

Toxic Companies That Must Be Extinguished And Wiped Out Of Existence

These socially abusive, toxic, companies were forged in corruption and only exist today due to monopolistic anti-trust law violating tactics.

They bribe over 70% of Congress in order to defer regulation and worm their way through loopholes in the law.

They are money-laundering, tax evading, misogynistic, racist brutes that hire FUSION GPS, BLACK CUBE, MEDIA MATTERS, IN-Q-TEL and other “kill services” to attack and destroy competitors, whistle-blowers and reporters.

They steal their technologies from smaller inventors and bribe the U.S. Patent Office to avoid prosecution for their intellectual property crimes.

Their executives and investors run massive sex trafficking rings.

They censor, shadow-ban, delete and steam-roller their competitors on a scale so vast it defies imagination.

They, and their VC’s, conspire to manipulate politics, ideologies and industry.

They make the world, and society, a worse place because they exist. They provide nothing of value that other, non-corrupt, companies can’t provide at a lower cost with safer metrics.

They do not deserve to exist. Every member of the public must investigate them, whistle-blow on them, report them to news outlets, boycott them, expose their executives, cancel them, sue them, report them to regulatory agencies, block their stocks, and do everything in their power to cause them to cease to exist:
