, and thus free to conduct themselves in  
27 whatever way they see fit. That IS the essence of such attitudes, according to the Silicon Valley  
28 Assholes Process aren’t confined to law enforcement. Stanford University Fraternities are breeding

1 grounds for horrid group-think mindsets about women and sex. The tech financial sector encourages  
2 greed, ruthlessness, and vulgarity as the best way to get ahead. Google executives champion  
3 initiation-ritual abuse in service of its own greater good. You can see the movies: Animal House,  
4 The Wolf of Wall Street and Full Metal Jacket to see the underscore of the notion that these milieus  
5 are all rife with a similar brand of assholery in which arrogance and entitlement justify all manner  
6 of despicable ideas and deeds. Every major rape fraternity in the USA eventually sent those abusive  
7 boys to run Sandhill Road venture capital companies and Google or Facebook departments.

8       The most compelling—and enraging—realities concerns Silicon Valley, where Mark  
9 Zuckerberg and like-minded CEOs have bred a culture of trampling on competitors, laws, historical  
10 norms, and the bedrock tenets of democracy in pursuit of additional eyeballs, clicks, and revenue  
11 streams. In a place where young men team up in a desperate quest to develop the innovative next  
12 big thing that’ll turn them into tech moguls (“bro-gramming”), nothing matters but the self-centered  
13 end goal. And though Facebook, Twitter, Google, Kleiner Perkins, Greylock and their ilk could  
14 alter this landscape by simply cracking down on the horridness that permeates their platforms, they  
15 choose not to because of the negative financial consequences and their lust for hookers, private jets  
16 and cocaine.

1 **EXHIBIT 33 – How They Ran The Scams**

2  
3 The public must continue to terminate these felony organized crimes by major public  
4 officials and [Silicon Valley oligarch tech mobsters!](#) (  
5 [https://www.breitbart.com/tech/2020/08/31/deleted-big-techs-battle-erase-trump-movement-steal-](https://www.breitbart.com/tech/2020/08/31/deleted-big-techs-battle-erase-trump-movement-steal-election/)  
6 [election/](#) )

7 taxpayers must use the internet to publicly shame them! The public must boycott their  
8 companies and crash their stock! Voters must demand their arrests and indictments. Citizens must  
9 join together in one voice to make it illegal for politicians to own stock because [that is how bribes](#)  
10 [are now paid!](#) ( [https://www.yahoo.com/lifestyle/insider-trading-rife-no-regulators-](https://www.yahoo.com/lifestyle/insider-trading-rife-no-regulators-090007170.html)  
11 [090007170.html](#) )

12 State and federal officials defrauded citizens out of millions of dollars of their life-savings  
13 and then attacked those taxpayers for reporting the crimes! those officials then put the profits and  
14 stock market funds from those crimes in their own, and their families, corrupt [monopoly](#) pockets! (  
15 [https://www.msn.com/en-us/money/markets/monopoly-power-lies-behind-worst-trends-in-us-fed-](https://www.msn.com/en-us/money/markets/monopoly-power-lies-behind-worst-trends-in-us-fed-study-says/ar-BB186Jq0?ocid=uxbndlbing)  
16 [study-says/ar-BB186Jq0?ocid=uxbndlbing](#) )

17 **Their attacks against individuals were their downfall.** FBI-class forensic evidence has  
18 shown that there were only a few people who could have operated, financed and run command-and-  
19 control of the attacks. The money, the bribes, the beneficiary profit tracings, the instructions, their  
20 covert communications, the stock market owner-ships, etc.; all trace back to the same handful of  
21 people who are all business and political manipulation partners. Their attacks boomeranged back to  
22 point straight at the attackers! The evidence is clear!

23 It seems like the stonewalling never ends. Famous California and Washington DC  
24 politicians ran these crimes along with big tech oligarchs!

25 Huge cover-ups ( [https://www.documentcloud.org/documents/6827837-States-Newsroom-](https://www.documentcloud.org/documents/6827837-States-Newsroom-1023-Application-Materials.html)  
26 [1023-Application-Materials.html](#) ) are underway but they will never be allowed to get away with it!  
27 they are being exposed by these crowd-sourced investigations that use 100% legal law enforcement  
28 and intelligence technologies !

6 -----  
7 *Jeffrey Epstein* is dead, *Raj gupta* has been jailed, *Steve Rattner* was indicted, *James*  
8 *Bronkema* is dead, *Roger Boas* is dead....but those were just the *tip of the ice-berg*. *Eric Schmidt*,  
9 *Larry Page*, *Elon Musk* and their crooked senators are still running around doing the same old  
10 crimes and corruption via their network of dirty tricks operatives.

11 In one of the whistle-blower complaints about State and Federal officials conduct in  
12 stimulus programs, Plaintiffs made repeated attempts to inform executive leadership and legal  
13 advisers about questionable activities of those officials. Plaintiffs have all of the needed additional  
14 evidence to back up their allegations against these officials.

15 Concerned parties have been blocked from reporting the activity to Offices of Legal Affairs,  
16 in violation of the law. In retribution, A number of parties had tax-payer financed revenge programs  
17 launched against them using State and Federal resources. Plaintiffs directly witnessed much of the  
18 behavior and reported it, personally, to the FBI at their offices. Plaintiffs have made top law  
19 enforcement and intelligence officials aware of these concerns on repeated occasions. To Plaintiffs  
20 knowledge, none of the agencies ever took action to resolve the issues, and several of them  
21 specifically directed subordinate staff to continue facilitating questionable activities after the  
22 concerns were raised. Plaintiffs witnessed the concerning activities in Washington, D.C., New  
23 York, California and in activities with overseas parties.

24 White House Staff including Rahm Emanuel, Bill Daley, Jay Carney, Robert Gibbs, Steve  
25 Rattner, David Axelrod, John Podesta, et al; and The Secretary of Energy Steven Chu and the Chief  
26 Counsel for the United States Department of Energy Daniel Cohen and Bill Cooper were, (from  
27 2007 forward), either financed by, friends, with, sleeping with, dating the staff of, holding stock  
28 market assets in, promised a revolving door job or government service contracts from, partying

1 with, personal friends with, photographed at private events with, exchanging emails with, business  
2 associates of or directed by; Plaintiffs business adversaries, or the Senators and Department of  
3 Energy politicians that those business adversaries pay campaign finances to, or supply political  
4 digital search manipulation services to. Criminal U.S. Senators coordinated and profited in these  
5 schemes. Their own family members have now supplied evidence against them. Nobody is allowed  
6 to "win" government funds ***unless*** they are friends and stock market partners with certain U.S.  
7 Senators. Even if your application metrics beat every single other competing Applicant, you will get  
8 lied to and defrauded by Department of Energy and White House officials. You will be told that you  
9 have a "*fair chance*", **but** all of the money is secretly hard-wired to a business partner of a Pelosi or  
10 Feinstein and you will just waste your time, staff resources and payroll waiting for years on  
11 promised funds that will never come.

12  
13 From 2007 forward, The White House and The U.S. Government were controlled by the Silicon  
14 Valley tech oligarchs for monopolistic profiteering! (ie: You could not swing a cat in the Obama  
15 White House without hitting a Google executive or an ex-lover of Eric Schmidt) That is a violation  
16 of the law, the Constitution and the American Way.

26 **The Silicon Valley High-Tech Black-Listing Antitrust Litigation And Big Tech's  
27 Attacks On Democracy**

28 *"...Who are the criminal mobsters of Silicon Valley's democracy manipulation millionaires*

1 and billionaires known as "**The Commission**" (Also known as "The Paypal Mafia", The "Deep  
2 State", "The Silicon Valley Cartel")? Who are the elitist tax evader, sex freak, money-laundering,  
3 black-list ( [https://www.mediaite.com/news/ex-google-engineer-says-glitch-blocking-websites-](https://www.mediaite.com/news/ex-google-engineer-says-glitch-blocking-websites-including-drudge-breitbart-could-have-revealed-a-mysterious-list/)  
4 [including-drudge-breitbart-could-have-revealed-a-mysterious-list/](https://www.mediaite.com/news/ex-google-engineer-says-glitch-blocking-websites-including-drudge-breitbart-could-have-revealed-a-mysterious-list/) )operating, Senator bribing, off-  
5 shore cash hiding, election rigging insiders who manipulate the system for their own insider trading  
6 schemes: Reid Hoffman, Larry Page, Sergy Brin, Elon Musk, Dustin Moskovitz, Mark Zuckerberg,  
7 Eric Schmidt, Laurene Powell Jobs, Steve Spinner, Steve Westly, Vinod Khosla, Andy Bechtolsheim,  
8 Brian Goncher, Cheryl Sandberg, David Drummond, Andy Rubin, David Plouffe, Tim Draper,  
9 Jeffrey Epstein, Gilman Louie, Ira Ehrenpreis, Tim Cook, McKinsey Consulting, Deloitte, Goldman  
10 Sachs, Jerry Brown, Richard Blum, James Breyer, John Podesta, Joe Lonsdale, John Doerr, Keith  
11 Rabois, Marc Andreessen, George Soros, Mario Rosatti, Martin LaGod, Michael Moritz, Viktor  
12 Vekselberg, Larry Summers, Pierre Omidyar, Tom Steyer, Steve Jurvetson, Steve Rattner and their  
13 CARTEL including their crooked lawyers and lobbyist mobs! They have "command and control and  
14 exclusive-beneficiary positions in ongoing, coordinated, criminal and anti-trust activities involving  
15 government and stock market funds...". Their crimes financially benefited Dianne Feinstein, Nancy  
16 Pelosi, Jerry Brown, Kamala Harris and Barack Obama and their stock market holdings, while  
17 harming their competitors on purpose. The securities and stock market records prove that it was  
18 crony corruption and payola. The sex crime victims of Cartel member [Jeffrey Epstein](https://www.dailymail.co.uk/news/article-8639501/Bill-Clinton-smiles-receiving-neck-massage-Jeffrey-Epstein-victim.html) (  
19 [https://www.dailymail.co.uk/news/article-8639501/Bill-Clinton-smiles-receiving-neck-massage-](https://www.dailymail.co.uk/news/article-8639501/Bill-Clinton-smiles-receiving-neck-massage-Jeffrey-Epstein-victim.html)  
20 [Jeffrey-Epstein-victim.html](https://www.dailymail.co.uk/news/article-8639501/Bill-Clinton-smiles-receiving-neck-massage-Jeffrey-Epstein-victim.html) ) reported him to the DOJ a decade ago, yet nothing was done.  
21 Plaintiffs reported this Cartel in 2008, STILL, nothing has been done! These people have run a  
22 stock market and government funding State and Federal PONZI SCHEME in every "stimulus" from  
23 2008 forward! They use free government money, stock valuation pump-and-dump and black-lists to  
24 make certain that no competitor can ever operate against them in any market. The more that the  
25 California Senators get to control Congress, the more they get to push laws that benefit companies  
26 owned by their spouses! By filling California up with illegal immigrants, enticed by the offer of  
27 "free stuff", Dianne and Nancy get to control federal policy by manipulating the census numbers. By  
28 controlling government decisions, Nancy and Dianne get to give taxpayermoney to their friends

1 (Elon Musk, Eric Schmidt, Mark Zuckerberg, etc, who they own stock with) and deny that money to  
2 their competitors. They [have a covert news and media network](#) (  
3 <https://www.opensecrets.org/news/2020/05/dark-money-networks-fake-news-sites/> ) that hides all  
4 news coverage about the crimes. Illegal immigrants equal control of the stock market profits for  
5 Nancy's, Kamala's and Dianne's investment banker husbands. It is as simple as that!..."

6  
7 **HOW THE U.S. DEPARTMENT OF ENERGY AND CALIFORNIA SENATORS**  
8 **CREATED THE LARGEST INSIDER TRADING SCHEME IN HISTORY**

9 Companies in PR-hype industries sometimes have a history of [reinventing themselves](#)  
10 ( <https://www.ft.com/content/8c46ff08-5522-469e-bc6c-4be08cdf9828> ). For Tesla Motors and  
11 Solyndra the potential transition from start-up to future energy monopoly was being facilitated by  
12 the government. Now Kodak has copied this corruption scam. The **U.S. DEPARTMENT OF**  
13 **ENERGY (GOVT)** [signed a letter of interest](#) ( [https://www.dfc.gov/media/press-releases/dfc-](https://www.dfc.gov/media/press-releases/dfc-sign-letter-interest-investment-kodaks-ePlaintiff-42ansion-pharmaceuticals)  
14 [sign-letter-interest-investment-kodaks-ePlaintiff 42ansion-pharmaceuticals](https://www.dfc.gov/media/press-releases/dfc-sign-letter-interest-investment-kodaks-ePlaintiff-42ansion-pharmaceuticals) ) to provide hundreds of  
15 millions in favored-nation 'loans' to them to support the company's plans to produce green energy  
16 things for the U.S. domestic market. Thereafter, a series of ensuing events raised concerns about  
17 potentially illegal insider trading, and of an uneven level playing field for investors in U.S. stock  
18 markets. The immediate response by U.S. Congress was to investigate. The new KODAK Covid  
19 loan is the same kind of crime, which insiders learned they could get away with in the Obama **U.S.**  
20 **DEPARTMENT OF ENERGY.**

21 Whether the suspicious trading activity is a case of illegal insider trading activity is difficult  
22 to judge without further scrutiny by prosecutors. However, these new types of substantial loans  
23 from the government to private companies give rise to a new type of private information. While  
24 traditional corporate events, such as earnings announcements or corporate takeovers, are subject to  
25 strict rules about the disclosure of information and reporting requirements, it appears that the  
26 disbursement of government subsidies and grants falls into a grey area not effectively covered by  
27 existing rules. Thus, it is necessary to consider more transparent and consistent protocols on  
28 information disclosure to avoid providing unfair advantages to a select group of company insiders

1 including California Senators and Energy Department staff.

2 Just one day before the official announcement of the loan, on July 27, Kodak's stock price  
3 jumped by about 25 percent on a trading volume of 1,645,719 shares, over five times the average  
4 daily trading volume in prior months. These unusual trading activities were likely [attributable to the](#)  
5 [premature release of the news by several media outlets](#). ( [https://www.wsj.com/articles/tweets-and-](https://www.wsj.com/articles/tweets-and-articles-sent-kodak-shares-surg-ing-before-official-announcement-11596056729)  
6 [articles-sent-kodak-shares-surg-ing-before-official-announcement-11596056729](https://www.wsj.com/articles/tweets-and-articles-sent-kodak-shares-surg-ing-before-official-announcement-11596056729) )

7 Unusual trading activity also occurred in Kodak's stock options, even prior to the news  
8 leakage. The trading volume was especially strong in out-of-the-money (OTM) call options, which  
9 are set to profit especially from a positive jump in stock prices, with daily trading volumes of all  
10 OTM call options on July 17, 20 and 27 that was more than ten times larger than average volumes  
11 since the beginning of 2020.

12 Kodak's executives and board members are also linked to controversial transactions. About  
13 one month before the announcement, on June 23, the company's executive chair and a  
14 director [purchased over 50,000 shares](#) ( [https://www.sec.gov/cgi-bin/browse-edgar?](https://www.sec.gov/cgi-bin/browse-edgar?action=getcompany&CIK=0000031235&type=4)  
15 [action=getcompany&CIK=0000031235&type=4](https://www.sec.gov/cgi-bin/browse-edgar?action=getcompany&CIK=0000031235&type=4) ) of the company's stock a day during the time  
16 when the company was negotiating loans with the government. In addition, four executives  
17 were [granted stock options right on July 27](#), ( [https://www.wsj.com/articles/kodaks-stock-surge-](https://www.wsj.com/articles/kodaks-stock-surge-turned-insiders-options-into-potential-windfall-11596220862)  
18 [turned-insiders-options-into-potential-windfall-11596220862](https://www.wsj.com/articles/kodaks-stock-surge-turned-insiders-options-into-potential-windfall-11596220862) ) just one day before the stock price  
19 skyrocketed. Prior to another major stock price drop, due to a freezing of the Kodak loan associated  
20 with the congressional investigation, a board [member donated \\$116 million](#) ( <https://www.ft.com/content/6e7494c4-56cd-4121-8027-ecfc9586958c> ) in company shares,  
21 <https://www.ft.com/content/6e7494c4-56cd-4121-8027-ecfc9586958c> ) in company shares,  
22 entitling the donors to a substantial tax deduction.

23 These events have alerted legislators and raised concerns that trades of investors may  
24 explain the suspicious activity with access to material non-public information. On August 3, Sen.  
25 [Elizabeth Warren](#) (D-Mass.) formally [requested the Securities and Exchange Commission \(SEC -](#)  
26 [https://www.warren.senate.gov/imo/media/doc/2020.08.03%20Letter%20to%20SEC%20re](https://www.warren.senate.gov/imo/media/doc/2020.08.03%20Letter%20to%20SEC%20re%20Kodak%20stock%20trades.pdf)  
27 [%20Kodak%20stock%20trades.pdf](https://www.warren.senate.gov/imo/media/doc/2020.08.03%20Letter%20to%20SEC%20re%20Kodak%20stock%20trades.pdf)) to [investigate](#) the possibility of insider trading and violation of  
28 regulatory compliance rules. Two House committee chairs also launched their own

1 inquiries, [requesting detailed records](#) from the loan provider, DFC. (  
2 [https://financialservices.house.gov/uploadedfiles/2020.08.04\\_h\\_cmtes\\_ltr\\_to\\_dfc.pdf](https://financialservices.house.gov/uploadedfiles/2020.08.04_h_cmtes_ltr_to_dfc.pdf))

3 Besides these valid outcries due to concerns about the potential for illegal insider trading,  
4 this turn of events raises a question of broad public interest. Why was the usual protocol for the  
5 enforcement of news disclosure and insider trading regulations around corporate events not  
6 followed in this case? The announcement of the government-sponsored Kodak loan is no different  
7 from traditional corporate events, such as earnings disclosures, announcements of mergers and  
8 acquisitions, spinoffs, or new product announcements. It also involves secret negotiations in  
9 executive offices that give rise to the potential for trading on privileged information.

10 In the Kodak case, the private information was indeed material. The \$765 million  
11 government loan it received amounts to 54 percent of the company's total assets, 78 percent of its  
12 annual revenue, and is 64 times larger than its annual operating cash flows, according to its [most](#)  
13 [recent 10-K filing](#). ( [https://www.sec.gov/Archives/edgar/data/31235/000156459020011408/kodk-](https://www.sec.gov/Archives/edgar/data/31235/000156459020011408/kodk-10k_20191231.htm)  
14 [10k\\_20191231.htm](https://www.sec.gov/Archives/edgar/data/31235/000156459020011408/kodk-10k_20191231.htm) ) It is not surprising that such news boosted the stock price from about \$2 to  
15 \$60 in a matter of days. Another related issue is that the DFC and Kodak did not release the news at  
16 the same time. This lack of consistency in information disclosure makes it difficult to pinpoint when  
17 the information was publicly available.

18 The Kodak experience was not unique. The [massive monetary and fiscal](#)  
19 [interventions](#) ( <https://www.imf.org/en/Topics/imf-and-covid19/Policy-Responses-to-COVID-19> )  
20 that have been announced in the U.S., Europe and elsewhere are likely to lead to similar types of  
21 sensitive news releases. The difference with respect to more traditional corporate announcements is  
22 that the government has a seat at the table. U.S. officials and their counterparts elsewhere are  
23 picking winners and losers in the disbursement of grants, loans and contracts. Thus, a new source of  
24 privileged information has emerged that raises the possibility that insiders may well profit from  
25 possession of such information before it is released to the market.

26 In The U.S. Government Cleantech Crash political payola quid pro quo, government money  
27 was used by Goldman Sachs and their clients for the following scams, EVERY SINGLE ONE OF  
28 WHICH was used in the Dept of Energy ATVM AND LGP funds manipulations.

2 **EXHIBIT 34 - The Cartel's Bribes Using The Stock Market Are The Main**  
3 **Source Of Payola**

4  
5 *Every One* of these [financial scam tricks](#) (  
6 [https://www.sec.gov/files/Algo\\_Trading\\_Report\\_2020.pdf](https://www.sec.gov/files/Algo_Trading_Report_2020.pdf) ) is used **daily** by the suspects in this  
7 case:

8 **\*\* The Silicon Valley Stock Scam Called: "Pools"**

9 Agreements, often written, among a group of traders to delegate authority to a single  
10 manager to trade in a specific stock for a specific period of time and then to share in the resulting  
11 profits or losses." [5] In Australia section 1041B prohibits pooling. (  
12 [https://en.wikipedia.org/wiki/Market\\_manipulation#cite\\_note-5](https://en.wikipedia.org/wiki/Market_manipulation#cite_note-5) )

13 **\*\* The Silicon Valley Stock Scam Called: "Churning"**

14 When a trader places both buy and sell orders at about the same price. The increase in  
15 activity is intended to attract additional investors, and increase the price.

