

# Political Crimes Of The Future Here Today

Mon, 05 Sep 2022 13:32:10, newstips66, [category: brotopia, category: community-service-programs, category: elon-musk, category: facebook-meta, post\_tag: political-crimes-of-the-future-here-today, category: senator-insider-trading, category: silicon\_valley\_death, category: sony\_pictures, category: stanford\_univ\_bribes, category: tesla\_motors\_lies\_and\_defects, category: web-spying, category: worldnews]

## THE OVERVIEW DETAILS...

The 30+ companies who witnessed these crimes have made certain that every single law enforcement, regulatory, congressional investigation and investigative journalist office has the complete information on this case. Not a single agency, investigator or task force has denied that any of these criminal actions took place. The companies have requested that agencies and investigators inform them if they are laboring under any misconceptions, or misunderstood any of the evidence. To date, not a single investigator has stated that any of the conclusions are erroneous. While the public is very aware of the "Solyndra" portion of the case, the public has not been shown the entire Solyndra investigation case files, nor seen the follow-on investigations, which implicate some very well-known parties.

So far, not a single agency, investigator or task force has filed a major criminal indictments against the primary parties involved, because the perpetrators are very large investment banks, technology companies and billionaire campaign backers who have ordered cover-ups, and delays, to be enacted. Smaller players have been fired or forced to resign from federal jobs, Steven Rattner was indicted for securities fraud. Raj Gupta was put in jail. Some of the front companies were bankrupted, but the big crimes are still underway and they affect every American taxpayer.

There are now over 200+ whistle-blowers, evidential witnesses and corroborating testimony experts willing to testify, publicly, in an open Congressional/law enforcement network-media-broadcast hearing. The witnesses are prepared to swear, under oath, to the truth of their statements. To date, no party has accepted responsibility for organizing such a hearing.

In short: This was a massive kick-back, stock fraud, insider trading crime!

[Notice, in the documentary above, that all of the Chinese end-holders are connected to 4 specific U.S. Senators.](#)

(The following information is based on hundreds of thousands of pages of evidence, a large number of videos, and many federal, state and major news organization investigation case files which are now available to attorney's) Draft 1.9

This may sound unbelievable to some. For those who read the news, things as unbelievable as Genocide, Bernie Madoff stealing billions of dollars, 76 million customer bank accounts getting stolen from JP Morgan, and tens of thousands of other strange things, happen every day.

The story of one of the cases:

## Innovation Vs. The Dirty Politicians!

So an American small business walks into a conference room...

...and accidentally steps into the middle of a multi-hundred billion dollar government embezzlement scheme.

So they did the right thing, the thing they were taught to do in school: (ie: "tell the nice policeman about the bad thing you saw") and reported the crime.

Then the bad guys tried to have them "killed", in every sense of the word. They put a "Hi" on them. (Additionally: Whistle-Blower Gary D. Conley, Wall Street Journal Reporter David Bird, Technologist Rajeev Motwani and over 40 other persons who reported on this matter, died under mysterious circumstances during the course of this investigation. They were all in perfect health the day prior to their deaths)

In this once case, This small American company was working for the government. They had been asked to: "...help Save America" by providing the next generation of jobs and energy technologies. Then they saw something they weren't supposed to see. Something involving big political figures and organized crime at the highest levels.

The bad guys stole massive amounts of taxpayer money. The Small American business knew that that sort of behavior was just WRONG. The bad guys specifically targeted **The Small American business, in retribution for reporting the crimes, and set about seeking to wipe their business out.**

Later, they called the one guy's employer and sabotaged his job, after manipulating a vast number of online data-bases in order to damage his revenue potential. It was a very sophisticated attack.

That was the final straw!

So **most of the other people that had been damaged and attacked by the bad guys created an ad hoc task force, comprised of highly effective legal experts, federal cops, federal investigators, intelligence officers, journalists, citizens, policy experts, and others, watching and backing the investigation up. Using both the traditional, and non-traditional legal system. They set about fixing that part of the public policy process.**

As of today, it has cost some of the most powerful people in the nation their jobs, their companies, their power and their brands. New laws have been written, and placed into effect, which makes it harder for bad guys to be bad in those ways. A large contingent of public and private members have joined the ad hoc task force and are now on around-the-clock duty watching for bad guy activities.

Then things really got interesting...

