

What is the secret relationship between Elon Musk and Google?

By A. Dinton

Elon Musk and Google are some of the biggest contributors of political cash and services to Barack Obama, Harry Reid and Dianne Feinstein.

Barack Obama, Harry Reid and Dianne Feinstein have personally signed off on, and lobbied to give billionaires Elon Musk and Google hundreds of billions of dollars of nearly tax free taxpayer cash for no apparent reason aside from their political connections.

Elon Musk and Google have provided Barack Obama, Harry Reid and Dianne Feinstein with billions of dollars of un-reported political campaign financing in the form of search engine rigging, stock valuation pumps for stocks held by the associates Barack Obama, Harry Reid and Dianne Feinstein and for other in-kind services which have a quantifiable cash value that has never been reported to regulatory authorities.

Elon Musk and Google use off-shore tax evasion tactics and methods advised and managed by the same financial advisors.

Business partners, family members and political associates of Barack Obama, Harry Reid and Dianne Feinstein hold stock in Elon Musk's and Google's companies.

Elon Musk is quoted as saying that he was arranging to have Google buy Elon Musk's Tesla Motors.

Google is quoted as saying that they plan to exclusively use Elon Musk's Space X rockets to launch a shroud of public surveillance satellites around the Earth.

Both Elon Musk and Google are counting on taxpayer funds created by Barack Obama, Harry Reid and Dianne Feinstein through the U.S. Department of Transportation for their "driver-less car projects" which they both happened to have come up with at the same time that the DOT funds were slotted out for them.

Elon Musk's and Google have both exchanged cash and employees with a company called IN-Q-TEL. IN-Q-TEL sells tricky spy services to the CIA, the U.S. Chamber of Commerce, Columbian drug lords (In-Q-Tel's airplanes were caught with 5 tons of cocaine on-board and Elon Musk's software programmer created and operated SILK ROAD, the world's largest illegal drug network), the DNC, Hillary Clinton's Department of State and other interesting groups. Elon Musk's staff and Google's owners have both publicly applauded IN-Q-TEL's tactics in funding Google and Elon Musk's companies. IN-Q-TEL and it's sister company: New America Foundation both have Elon Musk's and Google's staff on their management teams.

In the entire history of Google, only Elon Musk and Barack Obama have had the documented search engine hype-rigging, manual up-ranking and mood manipulation results as the most synthetically highly manipulated results in all global Google search and positioning presentations. In normal language, this means that Google faked the results for both of these names, in order to operate a contrived PR campaign, while, at the same time, attacking and defaming their competitors.

Elon Musk's and Google's people co-own the stocks of each others companies.

Both Elon Musk and Google have a number of mysterious deaths associated with themselves including the deaths of Rajeev Motwani, Forrest Hayes, Gary D. Conley, David Bird, Karl Slym, Andrew Ingram, Brian M. Finn, Kenneth Bellando, Sarvshreshth Gupta, Kate Matrosova and many more. In each case, the dead person is thought to have had incriminating information on Elon Musk and/or Google.

More people from Google and Elon Musk's holdings got jobs in the White House and at top federal agencies than any other entities in the world.

Elon Musk and Google both have a financial and political need to control profiteering of the war-torn Afghanistan lithium and indium mining conglomerates. Both have deep connections with Russian mobsters who own the mining equipment in those regions. Both contributed technology and funding to implement “Arab Spring” and other political uprisings which would give them more control of those raw materials and both were the biggest recipients of the U.S. Department of Energy Cleantech Cash which was handed out by their friends: Steven Chu, Matt Rogers. Steven Spinner, Allison Spinner who Elon Musk and Google personally lobbied to have appointed to run the U.S. Department of Energy. John Doerr and Kleiner Perkins were the lead investors in all of the suspects. This makes it appear that a trillion dollar payola scam was organized by Elon Musk and Google.

If a major payola scam, using taxpayer dollars, was organized by Elon Musk and Google the very law enforcement agencies who should have arrested them happen to have been controlled by the decisions of Barack Obama, Harry Reid and Dianne Feinstein. Eric Holder, the attorney general, who ran the Department of Justice, in the Obama Administration, had stock relationships with Elon Musk's and Google's companies. Both Eric Holder and Steven Chu, who handed out the Department of Energy cash to them, were handled by the law firm of Covington and Burling who also work with the key business partners of Elon Musk and Google.

When federal investigators wrote Elon Musk's Tesla Motors a demand for a detailed safety investigation of Tesla Motors, Google's lobbyists assisted in getting the investigation terminated and Tesla still has not engaged in a complete independent public safety inspection.

Within minutes of negative news story's appearing about Elon Musk or Google companies, Google always manually hides the negative news story and replaces it with a “fluff story” about Elon Musk or Google. At the same time, key investors from both groups engage in either/or stock buy-backs and stock-pumps to artificially increase the appearance of stock valuation surges so as to seduce day traders and institutional investors that they should invest. This is fraud and constitutes the use of taxpayer funded companies to defraud taxpayers. The methods of the company called “PollyHop” in the current series of House of Cards, describes the methods used by Musk and Google.

There are quite a number of other common connections between these groups. While all of these similarities may simply be the most extraordinary set of coincidences in history, to the skilled law enforcement investigators who are pursuing this case, the matter calls for more action and less delay.