16 **\*\* The Silicon Valley Stock Scam Called: "Stock bashing"**

17 This scheme is usually orchestrated by savvy online message board posters (a.k.a.  
18 "Bashers") who make up false and/or misleading information about the target company in an  
19 attempt to get shares for a cheaper price. This activity, in most cases, is conducted by posting  
20 libelous posts on multiple public forums. The perpetrators sometimes work directly for  
21 unscrupulous Investor Relations firms who have convertible notes that convert for more shares the  
22 lower the bid or ask price is; thus the lower these Bashers can drive a stock price down by trying to  
23 convince shareholders they have bought a worthless security, the more shares the Investor Relations  
24 firm receives as compensation. Immediately after the stock conversion is complete and shares are  
25 issued to the Investor Relations firm, consultant, attorney or similar party, the basher/s then become  
26 friends of the company and move quickly to ensure they profit on a classic Pump & Dump scheme  
27 to liquidate their ill-gotten shares. (see P&D)

28 **\*\* The Silicon Valley Stock Scam Called: "Pump and dump"**

1 A [pump and dump](#) scheme is generally part of a more complex grand plan of market  
2 manipulation on the targeted security. The Perpetrators (Usually stock promoters) convince  
3 company affiliates and large position non-affiliates to release shares into a free trading status as  
4 "Payment" for services for promoting the security. Instead of putting out legitimate information  
5 about a company the promoter sends out bogus e-mails (the "Pump") to millions of unsophisticated  
6 investors (Sometimes called "Retail Investors") in an attempt to drive the price of the stock and  
7 volume to higher points. After they accomplish both, the promoter sells their shares (the "Dump")  
8 and the stock price falls, taking all the duped investors' money with it.

9 **\*\* The Silicon Valley Stock Scam Called: "Runs"**

10 When a group of traders create activity or rumours in order to drive the price of a security  
11 up. An example is the [Guinness share-trading fraud](#) of the 1980s. In the US, this activity is usually  
12 referred to as *painting the tape*.<sup>[6]</sup> Runs may also occur when trader(s) are attempting to drive the  
13 price of a certain share down, although this is rare. (see Stock Bashing) (

14 [https://en.wikipedia.org/wiki/Guinness\\_share-trading\\_fraud](https://en.wikipedia.org/wiki/Guinness_share-trading_fraud) )

15 **\*\* The Silicon Valley Stock Scam Called: "Ramping (the**  
16 **market)"**

17 Actions designed to artificially raise the market price of listed securities and give the  
18 impression of voluminous trading in order to make a quick profit.<sup>[7]</sup> (

19 [https://en.wikipedia.org/wiki/Market\\_manipulation#cite\\_note-7](https://en.wikipedia.org/wiki/Market_manipulation#cite_note-7) )

20 **\*\* The Silicon Valley Stock Scam Called: "Wash trade"**

21 In a [wash trade](#) the manipulator sells and repurchases the same or substantially the same  
22 security for the purpose of generating activity and increasing the price.

23 **\*\* The Silicon Valley Stock Scam Called: "Bear raid"**

24 In a [bear raid](#) there is an attempt to push the price of a stock down by heavy selling or [short](#)  
25 [selling](#).<sup>[8]</sup> ( [https://en.wikipedia.org/wiki/Market\\_manipulation#cite\\_note-8](https://en.wikipedia.org/wiki/Market_manipulation#cite_note-8) )

26 **\*\* The Silicon Valley Stock Scam Called: "Lure and Squeeze"**

27 This works with a company that is very [distressed on paper](#), with impossibly high debt,  
28 consistently high annual losses but very few assets, making it look as if bankruptcy must be

1 imminent. The stock price gradually falls as people new to the stock short it on the basis of the poor  
2 outlook for the company, until the number of shorted shares greatly exceeds the total number of  
3 shares that are not held by those aware of the lure and squeeze scheme (call them "people in the  
4 know"). In the meantime, people in the know increasingly purchase the stock as it drops to lower  
5 and lower prices. When the short interest has reached a maximum, the company announces it has  
6 made a deal with its creditors to settle its loans in exchange for shares of stock (or some similar kind  
7 of arrangement that leverages the stock price to benefit the company), knowing that those who have  
8 short positions will be squeezed as the price of the stock sky-rockets. Near its peak price, people in  
9 the know start to sell, and the price gradually falls back down again for the cycle to repeat.

10 **\*\* The Silicon Valley Stock Scam Called: "Quote stuffing"**

11 Quote stuffing is made possible by high-frequency trading programs that can execute market  
12 actions with incredible speed. However, high-frequency trading in and of itself is not illegal. The  
13 tactic involves using specialized, high-bandwidth hardware to quickly enter and withdraw large  
14 quantities of orders in an attempt to flood the market, thereby gaining an advantage over slower  
15 market participants.[9] ( [https://en.wikipedia.org/wiki/Market\\_manipulation#cite\\_note-9](https://en.wikipedia.org/wiki/Market_manipulation#cite_note-9) )

16 **\*\* The Silicon Valley Stock Scam Called: "Cross-Product**  
17 **Manipulation"**

18 A type of manipulation possible when financial instruments are settled based on benchmarks  
19 set by the trading of physical commodities, for example in United States Natural Gas Markets. The  
20 manipulator takes a large long (short) financial position that will benefit from the benchmark  
21 settling at a higher (lower) price, then trades in the physical commodity markets at such a large  
22 volume as to influence the benchmark price in the direction that will benefit their financial position.

23 **\*\* The Silicon Valley Stock Scam Called: "Spoofing (finance)"**

24 Spoofing is a disruptive algorithmic trading entity employed by traders to outpace other  
25 market participants and to manipulate commodity markets. Spoofers feign interest in trading  
26 futures, stocks and other products in financial markets creating an illusion of exchange pessimism in  
27 the futures market when many offers are being cancelled or withdrawn, or false optimism or  
28 demand when many offers are being placed in bad faith. Spoofers bid or offer with intent to cancel

1 before the orders are filled. The flurry of activity around the buy or sell orders is intended to attract  
2 other [high-frequency traders](#) (HFT) to induce a particular market reaction such as manipulating the  
3 market price of a security. Spoofing can be a factor in the rise and fall of the price of shares and can  
4 be very profitable to the spoofer who can time buying and selling based on this manipulation.

5 **\*\* The Silicon Valley Stock Scam Called: "Price-Fixing"**

6 A very simple type of fraud where the principles who publish a price or indicator conspire to  
7 set it falsely and benefit their own interests. [The Libor scandal](#) for example, involved bankers  
8 setting the [Libor](#) rate to benefit their trader's portfolios or to make certain entities appear more  
9 creditworthy than they were.

10 **\*\* The Silicon Valley Stock Scam Called: "High Closing  
11 (finance)"**

12 High closing is an attempt to manipulate the price of a security at the end of trading day to  
13 ensure that it closes higher than it should. This is usually achieved by putting in manipulative trades  
14 close to closing.

15 **\*\* The Silicon Valley Stock Scam Called: "Cornering the  
16 market"**

17 In [cornering the market](#) the manipulators buy sufficiently large amount of a commodity so  
18 they can control the price creating in effect a [monopoly](#). For example, the brothers [Nelson Bunker](#)  
19 [Hunt](#) and [William Herbert Hunt](#) attempted to corner the world [silver](#) markets in the late 1970s and  
20 early 1980s, at one stage holding the rights to more than half of the world's deliverable silver.[10] (  
21 [https://en.wikipedia.org/wiki/Market\\_manipulation#cite\\_note-TEXAS-10](https://en.wikipedia.org/wiki/Market_manipulation#cite_note-TEXAS-10) ) During the Hunts'  
22 accumulation of the precious metal, silver prices rose from \$11 an ounce in September 1979 to  
23 nearly \$50 an ounce in January 1980.[11] (  
24 [https://en.wikipedia.org/wiki/Market\\_manipulation#cite\\_note-NYT-11](https://en.wikipedia.org/wiki/Market_manipulation#cite_note-NYT-11) ) Silver prices ultimately  
25 collapsed to below \$11 an ounce two months later,[11] much of the fall occurring on a single day  
26 now known as [Silver Thursday](#), due to changes made to exchange rules regarding the purchase of  
27 commodities on margin.[12] ( [https://en.wikipedia.org/wiki/Market\\_manipulation#cite\\_note-](https://en.wikipedia.org/wiki/Market_manipulation#cite_note-TimeBubble-12)  
28 [TimeBubble-12](#) )

1           **\*\* The Silicon Valley Stock Scam Called: "The Conduit Double**  
2           **Blind"**

3           In this scam, government money is given to a Tesla, Solyndra, etc. who then money launder  
4           the cash through executive-held 501 c3 and c4 charities; and company assets and then provide  
5           **DARK MONEY** cash and services to political campaigns like Obama and Clinton election funds. In  
6           the case of Tesla, Google (an investor and boyfriend of Musk) supplied billions of dollars of web  
7           search rigging. Stock ownership in the companies and deals is traded for campaign funds. David  
8           Brock is a master of this kind of Dark Money money-laundering for political campaigns using  
9           PACS and pass-through spoofing.

10          Tesla and Solyndra investors have used ALL of the above tactics and more. Goldman Sachs  
11          and JP Morgan have thousands of staff who PROVIDE these stock market manipulation tricks to  
12          people like Elon Musk, Larry Page, Eric Schmidt, et al. These kinds of financial crimes and  
13          corruption account for the manipulation of over **ONE TRILLION DOLLARS** of ill-gotten profits  
14          annually!

15          Given the massive stimulus packages that are in force today and ePlaintiff 42ected to be  
16          implemented going forward, regulators need to set clear guidelines for how and when such  
17          privileged information can be disclosed, and impose rigorous trading restrictions for investors with  
18          access to private information. Failure to do so always gives unfair advantage to some and damages  
19          the level playing field in financial markets.

20          To avoid providing such unfair advantage to selected executives, the SEC and the  
21          Department of Justice need to develop new procedures to incorporate potential illegal transactions  
22          derived from information about government intervention through diverse channels. Plaintiffs  
23          advocate for a more transparent and consistent protocol on information disclosure regarding  
24          government's loan programs to prevent similar events from recurring. For example, the government  
25          could channel the release of news about COVID-19-related stimulus interventions through a  
26          common platform to prevent leakage from diverse sources and reduce information asymmetry  
27          among investors.

28          The DFC loan to Kodak is the first of its kind under the Defense Production Act but not the

1 first ever because GOVT already created the pump-and-dump scheme for tech oligarchs. Nobody  
2 should be surprised by Kodak trying a proven corruption scam. Since we are in unprecedented  
3 times, government agencies and regulators need to make changes to adapt to the current situation  
4 and fulfill their mission to ensure a level playing field for investors even during this difficult period.  
5 Regulation never happens in these scams because most California Senators and their families profit  
6 from these crimes and corruption.

7 **The indisputable facts here are the assertions that the Silicon**  
8 **Valley oligarchs:**

- 9 1. Control business and politics like a crime Cartel, and...
- 10 2. Are a white male fraternity who attack outsiders in organized and group-planned manners,  
11 and...
- 12 3. Come from dynastic families that systematically ran them through Stanford, Harvard and  
13 Yale men's clubs, and...
- 14 4. Were socially trained and programmed to operate in a closed, tribal, exclusionary manner,  
15 and...
- 16 5. Operated the "Angelgate" collusion scandal, the "Solyndra Scandal", etc., and...
- 17 6. Operated the "Silicon Valley High Tech Employee Collusion" for which they were sued  
18 in a famous class-action case, and...
- 19 7. Controlled the Obama Administration and the Obama White House and traded most key  
20 staff, back-and-forth, with that Administration, and...
- 21 8. Have been sued, indicted and charged in divorce proceedings with an unusually massive  
22 amount of sex trafficking matters, and...
- 23 9. Use the same 10 law-firms who have been charged with public policy manipulation,  
24 bribery and lobbying, and...
- 25 10. Control internet news, media and information, and...
- 26 11. "Own" certain U.S. Senators by virtue of direct bribe payments and securities/stock  
27 payola payments, and...
- 28 12. Use a variety of tools like GUST, Private Google Docs sites, covert Facebook pages and

1 similar, to secretly conspire and plan collusion and organized monopolistic practices, and...

2 13. Have their venture capitalists spy on entrepreneurs and copy their technology to be  
3 deployed by Google, or Facebook under a new name, and...

4 14. Have over 150+ fake "charity" and hidden shell corporation entities that conduit money  
5 to political interests that promise to increase the oligarchs stock market valuations, and...

6 15. Are financing and using Jeffrey Epstein's, NXVIUM and many other underage sex cult's,  
7 and...

8 16. Are an interstate Mafia-like criminal organization operating in violation of felony-class  
9 organized crime laws, and...

10 17. Have hired the largest number of K Street and Sacramento lobbyists and political  
11 manipulators in history, and...

12 18. Are connected to multiple suspicious deaths from Seth Rich, to Gary Conley, to Rajeev  
13 Motwani, and many more, and...

14 19. Have had their [secret files hacked by the Feds](https://www.cnbc.com/2020/07/30/apple-amazon-facebook-google-internal-emails-released-by-congress.html) (  
15 [https://www.cnbc.com/2020/07/30/apple-amazon-facebook-google-internal-emails-released-by-](https://www.cnbc.com/2020/07/30/apple-amazon-facebook-google-internal-emails-released-by-congress.html)  
16 [congress.html](https://www.cnbc.com/2020/07/30/apple-amazon-facebook-google-internal-emails-released-by-congress.html) ) and Chinese and Russian hackers (offered for sale on the Dark Web), and... more...

17 There are over 320 million people in America and the handful of people listed above ruined  
18 Democracy for every one of them by manipulating the government for their personal profits at the  
19 expense of every taPlaintiff 42ayer!

20 Victim: " ...Without breaking a single law, we are hunting down and destroying every single  
21 one of the scumbags who attacked us and destroyed Democracy for their own power mongering, sex  
22 cult-driven, sick profiteering schemes...These crooks need to know, with certainty: if the FBI doesn't  
23 get you - we and the crowd-sourced public forensics groups will!..."

24 Join the "FOLLOW-THE-MONEY" Team and learn 100% legal CIA and FBI-class tactics  
25 and technologies which are being used to track why these people are all connected by covert  
26 financial and asset tracks. Extensive case files and dossiers on each party, below, are available in  
27 torrents globally. These people knowingly engaged in these crimes, attacks and illicit activities! \*\*  
28 = The worst ones. They share a cadre of dirty CPA, legal and lobbyist firms that assist them with

1 their dirty work and run the interface between Fusion GPS, Black Cube, Media Matters, Gizmodo  
2 and other hit-job services.

3  
4 Follow-the-money, the surveillance data, the stock market accounts, the sex workers and the emails!  
5 These people don't do "good deeds" or help their nation. They do dirty schemes to help themselves  
6 make money off of citizens and destroy their competitors because they would rather cheat than  
7 compete!

8  
9 This is who financed and operated the attacks. They operate illicit manipulations and anti-trust  
10 violations. Free-roaming automatic AI bots are out working around-the-clock scanning every  
11 database to connect their bribes, payola, stealth funds, tax evasions, money-laundering, sex  
12 trafficking and other illicit deeds. These are the ones that everyone is working on ePlaintiff 42osing,  
13 indicting and TAKING DOWN!

14  
15 **Court Statement By One Of Many Victims:**

16 *"... Plaintiffs were attacked with a \$30 million dollar+*  
17 *retribution/political-reprisal/revenge hatchet-job program contracted by White House and*  
18 *Department of Energy political operatives, their appointees and staffing. Plaintiffs have sourced*  
19 *the payment records evidence to prove it. Those public officials illegally used taPlaintiff 42ayer-*  
20 *financed government funds and they were also business competitors of my peers and I. They are*  
21 *mad because they got caught doing crimes with taxpayerfunds...There is, now, no legal or*  
22 *historical-fact question about the veracity of the proof that public officials put "hit-jobs" on*  
23 *reporters, whistle-blowers or competitors using government resources to do so. In fact, today, the*  
24 *U.S. Congress is spending nearly a third of it's time on the question of agencies being used as*  
25 *reprisal operations....famous senators, their Silicon Valley oligarch financiers and their*  
26 *associates run a felony-class organized crime insider-trading scam that abuses taxpayers and*  
27 *sabotages competing businesses at the expense of the public treasuries.*  
28 *This is about a group of U.S. Senators, Silicon Valley Oligarchs, Detroit Oligarchs, Crooked Law*

1 *Firms and Lobbyists who commit crimes in order to manipulate over a trillion tax dollars into*  
2 *their, and their friends pockets. They use media monopoly tricks to try to shut out any other*  
3 *viewpoints. They push manufactured "emotional trigger" issues that they believe will get more*  
4 *tax money allocated to "issue solutions" that they, and their friends, happen to already own the*  
5 *monopolies for. They are felons yet they control some of the offices of the agencies who are*  
6 *supposed to arrest them. Silicon Valley bought K Street lobby firms and U.S. Senators, gave them*  
7 *more 'Dark Money' than history has ever seen and then had giant tech-law firms bribe, hit-job*  
8 *and blockade any attempts to arrest them...The U.S. Government hired us, paid us part of*  
9 *Plaintiffs money, then asked us to spend Plaintiffs life savings and years of Plaintiffs time on*  
10 *THEIR federal project based on their lies and false-promises. Then they took the assets we were*  
11 *asked to invest, plus the money they owed us, and gave it to their friends. When we complained to*  
12 *the FBI, Congress and the SEC, they hired Fusion GPS-like companies to run "hit-jobs" on us*  
13 *and threaten Plaintiffs lives.*

14  
15 **WE WERE LIED TO AND DEFRAUDED BY GOVERNMENT AGENCIES. THEY TOOK**  
16 **Plaintiffs MONEY AND USED US, AND Plaintiffs PEERS, AS A SMOKE-SCREEN TO HIDE**  
17 **THEIR CRONY PAYOLA CRIME THAT PUT taxpayerCASH IN THEIR FRIEND'S**  
18 **POCKETS...Plaintiffs have received ZERO justice and ZERO compensation for Plaintiffs**  
19 **damages, Plaintiffs time, Plaintiffs witness testimony and Plaintiffs help provided to the**  
20 **authorities! Plaintiffs demand Plaintiffs compensation from the State And Federal authorities!**  
21 **Neither I, Plaintiffs peers or the voters will ever let this go until we receive justice!..."**

22  
23 -----  
24 **Key points of note in this RICO racketeering case:**

25 - These [Jeffrey Epstein-LIKE](https://www.netflix.com/title/80224905) ( <https://www.netflix.com/title/80224905> ) crooks include  
26 senators, technology ceo's and famous sand hill road venture capitalists. those suspects have  
27 engaged in the largest sets of bribes in u.s. history! don't let these silicon valley sex-trafficking,  
28 bribing, racist, misogynist, tax-evading, money-laundering, black-listing, felony criminals get away

1 with it!

2 - The [Flynn Case](https://www.trunews.com/article/former-intel-chiefs-flynn-destroyed-by-cia-nsa-hit-job) ( [https://www.trunews.com/article/former-intel-chiefs-flynn-destroyed-](https://www.trunews.com/article/former-intel-chiefs-flynn-destroyed-by-cia-nsa-hit-job)

15 [%20EARTH%20WITH%20TOTALLY%20LEGAL%20TACTICS.pdf](http://american-corruption.com/HOW%20TO%20DESTROY%20ANY%20CORRUPT%20COMPANY%20OR%20PERSON%20ON%20EARTH%20WITH%20TOTALLY%20LEGAL%20TACTICS.pdf) ) to every big tech crook  
16 involved in this scheme, for the rest of their lives, until they are brought to justice. These crooks are  
17 now [under surveillance](#) ( [http://american-corruption.com/EPlaintiff](http://american-corruption.com/EPlaintiff42OSING_CORRUPT_OLIGARCHS.html)  
18 [42OSING\\_CORRUPT\\_OLIGARCHS.html](http://american-corruption.com/EPlaintiff42OSING_CORRUPT_OLIGARCHS.html) ) and [investigation](#) ( <https://www.centreforpublicimpact.org/case-study/fbi-virtual-case-file-system/> ) by the public, and  
19 they are being exposed, doxed, reported and FBI-charged. [Disclosure dossiers](#) ( <https://legalbeagle.com/8546756-write-official-case-file.html> ) have been [produced on every single](#)  
21 [one of the top 200 culprits!](#) ( [http://american-corruption.com/expose\\_THE\\_MOBSTERS.html](http://american-corruption.com/expose_THE_MOBSTERS.html) )  
22 Global citizen social media and news [out-reach programs](#) ( [http://american-corruption.com/ANTI\\_CORRUPTION\\_BATTLE\\_ON\\_BEHALF\\_OF\\_AMERICA](http://american-corruption.com/ANTI_CORRUPTION_BATTLE_ON_BEHALF_OF_AMERICAN_CITIZENS.html)  
24 [N\\_CITIZENS.html](http://american-corruption.com/ANTI_CORRUPTION_BATTLE_ON_BEHALF_OF_AMERICAN_CITIZENS.html) ) contact hundreds of thousands of voters per day. By the time the next  
25 elections get here, [EVERYBODY](#) ( [http://american-corruption.com/EPlaintiff](http://american-corruption.com/EPlaintiff42OSING_CORRUPT_OLIGARCHS.html)  
27 [42OSING\\_CORRUPT\\_OLIGARCHS.html](http://american-corruption.com/EPlaintiff42OSING_CORRUPT_OLIGARCHS.html) ) will know about this corruption and [EACH](#) ( [http://american-corruption.com/EPlaintiff](http://american-corruption.com/EPlaintiff42OSING_CORRUPT_OLIGARCHS.html) [42OSING\\_CORRUPT\\_OLIGARCHS.html](http://american-corruption.com/EPlaintiff42OSING_CORRUPT_OLIGARCHS.html) ) of the

1 perpetrators by name! If you have a computer YOU have the tools to investigate them just like the  
2 FBI does.

