## WIKI NEWS PAPERS: THE NEW POWER IN MEDIA

Reddit, Google, YouTube, Facebook, and others, thought they could get away with censoring public opinions, political statements and personal art.

### **They were wrong.**

Behold the vast departure of users from those sites. Nobody likes to get manipulated and used like a tool.

Behold, also, the vast departure of advertisers and viewers from network and cable television.

Behold, also, the many articles, on-line, about the so-called "Age of Transparency".

Hundreds of thousands of independent publishers have taken up the Clarion Call of the public for information that is not controlled by one of six billionaires who own all of the Old School media.

Shop around online for a few new sources for your information. Use a few different ones, book mark them, and check them often.

Take a look at the policy for all of the new WIKI News Publishers. Many of them have this clearly posted on their sites:

***Please don't try to sabotage, or censor, our news WIKI. Here is why:***

***We follow the Alliance of WIKI Media Protocols -***

***"We are members and supports of the ACLU. We file and launch complaint investigations with them when someone violates our public information rights.***

***All of the media posted here by our members is compliant with the Fair Use Doctrine, if it is not, and you can demonstrate that, we will remove it.***

***All of the media posted here by our members is compliant with the EU Information Rights Doctrine, if it is not, and you can demonstrate that, we will remove it.***

***All of the media posted here by our members is compliant with the First Amendment Rights of the United States Constitution, if it is not, and you can demonstrate that, we will remove it.***

***All of the media posted here by our members is compliant with the laws of Freedom of Press, if it is not, and you can demonstrate that, we will remove it.***

***If you censor, sabotage, spoof block or DDOS our WIKI we will sue you. There are now many First Amendment law-firms in the U.S., Australia and Europe who will undertake such cases at no cost to us.***

***If you censor, sabotage, spoof block or DDOS our WIKI we will work together to use publicly available information to source your financial backers, their assets, their tax loop-holes and any un-reported suspect activity, they may be involved in, and provide that information to law enforcement and related authorities.***

***If you censor, sabotage, spoof block or DDOS our WIKI we will expose you. Our Alliance has access to more than 300 million readers, users and members of the public. Along with the Alliance out-reach, social media postings, blogs, press releases, tweets and other PR resources. We will make certain that everyone, that needs to know, does know, that your brand, organization or operation is practicing unethical and/or illegal and/or non-transparent activities on behalf of special interests."***
