

# The Death Of Silicon Valley Is Happening With A Delightful Tsunami Of Payback!

Mon, 18 Jul 2022 19:40:25, admin45789, [category: news, post\_tag: the-death-of-silicon-valley-is-happening-with-a-delightful-tsunami-of-payback]

**"...DIE SILICON VALLEY, DIE; YOU PATENT STEALING, BIASED, MYSOGINIST, RACIST, SPYING, SOCIALY ABUSIVE, SENATOR BRIBING, INSIDER-TRADING, TAX CHEATING, SEX TRAFFICKING SCUMBAGS!..."**

Have you noticed that **none** of the current decisions in politics help you and your family? The current Washington DC and Sacramento policy decisions only help the politicians, and their insider Big Tech financiers, with their insider stock market profits!

Your Senators and public officials own the insider companies that they give government money, tax breaks, exclusive government contracts and other perks to. They make government decisions based on influence peddling, revolving door jobs and stock market quid pro quo from those insider companies. Google, Twitter, Tesla, Facebook, LinkedIn, Netflix and the tech Cartel are all of the same guys, in the same Northern California counties, with the same little group of dirty bankers, CPA's, lobbyists, hookers, rent-boys and payola deals with Senators. It is an organized crime Cartel using our government like a civil garage sale of greed and corruption. They sabotage outsiders and those who compete with their company investments. They order the government agencies, who are supposed to prosecute them, to 'take-no-action'. They are political mobsters.

## [Layoffs Hit Tech Sector With Force...](#)

Ever since 2008, The United States Department of Energy has been used as a scam crony insider slush-fund to give quid pro quo payola to political financiers. All of the Dept of Energy people own the stock of Elon Musk's companies and his Silicon Valley Big Tech insiders. On this site you can see a list of over 1000 illicit and fraud charges against Musk but Musk's **Payola Politicians** (ie: Feinstein, Harris, Pelosi, Newsom) protect him from prosecution. The Dept of Energy blockades competitors to Musk because DOE staff have engaged in the largest insider trading scam in history.

Below you will find tens of thousands of articles, by tens of thousands of independent news reporters and federal investigators, proving these assertions to be true. Why are none of these big shots getting arrested? Because they bribe agency heads!

[When reality bites: Facebook owner Meta is ranked WORST performer in S&P500 as its shares continue to slump amid concern over its costly virtual world](#)

Shares of the Facebook and Instagram owner slumped to a new low Thursday, down roughly 73 percent over the past year, essentially wiping out its pandemic boom.

In all of recorded history, there has never been so much taxpayer cash given to so few people, where each, and every, one of the recipients was a friend of the politician giving away the taxpayer cash and everyone who got the cash immediately skimmed "unjust profits" and shut down the business.

**Want to help end the tech oligarch's rape of society?** Never, EVER: use, read, quote, link to, paste from, or refer to; anything on corrupt and contrived: T-Mobile - Twitter, Google - Alphabet - Facebook - Meta - Instagram - Netflix or YouTube! Don't expand their reach! Don't be their digital bitch! Stop being an addict to Silicon Valley's social media scam! Keep the battery out of your phone so Big Tech can't continue to spy on you. Did you know you CAN'T turn an iPhone off. Apple iPhone's pretend to be "off" but still monitor you with reserve power. The government should shut these companies down but they don't because these companies pay the largest bribes on Earth to politicians!

Demand that Congress shut down these big tech abusers that cause child suicides, bullying, sex trafficking, money laundering, tax evasion, political bribery, election manipulation and other social crimes. Twitter, Facebook, Google, Netflix, YouTube spy on you and rape your mind by serving manipulated content choices requires by automatically creating covert user dossiers made by spying on users' content consumption preferences and continually changing them based on psychological analysis of the users. Spy agency-type profiles created by Twitter, Facebook, Google, etc. use abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using NLP methods. They are aggregating these features per user at scale based on what rich white Democrat ideology Google programmers want. In particular, it is impractical to store the entire dynamic history of a user's interaction features, requiring the companies to use biased algorithms that selectively decay information in favor of a more liberal political representation. The more it scales, the more racist, sexist, classist, misogynistic and politically biased it gets.