3 - Plaintiffs [saw criminal actions including bribes, insider trading, etc.](#), that Plaintiffs  
4 politicians engaged in, and got no help, no responses and no provision of Plaintiffs Constitutional  
5 rights so we are forced to rely on citizen crowd-sourcing of investigations and mass social media  
6 out-reach for justice! ( [https://finance.townhall.com/columnists/maritanoon/2012/11/25/exclusive-](https://finance.townhall.com/columnists/maritanoon/2012/11/25/exclusive-GOVT-corruptionappointed-and-elected-officials-should-face-prison-time-n851724)  
7 [GOVT-corruptionappointed-and-elected-officials-should-face-prison-time-n851724](https://finance.townhall.com/columnists/maritanoon/2012/11/25/exclusive-GOVT-corruptionappointed-and-elected-officials-should-face-prison-time-n851724) )

8 - The 2008 Department of Energy [Cleantech Crash](#) proves that a federal agency was used as  
9 just one big slush-fund to pay-off political campaign financiers, operate insider-trading stocks and  
10 sabotage those financiers competitors using taPlaintiff 42ayer-financed resources! Plaintiffs have  
11 used private investigator, FBI resources and deep AI research to [reveal that all government staff](#)  
12 [working on Plaintiffs application were getting quid-pro-quo...they were on the take.](#) (Can anyone  
13 point out to us EVEN ONE person who was in the GOVT/White House loop who was not working  
14 for, invested in, getting a future job from or other wise conflicted?) What do you do when The U.S.  
15 Government convinces you to invest millions of dollars, and your life, into one of their projects.  
16 Then their project turns out to be a scam where they had covertly hard-wired the upside to a couple  
17 of Senator's and their campaign financier friends. The fix was in and the game was rigged to use a  
18 government program as a slush-fund for friends-with-benefits. Plaintiffs, and the public, got  
19 defrauded. Now the damages must be paid for, one way, or another. Every one of the insiders who  
20 did get government funding got it in the exact same size and order as their covert political campaign  
21 funding and stock market bribes to the deciders. Chamath Palihapitiya and other Silicon Valley  
22 insiders have now exposed the fact that Greylock, Kleiner, etc. are just a [VC Ponzi Scheme! in this](#)  
23 [whole mess.](#)

24 ( <https://www.cbsnews.com/news/cleantech-crash-60-minutes/> )

25 ( [http://american-corruption.com/expose THE MOBSTERS.html](http://american-corruption.com/expose_THE_MOBSTERS.html) )

26 ( <https://www.youtube.com/watch?v=NVVsdIHsflf> )

27

28 - Elon Musk got government money by bribing public officials and stacking hundreds of his

1 friends and shareholders, ie: Steven Chu, Matt Rogers, Steve Westly, Steve Spinner's 'special  
2 friend', investor Google's employees, etc. on the staff of The U.S. Government and in the White  
3 House. In other words, hundreds of Elon Musk's friends and financiers from Silicon Valley (Mostly  
4 from his investor: Google) were placed in the very offices that decided if he got the government  
5 funds. Plaintiffs have FBI-class records, financial tracking, emails, stock market relay records and  
6 other forensic data that proves it. Plaintiffs can swear, warrant, certify and prove these assertions in  
7 front of Congress in a live Congressional hearing or Civil Jury trial, given non-compromised legal  
8 backing. Musk bribed Senators, bought a President and had his buddies take over most of the  
9 Department of Energy. [Lithium metals](https://lithium-ion.weebly.com/), ( <https://lithium-ion.weebly.com/> ) and other rare earth  
10 mining materials, are monopolized by Elon Musk and his Silicon Valley Cartel, in rare-earth  
11 corrupt mining scams. Lithium's widespread [use in cars is hindered](https://www.hackernoon.com/dangers-li-ion-batteries-might-aware-4960f2f75ae7) (  
12 <https://www.hackernoon.com/dangers-li-ion-batteries-might-aware-4960f2f75ae7> ) by a  
13 challenging obstacle: upon multiple charge-discharge cycles, [fractal filaments called dendrites](https://www.pressconnects.com/story/news/2020/01/21/lithium-batteries-everywhere-dangerous-what-know-rochester-binghamton/4480496002/) (  
14 [https://www.pressconnects.com/story/news/2020/01/21/lithium-batteries-everywhere-dangerous-  
15 what-know-rochester-binghamton/4480496002/](https://www.pressconnects.com/story/news/2020/01/21/lithium-batteries-everywhere-dangerous-what-know-rochester-binghamton/4480496002/) ) always grow through the electrolyte from the  
16 negative to the positive electrode and [short-circuit the battery](https://batteryuniversity.com/learn/article/safety_concerns_with_li_ion) (  
17 [https://batteryuniversity.com/learn/article/safety\\_concerns\\_with\\_li\\_ion](https://batteryuniversity.com/learn/article/safety_concerns_with_li_ion) ) from the inside, thus  
18 guaranteeing that [Tesla Cars](https://www.livescience.com/62179-tesla-fire-cleanup-danger.html) ( <https://www.livescience.com/62179-tesla-fire-cleanup-danger.html> )  
19 will [eventually all ePlaintiff 42lode](https://www.wired.com/2017/03/dont-blame-batteries-every-lithium-ion-ePlaintiff-42losion/) ( [https://www.wired.com/2017/03/dont-blame-batteries-every-  
21 lithium-ion-ePlaintiff-42losion/](https://www.wired.com/2017/03/dont-blame-batteries-every-<br/>20 lithium-ion-ePlaintiff-42losion/) ) . [Musk and Panasonic have known](https://www.wired.com/2017/03/dont-blame-batteries-every-lithium-ion-ePlaintiff-42losion/) this since 2007 (They are  
22 "dumping" the batteries via Tesla) and have paid U.S. Senators, who own stock in Tesla, [to cover it  
23 up. The lithium fires and toxic vapors are a major safety concern because they have killed, poisoned  
24 and injured too many citizens](https://www.wired.com/2017/03/dont-blame-batteries-every-lithium-ion-ePlaintiff-42losion/). Musk gets away with his scams because he pays U.S. Senators bribes  
25 with stocks in his corporations and has a thousand crooked Goldman Sachs investment bankers  
26 selling his hair-brained schemes to your parents pension funds. Musk's partners created the  
27 government policy to sell pretend air, known as carbon credits. He makes \$200M per year selling  
28 this pretend air. It is like you getting paid to sell your farts based on the hope that you might eat  
some beans some day. Musk's big bucks don't come from selling cars but from government mooch

1 schemes.

7 - Plaintiffs have formally asked the FBI and DOJ to investigate, engage in surveillance upon  
8 and interview attackers: Nicholas Guido Denton, John Hermann, Ian Fette, Adrian Covert, Patrick  
9 George, John Cook, Larry Page, Eric Schmidt, David Drummond, David Axelrod, David Plouffe,  
10 Lachlan Seward, Jay Carney, Robert Gibbs and their associates and determine how they were  
11 compensated for the attacks, who had command and control of their actions and who acted as a  
12 conduit for the funds. These people bribed government officials, sold Plaintiffs government and  
13 Democratic process like they were running a garage sale and used taPlaintiff 42ayer-funded  
14 resources to attack anyone who reported the crimes involving their Tech Cartel! Their emails, text  
15 messages, stock market accounts, bank accounts, paypal accounts and social accounts prove what  
16 they were up to!

17 -----

18  
19 **A Previous Sent Letter To William Barr, Attorney General For**  
20 **The United States Of America Via Certified Mail And Email:**

21  
22 *“...Plaintiffs filed a federal Tort Claim ‘Form 95’ for damages and were informed by*  
23 *federal insiders that the claim was being stone-walled. Plaintiffs need to take deeper legal action*  
24 *against the government entities that caused the damages. Those damages are metricized in the*  
25 *seven to nine figures and proven by forensic data.*

26 *Plaintiffs, and Plaintiffs peers, have filed claims and reports with every law enforcement and*  
27 *regulatory entity we know of and testified for a number of them. My co-investors filed lawsuits and*  
28 *won in federal court on the proof that a government entity engaged in favoritism and quid-pro-quo*

1 *but I have yet to receive any damages cash as I was an interested party in those other cases. My*  
2 *lawyer now works for you so he is conflicted out from helping us on this case any further.*

3 *After completing a federal contract, to perfection, to build America's next generation energy*  
4 *and transportation technologies, Plaintiffs team were promised a factory contract, and funding, to*  
5 *deliver these low-cost, hyper-efficient, job-building, clean solutions to every American.*

6 *It turns out, we were lied to and defrauded. My associates found out that crooked politicians*  
7 *had secretly arranged to give Plaintiffs money and contracts to their best friends. That is a felony*  
8 *crime that abuses quite a few State and federal RICO, Anti-Trust laws, Quid-Pro-Quo laws, the*  
9 *public and the roots of Democracy..*

10 *Plaintiffs found out, thanks to FBI, OSC, GAO, OMB and private investigators, that the*  
11 *jurisdictional Senators and related politicians were engaged in corruption in partnership with a*  
12 *specific group of Silicon Valley tech oligarchs, now under investigation by various agencies of The*  
13 *U.S. Government .*

14 *Investigators have not found a single political entity in this case who was not either:*  
15 *financed by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised*  
16 *a revolving door job or government service contracts from, partying with, personal friends with,*  
17 *photographed at private events with, making profits by consulting for, exchanging emails with,*  
18 *business associates of or directed by; one of those business adversaries, or the Senators and*  
19 *politicians that those business adversaries pay campaign finances to, or supply political search*  
20 *engine manipulation services to.*

21 *In other words, the FBI found that the politicians that were supposed to represent and*  
22 *protect us were the owners, financiers and beneficiaries of Plaintiffs local and national competitors.*  
23 *Plaintiffs would be delighted to sit down with you at Plaintiffs regional FBI office to go over the*  
24 *connections and crimes with you and the senior FBI staff again.*

25 *Plaintiffs were lied to by government representatives who said we could make "hundreds of*  
26 *millions of dollars in sales profits and carbon credits sales" if we invested millions of dollars of*  
27 *Plaintiffs resources and years of Plaintiffs lives in America. Plaintiffs were induced to invest.*  
28 *Plaintiffs invested, but those representatives secretly knew they had already hard-wired the funds to*

1 *Plaintiffs competitors. Plaintiffs competitors made hundreds of millions of dollars at Plaintiffs*  
2 *expense!*

3 *Those "representatives" were Senators and government agency bosses who were financed*  
4 *by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised a*  
5 *revolving door job or government service contracts from, partying with, personal friends with,*  
6 *photographed at private events with, making profits by consulting for, exchanging emails with,*  
7 *business associates of or directed by; one of those business adversaries, or the Senators and*  
8 *politicians that those business adversaries pay campaign finances to, or supply political search*  
9 *engine manipulation services to.*

10 *Plaintiffs product and services metrics beat those of every other competitor. Plaintiffs won*  
11 *on every comparison item except we refused to pay the bribes and cooperate with the illegal quid-*  
12 *pro-quo demands.*

13 *Plaintiffs found that mega-insider law firms operate a cartel of political appointee*  
14 *placements via quid-pro-quo deals, black-lists and manipulation of public policy and policy*  
15 *decisions via covert perks and payola schemes.*

16 *Plaintiffs found out how insider stock trading between politicians and tech companies is the*  
17 *largest form of corruption in America.*

18 *Plaintiffs found out who the top 200 dirty politicians, corrupt investment bankers and tech*  
19 *oligarchs were that operated the scheme. Plaintiffs found out thanks to some FBI, GAO,*  
20 *Congressional and Media investigators. The evidence and financial tracking software proves it. The*  
21 *quid-pro-quo tracks back to each and every one of their stock market, i-bank and estate accounts.*

22 *Plaintiffs aresues are headline news every day. Nobody can doubt the veracity of Plaintiffs*  
23 *claims since they read about the exact same things in the news every morning.*

24 *How might you help me, personally, recover my monies for the damages from fraud,*  
25 *interference and other losses?..."*

26  
27 -----  
28

1 Plaintiffs have asked the FBI, OSC, SEC and FTC to investigate the fact that the executives  
2 and investors of Google, YouTube, Facebook, Tesla, Netflix, LinkedIn, and their owned politicians,  
3 run an organized criminal stock market and public policy manipulation racketeering cartel.

4 These tech oligarchs have been documented meeting and conspiring to harm others, that  
5 they compete with, using mobster-type tactics and methods. That is a FELONY violation of federal  
6 RICO laws.

7 Plaintiffs elected officials owned portions of these companies, were financed by these  
8 companies, allowed these companies to write laws they presented to Congress, slept with the staff  
9 of these companies, exchanged staff with these companies, had media manipulated on their behalf  
10 by these companies and engaged in other illicit deeds with these companies

23 ( [http://american-corruption.com/department\\_of\\_energy\\_financing.html](http://american-corruption.com/department_of_energy_financing.html) )

24  
25 What would you do if you found out that Eric Schmidt, Larry Page, Elon Musk, Sergy Brin,  
26 John Doerr and other dynastic elitist insider Stanford frat boys were running a mob-like Cartel?  
27 Over 60,000 engineers in Silicon Valley took the problem to Federal Court!

28 The defendants, in the first case, included [Adobe](#), [Apple Inc.](#), [Google](#), [Intel](#), [Intuit](#), [Pixar](#),

1 [Lucasfilm](#) and [eBay](#), all high-technology companies with a principal place of business in the San  
2 Francisco–Silicon Valley area of California where they collude together to harm competitors. It is a  
3 well documented fact that Facebook, Google, Netflix, LinkedIn, etc. use sophisticated psychological  
4 testing on each applicant in order to filter out all but the most radical devotees of the founders  
5 ideologies. These companies then maintain an echo-chamber resonance, throughout the company, to  
6 reinforce their ideological message, much like Scientology does. In these companies one must  
7 praise Elon Musk and Mark Zuckerberg and hate those who the founders target. The founders target  
8 their competitors, in violation of anti-trust laws.

9       The first civil class action was filed by five Plaintiffs, *one of whom has died* in a curious  
10 incident; it accused the tech companies of collusion between 2005 and 2009. In [Abolish Silicon](#)  
11 [Valley: How to liberate technology from capitalism](#) we see another of thousands of insiders expose  
12 the fact that Silicon Valley is a pile of filth.

13       ( [https://www.penguinrandomhouse.com/books/622177/abolish-silicon-valley-by-wendy-](https://www.penguinrandomhouse.com/books/622177/abolish-silicon-valley-by-wendy-liu/)  
14 [liu/](#) )

15       Additional cases are planned for filing. Formal complaints have been filed with The SEC,  
16 The DOJ, The GAO, The FBI, The FTC and The U.S. Congress. Active investigations into  
17 ['Angelgate' and related collusion and anti-trust matters](#) are known to be under-way by federal, news  
18 outlet and private investigators as of 2020.

19       ( <https://en.wikipedia.org/wiki/Angelgate> )

20  
21       U.S. Senators, and other politicians, who covertly own stock in these Silicon Valley  
22 companies, have been delaying enforcement against these corrupt companies. Consumer rights  
23 groups have pledged to take down each and every politician who owns these corrupt stocks and  
24 protects these corrupt companies!

25       Plaintiffs alliance of the public, journalists, investigators and agency staff have FBI-level  
26 investigated: Steven Chu, Larry Page, David Dummond, Lachlan Seward, Andy Rubin, Jeffrey  
27 Epstein, Elon Musk, Nicholas Guido Denton, Harvey Weinstein, Eric Schmidt and the rest of the  
28 RICO-violating "Club" and had them fired or removed from their positions. They will remain under

1 public surveillance for the rest of their lives and their case files will be added to monthly via  
2 submissions to federal agencies and news entities.

3  
4 **What would an insane tech oligarch (Like Schmidt, Musk, Reid,**  
5 **Brin, Westly, Page, Khosla, etc.) do for trillions of dollars of criminal**  
6 **gain and control of politics and ideology?**

7 When you run the following query on the stock market volume for a single day, ie: "Select  
8 *sum(Close\*volume\*0.001), count(\*) from myTable where date = '9/27/2017'.*"..you get the  
9 following result: 7300 stocks were traded, Total Money flow: \$271,072,334,824. This is how much  
10 was traded on that day.

11 The total world derivatives market has been estimated at about \$791 trillion face or nominal  
12 value, 11 times the size of the entire world economy.

13 The World Bank publishes global data on stocks traded by \$ value [here](#). ie:

- 14 • 2016 - \$77.5 trillion for the year.
- 15 • ( [https://data.worldbank.org/indicator/CM.MKT.TRAD.CD?](https://data.worldbank.org/indicator/CM.MKT.TRAD.CD?end=2016&start=1975&view=chart)  
16 [end=2016&start=1975&view=chart](https://data.worldbank.org/indicator/CM.MKT.TRAD.CD?end=2016&start=1975&view=chart) )

17 Most exchanges publish this stat. [Here](#) is the data for NASDAQ

- 18 • Feb 6, 2018 - \$192 billion for the day.
- 19 • ( <http://www.nasdaqtrader.com/Trader.aspx?id=DailyMarketSummary> )

20 And the Indian stock market volume data (in Indian Rupees) is [here](#).

- 21 • BSE + NSE cash market, Feb 2018 - About Rs 40,000 crore daily. That's about \$6  
22 billion per day.
- 23 • ( <http://www.moneycontrol.com/stocks/marketstats/turnover/> )

24 Average estimates put daily stock movement between 5 to ten trillion dollars per day. You  
25 can buy lot's of Weinstein/Epstein-like private islands, private jets, sex parties, U.S. Senators and  
26 crony government contracts with that kind of money. Once an oligarch starts buying sex with  
27 underage girls, they don't stop. [In fact, there is nothing that a corrupt tech oligarch and their owned](#)  
28 [Senator won't do to keep their little pig trough filled up.](#)

1 ( [http://american-corruption.com/expose THE MOBSTERS.html](http://american-corruption.com/expose_THE_MOBSTERS.html) )

2 The average murder/robbery in the United States is undertaken for an average amount under  
3 \$100.00

4 Thus, an Eric Schmidt, Elon Musk, Steve Westly, David Drummond, Vinod Khosla, Reid  
5 Hoffman, Steve Jurvetson, Andy Rubin, Larry Page or similar oligarch, who is sociologically  
6 addicted to money and power, is [most certainly capable of ordering and operating election](#)  
7 [manipulations](#), Presidential bribes, murders and engaging in other crimes to protect those greed-  
8 based assets. They have the full resources to do so, have federal records proving that they hire  
9 lobbyists and operatives who do these things for them and have a documented history of engaging  
10 in extremist actions.

11 ( [http://american-corruption.com/How Google And Facebook Put Obama In The White House.h](http://american-corruption.com/How_Google_And_Facebook_Put_Obama_In_The_White_House.html)

**EXHIBIT 35 - The Hit Job Operators The White House Hired**

How much do you have to pay Google, Alphabet, YouTube and Black Cube to dedicate a portion of their servers to push a character assassination set of links, against a competitor, to all five billion people on Earth with internet access? How much did Obama, Clinton, Bloomberg spend using those exact same systems to attack their political enemies? How much does it cost to order a citizen's social security benefits blockaded, have their phones and computers hacked and run a global character assassination media campaign to defame and black-list them? Every one of the attack technologies and resources were previously deployed against Presidential candidates in past elections. The providers, operators and compensation conduits of the attack services are known to law enforcement. The payment records have been uncovered, revealing that over \$30M of billings were incurred. By way of contrast: \$30M is the typical WEEKLY ePlaintiff 42enditure for opposition character assassination programs in a U.S. Presidential election using Gawker, Gizmodo, Facebook, Google and Fusion GPS media attack services. xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx

Plaintiffs know. Plaintiffs have their financial records, invoices and receipts and so does the FBI and the NSA.

How much do you have to pay to get them to lock those attack links on one of the first 4 lines of EVERY search result, in the same position in the search results, for over a decade (which proves that their search results are not "organic", they are manually manipulated by Google and YouTube)? How much did Obama, Clinton, Bloomberg spend using those exact same systems to attack their political enemies?

Plaintiffs know. Plaintiffs have their financial records, invoices and receipts and so does the FBI and the NSA.

How much does it cost to make a Disney-like animated movie about a whistle-blower? How much does the production and software and person-hour billings cost? How much does it cost to distribute that movie world-wide and lock it in the top line of all search results?

