

NON-FEDERAL FUNDING CERTIFICATION FOR HYDROGEN
RESEARCH AND DEVELOPMENT
UNDER HYDROGEN FUTURE ACT OF 1996

In accordance with requirements of the Hydrogen Future Act of 1996 for research and development activities, "The Secretary shall not consider a proposal submitted by a person from industry unless the proposal contains a certification that reasonable efforts to obtain non-Federal funding for the entire cost of the project have been made, and that such non-Federal funding could not be reasonable obtained." 42 U.S.C. § 12403 (g)

As an authorized representative of a company that intends to submit a proposal under the Hydrogen Future Act of 1996, I certify that reasonable efforts were made by my company to obtain non-Federal funding for the entire cost of the proposed project. Such non-Federal funding could not be reasonably obtained.

A brief description of the efforts made by my company to obtain non-Federal funding is as follows:

Angel and venture Capital Sources were sought. The market had closed due to the economy. City and State funds were sought but funding groups were inactive in this time-period.

Title of Proposed Project: Solid State Hydrogen Storage Reduced Infrastructure Requirement Chemistry/Hardware Optimization Study

Company Name: FuelSell Technologies Inc.

Company Address 601 Van Ness Ave, Suite E3613, San Francisco, CA 94102

Telephone Number 415-978-2301