The history books teach that San Francisco was founded by **Prostitutes, Pirates And Gangsters**. That crowd still runs San Francisco, even in modern times. These criminals expanded south of San Francisco to Silicon Valley based on Stanford University institutionalizing and teaching business corruption to sociopath frat boys. They then took their circus of bribery and insider trading to Washington, DC and the rest is history.

**For example: All of the money that the U.S. Department of Energy gave out during the Obama and Biden Administrations only went to the friends and financiers of the Obama and Biden Administrations. Anybody that applied for the money, that competed with the friends and financiers of the Obama and Biden Administrations were cut-off and de-funded. The staff and politicians in the Obama and Biden Administrations owned the stocks of those few who got funded and went to work for them after they left Washington. It was as blatant a quid-pro-quo revolving door scam as anyone had ever seen. (ie: Solyndra, Tesla, Abound, Abengoa, etc)**

**In another example:** Feinstein's family owned and controlled A.) Government trained attack 'spies' formerly with the CIA, NSA, etc., B.) The leasing contracts for Tesla and Solyndra, C.) Their office staff that threatened competitors in writing and in-person, D.) the financing for Tesla and Solyndra, E.) The construction services for Tesla and Solyndra, F.) The staffing company for Tesla and Solyndra, G.) The adjacent railroad services for Tesla and Solyndra, H.) Key suppliers for Tesla and Solyndra, I.) Goldman Sachs cooperative relationships for Tesla and Solyndra, J.) Transitions from their own Senate Office staff to revolving door jobs at Tesla and Solyndra, K.) Government decisions for Tesla and Solyndra, L.) The relationship incentives between Google, Tesla and Solyndra and that Senator's campaign financing to that Senator; and other illicit conflicts of interest. Her husband: Dick and her daughter: Kathy, even confessed to these schemes to a whistle-blower, while being recorded. Competitors owned the competing electric car companies and technology that would have obsoleted Tesla, Google and Solyndra and was the first to begin negotiations with the factory that Tesla later took over at the insistence of that Senator, even though Elon Musk appears in news reports, previously stating that he saw no use for the building for Tesla. Feinstein put a hit job on them to protect her own stock market shares.

Silicon Valley has had the largest number of Congressional hearings against it, BUT the least number of regulations imposed on it. Why? You can look no further than the covert ownership of Silicon Valley by elected officials. Our politicians get paid bribes, by Silicon Valley, to keep the political corruption alive and well while they operate, with impunity, as the biggest threats to society ever manifested.

**While the FBI, FTC, DOJ and FEC are supposed to objectively prosecute this case, it is impossible for them to be objective when their raises, promotions, house payments and stock market profits are entirely determined by the individuals we are charging with these crimes.**

Like ravenous bears coming out of hibernation, Americans are emerging now from a lengthy sleep, surveying a barren landscape not of their own making, and preparing to go on a rampage at the polls. On and after November 8, 2022, the true villains will finally be brought to account for despoiling this once-great nation.

A rout is baked into the cards—not simply a Red Wave or even a Red Tsunami, but a brutal and abject rejection of "know-nothing" politicians in both parties who act insolently as "know-it-alls," even as their policies and moves define economic and geo-political failures downward.

This reckoning is long overdue—we have been too willing to follow the prescriptions of supposed "thought-leaders," too trusting that career politicians and bureaucrats in both parties have our best interests at heart, too tolerant of epic corruption and its odious consequences, and too accepting of breathless media accounts that whitewashed the economic destruction and mayhem perpetrated against families and households by a gorged and now gargantuan, soul-destroying super state.