Plaintiffs know. Plaintiffs have their financial records, invoices and receipts and so does the

1 FBI and the NSA.

2 How much does it cost to hire a warehouse full of Russian, Nigerian and Chinese click-farm  
3 operators who use Palantir and Google software to instantly be alerted of any mention of a person's  
4 name on the internet and to then go slam that person in the comment sections with endless troll  
5 remarks? Elon Musk uses these same people to hype his narcissistic need for attention. Obama,  
6 Clinton, Bloomberg and other politicians hire these same people to attack their political adversaries.  
7 How much does it cost to have anonymous trolls in foreign countries kill a person's brand globally?

8 Plaintiffs know. Plaintiffs have their financial records, invoices and receipts and a huge  
9 number of lawsuits, court records, federal investigation and investigative journalism reports have  
10 exposed those records and details. The FBI, NSA, SEC, FTC and Congressional investigators can  
11 also confirm these numbers!

12 So it turns out that it costs: **\$35,422,152.00 to have a person and their business killed!**

13 That is how much they spent on their attack on the Plaintiffs! The people at the top of the  
14 heap who organized the attacks were David Plouffe, Jay Carney, David Axelrod, Denis  
15 Mcdonough, Steve Rattner, Robert Gibbs, Rahm Emanuel and their associates and they did it from  
16 **The West Wing and The Oval Office in The White House.**

17 Many of the political attacks were edited by [Nick Denton](#) and his seedy tabloid empire  
18 Gawker/Gizmodo.

19 ( [https://www.takimag.com/article/gawker\\_media\\_hypocrites\\_vs\\_douchecanoes/](https://www.takimag.com/article/gawker_media_hypocrites_vs_douchecanoes/) )

20 Media Matters for America founder David Brock is a hired media assassin who reaped  
21 illegal profits through the transfer of millions from a nonprofit he founded to a for-profit entity  
22 under his control, according to an IRS complaint filed by a watchdog group. The [complaint](#) details  
23 how Brock's nonprofit group American Bridge Foundation (AB Foundation) transferred \$2.7  
24 million in tax-exempt assets to True Blue Media, a for-profit company owned by Brock that is the  
25 parent company of ShareBlue, a for-profit media company now known as [The American](#)  
26 [Independent](#).

27 ( [https://cdn01.dailycaller.com/wp-content/uploads/2020/04/AB-Foundation-](https://cdn01.dailycaller.com/wp-content/uploads/2020/04/AB-Foundation-Complaint.pdf)  
28 [Complaint.pdf](#) )

1 ( <https://americanindependent.com/> )

2 The transfers violated IRS rules that prohibit nonprofit organizations from using their tax-  
3 exempt resources to pay personal or private expenses of any key figures connected to the nonprofit,  
4 the complaint stated. AB Foundation's transfers to True Blue Media were disclosed in the  
5 nonprofit's Form 990s filed to the IRS in [2017](#) and [2018](#). *"Brock is a well-known hit man who took*  
6 *money to target Plaintiffs group in reprisal for whistle-blowing..."* Said Team 7 staff.

7 The money was conduited and assisted for pass-through by political financiers Eric Schmidt,  
8 Larry Page, Sergy Brin, Elon Musk, John Doerr, Vinod Khosla, Steve Westly, Steve Spinner and  
9 their [Silicon Valley oligarch Cartel](#) black-listing operation.

10 ( [http://american-corruption.com/department\\_of\\_energy\\_financing.html](http://american-corruption.com/department_of_energy_financing.html) )

11 It was a felony. It violated RICO, Anti-Trust and Constitutional laws.

12 So they spent over thirty five million dollars attacking the Plaintiffs and shutting down a  
13 competitor that was targeted to make over six billion dollars in profits. The attackers then made the  
14 six billion dollars in profits for themselves, at the expense of the Plaintiffs.

15 So how much do you think they owe the Plaintiffs per previous court awards for such crimes  
16 against a member of the public?

9 [And Society.html](http://american-corruption.com/Eric_Schmidt_Has_A_Psychotic_Need_To_Control_Governments_And_Society.html) )

10  
11  
12 You hear about the female victims of this sex cult but you rarely hear about the young male  
13 victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid  
14 "not just for sex but for the oligarch's endless need to feel that they can control anyone for any  
15 reason...". Multiple attorney general's controlled by their cartel, ie: [Eric Schneiderman](#) and [Eliot](#)  
16 [Spitzer](#) , are involved this these sex rings.

17 ( <https://newspunch.com/eric-schneiderman-nxivm-child-sex-slaves-clintons/> )

18 ( [https://en.wikipedia.org/wiki/Eliot\\_Spitzer](https://en.wikipedia.org/wiki/Eliot_Spitzer) )

19 *These are the main influencers of a national political party and they are all involved in*  
20 *horrific sex perversions and abuses! The associates political figures financed by this sex Cartel*  
21 *include: Illinois State Representative, **Keith Farnham**, who has resigned and was charged with*  
22 *possession of child pornography and has been accused of bragging at an online site about sexually*  
23 *molesting a 6-year-old girl; Spokesperson for the Arkansas Democratic Party, **Harold Moody, Jr**,*  
24 *who was charged with distribution and possession of child pornography; Radnor Township Board*  
25 *of Commissioners member, **Philip Ahr**, who resigned from his position after being charged with*  
26 *possession of child pornography and abusing children between 2 and 6 years-old; Activist and BLM*  
27 *organizer, **Charles Wade**, who was arrested and charged with human trafficking and underage*  
28 *prostitution; Texas attorney and activist, **Mark Benavides**, who was charged with having sex with a*

1 minor, inducing a child under 18 to have sex and compelling prostitution of at least nine legal  
2 clients and possession of child pornography, he was found guilty on six counts of sex trafficking;  
3 Virginia Delegate, **Joe Morrissey**, who was indicted on charges connected to his relationship with a  
4 17-year-old girl and was charged with supervisory indecent liberties with a minor, electronic  
5 solicitation of a minor, possession of child pornography and distribution of child pornography;  
6 Massachusetts Congressman, **Gerry Studds**, who was censured by the House of Representatives  
7 after he admitted to an inappropriate relationship with a 17-year-old page; Former Mayor of  
8 Stillwater, New York, **Rick Nelson** who was plead guilty to five counts of possession of child  
9 pornography of children less than 16 years of age; Mayor of Clayton, New York, **Dale Kenyon**, who  
10 was indicted for sexual acts against a teenager; Former Mayor of Hubbard, Ohio, **Richard**  
11 **Keenan**, who was given a life sentence in jail for raping a 4-year-old girl; Former Mayor of  
12 Winston, Oregon, **Kenneth Barrett**, who was arrested for setting up a meeting to have sex with a  
13 14-year-old girl who turned out to be a police officer; The Mayor of Randolph, Nebraska, **Dwayne**  
14 **L. Schutt**, who was arrested and charged with four counts of felony third-degree sexual assault of a  
15 child and one count of intentional child abuse.

16  
17 The associates political figures financed by this sex Cartel also include: The Former Mayor of  
18 Dawson, Georgia, **Christopher Wright**, who was indicted on the charges of aggravated child  
19 molestation, aggravated sodomy, rape, child molestation and statutory rape of an 11-year-old boy  
20 and a 12-year-old girl; Former Mayor of Stockton, California, **Anthony Silva**, who was charged  
21 with providing alcohol to young adults during a game of strip poker that included a 16-year-old boy  
22 at a camp for underprivileged children run by the mayor; Former Mayor of Millbrook, New York,  
23 **Donald Briggs**, who was arrested and charged with inappropriate sexual contact with a person  
24 younger than 17; The party leader for Victoria County, Texas, **Stephen Jabbour**, who plead guilty  
25 to possession and receiving over half a million child pornographic images; DNC activist and  
26 fundraiser, **Terrence Bean**, who was arrested on charges of sodomy and sex abuse in a case  
27 involving a 15-year-old boy; DNC Party Chairman for Davidson County, Tennessee, **Rodney**  
28 **Mullin**, who resigned amid child pornography allegations; DNC activist, **Andrew Douglas Reed**,

1 who pleaded guilty to multiple counts of 2nd-degree sexual exploitation of a minor for producing  
2 child pornography; DNC official from Terre Haute, Indiana, **David Roberts** who was sentenced to  
3 federal prison for producing and possessing child pornography including placing hidden cameras  
4 in the bedrooms and bathrooms at a home he shared with two minor female victims; Democratic  
5 California Congressman, **Tony Cárdenas**, who is being sued in LA County for allegedly sexually  
6 abused a 16-year-old girl; Democratic aide to Senator **Barbara Boxer**, **Jeff Rosato**, who plead  
7 guilty to charges of trading in child pornography; Alaskan State Representative, **Dean Westlake**,  
8 who resigned from his seat after the media published a report alleging he fathered a child with a  
9 16-year-old girl when he was 28; New Jersey State Assemblyman, **Neil Cohen**, who was convicted  
10 of possession and distribution of child pornography; DNC donor and billionaire, **Jeffrey Epstein**,  
11 ran an underage child sex brothel for The Commission and was convicted of soliciting underage  
12 girls for prostitution; New York Congressman, **Anthony Weiner**, who plead guilty to transferring  
13 obscene material to a minor as part of a plea agreement for sexted and sending Twitter DMs to  
14 underage girls as young as 15; DNC donor, activist, and Hollywood producer **Harvey Weinstein** is  
15 being criminally prosecuted and civilly sued for years of sexual abuse (that was well known  
16 “secret” in Hollywood) including underage sexual activities with aspiring female actresses; DNC  
17 activist and #metoo proponent, **Asia Argento**, settled a lawsuit for sexual harassment stemming  
18 from sexual activities with an underage actor; Mayor of Racine, Wisconsin, **Gary Becker**, who was  
19 convicted of attempted child seduction, child pornography, and other child sex crimes; Democratic  
20 Seattle Mayor **Ed Murray** resigned after multiple accusations of child sexual abuse were levied  
21 against him including by family members; San Francisco Mayoral candidate **John Molinari** had  
22 his daughter removed from his home by San Francisco Police for his abuse of her according to  
23 SFPD reports; San Francisco Mayoral candidate **Roger Boas** was arrested for running an  
24 underage sex brothel which catered to San Francisco political elite; DNC activist and aid to NYC  
25 Mayor De Blasio, **Jacob Schwartz** was arrested on possession of 3,000+ child pornographic  
26 images; Democratic activist and actor, **Russell Simmons**, was sued based on an allegation of  
27 sexual assault where he coerced an underage model for sex; DNC Governor of Oregon, **Neil**  
28 **Goldschmidt**, after being caught by a newspaper, publicly admitted to having a past sexual

1 relationship with a 13-year-old girl after the statute of limitations on the rape charges had  
2 ePlaintiff 42ired; Democratic Illinois Congressman, **Mel Reynolds** resigned from Congress after he  
3 was convicted of statutory rape of a 16-year-old campaign volunteer; Democratic New York  
4 Congressman, **Fred Richmond**, was arrested in Washington D.C. for soliciting sex from a 16-year-  
5 old boy; Democratic activist, donor, and director, **Roman Polanski**, fled the country after pleading  
6 guilty to statutory rape of a 13-year-old girl - Democrats and Hollywood actors still defend him to  
7 this day, including, **Whoopi Goldberg, Martin Scorsese, Woody Allen, David Lynch, Wim**  
8 **Wenders, Pedro Almodovar, Tilda Swinton and Monica Bellucci**; Democratic State Senator from  
9 Alaska, **George Jacko**, was found guilty of sexual harassment of an underage legislative page;  
10 Democratic State Representative candidate for Colorado, **Andrew Myers**, was convicted for  
11 possession of child pornography and enticing children; Illinois Congressman, **Gus Savage** was  
12 investigated by the Democrat-controlled House Committee on Ethics for attempting to rape an  
13 underage female Peace Corps volunteer in Zaire; Activist, donor, and spokesperson for Subway,  
14 **Jared Fogle**, was convicted of distribution and receipt of child pornography and traveling to  
15 engage in illicit sexual conduct with a minor; State Department official, **Carl Carey**, under **Hillary**  
16 **Clinton**'s state department, was arrested on ten counts of child porn possession; Maine Assistant  
17 Attorney General, **James Cameron**, was sentenced to just over 15 years in federal prison for seven  
18 counts of child porn possession, receipt and transmission; Leading DNC boss and financier **Ed**  
19 **Buck** was arrested for killing gay prostitutes and running a sex and drug ring. Wealthy  
20 businessman Ed Buck hobnobbed and financed elite Democrats such as Barack Obama, Hillary  
21 Clinton, and Gavin Newsom. Away from the glamour of the dinner parties and fundraisers, Buck  
22 had a dangerous dark side. It included preying on masked gay black men in sexual games and  
23 injecting them with fatal levels of GHB and methamphetamine. ; State Department official, **Daniel**  
24 **Rosen**, under **Hillary Clinton**'s state department, was arrested and charged with allegedly  
25 soliciting sex from a minor over the internet; State Department official, **James Cafferty**, pleaded  
26 guilty to one count of transportation of child pornography; Democratic radio host, **Bernie Ward**,  
27 plead guilty to one count of sending child pornography over the Internet; Democratic deputy  
28 attorney general from California, **Raymond Liddy**, was arrested for possession of child

1 pornography. There are ***THOUSANDS*** of other sex crime cases involving associates of the tech  
2 Cartel. All of these perpetrators had financing from and social and political direction from the  
3 Silicon Valley controlling perpetrators.

4 ***Typical tech billionaire kept spreadsheet of 5,000 women he had sex with***

5 - Almost every Silicon Valley, Sand Hill road venture capitalist has participated in this  
6 Epstein-like sex cult

7 - We have been pushing these charges for over a decade but the law in Woodside protects these  
8 scumbags from arrest and investigation

9 - Elon Musk, Larry Page, Eric Schmidt, John Doerr and the rest are GOING DOWN!

10 - Over 15 female private investigators have been tracking the Silicon Valley Cartel for over 10  
11 years

12 - He and other Silicon Valley billionaires charged with hiring hit men to kill competitors and  
13 whistle-blowers.

14 By

15 [Isabel Vincent](#)

16  
17 Whitefish, Mont., is known for fly fishing and hiking trails studded with yellow Aspen trees.  
18 But after Silicon Valley billionaire Michael Goguen took up residence in the Rocky Mountain town  
19 several years ago, he transformed it into his private fiefdom: a dark banana republic where he  
20 allegedly controls local law enforcement — and a “harem” of young women.

21 The bombshell allegations, which also include claims of Goguen ordering his security chief  
22 to kill detractors, are contained in a lengthy civil complaint recently filed in United States District  
23 Court for the District of Montana.

24 According to the court papers, Goguen, 57, employs hundreds of residents in companies he  
25 controls, and owns a series of luxury “safe houses” where he takes dozens of young women for sex.  
26 He has a spreadsheet documenting his sexual encounters with 5,000 women, and even outfitted a  
27 local bar he owns with a basement “boom boom” room, which features a stripper pole. The  
28 underground enclave is allegedly used “to maintain women for the purpose of committing illicit

1 sexual activity.”

2       Requests for comment from Goguen’s lawyer were not returned Friday.

3       The complaint, which seeks more than \$800 million in damages, was filed by four former  
4 employees who set up Goguen’s Amyntor Group LLC, a Whitefish-based security contractor that  
5 had clients around the world.

6       Now, Goguen is wrapped up in a mystery that just keeps getting messier, as person after  
7 person has apparently tried to take him down — only to end up taken down themselves.

8       Originally from Bedford, Mass., Goguen joined the venture investment firm Sequoia  
9 Capital, based in Menlo Park, Calif., in 1996. It was already known for taking smart early bets on  
10 companies, including Apple and Cisco, and would later generate big buzz — and money — for  
11 getting behind brands that would become enormous: Google, YouTube, PayPal and Instagram  
12 among them.

13       He had gotten a share of the Google deal and, as Bloomberg reported, “frequently appeared  
14 on the Forbes Midas List for his ability to find and fund winning technologies.”

15       But things came to a crashing halt in 2016 when his former mistress Amber Baptiste, an  
16 exotic dancer from Canada, [accused him](#) of “constant sexual abuse,” including “countless hours of  
17 forced sodomy,” court papers say. He also demanded that she refer to him as “king” and “emperor,”  
18 according to the filings. In 2012 Baptiste said, she underwent surgery for a ruptured anal canal after  
19 Goguen “forcibly sodomized her and left her bleeding and alone on the floor of a hotel room in a  
20 foreign country,” court papers claimed.

21       Goguen won a countersuit in the three-year legal battle, eventually securing a restraining  
22 order against Baptiste from filing any similar suits against him. But the allegations cost him his job  
23 at Sequoia Capital in Silicon Valley, where he had been a longtime partner.

24       At the time a Sequoia spokesman told TechCrunch that “while the firm understood ‘these  
25 allegations of serious improprieties’ to be ‘unproven and unrelated to Sequoia’ its management  
26 committee had nevertheless ‘decided that Mike’s departure was the appropriate course of action.’”

27       Despite the high-profile exit, Goguen is still worth more than \$5 billion, according to a  
28 source.

1 Goguen, began spending more time in Whitefish, a town of just over 7,000 residents, where  
2 he built a sprawling 75,000-square-foot mansion with an additional 30,000-square-foot nuclear-  
3 grade bunker that can accommodate up to 25 people for a year. He lives with his fourth wife.

4 There, he runs several businesses, including Casey’s Whitefish, a pub and restaurant, and  
5 Two Bear Capital, a firm that invests in “early stage companies with disruptive innovations,”  
6 including biotech and cybersecurity, according to his LinkedIn page. He also funds Two Bear Farm  
7 and is behind Two Bear Air Rescue Foundation, a non-profit that provides “world class aviation  
8 support” to law enforcement and others for search and rescue, free of charge.

9 He started Amyntor Group LLC, a private defense contractor that, at one point, was in line  
10 to create a private spy network for the Trump administration, according to [BuzzFeed](#). Negotiations  
11 were stalled because Goguen could not obtain a security clearance with the US government because  
12 of the allegations of sexual abuse, court papers allege.

13 Meanwhile, another ghost from his past was about to haunt him.

14 Bryan Nash was a former workout buddy from California, who had reluctantly accompanied  
15 Goguen to bars and strip clubs.

16 In 2019, federal authorities indicted Nash on 10 counts of stalking and extortion; according  
17 to the criminal complaint, Nash had threatened to reveal unspecified secrets unless Goguen paid  
18 him \$15 million, and also emailed members of Goguen’s family. In May 2020, Nash pleaded guilty  
19 to blackmailing Goguen, and was later sentenced to five years of probation.

20 This is where Matthew Marshall comes in.

21 A former Marine and alleged CIA operative, he once headed up the Amyntor Group — and  
22 is now the lead Plaintiffs in the civil suit filed against Goguen in February and amended in  
23 September.

24 Although Marshall, now 51, had been recruited by Goguen in 2013 to set up the private  
25 security contracting business, he alleges in his lawsuit that he soon became a reluctant fixer for the  
26 billionaire, arranging the purchase of luxury homes and vehicles for members of his harem, and  
27 spying on and intimidating his enemies.

28 “Marshall was being asked to purchase, out of his personal accounts, vehicles, jewelry,

1 earnest money deposits on properties, and to provide cash or other items for Goguen’s mistresses, or  
2 as hush-money payoffs to Goguen’s acquaintances and employees who had ‘learned too much’  
3 about Goguen’s sexual misconduct and crimes, and the Goguen Sexual Scheme,” court papers  
4 allege.

5 Marshall also paid for luxury v up of Playboy Playmates who were on safari in Africa and  
6 lost their passports, court papers say.

7 Women who tried to complain to police about Goguen’s alleged sexual assaults were met  
8 with unsympathetic law enforcement at the Flathead County Sheriff’s Dept, some of whom were on  
9 Goguen’s payroll, according to court papers — which also allege that Goguen had set up a  
10 mechanism to listen in on police communications.

11 When one of those women told a local police officer that Goguen had allegedly sexually  
12 assaulted her, Marshall urged the officer to go to the FBI. But the investigation was quashed after  
13 Goguen wined and dined the cop, promising him luxury elk hunts in his private jet, court papers  
14 say.

15 Tristan Plaintiff 22/Flathead Beacon

16 In 2018, the woman identified in court papers as Pam Doe, told Whitefish police that  
17 Goguen had sexually assaulted her after giving her cocaine and alcohol.

18 “He had sex with her and then paid her \$1,200,” court papers say. The investigation was  
19 handed to Detective Shane Erickson, who did not follow through, court papers say.

20 “Det. Erickson openly shared with Marshall the fact that he was spending time with Goguen,  
21 including having dinner at his house, spending time on Whitefish Lake, going on a coyote hunt,”  
22 court papers say. “Erickson also informed Marshall that Goguen had offered to take him on his  
23 yearly week-long \$20,000 elk hunt in Colorado with private guides.”

