

The Senator's Lie: How Political Pretexts Work

By Deborah Lewis – St. Louis Digital News

When corrupt politicians want to rape the taxpayers and put *your* taxes in *their* pockets they create what is known as a “pretext”

Here are some common political “pretexts”:

“Hate Speech” = We thought we controlled the news but now the public has found out about our crimes so we need this excuse to help Google, Twitter and Facebook censor any news about our crimes

“Black Lives Matter” = The DNC needs to get Blacks to vote Democrat so they can swell the voter rolls so that Dianne Feinstein and her husband can steal more money in crony DNC deals

“Open Borders” = The DNC needs to get Browns to vote Democrat so they can swell the voter rolls so that Dianne Feinstein and her husband can steal more money in crony DNC deals and Mark Zuckerberg needs this cheap labor

“Reduce Regulations” = Bankers want to do whatever they want and so to hell with the public

There are many Political Pretexts under way currently, but the one that has cost American taxpayers the most money is the “War on Terror”. That is a six trillion dollar loss to date with an expenditure of \$250 million per day. U.S. Senators make stock market profits off of it! It is followed closely by the “War on Drugs”. These two wars may have stopped some bad things but the federal budget folks call most of that money a “loss”. The only winners were the Senators who put the stock market profits from those efforts in their families bank accounts and trust funds.

The biggest, most criminally corrupt pretext in history is called the “Green Cash Crash”. The highest level politicians from Washington, DC, New York, Nevada, California and Vermont joined a cabal which raped the taxpayers of their rights, their money, their companies, their votes, and their jobs under the guise of “*saving Polar bears*”.

The Green Cash Crash was put together by Silicon Valley billionaires and the politicians that they had in their pockets: Kamala Harris, Dianne Feinstein, Al Gore, Harry Reid, Steven Chu, Matt Rogers, Jerry Brown, Ken Alex, Nancy Pelosi, Barbara Boxer, Hillary Clinton, and that gang of political prostitutes. These corrupt politicians put the Green Cash scam together and put billions of dollars of profit in their bank accounts from it. The taxpayers LOST billions of dollars from it!

The "Paradise Papers Leaks", The "Panama Papers Leaks" and Congressional investigations now prove these assertions to be true!

These politicians pocketed billions of dollars in personal stock market, search rigging and cash profits while causing their constituents to lose billions of dollars to their monopolistic Cartel. They controlled the cover-up by using their ownership of the main stream news, Hollywood and Google/Facebook/Twitter’s lock-up of the internet.

CBS News 60 Minutes TV Show did some segments about how their scam worked. The segments were called “*The Lobbyists Playbook*”, “*Congress Trading on Insider Information*” and “*The Cleantech Crash*”. When you watch all 3 of these segments on the CBS website, one after the other, you will be sickened by the audacious criminal culture that these politicians have built for themselves.

In 2006 these politicians decided that they could control who would be President by using Google/Facebook/Twitter to manipulate Obama and then Clinton into office. As we all now know, Obama and Clinton had made some dirty mining deals with Russians, worth trillions of dollars, and they promised the exclusives on those deals to Silicon Valley’s billionaire owners of Google/Facebook/Twitter/Tesla/Solyndra, etc.

The pretext that the Obama and Clinton insiders had agreed to was that “*everybody will die from Earthquakes and 1000 foot high walls of water if we don’t change the climate*”. You have now seen proof in the news that government scientists were ordered to make up data that would sell this story in order to put cash in these politicians pockets.

You have now seen proof in the news that Obama and Clinton’s personal friends were the only ones who were ever allowed to receive the government cash that would stop this fictional 1000 foot high wall of water.

Thousands of companies offered solutions to stop the apocalypse of “sad Polar bears” and “water walls”, but, for some strange and ironic reason, the only ones that ever got funding to save those Polar bears happened to be the best friends of the politicians. In an even more ironic turn of events, the handful of companies that got the money to save the Polar bears (ie: Tesla, Solyndra, Abound, Ener1, Fisker) just happened to have their stock owned by those very same politicians. In an even stranger coincidence, many of these politicians had been doing business with Russian mobsters!

Isn’t that the most amazing coincidence in history?

To be crystal clear: Kamala Harris, Dianne Feinstein, Al Gore, Harry Reid, Steven Chu, Matt Rogers, Jerry Brown, Ken Alex, Nancy Pelosi, Barbara Boxer, Hillary Clinton, and that gang of political prostitutes made up a story about an emergency that never existed so that they could take billions of your tax dollars and put it in their own pockets.

They used a “magic mirror” trick. They said “*Look over here at me waving my hands to save this cute Polar bear...*” “*...you wouldn’t question saving a cute Polar bear would you?*” ...and, as they pathetically waved their hands on one side of the mirror, they passed your money to their friends and stock-brokers on the other side of the mirror, where you could not see it being done.

These people are criminal whores who lied to you and stole your money and your America.

Demand that they be arrested!

California's Income Inequality Now Worse Than Mexico's, Poverty Level Highest In America

Spencer P Morrison News 0

 income inequality, as measured by the gini coefficient, has reached absurd levels in california

Were California a Country It'd be the 17th Most Unequal Nation on Earth, Ahead of Mexico & Guatemala

Californians love sermonizing on the plight of America's poor and disenfranchised—if only penny-pinching republicans would shell out for a bigger welfare state then all our problems would be solved. Why not build more homes for the homeless, or invest in better education for our kids? The state can solve the problem of poverty, they argue.

And to be fair, they've put their money where their mouth is: over the last few decades California has built one of America's **most lavish welfare states**. There's just one problem: it's not working.

The sad truth of the matter is that California's poverty rate is the highest in the country, at 20.6 percent. This is based on data from the US Census Bureau, and modified so as to account for differences in the cost of living between states. And if you're a skeptical "progressive" then don't worry, even **Politifact confirms** this finding.

As bad as that sounds, perhaps the more embarrassing statistic is that income inequality in California is at an all time high. This should be obvious to anyone who's actually been to California, and seen the proliferation of tent cities and urban slums:

Inequality can be encapsulated in a number called the Gini Coefficient (GC): “0” is perfect equality, where everyone earns the same income, while “1” is perfect inequality, where one individual earns everything (leaving none for anyone else). Importantly, a higher GC means more inequality.

In **California the GC is 0.488**. This is the second highest of all America’s major states, behind only New York, and it is also far higher than the national average of 0.479—which itself is inflated by absurdly high GCs from large liberal states like California and New York.

But it's only when looking at the global context do you really get a sense of how bad it is. If California were an independent country, it would be the 17th most unequal country on earth, according to data from the **World Bank**. It would rest comfortably just behind the Honduras (at 0.511), and ahead of Guatemala (0.487) and Mexico (0.482).

Now compare this to the other "social democracies" that California is wont to compare itself with: Canada sits at spot number 111, while Norway is way down the list at number 153 (out of 176 countries).

In terms of inequality, California has more in common with banana republics than the "social democracies" it emulates. Perhaps they should get their own house in order before lecturing the rest of us on the benefits of socialism.
