

UNMASKING ELON MUSK'S 10,000 FAKE FANBOY TROLL ACCOUNTS

Eventually a company that produces a product that always loses money is going to go out of business. It's just a matter of time. How do you continue turning the lights on for a company that lost \$2 billion in a year unless it is a DNC Dark Money campaign finance conduit

All three owned by the same registrant, which is an organization meant to hide whois data. Not bad in and of itself, but fishy in this situation.

Two of the three accounts created within a day of each other. All three sites registered within a six week time span. Once again, there's thousands of sites registered every day, but it strikes me as odd given these circumstances.

Finally, the earliest post on Voat from each:

Mumbleberry's stalkers are in the comments of the handful that I flipped through, and [@Mumbleberry](#) has already reported this to [/v/reportspammers](#), but I wanted to make it more visible. Mumbleberry's stalkers spammed up [/v/reportspammers](#), so what the actual fuck is going on *there*?

These domains need a sitewide ban, as do the user accounts, and also the accounts that stalk Mumbleberry as it seems clear that they're for CCP farming.

Maybe we could ask [@Mumbleberry](#) to do a submission on what he did to trigger those fuckers? I am also very much interested to know why they keep following him around spamming with accusations.

Edit: someone fucked up [his ccp](#)! It has huge downvotes on his comments!

He's an inspiration to us all. I've started doing light research in streetshitter culture just so I can insult them in a more personal manner.

I'm having the same problem as [@primerotech](#). I think you just basically provided evidence that you dox or brigade accounts that try to expose the terrorists all over California right now and that you have bots spreading the disease of Islam all over Voat.

I'd say you're fucked as I have worked for the Federal government, been sued personally by Weilbacher who is suing the city over the Thomas fire, and now you guys are engaged in an information psy op to discredit us. Why?

My inbox is overflowing.

I don't bother to read hate mail and my CCP is also low because of users like you.

Why am I getting death threats?

We are here live on the ground documenting and risking our lives to post our footage and a written testimonial account of the disasters, while you spy on people with more credentials than yourself, and publish it for views - and you call it fake when we publish the event itself and individuals correlated to said events?

I'd say we have plenty of evidence of your targeting.

You're a fucking terrorist just like the scarf wearing cunt and the Coffee Bean employees.

Even if local California officials aren't investigating, I assure you someone from the Federal government is. I won't lie or hide anything and this account may be all people have left as a witness account of an outsider of what happened when all is said and done since no arrests have been made yet of the suspects. This is an act of us exposing them even if local law enforcement has refused to do so to their own interests over that of the public.

That also means we're exposing those departments and jurisdictions as protecting those individuals for obvious reasons since they are trying to actively allow officials to obtain a judgement over a Act of God which is my right.

I will back [@primerotech](#) up on this video as I have worked in those areas recently. Yes it is really that fucking bad and I am glad someone has footage of the trashbags and posted them as I myself still am barred from those no go zones. FUCK YOU.

I'm also willing to hold to my position in public because I remember 9-11.

We don't get paid to put our ass on the line for this you motherfucking cunt.

I won't rest until I see all the assholes I keep mentioning behind bars and I don't mean the American Bar Ass.

I might also add that we came here to work, not work around an obstruction or be a free reporter on local emerging events or take the heat from your fucking crook attorneys at the county level.

basically a pajeet pr firm <https://www.linkedin.com/company/crowdfire> which shiwankaswe links to in his/her (don't give a shit) twitter account a billion times is trying to get an early (kind of early, nobody else has really gotten a good foothold) on voat.

Mumble caught them and brought them to light.

Looks like ghostnet.de which is a datacenter in germany <http://ghostnet.de/> may have a contract with the pajeets to provide their customers optics. I do not know.

alternatively, one publishing organization decided to open 3 sites and use the same host and pr firm. ???

You neglected to mention that it seems only four accounts have ever posted links to these three domains:

<https://voat.co/user/shiwankaswe>

<https://voat.co/user/fillsimmons>

<https://voat.co/user/primerotech>

<https://voat.co/user/hustonlarry>

With a few exceptions, they only post links to these three domains, and on the rare occasions they make comments, it's clear they have a very shaky command of English. Any criticism of them quickly gets heavy downvoted.

Yeah, if this isn't action-worthy spamming, shilling and and brigading, then there is no such thing.