24 Pam Doe later recanted her story with police after signing a non-disparagement agreement  
25 with Goguen. It is not known if the agreement included a financial settlement.

26 “After witnessing their relationship over several years, Marshall came to understand that  
27 Goguen had placed Kim Doe and her children in a position of utter dependence based  
28 on false promises and emotional manipulation to satisfy his sexual appetite,”

*Excerpt from the court papers*

1 In another instance, Marshall was dispatched to help a married woman, identified in court  
2 papers as Kim Doe. The wife of a prominent Whitefish businessman, she allegedly had a long-term  
3 affair with Goguen. When her husband found out about the trysts and began divorce proceedings,  
4 Goguen gave her a credit card and bought her a five-bedroom home in a nearby town. He told  
5 Marshall to pay the charges, which amounted to \$30,000 a month.

6 “After witnessing their relationship over several years, Marshall came to understand that  
7 Goguen had placed Kim Doe and her children in a position of utter dependence based on false  
8 promises and emotional manipulation to satisfy his sexual appetite,” court papers say.

9 Goguen’s old accusers also pop up in the new suit.

10 According to the court papers, Goguen once brought his daughters and their teenage  
11 babysitter to Nash’s home, where he allegedly had sex with the babysitter in a cottage on the  
12 property, according to court filings. An outraged Nash called him a pedophile and reported him to  
13 local police “to no avail,” court papers say.

14 The papers also claim Goguen had sex with Nash’s wife as they were going through a  
15 divorce. Goguen allegedly had Nash followed by a private detective and paid for the wife’s legal  
16 expenses, “causing the divorce to be drawn out and having Nash incur more expenses,” court papers  
17 say.

18 On Sept. 19, 2014, Goguen allegedly asked Marshall to arrange to kill Nash in a text  
19 message on wickr, an encrypted instant messaging platform: “He needs to be killed. I know that’s a  
20 VERY big ask but we are in defcon 5. We can discuss details in person but we do NOT have  
21 conversations about this on our cell phones. Wickr only...”

22 Marshall has claimed that he refused and tried to “dissuade Goguen from going to extreme  
23 measures against his enemies.”

24 As for Baptiste, the former mistress, in the lead up to her 2016 suit against him, Goguen  
25 allegedly asked Marshall to help with “cyber operations” and “immigration fraud,” urging him to  
26 find a way to deport Baptiste back to Canada. If he could have her deported “then his case with  
27 Baptiste would go away,” court papers said.

28 Once Baptiste’s lawsuit was filed, Goguen allegedly told Marshall to act as his “general

1 100x more aggressive than Patton was, to coordinate and make sure everything is happening that  
2 should be happening — PR firms, private investigators criminal side, local PR, everything,”  
3 according to court papers. Goguen allegedly asked Marshall to hire a private investigator to follow  
4 Baptiste and use the resources of the security company to target her.

5 According to court papers, Marshall observed “the psychological pain and pressure” that  
6 Goguen “relentlessly applied” to Baptiste after she filed her California lawsuit for breach of a \$40  
7 million settlement.

8 But on Nov. 10, Marshall — like Nash and Baptiste before him — found himself suddenly  
9 in the hot seat.

10 He accepted [a plea agreement](#) in federal court in Montana for wire fraud, tax evasion and  
11 conning Goguen out of millions of dollars.

12 The federal charges against Marshall allegedly came after he began to complain about some  
13 of the extracurricular duties Goguen asked him to perform in order to keep his harem under control.

14 Marshall’s own civil suit states that Goguen and his associates filed false claims against the  
15 security expert, alleging that he committed fraud in order to hide Goguen’s underground sexual  
16 activities.

17 “Goguen ... falsely told the FBI that Marshall did not have the requisite experience, had  
18 stolen and then laundered funds from Goguen and testified in other ways meant to obstruct law  
19 enforcement’s discovery of Goguen’s sexual misconduct and the existence of the Goguen Sexual  
20 Scheme,” court papers allege.

21 Marshall pleaded guilty to wire fraud, money laundering and tax evasion. He said that he did  
22 not use money that Goguen had forwarded to him for paramilitary missions to Mexico “or anywhere  
23 else. Instead, he spent the money on personal expenses and loans and gifts to friends and family  
24 members, among other ePlaintiff 42enditures,” the plea states.

25 But according to the civil complaint, Marshall spent the cash on Goguen’s orders and was  
26 not reimbursed by Goguen.

27

28

M

arshall agreed to pay up to \$3.5 million in restitution and is scheduled to be sentenced next year.

At least one local authority has had enough of Goguen.

“This man has to be stopped,” said Bill Dial. The retired Whitefish police chief sued Goguen in December 2019 for alleged interference in his own investigation. “He’s a billionaire a la Harvey Weinstein and Epstein. There’s a lot of people in this community who know what he’s about and they’re afraid of him.”

['A billionaire à la Epstein': Silicon Valley VC is sued by four employees who claim they helped him run a harem of women across the country out of rural Montana town and that he 'kept a spreadsheet of 5,000 women he slept with'](#)

A tech billionaire allegedly kept a spreadsheet of 5,000 women he's had sex with, one of them a teenager he paid off to keep quiet, despite losing his high-profile job over a sexual

1 misconduct allegation in 2016. Michael Goguen, a former partner at Sequoia Capital who now  
2 heads his own firm, has been sued by four former employees who say they helped manage his  
3 'harem' of women. The ePlaintiff 42losive lawsuit claims the investor met the women at various safe  
4 houses or at a 'boom boom' room in the basement of a bar he owns in Whitefish, a small town in  
5 Montana where he now lives. The married billionaire, 57, asked his employees to arrange a hit on a  
6 former associate who knew too much about his life, according to the lawsuit. These are the latest  
7 allegations of sexual impropriety leveled against Goguen, who in 2016 was accused of 'countless  
8 hours of forced sodomy' by exotic dancer Amber Baptiste (inset). The latest 135-page lawsuit was  
9 filed in February by former employees of Goguen's Amyntor Group LLC, a security contractor,  
10 according to the New York Post. Among the Plaintiffs are Matthew Marshall, the former head of  
11 Amyntor who quickly grew to become Goguen's 'right-hand man.' Marshall pled guilty to wire  
12 fraud and other charges earlier this month after he pretended to be an elite member of the Marine  
13 Corps and asked Goguen for money for 'off the books' mission, according to the Flathead Beacon.  
14 Goguen, who is currently married to his fourth wife, allegedly kept a 'harem' of 'numerous women,  
15 including married women, strippers, and prostitutes,' whom he bought homes for and used for 'illicit  
16 sexual activity,' the suit claims. The investor, worth more than \$5 billion according to the New York  
17 Post, flew some of them in his private \$42 million jet. Goguen's former employees claim that  
18 Baptiste has Whitefish police in his pocket.

3 during, and after, Plaintiffs work for the government.

4 The NY Times reported: "Ms. Feinstein and her husband sold \$1.5 million to \$6 million  
5 worth of stock in Allogene Therapeutics, a California-based biotech company, in transactions that  
6 took place on Jan. 31 and Feb. 18." S

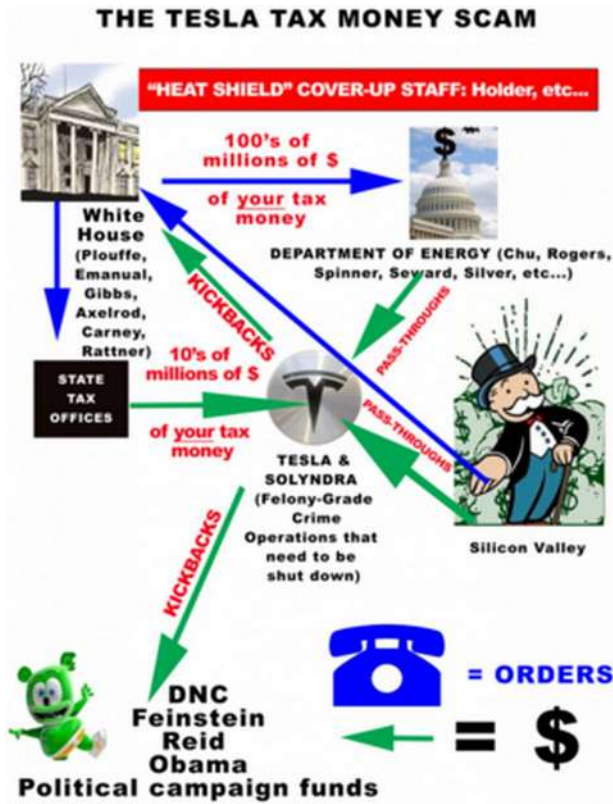

7 ( [https://www.nytimes.com/2020/03/19/us/politics/richard-burr-stocks-sold-](https://www.nytimes.com/2020/03/19/us/politics/richard-burr-stocks-sold-coronavirus.html)  
8 [coronavirus.html](https://www.nytimes.com/2020/03/19/us/politics/richard-burr-stocks-sold-coronavirus.html) )

9 he, as usual, claimed that she has "no involvement in her husband's financial decisions" to  
10 avoid criticism. Do you really think that she has no idea about multi-million dollar deals that her  
11 husband is involved in? Dianne Feinstein, and her family owned the HR services, the construction  
12 company, the leasing services and the stock market accounts in Tesla and Solyndra and got the  
13 owners of those companies their government hand-outs. White House Staff and Department of  
14 Energy staff were fully aware of this and covered up these conflicts to protect their own stock  
15 holdings and revolving door jobs. She, and other Senators, ordered hit-jobs on the competitors to  
16 those companies, who were their constituents, in order to protect their stock holding profiteering  
17 efforts.

18  
19 Public integrity at The U.S. Government and The U.S. Congress is in shambles because of this  
20 audacious corruption.

1  
2 **EXHIBIT 37 - The Crimes And Corruption That Plaintiffs experienced**

3           These are just a few of the corrupt financial conflicts of interest we experienced while  
4 engaging in a federally contracted program:

5  
6 - *Plaintiffs saw Congress not only fail to eliminate both the appearance and the potential for*  
7 *financial conflicts of interest; we saw Senators, White House staff and Department of Energy*  
8 *executives optimize the support structure to engage in such criminality. Americans must be*  
9 *confident that actions taken by public officials are intended to serve the public, and not those*  
10 *officials. The actions taken by Obama Administration staff and Department of Energy officials in*  
11 *illicit coordination*  
12 *with U.S. Senators were criminal acts in violation of RICO and other laws.*

13           - *Plaintiffs saw illicit individual stock ownership by Members of Congress, Cabinet*  
14 *Secretaries, senior congressional staff, federal judges, White House staff and other senior agency*  
15 *officials while in office. Those government officials acquired, held, 'pump-and-dumped' and traded*  
16 *stock where its value was influenced by their agency, department, or actions in efforts that harmed*  
17 *us.*

18           - *Plaintiffs saw government officials, including Plaintiffs U.S. Senators, engage in organized*  
19 *crime via insider trading, revolving door job payola, sex-for-perks trades, stock valuation fluffs,*  
20 *and more illicit actions.*

21           - *Plaintiffs saw conflict of interest laws and ethics violated by the President and Vice*  
22 *President in violation of Conflicts of Interest standards in which the President and the Vice*  
23 *President did not place conflicted assets, including businesses, into a blind trust to be sold off and*  
24 *hid conflicts of interest.*

25           - *Plaintiffs saw senior Department of Energy government officials*, *employees, contractors*  
26 *and White House staff invest inprivately-owned assets that did present conflicts and harmed us,*  
27 *including large companies like Tesla, Google, Facebook, Sony, Netflix, etc., and commercial real*  
28 *estate.*

1 ( [http://american-corruption.com/department\\_of\\_energy\\_financing.html](http://american-corruption.com/department_of_energy_financing.html) )

2 - Plaintiffs saw an organized crime scheme to not respond to filings by citizens or reporters.  
3 Former White House and Energy Department staff use 'stone-walling' to intentionally delay  
4 responses for a decade, or more, and that tactic continues to this day.

5  
6 - Plaintiffs saw ethics rules violations by government employees, including unpaid White House  
7 staff and advisers.

8  
9 - Plaintiffs saw executive branch employees fail to recuse from all issues that might financially  
10 benefit themselves or a previous employer or client from the preceding 4 years in the "Cleantech"  
11 programs.

12  
13 - Plaintiffs saw a 'Revolving Door' between Silicon Valley industry and government and we saw  
14 tech companies buying influence in the government or profiting off of the public service of these  
15 officials.

16  
17 - Plaintiffs saw lobbying by the President, Vice Presidents Members of Congress, federal judges,  
18 and Cabinet Secretaries; and, we saw other federal employees lobbying their former office,  
19 department, House of Congress, or agency.

20  
21 - Plaintiffs saw Plaintiffs competitors immediately hiring or paying these senior government  
22 officials from agencies, departments, and/or Congressional offices recently lobbied by those  
23 companies and staff from Plaintiffs Senator's office go freely back-and-forth at jobs at the  
24 companies and the offices of the Senators.

25  
26 - Plaintiffs saw the world's largest companies, banks, and monopolies, especially Goldman Sachs,  
27 (measured by annual revenue or market capitalization) hiring or paying former senior government  
28 officials mentioned herein. Plaintiffs saw the massive, and unfair, ability of companies to buy

1 *influence through current government employees*

2

3 *- Plaintiffs saw current lobbyists taking government jobs after lobbying.*

4

5 *- Plaintiffs saw over 82 of Plaintiffs friends and peers suddenly die under strange circumstances.*

6

*Some of them appear to have been murdered to shut them up.*

7

8 *- Plaintiffs saw corporate outlaws like Google, Tesla, Facebook, Linkedin, Netflix, Sony, etc.,*

9

*working in government via top corporate leaders whose companies were caught breaking federal*

10 *law.*

11

12 *- Plaintiffs saw contractor corruption where federal contractors and licensee employees worked at*

13

*the agency awarding the contracts.*

14

15 *- Plaintiffs saw “Golden Parachutes” that provide corporate bonuses to executives for federal*

16

*service as bribes.*

17

*- Plaintiffs saw massive influence-peddling in Washington DC.*

18

19 *- Plaintiffs saw the manipulation of the federal definition of a “lobbyist” to exclude most*

20

*individuals paid to influence government.*

21

22 *- Plaintiffs saw individuals paid to influence government on behalf of for-profit entities and their*

23

*front-groups who were facades for Silicon Valley oligarchs.*

24

25 *- Plaintiffs saw the obfuscation of the disclosure of lobbyist activities and influence campaigns*

26

*where Plaintiffs competitor's lobbyists did not disclose specific bills, policies, and government*

27

*actions they attempted to influence; nor many meetings with public officials; and many documents*

28

*they provided to those officials*

28

- Plaintiffs saw massive influence-peddling by Foreign Actors such as that which occurred in the ENER1, Severstal, Solyndra and related scandals. Plaintiffs saw substantial foreign influence in Washington by foreign lobbying.

- Plaintiffs saw American lobbyists accepting money from foreign governments, foreign individuals, and foreign companies to influence United States public policy at The U.S. Government and other agencies.

- Plaintiffs saw Plaintiffs competitors current lobbyists taking government jobs after lobbying and using those positions against us where they ePlaintiff 42loited 'Legalized Lobbyist Bribery' and traded money for government favors for Plaintiffs competitors.

- Plaintiffs saw political donations from lobbyists to candidates or Members of Congress in exchange for helping Plaintiffs competitors that the lobbyists worked for and that the Members of Congress owned stock in. Plaintiffs saw those lobbyists operate contingency fees that allowed those lobbyists to be paid for a guaranteed public policy outcome.

- Plaintiffs saw Plaintiffs competitor's lobbyist gifts to the executive and legislative branch officials they lobby.

- Plaintiffs saw Plaintiffs Congressional representatives use Plaintiffs competitor's lobbyists for "expertise" and information in Plaintiffs industry.

- Plaintiffs saw those in Plaintiffs congressional service get paid non competitive salaries that do not track with other federal employees.

- Plaintiffs saw the removal of the nonpartisan Congressional Office of Technology Assessment to avoid providing open-source critical scientific and technological support to Members of Congress

1 *in order to tunnel-vision info about Plaintiffs competitors.*

2  
3 *- Plaintiffs saw a non-level playing field between Plaintiffs competitor's corporate lobbyists and*  
4 *government via excessive lobbying over \$500,000 in annual lobbying ePlaintiff 42enditures by*  
5 *Plaintiffs competitors in a huge number of anti-trust violations.*

6  
7 *- Plaintiffs saw a COMPLETE failure of individuals and corporations to disclose funding or*  
8 *editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-*  
9 *reviewed publications.*

10  
11 *- Plaintiffs saw McKinsey sham research which undermines the public interest by not requiring that*  
12 *such studies, that present conflicts of interest, undergo independent peer review to be considered in*  
13 *the Congressional rule-making process.*

14  
15 *- Plaintiffs saw agencies refuse to justify withdrawn public interest rules via public, written*  
16 *explanations.*

17 *- Plaintiffs saw loopholes ePlaintiff 42loited by powerful corporations like Google,*  
18 *Facebook, Tesla, Netflix, Sony, etc., to block public interest actions.*

19 *- Plaintiffs saw loopholes that allow corporations, like Tesla and Google, to tilt the rules in*  
20 *their favor and against the public interest.*

21  
22 *- Plaintiffs saw Silicon Valley oligarchs and their agency skills delay or dominate the rule-making*  
23 *process by the practice of inviting Google, Tesla or Facebook to negotiate rules they have to follow.*

24 *- Plaintiffs saw inter-agency review manipulation as a tool for corporate abuse used for the*  
25 *banning of informal review and closed-door industry lobbying at the White House's Office of*  
26 *Information and Regulatory Affairs*

27  
28 *- Plaintiffs saw abusive injunctions from rogue judges, like Jackson, et al, where individual District*

1 Court judges, can temporarily block agencies from implementing final rules.

2  
3 - Plaintiffs saw hostile agencies use sham delays of implementation and enforcement by using the  
4 presence of litigation to postpone the implementation of final rules.

5 - Plaintiffs saw obfuscation by agency public advocates to prevent public engagement.

6 - Plaintiffs saw the blockading of private lawsuits by members of the public to hold agencies  
7 accountable for failing to complete rules or enforce the law, and to hold corporations accountable  
8 for breaking the rules.

9  
10 - Plaintiffs saw a failure to inoculate government agencies against corporate capture such as  
11 Google undertook against the White House.

12  
13 - Plaintiffs saw Plaintiffs complaints and whistle-blowing buried in an avalanche of lobbyist  
14 activity.

15  
16 - Plaintiffs saw Plaintiffs competitor corporations game the courts by requiring courts to  
17 presumptive-ly defer to agency interpretations of laws and prohibiting courts from considering  
18 sham McKinsey studies and research excluded by agencies from the rule-making process

19  
20 - Plaintiffs saw blocking of the Congressional Review Act provision banning related rules that  
21 prevent agencies from implementing the will of Congress based on Congress' prior disapproval of a  
22 different, narrow rule on a similar topic.

23 - Plaintiffs saw a failure in the integrity of the judicial branch by reducing rules that prevent  
24 conflicts of interest.

25 - Plaintiffs saw individual stock ownership by federal judges in Plaintiffs competitors.

26  
27 - Plaintiffs saw judges accepting gifts or payments to attend private seminars from private  
28 individuals and corporations that were Plaintiffs competitors.

27  
28

- Plaintiffs saw non-ethical behavior by the Supreme Court in which the Court did not follow the Code of Conduct that binds all other federal judges

- Plaintiffs saw a lack of public insight into the judicial process by the hiding of information about the process and an increase in the barriers to accessing information.

- Plaintiffs saw reduced disclosure of non-judicial activity by federal judges and the hiding of judges' financial reports, recusal decisions, and speeches.

- Plaintiffs saw a blockade of public access to court activity by refusing to live-stream, on the web, audio of their proceedings, making case information easily-accessible to the public free of charge, and by federal courts not sharing case assignment data in bulk.

- Plaintiffs saw Plaintiffs rights restricted and Plaintiffs access to justice blocked to all but the wealthiest individuals and companies.

- Plaintiffs saw barriers that prevented us as individuals from having Plaintiffs case heard in court via harsh pleading standards that make it too hard for individuals and businesses that have been harmed to make their case before a judge.

- Plaintiffs saw no independent agency dedicated to enforcing federal ethics and anti-corruption laws.

- Plaintiffs saw no support for stronger ethics and public integrity laws via stronger enforcement.

- Plaintiffs saw no federal ethics enforcement with effective investigative and disciplinary powers that would help individuals.

26  
27  
28

- Plaintiffs saw minimal enforcement of ethics laws via corrective action, levying civil and administrative penalties, and referring egregious violations to the Justice Department for criminal arrest and enforcement.

- Plaintiffs saw no IG anti-corruption and public integrity oversight over federal officials, including oversight of agency Inspectors General, or ethics matters for White House staff and agency heads, or waivers and recusals by senior government officials.

- Plaintiffs saw no investigation independent and protected from partisan politics through a single Director operating under strict selection, appointment, and removal criteria.

