Want to help end the tech oligarch's rape of society? Never, EVER: use, read, quote, link to, paste from, or refer to; anything on corrupt and contrived: Twitter, Google - Alphabet - Facebook - Meta - Instagram - Netflix or YouTube! Don't expand their reach! Don't be their digital bitch! Stop being an addict to Silicon Valley's social media scam! Keep the battery out of your phone so Big Tech can't continue to spy on you. Did you know you CAN'T turn an iPhone off. Apple iPhone's pretend to be "off" but still monitor you with reserve power. The government should shut these companies down but they don't because these companies pay the largest bribes on Earth to politicians!

Demand that Congress shut down these big tech abusers that cause child suicides, bullying, sex trafficking, money laundering, tax evasion, political bribery, election manipulation and other social crimes.

Twitter, Facebook, Google, Netflix, YouTube spy on you and rape your mind by serving manipulated content choices by automatically creating covert user dossiers made by spying on users' content consumption preferences and continually changing them based on psychological analysis of the users. Spy agency-type profiles created by Twitter, Facebook, Google, etc. use abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using NLP methods.

They aggregate these features per user at scale based on what rich white liberal ideology Google programmers want. In particular, it is impractical to store the entire dynamic history of a user's interaction features, requiring the companies to use biased algorithms that selectively decay information in favor of a more liberal political representation. The more it scales, the more racist, sexist, classist, misogynistic and politically biased it gets.

**EVERY advertiser on Twitter, Facebook, Google, YouTube, LinkedIn and Instagram should be boycotted, sued, black-listed and shamed!**

Not content with monitoring almost everything you do online, Facebook now wants to read your mind as well. The social media giant recently announced a breakthrough in its plan to create a device that reads people's brainwaves to allow them to type just by thinking. And Elon Musk wants to go even further. One of the Tesla boss's other companies, Neuralink, is developing a brain implant to ...

Already, there are remote-controlled drones which are driven and robots that move their arms with the thoughts of your mind. The Chinese have tested using this technology for controlling robots for their soldiers and the list goes on and on, this isn't new. Jepsen isn't the only Silicon valley technocrat trying to push mind reading technology.

Targeting the evils of institutional racism, economic injustice and the oppressive state-security forces compelling observance of this regime, the central idea was that a society and a process that condones systematic impunity of state officials cannot claim to be democratic. Having abandoned the rule of law, the regime lacks legitimacy.