After previously winning a congressional commendation, mayoral proclamations, state assembly proclamations, hundreds of letters of commendation and being awarded a federal grant and [a historical set of federal patents for one of their technologies \(which eliminates the need for gasoline\)](#), **The Small American business built fully functioning versions of the technology and were then asked, by the Government, to put the sub-system in a full system, to demonstrate the value to taxpayers.**

Unfortunately for them, **The Small American business chose to demonstrate with cars.**

This brought the wrath of the Detroit Big-3 (Old-school cars & oil fuel), the steel industry (alternative energy cars don't use much steel), The oil industry (Because hey, it's Oil) , the battery industry (Which campaign financiers had invested in) and a bunch of Senators, with insider trading deals and kick-back schemes, down on **The Small American business; because [That Small American business product would change the profit and power-control chain for those old-school cartels.](#)**

Then federal investigators interviewed **The Small American business because they had received complaints from almost every other applicant in the DOE program, about the rigging of the Energy program. During those discussions, with federal officials, The Small American business was informed that criminal activities may have been undertaken by federal employees.**

FBI Raids, famous agency head departures, Solyndra, famous company bankruptcies, 60 Minutes investigations and a whole slew of revelations followed, revealing that, indeed something had been "Rotten in Denmark". **The Small American business has now been informed, by investigators, which this may have all been about a \$300+ Billion campaign funds laundering thing, via "CleanTech" investors, but that is up to a Special Prosecutor to figure out.**

The Small American business went off and did a new technology ( SEE "FIRECHAT" and "SERVAL" SOFTWARE in online searches, for example) but a retribution order had already been put on them and a series of media, economic and physical "hit jobs" were undertaken against them.

[As "payback" A hybrid "spy marketing group" \(a rogue operation\), was sent in to acquire The Small American business technology and redistribute it for free in order to eliminate its value, this was timed with a media attack coordinated by a sleazy tabloid company who worked with the attackers. This part of the attack included hatchet job hit articles and an attack video. The attack articles and videos were replicated on the web by the tabloid company and a major search engine, in one of the largest re-percussive search engine manipulation attacks ever deployed on the web, aside from Presidential candidate character assassination attacks.](#)

[Investigators and major media journalists have now reported that over \\$300M U.S. dollars has been spent copying, "adjusting" and distributing The Small American business patented technology, which the hybrid spy marketing group coordinated the swipe on. Investigators now have some of the PO's from this outside incursion. A major global newspaper exposed part of the story. NSA has recordings of some of the bad guys rigging the deals. A Special Prosecutor can get ahold of them.](#)

The Small American business, federal investigators and journalists have now, independently, been able to confirm most of this information via news, FOIA and investigator case files. The 60 Minutes episodes called: THE LOBBYISTS PLAYBOOK and THE CLEANTECH CRASH (SEE VIDEO FILES, BELOW) are a good place to start. There are two federal lawsuits before judges about part of this, you can read them on PACER. There are more coming... There are now hundreds of thousands of pages of evidence, a large number of videos, and many federal, state and major news organization investigation case files available.

This group is bi-partisan. They have glowing letters from Ronald Reagan as well as pictures hugging with Hillary Clinton and Warren Buffet.. They are just Anti-Corruption.

The U.S. Attorney General has now resigned. This brings to 88, the number of high level Washington resignations, by people that are "persons-of-interest" in this case. Most members of the public would recognize the names. Some of these parties have now been indicted. Some media outlets refer to this matter as: "potentially, one of the biggest corruption scandals in American History!"

As someone once said: "When the people that are supposed to protect you are, themselves, engaged in organized crime, and then they do some of those organized crimes AGAINST you, you tend to take a dim view of those people..."

---

*"Corrupt politicians, and criminals, who engage in crimes in the dark will always, eventually, have to face the light. Welcome to the AGE OF TRANSPARENCY"*

This site has been replicated on a vast number of mirror servers. Any take-down attempts will be trace-routed back to source and crime-reported, *Constitutionally* charged and the individuals, and their sponsors litigated, against. Hard bound copies from LuLu, and other printing services, as well as DVD's of this site, and the top 4 reference sites, are provided, on request, to all members of The U.S. Congress, weekly. Multiple federal law enforcement agencies are now advising. All material provided by agencies, reporters and witnesses. No illegal material is on this site, but investigators do have much material in hand that the public has yet to see.