- Plaintiffs saw Deutsche Bank pay Jeffrey Epstein' Russian hookers and manipulate finances for Elon Musk to cook the books.

- Plaintiffs saw no easy online access to key government ethics and transparency documents, including financial disclosures; lobbyist registrations; lobbyist disclosures of meetings and materials; and all ethics records, recusals, and waivers.

- Plaintiffs saw no independent and empowered ethics office insulated from congressional politics.

- Plaintiffs saw few criminal and civil violations in Plaintiffs case referred to the Justice Department, the Office of Public Integrity, or other relevant state or federal law enforcement.

- Plaintiffs saw broken Federal Open Records laws, public official and candidate tax disclosures.

- Plaintiffs saw Silicon Valley Oligarch special interests using secret donations from corporations and their Cartel of billionaires to influence public policy without disclosure

- Plaintiffs saw Google and Facebook provide over a billion dollars of political campaign

1 *financing with NO action by the FEC.*

2 *- Plaintiffs saw fake tech company 'nonprofit organizations' refuse to list donors who*  
3 *bankrolled the production of any specific rule-making comment, congressional testimony, or*  
4 *lobbying material, and refuse to reveal whether the donors reviewed or edited the document at the*  
5 *Silicon Valley insider companies.*

6  
7 *- Plaintiffs saw the hiding of individuals and corporations disclosures of funding, or editorial*  
8 *conflicts of interest, in research submitted to agencies that is not publicly available in peer-*  
9 *reviewed publications.*

10  
11 *- Plaintiffs saw McKinsey sham "Cleantech" and "battery research" reports undermineg the public*  
12 *interest by using studies that present conflicts of interest to independent peer review to be*  
13 *considered in the rule-making process.*

14  
15 *- Plaintiffs saw loopholes in Plaintiffs open records laws that allow federal officials to hide tech*  
16 *industry and Silicon Valley oligarch industry influence.*

17  
18 *- Plaintiffs saw a failure of the presumption of disclosure and a failure to affirmatively disclose*  
19 *records of public interest, including meeting agendas; government contracts; salaries; staff*  
20 *diversity; and reports to Congress.*

21  
22 *- Plaintiffs saw Tesla Motors get in-person, hand-walked, through the GOVT government*  
23 *cash give-away while all of Tesla's competitors were ignored, black-listed, never communicated*  
24 *with and blockaded.*

25  
26 *- Plaintiffs saw no use of a central FOIA website that is searchable and has downloadable*  
27 *open records databases with all open FOIA requests and all records disclosed through FOIA.*

28

1 - Plaintiffs saw limited FOIA enforcement by not limiting FOIA exemptions and loopholes, and by  
2 not giving the National Archives the authority to overrule agency FOIA decisions and to compel  
3 disclosure.

4  
5 - Plaintiffs saw Congress become less transparent by not ending the corporate lobbyists leg up in  
6 the legislative process. The  
7 public deserves to know what Congress is up to and how Silicon Valley lobbyists influence  
8 legislation.

9  
10 - Plaintiffs saw a failure to require all congressional committees to immediately post online more  
11 information, including hearings and markup schedules, bill or amendments text, testimonies,  
12 documents entered into the hearing record, hearing transcripts, written witness answers, and  
13 hearing audio and video recordings.

14  
15 - Plaintiffs saw a refusal of Members of Congress to post a link to their searchable voting record on  
16 their official websites

17  
18 - Plaintiffs saw a hiding, by Silicon Valley lobbyists of when they lobby a specific congressional  
19 office; specific topics of visit; the official action being requested; and all documents provided to the  
20 office during the visit.

21 - Plaintiffs saw much, much more...

22 Any politician who allows these crimes and corruptions to continue to exist is part of those  
23 crimes and corruptions. never believe any candidate who does not swear to end each of the above  
24 listed payola and corruption processes!

25 **IF AMERICA WAS SERIOUS ABOUT ENDING CORRUPTION, IT WOULD**  
26 **MAKE THE ABOVE ILLICIT DEEDS A FELONY, BUT THE CALIFORNIA**  
27 **POLITICIANS WILL DO ANYTHING TO KEEP THEIR PIG TROUGH GOING!**

1  
2  
3 **EXHIBIT 38 - The Ongoing Attacks On The Members Of The**  
4 **Public Who Reported These Crimes**

5 The victim’s cases have never been fairly reviewed by non-biased, non-conflicted officials.  
6 The victim’s FBI-class investigators and peers have not found a single entity in the government’s  
7 case reviews, or determinations, who was not either: financed by, friends with, sleeping with, dating  
8 the staff of, holding stock market assets in, promised a revolving door job or government service  
9 contracts from, partying with, personal friends with, photographed at private events with, making  
10 profits by consulting for, exchanging emails with, business associates of or directed by; one of those  
11 business adversaries, or the Senators and politicians that those business adversaries pay campaign  
12 finances to, or supply political search engine manipulation services to. FBI and CIA-class Forensic  
13 data proves it.

14 The victims have demanded, in writing to SSA, DOJ, OSC, SEC, FBI, that an unbiased  
15 lawyer and CPA be provided by The State for the case but none has been provided. As they are now  
16 low-income, senior, disabled, felony crime victims, the federal government’s LSC Corporation and  
17 public-interest law groups have stated that it is their right to receive such case assistance from The  
18 State. The victims have contacted NOSSCR, LSC, Legal Aid, NADR, and all known local resources  
19 on the list provided by the feds but none of those taxpayerfunded entities have been responsive  
20 because they are helping the cover-ups.

21 The assertions provided by a Task Force team of 3 letter agency folks, Congressional staff,  
22 investigative reporters and crowd-sourced voters supporting the case investigations are beyond  
23 reproach, and true, unless someone refuses to hear the truth due to a personal political agenda.

24 The victim’s government-promised benefits have STILL yet to be provided to them and  
25 many of the actions by politically conflicted federal officials, so far, have succeeded in harming the  
26 victims further The peers of the victims have received millions and millions of dollars for their  
27 Department of Energy, and other agency, whistle-blowing but the other victims have been blocked  
28 from getting legal support.

1           These abuses and benefits blockades are a violation of the victim's human rights, U.S.  
2 Constitution and State Constitutional rights. (Yes, each State has constitutional rights you get, too)

3           The victims put their lives on the line for their country. They have worked 60 hours, or  
4 more, per week, since the 70's. They more than earned their full benefits plus damages, interest and  
5 back-fees equal to precedents set in the referenced whistle-blower court cases, below.

6           The victims are fully qualified for, and have the right to receive, a State supplied law firm to  
7 represent them but they have been blockaded from their rights because corrupt political figures are  
8 embarrassed about their crimes being exposed.

9           Elected officials and agency staff have one job, that job it is to work for THESE VICTIMS  
10 the citizens. Those politicians, though, have been shown to have millions of dollars in their stock  
11 market accounts from competing with these victims via their ownership in competing companies  
12 that they are supposed to be regulating.

13           At least one of the California Senators has over \$100 million dollars in their accounts, (a fact  
14 the FBI can confirm), from stock market manipulations like this. Politically driven, and greed  
15 motivated, agency staff are constantly looking for any little opportunity or reason to use agency  
16 resources to harm any whistle-blower in reprisal for the success of the anti-corruption task forces  
17 they have assisted.

18           Federal officials stealth-hired Google, Gawker, Gizmodo, YouTube, In-Q-Tel, Fusion GPS  
19 and Black Cube to produce tens of millions of dollars of political reprisal media attacks and  
20 coordinate toxic exposures against the victims. The attacks have been proven by federal and private  
21 investigators to have happened, The source of the attacks, the financiers of the attacks, the  
22 beneficiaries of the attacks and the operators of the attacks are the same handful of government  
23 people.

24           The victims are seeking an analytical, objective, reasonable, non-political review of their  
25 case. Unlike Julian Assange, Edward Snowden and other whistle-blowers, not only did they do  
26 nothing illegal but they are law enforcement and intelligence service consultant who HELP the  
27 nation! They are Smedley Butler-like and not Edward Snowden-like!

28           It is foolish for any party to ignore the capacity for crime that the Jeffrey Epstein, Harvey

1 Weinstein (ie: his threat to have Jennifer Aniston killed for reporting his sex crimes) and Larry Page  
2 oligarchs get involved in, along with the Senators they own and control.

3         The nature of the core crime case is profound in that it was driven by White House staff and  
4 United States Senators, who ordered attacks on the victims in reprisal. These famous political  
5 figures use the trillions of dollars in government treasuries and massive stock market scams for  
6 illicit profiteering by rigging the system exclusively for themselves and their crony insiders.

7         They attacked the victims using government taxpayerfunded media (Fusion GPS, Black  
8 Cube, Google/YouTube/Alphabet, Pysops, Gizmodo Media, Media Matters, Blumenthal, etc.) and  
9 spy agency tools because the victims competed with their businesses and reported their crimes. This  
10 month the news headlines reveal that San Francisco Bay Area government has as many corrupt  
11 politicians as Chicago and relies on the same RICO-violating insider corruption network to operate;  
12 as proven by deep AI searches of their financial records. Arrests of those officials are now  
13 underway.

14  
15 Silicon Valley law enforcement records prove that the tech oligarchs that finance these political  
16 figures, engage in an organized, racketeering-based, massive sex trafficking, tax evasion, anti-trust  
17 violating, spousal abuse, money laundering, black-listing, racist, ageist, political bribery, crony  
18 racketeering crime Cartel. The Famous U.S. Senators, Governors and their staff knowingly engage  
19 in, finance, operate and benefit from these crimes in exchange for search engine manipulation and  
20 stock market insider trading.

21         The Google, Facebook and Twitter components of this Cartel censor and cover-up news  
22 coverage of these crimes, and attacked the victims, because they have a financial connection to the  
23 perpetrators.

24         All of the crooks have had their files hacked. The evidence is out there at the NSA, FBI, etc.  
25 Even hackers from Russia and China have copies of the incriminating data. The bad guys will  
26 eventually lose!

27         It is unlikely that any whistle-blowers have as productive a domestic resume, as many letters  
28 of reference from famous third-parties and as much proof-of-work as these victims have proven in

1 their evidence sets. The victims have been friends with, and shared homes with, multiple White  
2 House and Senate staff and family members and some them have even vouched for the victims.  
3 These whistle-blowers know the 'inside scoop'.

4 The victims are bi-partisan and not affiliated with any political party but they hate political  
5 corruption and have the connections to fight it when it affects them and America. Pictures and  
6 videos of famous political figures hugging them and meeting with them abound.

7 In a positive turn of events Whistle-blower Walter Tamosaitis” (easily found on web  
8 searches) who was also a Department of Energy Whistle-blower, got a rare victory. Walter got \$4.1  
9 MILLION DOLLARS for his whistle-blower work about The U.S. Government malfeasance.

10 The rest of the victims have gotten nothing but punishing benefits blockades and benefit  
11 reductions that guaranteed they would never be able to afford rent, going to a show or a restaurant,  
12 legal services or anything else in their lives! One of the people they helped get arrested sits around  
13 and drinks and collects over \$150,000.00 per year in government benefits...and they are an arrested  
14 crook. The victims are having a hard time seeing how they have been treated fairly in light of their  
15 deeply documented public service!

16 SSA, and other agencies, were weaponized as political reprisal tools against the victims.  
17 James Brown, Jr, the HHS California head of Obamacare was arrested by the FBI for political  
18 corruption and racketeering during this. In Marin county HHS investigators were also arrested for  
19 sex crime. These tiny victories do not pay the rent for the victims, though.

20 Some of the victims were awarded a Congressional commendation award in the Iraq War  
21 Bill under the United States Congress. They, and their team were to build America's alternative  
22 energy back-up plan for the nation under the Department of Energy. They fully executed their  
23 federal agreement and did not go bankrupt, embezzle funds, bribe California politicians or get FBI-  
24 raided like their competitor: Solyndra!

25 -----

2 **EXHIBIT 38 – How U.S. Senators, Agency Heads And Congress-People Were**  
3 **bribed With These Payments**

4 Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and  
5 stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook,  
6 Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported  
7 to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event  
8 Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs  
9 in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those  
10 Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced  
11 "Speaking Engagements" which are really just pay-offs conduited for donors; Private jet rides and  
12 use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake  
13 mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts;  
14 Bribes to Stanford officials to admit their kids to college; The use of HSBC, Wells Fargo, Goldman  
15 Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and  
16 bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as  
17 Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials; and  
18 other means now documented by us, The FBI, the FTC, The SEC, The FEC and journalists.

19 Part of this matter was featured on CBS News 60 Minutes investigative news segments. (ie:  
20 the segments: "THE CLEANTECH CRASH", "CONGRESS TRADING ON INSIDER  
21 INFORMATION", "THE LOBBYISTS PLAYBOOK" and investigations into hundreds of billions  
22 of dollars of stock market payola illicitly routed through Silicon Valley tech companies). If the  
23 White House, at that time, had been charged for these stock market campaign payola crimes, The  
24 President would have been forced out of office. Instead, the AG, Eric Holder, was impeached/Held-  
25 In-Contempt-Of Congress and he had to leave office.

26 This is why the attacks on the victims have been so spy agency-oriented and sophisticated:  
27 To punish them for helping law enforcement and because the victims accidentally competed with  
28 Senator's stock market schemes by making their products obsolete via BETTER products.

1           There are now thousands of news and Congressional reports; from “Spygate”, to The IRS  
2 Lois Lerner case to the FBI McCabe case and a vast number of SSA IG reports, particularly SSA  
3 about government agencies being weaponized against citizens for political reprisals. Compromised  
4 staff used SSA resources to harm the whistle-blowers and block their benefits because they helped  
5 halt one of the largest corruption schemes in modern American history.

6           This case is still an active case via many federal law enforcement and regulatory agencies.  
7 Some of the victims were cellular-level blood poisoned by exposure to toxic chemicals, compounds,  
8 powders and radioactive materials in their work environments for The U.S. Government projects. It  
9 is unclear if this poisoning was intentional “Alexander Valterovich Litvinenko-like” reprisal  
10 poisoning or accidental. The minimal Obamacare medical coverage that some of the victims have  
11 does not fund the testing and treatment of Cesium, Thorium overdose, micro-particulant toxins,  
12 radical solvents, high energy EMF and the kinds of exotic materials that Department of Energy  
13 weapons and energy labs, that victims worked with, use in their locations.

14           While the victims benefits application was underway in one part of the federal building, on  
15 the upper floors of the same building, victims were assisting a federal crime investigation against  
16 powerful local and Washington DC politicians and their oligarch financiers, on other floors of that  
17 federal building, corrupt political officials were figuring out how to harm the victims and engage in  
18 reprisals.

19           From FBI-class federal investigators and private investigators, records prove that well  
20 known California Senate officials and well known White House officials ordered government  
21 benefits to be blocked, delayed, obfuscated, denied and otherwise harmed as political reprisal and  
22 retribution for the assistance the victims supplied to law enforcement.

23           Criminal forensic data has proven that digital manipulation of some of victims records and  
24 files did occur and that SSA computers are regularly hacked by many parties including the China  
25 'Cloud Hopper' APT 10 group, currently under federal indictment, and hundreds of domestic attack  
26 groups, some of whom are hired by U.S. Senators. A number of California and Washington DC  
27 Senators and agency heads have already been arrested, indicted and/or removed from office in these  
28 matters.

1 Over 40 of the victims peers in this matter (Rajeev Motwani, Gary D. Conley, Seth Rich, Dr.  
2 Epstein's wife, etc. ) are now dead from mysterious circumstances. Victims have received  
3 numerous death threats and have been personally attacked on multiple occasions including getting  
4 their cars rammed and drive-by death threats.

5 Some of those victims may have been murdered for whistle-blowing. Multiple senior  
6 government officials and Senators have been exposed hiring Google, YouTube, Fusion GPS, In-Q-  
7 Tel, PsyOps, Cambridge Analytica, ShareBlue, Media Matters, Black Cube, Gizmodo and other  
8 "kill services" to attack citizens in political reprisals.

13 [stop-entering-anticompetitive-employee](#)

14 One of the complaints arose out of a larger investigation by the Antitrust Division into  
15 employment practices by **high tech** firms. The division continues to investigate other similar **no**  
16 solicitation agreements. Adobe Systems Inc. is a Delaware corporation with its principal place of  
17 business in San Jose, Calif., and 2009 revenues of nearly \$3 billion.

18  
19 Cold calling is one of the main methods used by companies in the high-technology sector to recruit  
20 employees with advanced and specialised skills, such as software and hardware engineers,  
21 programmers, animators, digital artists, Web developers and other technical professionals.<sup>[1]</sup> Cold  
22 calling involves communicating directly in any manner with another firm's employee who has not  
23 otherwise applied for a job opening. Cold calling may be done in person, by phone, letter, or email.  
24 <sup>[2]</sup> According to the legal brief filed by a Plaintiffs in one of the class-action cases, cold calling is  
25 an effective method of recruiting for the high-technology sector because "employees of other [high-  
26 technology] companies are often unresponsive to other recruiting strategies... [and] current satisfied  
27 employees tend to be more qualified, harder working, and more stable than those who are actively  
28 looking for employment."<sup>[3]</sup>

1 Amy Lambert, Google's associate general counsel, noted in a blog post shortly after the  
2 DOJ's actions, that Google's definition of cold calling does not necessarily eliminate recruiting by  
3 letter or email, but only the process of calling on the telephone. By implication, recruiting through  
4 LinkedIn incurs recruiting by "InMail" - LinkedIn's own mail contact system: "In order to maintain  
5 a good working relationship with these companies, in 2005 we decided not to "cold call" employees  
6 at a few of Plaintiffs partner companies. Plaintiffs policy only impacted cold calling, and we  
7 continued to recruit from these companies through LinkedIn, job fairs, employee referrals, or when  
8 candidates approached Google directly. In fact, we hired hundreds of employees from the  
9 companies involved during this time period."

10 The challenged "no cold call" agreements are alleged bilateral agreements between high  
11 technology companies not to cold call each other's employees. The DOJ alleges that senior  
12 executives at each company negotiated to have their employees added to 'no call' lists maintained by  
13 human resources personnel or in company hiring manuals. The alleged agreements were not limited  
14 by geography, job function, product group, or time period. The alleged bilateral agreements were  
15 between: (1) Apple and Google, (2) Apple and Adobe, (3) Apple and Pixar, (4) Google and Intel,  
16 (5) Google and Intuit,[\[4\]](#) and (6) Lucasfilm and Pixar.[\[5\]](#)

17 The civil class action further alleges that agreements also existed to (1) "provide notification  
18 when making an offer to another [company]'s employee (without the knowledge or consent of the  
19 employee)" and (2) "agreements that, when offering a position to another company's employee,  
20 neither company would counteroffer above the initial offer."[\[3\]](#)

### 21 **Department of Justice antitrust action**

22 The [United States Department of Justice Antitrust Division](#) filed a complaint in the [US](#)  
23 [District Court for the District of Columbia](#) alleging violations of Section 1 of the [Sherman Act](#). In  
24 *US v. Adobe Systems Inc., et al.*, the Department of Justice alleged that Adobe, Apple, Google, Intel,  
25 Intuit, and Pixar had violated Section 1 of the Sherman Act by entering into a series of bilateral "No  
26 Cold Call" Agreements to prevent the recruitment of their employees (a similar but separate suit  
27 was filed against Lucasfilm on December 21, 2010[\[6\]](#)).