Today, after almost surrendering control over the United States of America to a cabal of self-selected globalist insiders, we see clear signs that individuals and parents have finally woken up to dread reality—most of us are each much worse off financially since 1989. That was when we began to be herded down a futile path that shipped livelihoods abroad while channeling untold resources to government officials who stubbornly refuse to take responsibility for wasting so much of our nation's wealth and borrowing power.

To grasp the reality, we need only assess statistics put out by the Federal Government concerning household income in [2007](#) and [2021](#), from moments prior to the most recent financial collapse to just before the looming disaster, and put out by the [Federal Reserve Bank System](#) concerning inflation.

Image: [Grizzly Bear](#) by Gregory "Slobirdr" Smith. [CC BY-SA 2.0](#).

This information shows, without doubt, that household incomes for the bottom 80% of earners have not kept pace with estimates after official inflation, let alone after the higher rates that likely do operate to hurt too many of us, too profoundly.

At their core, the 2022 elections will be about plunging household earnings, soaring crime, and arrogant incompetence that put the long American experiment with ordered freedom on the brink of final jeopardy. Climate change, social justice, and abortion will animate some, but will not work as issues, alone or together, to stem the deluge of righteous discontent over public sector failures that has been bottled up for much too long.

Until the elections actually happen, no pollster will be able to predict, state-by-state and race-by-race, how many voters will swarm to the polls nor how they may actually vote. Demagogues in the Democrat party and Never-Trumpers in the Republican party have slathered too much poison over the American body politic. This is especially shameful amongst Republicans, for the Never-Trumpers refuse to understand that critics of the badly broken *status quo* are certainly patriots, most definitely entitled to demand an end to the punishments inflicted upon this

nation by those "who believe they must be obeyed."

Moreover, only blinkered slaves in thrall to Washington, DC, masters in both political parties believe what may have happened on January 6, 2021, is remotely as dangerous as the criminal riots instigated by these same puppeteers that destroyed portions of many cities across America during 2020, and continue at a slow burn to this day.

Biden, for one, plainly more addled than ever, stubbornly claims "the American economy is strong as hell," when, what he actually must mean is "[welcome to hell](#)." Hell, in our case, is the present wreck he instigated that anyone with an IQ measured in double digits or above sees and has been grappling with from Inauguration Day 2021 forward.

Enough is finally enough. Soon, you will see progressives and conservatives vote together to tame and then constrain the forever-war lobbying machine that has turned back the clock to a time when nuclear conflict is an incipient reality rather than an impossible nightmare.

Enough with the torrents of nonsense. Borderless places, particularly in once-rich nations, open doors to the chaos that reigns in ill-conceived American "sanctuaries." There, violent crime rages, hurting most the vulnerable communities of lower-income inhabitants, including those who thought they had escaped foreign terrors only to find worse ones inside our fifty states.

Enough letting closed minds pour garbage "thinking" down the throats of too-trusting impressionable and precious youth in too many classrooms. Learning must again become an essential part of life's too-short endeavor. Education must push all of us to re-evaluate continually what some claim may be truths, testing these as new, potentially more inspired perspectives come to light.

In 1796, in his farewell address to the nation, George Washington, America's first President under the U.S. Constitution, [sagely warned](#) of the perils of despotic governance, the kind seen now under Joe Biden or, earlier, under George W. Bush, when three branches of the U.S. government are controlled by a single party.

The alternate domination of one faction over another, sharpened by the spirit of revenge natural to party dissension, which in different ages and countries has perpetrated the most horrid enormities, is itself a frightful despotism. But this leads at length to a more formal and permanent despotism.

In any reasonable scenario, despotism will be rolled back after November 8, 2022, for a period of months and, one hopes, honesty will infuse a new national debate about our proper priorities in the future and about our many mistakes in the past.

Each of us must vote for candidates we expect will actually end the bi-partisan nightmare perpetrated by dynastic, grasping political families and their ilk.

We must vote to save American life and American justice under the U.S. Constitution, fairly administered without fear or favor.

Above all, we must vote our consciences, freely considered.

Otherwise, many worse failures than we have seen so far certainly are an option.