28 ( [https://en.wikipedia.org/wiki/High-Tech\\_Employee\\_Antitrust\\_Litigation#cite\\_note-6](https://en.wikipedia.org/wiki/High-Tech_Employee_Antitrust_Litigation#cite_note-6) )

1 The DOJ alleged in their Complaint that the companies had reached "facially  
2 anticompetitive" agreements that "eliminated a significant form of competition...to the detriment of  
3 the affected employees who were likely deprived of competitively important information and access  
4 to better job opportunities." The DOJ also alleged that the agreements "were not ancillary to any  
5 legitimate collaboration," "were much broader than reasonably necessary for the formation or  
6 implementation of any collaborative effort," and "disrupted the normal price-setting mechanisms  
7 that apply in the labor setting."<sup>[4]</sup> The same day it filed the suit, the DOJ and the defendants  
8 proposed a settlement.<sup>[7]</sup>

9 ( [https://en.wikipedia.org/wiki/High-Tech\\_Employee\\_Antitrust\\_Litigation#cite\\_note-  
10 doj\\_case\\_proposed\\_settlement-7](https://en.wikipedia.org/wiki/High-Tech_Employee_Antitrust_Litigation#cite_note-doj_case_proposed_settlement-7) )

11 A final judgment enforcing the settlement was entered by the court on March 17, 2011.<sup>[8]</sup>  
12 ( [https://en.wikipedia.org/wiki/High-Tech\\_Employee\\_Antitrust\\_Litigation#cite\\_note-  
13 doj\\_adobe\\_final\\_judgement-8](https://en.wikipedia.org/wiki/High-Tech_Employee_Antitrust_Litigation#cite_note-doj_adobe_final_judgement-8) )

14 Although the DOJ Complaint only challenged the alleged "no cold call" agreements, in the  
15 settlement, the companies agreed to a more broad prohibition against "attempting to enter into,  
16 entering into, maintaining or enforcing any agreement with any other person to in any way refrain  
17 from, requesting that any person in any way refrain from, or pressuring any person in any way to  
18 refrain from soliciting, cold calling, recruiting, or otherwise competing for employees of the other  
19 person", for a period of five years; the court can grant an extension.<sup>[8]</sup>

20 ( [https://en.wikipedia.org/wiki/High-Tech\\_Employee\\_Antitrust\\_Litigation#cite\\_note-  
21 doj\\_adobe\\_final\\_judgement-8](https://en.wikipedia.org/wiki/High-Tech_Employee_Antitrust_Litigation#cite_note-doj_adobe_final_judgement-8) )

22 The settlement agreement does not provide any compensation for company employees  
23 affected by the alleged agreements.<sup>[9]</sup>

24 ( [https://en.wikipedia.org/wiki/High-Tech\\_Employee\\_Antitrust\\_Litigation#cite\\_note-  
25 judge oks-9](https://en.wikipedia.org/wiki/High-Tech_Employee_Antitrust_Litigation#cite_note-judge oks-9) )

26 Lucasfilm entered into a similar settlement agreement in December 2010.<sup>[5]</sup>

27 ( [https://en.wikipedia.org/wiki/High-Tech\\_Employee\\_Antitrust\\_Litigation#cite\\_note-  
28 Richey-5](https://en.wikipedia.org/wiki/High-Tech_Employee_Antitrust_Litigation#cite_note-Richey-5) )

1 **Civil class action**

2 *In re: High-Tech Employee Antitrust Litigation* ([U.S. District Court, Northern District of](#)  
3 [California](#) 11-cv-2509 [10]) is a [class-action](#) lawsuit on behalf of over 64,000 employees of [Adobe](#),  
4 [Apple Inc.](#), [Google](#), [Intel](#), [Intuit](#), [Pixar](#) and [Lucasfilm](#) (the last two are subsidiaries of [Disney](#))  
5 against their employer alleging that their wages were repressed due to alleged agreements between  
6 their employers not to hire employees from their competitors.[11][12] The case was filed on May 4,  
7 2011 by a former software engineer at Lucasfilm and alleges violations of California's antitrust  
8 statute, Business and Professions Code sections 16720 et seq. (the "Cartwright Act"); Business and  
9 Professions Code section 16600; and California's unfair competition law, Business and Professions  
10 Code sections 17200, et seq. Focusing on the network of connections around former Apple CEO  
11 [Steve Jobs](#), the Complaint alleges "an interconnected web of ePlaintiff 42ress agreements, each with  
12 the active involvement and participation of a company under the control of Steve Jobs...and/or a  
13 company that shared at least one member of [Apple's board of directors](#)." The alleged intent of this  
14 conspiracy was "to reduce employee compensation and mobility through eliminating competition  
15 for skilled labor." [13]

16 On October 24, 2013 the [United States District Court for the Northern District of California](#)  
17 granted class certification for all employees of Defendant companies from January 1, 2005 through  
18 January 1, 2010.[9]

19 As of October 31, 2013, Intuit, Pixar and Lucasfilm have reached a tentative settlement  
20 agreement. Pixar and Lucasfilm agreed to pay \$9 million in damages, and Intuit agreed to pay \$11  
21 million in damages.[9] In May 2014, Judge [Lucy Koh](#) approved the \$20 million settlement between  
22 Lucasfilm, Pixar, and Intuit and their employees. Class members in this settlement, which involved  
23 fewer than 8% of the 65,000 employees affected, will receive around \$3,840 each.[14]

24 The trial of the class action for the remaining Defendant companies was scheduled to begin  
25 on May 27, 2014. The Plaintiffs intended to ask the jury for \$3 billion in compensation, a number  
26 which could in turn have tripled to \$9 billion under antitrust law.[15] However, in late April 2014,  
27 the four remaining defendants, [Apple Inc.](#), [Google](#), [Intel](#) and [Adobe Systems](#), agreed to settle out of  
28 court. Any settlement must be approved by Judge [Lucy Koh](#). [16][17]

1 On May 23, 2014, Apple, Google, Intel, Adobe agreed to settle for \$324.5 million. Lawyers  
2 sought 25% in attorneys' fees, plus expenses of as much as \$1.2 million, according to the filing.  
3 Additional award payments of \$80,000 would be sought for each named Plaintiffs who served as a  
4 class representative.[\[18\]](#) Payouts will average a few thousand dollars based on the salary of the  
5 employee at the time of the complaint.

6 In June 2014, Judge Lucy Koh expressed concern that the settlement may not be a good one  
7 for the Plaintiffs. Michael Devine, one of the Plaintiffs, said the settlement is unjust. In a letter he  
8 wrote to the judge he said the settlement represents only one-tenth of the \$3 billion in compensation  
9 the 64,000 workers could have made if the defendants had not colluded.[\[19\]](#)

10 On August 8, 2014, Judge Koh rejected the settlement as insufficient on the basis of the  
11 evidence and exposure. Rejecting a settlement is unusual in such cases. This left the defendants with  
12 a choice between raising their settlement offer or facing a trial.[\[20\]](#)

13 On September 8, 2014, Judge Koh set April 9, 2015 as the actual trial date for the remaining  
14 defendants, with a pre-trial conference scheduled for December 19, 2014. Also, as of early  
15 September 2014, the defendants had re-entered mediation to determine whether a new settlement  
16 could be reached.[\[21\]](#)

17 A final approval hearing was held on July 9, 2015.[\[22\]](#) On Wednesday September 2, 2015,  
18 Judge Lucy H. Koh signed an order granting Motion for Final Approval of Class Action Settlement.  
19 The settlement website stated that Adobe, Apple, Google, and Intel has reached a settlement of  
20 \$415 million and other companies settled for \$20 million.

21 According to the settlement website, Gilardi & Co., LLC distributed the settlement to class  
22 members the week of December 21, 2015.

1  
2 **EXHIBIT 39 - The Tectopus: How Silicon Valley's most celebrated CEOs**  
3 **conspired to drive down 100,000 tech engineers' wages**

4 - A Federal Lawsuit Inspired By Plaintiffs Actions

5  
6 [By Mark Ames](#)

7  
8 In early 2005, as demand for Silicon Valley engineers began [booming](#), Apple's Steve Jobs  
9 sealed a secret and illegal pact with Google's Eric Schmidt to artificially push their workers wages  
10 lower by agreeing not to recruit each other's employees, sharing wage scale information, and  
11 punishing violators. On February 27, 2005, Bill Campbell, a member of Apple's board of directors  
12 and [senior advisor](#) to Google, emailed Jobs to confirm that Eric Schmidt "got directly involved and  
13 firmly stopped all efforts to recruit anyone from Apple."

14 Later that year, Schmidt instructed his Sr VP for Business Operation Shona Brown to keep  
15 the pact a secret and only share information "verbally, since I don't want to create a paper trail over  
16 which we can be sued later?"

17 These secret conversations and agreements between some of the biggest names in Silicon  
18 Valley were first exposed in a Department of Justice antitrust [investigation](#) launched by the Obama  
19 Administration in 2010. That DOJ suit became the basis of a [class action lawsuit](#) filed on behalf of  
20 over 100,000 tech employees whose wages were artificially lowered — an [estimated \\$9 billion](#)  
21 effectively stolen by the high-flying companies from their workers to pad company earnings — in  
22 the second half of the 2000s. Last week, the 9th Circuit Court of Appeals denied attempts by Apple,  
23 Google, Intel, and Adobe to have the lawsuit tossed, and gave final approval for the class action suit  
24 to go forward. A jury trial date has been set for May 27 in San Jose, before US District Court judge  
25 Lucy Koh, who presided over the Samsung-Apple patent suit.

26 In a related but separate investigation and ongoing suit, eBay and its former CEO Meg  
27 Whitman, now CEO of HP, are being sued by both the [federal government](#) and the [state of](#)  
28 [California](#) for arranging a similar, secret wage-theft agreement with Intuit (and possibly Google as

1 well) during the same period.

2       The secret wage-theft agreements between Apple, Google, Intel, Adobe, Intuit, and Pixar  
3 (now owned by Disney) are described in court papers obtained by PandoDaily as "an overarching  
4 conspiracy" in violation of the Sherman Antitrust Act and the Clayton Antitrust Act, and at times it  
5 reads like something lifted straight out of the robber baron era that produced those laws. Today's  
6 inequality crisis is America's [worst on record](#) since statistics were first recorded a hundred years ago  
7 — the only comparison would be to the era of the railroad tycoons in the late 19th century.

8       Shortly after sealing the pact with Google, Jobs strong-armed Adobe into joining after he  
9 complained to CEO Bruce Chizen that Adobe was recruiting Apple's employees. Chizen sheepishly  
10 responded that he thought only a small class of employees were off-limits:

11       I thought we agreed not to recruit any senior level employees.... I would propose we keep it  
12 that way. Open to discuss. It would be good to agree.

13       Jobs responded by threatening war:

14       OK, I'll tell Plaintiffs recruiters they are free to approach any Adobe employee who is not a  
15 Sr. Director or VP. Am I understanding your position correctly?

16       Adobe's Chizen immediately backed down:

17       I'd rather agree NOT to actively solicit any employee from either company.....If you are in  
18 agreement, I will let my folks know.

19       The next day, Chizen let his folks — Adobe's VP of Human Resources — know that "we are  
20 not to solicit ANY Apple employees, and visa versa." Chizen was worried that if he didn't agree,  
21 Jobs would make Adobe pay:

22       if I tell Steve [Jobs] it's open season (other than senior managers), he will deliberately poach  
23 Adobe just to prove a point. Knowing Steve, he will go after some of Plaintiffs top Mac talent...and  
24 he will do it in a way in which they will be enticed to come (extraordinary packages and Steve  
25 wooing).

26       Indeed Jobs even threatened war against Google early 2005 before their "gentlemen's  
27 agreement," telling Sergey Brin to back off recruiting Apple's Safari team:

28       if you [Brin] hire a single one of these people that means war.

1 Brin immediately advised Google's Executive Management Team to halt all recruiting of  
2 Apple employees until an agreement was discussed.

3 In the geopolitics of [Silicon Valley tech power](#), Adobe was no match for a corporate  
4 superpower like Apple. Inequality of the sort we're ePlaintiff 42erienceing today affects everyone in  
5 ways we haven't even thought of — whether it's Jobs bullying slightly lesser executives into joining  
6 an illegal wage-theft pact, or the tens of thousands of workers whose wages were artificially  
7 lowered, transferred into higher corporate earnings, and [higher compensations](#) for those already  
8 richest and most powerful to begin with.

9 Over the next two years, as the tech industry entered another frothing bubble, the secret  
10 wage-theft pact which began with Apple, Google and Pixar ePlaintiff 42anded to include Intuit and  
11 Intel. The secret agreements were based on relationships, and those relationships were forged in  
12 Silicon Valley's [incestuous boards of directors](#), which in the past has been recognized mostly as a  
13 problem for shareholders and corporate governance advocates, rather than for the tens of thousands  
14 of employees whose wages and lives are viscerally affected by their clubby backroom deals. Intel  
15 CEO Paul Otellini [joined](#) Google's board of directors in 2004, a part-time gig that netted Otellini  
16 [\\$23 million in 2007](#), with tens of millions more in Google stock options still in his name — which  
17 worked out to \$464,000 per Google board event if you only counted the stock options Otellini  
18 cashed out — dwarfing what Otellini made off his Intel stock options, despite spending most of his  
19 career with the company.

20 Meanwhile, Eric Schmidt served on Apple's board of directors until 2009, when a [DoJ](#)  
21 [antitrust investigation](#) pushed him to resign. Intuit's chairman at the time, Bill Campbell, also served  
22 on Apple's board of directors, and as official advisor — ["consigliere"](#) — to Google chief Eric  
23 Schmidt, until he [resigned](#) from Google in 2010. Campbell, a celebrated figure ("a quasi-religious  
24 force for good in Silicon Valley") played a key behind-the-scenes role connecting the various CEOs  
25 into the wage-theft pact. Steve Jobs, who took regular Sunday walks with Campbell near their Palo  
26 Alto homes, valued Campbell for his ability "to get A and B work out of people," gushing that the  
27 conduit at the center of the \$9 billion wage theft suit, ["loves people, and he loves growing people."](#)

28 Indeed. Eric Schmidt has been, if anything, even more profuse in his praise of Campbell.

1 Schmidt credits Campbell for structuring Google when Schmidt was brought on board in 2001:

2 His contribution to Google — it is literally not possible to overstate. He essentially  
3 architected the organizational structure.

4 Court documents show it was Campbell who first brought together Jobs and Schmidt to  
5 form the core of the Silicon Valley wage-theft pact. And Campbell's name appears as the early  
6 conduit bringing Intel into the pact with Google:

7 Bill Campbell (Chairman of Intuit Board of Directors, Co-Lead Director of Apple, and  
8 advisor to Google) was also involved in the Google-Intel agreement, as reflected in an email  
9 exchange from 2006 in which Bill Campbell agreed with Jonathan Rosenberg (Google Advisor to  
10 the Office of CEO and former Senior Vice President of Product Management) that Google should  
11 call [Intel CEO] Paul Otellini before making an offer to an Intel employee, regardless of whether  
12 the Intel employee first approached Google.

13 Getting Google on board with the wage-theft pact was the key for Apple from the start  
14 — [articles](#) in the tech press in 2005 pointed at Google's recruitment drive and incentives were the  
15 key reason why tech wages soared that year, at the highest rate in well over a decade.

16 Campbell helped bring in Google, Intel, and, in 2006, Campbell saw to it that Intuit — the  
17 company he [chaired](#) — also joined the pact.

18 From the peaks of Silicon Valley, Campbell's interpersonal skills were [magical](#) and awe-  
19 inspiring, a crucial factor in creating so much unimaginable wealth for their companies and  
20 themselves. Jobs [said](#) of Campbell:

21 There is something deeply human about him.

22 And Schmidt [swooned](#):

23 He is my closest confidant...because he is the definition of trust.

24 Things — and people — look very different when you're down in the Valley. In the nearly  
25 100-page court opinion issued last October by Judge Koh granting class status to the lawsuit,  
26 Campbell comes off as anything but mystical and "deeply human." He comes off as a scheming  
27 consigliere carrying out some of the drearier tasks that the oligarchs he served were constitutionally  
28 not so capable of arranging without him.

1 But the realities of inequality and capitalism invariably lead to mysticism of this sort, a  
2 natural human response to the dreary realities of concentrating so much wealth and power in the  
3 hands of a dozen interlocking board members at the expense of 100,000 employees, and so many  
4 other negative knock-off effects on the politics and culture of the world they dominate.

5 One of the more telling elements to this lawsuit is the role played by "Star Wars" creator  
6 George Lucas, who emerges as the Obi-Wan Kenobi of the wage-theft scheme. It's almost too  
7 perfectly symbolic that Lucas — the symbiosis of Baby Boomer New Age mysticism, Left Coast  
8 power, political infantilism, and dreary 19th century labor exploitation — should be responsible for  
9 dreaming up the wage theft scheme back in the mid-1980s, when Lucas sold the computer  
10 animation division of Lucasfilm, Pixar, to Steve Jobs.

11 As Pixar went independent in 1986, Lucas explained his philosophy about how competition  
12 for computer engineers violated his sense of normalcy — and profit margins. According to court  
13 documents:

14 George Lucas believed that companies should not compete against each other for  
15 employees, because '[i]t's not normal industrial competitive situation.' As George Lucas explained,  
16 'I always — the rule we had, or the rule that I put down for everybody,' was that 'we cannot get into  
17 a bidding war with other companies because we don't have the margins for that sort of thing.'

18 Translated, Lucas' wage-reduction agreement meant that Lucasfilm and Pixar agreed to a)  
19 never cold call each other's employees; b) notify each other if making an offer to an employee of the  
20 other company, even if that employee applied for the job on his or her own without being recruited;  
21 c) any offer made would be "final" so as to avoid a costly bidding war that would drive up not just  
22 the employee's salary, but also drive up the pay scale of every other employee in the firm.

23 Jobs held to this agreement, and used it as the basis two decades later to suppress employee  
24 costs just as fierce competition was driving up tech engineers' wages.

25 The companies argued that the non-recruitment agreements had nothing to do with driving  
26 down wages. But the court ruled that there was "extensive documentary evidence" that the pacts  
27 were designed specifically to push down wages, and that they succeeded in doing so. The evidence  
28 includes software tools used by the companies to keep tabs on pay scales to ensure that within job

1 "families" or titles, pay remained equitable within a margin of variation, and that as competition and  
2 recruitment boiled over in 2005, emails between executives and human resources departments  
3 complained about the pressure on wages caused by recruiters cold calling their employees, and  
4 bidding wars for key engineers.

5 Google, like the others, used a "salary algorithm" to ensure salaries remained within a tight  
6 band across like jobs. Although tech companies like to claim that talent and hard work are  
7 rewarded, in private, Google's "People Ops" department kept overall compensation essentially  
8 equitable by making sure that lower-paid employees who performed well got higher salary increases  
9 than higher-paid employees who also performed well.

10 As Intel's director of Compensation and Benefits bluntly summed up the Silicon Valley  
11 culture's official cant versus its actual practices,

12 While we pay lip service to meritocracy, we really believe more in treating everyone the  
13 same within broad bands.

14 The companies in the pact shared their salary data with each other in order to coordinate and  
15 keep down wages — something unimaginable had the firms not agreed to not compete for each  
16 other's employees. And they fired their own recruiters on just a phone call from a pact member  
17 CEO.

18 In 2007, when Jobs learned that Google tried recruiting one of Apple's employees, he  
19 forwarded the message to Eric Schmidt with a personal comment attached: "I would be very pleased  
20 if your recruiting department would stop doing this."

21 Within an hour, Google made a "public example" by "terminating" the recruiter in such a  
22 manner as to "(hopefully) prevent future occurrences."

23 Likewise, when Intel CEO Paul Otellini heard that Google was recruiting their tech staff, he  
24 sent a message to Eric Schmidt: "Eric, can you pls help here???"

25 The next day, Schmidt wrote back to Otellini: "If we find that a recruiter called into Intel,  
26 we will terminate the recruiter."

27 One of the reasons why non-recruitment works so well in artificially lowering workers'  
28 wages is that it deprives employees of information about the job market, particularly one as

1 competitive and overheating as Silicon Valley's in the mid-2000s. As the companies' own internal  
2 documents and statements showed, they generally considered cold-calling recruitment of "passive"  
3 talent — workers not necessarily looking for a job until enticed by a recruiter — to be the most  
4 important means of hiring the best employees.

5 Just before joining the wage-theft pact with Apple, Google's human resources executives are  
6 quoted sounding the alarm that they needed to "dramatically increase the engineering hiring rate"  
7 and that would require "drain[ing] competitors to accomplish this rate of hiring." One CEO who  
8 noticed Google's hiring spree was eBay CEO Meg Whitman, who in early 2005 called Eric Schmidt  
9 to complain, "Google is the talk of the Valley because [you] are driving up salaries across the  
10 board." Around this time, eBay entered an illegal wage-theft non-solicitation scheme of its own  
11 with Bill Campbell's Intuit, which is still being tried in ongoing federal and California state suits.

12 Google placed the highest premium on "passive" talent that they cold-called because  
13 "passively sourced candidates offer[ed] the highest yield," according to court documents. The  
14 reason is like the old Groucho Marx joke about not wanting to belong to a club that would let you  
15 join it — workers actively seeking a new employer were assumed to have something wrong with  
16 them; workers who weren't looking were assumed to be the kind of good happy talented workers  
17 that company poachers would want on their team.

18 For all of the high-minded talk of post-industrial technotopia and Silicon Valley as worker's  
19 paradise, what we see here in stark ugly detail is how the same old world scams and rules are still  
20 operative.

1 Any voyage onto the path of funding from The U.S. Government will be a road to hell.

2 While frozen-smile aides will shake your hand and tell you how "*excited they are to*  
3 *welcome your application*", behind your back they are sharpening their knives.

4 Over 100 past Applicants were lied to, defrauded, stone-walled, bottom-drawer'd, sabotaged,  
5 and generally screwed with by **The U.S. Government** in order to: 1.) protect campaign financiers  
6 who were their competitors and 2.) stone-wall those Applicant's for being competitive against the  
7 Elon Musk and Solyndra chosen insiders.

8 Almost EVERY competing Applicant was faster, cheaper, had better MPG, was easier to  
9 manufacture, had lower cost to the main-stream market, had a better set of financials, had a better  
10 debt ratio, was safer, etc. but they missed one key factor: THEY DID NOT OFFER BRIBES AS  
11 LARGE AS ELON MUSK DID!

12 Even in 2020 you would have to be a sucker to apply for GOVT funds. There are people  
13 inside GOVT who are dedicated to making sure you never get that money. You can get a faster loan  
14 from a commercial bank without thousands of hidden "gotchas" and insider trading schemes to trip  
15 you up. These tricks, built into The U.S. Government process, are created to ensure that GOVT  
16 insiders have thousands of excuses to never let you get the money unless you agree to finance the  
17 correct political candidates.

18 Political insiders will always, though, find a way to disqualify any applicant who competes  
19 with campaign financier favorites. Hundreds of highly qualified applicants were denied because  
20 Elon Musk knew they could put Tesla out of business without GOVT's exclusive support of his  
21 monopoly. Tesla's own senior staff have written widely about the 'gate-keeper' insider trading scam  
22 at GOVT. GOVT is an anti-trust operator who is a gatekeeper of industry winners and losers based  
23 on who donated the most to certain PACs.

24 The Secretary of Energy and the Chief Counsel for the United States Department of Energy  
25 have been challenged, in writing, to provide the names of **ANY** Loan Programs Office (LPO) or  
26 Advanced Technology Vehicles Manufacturing (ATVM) Program official, reviewer, advisor or  
27 staffer who was not, from 2007 forward, either financed by, friends, with, sleeping with, dating the  
28 staff of, holding stock market assets in, promised a revolving door job or government service

1 contracts from, partying with, personal friends with, photographed at private events with,  
2 exchanging emails with, business associates of or directed by; one of those business adversaries, or  
3 the Senators and Department of Energy politicians that those business adversaries pay campaign  
4 finances to, or supply political digital services to. From 2008 forward, The White House and The  
5 U.S. Government were controlled by the Silicon Valley tech oligarchs! That is a violation of the  
6 law, the Constitution and the American Way.

7 Department of Energy PR officials blindly push their revisionist history propaganda party-  
8 line hype that the GOVT has been "*fair and successful*". There has never been a bigger lie on Earth  
9 since the first frat boy told the first sorority girl "*don't worry, I won't get it in your mouth..*"

10 One group used CIA and FBI style investigation tools to hunt down every reviewer,  
11 contractor and insider involved in the Loan Programs Office (LPO) or Advanced Technology  
12 Vehicles Manufacturing (ATVM) Program since 2007. A forensic chart was produced showing the  
13 insider trading, revolving door and social engagements of each. In almost 97% of the cases, every  
14 person was found to have glaringly unethical, often criminal, conflicts of interest between  
15 beneficiary lines of connection.

16 In fact, multiple groups have insisted that the FBI, the NSA, The CIA and 60 Minutes  
17 conduct their own independent studies, on a name, by name basis of the GOVT staff involved and  
18 publish the results of that study to Congress and the public.

19 The U.S. Department of Energy has supplied no apologies, no compensation for damages to  
20 the victims and no halt in the slush-fund payola schemes!

21 Do you doubt the veracity of these claims? Show this letter to Bill Cooper, the head lawyer  
22 for GOVT. Ask him to provide forensic data proving any of these assertions are not true! He can't  
23 do it!

24 Plaintiffs can provide thousands of FBI agents, investigative journalists and Congressional  
25 staff to prove these assertions are true.

26 Dept. of Energy staff claim that they got rid of all of the bad people at GOVT and that the  
27 evil ones don't work there any more but OPM confirms that to be a lie. The stock market holdings,  
28 revolving door deals, voter records and social media postings of the current Dept of Energy staff

1 prove that the corrupt ones never left. Tell GOVT to take a look at their moral construct if they  
2 contact you!

3 See XXXXXXXXXXXXXXXXXXXX for more on this.

4 **Jay Carney** was Obama's "Hit Man" in the Oval Office at The White House during the  
5 Cleantech Crash. It was Carney who helped order character assassinations and hit jobs on members  
6 of the public who spoke out about the crimes. Carney was recently caught, again, ordering hit jobs  
7 at Amazon, as well. In a famous magazine interview, his home was revealed to be covered in  
8 communist propaganda posters.

9 Leaked notes from an internal meeting of Amazon leadership obtained by VICE News  
10 reveal company executives discussed a plan to smear fired warehouse employee Christian Smalls,  
11 calling him “not smart or articulate” as part of a PR strategy to make him “the face of the entire  
12 union/organizing movement.”

13 “He’s not smart, or articulate, and to the extent the press wants to focus on us versus him,  
14 we will be in a much stronger PR position than simply explaining for the umpteenth time how we’re  
15 trying to protect workers,” wrote Amazon General Counsel David Zapolsky in notes from the  
16 meeting forwarded widely in the company.

17 The discussion took place at a daily meeting, which included CEO Jeff Bezos, to update  
18 each other on the coronavirus situation. Amazon SVP of Global Corporate Affairs Jay Carney  
19 [described the purpose to CNN on Sunday](#): “We go over the update on what's happening around the  
20 world with Plaintiffs employees and with Plaintiffs customers and Plaintiffs businesses. We also  
21 spend a significant amount of time just brainstorming about what else we can do” about COVID-19.

22 ( [https://www.cnn.com/videos/business/2020/03/29/is-amazon-doing-enough-to-protect-](https://www.cnn.com/videos/business/2020/03/29/is-amazon-doing-enough-to-protect-workers-and-customers.cnn)  
23 [workers-and-customers.cnn](https://www.cnn.com/videos/business/2020/03/29/is-amazon-doing-enough-to-protect-workers-and-customers.cnn) )

24 Amazon [fired the warehouse worker Smalls](#), after he led a walkout of a number of  
25 employees at a Staten Island distribution warehouse. Amazon says he was fired for violating a  
26 company-imposed 14-day quarantine after he came into contact with an employee who tested  
27 positive for the coronavirus.

28 ( [https://www.vice.com/en\\_us/article/5dmea3/amazon-fired-the-warehouse-worker-who-](https://www.vice.com/en_us/article/5dmea3/amazon-fired-the-warehouse-worker-who-)

1 [organized-a-walkout-over-coronavirus](#) )

2 Zapolsky’s notes from the meeting detail Amazon’s plan to deal with a wave of bad press  
3 and calls for investigations from elected officials following the firing of Smalls. They also show top  
4 Amazon brass wanted to make Smalls the focus of its narrative when questioned about worker  
5 safety.

6 “We should spend the first part of Plaintiffs response strongly laying out the case for why  
7 the organizer’s conduct was immoral, unacceptable, and arguably illegal, in detail, and only then  
8 follow with Plaintiffs usual talking points about worker safety,” Zapolsky wrote. “Make him the  
9 most interesting part of the story, and if possible make him the face of the entire union/organizing  
10 movement.”

11 They discussed encouraging Amazon executives to use Smalls to discredit the wider labor  
12 movement at Amazon. Employees at the warehouse, known as JFK8, [launched an effort to unionize](#)  
13 [in 2018](#).

14 ( [https://www.bloomberg.com/news/articles/2018-12-12/employees-at-amazon-s-new-nyc-](https://www.bloomberg.com/news/articles/2018-12-12/employees-at-amazon-s-new-nyc-warehouse-launch-unionization-push)  
15 [warehouse-launch-unionization-push](#) )

16 In his notes, Zapolsky wrote that there was “general agreement” on this point among the  
17 other attendees of the meeting. (Zapolsky’s notes also mention SVP of worldwide operations and  
18 customer service Dave Clark and SVP of human resources Beth Galetti.) This is the typical culture  
19 of the Obama crowd of insider executives who will destroy any citizen who gets in their way. Jay  
20 Carney runs a ***Massive covert organized corruption team at Amazon in order to manipulate***  
21 ***Democracy***.

22 Examples of these groups include Pacronym and American Bridge who are part of Arabella  
23 Advisors, a consulting firm that is not required to identify its donors.

24 Pacronym’s affiliated groups create a large network of fake local news outlets that are  
25 designed to promote progressive viewpoints inside battleground states in order to rig insider trading  
26 for their top bosses.

27 They are all part of a wealthy dark money network that manipulates public policy for  
28 personal profiteering.

1 American Bridge 21st Century and Pacronym are cutting ads thrashing outsiders as super  
2 PACs who go after people they don't like, The Washington Post [reported](#). Both groups also have  
3 ties to two fake false-front large nonprofit groups — New Venture Fund and Sixteen Thirty Fund —  
4 connected to a massive extreme-leaning consulting group.

5 ( [https://www.washingtonpost.com/politics/democratic-groups-to-spend-millions-hitting-](https://www.washingtonpost.com/politics/democratic-groups-to-spend-millions-hitting-trump-over-coronavirus-response/2020/03/17/5f9fadba-686c-11ea-9923-57073adce27c_story.html)  
6 [trump-over-coronavirus-response/2020/03/17/5f9fadba-686c-11ea-9923-57073adce27c\\_story.html](https://www.washingtonpost.com/politics/democratic-groups-to-spend-millions-hitting-trump-over-coronavirus-response/2020/03/17/5f9fadba-686c-11ea-9923-57073adce27c_story.html) )

7 NVF gave one of Pacronym's nonprofits — ACRONYM — \$250,000 while providing  
8 American Bridge \$40,000 in 2018, [according to](#) NVF's 2018 IRS documents. IRS [records](#) also  
9 indicated American Bridge pulled in \$200,000 in 2018 from nonprofit Sixteen Thirty Fund, which  
10 reportedly spent \$141 million on various extreme-leaning causes during the midterm election year.

11 ( [https://apps.irs.gov/pub/epostcard/cor/205806345\\_201812\\_990\\_2020013117095977.pdf](https://apps.irs.gov/pub/epostcard/cor/205806345_201812_990_2020013117095977.pdf) )

12 ( <https://static.politico.com/4b/32/19c3670b41dfa1f8c1b3e0972138/2018-1630-form990.pdf>

13 )

14 Sixteen Thirty Fund and nonprofit NVF are tied into the same sprawling network, according  
15 to an analysis by investigators. Arabella Advisors, a philanthropic consulting company based in  
16 Washington, D.C., manages four nonprofits, including the [NVF](#), Sixteen Thirty Fund, Hopewell  
17 Fund and the Windward Fund.

18 ( <https://www.influencewatch.org/non-profit/new-venture-fund/> )

19 Sixteen Thirty Fund has not responded to requests for comment, while NVF acknowledged  
20 making a grant to ACRONYM in 2018 but noted that it “has nothing to do with the activities at  
21 PACRONYM or American Bridge.”

22 Arabella representative Steve Sampson called NVF merely a “client of ours,” even though  
23 the consulting group shares a Washington, D.C., office with all four groups, according to NVF and  
24 Sixteen Thirty Fund's 2018 IRS records. American Bridge has not responded to requests for  
25 comment.

26 Other groups have raised alarms about the network as well.

27 “Arabella Network is the umbrella, and they have these two funds that flow toward both of  
28 these groups. A clearly full-blown extremist arm that is casting itself as a nonprofit is politicizing

1 this event,” former Nevada Attorney General Adam Laxalt told the press.

2 Laxalt is the Outside Counsel to Americans for Public Trust, a group dedicated to  
3 uncovering unethical behavior. Americans for Public Trust has [covered](#) the network in the past.

4 **(RELATED: Billionaire Allegedly Behind A False Flag Operation In Alabama Helped**  
5 **Finance The Group Behind Iowa Caucus Chaos)**

6 ( <https://dailycaller.com/2020/02/18/acronym-iowa-caucus-barack-obama/> )

7 “American lives are more important than scoring cheap political points,” he added after  
8 suggesting that the group is striking while the iron is hot and making certain they capitalize on a  
9 crisis that has so far killed thousands of people.

10 Laxalt is referring to Pacronym’s [announcement](#) on March 17 to plow \$5 million into a  
11 digital advertising campaign railing against those they hate. The ads are published through Four is  
12 Enough, a Pacronym project.

13 ( [https://www.washingtonpost.com/politics/democratic-groups-to-spend-millions-hitting-](https://www.washingtonpost.com/politics/democratic-groups-to-spend-millions-hitting-trump-over-coronavirus-response/2020/03/17/5f9fadba-686c-11ea-9923-57073adce27c_story.html)  
14 [trump-over-coronavirus-response/2020/03/17/5f9fadba-686c-11ea-9923-57073adce27c\\_story.html](https://www.washingtonpost.com/politics/democratic-groups-to-spend-millions-hitting-trump-over-coronavirus-response/2020/03/17/5f9fadba-686c-11ea-9923-57073adce27c_story.html) )

15 ACRONYM’s founder said the campaign makes sense from a public health and national  
16 security perspective.

17 Democratic operative David Plouffe another Jay Carney-type "hit-man", who managed  
18 former President Barack Obama’s 2008 White House bid, sits alongside McGowan on  
19 ACRONYM’s board.

20 ACRONYM has not responded to the DCNF’s repeated requests for comment.

21 **(RELATED: Tech Firm Behind Iowa Caucus Disaster Also Played Role In Creating A Covert**  
22 **Democratic Propaganda Media Outfit)**

23 ( <https://dailycaller.com/2020/02/04/iowa-caucus-shadow-buttigieg/> )

24 Some academics argued that orchestrating such a campaign skirts ethical rules. Running  
25 advertisements thrashing the president during a health crisis looks bad, according to Daniel Kreiss,  
26 a professor of political communication at the University of North Carolina at Chapel Hill.

27 “It’s a very fine line between ensuring that the president has the legitimacy to speak  
28 authoritatively on what Americans must do in order to be safe, and the very real and legitimate

1 questions to raise regarding how the president has handled this crisis given that he’s on the ballot in  
2 November,” Kreiss [told](#) WaPo in a March 17 report addressing the ad campaign push.

3 ( [https://www.washingtonpost.com/politics/democratic-groups-to-spend-millions-hitting-](https://www.washingtonpost.com/politics/democratic-groups-to-spend-millions-hitting-trump-over-coronavirus-response/2020/03/17/5f9fadba-686c-11ea-9923-57073adce27c_story.html)  
4 [trump-over-coronavirus-response/2020/03/17/5f9fadba-686c-11ea-9923-57073adce27c\\_story.html](https://www.washingtonpost.com/politics/democratic-groups-to-spend-millions-hitting-trump-over-coronavirus-response/2020/03/17/5f9fadba-686c-11ea-9923-57073adce27c_story.html) )

5 Laxalt, Nevada’s former attorney general, expressed a similar position.

6 “The timing of attacking the president in battleground states is appalling. If they are going to  
7 do it, then you name the place. I think that doing it right this second is outrageous,” he told the  
8 DCNF.

9 Meanwhile, ACRONYM’s McGowan is also creating a constellation of local news websites  
10 that act as progressive arms targeting the president and his policies.

11 McGowan, a digital [producer](#) for Obama for America in 2011 and the [proprietor](#) behind  
12 ACRONYM, raised at least \$25 million from wealthy liberals to create a media company called  
13 [Courier Newsroom](#) that is designed to deliver information favorable to Democrats. Courier is  
14 rolling out newspapers in swing states to counter what its founder believes is right-wing spin on  
15 Facebook and across the digital domain.

16 ( <https://www.linkedin.com/in/taramcgowan/> )

17 ( <https://dailycaller.com/2019/11/05/obama-trump-elections-ads-digital/> )

18 ( <https://couriernewsroom.com/> )

19 Along with the Courier Newsroom, McGowan is reportedly creating Virginia Dogwood and  
20 Arizona’s Copper Courier, among others that are expected to roll out in Michigan, North  
21 Carolina, Pennsylvania, Virginia and Wisconsin, all battleground states.

22 **Mind the Gap** at Stanford University is an even sneakier covert group from this crowd.  
23 Their efforts haven’t previously been reported. They recently petitioned some donors for at least  
24 \$100,000 to support its efforts. Backers include people like [Facebook co-founder Dustin Moskovitz](#),  
25 former Google CEO Eric Schmidt, San Francisco power broker Ron Conway, and a coterie of major  
26 Democratic donors from across Silicon Valley, including fundraiser Amy Rao. What is also unusual  
27 is that Mind the Gap is led not by highly experienced political hands, but by academics with no  
28 professional backgrounds as fundraisers. The group’s leaders are a pair of Stanford law professors:

1 [Barbara Fried](#), who has no apparent campaign experience, and [Paul Brest](#), the former president of  
2 the William and Flora Hewlett Foundation. [Graham Gottlieb](#), a Stanford fellow who served in  
3 junior roles for former President Barack Obama's 2012 reelection campaign and in his White  
4 House, is its executive director.

5 ( <https://www.cnn.com/2016/09/09/politics/facebook-cofounder-gift-democrats/index.html> )

6 ( <https://law.stanford.edu/directory/barbara-fried/> )

7 ( <https://law.stanford.edu/directory/paul-brest/> )

8 ( <https://casbs.stanford.edu/people/graham-gottlieb> )

9 While dressed in khaki's and acting like they are "saving the trees", the people behind these  
10 groups are cold-blooded mercenaries drunk on power, hookers, private jets and a sense of being  
11 above-the-law.

1  
2 **EXHIBIT 40 – General Overview Of The Corruption Scheme**

3  
4 A crime involving stock market securities insider-trading, contracts, bribes and famous politicians  
5 occurred. Plaintiffs saw it, were invited in to it, and reported it and now a cover-up is being  
6 operated.

7 **EPlaintiff 42ANDED CAPSULE OVERVIEW:**

8 Department of Energy Staff (ie: Chu, Zoi, Seward, Cohen, etc.), White House Staff (ie: Emanuel,  
9 Axelrod, Carney, Plouffe, Gibbs, etc.), CIA staff (ie: Panetta, Woolsey) owned the rare earth (ie:  
10 lithium, indium, cobalt) mining scam stock (ie: Goldman Sachs & JP Morgan transfers) market  
11 securities from foreign countries (ie: Afghanistan, Congo, etc.) which only benefited themselves,  
12 Elon Musk and his Silicon Valley Cartel (ie: Page, Cohen, Schmidt, Westly, Khosla, Spinner,  
13 Hoffman, etc.). They ran hit-jobs and anti-trust schemes against competitors and whistle-blowers  
14 using a racketeering operation structure. They run corporate escort rings, lobbyist bribe PACs,  
15 money laundering and tax evasion joint operations and character assassination media cartels.

16 **MORE DETAILED OVERVIEW:**

17 - Famous political figures use the trillions of dollars in government treasuries and the stock  
18 market for illicit profiteering by rigging the system exclusively for themselves and their crony  
19 insiders.

20  
21 - They attacked us using government taxpayerfunded media (***Fusion GPS, Black Cube, Google,***  
22 ***Pysops, Gizmodo, Media Matters, Blumenthal, etc.***) and spy agency tools because we competed  
23 with their businesses and reported their crimes.

24  
25 - San Francisco Bay Area government has as many corrupt politicians as Chicago and relies on the  
26 same RICO-violating insider corruption network to operate; as proven by deep AI searches of their  
27 financial records. Arrests of those officials is now underway.

28 - Silicon Valley law enforcement records prove that these tech oligarchs engage in an

1 organized, racketeering-based, massive sex trafficking, tax evasion, anti-trust violating, spousal  
2 abuse, money laundering, black-listing, racist, ageist, political bribery, crony racketeering crime  
3 Cartel.

4 - Famous U.S. Senators, Governors and their staff knowingly engage in, finance, operate  
5 and benefit from these crimes in exchange for search engine manipulation and stock market assets.

6 - Silicon Valley and Hollywood media companies censor and cover-up news coverage of  
7 these crimes because they have a financial connection to the perpetrators.

8  
9 - [Most of the government officials working on Plaintiffs case were hand-picked by Plaintiffs](#)  
10 [business adversaries.](#)

11 ( [http://american-corruption.com/expose THE MOBSTERS.html](http://american-corruption.com/expose_THE_MOBSTERS.html) )

12 Plaintiffs case has never been fairly reviewed by non-biased, non-conflicted officials.  
13 Plaintiffs FBI-class associates have not found a single entity in Plaintiffs case reviews, or  
14 determinations, who was not either: financed by, friends, with, sleeping with, dating the staff of,  
15 holding stock market assets in, promised a revolving door job or government service contracts from,  
16 partying with, personal friends with, photographed at private events with, exchanging emails with,  
17 business associates of or directed by; one of those business adversaries, or the Senators and  
18 politicians that those business adversaries pay campaign finances to, or supply political digital  
19 services to.

20  
21  
22 Who are the criminal mobsters of Silicon Valley's democracy manipulation millionaires and  
23 billionaires? Who are the elitist tax evader, sex freak, money-laundering, Senator bribing, off-shore  
24 cash hiding, election rigging insiders who try to rig the system for their own insider trading  
25 schemes: **Reid Hoffman, Larry Page, Sergy Brin, Elon Musk, Dustin Moskovitz, Mark**  
26 **Zuckerberg, Eric Schmidt, Laurene Powell Jobs, Steve Spinner, Steve Westly, Vinod Khosla,**  
27 **Andy Bechtolsheim, Brian Goncher, Cheryl Sandberg, David Drummond, Andy Rubin, David**  
28 **Plouffe, Tim Draper, Jeffrey Epstein, Gilman Louie, Ira Ehrenpreis, Tim Cook, Jerry Brown,**

1 **Richard Blum, James Breyer, John Podesta, Joe Lonsdale, John Doerr, Keith Rabois, Marc**
